Beckwith issued 500 invitations, each bearing a Washington's Birthday and Indian Day decoration, with return postcards attached. The invitations were attractively written. Music was furnished during the evening, both before and after the lecture.

EVERYONE VISITED RAY DAY ON FEBRUARY 22

TACOMA, Wash.—Ray Day, Indian agent in this city, had it all his own way on February 22, otherwise Indian Day, his quarters being the center of attraction for riders of all makes of machine. The setting aside of this day for the Indian reception proved all that he had anticipated, for not only were numerous prospects secured, but several deposits were had for early delivery.

STEELE ENTERTAINS 150 AT LUNCHEON

PATERSON, N. J.—John Steele observed Indian Day by giving a light luncheon to his 157 visitors on February 22. The luncheon was washed down by both light and heavy oil (beer and soda), and many kinds of sandwiches were on hand. Steele closed several sales, and his prospect list has swelled considerably as a result of the celebration. "Most of them are for Powerplus twins with spring frames, but a few are for Featherweights.

HOUSE AND BERNARD HOSTS AT WHEELING FETE

WHEELING, W. Va.—Wesley House, local agent, assisted by Harvey Bernard, Hendee traveller, played host to more than 100 visitors on February 22. In the morning and afternoon the visitors crowded House's agency to see the Powerplus and other Indian models, while House and Bernard explained the details. In the evening Wesley treated his guests to a fine spread, at which music was furnished. The Wheeling M. C. attended in a body. Souvenirs in the shape of Indian match boxes were presented to all who attended the annual gathering.

WOLF BROTHERS ENTERTAIN A BIG CROWD

ALTOONA, Pa.—W. H. and L. C. Wolf, Indian representatives, sent personal letters to all members of the Blair County M. C. to aid them in assisting at the Indian Day celebration, and the members attended in a body. Throughout the day several hundred admirers of the Red Indian visited the Wolf store and admired the Powerplus and Featherweight models on view. Souvenirs were given each visitor, these being attractive match cases bearing the Indian head and embossed Hendee trademark.

E. S. Firestone, San Francisco manager for the Firestone Tire & Rubber Co., of Akron, O., has sailed for Honolulu. His trip to the Hawaiian Islands will be one combining business and pleasure.

J. J. Mayl is now managing the Firestone Tire & Rubber Company's branch in Memphis, Tenn. He was formerly with the B. F. Goodrich and the Firestone forces in St. Louis, Mo.

Max G. Hillman, district sales manager in Detroit, Mich., for the Willard Storage Battery Co., has resigned. He was with the Willard firm for over seven years.

J. A. Peterson is traveler for the Firestone Tire & Rubber Company, of Akron, O., in and around St. Louis, Mo. He succeeded J. J. Mayl, now managing the firm's branch in Memphis, Tenn.

S. Hunter Richey, formerly manager of the Anderson, Ind., branch of the Russell M. Seeds Co., advertising agent, has resigned and joined the staff of the J. Walter Thompson Co., of New York.

F. E. Titus has been appointed general manager of the Buffalo, Rochester and Syracuse, N. Y., branches of the B. F. Goodrich Company, with headquarters in Buffalo. He was for a number of years manager of the Pittsburgh branch of the company.

S. S. Jenkins is now district manager at Detroit for the Willard Storage Battery Company. He was formerly manager of the firm's Indianapolis branch.

E. Resser is managing the Indianapolis branch of the Willard Storage Battery Company, succeeding M. G. Hillman, resigned.

A. J. Fox is now managing the Toledo, O., branch of the B. F. Goodrich Co., of Akron, O. He succeeded H. W. L. Kidder, promoted to the Cleveland district.

L. G. Falck is now representing A. R. Mosler & Co., maker of Mosler spark plugs, in New York State excepting New York City. He is well known in the motor accessories field.

G. A. Richards is managing the Pittsburgh, Pa., branch of the Firestone Tire & Rubber Co., of Akron, O. He was branch manager at Columbus, O., for the same firm for three years. His appointment was announced at the recent Firestone agents' convention at Columbus.

NO MORE PRICE-CUTTING ON STOLL TANDEMS

HAVING learned that a motorcycle supply house, catering to riders, has listed the Stoll Combination tandem No. 2 at $9, delivery charges prepaid, without the knowledge or consent of the makers, the Stoll Manufacturing Company, of Denver, Col., formally announces that all discounts to the offending firm have been withdrawn. The list price of this tandem is $10.

This action is taken by the Denver company in pursuance of its policy to demand fair dealing from all its representatives and as a protective measure in behalf of the trade men who sell the Stoll products at the proper list prices.

"We have always maintained our standard list prices," said President Frank M. Stoll, in discussing the matter, "and we always will. I certainly do not sanction any price-cutting schemes

ADAMS LEAVES STEWART-WARNER

CHICAGO, Ill., Feb. 29.—Gridley Adams, advertising manager of the Stewart-Warner Speedometer Corporation, is leaving that company to join the Macavoy Advertising Agency of Chicago, having bought an interest in the company.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

GRYGLO, Minn.—The Olson Implement Company has opened a store, carrying a stock of bicycles, mechanics' tools and general hardware. Catalogs from jobbers and makers of bicycles, small tools and lubricating oils are requested.

KIRKSVILLE, Mo.—The Helme-Eggert Hardware Company has been incorporated with a capital stock of $10,000, to deal in bicycles, bicycle accessories, small tools and lubricating oils. The firm is desirous of hearing from makers of these commodities.

CRESCO, Iowa.—Lomas & Farnsworth have sold their hardware business to the Lomas Hardware Company, which requests catalogs on bicycles, small tools and lubricating oils.

BUCKLEY, Ill.—The Buckley Department Store has been opened here by H. H. Akeright and G. O. Stremmel. Catalogs on bicycles and tools are requested.

SPRINGFIELD, Ill.—Fred P. Schlitt will shortly open a new hardware store on 407 East Adams street, where he will specialize in small tools, lubricating oils, etc. Catalogs and price lists in these lines are requested.

WAUKEGAN, Ill.—John L. Schad & Co., have moved to 114 Genesee street and will increase their general line of goods. Catalogs and prices on bicycles, accessories, and small tools are requested from manufacturers and jobbers.

MUNCIE, Ind.—The By-Lo Hardware, one of the chain of By-Lo stores, at 114 South Walnut, is requesting catalogs of bicycles, automobile accessories, lubricating oils and small tools.

CLEAR LAKE, Iowa.—The Carpenter-Hill Hardware Co. is to open a store here. Catalogs are requested on bicycles and supplies, small tools, lubricating oils, etc.

ENDURANCE RUN TALK AMONG SAN DIEGOANS

SAN DIEGO, Cal.—Russell Grenfell is meeting considerable encouragement toward bringing around an endurance run which he wants to see San Diego riders pull off as soon as the river crossings between that city and Los Angeles are in a little better shape.

The idea is to start two men on each of the makes of machine entering, and let them battle their way from Los Angeles through the fords and over the trestles to the 1916 Exposition City.

BRUSCHI'S RIDE BROUGHT QUICK BUSINESS

SAN DIEGO, Cal.—Everybody in San Diego who ever looked at a motorcycle went around and took another look when the indomitable trio, Bruschi, Bowell and Coe, returned from Los Angeles with the photos and testimony proving their remarkable ride described in the February 17 **Motor Cycle Illustrated.**

This demonstration helped business with every motorcycle dealer in San Diego, and Bruschi had sold 12 machines directly traceable to its influence a few days after the middle of February.

HENDERSON CHIEF TRAVELS BY MOTORCYCLE

LOS ANGELES, Cal.—T. Lee, one of the organizers and controlling partners in the California Henderson Motorcycle Sales Corporation, says it was a happy day when pressure of demand for the four-cylinder machine forced him to get out on the road to take care of their dealer customers. He has been traveling on his motorcycle for some weeks in all parts of Southern California, and is not only rejoicing over the business situation, but is enthusiastic on the benefits to his own health and the enjoyment derived from this method of covering his big territory.

ASHCROFT IS AD. MANAGER FOR U. S. TIRE CO.

RALPH W. ASHCROFT, who for three years has had charge of the publicity of the Canadian Consolidated Rubber Co., Ltd., of Montreal, Canada,

Ralph W. Ashcroft

has been appointed advertising manager for the United States Tire Company, of 1790 Broadway, New York. In his new capacity, Mr. Ashcroft will supervise the Canadian publicity, as well as that in the United States.

Mr. Ashcroft was born in Cheshire, England, some 40 years ago, and after graduating from Waterloo College, came to New York City in a secretarial capacity. After five years of this work he entered commercial journalism. He was manager of a New York export house, and while in such a position was credited with having shipped the first American automobile tires to Europe. A set of these were for the late King Edward VII's Daimler car.

Mr. Ashcroft has travelled extensively. He is a member of the Circumnavigators' Club. He has visited the Far East, including India, Ceylon, Burma, Java, Sumatra, and Straits Settlements.

GOODRICH MAKES DRIVE FOR BOY RIDERS

AKRON, Ohio, Feb. 29.—The B. F. Goodrich Company, in its 1916 bicycle advertising campaign, will make a special drive for the boy. Advertisements will appear in various boys' magazines, comparing the construction of the "Giant" black tread bicycle tire with the Goodrich automobile tires and indicating the points of similarity. The boys will also be told that with each purchase of a Goodrich tire they will be given free a copy of the "Boys' Guide Book," telling how to make a boomerang, how to build a camping tent, etc., and also a beautiful pennant.

A supply of these books and pennants will be given to each Goodrich dealer and they will also receive this year the same assistance along publicity lines as during the past season. With every ten pair of Goodrich bicycle tires, the Akron factory is giving the dealers a handy display rack free of charge.

FREIGHT REBATE ALLOWED ON 1912 SHIPMENT

ANOTHER interesting development in the freight rate situation comes in an announcement that the Interstate Commerce Commission has upheld a claim of the Pilcher Hardware Company, of Ida Grove, Iowa, for reparation in connection with the charges paid on one motorcycle between Milwaukee, Wis., and Ida Grove in 1912. Freight charges were paid to the amount of $6, at two and one-half times the first-class rate of 80 cents per 100 pounds.

The Commission found that the freight rate was unreasonable in that it exceeded one and one-half times the first-class rate concurrently in effect, and the Pilcher Hardware Company was therefore declared entitled to reparation in the sum of $2.40.

The case is worthy of note chiefly because it dates back to 1912. The Western Classification has rated motorcycles in less than carload lots at one and one-half times the first-class rate since February 14, 1913.

DAYTON DEALERS ASSOCIATION READY TO BOOST

DAYTON, Ohio.—The third annual election of officers of the Motorcycle Dealers' Association, of this city, was held February 24, at the headquarters of the Dayton Motorcycle Club when the following were chosen for the ensuing term: W. J. Teubner, president; R. E. Budroe, secretary-treasurer.

When the officers had been selected a number of business matters of general interest were discussed, and the Association also went on record as favoring a boosting campaign during the coming summer. Plans are under consideration for a number of sociability events on which the dealers and riders will co-operate.

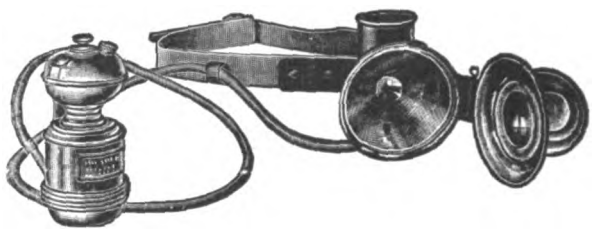
BRILLIANT SEARCH LIGHT HAS DOUBLE LENS

Novel Acetylene Lamp Is Worn on Head and Generator Is Carried in Pocket—Adaptable to Variety of Uses



RIDERS of power and pedal machines will be interested in the Brilliant searchlight, the product of the Brilliant Search Light Mfg. Co., 402 West Superior street, Duluth, Minn. Unlike the generality of cycle lights, the Brilliant is worn on the head of the rider, and puts the light in any position that the rider desires. Its effective range is 200 yards.

The Brilliant search light consists of a lamp fitted with a 3½-inch lens, a head strap, an acetylene generator and the necessary tubing. The lamp has a double-walled chimney which prevents overheating. The main lens occupies the front of the lamp and there is a hinged bulls-eye lens which can be swung in front of it to concentrate the light for long range work. The lamp also has darkening doors to shut off the light entirely. The burner base can be removed and used as an open light when desired. The reflector is removable. Finish is black. Riveted construction is used throughout. The finish is substantial and the lamp needs no polishing.

The strap is adjustable to suit the wearer and the lamp is firmly attached to it. The generator is of the drip type and has a capacity of 4½ ounces of carbide. The lamp will burn on this change from four to 12 hours, according to the size of the flame used. The generator can be carried in a pocket or at the wearer's belt. The tubing has a wire coil inside to prevent kinking.

The Brilliant search light is priced at $6 with both single and bulls-eye lenses, but can be had with the single lens only for $5. It may also be had with an interchangeable lens combining both the single and double for $6.50. The complete outfit is packed in a strong wood box.

For those who desire a more complete case, the firm offers a harness leather carrying case, nickel trimmed and fitted with a lock. This case, listing at $7.50 will take the lamp outfit, a two-pound can of carbide and two metal boxes for extra parts. A heavy fibre case, waterproofed, with a capacity of the lamp outfit and a two-pound can of carbide is offered at $1.

The maker points out that with the search light worn on the head, the light stays with the rider at all times. When effecting repairs, the light is thrown directly on the machine and the same is true when road signs have to be consulted. The Brilliant search light has been well tried out in scouting, cycling and mining services as well as in trapping and hunting and has stood up under extremely rough usage at all times.

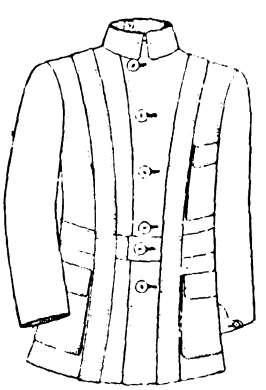
INDIANS ATTRACT AT MEDAL WINNERS' EXHIBIT

NEW YORK, Feb. 27.—Indian motorcycles, which were awarded the Grand Prize at the Panama-Pacific Exposition last summer, were prominently staged in the Grand Central Palace last week at the Panama-Pacific Medal Winners' Exhibit. The display included a Powerplus twin, a Featherweight two-stroke, a Little Twin and one of the show mounts from the Exposition. The booth was the center of attraction each day and night of the week during which the affair lasted.

The Medal Winners' Exhibit included all grand prize winners at the big West Coast fair and a great variety of articles of commerce were displayed. The school authorities of Greater New York called attention to the educational value of the exhibition, and as a result there was a large attendance of public school pupils as well as older people. J. L. Seidell was in charge of the Indian exhibit for the Hendee Mfg. Co.

KANT LEAK SUITS ARE WATERPROOF AND FIT WELL

WITH the variable weather of the late winter and early spring, riders and their passengers will be interested in clothing, which combines protection with style and comfort. The Richard F. Hill Mfg. Co., of 217-219 High street, Newark, N. J., has been catering to such a demand in its "Kant Leak" line of motorcycle clothing in various fabrics and weights suitable for all weathers. All are waterproof and neat-fitting.

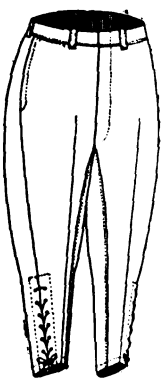


Kant Leak Jacket

For men, the "Kant Leak" suit consists of coat and riding breeches. The coat is cut on the Norfolk style with three outside pockets, one left breast and the other two in the skirts on each side. The pockets are fitted with flaps and are strong enough to carry tools, if the wearer so desires. The collar is high turn-down, protecting the throat. The sleeves are fitted so that there will be no cramping when using the arms at any height.

The breeches are made with strong pockets and lace below the knee. The seat is amply wide and well reinforced to give long life. Sturdy belt loops are fitted and the buttons are firmly attached. These suits come in fustian, khaki and roseberry cloths.

For the ladies, the firm is manufacturing neat suits with Norfolk jackets and plain or divided skirts in the same cloths as for the men. "Kant Leak" goods have been subjected to hard service in the hunting field before being put on the motorcycle market, and have proven satisfactory in both branches of the sport. All goods are guaranteed to give satisfaction by the maker. Dealers are requested to write for catalog, swatches and prices.



Riding Breeches

BUSINESS TAX INSTEAD OF EXTRA IMPORT DUTY

OTTAWA, Ontario.—The trade air over Canada has been cleared by an announcement by Sir Thomas White, Minister of Finance, as to what move will be taken by the Federal Government in order to meet an additional war appropriation of $250,000,000. The Minister issued a statement that it had been decided not to increase or double the war tax on imports, but all companies, associations or individuals engaging in trade in the Dominion will be compelled to pay a business tax while a duty of one-half per cent. per gallon on gasoline has been imposed.

Incorporated companies with a capitalization of more than $50,000 will be compelled to pay a tax of one-fourth of net profits made since the outbreak of hostilities and until August, 1917, in excess of seven per cent. of paid-up capital. All other concerns with a capital of $40,000 or more must pay a tax of one-fourth of all net profits over ten per cent. of paid-up capital.

This taxation will hit manufacturers of motorcycles, bicycles, tires and accessories in Canada as well as jobbers and distributors who import goods.

MILWAUKEE SHOW RINGS THE SUCCESS BELL

(Continued from page 22.)

Geyer, manager motorcycle supplies department; Harold Ward, city salesman; John Ogden and J. W. Tansy.

The success of this year's show will make a motorcycle exposition for Milwaukee an assured project every year.

In connection with the exhibit the Milwaukee Motorcycle Dealers' Association was reorganized at a meeting held Sunday morning in the show rooms. Sunday afternoon was featured by a visit from the Racine Motorcycle Club, which journeyed to Milwaukee in a chartered car.

The Racine Motorcycle Club and ladies numbered 65 people. At the banquet, held by the Racine Club in the Hotel Maryland, to commemorate their Milwaukee show visit, were Jesse Edwards, manager of the Chicago branch of the Hendee Manufacturing Company; Leadley Ogden, sales manager of the Cygnet Rear Car Company, Buffalo; Arthur W. Herrington and Hugh Sharp, of the Harley-Davidson factory; M. McGarry, salesman Bartles-Maguire Oil Company; W. H. Parsons, Chicago, and J. J. Koehler, manager Milwaukee Cycle Sales and Supply Company. President William Wadewitz, of the Racine Club, presided.

On the Monday night following the Milwaukee show, George M. Roosevelt, of the Excelsior General Supplies Company, of Chicago, gave a dinner party at the Hotel Wisconsin for the members of the Milwaukee trade. . . .

Lewis Hadfield guessed the nearest number of paid admissions and thereby won the Defiance casing offered by E. Miller.

Gustav Riemer, a member of the Milwaukee Club, had the choice of either a Smith Motor Wheel or any make of sidecar for holding the ticket number corresponding nearest to the one drawn by Manager Melcher at the close of the show. He picked an Excelsior sidecar.

MANY COLORS IN 1916 STATE LICENSE TAGS

THERE are 48 States in the Union and each one has its own idea of the most appropriate colors for the 1916 motorcycle license tag. To collect the varoius plates and put them on a wall would give onlookers the impression that a paint works had been dynamited.

The colors range from the sombre gray and black of North Carolina through the red and white of Wisconsin to the vivid combination of orange and blue that fast flying Virginians will sport this season. Indiana, that last year used a restful pink and green color-scheme, has reformed, but Nevada with a green and yellow tag goes into first place with ease.

Arizona is noted for its copper, hence it is an advertisement for the States's mineral resources that the tag is copper and black. Vermonters, with an idea to beauty, have the most elaborate tag—white numerals on a navy-blue ground with a white border around the plate. Several States have gone in for the same colors: Alabama, Arkansas, Idaho and North Dakota use yellow and black, while black and white has been the choice of Rhode Island, South Carolina, Indiana and Ohio.

Colorado with dark chocolate and white, Utah with chocolate and straw and New Jersey with brown and white show a similarity. Pennsylvania has a striking combination in orange and black, while California favors porcelain white and navy blue. Plain colors like black, white and blue predominate, but are offset when in the bright company of lavender, cream, straw, copper, red, yellow, orange and green.

Norman W. Earhart, Indian Agent, at Westminster, N. D., with Riding Companion, Bucking Deep Drifts on State Highway Following Recent Storm

INDIAN FEATHERWEIGHT SCORING BIG SUCCESS ALL OVER THE UNITED STATES

Now the Featherweight reports are coming in! Coming from Indian dealers who have proven these wonderfully efficient little machines to their own satisfaction and whose unstinted, voluntary praise is giving voice to another Indian mechanical achievement.

The Indian Featherweight is now demonstrating *by performance* how fit it is to bear the proudest name in motorcycledom —INDIAN.

The Indian Featherweight is showing them all that it is entitled to be the leader in the lightweight division just as the Powerplus Big Twin is "Master of Them All."

Here are what some dealers write us about the new Featherweight—

"The Featherweight arrived today and it certainly has exceeded our expectations. We have no doubt but that the Featherweight will be a big seller."

A. Freed, San Francisco, Cal.

"Just received the Featherweight Indian. It is a bird. Has a quicker get-a-way in the sand with tandem passenger than some of the other make twins here. Believe it would almost climb a tree. Made more than 30 miles an hour with it today. It is the center of attraction in this burg."

Geo. W. Spriestersbach, Alamosa, Col.

"I was very much surprised at the Featherweight. It has easy starting qualities and elasticity far superior to those of other two-cycle engines I have known. It has power and pick-up that I never suspected possible in such a little thing."

Walter Gray, Del Rio, Tex.

"We received a Featherweight today and, to use the English expression, "My Word," it's a wonder. Although this is the coldest day we have had this year, the thermometer hovering around zero, with a good snowfall yesterday, we could not keep "Happy" off it. It has been used practically all day, making demonstrations, and we have already received half a dozen orders for immediate delivery."

Howard A. French & Co., Baltimore, Md.

"Today Baumgardner took it out to a Dubois St. hill. This street is paved with cobblestones and grass covered because nothing goes up it; the grade runs from 32 to 35%. It climbed on the low this grade as smooth as it run the level on high. Everyone is enthused over it."

Geo. W. Sherman, San Francisco, Cal.

WITH THE POWERPLUS BIG TWIN, FEATHERWEIGHT AND INDIAN BICYCLES THE INDIAN DEALER IS IN POSSESSION OF THE STRONGEST AND MOST PROFITABLE TWO WHEELED LINE IN THE WORLD.

NOTHING BUT CHEERS

Read these dealer reports about the biggest motorcycle merchandising event of the year.

Indian Day great. Big crowd.
Great enthusiasm over Powerplus.

Jesse Edwards,
Edwards-Crist Mfg. Co

You will probably be pleased to know that INDIAN DAY was a grand success. We sold eight machines and have a large number of real live prospects to call upon.

Herman Bumiller Co.,
Cincinnati, O.

Well, the Big Day has just passed and it was a huge success for us. We sold three machines and developed more new prospects than we ever had at one time before. We are highly satisfied with the results of INDIAN DAY.

John G. Muebling,
Reading, Pa.

We entertained a large number of motor cycle enthusiasts and the sales for the day were very satisfactory. We feel sure that INDIAN DAY is one of the biggest helps that we have and we feel that this years' celebration is the best ever.

We thank you very cordially for your help in putting this across.

C. D. Callaway & Co.,
Lexington, Ky.

Over 300 motorcycle enthusiasts were entertained at our store on INDIAN DAY. We sold eight machines and one side car. It was by far the best INDIAN DAY we ever experienced.

Motor Sales Co.,
Worcester, Mass

We report INDIAN DAY an excellent success, having closed ten motor cycle sales and got a line on a number of large prospects as we had all models on display in our show room, and from 1500 to 2000 people, also all our sub-agents were in to look them over and all were perfectly satisfied.

Auto Rubber & Mill Supply Co.
Youngstown,
Ohio.

We trust that INDIAN DAY with every other INDIAN dealer in the country was as successful as it was with us. We had over eight hundred people and our visitors included a number of ladies. We feel very much satisfied with the business secured.

Robert Stubbs,
Birmingham, Ala.

Big show - INDIAN DAY started at ten o'clock in the morning and lasted until midnight. Attendance about 1500. A tremendous success from every point of view.

Hafer Auto Co.,
Joplin, Mo.

INDIAN DAY was a big success with us. We had crowds from nine in the morning until ten in the evening. We made a satisfactory showing in regards to sales and got in touch with a lot of prospects.

We are feeling very good over this event, in fact, we have not seen so much enthusiasm in the motorcycle line for the past two years.

Union Supply Co.,
Toledo, O.

INDIAN DAY has passed and it was bigger and better than ever. The Powerplus Motor was the center of attraction and the final decision of the boys was that "She's O. K. through and through".

We have already sold five machines as the result of INDIAN DAY and have plenty of excellent prospects to work upon.

W.D. Pratt,
Brownsville, Pa.

I had a very successful INDIAN DAY as I have received deposits on (7) seven machines for Spring.

J. Ralph McCook,
Lewistown, Pa.

INDIAN DAY was a bigger day this year than last. Tremendous crowds packed our store and all day long motorcycle enthusiasts came and joined the crowds. We had so many that we simply lost track of the numbers. We made fourteen actual sales and developed many more prospects. The Lightweight had the crowd around it from start to finish showing a great deal of interest. It certainly was a great day for us.

Geo. S. Maslen,
Philadelphia, Pa.

Never before has there been so many people in my store before in one day, and from 7:30 A. M. to 11:00 P. M. there were times that it looked as if no more could possibly get through the doors.

We sold six machines and have a very large number of prospects to work upon in the future. I am very well pleased with my INDIAN DAY and you may rest assured that Providence will be all INDIAN for 1916.

B. A. Swenson,
Providence, R. I.

FOR INDIAN DAY!

What does Indian Day prove? This one thing conclusively:

Motorcycle business is to be had in profitable volume if you go after it.

It's there unquestionably—it's waiting for the dealer who applies aggressive, interesting selling methods of which Indian Day is an example.

A conservative estimate shows that between 1500 and 1800 Indian machines were sold on Indian Day—and thousands of prospects lined up for future closing.

These are the direct results of a definite sales plan strongly and thoroughly executed.

The dealer who does not see a lesson in the big Indian Day success hasn't got his eyes open to his own opportunities and responsibilities as a business man.

1500 TO 1800 INDIANS SOLD ON FEBRUARY 22ND.

MORAL: GO AFTER IT AND YOU WILL GET IT!

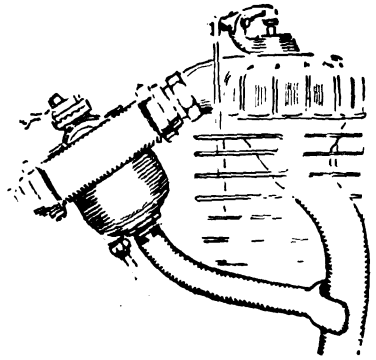
Along Technical Lines

FROM all accounts, the chap who has charge of the weather-program for the United States and vicinity is giving motorcyclists and the others a taste of everything but earthquakes and tornados these days. To be ready for any emergency, a full suit of oilskins, a set of extra heavy underwear, waders, shovel, block and tackle and a Lloyd's policy against drowning seem to be desirable. In some sections, floats for the machine are recommended.

This lightning-change weather, coupled with the changing quality in gasoline—downwards, of course, the price being the only way it has advanced—has given rise to considerable mixture peculiarities. I have been bucking the snow and slithering on the rain-covered icy roads around these parts at every opportunity these days and have noticed that those who were out did a lot of fiddling with needle valves on the carbureters. Most of the riders I met did not find starting easy from the cold.

Warm Air Helps Mixture

It never does any harm to feed warm air to the mixture, summer or winter, and lots of carbureters work better with the warm air than with the cold. One make of machine, no names mentioned, has a permanent warm air fitting and I notice that the riders of this particular mount have very little starting trouble. The stunt is to take warm air off the cylinder or exhaust pipe and lead it to the primary air or bottom air connection on the Schebler carbureter. One of the best means of leading the air to the carbureter is through a section of tin speaking tube. This form of tube is not very popular nowadays, what with house telephones being numerous but most hardware men carry some of it and it will fit nicely for carrying the warm air.

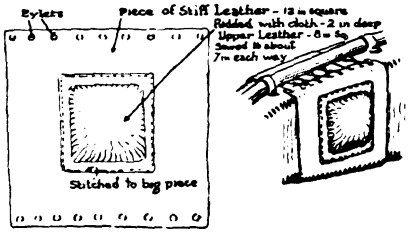


Warm Air Tube for Carbureter

Handling a machine in grease or on slippery winter roads brings out the need of some secure grip for the knees. Lots of the tanks are nice and smooth and give a good grip when dry, but when the rider's knees are soaked or oily, the nice enamel doesn't give much of a hold. On the other side they sell special knee grips, and I don't know but what they might have them on sales here somewhere. However, here is a way to make up a set.

Making Knee-Grips

Take two pieces of stout leather, about 12 inches square each, chrome stock of moderate thickness preferred, and two pieces of upper or some soft leather about 9 inches square. Also some pieces of cloth or leather scraps. Pierce the upper edges of the big leather pieces for rawhide lacings, using eyelets by preference. Lay each piece around the tank where the knee will grip it and mark with a lead pencil where the knee will come. This will be on the sides of the tank and that place is where the small pieces of leather are to go. Sew the small piece on so that it will come on the side of the tank



Details of Leather Knee Grip

when the grip is in place, but leave the top side open. Under each piece stuff the rolled up cloth until a pad about 1½ inches deep is formed; then complete the sewing. Finally, fit the bottoms of the large leather pieces under the tank, cutting them to suit and put in eyelets. The grips laces in place, the laces passing between the tube and the tank above and below.

The idea of packing each pad pretty solid is to give something to dig your knees into. On some tanks it may be necessary to anchor the grips to prevent them from shifting backward. Be sure to use good, stout saddler's thread in sewing on the pads. A shoemaker will do a job like this for you at a moderate price.

MAKING SIDECAR OCCUPANT MORE COMFORTABLE

IN all probability, the new season will see a lot of tops, windshields and other fixins' on sidecars. We all want to make the passenger comfortable, especially if the passenger is a "she," but with the top up it means more wind-resistance to overcome by the motor. The resistance is just about doubled with a head-wind and more than doubled with a side-wind.

This isn't saying that the ordinary sidecar twin won't pull the extra resistance of a sidecar with top up, etc., but it will make a difference in gasoline consumption and in heavy going if the motor isn't up to scratch, it may mean a lot of lowgear work. The windshield will protect the passenger from too strong a breeze, and that is about all that is really needed by a red-blooded passenger. Most passengers don't even get this much protection, having to rely on goggles and robes.

There are a few little things which can be done to any motorcycle which will ensure more comfort to the sidecar passenger. I doubt, for one thing, if there are any mudguards on the front wheel of any motorcycle which will protect the passenger from front wheel splash. Pebbles and dirt come across in a diagonal line from the front wheel, just about right for the eyes of the average sidecar passenger. The remedy is to fit a fabric or metal shield over the top half of the front wheel down as far as the axle, for the dirt comes off when striking the mudguard near the uppermost section behind the forks.

Another little detail is the fitting of a similar guard over the side-wheel, where this wheel has its mudguard attached to the axle. You can usually tell when a sidecar has passed through mud or water by the deposit on the passenger's right cheek, and the splashguard, as I call it, will do away with this and at the same time go a considerable way toward keeping the body clean.

WEBBING STRAPS INFERIOR TO LEATHER

THE webbing strap is a pest for most riders who do really serious touring. A good wetting will rot such a strap so that it will tear easily, and this varied weather is just right for these straps to go bad. There is an old saying that has come down to us from the days of stage coaches, and it applies to motorcycle pack carrying with a decided emphasis: "There's nothing like leather." The leather strap or strip will hold through thick and thin, where the cotton (or web) article will let things slip off or will break at the worst possible moment. And this reminds me of my old riding companion, Bill.

Bill was a good rider, but dollars and cents looked large to him. In other words, the article at 44 cents looked better to him than the 75-cent one. We took a short tour together last Fall, and Bill used webbing straps to pack on his luggage. Case of 15 cents each, or something like that. Well, about 40 miles out, a guaranteed 5,000-mile tire let me down and Bill went on. I got fixed and started after him in the course of time. Soon I came to Bill's spare flannel shirt and a hairbrush alongside the road, and then some more wearing apparel and finally Bill himself, pulling his blanket out of the rear spokes of his twin. He shed everything in the pack and then the blanket threw him. Now, he uses leather thongs. They cost about the same and stay put.

WHY HAZELTON SELLS 1,500 BICYCLES A YEAR

Some Interesting Facts That Have Contributed to Make Hazelton the Largest Exclusive Bicycle Dealer in Washington, D. C.; Entered Bicycle Business in 1897 and Has Grown Steadily

WASHINGTON, D. C., Feb. 29.—Edward P. Hazelton, Washington's leading bicycle dealer, can justly lay claim to having the largest bicycle business of any city the size of the National Capital. In fact, he has been assured by traveling men that very few dealers, even in the larger cities, have equalled his record for sales on high grade bicycles. Nearly every machine he sells is priced at $25 or more, the average price being $35. Last year he sold 1,500 two-wheelers, his lines being the Pierce, Racycle, National, Miami, Mitchell and Fay Juveniles.

Rise Has Been Gradual.

Hazelton started in business in 1897 in the eatsern section of Washington, where he had a small store until the spring of 1903, when he moved to his present large quarters at 431-433 Tenth street, N. W. The story of Hazelton's rise has not been one of the kind so popular with moving picture scenario writers, who picture a young man climbing to fame and fortune in a very brief interval of time. His story is rather that of a man who, by steady, conscientious and industrious application to business, has built up a reputation for honesty and square dealing, with both the people to whom he sells and those from whom he buys.

In 1904, Hazelton installed a complete accounting system and from that year on he is able to submit figures that reveal his steady increase in the sale of bicycles. With but a few exceptions, his business has grown larger from year to year, for the reason, so he believes, that there has been no price cutting in his establishment and that he has never made it a practice to carry an inferior grade of goods. Hazelton has faced competition of the keenest sort from price cutters.

Hazelton is a very congenial person and has picked up an acquaintance with almost every rider in the Capital City. This, coupled with his reputation for fair dealing and reliable wares, has been largely responsible for his success. Another fact which gave Hazelton a distinct advantage over some of his competitors is the large and varied stock of bicycles he carries. He usually carries from 400 to 500 machines in his establishment, so that he is well able to suit the peculiar needs of every customer who enters his store.

Edward P. Hazelton in Front of His Washington Headquarters, Inspecting Part of a Large Shipment of Racycles

Has Always Been an Exclusive Bicycle Dealer.

At no time did Hazelton take on a sideline; he has always been an exclusive bicycle dealer. Approximately three-quarters of his sales are on a time basis, but in spite of this, he rarely has a bad account. He has a very efficient system to keep tab on his time payment customers which enables him to go after delinquents immediately. His system simply consists of a card index file, one card being made out for each installment sale, which is arranged according to the day of the month on which the next payment falls due. Every day he goes over his file, and if he finds an account on which payment is overdue, he sends out a collector to investigate.

In meritorious cases a reasonable extension of time is allowed, but the ordinary stock excuses are not accepted. From his long experience Hazelton is readily able to ascertain whether a customer is merely stalling for time, and if such is the case he immediately asks for the repossession of the machine. The second-hand bicycle is then sold for the best price it will bring, and any balance over the amount due is refunded to the customer. However, Hazelton seldom has occasion to take back a machine.

Below are shown the number of bicycles sold by Hazelton during the period from 1904 to 1915:

Year.	No. Bikes Sold.
1904	382
1905	569
1906	684
1907	850
1908	829
1909	1,091
1910	1,077
1911	1,205
1912	1,362
1913	1,406
1914	1,476
1915	1,486

During the year 1913 Hazelton's total cash receipts were $37,650; in 1914, $40,825; in 1915, $44,200. Although he employs two salesmen and three shopmen, besides a collector, Hazelton is on hand every day to supervise the details of his business.

CRESCENTS COVERED 58,370 MILES IN 1915

Wright Takes First Place in Baltimore Club's Mileage Contest, by Smashing All Records with 22,304 Miles; Stricker Second with 12,390 Miles; Sanborn Third, with 8,721 Miles

William T. Wright

BALTIMORE, Md., Feb. 29.—There have been many notable riders in the Crescent Bicycle Club who have made enviable records, but none has ever made so phenomenal a performance as did William T. Wright in the club's century and mileage competition for 1915. During last year he covered 18,304 miles, and also 38 single centuries and one double century.

Wright rode on an average of fifty miles for each of the three hundred and sixty-five days of 1915. But since there were thirty-nine days when the weather conditions made riding absolutely impossible, his real daily average was fifty-six miles. Wright's record is the more remarkable in view of the fact that he has passed his thirty-ninth birthday, and also that all of his riding was accomplished without the loss of any time from work. He was glued to his job the year round, except for three or four holidays and a vacation of little more than a week, when he rolled up but a few miles.

In winning the gold medal offered as the first prize in this contest, Wright eclipsed every previous mileage record of the club, beating by 5,997 miles the record established by Stricker in 1914, and exceeding by 6,697 points the record for the greatest number of points which was also made by Stricker in 1914, a point being given for each mile ridden and one hundred additional points being offered for each century covered.

Twice during the year Wright rode over two thousand miles in one month, covering 2,112 miles in August and 2,601 miles in September. The total for the latter month breaks the club's record for a monthly total. The old mark was 2,194 miles and was made by Wright in 1907. He also turned in 14 centuries during September, which was two more than the best previous total, made by Fred Sanborn.

John G. Stricker

John G. Stricker, with a total of 10,290 miles and 21 centuries, is the winner of the silver medal, this having been hung up by the club for second place in the mileage competition. Stricker made his entry in the bicycle game in the days of the old Coliseum in Baltimore, and has been an active participant in all of the amateur cycle events held in this city. He made his first strong bid for century-mileage honors in 1914, in which year he won the contest with the record-breaking total of 12,307 miles, which includes 33 centuries. Due to the nature of his work, Stricker has not been able to devote as much time to cycling in 1915 as he did in previous years.

Sanborn's Shining Record

The third man in the competition, Frederick M. Sanborn, while younger in years, is perhaps the oldest in point of experience of the trio of medal winners, and judged on a mileage basis is the most consistent performer on the rolls of the club. He has won a century-mileage medal in six out of the seven years that he has sported the Crescent colors. He has taken three third medals, two seconds, one first and one fourth. Sanborn's prominence in the mileage contests has not been due to a desire to win medals, so much as to the fact that he is fundamentally an enthusiastic and inveterate tourist. He has taken several long trips in 1915.

Both Sanborn and Wright rode Emblem special bicycles, equipped with Palmer-Armstrong tires, Wright's machine being geared to 84, while Sanborn's bicycle is geared to 88. Stricker's mount is a Tribune, geared to 88, and he uses both Palmer and Fisk tires.

Frederick M. Sanborn

STANDING OF FIRST TEN MEN IN CRESCENT BICYCLE CLUB'S CENTURY AND MILEAGE COMPETITION FOR 1915

		Miles	Centuries	Points
1.	Wm. T. Wright	18,304	40	22,304
2.	John G. Stricker	10,290	21	12,390
3.	Fred M. Sanborn	6,421	23	8,721
4.	Welby Sherman	4,310	9	5,210
5.	Langdon M. Sanborn	2,365	2	2,565
6.	William H. McAvoy	1,523	5	2,023
7.	Walter Iglehart	1,233	2	1,433
8.	Ernest Nitz	1,075	1	1,175
9.	Lester Nickles	922	2	1,122
10.	Walter Doersch	912	0	912

Total mileage for the year—including ex-members and those reporting less than 500 miles—47,870 miles and 105 centuries—including two doubles.

A QUINTETTE OF LIVE WIRES

Upper Row, Left, Paul Thomas, Tarrytown, N. Y., President; Middle, John Mitchell, Greenwich, Conn., Treasurer; Right, Sylvain Segal, New York City, National Recording Secretary; Lower Left, Ralph W. Zarr, New York City, Financial Secretary; Lower Right, Daniel M. Adee, Brooklyn, N. Y., Vice-President.

ST. LOUISANS TRAVELED 101,960 MILES

George Bennett, with 9,410 Miles, Takes First Place in St. Louis Cycling Club's 1915 Competition; Waldron Martin Makes Remarkable Record

ST. LOUIS, Mo., Feb. 29.—George Bennett, of this city, easily won first place in the mileage competition of the St. Louis Cycling Club, with 9,410 miles to his credit. Although Bennett has never entered a race of any kind, he has been a most consistent road rider for the past twenty years and can match his endurance against any rider in this vicinity. M. Munter, W. M. Butler and A. Cochran took second, third and fifth places, with 6,592, 5,544 and 5,080 miles, respectively.

A One-Legged Rider

Fourth position went to Waldron Martin, the pride of the St. Louis club, who rolled up 5,401 miles. Martin's performance is remarkable, in view of the fact that he completely lost the use of his left leg as the result of a fall off the edge of a saucer-pan track in 1914. Though greatly handicapped, he can still show some mighty good speed to his fellow club members and has an enviable reputation for long distance riding and sprinting.

Martin was a member of the American Bicycle Team that won the Olympic Classic at Stockholm, Sweden, in 1912. He also appeared in try-outs at Newark with his fellow club member, Carl Schutte. That Martin, in spite of his one-leg riding, still performs well as a racer is evidenced by his racing last year. He took first prize in the last Hilltown Road Race, a very hilly fourteen-mile course.

Carl Lindenschmit rode 2,921 miles, of which 500 miles were registered on a trip through Colorado last August. C. L. Barr, George Henry, L. Faidley, A. Thompson and A. Schreiner each made 500 miles of their total mileage on a tour through Missouri last July.

No prizes are awarded and no points are credited to the riders. This is the first year the club has taken record of its combined mileage.

The St. Louis Cycling Club is primarily a road riding club and has only occasional races for the benefit of those few members who are so inclined. Centuries, however, have not appeared on the club's program for many years, but the weekly trips which last from Saturday at three o'clock until Sunday at about six o'clock, averaging seventy-five miles, offer every opportunity to round out a ride that is equal to, and sometimes in excess, of the century in point of exertion.

WHEELMEN WILL ENTERTAIN LADIES ON MARCH 4

BAYONNE, N. J., Feb. 29.—The members of the Bayonne Wheelmen are completing arrangements to entertain the largest crowd of the season at their monthly ladies' night reception and dance to be held Saturday evening, March 4, at their club house, 555 Boulevard.

As this is the last dance before Lent, a record crowd is expected and the members of the entertainment committee are leaving nothing undone to make the affair an unequaled success.

McNAMARA-MADDEN WINS KANSAS CITY GRIND

Magin-Lawrence Take Second Place, While Lawson-Cameron Are Third; Six Teams in Berlin Finish; Total Mileage 1,117

KANSAS CITY, Mo., Feb. 29.—McNamara's wonderful sprinting, combined with Madden's clever riding, captured the six- day fifty-hour race, which closed in this city on Thursday evening, February 24. Seventeen sprints kept things stirring in the Berlin finish that marked the final hour of the grind.

The following teams were placed: 1. McNamara-Madden, 85 points. 2. Magin-Lawrence, 74½. 3. Lawson-Cameron, 66. 4. Wohlrab-Kopsky, 45. 5. Smith-Coburn, 45. 6. Piercy-Young, 41. 7. Madonna-Grimm, 0. 8. Ohrt-Rudi-Russe, 0.

Reggie McNamara

At the end of the six-day race, Madonna-Grimm and Ohrt-Rudi-Russe were both one lap behind the field, and a one-mile sprint was ordered to determine the winner of the seventh place. The sprint was run off between Rudi-Russe and Madonna and turned out to a huge joke. Neither of the contestants was willing to set the pace and both showed wonderful ability in keeping their balance while riding high on the boards at a very slow pace. It required just twelve minutes for the Austrian and Italian to complete the mile. Madonna crossing the tape first.

The total mileage for the race was 1,117 miles, which is said to be a record for fifty hours. Ned Young had two bad spills during the finish, the second of which put him out of the running and left Piercey to complete the grind for the team. After the scores had been completed it was found that Wohlrab-Kopsky and Smith-Coburn were tied for fourth place, and a half-mile sprint was declared to decide the recipient of the fourth purse. Wohlrab won by inches. More than 6,000 witnessed the final hour of the grind.

A feature of the last day was the sprint prime put up by Mrs. Vernon Castle of "Watch Your Step" fame. McNamara and Magin captured the dancing teacher's cash. But Ernie Ohrt was the popular boy with the ladies. So popular was he, in fact, that they nicknamed him "Alice." At all times the San Francisco boy appeared on the saucer in a neat sweater and silk tights, fresh from the cleaning establishment. Rudi-Russe was also popular with the crowd because of his persistent efforts to regain one of his lost laps. Harry Kaiser became ill on the fourth day of the race and was forced to withdraw, leaving Thomas to go on an unsuccessful search for a new partner.

This left only eight contending teams, as Corry-Ryan had dropped out earlier in the grind. At the end of the grind the riders returned to either Newark or Chicago, for both the six-day races at Milwaukee and Chicago have been dropped.

PROVIDENCE SALES HAVE INCREASED 100%

PROVIDENCE, R. I., Feb. 29.—That local dealers are enthusiastic over the prospects for bicycle sales this season is evidenced by a canvass made recently, which revealed the fact that bicycle sales have increased more than 100 per cent. in five years and that the rate of increase has been larger each year.

Eddie Madden

In this city the bicycle is bought largely for business purposes. The purchasers are about equally divided between residents of the city proper and the outlying districts.

CYCLING EVENTS SLOW IN AUSTRALIA

Activities Awheel Mostly All-Club Member Affairs in Sydney—Stevens-Lane Win Hour Team Race, Covering 23¼ Miles

MELBOURNE, Australia.—Cycling is really at a standstill in Australia these days. The only events just now are exclusive club affairs in Sydney. The most notable of these held recently was a one-hour teams' race for teams of two men by the Merrickville C. C. at the Sydney Sports Ground. W. B. Stevens, the son of an old-time English crack amateur, and R. Lane were the winners. Stevens sprinted for his team and won by several lengths after pacing for the best of a half-mile. The distance covered by Stevens-Lane was 23¼ miles.

Charley Fittler (Above) and Stan. Patterson, Two Australian Stars

Two of Australia's best-known stars are Charley Fittler, pro., and Stan. Patterson, amateur. Fittler is a member of the Ashfield-South Sydney League Club, and has a number of good performances from scratch to his credit. He is of short stature, but has tremendous muscular development and possesses remarkable stamina. He is a glutton for lap prizes in 5 and 10-mile races on the track, and is known as the Lap King at Pratten Park.

Patterson, the amateur, is a tall and well-built blonde, also possessing much staying power in combination with speed. During the winter he has scored a wonderful series of successes on road and track meets promoted by the Central Cumberland and Lidcombe-Auburn clubs, either winning or being placed in nearly every race he competed in. He was racing every Saturday for about three months, and incidentally carried off the five-mile championship of the Northern Suburbs on a grass track at Marly. Patterson rides from scratch in all events promoted by the clubs and from a very short mark in N. S. W. Cyclists' Union open races.

The honorary secretary of the N. S. W. Cyclists' Union, George Liggins, has enlisted for active service, and Theodore O'Halloran, the honorary race secretary, has been appointed as his successor.

C. R. A. TO REVIVE FAMOUS ROAD CLASSIC

To Check Outlaw Movement, Newarkers Will Revive Irvington-Milburn Race at Twenty-five Miles on Decoration Day; Only N. C. A. Amateurs Can Compete; First Prize Will Be $1,000 Auto

NEWARK, N. J., Feb. 29.—The first defensive shot to be fired by the Cycle Racing Association into the camp of the outlaws, represented by the American Federation of Cyclists, is the revival of the famous Irvington-Milburn road race on Decoration Day. This race, which was once the cycling classic of the year, will probably cost the C. R. A. more than two thousand dollars. The first prize will be an automobile, to cost not less than $1,000. According to Inglis M. Uppercu and Frank Mihlon, the Newark promoters, there will be at least 100 prizes.

Sugar for the Simon Pures

In staging this race the Cycle Racing Association has two objects in view. One is to develop new riders and the other to keep amateur riders from joining the ranks of the outlaws. It is believed by the promoters that the valuable prizes which will be hung up in the Irvington-Millburn race will cause quite a number of amateurs, who have already expressed their determination to side with the American Federation of Cyclists, to come back into the fold of the National Cycling Association.

Should an outlaw track be constructed in Newark it will undoubtedly be put into operation before Decoration Day, May 30, and, as all the riders who compete in outlaw races will be barred from events promoted by the C. R. A., this race, the promoters believe, will be such a large inducement that many of the star simon pures will string along with them in order to be eligible to enter the Irvington-Milburn classic. The promoters also figure that the cyclists who appear in the big race will continue to ride under the National Cycling Association's colors.

THE FIRST SHOT!

The C. R. A. intended to revive the classic on two former occasions, but then considered the expense prohibitive. Even from the race that will be staged on Memorial Day, there will be no financial returns to the promoters, but the outlaw movement has changed the entire aspect of the situation. The revival of the classic is looked upon by the Newark men as being absolutely necessary to check and thwart the progress of the F. A. C. They are willing now to go to any expense to retain their position in the cycling field.

The race will be run over the old course around the Irvington-Springfield-Milburn triangle, at the original distance of twenty-five miles. The county authorities have already given assurances that they will grant a permit to hold the race on the morning of May 30, and have promised that the course will be closed to all but the racing vehicles from ten oc'lock until noon. The Irvington-Milburn race was once the greatest cycle sporting feature of the year and was heralded from coast to coast, attracting some of the best riders in the country. In spite of the fact that it has been dormant for so many years, the promoters are of the opinion that the race this year will at least draw the pick of the simon pures in the East.

NEWARK AMATEURS ORGANIZE AND REPUDIATE N. C. A.

NEWARK, N. J., February 29.—Under the name of the Amateur Cyclists' Association of America the majority of the amateur bike riders organized in a body here last week and elected the following officers: Eddie Kane, president; Fred Taylor, vice-president; John Dreher, treasurer, and Alfred A. Krushel secretary.

The riders claim they will stick to anything the professional riders do and adopted the following resolution:

"Whereas the National Cycling Association has failed to properly promote and conduct the sport of amateur and professional cycling in the United States and has, on the contrary, studiously neglected the interests of the bicycle riders, amateur as well as professional, and, whereas the said National Cycling Association has become virtually an association of promoters whose principal object has been to protect themselves; be it resolved, that the Amateur Cyclists Association of America repudiate the N. C. A. and affiliate themselves with the Federation of American Cyclists."

TO ENCOURAGE SIMON PURES

TACOMA, Wash.—R. H. Brown, of the Washington Cycle & Supply Co.; F. M. Bailey, the Pierce man, and W. E. Newton, are behind a movement to promote amateur cycle events on the Tacoma Speedway. A great number of local riders are anixous to start training for such events and the entry lists will be full.

Lyle Reed, a Speedy Local Rider, Captured the Home-Trainer Contest

ACME WHEELMEN TO STAGE BRASSARD RACES

NEW YORK, Feb. 29.—The Acme Wheelmen will soon start a series of races to be run like the Brassard matches which were so popular in Newark last season. Owing to the large number of riders in the club, the members have been divided into two separate classes. A gold medal will be presented to the winner of one class by F. Woisin, while a silver loving cup, donated by F. Small, will be given to the victor of the second class. A two-hour team race will be staged early this spring on one of the local tracks, eight valuable prizes having already been secured for this event.

The Acme Wheelmen have equipped their club rooms with a home trainer and other gymnastic apparatus which they believe will prove an attraction to unattached cyclists desirous of joining a club. The Acme cyclists have social affairs twice each month, and have also secured the services of professionals to train their members. Riders are invited to visit the headquarters of the Acme Wheelmen, at 9 Jerome avenue, Borough of the Bronx, New York City.

FRONTISPIECE OF LATE BULLETIN FROM "MILLION BICYCLES" COMMITTEE

This Bulletin, Which Was Arranged by Secretary C. F. Olin and Mailed to All Dealers on His Lists, Is Chock Full of Meaty, Sales-making Material

WILL HOLD BICYCLE PARADE ON MAY 1

BALTIMORE, Md., Feb. 29.—At its meeting on Friday, February 25, the recently organized Cycle Dealers' Association of Baltimore decided that, owing to the earliness of the season and the uncertainty of the weather, no bicycle parade would be held on Bicycle Day, but that a local Bicycle Day would be observed on May 1. A big bicycle parade will be held on that day, terminating at one of the local parks, where a track meet would be held.

All of the local dealers are enthusiastic over the new "boosting movement" and are endeavoring to stir up interest among the local bicycle riders by the formation of clubs. One result of the movement has been the announcement by Nick Grimmel, the "one-armed wonder" and former star rider of the now defunct Curbstone Wheelmen, of his intention of "coming back" and of the possible revival of the Curbstone Wheelmen, once one of the city's most prominent clubs. Wide-spread interest has been given to his announcement by the publication in one of the local papers of his challenge to any of the local riders for a race at any distance from one to a hundred miles.

SAYRE TAKES CARLOAD ORDER OF JUVENILES

LOS ANGELES, Cal.—History was made in the Coast bicycle trade on the day in February when the Appeal Mfg. & Jobbing Co. unloaded a full carload of 360 juvenile bikes. Coast jobbers have always bought juveniles 40 to 60 at a lick in mixed cars with adult models, but the Appeal company is finding such an increase in the demand that it was obliged to order a straight carload of the Worthington line of juveniles.

From the 15th to the 24th of February this company shipped out 282 bicycles, and took in two more carloads the last week in the month to replenish its stock. "The bike business is some business these days, believe me," says Vice-president Sayre.

PIERCE FACTORY GOING DAY AND NIGHT

SAVANNAH, Ga., Feb. 26.—While in this city on his trip from Florida to the factory, Percey Pierce, of the Pierce Cycle Co., was the guest of George W. Thomas, the local Pierce bicycle agent.

"The demand for Pierce bicycles," he told Mr. Thomas, "is so great that we are working day and night at the factory. Not only is this true of our factory, but also of every bicycle factory in the country."

Mr. Pierce stated that there would be no immediate increase in the price of Pierce machines, for his company had contracted for sufficient steel to adequately meet demands for some time to come. Mr. Pierce believed that it will not be difficult to sell a million bicycles in 1916 provided the present outlook continued.

PLAN REUNION OF ALTOONA B. C. MEMBERS

ALTOONA, Pa.—Plans are being made to hold a big reunion and banquet of the members of the Altoona Bicycle Club, organized some 20 years ago, but now extinct. A committee is at work trying to get in touch with the members of the old organization, but as there was no official roll of the club, it is desired that every man who ever belonged should notify the committee so that a list can be compiled and reunion plans completed.

The Altoona Bicycle Club was formed during the height of the bicycle boom, in 1896, and included many of the most prominent men of the day. It was a great success, socially as well as in the field of sports. The club headquarters were in the old Walton mansion on Eighth avenue.

All persons who belonged to the club are asked to write to any of the following: T. R. Mickel, 1307 Sixth avenue; B. Leopold, 1123 Eleventh avenue; Ross Guilliford, 1222 Sixteenth avenue; Edward Stewart, 230 Sixth avenue; or J. W. Manley, 2118 West Chestnut avenue, this city.

WINNERS OF KANSAS CITY RACE GOT $80 EACH

NEWARK, N. J., Feb. 29.—The six-day races held under the management of Packey McFarland, the central figure of the Twentieth Century Cycling Association, the outlaw promoting body, both at Chicago and Kansas City, have proved so unsuccessful that the grinds which were to have been held at Milwaukee, St. Louis and San Francisco have been dropped. Many of the riders who competed in Kansas City returned to Newark today very much disappointed.

The Kansas City race lost heavily. The winners, McNamara and Madden, received $80 each for their victory after riding 1,117 miles. The riders who finished seventh, eighth, ninth and tenth received $20 each. The share of the others was in proportion. As the riders paid their railroad fares from Chicago to Kansas City $10.85 each way, this, added to the other expenses, made the total expense considerably more than any but the winning combination received.

The majority of the riders, it is said, were pleased that the proposed races at Milwaukee, San Francisco, and St. Louis fell through. The riders were scheduled to ride for a percentage of the gross receipts in all of the proposed races, and the prospect of success in the other cities was no brighter than in Chicago and Kansas City, both of which were financial failures, although the riders got more than $6,000 out of the Chicago grind.

ALFONSO WINS RACE

NEW YORK, Feb. 29.—The weekly one-mile home trainer races, match race style, held by the Unione Sportiva Italiana at their club house, 410 Eighth avenue, was won by Jimmy Alfonso. The summary:

Heats—		Semi-Final—	
Alfonso, winner.	1.16⅗	Mullen, winner.	1.25
Ferrer		Egg	
Harvey			
Mullen, winner.	1.16⅗	Final—	
Egg, winner...	1.21⅗	Alfonso, winner.	1.14
Zoccola		Mullen	

TAKES ON MOTOR WHEEL

TACOMA, Wash.—F. M. Bailey, the pioneer Pierce bicycle dealer, announces that he has secured the Tacoma agency for the Smith Motor Wheel and that demonstrators are now on the way. Bailey has received a large number of inquiries and is looking forward to a fine year.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

Eighth Installment

After returning from Europe in the middle of 1905, Kramer licks Lawson and Fenn and cops the title again.

FRANK KRAMER, after his wonderful triumphs in Europe, returned to the dear old United States in the middle of the summer of 1905 and accomplished a feat unequaled in the history of cyling, when he annexed the National title for the fifth consecutive time. Kramer was given quite a battle by Iver Lawson, but was equal to the occasion and won out although the odds were very much against him.

On Labor Day, the fourth of September, Lawson was one point ahead of the East Orange rider in the struggle for National honors. But by September 9, Kramer had the title securely tucked away and out of the reach of the crafty Iver. The final summing up gave "Big Steve" 59 points, and Lawson 48. The complete summary of how all the riders finished for the title in 1905 follows:

	1	2	3	4	Unpl'd	Totals
Kramer	7	0	2½	½	1	59
Lawson	4	4	0	0	1	48
Fenn	0	4	4	0	2	26
J. Bedell	0	2	3	0	6	15
McFarland	0	1	0	3	5	10
Fogler	0	0	½	½	8	4
Dorlon	0	0	0	3	7	4
Root	0	0	0	2	7	3
Lee	0	0	1	0	9	2
Krebs	0	0	0	1	7	1

Besides stowing away the championship Kramer registered clean-cut victories over Iver Lawson and Willie Fenn in match races. The victory over Fenn was particularly gratifying, as the "Boy Wonder" was tooting his horn loud and long in saying what he would do when he ran up against the East Orange marvel. Fenn proved easy for Kramer, Frank winning in straight heats in two different match races. In the next time they met it took three heats to decide the controversy, Kramer winning two of them.

Great Reception for Kramer

Kramer arrived in Hoboken, after his European tour, on Thursday, July 14. On the following Saturday he rode an exhibition race at the Vailsburg track in Newark and was tendered a reception fit for a king. When Kramer stepped out from the training quarters preceded by his trainer, Jack Neville, the track resounded with loud cheers.

Kramer, although not a person who likes to bask in the limelight, rode slowly around the track, and each section accorded him a rousing welcome. His familiar American flag encircled his girth, on the stars and stripes of which were the signatures of all the European riders he had defeated while abroad.

The first championship race of the season was run off at the Vailsburg track, on Saturday night, August 5. It was a half-mile affair and Kramer was the winner by not more than three inches over Willie Fenn. The "Boy Wonder" had the lead rounding into the homestretch, and Kramer was on the outside. Fenn led almost to the tape, but then Kramer brought into play his French jump and, with one final kick, his wheel seemed to leave the track and he went over the finsh line a winner by inches.

Another Defeat for Willie Fenn

Kramer won another chamiponship race on the following Monday. This was ridden at Madison Square Garden, and once more Frank showed his heels to Willie Fenn. On Monday, August 14, at Madison Square Garden, Kramer pulled off a sensational coup on Willie Fenn and Iver Lawson, in the two-mile championship race. Kramer out-generaled Fenn and Lawson completely and with a great burst of speed finished first with plenty to spare.

Lawson and Fenn had framed up a nice little surprise by announcing they had decided to team together. But they did not make this little speech until Fogler and Kramer came on the track to ride the final. When Frank heard this, he hooked up with Fogler to offset the other combination. For one mile the riders traveled at snail's pace. At the beginning of the second mile, Lawson jumped to the front and, with Fenn on, the pair thwarted every attempt of Fogler and Kramer to get up. For a half mile the group tore around at a terrific clip and the positions remained unchanged until three laps from the tape. Here Fogler and Lawson dropped behind, leaving Kramer and Fenn to fight it out. After a short sprint Fenn was shaken off, while Kramer tore on to the finsh. Lawson pulled up strong and finished second, while Fenn had a hard time of it to get in ahead of Fogler.

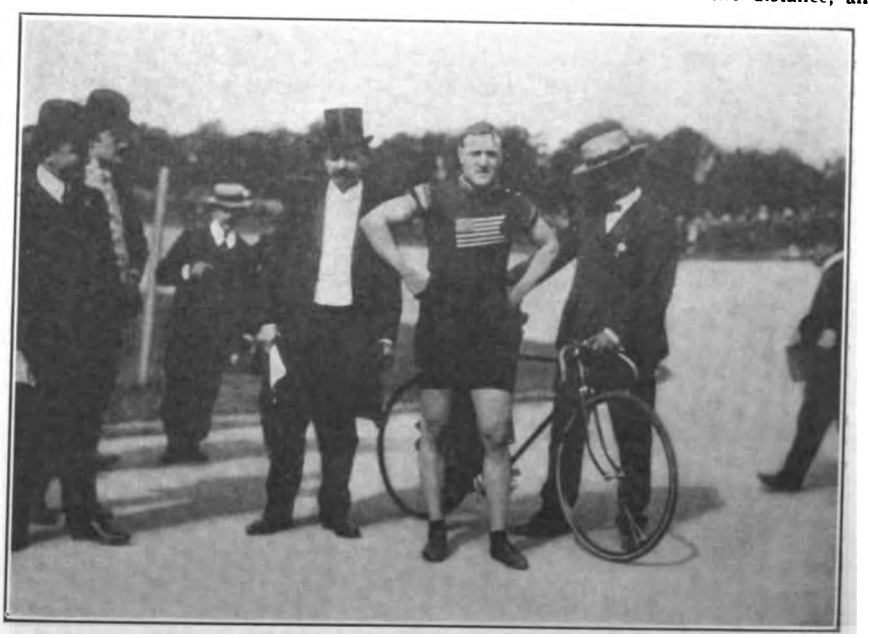
Kramer had an off day on Saturday, August 19, when a "double header" of championship races were put on, and he lost both. One was a quarter mile affair and the other was at one mile. In the quarter mile race Kramer was third, Lawson and John Bedell finishing ahead of him. It was the first time that season that Kramer was defeated in a titular race. In the next race, at one mile, he was again beaten, this time finishing second, behind Willie Fenn.

Kramer's streak of poor riding continued and the next Monday he bowed in defeat, in a championship race at Madison Square Garden, to Iver Lawson and Willie Fenn. Lawson was the winner, Fenn was second and Kramer had to be contented with third. Lawson displayed a great burst of speed after being brought to the front by his partner Floyd McFarland.

Meets Kramer in Match Race

Championship races were put aside for a short time, and Fenn received his long desired chance to meet Kramer in a match race. The first affair was decided on Tuesday, August 22, when Frank defeated Fenn in straight heats. Kramer won the first heat by a wheel's length and took the second by six inches, winning out in the last ten feet.

The following Thursday, Kramer and Fenn went at it again—this time at Madison Square Garden. The first heat at a half mile, which was ridden unpaced, Kramer won by a wheel's length. In the second heat, a mile was the distance, and



Frank Kramer at the Buffalo Velodrome in Paris, France, in the Summer of 1905, After Winning the Grand Prix de Paris

Digitized by Google

once more Frank won easily by a wheel's length.

On Saturday, August 26, Kramer and Lawson rode a dead heat in a one-mile championship race at Vailsburg. They were ordered to ride off the tie, but Lawson would not do so, and Kramer got first place. Lawson and Kramer had a match race carded and Iver declared the riding of this heat would draw the interest away from the proposed match race.

The day for the match race came, it was on Tuesday, August 29, at the Vailsburg track, and Kramer defeated Lawson in two straight heats at a half mile each. On the next Thursday, Frank and Iver met again at Madison Square Garden. Lawson won the first heat by half a length and Kramer came back by winning the next two.

On Labor Day, Lawson wrested the lead in the battle for the championship from Kramer, by winning the one-mile national circuit race at Madison Square Garden. The event was robbed of its interest by a spill which occurred to Kramer and Fogler, who were teaming. It came on the fifth lap of the race and forced both to retire. Lawson, who finished first, received ten points, McFarland got six points for second place, while Kramer and Fogler divided the points for third and fourth places. It was a double point race and an unlucky defeat for Kramer. It gave Lawson 26 points, while Kramer had 25.

McFarland cut loose with a sprint which carried him and Lawson to the front on the backstretch in the fourth lap. Kramer set out alone to overhaul the two riders, when Fogler, apparently not having any idea of the champion's intentions, went up the bank directly in Kramer's path, and the pair collided, rolling down the bank. Neither made any attempt to finish the race.

Kramer came back into his own the very next day, displaying a wonderful burst of speed and sweeping over the tape a winner from Iver Lawson in the half-mile national championship race at the Vailsburg track. Kramer's victory was clean-cut and complete. He elected to go it alone, and from third position at the eighth pole rode clear around Lawson and McFarland, who were teaming, and finished a good front wheel ahead of Iver. For an instant on the turn into the stretch, when McFarland, who was setting the pace, let Lawson through on the pole, it appeared that the Swede might land the prize. He shot forward with the impetus of a bullet, but, fast as he was traveling, Kramer was coming faster and passed him in such a manner that all question of superiority of the two men was decisively settled right there.

Once more on Thursday, September 7, Kramer defeated Lawson in a whirlwind finish of a mile championship race at Madison Square Garden, where there were double points to count. Kramer, by his victory, obtained a commanding lead in the point table for the American championship. Lawson was in the lead up until the last lap, when Kramer spurted and won out after a hard struggle.

Kramer clinched the championship on the next Saturday, when Lawson was shut out in his semi-final by Willie Fenn and Eddie Root. With Lawson out of the final, it was clear sailing for Kramer, who won easily over John Bedell, Fenn and Root.

On Monday, September 11, Lawson scored a farewell victory over the national champion, Frank Kramer, in the five-mile championship race at Madison Square Garden. Lawson won the event with the assistance and excellent team work of Floyd McFarland. John Bedell, who was also in the combination, finished second. This proved to be the last championship race of the season and a couple of days later Lawson and McFarland set off for Australia, while Kramer retired to East Orange still clinging to the title.

(To Be Continued)

OUTLAWS STILL "ALIVE AND KICKIN'"

F. A. C. Issues Two Franchises to New Yorkers, Permitting Them to Build Tracks in the Bronx and Brooklyn; Officials Take Slap at Newarkers

NEWARK, N. J., Feb. 29.—The Federation of American Cyclists, the outlaw controlling body, is still very active on the bicycle sporting horizon and has the "organized" promoters of this city doing no little worrying. The latest development that occurred during the past week was the granting of two franchises by the F. A. C. to promoters who propose to build tracks in the boroughs of the Bronx and Brooklyn, New York City.

Give $1,000 Guarantees

The Brooklyn franchise was sold to a syndicate headed by Harry Pollock, manager of Fredy Welch, the champion lightweight. Billy Gibson, manager of Jim Coffey, Benny Leonard, and others, was awarded the Bronx franchise. According to the officers of the F. A. C., both Gibson and Pollock deposited $1,000 as a guarantee that they would start to built tracks two weeks after the signing of their franchises. Pollock plans to run four meets each week and Gibson will run two, all of the meets to take place at night.

Though the F. A. C. claims that several promoters have been dickering for the right to build a track in Newark, it has refused to disclose their names. Vice-president Matthews, of the outlaw body, declared that the Newark question had already been passed on by the F. A. C., but the men with the money did not wish to have their names made public.

Sanction for New York Race

The Pollock syndicate was also given a sanction for six-day racing in New York City, and proposes to hold the 1916 race some time in October or November in a huge building, larger than Madison Square Garden, which they claim will be erected near the Pennsylvania station. However, it is not certain whether this building will be constructed, but Pollock expects to hear definitely on this matter in about three weeks. Pollock has had considerable experience in staging six- day and also sprint races, having been associated for a number of years with P. T. Powers, who held a half interest in New York six-day races.

Wanted Conference With C. R. A.

The F. A. C. sought a conference with the officials of the Cycle Racing Association last week, but the latter refused to meet the outlaws. Instead a letter was sent by the C. R. A., the character of the contents of which can be inferred from the statement which the F. A. C. issued last Friday. In part this statement was as follows:

"In view of the fact that the Cycle Racing Association considers the matter of protecting its investment closed, so far as it is concerned, the Federation of American Cyclists, in pursuance of its avowed purpose of dealing openly and above board with the public, as well as the riders and the promoters, herewith makes the following statement to the public in refutation of the misstatements and tirade of personal abuse contained in what was called a reply to our communication, but what was really an attempt to dodge the real issue.

"The C. R. A. considers the 'matter closed.' It is because the C. R. A. and the N. C. A. have been closed corporations for years past that our body was organized to open up the sport to fair and honest competition. The F. A. C. is composed of business and professional men who must not be financially interested, directly or indirectly, in bicycle racing. This organization derives its authority from the Cycle Racing Men's Union, the latter body electing the members of the board of control of the F. A. C., no member of which board of control shall be a rider or a promoter. We submit, therefore, that our board is entirely disinterested and must of very necessity live up to its avowed purpose to protect the interest of the public, the promoters and the riders, a purpose which the C. R. A. and the N. C. A. never did and never could live up to, for the C. R. A. is the promoters and the N. C. A. is the promoters.

"In other words, in the past the promoters have been a trust which has promoted the game, has owned the riders and has governed the sport according to dollars and cents."

In refutation of the F. A. C.'s contention that the C. R. A. promoters are of the "hog all" calibre, Frank Mihlon gave out a statement in which he called attention to large sums of money which the C. R. A. has paid the professional riders last year. He said that the amount of money expended in bonuses, salaries and prizes during 1915 aggregated $103,697.59. Five Australian riders alone received more than $19,500, while thirty-four riders won more than $1,000, and thirteen riders collected over $500.

BRANDES WINS ROLLER RACE

NEW YORK, N. Y., Feb. 29.—At the fourth annual ball of the Glencoe Athletic Club, held Saturday evening, February 26, the match bicycle roller race, at two miles, best two of three heats, was won by Otto Brandes, of the Glencoe A. C., against James Papesca, of the Unione Sportiva Italiana. This match was run to decide the championship of the Glencoe A. C. and the U. S. I., both riders being the respective club champions.

First heat, one mile against time—Dead heat; time, 1 min. 7⅗ secs.

Second heat, two mile competition—Won by Brandes by 43 yards; time, 2 mins. 27⅗ secs.

Third and final heat, two mile competition—Won by Brandes by 140 yards; time, 2 mins. 35⅗ secs.

WARD CO. TO HANDLE BICYCLES

HOW PETERS BROTHERS ACHIEVED SUCCESS

Means Used By Hustling Buffalo Harley-Davidson Representatives to Build Up a Thriving Motorcycle Business and Make It Progress Season After Season

By GEORGE W. GRUPP

BUFFALO, N. Y.—Otto and Albert Peters are the real "steam" behind the Harley-Davidson agency in this city. Their father, H. L. Peters, holds the agency rights for the Silent Gray Fellow, but takes no active part in the business. Both Otto and Albert are not only a crack-a-jack sales force but are also practical mechanics and enthusiastic riders. Consequently, the Peters motto is "We are getting results."

In 1905 the Peters boys took to the motorcycle business, representing the Yale-California. They didn't do well and their father, in whose shop they kept the agency, often threatened to chuck them out, machines and all. They showed the old gentleman, in a short time, that there was money to be got from the motorcycle business—with the Harley-Davidson this time.

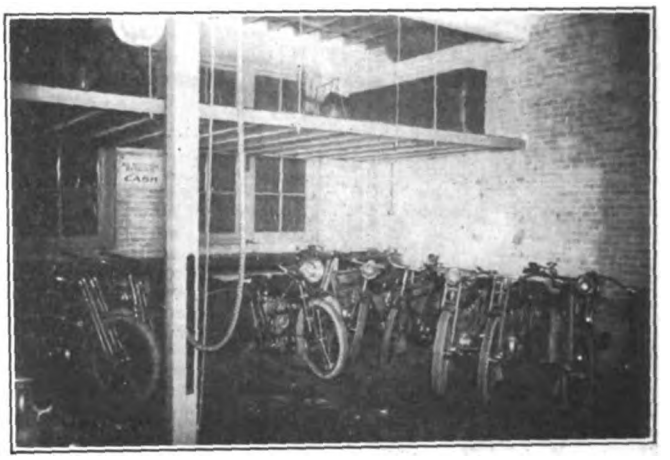
The Peters brothers agree that their greatest factors for success are the goods that they sell, the service they render, the square deal given to all customers and the maintenance of a thoroughly-equipped repair department.

Motorcycle Club Valuable

"All these factors," says Otto Peters, "would only make for partial success if we didn't make a motorcycle club in town. Such a club is indispensable, and the livelier the club, the better the motorcycle business will be. As a body, the members make an impression as they ride through the streets. Such sights develop enthusiasm for the sport and create a desire on the part of the spectator to buy a motorcycle. We must have motorcycle clubs, because they advertise the business.

"Every dealer should have a club and should be a rider along with its members. The dealer must practice what he preaches. Riding with the boys on a club run creates a friendly feeling between the dealer and the riders and incidentally increases sales."

Attractive Salesroom of Peters Brothers at 328 Pearl Street; Note Parts and Accessories Cabinets on Wall



Another View in the Peters Establishment Showing Used Machines Awaiting Customers. Balcony Is for Surplus Tires

Necessary to Success

On being asked about window displays, Peters said that he and his brother were strong believers in advertising. He considered advertising absolutely essential to a business. "Window displays are the best and cheapest form of advertising; we are particular about ours. We have a racing display in the racing season, a harvest display in the fall, etc. We make people look at the windows, that way."

As you enter the Peters store a large display card attracts your notice. It reads: "Harley-Davidson motorcycle sold only for one price. This is the list price. We give you service. You buy satisfaction." This explains the firm's attitude on price-cutting.

The only exception to this rule of one price is when a customer buys a machine on the installment plan. Under such conditions, 10 per cent. is added to the unpaid half balance. This means that half the list is

Digitized by Google

HOW PETERS ACHIEVED SUCCESS

(CONTINUED FROM PAGE 49.)

required as a first payment. As an inducement to hasten the payment of the half balance, the Peters' offer to pay 10 per cent. if after a short period of weekly payments, the purchaser decides to clear the account with a lump sum. That is, they will pay 10 per cent. on the remaining balance.

If the buyer wants them to accept his used machine as part payment of the initial sum, their 10 per cent. system holds good. But no matter how much is allowed for the old machine, the buyer must pay in addition to his old machine one-half of the balance after the old machine has been credited. In other words, if the rider bought a machine for $300 and was allowed $100 for the old machine, he would be obliged to make a payment of $100 (half of the $200 balance) before the new mount was delivered. The balance of $110 (including the 10 per cent.) would be due at the rate of $5 a week.

KANSAS CITY, MO.

A. CROCKER. in charge of salesmen in this district for the Hendee Mfg. Co., recently returned to this city after a short trip through Kansas. He says that the conditions in Kansas are particularly good at this time of year. The farmers are taking a great deal of interest in road-betterment, and this greatly pleases the motorcycle owners who are also taking part in the plans for improving the state highway system.

W. BELL, agent for Pope motorcycles and bicycles, is very busy these days. The "baby" Popes are going great, says Bell, and the bicycle business, while still somewhat of a side line, is increasing very rapidly.

E. B. SAUFLEY, of the Saufley Supply Co., Excelsior distributor, in this city, has been busy rearranging his parts department. The big mail order business done in Excelsior parts by the firm demands a great deal of system in the shipping room and the clerks now have the different cabinets and containers all labeled and within easy reach.

ANN ARBOR, MICH.

WIEDMAN & CO. have taken the agency for the Dayton Motor Bicycle for Washtenaw County and this city. W. A. Harland, traveller for the Davis Sewing Machine Co., closed the deal.

BRONX, N. Y.

GENE COUGHLIN & CO., representing the Harley-Davidson in this borough, at 922 Washington avenue, have sold 19 new three-speed models to date, as well as two of the Harley-Davidson sidecars. In second-hand machines, 14 have been disposed of and the firm's stock is practically cleared out.

"Not only has there been a fine demand for new Harley-Davidsons," said Coughlin, "but there is and has been for some weeks past a big call for used machines. The recent cold snap did not prevent us from selling a number of both new and second-hand ones. This is going to be a big season in the Bronx."

SPOKANE, WASH.

INLAND MOTORCYCLE COMPANY has taken the Inland Empire representation for the Dayton Motor Bicycle. The contract was signed with the Washington Cycle & Supply Co., of Tacoma, holding distributing rights.

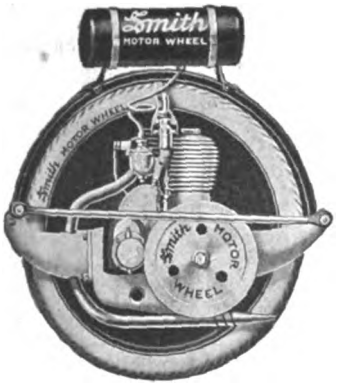
Smith Motors Are Made For Smith Motor Wheels *Only*



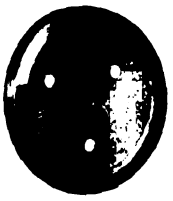
Fully Protected by United States and Foreign Patents

AFTER many years of study, research, construction and experiment—all directed by a carefully selected corps of expert engineers—the SMITH MOTOR WHEEL was brought forth and placed on the market as a *detachable bicycle motor.*

And, after fourteen months, during which time nearly 10,000 SMITH MOTOR WHEELS came into use and were *put to the test* all over the United States and in many foreign lands, the SMITH MOTOR established itself as a *wonderful motor.*

Its makers knew it would prove itself to be a wonderful motor. Their expert demands made it so. For in the careful making of the Smith Motor and the researches and experiments which attended its development, discoveries were made. These were discoveries for greater power, economy and efficiency; also better construction, application and relation of parts and the closer relation of the SMITH MOTOR WHEEL to the bicycle in the method of attachment.

All of these findings gave the Smith Motor the ability to perform so wonderfully, to be the really wonderful motor that it is. And, these discoveries *were all patented.* They are rigidly protected by patent rights in possession of this company. There exists not even a fair possibility of duplicating or resembling the same degree of practicability which is found in the SMITH MOTOR WHEEL and its various attachments to the bicycle.



The words "SMITH MOTOR WHEEL" appear on the fly-wheel of every SMITH MOTOR. Look for these words, be sure they are there—and you'll be sure it is the SMITH MOTOR WHEEL, with the *wonderful motor* (patented), which you are buying and for which you are contracting to sell.

A few territories still remain open where representative dealers will be considered. With such dealers we invite correspondence.

BREEZY NOTICES ANNOUNCE HOPKINS & ALZINA TO FRISCO TRADE

C. C. HOPKINS and Hap. Alzina are introducing themselves to the San Francisco trade in characteristic Western style by a series of breezy notices issued from their headquarters at 32 Van Ness avenue. One of these notices, in particular, shows the pictures of both partners, and between them is a sketchy introduction of both partners. For instance, regarding Alzina, it says: "—— when it comes to tunin' as they call it in engin' lingo (meanin', of course, givin' your bus sap, soup, pep, suds or get-up-and-skee-daddle), this Hap. lad is some medicine man, you bet!"

The fact that Hopkins and Alzina have put up a fine shop is mentioned and that "they have all the special shop dinkuses and testing machinery that used to belong to the Hendee Mfg. Co. branch here before they closed." It is needless to say that the partners hold the rights for the Indian for San Francisco after reading the notice.

OLEAN, N. Y.

CURTISS A. MOORE has opened a motorcycle store in this city and has taken the agency for the Excelsior line of motorcycles and bicycles for Cattaraugus and Alleghany Counties. He has stocked a full line of parts and accessories in addition.

Moore was formerly located in Wadsworth, O., for four years, but recently sold out his interests in the agency in that city and came on to Olean to open the present establishment.

WASHINGTON, PA.

WASHINGTON MOTORCYCLE & ACCESSORIES CO. has taken the agency for the Dayton Motor Bicycle for the present season. The firm had a front-wheel drive model on display at the local show, but only signed up recently.

NASHVILLE, TENN.

R. M. EBERHARDT CO., handling the Dayton in this city, recently exhibited the full line at the Nashville Auto and Cycle Show. The Dayton Motor Bicycle

Eberhardt Display at Nashville Show Featuring the Dayton

was given a prominent place at the stand and was so arranged that it could be mounted by the visitor.

The show brought the Eberhardt firm a fine volume of business and both during and after the exhibition the demonstrators were kept busy showing the paces of the front-driven little fellows.

(MORE NEWS OF DEALERS ON PAGE 54.)

To The Trade

We have just learned that a certain Motorcycle Supply House which caters to riders, has listed the Stoll Combination Tandem No. 2 at $9.00 delivery charges prepaid. Immediately upon learning this, we sent them the following telegram:

Feb. 25, 1916.

You are hereby notified that all discounts to you on the Stoll Combination Tandem Number Two, are hereby withdrawn. The price to you hereafter will be ten dollars net F. O. B. cars Denver, Colorado. This tandem has always sold for ten dollars and we will not be a party to any deal reducing the price thereof."

(Signed) The Stoll Mfg. Co.

This price-cutting was done entirely without our knowledge or consent and we feel confident in assuring the trade that this concern can do but little harm, as they have purchased only 22 tandems, and should they make any future purchases, the Stoll No. 2 tandem will cost them about $2.50 more than they have it listed at.

Our policy is and has always been to maintain the list prices and protect the legitimate trade.

Signed, FRANK M. STOLL, President,
The Stoll Manufacturing Co.,
Denver, Colo.

(The largest exclusive motorcycle tandem factory in existence)

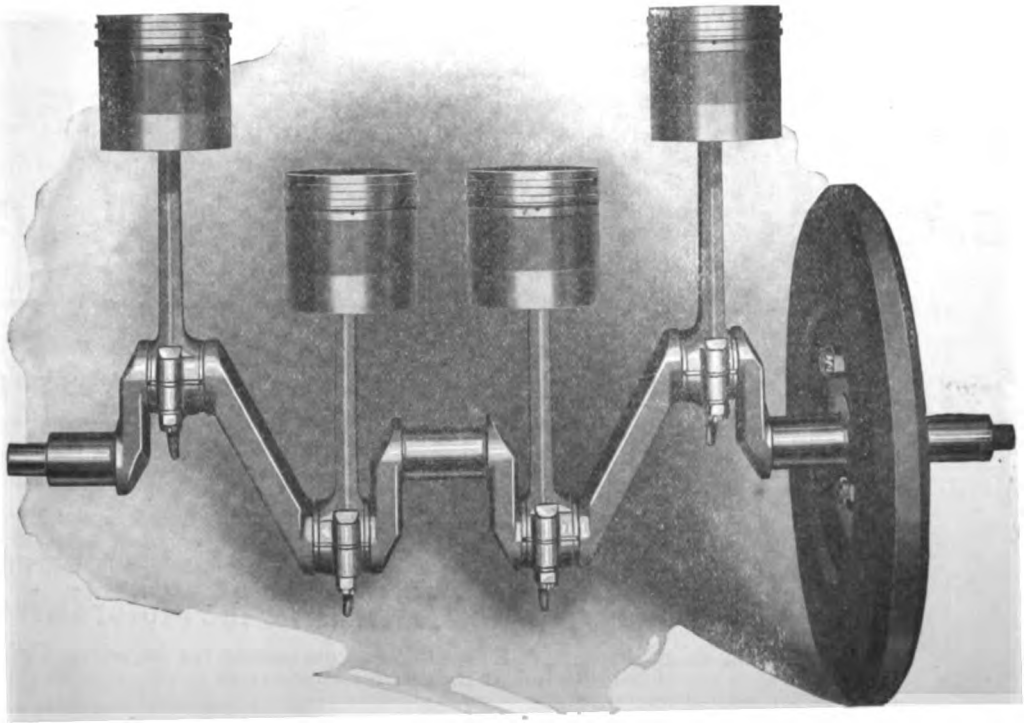
The sense of *liveness* that the four-cylinder motor imparts is another reason for the unflagging confidence of the Henderson rider. Instantly responsive to the touch of the throttle---lightning acceleration to breathless speed, or down to a mere walk with the motor just ticking over, smooth and steady as clockwork. Or an irresistible bulldog pull with locomotive power on the long mountain grades or in heavy going.

HENDERSON MOTORCYCLE CO., Detroit



One-piece drop-forged crankshaft, with pistons and connecting rods. One example of Henderson simplicity and strength. Generous bearing surfaces and husky proportions.

A *good* deed often means a *good* deal—Please mention MOTOR CYCLE ILLUSTRATED.

NEW HARLEY-DAVIDSON COMPANY FORMED IN DALLAS, TEXAS

J. A. McDOUGLE has bought out the rights of J. Cameron, former proprietor of the Harley-Davidson Sales Co., at 2016 Commerce street, and will continue business under the same name. Former proprietor Cameron disposed of his rights owing to not being able to satisfactorily handle the motorcycle and an automobile agency at the same time. The new firm will work all of the seven counties under the old contract to the last inch and has C. Roy McClanahan, formerly of Houston, Texas, as the manager.

Mr. McDougle is sparing no expense in making the Harley-Davidson Sales Co. one of the largest motorcycle establishments in the State. He is carrying an immense stock of parts in addition to those already on the shelves of the old concern, and has ordered 15 three-speed models as a preliminary. His next order, he says, will be for a carload. McDougle and McClanahan have set their sales record at 200 machines and 100 sidecars and side vans.

KINGSTON, ONTARIO

TREDGOLD SPORTING GOODS CO. has taken the local representation for the Dayton Motor Bicycle. The contract was signed by F. H. Norris, Canadian manager for the Davis Sewing Machine Co.

LIMESTONE, ME.

W. B. WARD, JR., distributor of the Excelsior for Aroostook County, has moved from his old headquarters on Church street, to a new and larger building on Main street which he had constructed this winter. The present quarters measure 35 x 75 feet and include a large repair shop. The establishment is devoted exclusively to motorcycles.

Ward's sales since the first of January have more than tripled those of the corresponding portion of 1915 and he is smiling over the fact that this season will be a record-breaker for motorcycles in his territory.

COLUMBUS, O.

BELT-BARR MOTOR CO., distributor for the Indian in Central Ohio, has sold 27 motorcycles from February 1 to February 24, most of the sales being for the Powerplus three-speed twin. Spring-frame models, of course, predominated. The firm is of the opinion that the demand for 1916 will be much greater than that of last season.

DALLAS, TEXAS

HARRY SCHUETT CO., representing the Indian in this city, has already delivered five Powerplus models to customers and has orders for several others. The sale of Indian bicycles is proving first class. The firm has one of the neatest and most attractive show-rooms in the South and is well stocked up on parts.

REDWOOD CITY, CAL.

BEESON BROTHERS, well known as live wire cycle dealers in this city, have arranged to handle the Dayton Motor Bicycle during the present season.

ADRIAN, MICH.

WM. F. SCHRAMM CO. has added the Dayton Motor Bicycle to its line of bicycles in this city, and will also handle the Dayton motorcycle for 1916.

VALUE!

In figuring true chain value, first-cost is a small item. A poor chain costs many times its first price, in delays, in annoyances and even accidents. You pay more for

"The Coventry" Chain

"The Motor's True Mate"

but you get more. More strength, more service, more satisfaction. With a breaking strength far superior to that of any other chain made. "The Coventry" is well worth the $1.00 a foot which it costs. At all good dealers.

Herbert F. L. Funke Co., Inc.
112 Broad St., N. Y.

BOSTON DEALERS TO HAVE INDIVIDUAL MACHINE DISPLAYS

MOTORCYCLE DEALERS in Boston will exhibit 1916 models at their own showrooms instead of at the automobile show in Mechanics Hall this season, following the plan determined upon last year.

In 1915 the arrangement worked out to the great benefit of both dealers and customers. The expense of the show was eliminated and dealers were enabled to use space for advertising in the newspapers which got the real motorcycle crowds to their stores. The visitors had unobstructed views of the machines, demonstrations and real attention from salesmen was possible.

Special decorations will adorn all salesrooms and the various models of machines will be tastefully arranged.

George N. Holden will show the full line of Indian motorcycles in his store at 188-190 Massachusetts avenue. The line will include the Featherweight two-stroke. Indian models will also be shown at the Hub Motorcycle Company's establishment at 258 Columbus avenue, and by the Crout Motor Co., Mattapan.

Harley-Davidsons will be shown at the New England branch, 744 Huntingdon avenue, where Manager Jes Campbell is in charge, and also at the store of W. J. Walker, retail dealer, at 178-182 Columbus avenue. Walker will also show the Smith Motor Wheel.

The four-cylinder Henderson line and the Excelsior motorcycle will be on exhibition at the showrooms of the General Motorcycle Sales Co., at 141-145 Columbus avenue, New England distributor for the Henderson and Boston agent for the Excelsior. The Cygnet Rear Car will also be shown here.

Thor models in both the 16-U and 16-V will be shown by the Thor Motorcycle Co., at 356 Columbus avenue.

TACOMA, WASH.

ELMER BERGSTROM is now in charge of the new Flying Merkel agency at South 37th and G streets. The establishment is in the heart of the school district and has one of the most attractive salesrooms in the city. The Dayton line of bicycles is handled in addition to motorcycles.

JAMES A. ROBBLEE, managing the Thirty-eighth Street Repair Shop in the South End of Tacoma, is determined to annex his share of the big bicycle trade for 1916. He is specializing in repairs for both motorcycles and bicycles.

TACOMA dealers will not have an opportunity to show the 1916 models as a body since the Tacoma automobile show has been indefinitely postponed. They will now hold private exhibitions in their own salesrooms, by which method they hope to attain the same end—increased sales.

GASOLINE in Tacoma has taken another jump. The retailers are now maintaining a price of 18½ cents and another cent advance will doubtless be made before the first week in March.

WATERTOWN, N. Y.

BARTER & CO. have closed with the Vim Cycle & Hardware Co., of Buffalo, for the Dayton Motor Bicycle agency in this city.

MOUNT CLEMENS, MICH.

HATZENBUHLER & CUDWORTH, bicycle dealers at 28 Front street, have signed up to represent the Dayton Motor Bicycle for the 1916 season.

WASHINGTON DEALER HAS UNIQUE DEVICE FOR HANDLING MACHINES

AUGUST ZIMMERMAN, Harley-Davidson agent in Washington, D. C., has a unique device for handling second-hand motorcycles. His salesroom is devoted exclusively to new motorcycles and used motorcycles are kept in the basement of his store. As is usual with buildings in large cities, the stairway leading to the basement is located in a well just back of the rear wall of the building. The rear entrance to Mr. Zimmerman's main floor is by the platform over this well.

Mr. Zimmerman constructed a triangular framework fastened to the rear wall so that it could be swung alongside the wall when not in use. On the arm of this triangular frame he placed an ordinary tackle block. He then had the platform hinged on the side where it entered the rear door of his salesroom. When desiring to place a motorcycle in the basement Mr. Zimmerman merely places a rope around the seat and handle-bars of the machine, swings the triangular frame out from the building, lifts the hinged platform, and easily lowers the machine into the basement with the aid of the pulleys.

LOS ANGELES, CAL.

F. A. SUTPHEN, of the Henderson Motorcycle Sales Corporation, has been out on the road to establish agencies for the Detroit-made four-cylinder machines. He reports very good results, in spite of the effects of the worst floods that Southern California has ever known.

PITTSBURGH, PA.

THE PENN MOTOR SUPPLY CO. and H. L. Neff will handle the Dayton Motor Bicycle in this city. The Penn firm is located at 5900 Penn avenue, while Neff is at 106 Federal street.

NEWBURGH, N. Y.

MYRON AFFRON, handling the Harley-Davidson in this city, will show at the annual exhibition of the Automobile & Accessory Dealers' Association, in the Armory on March 15 to 18. He will be assisted by Walter N. Koch, Harley-Davidson traveller, and by a number of local salesmen.

DETROIT, MICH.

AUTO CYCLE SUPPLY CO., of 68 Grand River avenue, has secured the agency for the Dayton Motor Bicycle in Wayne County. The firm is looking forward to a big season with the coming of spring.

SACRAMENTO, CAL.

PUTZMAN & BOWMAN, of 1122 Kent street, have contracted for 25 Dayton Motor Bicycles as an initial contract. The deal was put through by traveler Harland of the W. E. & W. H. Jackson forces in San Francisco.

LEXINGTON, KY.

THE JONES DRUG CO., Harley-Davidson agent, is preparing to erect a new three-story brick building. The firm has placed many of the Silent Gray Fellows in the Blue Grass district during the last few seasons.

PATERSON, N. J.

ELMER G. HAVENSTRITE, veteran dealer in this city, has taken the Cleveland lightweight agency for Paterson and vicinity. He will handle this mount in addition to his Harley-Davidson representation. Havenstrite has disposed of 24 Harley-Davidsons fitted with sidecars since the New York Show. He has also sold ten solo mounts. His sidecar output is greater than that of his entire 1915 season.

FRED. L. JOFFEE, Excelsior representative, has just received his first 1916 "Big X." The three-speeder is causing a bit of excitement among the boys around here and Joffee's store at 12 Clark street, is pretty well crowded with eager riders booking demonstrations. Joffee is handling the Smith Motor Wheel also for 1916.

JOHN STEELE, Indian representative, as well as Orrie, the latter well-known as a competition rider and sidecarist, are demonstrating the Indian Featherweight these days. Steele got a 200-pound rider to tool the little fellow over the hilly parts of Paterson for the benefit of the younger generation. As a result, several sales have been made and Steele looks for the sales of this model to outstrip those of last season's Popular—25 machines.

HARRISBURG, PA.

HEAGY BROTHERS, distributing the Harley-Davidson, have started their annual motorcycle show at 1200 North Third street, their headquarters. The show rooms have been tastefully decorated and an orchestra plays every evening. The feature of the show is the Harley-Davidson twin model with electric equipment, but an extensive line of bicycles is also on display.

SAN FRANCISCO, CAL.

FRED. H. BENTE, of 1548 Market street, has taken the local agency for the Dayton Motor Bicycle, through W. E. & W. H. Jackson, Pacific Coast distributors.

Henderson Headquarters of Vernon & Son, in Seattle, Wash.

OROVILLE, CAL.

GEORGE S. BAKER has arranged to handle the Dayton Motor Bicycle in this city during 1916. He signed up with the traveller from the San Francisco office of the Davis Sewing Machine Co. recently.

Your Help Problem Solved!

It matters not whether you are a

Manufacturer
Jobber
or Dealer

whether you need help in the shop, in the store, in the factory or on the road. You can get just the kind of a man you are looking for by advertising in the classified columns of

MOTOR CYCLE ILLUSTRATED

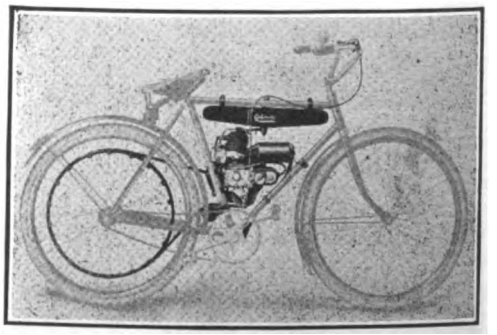
Act Quickly and You Will Get Quick Results!

RATES: One insertion, three cents a word; two or more insertions, two cents a word for each insertion.

The Logical Location

for a motor attachment is directly in the bicycle frame. This is the position selected by motorcycle manufacturers because it permits perfect distribution of weight and proper transmission of power.

Hence, the CYCLEMOTOR has gained its popularity with bicycle riders because it is built on mechanically correct principles.



Does not affect handling or steering of wheel.

REFLEX

The Question isn't How Many but How Good

"This is the kind of a plug I am always glad to sell. It is a Reflex and it's sold on a mighty broad and liberal guarantee. All Reflex Spark Plugs are fully guaranteed against defects in material or workmanship. Any Plug that proves defective will be repaired or replaced free of charge. Your money back if not entirely satisfied."

"Some manufacturers are making more Spark Plugs than the Reflex People. But in selling Spark Plugs I always like to consider not 'how many,' but **'How Good.'** Your patronage is worth far more to me than the few cents additional profit I might make by selling you a plug that wouldn't stand up and deliver the goods. Standard equipment on Henderson motorcycles, you'll find that Reflex Spark Plugs are far better than those usually furnished on motorcycles."

Your customer can't get away from that argument; the service he is bound to get from Reflex Plugs will win his trade and his confidence for you. Hundreds of dealers are controlling the quality business on Spark Plugs in their territory. The cut-throat competition of a dozen dealers in their own community is eliminated by the Reflex Exclusive Agency; and they are making a worthwhile profit on every Reflex Sale.

A Reflex Free to Every Dealer

We want you to prove for yourself "How Good" Reflex Plugs are made. Write us on your letter head giving us the name of your mount. We'll gladly send you a Reflex *free of charge;* tell you more about the free display cabinet, signs, circulars and other sales helps that build bigger and better business for Reflex Dealers.

Grasp this opportunity. Write us at once.
Open territory is fast being assigned.

LOUISVILLE, KY.

HERB. KLINE, of Kline Brothers, Harley-Davidson agents, is much gratified with the prospects for 1916 as regards the Silent Gray Fellow in this city and surrounding territory. Kline Brothers have averaged over 100 machines a year for the past three seasons and expect to better this in 1916. They recently took over the entire business of an automobile supply house and are making this pay in addition to handling a growing motorcycle business.

Mr. Kline states that the firm's success on the motorcycle line has been due to the policy of minding its own business. The Klines have adhered to a strict business policy, eliminating loose credits, giving a fair price for used machines and not an exorbitant one, and eliminating all slip-shod methods. While other places have been crowded with used models, Kline Brothers' establishment has been clear of everything but new machines.

"We will not take in a machine except at its own price," says Herb. Kline, "and that price one at which the machine can be sold almost at once, even though the profit is only $5. The result is we have no money tied up indefinitely in second-hand stock."

WILLIAM C. DIERUFF, formerly manager of the Motor Wheel and bicycle department of the Sutcliffe Company, is now with the local branch of the Fisk Rubber Co., as store manager. Dieruff has been well known in motorcycle and bicycle circles for the past three years, and while with the Sutcliffe firm has made numerous trips through Kentucky and Tennessee. Since his joining the Fisk forces, an Excelsior delivery van outfit has been put into commission for tire work, this being the first van to be used in Louisville.

MODESTO, CAL.

JOHNSON CYCLERY has signed up with W. E. & W. H. Jackson to handle the Dayton Motor Bicycle in this city for 1916.

WASHINGTON, D. C.

F. L. LEISHAAR and J. McL. Seabrook, representing Osborne & Leishaar and Howard A. French & Co. in this city, have received Indian featherweights for use as demonstrators. Leishaar took his little two-stroke for a thorough test on the hills around Washington, and was more than pleased with its running and climbing ability.

Manager Seabrook, of Howard A. French & Co., states that the machine exceeded even his expectations as well as those of his customers. Owing to the recent snowstorm he has been unable to do very much in the way of road demonstration. He got his first order for one of the little fellows from a treasury department employee after the latter had only a demonstration on the stand.

SAMUEL McPHERSON, representing the Dayton line at 709 H street, N. W., has received his Dayton motor bicycle demonstrator, and is being kept busy showing off its pace outdoors when the weather permits of riding at all, and indoors at other times. The low price of the bike appeals to Washingtonians, and McPherson says that he expects no difficulty in disposing of his allotment of 100 within the next three months.

MOUNTAIN VIEW, CAL.

C. N. HIGDON, one of the city's best-known cycle agents, has taken on the Dayton Motor Bicycle for the new season and expects to make record sales with the little front-wheel driver.

SALEM, N. J.

HOFF & LOVELAND, Indian distributors for Salem county, will shortly move into their new home. A formal opening was held on March 1, when the complete line of Indian motorcycles and bicycles was shown.

The establishment consists of a store and a repair shop, both housed in a building 28x100 feet. The store is in the front, and will be divided into a show room and a storage room for patrons. The shop will be in the rear, and will measure 28x40 feet. A rear entrance to the shop is provided for. The shop will have full machine equipment, as well as facilities for brazing.

Next to the store, and having a separate entrance from the street, is a clubroom. This is to be finished in Mission style throughout, and will provide comfortable lounging and reading quarters for Salem riders. Hoff & Loveland have been Indian representatives in this city for the past four years, and will of course continue the excellent service which they inaugurated in 1912.

THE ADDISON CYCLE CO., 2372 East Jefferson avenue reports a big business on second-hand motorcycles. "Our Excelsior business is going ahead and we have a lot of prospects whom we feel sure of landing by spring," says Mr. Addison. "I am going to fix up my store, redecorate, put in a new show window with lattice work for the background, and get ready for a big spring opening. There is going to be a lot of riding this summer and the agents who fix up their places right and get after the trade are going to get the benefit. It's going to be a big year for the motorcycle business. There has been more riding this winter than I have ever seen before during the cold weather, and there is more interest than I have ever seen in motorcycling."

PORT HURON, MICH.

O. H. KIEL, representing the Dayton bicycle in St. Calir County, has taken on the full Dayton line and will handle the Motor Bicycle and the motorcycles of this make. He has placed an order for demonstrators on all motor models.

REMY

MOTORCYCLE LIGHTING-IGNITION SYSTEM

Twenty-four hours of sunlight!

A hot, snappy spark, always ready at the will of the rider—strong synchronized ignition! That's what the REMY System means to motorcyclists.

Thousands of Harley-Davidson riders endorse it. They appreciate the reliability—the *sureness* of REMY light and ignition.

The REMY System is not cumbersome—it actually *reduces the bulk* of the motorcycle without adding to its weight. Simple, Safe, Efficient. Battery cannot spill — trouble-proof. Twenty-four hours of daylight! Perfect ignition always.

"These are big advantages," say Harley-Davidson riders.

Look the REMY System over on any Harley-Davidson, then you will understand REMY efficiency.

March 2nd 1916.

Splitdorf Electrical Company
Newark, N.J.,

Gentlemen:

There's real, hard, sound commonsense sales-value in the name "DIXIE". My salesmen use the 20th Century Ignition argument to very good advantage in boosting the Indian, and often find it a powerful aid in bringing the prospect to the buying point.

The SPLITDORF MAG-DYNAMO has also proven itself to be a big sales-booster. The demand for electrically-equipped Indians is steadily on the increase, due principally to the simplicity, compactness and remarkable efficiency of the Splitdorf Electric Lighting and Ignition system.

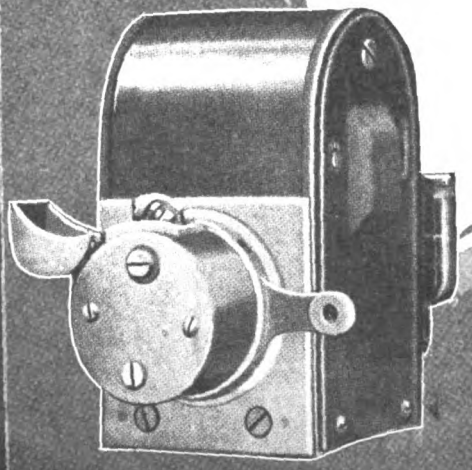
With sincere wishes that 20th Century Ignition shall long continue to share in Powerplus triumphs, I remain,

Very truly yours,

NEW YORK SPORTING GOODS CO.

J. A. Baker.

Vice-President.



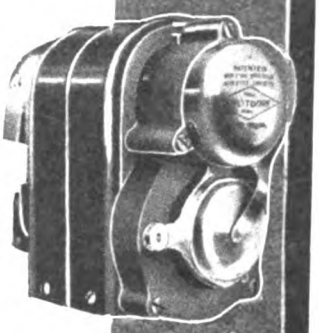
Digitized by Google

...N AND THE MAG-DYNAMO ...VER

Here is a striking letter from the leading motorcycle distributor in the East.

Mr. Baker's experience as a motorcycle merchant has qualified him to judge with unerring accuracy as to the value of a fitment both as regards service and sales-power.

You dealers who do not know what tremendous selling-force lies in the name SPLITDORF are losing sales that could otherwise be "clinched."



Consider this Carefully

BLUE STREAKS

GOODYEAR
AKRON
MOTORCYCLE TIRES

On Every Leading Motorcycle

LAST YEAR Goodyear Blue Streaks won every world's record for speed and endurance on track and road.

This year they have won a record that means far more to you.

Every leading motorcycle manufacturer is equipping his product with Goodyear Blue Streaks.

One manufacturer, or several, might go wrong in tire equipment.

But when all with a reputation to sustain unite on one tire, it means that that tire must be right.

And the Blue Streak *is* right, as you will find the first time you use it.

Big and sturdy, easy riding, safe and sure, no tire was ever better fitted to give unusual mileage, to lessen trouble, to increase speed and save power.

You will do well to accept the highest recommendation any tire can receive.

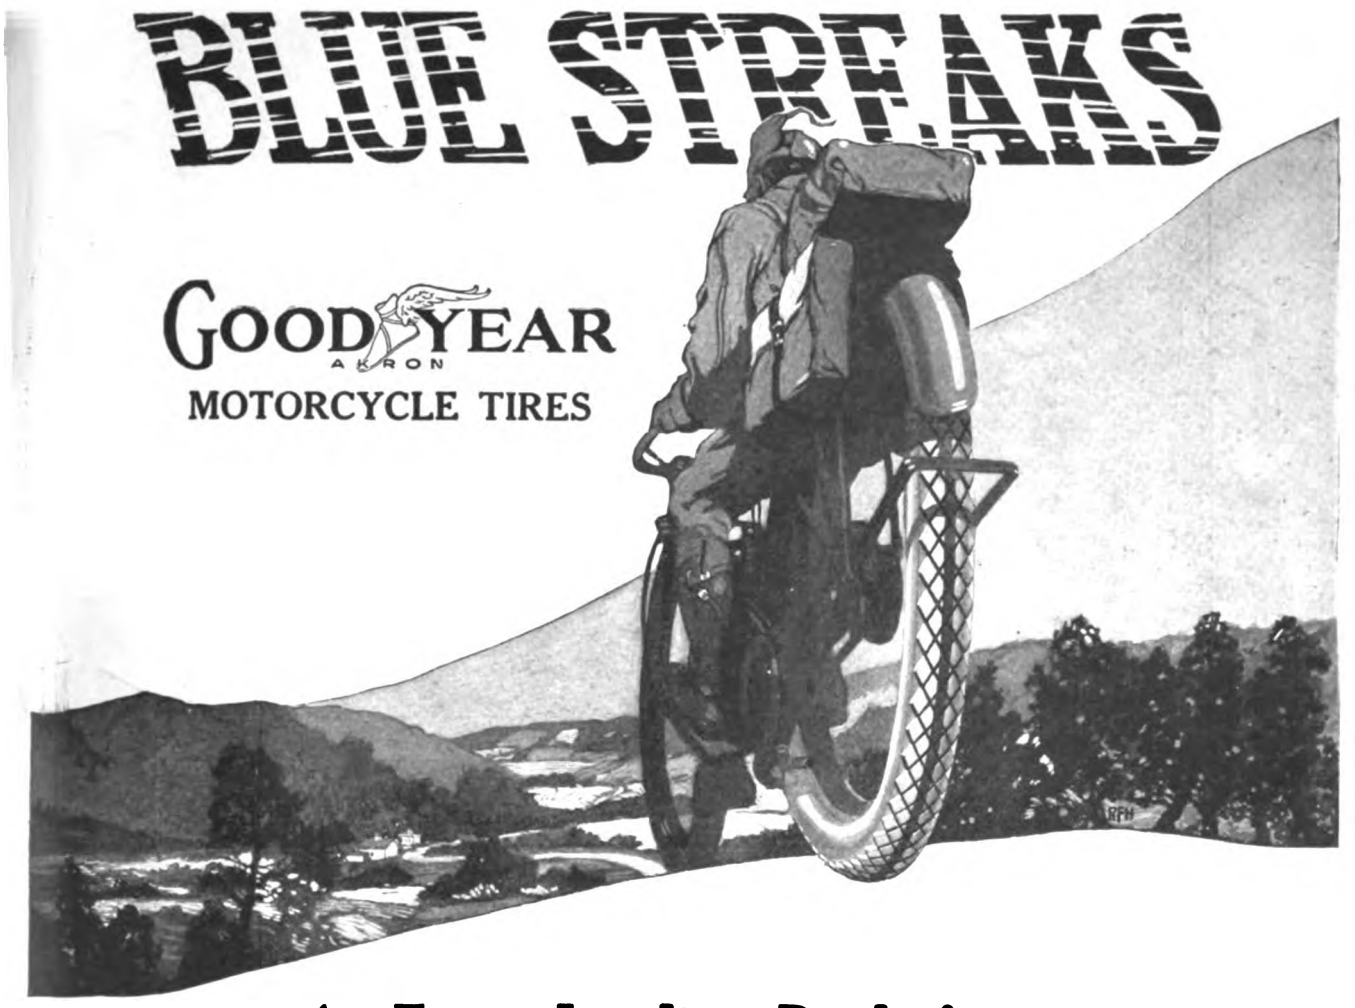
Use Blue Streaks on your old machine. Get them on the new machine you buy.

You can always tell the Goodyear by the beautiful white tread with the Blue Streak on each side.

Any dealer can sell you Blue Streaks. Ask for them, and accept no other.

The Goodyear Tire & Rubber Co.
Akron, Ohio

Digitized by Google



At Every Leading Dealer's

IS there any possible advantage in selling any other tire than Goodyear Blue Streaks?

You know they hold all world's records, amateur and professional.

You know, they are the standard tire equipment on every leading motorcycle manufactured in this country.

You know that your only reason for selling tires is to build a permanent business and to make money.

Then why should you retard the growth of your sales and the growth of your prestige, by pushing tires that cannot hope to bring you the returns that Blue Streaks will?

Do you suppose that the Motorcycle Manufacturers adopted Blue Streaks by such an overwhelming majority, simply by chance?

Not for one minute. They chose Blue Streaks because they wanted positive assurance of quicker sales and satisfied purchasers.

And you are perfectly justified in demanding the same standards for your business.

Why do you delay another day in writing for the complete Goodyear Dealer Proposition on Blue Streaks?

The Goodyear Tire & Rubber Co.
Akron, Ohio

Now—— get out and ride

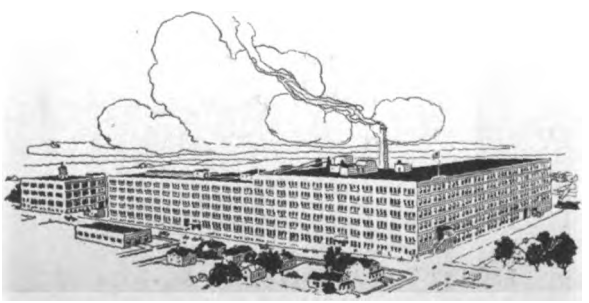
All winter long you've been thinking about the first few days of spring—when you could get out and ride again.

Nature's one best tonic is fresh air—nothing will make you feel so good as a spin on a snappy spring morning. It will put a spring in your stride and a punch in your work that nothing else can do.

1916 is going to be the biggest motorcycle year in history. Start it right. Get out early and roll up some real mileage.

If you bought a new machine this year, get out and ride—every day. If you ordered one for spring delivery, don't wait longer. Get it **now**—and ride.

If you have been figuring on keeping your old mount you owe it to yourself to do one thing now—go to your local Harley-Davidson dealer. Take his demonstrator (he'll let you take it) and ride it. Put it through any test you wish.



The Harley-Davidson Factories are Devoted Exclusively to the Manufacture of Harley-Davidson Motorcycles, Sidecars and Sidevans.

Digitized by Google

If you are fair minded and open to conviction you can sell yourself a 1916 Harley-Davidson without half trying. It will meet any demand you can place upon it within range of reason, and it will pull many a "stunt" you will never duplicate in actual service.

Regardless of the machine you ride, you owe it to yourself to find out what the 1916 Harley-Davidson will do. If it does not prove out better than you anticipated—don't buy.

Isn't that a fair proposition?

You can lose nothing by learning what the 1916 Harley-Davidson will do. You may gain much satisfaction in finding a motorcycle that will do more than you thought any **could** do.

Start the 1916 season right. Start it with the purchase of a Harley-Davidson—then next winter you won't **want** to "put up" your machine for the winter, and you won't **have to**—unless you find yourself snowbound.

Harley-Davidson Motor Co.

Milwaukee, Wis., U. S. A.

"Not a Single Puncture During the Whole Run"

Such is the enthusiastic comment of a user of United States 'Chain' Tread Motorcycle Tires.

The run which he went through without a single puncture was, to use his own words, "the hardest I ever entered."

This is one more proof based on actual experience of the wonderful wearing qualities of United States 'Chain' Tread Motorcycle Tires.

Use them. Put them to severe tests, and you too will be "thoroughly convinced that no one could want better tires."

SAYS HE WILL CUT BAKER'S CROSS-COUNTRY RECORD

Robert B. Roscoe, Mounting Powerplus Indian, Will Leave New York May 10 for Dash to Los Angeles—If He Fails on First Trip Will Make a Second Attempt

NEW YORK, March 7.—The transcontinental bee is on the buzz again. Robert R. Roscoe, of Portland, Ore., dropped in at the office of **Motor Cycle Illustrated** a few days ago to announce that he has made arrangements for a try at "Cannon-Ball" Baker's cross-country record. Roscoe will use a Powerplus Indian equipped with United States Nobby tread tires, Dixie magneto and Mesinger Air-Cushion saddle.

Although he realizes that Baker's record trip will prove a tough nut to crack, Roscoe is going to start with the definite idea of lowering Erwin G.'s time, and he asserts that he will surprise a few folks along the line, if he is fortunate enough to avoid accidents.

Roscoe will start from New York City about May 10 and he is now putting the finishing touches on his plans. His route will be the same as Baker's, at least as far as Albuquerque. He will ride from New York to Pittsburgh, to Indianapolis, to St. Louis, to Kansas City, to La Junta, to Trinidad, to Santa Fe, to Albuquerque, to Flagstaff, to Peach Springs, to San Bernardino, to Los Angeles. He figures the mileage at about 3,195.

If he fails to lower Baker's record on the initial trip Roscoe will make another attempt at it later in the season on the run back to the Atlantic Coast.

Motor Cycle Illustrated has arranged for a complete story and photos on Roscoe's try for the record. He is a hardy athlete, not lacking in gameness, and with no end of confidence in his ability. Even if he fails to crimp "Cannon-Ball's" time for the coast-to-coast jump he is sure to put across some performances that will make interesting reading.

BIG INCREASE IN REGISTRATION FEES

TRENTON, N. J., March 7.—An increase of more than $200,000 from registration fees, is shown in the report of the first two months' business for the current year by the Motor Vehicle Department. To February 29 the total receipts for automobile and motorcycle licenses are $726,633.26.

During January and February 56,012 autos and 3,635 motorcycles have been registered, the severe winter being instrumental in keeping 75 per cent. of the cyclists off the roads until the spring days are here.

CRISTMAN BILL WITHDRAWN FOR AMENDMENT

NEW YORK, N. Y., March 7.—The new Cristman bill, which provides for a motorcycle registration fee of $2.50, after passing both houses of the legislature last week, has been withdrawn for amendment today at the instigation of the governor's counsel. This information was received at the office of **Motor Cycle Illustrated** late today from Secretary of State Francis M. Hugo, who is keenly interested in the cause of the riders.

Had the governor's counsel approved of the measure as passed by the legislature last week, there is no doubt that Governor Whitman would have signed the bill, which would have become effective as a law on April 1. Just what the reasons were for having the bill withdrawn was not announced.

Robert B. Roscoe

DEALER WILL BE ALLOWED TO TRANSFER TAGS

NEWARK, N. J., March 7.—After a conference between the State Motor Vehicle Commissioner Wm. L. Dill, and a delegation of the leading motorcycle dealers of this section of the State, held at the city hall today, it seems certain that motorcycle dealers will enjoy the privilege granted to the automobile agencies—of having more than one license tag, with the right to transfer it from machine to machine without notifying the Motor Vehicle Department.

As the law reads at present, a motorcycle dealer has the same privileges as a private owner—one registration for each machine and no transfer rights. If a dealer sells his demonstrator the license-tag becomes void and a new license plate must be obtained for the new motorcycle. This has caused many of the dealers to break the law and put on any tag lying round the store. When the proposed amendment goes through any dealer can obtain a set of three or five markers with the designating letter "M" before the numbers, which will allow him to use the tag on any machine in his possession.

Among those in the delegation were John Steele, Indian agent in Paterson; Wm. R. Spear, Thor; Herbert E. Coryell, Henderson; M. I. Bunkin, Excelsior; Walter Goerke, Indian, and J. Howard O'Brien, manager of the parts department for the Hendee Manufacturing Company.

GETTING ALL THE NEWS WEEKLY IS A PART OF BUSINESS PREPAREDNESS

DUAL NON-SKID ACTION IN NEW SWINEHART TIRE

THE Swinehart Tire & Rubber Company, of Akron, O., a pioneer firm in both the solid and penumatic tire industry, has brought out a motorcycle tire of 28 x 3 inches. This tire is of the depression type of non-skid, duplicating the Swinehart non-skid automobile tire which has proved its success and efficiency under gruelling usage. The sharp angles of live rubber in the tread, together with the vacuum action caused by the contact of the depressions with the road are features which prevent skidding.

The tire was put through extensive testing before it was announced to the trade. In these tests, it proved its skid-resisting qualities as well as proof of its long-wearing construction. The Swinehart motorcycle tire will fit the standard CC rim. It will be marketed through the many Swinehart branches and the motorcycle jobbers and dealers of the country.

STAFF OFFICERS MUST BE DESPATCH RIDERS

PARIS, France.—In reply to numerous applications for attachment to his staff, General Petain, in command of the corps d'armee in front of Verdun, has stated two chief qualifications. The first of these is that the applicant must be an experienced cyclist and the second that he must be a qualified despatch-rider. The latter training in the French service involves the use of signalling apparatus, map-reading and making, also, minor repairs to bicycles and motorcycles.

GOODRICH SALESMEN RALLY AT BIG CONVENTION

AKRON, Ohio.—All tire salesmen of the B. F. Goodrich Co. were in conference on Thursday and Friday of last week, March 2 and 3, at the home offices in Akron. Between 400 and 500 men attended the business sessions at which plans for the 1916 season were explained in detail and thoroughly discussed.

Salesmen from distant parts of the country met at Chicago, Cincinnati and New York City, where they took special trains for Akron, arriving Thursday morning in three bodies.

LATEST R-S CATALOG IS LIVE WIRE BOOK

CLEAR, straight-from-the-shoulder explanations of the Reading Standard motorcycles for 1916 are embodied in the latest catalog of the Reading Standard Co., Inc., of 348 Water street, Reading, Pa. Starting with the side-by-side valve motor, which has been the R-S standard for ten years, each important part of the 12 horsepower twin and 6 horsepower single cylinder models is well illustrated and accurately described.

The various models, including a new electrically-equipped one, known as the 16-E, are shown. The Bosch Ignition-Lighting generator is the source of current and a 15-c.p. headlight with 2-c.p. pilot is fitted. This model is priced at $300, complete with generator, battery, headlight, tail lamp, switch and the necessary wiring.

The cover is most artistic, showing a scene in the mountains. The color scheme is in Reading brown and sylvan green, the standard R-S colors. There is an attractive view on the title page taken on Mount Penn, the testing ground for all Reading Standard motorcycles.

KINGS COUNTY M. C. NOW AT EISEN'S STORE

BROOKLYN, N. Y.—The King's County M. C. has moved its headquarters to Harry Eisen's, a motorcycle agency and garage at the corner of Patchen avenue and McDonough street, and it is announced that meetings will be held there hereafter on Sunday mornings.

Mr. Eisen gave the boys an old-fashioned "blow-out" by way of welcoming them to their new quarters and the eatables and drinkables were varied and plentiful. It was in the neighborhood of 2 "g. m." when the last enthusiast put on his anti-skid chains and headed homeward. Which is just another way of saying that the boys had a fine time.

MECHANICAL OILER FITTED TO ALL DAYTON TWINS

DAYTON, Ohio.—The Davis Sewing Machine Company, maker of Dayton motorcycles, announces that all Dayton twins are now equipped with improved oiling systems. The system in each case includes a mechanical oiler of the positive plunger type, operated by worm gear from the distribution set on the motor. A hand pump is also fitted. No changes in price have been made because of this additional feature.

HENDERSON EXPORT SALES ON THE INCREASE

DETROIT, Mich.—Export sales continue very strong with the Henderson Motorcycle Co., of this city, a number of new dealers having been established in foreign countries during the past month. Machines are now being shipped in carload lots to the Henderson distributor in London, while Australia and New Zealand are also taking big orders.

A new agency has just been established for the four-cylinder Henderson in the Island of Guam, the little dot on the map out in the Pacific Ocean, where a new naval base for the United States is being talked of at present.

New arrangements have also been made for the sale of the Henderson in the Island of Cuba.

South Africa has shown marked signs of renewed activity within the last couple of weeks, the number of orders from that quarter having increased heavily as well as several live new inquiries having been received from prominent firms there.

The Henderson distributor in Cape Town recently placed a large order by cable.

MADE A SIDECAR TRIP IN BLINDING SNOWSTORM

GRAND RAPIDS, Mich., Mar. 3.—Howard Ferguson, Pope dealer, and Tom Martin, chairman of the "Tojapines" run committee, made a sidecar run to the Pullman sidecar factory at Ionia, Mich., on March 1 and were overtaken by a snowstorm. They found the roads in awful condition, even without the snowstorm, but the Pope motorcycle and Dunham sidecar went through without damage.

After an inspection of the Pullman factory they started for home in the blinding snowstorm and after covering 20 miles of frozen and rutted roads the sidecar tire blew out and much joy was experienced in repairing it with the mercury hovering around zero. Ferguson and Martin are being congratulated upon their gameness.

MAKES ALUMINUM STARTER PEDAL FOR EXCELSIOR

BRIDGEPORT, Conn., March 7.—Stanley Kellogg, the Eastern distributor for the Excelsior, is now manufacturing an aluminum kick starter pedal for Excelsior machines, to take the place of the present shaft and rubber constructed pedal. The aluminum kick starter pedal has the same appearance as the rubber type, but is practically indestructible and guaranteed to give long service. The new Kellogg pedal retails at $1.00, a substantial agent's discount being allowed.

CHAMPION CO. ENTERTAINS BIG GATHERING

TOLEDO, Ohio.—The annual gathering of the Champion Spark Plug Company at Toledo, last week, was attended by general managers, sales-managers and purchasing agents for automobile factories from all parts of the country. The visitors from Detroit went to Toledo on a special car. The day was spent at the Champion factory and in the evening the guests of the company were entertained at a banquet in the Toledo Club.

FISK RUBBER CO. TO OPEN BRANCH IN EAU CLAIRE

EAU CLAIRE, Wis., Mar. 8.—In a conference between William Samuelson of this city, A. G. Bolster, branch engineer of the Fisk Rubber Company, Chicopee Falls, Mass., and W. F. Smith, Minneapolis manager of the Fisk company, it was decided to have Samuelson erect a two-story fireproof building with basement at the corner of Eau Claire and South Farwell streets, to be leased by the Fisk company for a branch for ten years. The building will cost $20,000 and will be 66 by 45 feet in size.

The new Eau Claire Fisk branch will allow for three entrances on the lower floor for automobiles and motorcycles and capacious garage facilities will be provided on the ground floor also. Large and commodious offices will occupy one corner of the first floor also. The second floor will be devoted to the service department.

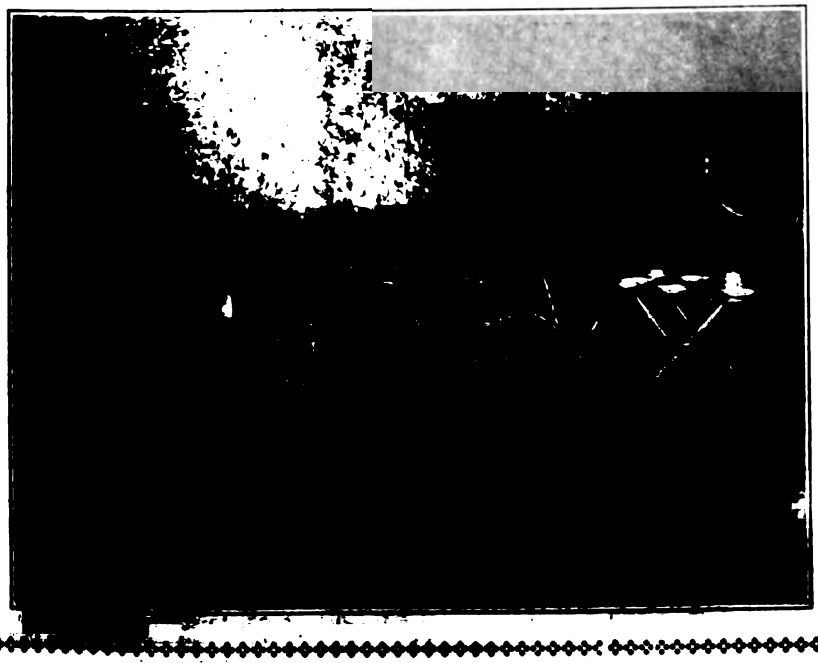
THESE NEWSY PHOTOS EMPHASIZE THE MOTORCYCLE'S WIDE SCOPE

THE photo above presents J. W. Henderson, of Denver, Col., who has just been appointed Indian factory representative for the States of Colorado, New Mexico and Wyoming. He was formerly a salesman for Boyd & Williams, of Denver, and has had a number of years' experience as a motorcyclist. He will travel the States mentioned and look after the distribution of machines from the Denver warehouse stock.

The Cygnet Rear Car outfit is shown in the capable hands of John Tragessor, Reading Standard agent in Lancaster, Pa. The machine is a 1916 R. S., and Tragessor says it romps over the hills with the two passengers in splendid style.

Below is shown an unusual window display arranged by John C. Hill, who handles the Dayton motorcycle line in Los Angeles, Cal. Mr. Hill attracted a great deal of attention by working the Dayton lightweight into the camping scene in his window, and it is a matter of record that more visitors spoke of the motorcycle than of the automobile which



was also a feature of the window display. "The lightness and simplicity of the Dayton front wheel drive machine seemed to impress visitors very favorably," writes Mr. Hill, "and we have proof that our attractive window display stimulated sales."

Pope on the Farm

The circular picture shows how a Pope motorcycle and sidecar has been worked into the "simple life" idea on a farm. It will be noted that the sidecar is capable of carrying a considerable load without any special attachments. That leaves it available for either pleasure or work on an instant's notice. "A great number of Pope machines are going to the prosperous farmers this year," bulletins the Westfield Manufacturing Company.

CHICAGO CYCLE SUPPLY CO. HANGS UP A RECORD

Progressive Jobbing House Continues Business in Spite of Disastrous Fire and Caps the Climax by Buying Out the Excelsior General Supplies Company

CHICAGO, Ill., March 3.—A striking example of business resourcefulness was demonstrated in this city this week when the Chicago Cycle Supply Co., whose headquarters at 22 West Lake street was gutted by fire on Saturday, continued to fill orders on Monday from reserve stock, with but little or no interruption in the usual course of business. In addition to this, the firm purchased the entire good will, stock, fixtures and leasehold of the Excelsior General Supplies Company, at 815-823 Wabash avenue on Tuesday, and yesterday established its headquarters in the offices of the Excelsior General Supplies Company. The Chicago Cycle Supply Company is today conducting a greater volume of business than prior to the conflagration.

Much Stock in Warehouse

The Chicago Cycle Supply Company had considerable stock in its building at 22 West Lake street, but the major part of it was in warehouses, a short distance away from headquarters. The fire broke out on Saturday in the basement, occupied by a stove company, and soon spread through the building, gutting the Chicago Cycle Supply offices and stock rooms on the upper floors. Operations were continued and shipments made at once from the reserve or warehouse stock, and on the purchase of the Excelsior General Supplies Company, the stock on hand was more than ample to care for March delivery orders.

The warehouse stock included over 2,000 bicycles, whose loss would have been difficult to replace at short notice. The warehouses will be continued in present operations of the firm, and will be stored with a reserve stock much larger than that carried regularly by the average jobber.

The Company's New Address

The new address of the Chicago Cycle Supply Company, 815-823 Wabash avenue, has facilities which are much superior to those of the West Lake street establishment. There is an 80-foot frontage with a depth of 200 feet, and the floor area is 16,000 square feet. The shipping space is much larger and there is more room for packing. The Chicago Cycle Supply Company is keeping on some of the Excelsior General Supplies road men and a great part of the office, stockroom and shipping department employees.

On Sunday morning, February 27, with the ruins still smoking, President H. P. Hansen, of the Chicago Cycle Supply Company, got into telephone communication with John W. Alvord, chief stockholder in the Excelsior General Supplies Company, offering to purchase that firm. On the arrival of President F. A. Storer of the Excelsior General Supplies Company in Chicago on Monday, the deal was consummated, and Mr. Storer's firm was merged into that of the Chicago Cycle Supplies Company the next morning.

Monday morning, President Hansen also called up the Racine Rubber Company, at Racine, Wis., and ordered a huge quantity of Chicyco tires from the molds held by the tire firm. The Racine people had 1,000 pairs of these tires on hand and commenced shipping them right away, in addition to setting the molds for more.

Office Records Saved

When the West Lake street fire was out and the ruins had cooled, the vault of the company was opened and all the books, office records and accounts were found intact. President Hansen states that while the firm will suffer a loss of between $40,000 and $45,000, the insurance is ample to prevent any financial embarrassment. He asks for copies of all bills rendered for February purchases, as well as duplicate invoices of shipments made to the firm during February, in order to effect insurance adjustments.

NEW HAWTHORNE SCHEDULE OF LIST PRICES

BRIDGEPORT, Conn., March 7.—The Hawthorne Mfg. Co. is receiving lamp orders amounting to double the capacity of the factory and the force is working at top speed to make early shipments on the business which has so far been accepted. The company is maintaining its reputation for co-operating with the trade, although working in the face of unprecedented conditions.

A new schedule of Hawthorne list prices went into effect Feb. 26 because of the increased cost of material. Brass, for example, is now bringing 40 cents a pound, and the old Hawthorne schedule was based upon a price of 16 cents a pound for brass. Aluminum formerly brought 22 cents a pound, and it is now impossible to obtain it even at the market price of 79 cents a pound. A copy of the new schedule of Hawthorne list prices will be forwarded upon application.

WILL BOOST SOCIABILITY IN C. M. A. PROGRAM

TORONTO, Ont.—According to President F. A. O. Johnston of the Canada Motorcyclists' Association, it is planned to hold a "spring festival" about May 1 for the purpose of boosting "camaraderie" among the motorcyclists in Canada and to bring members into the fold of the association. The association plans to hold a number of military events during the coming season, such as despatch carrying tests across country, mobilization manoeuvres, machine gun attacks, and race meets under military auspices.

President Johnston has reason to believe, according to inside information received, that the Ontario Government will announce shortly that arrangements have been made for a reciprocal recognition of motorcycle licenses between Ontario and New York and other States.

E. G. BAKER CABLES OF NEW HAWAIIAN RECORD

NEWARK, N. J., March 7.—The Splitdorf Electric Company has just received a cablegram from Baker, dated Honolulu, in which he advises that he has just made a new Hawaiian record on his Dixie equipped Power-plus Indian, 90 miles around Oahu Island, over very rough, muddy and mountainous roads; high cliffs, etc., time 2 hours 4 minutes 36 seconds, beating previous record by 23 minutes and 25 seconds.

AN ATTRACTIVE COVER

In Brown and Green This Work of Art Introduces the Reader to 1916 Reading Standard Models Within

MOTORCYCLES AS USUAL AT BROOKLYN SHOW

BROOKLYN, N. Y., Mar. 7.—The annual motor show in this city will open to-morrow night, and there are indications that the lineup of exhibitors, of both automobile and motorcycle lines, will be in keeping with the excellent showing of last year.

The Harley-Davidson motorcycles will be shown by Bob Brazenor, and "Busy Bob" and George Barnes will be at the booth; Frank Baker will display the Indian line, with Messrs. Baker and Goetz in attendance; A. H. Patterson will exhibit the Cleveland, Reading Standard and Excelsior and the Emblem display will be presided over by Otto Sohofer.

WILL HOLD BIG RACE FOR SOUTHERN TITLE

WASHINGTON, D. C., March 8.—The National Capital Motorcycle Club will hold its big annual race meet at the Bennings Race Track on May 30. The program of events has not been completed yet, but it is already known definitely that a one-hundred-mile race will be the feature. This event will decide the championship of the South. Officers of the club are now communicating with the motorcycle factories in an effort to secure trade teams to compete for the Southern title. W. F. Throop, of Haverford Cycle Co., has charge.

MORE SNAP-SHOTS AT THE WEEK'S NEWS

ABOVE is shown a New York motorcycle officer with his Indian mount. The machine is equipped with Splitdorf Mag-Dynamo and Edison storage batteries. The New York police department is now using 50 motorcycles with this equipment.

In the upper right hand corner appears another photo which figures in the news of the day. Paul Gott is the rider—Paul being the Harley-Davidson dealer in Peoria, Ill.—and the skater is Midge Tierny. Tierny has been defeating all comers and setting new roller skating records. In the first race with Gott, Tierny won out owing to his ability to gain on the turns. In a second race, however, Gott forgot the "Safety First" idea, clipped the corners at speed and won out.

The photo in the center shows an Excelsior and two Harley-Davidsons at the start of a recent race in Baguio, Philippine Islands. Interest in racing is on the increase there, due to the excellent speed work of the American machines in use.

Having faith in the "old bus" is one thing and tackling a desert with it may be another. The bottom photo shows a rider stopping to "hit the water bottle" on the way across the Mojave desert with a Pope machine.

BIG CROWD ATTENDS THE GRAND RAPIDS BALL

GRAND RAPIDS, Mich., Mar. 4.—Nearly 100 couples attended the first annual ball of the Grand Rapids M. C. on March 3, and the affair was eminently successful. The committee in charge consisted of Tom Martin, R. E. Heth and Howard Ferguson, and the success they achieved has led the club to consider making the ball a regular yearly event.

The dance order was made up as follows:

Lightweight One-Step, Single-Speed Tango, Three-Speed Half-Step, Big-Valve Waltz, Fox-Trot for Sidecars, Delivery-Van Hop, One-Step Starter, "Gears Always in Mesh," Waltz, Spring-Frame Half-Step, Grand Circle for Smith Motor Wheels, Ten-Mile Free-for-All, Dayton-Wheel Hesitation, One-Step for Overhead Valves, Jack-Pine Half-Step, Two-Stroke Waltz, Four-Cylinder Square Dance, One-Step for Electric-Equipt, Half-Step for Power-Plus, "Good Old X"—"Lots of Pep," "H-D Waltz."

CLUB SECRETARIES—WRITE THE EDITOR ABOUT YOUR COMING EVENTS

CROTONA 250-MILE RUN IS DATED FOR MAY 14

BRONX, N. Y.—The Crotona M. C., of 2148 Mapes avenue, announces its second annual endurance run of 250 miles for Sunday, May 14. The route will be from New York to Monticello, N. Y., and return.

The committee in charge is now working out schedules, controls, prizes and other details. For information and entry blanks, address Ben Goldstein, care of the club, at the Mapes avenue headquarters.

POPE EXTRA TELLS OF SALE TO WORCESTER POLICE

WESTFIELD, Mass.—The Westfield Mfg. Co., maker of Pope motorcycles, has issued a "Pope Extra," a leaflet describing the recent sale of seven Model L-16 twins to the Worcester police department. The first page is given over to the record made by L-15 models in use during the past season by the Worcester officers, showing that the average repair cost was $1.74 per motorcycle on a basis of six in regular use, and that the average was 7,000 miles in seven months.

The center pages show the Worcester motorcycle squad and has complimentary letters from the chief of police and Pope Agent Robert McDonald. The last page shows the machine adopted on the reorder.

POUGHKEEPSIE RIDERS PLAN 500-MILE CONTEST

POUGHKEEPSIE, N. Y.—A 24-hour endurance run, to traverse sections of five States, has practically been decided upon by local motorcyclists, and committees will be named in a few days. It is the intention to have the run cover about 500 miles through New Hampshire, Vermont, Massachusetts, Connecticut and New York, and there are indications that about 75 riders will participate.

The run will start at 11 o'clock on the evening of May 27 and will finish at 11 o'clock the following evening. A low average speed will be maintained, but contestants will be held to strict accountability at all controls and checking stations.

HURRY YOUR BIDS FOR F. A. M. CONVENTION

TOLEDO, Ohio., March 6.—President Coffman, of the F. A. M., announces that the Board of Directors of the national body is ready to receive applications from cities desiring to stage the Federation convention this year. A number of prominent clubs have talked of bidding for the honor of playing host to the F. A. M. delegates and other visitors.

Applications from clubs desiring to handle the big program should be addressed to G. B. Gibson, secretary-treasurer, Westboro, Mass. Under the constitution and by-laws of the F. A. M. the city in which the annual convention is to be held must be decided upon later than April 30.

SCRANTON REGIMENT FORMS MOTORCYCLE CORPS

SCRANTON, Pa.—Steps have been taken to organize a motorcycle squad in the Thirteenth Regiment here. All members of the regiment who are motorcyclists, or who have a general knowledge of motors, have been invited to join the motorcycle squad.

Military officials in Scranton, and in fact throughout the State, have been much impressed of late with the adaptability of the motorcycle to military service.

DESCRIBING THE FLXI-CAR AND ITS ACTION

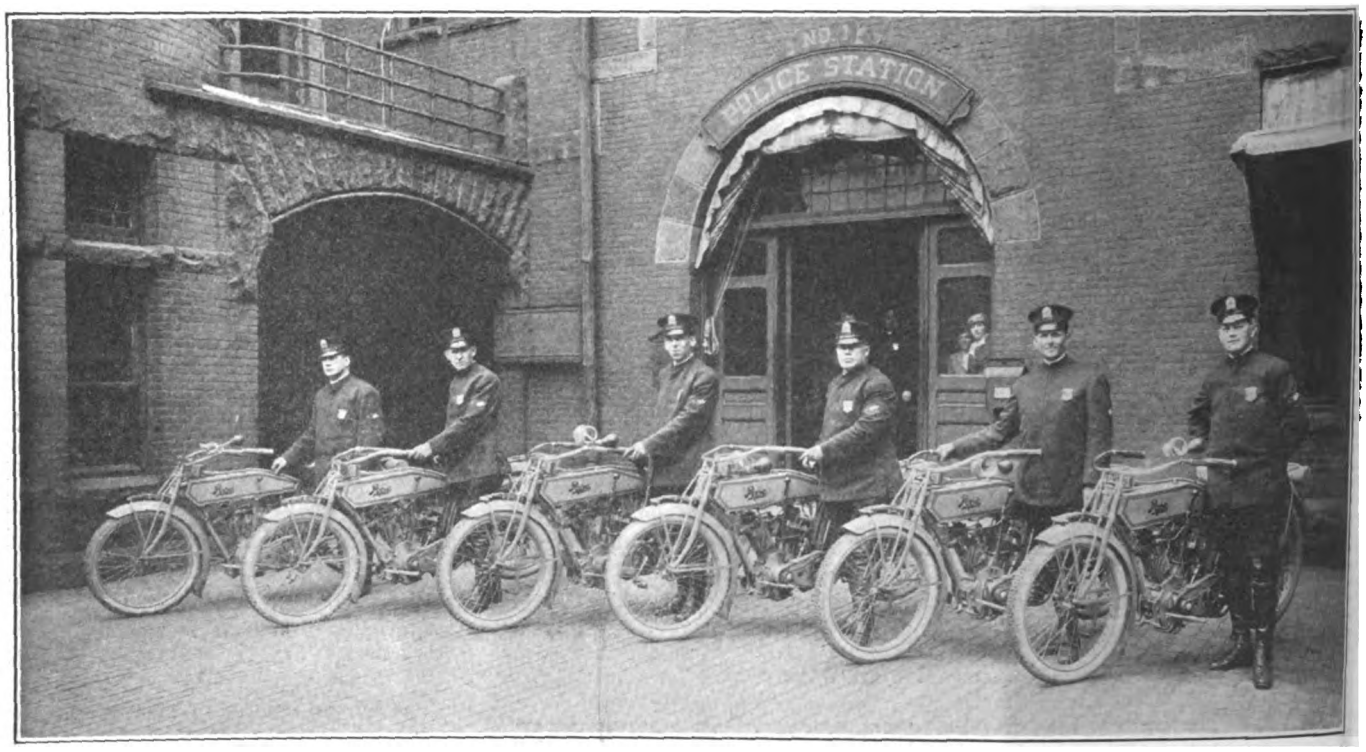
FLXI-CARS are featured in an attractive circular just issued by the Flxible Side Car Co., of 336 North Spring street, Loudonville, O. The circular shows several views of the car, and delineates the deep upholstery, large side door and other body as well as frame details. On the opposite side is a view of the firm's factory and an exposition in type and silhouette of the principles involved in its operation on the road.

LIGHTWEIGHTS TO APPEAR IN THREE EVENTS

CEDARBURG, Wis., Mar. 8.—The first meet here in which lightweights will be given a chance to shine, will be the race meet being arranged for the local half-mile track by Ray Ertl in conjunction with the Milwaukee Motorcycle Club. The Milwaukee club has been losing so much money and patience in the conducting of strictly professional meets that it proposes this year to run a series of purely amateur races.

Cedarburg always has been able to draw big crowds from surrounding towns for race meets of any kind and it is expected that, with the Milwaukee club doing the actual promoting of the proposed meet, a large delegation of Milwaukee speed fans will be on hand. The tentative date selected is May 28, the Sunday before Memorial day.

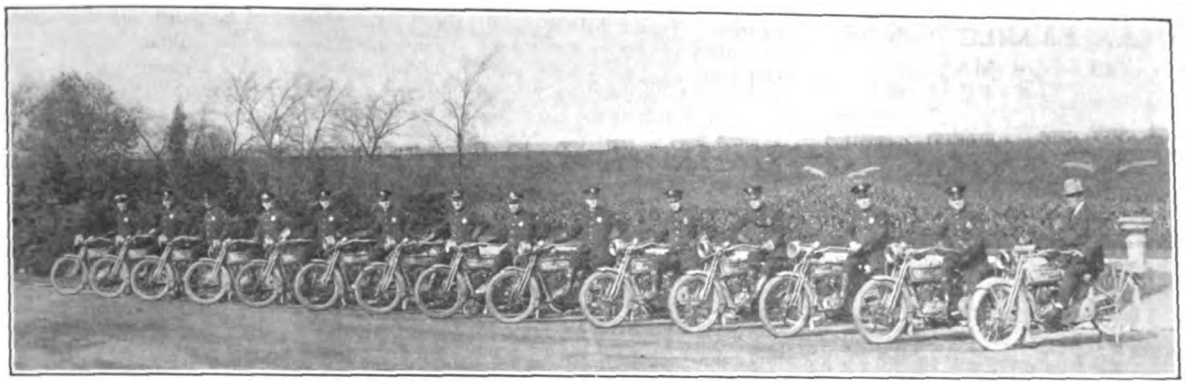
There will be a two, three and five-mile event for the little fellows and two races for single cylinder machines. H. E. Baldwin, State F. A. M. referee, will officiate.



How the Worcester (Mass.) Police Line Up with Their Recently-Purchased Pope Machines

Digitized by Google

THEY DELIVER THE GOODS REGARDLESS OF CONDITIONS



PITTSBURGH, Pa., police officials have obtained excellent results from the motorcycle squad shown in the above photo, and two 1916 Harley-Davidsons have just been purchased for the use of the County Detective Bureau. The picture is forwarded by G. H. Hamilton, local Harley-Davidson dealer, who reports having ordered 100 machines and about 25 sidecars so far this season. The motorcycle squad numbers 16 riders, but two were absent when the photo was taken.

The picture in the center is interesting as showing riding conditions in Colombia. The outfit is an Indian, on the road between Barranquilla and Galopa. Roads are generally fair in Colombia and the motorcycle is gaining converts as a result.

An unusually complete motor-bob outfit is shown in the bottom photo. It carries an Emblem motor and was designed by Lawrence Bros., of Rochester, N. Y. The sled has many of the comforts of an automobile, and the Emblem powerplant furnishes all the "pep" necessary to whisk it over the snowy countryside.

The large tank on the dash is for gasoline, while the smaller one in front is for oil. A battery just forward of the dash furnishes current for the head and tail light and electric horn.

Drive is by chain.

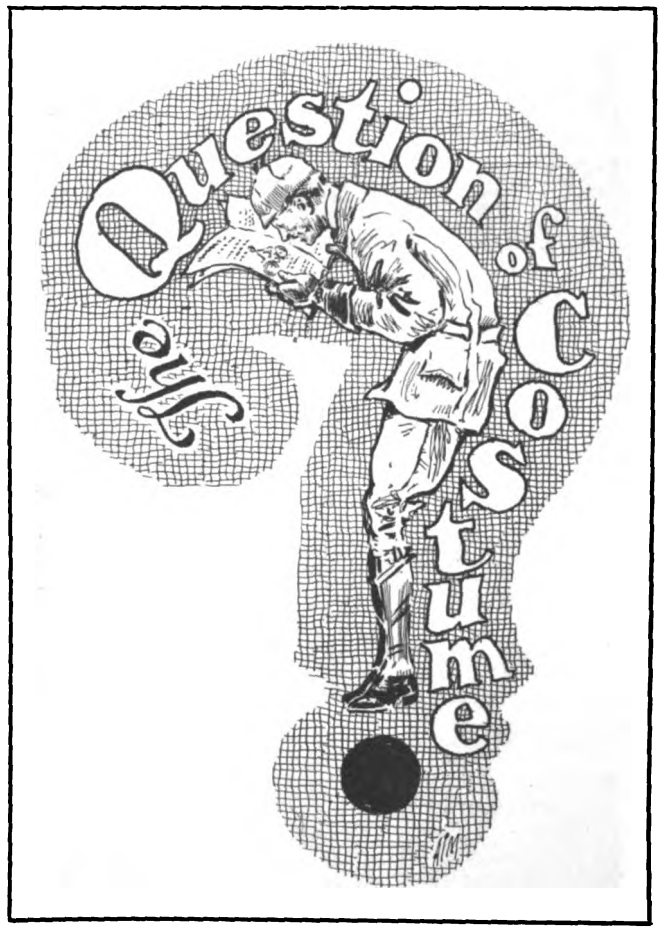
LETTERS ARE PILING UP IN THE RIDERS' CLOTHING CONTEST—BETTER MAIL YOURS WITHOUT DELAY

Spring Is Just Around the Corner and in a Few Weeks You Will Need That Riding Costume; What's It Going to Be? Motor Cycle Illustrated Offers Cash Prizes for Letters and Photos Showing the Most Satisfactory Attire for the Roadster. Read Conditions of Contest and Forward Your Suggestions

SNOWDRIFTS, 80-mile-an-hour gales and all the other blizzardy trimmings of an old-fashioned winter—such as the weather man has been passing out of late—are not calculated to engender much enthusiasm among motorcyclists for either spring riding or the selection of an ideal road costume, but it must be remembered that Spring, all indications to the contrary notwithstanding, is just around the corner.

March is merely exercising its traditional prerogative of "orneriness," and two or three more weeks will work wonders. If we put off thoughts of actual riding until every wayside fence is adorned by a chirping robin and Spring has published her arrival broadcast, we are going to be a little late in getting started. Now's the time to begin laying plans, so that the first fine weather will find us tuned up and ready from top to toe to renew acquaintance with the open country.



The Riders' Clothing contest which started with the March 2 number of **Motor Cycle Illustrated,** and which will close on Saturday, March 25, offers a fine opportunity to do some sensible enthusing over the near approach of another riding season, and also to pick up some crisp, crinkly cash prizes. As announced in the March 2 issue, **Motor Cycle Illustrated,** will award a cash prize of $10 for the most helpful and practical letter describing a satisfactory riding costume, the letter to be accompanied by a photograph showing the suit in service. For the second best letter (with photograph), the prize will be $5, and the third award will be $3.

Letters will not be judged for their literary merit but for *the value of the suggestions offered and for the straightforwardness and practicality with which they describe the riding costume.* The contributor is simply expected to tell how the outfit is made up—and if he is able to offer a suggestion for improving the suit at any point it is important that he include that in his letter.

Have you found what you consider a thoroughly satisfactory riding outfit—suit, cap, gloves, leggings, etc.? If so, describe it in 500 words, enclose a photo and mail the contribution to the Editor of **Motor Cycle Illustrated.** That's all. You couldn't find a much easier way of going after a ten-dollar bill. And even if you don't connect with the ten dollar bill there are the $5 and $3 awards.

If your letter doesn't win a prize and the photograph is still considered interesting enough to be printed, you will receive one dollar for it, and there is practically no limit to the number of costume photos we can use—*if they are really interesting and clear.* So there is an excellent chance that you will get a cash return for your letter and picture. And in addition you will have the satisfaction of knowing that you have helped to make motorcycle riding a better pastime by improving the appearance of riders in general on the road.

Better get out that photograph now while you have it in mind, and then sit down and write the 500-word letter describing the outfit. You have no time to waste. In order to be considered for the prizes a letter must be in the office of **Motor Cycle Illustrated** not later than 5 p. m. on Saturday, March 25—because the full announcement concerning the winners, with their letters and photos, will be published in the March 30 number of this journal.

How the Prizes Will Be Awarded

The awards in the Riders' Clothing contest will be based on the following percentage system: Appearance, 35 per cent.; adaptability, 20 per cent.; durability, 20 per cent.; comfort, 10 per cent.; inexpensiveness, 10 per cent.; demonstration, 5 per cent.

Appearance—Under this heading the costume suggested will be considered from the viewpoint of its appeal to all who may see it—non-riders as well as other cyclists. It must be kept in mind that a satisfactory riding costume should create an equally favorable impression when the rider is away from his mount and when he is in the saddle.

While the suit proper—that is, the coat and pants—will naturally receive first consideration, it must be remembered that no riding outfit is complete without puttees or leggings, gloves, cap and goggles. Some riders may consider a jersey or sweater among the essentials, according to the conditions of weather. In other words, this contest will be based upon the points scored by the complete riding outfit—from cap to leg covering.

Adaptability—Is the costume you are going to describe

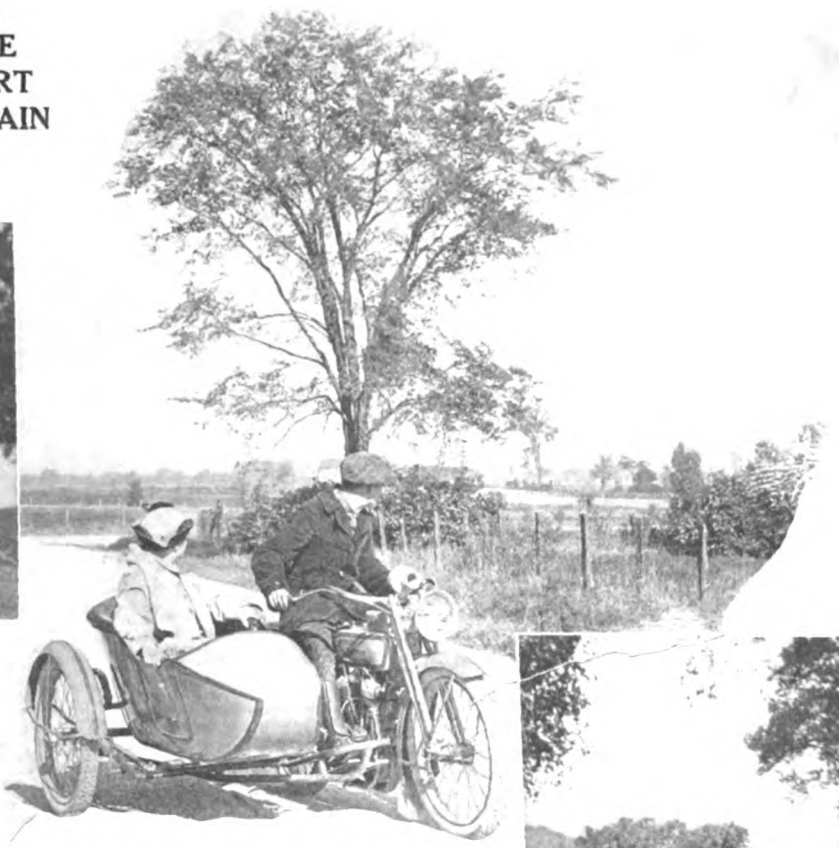
HAVE YOU BEEN SNOW-BOUND? IF SO, THESE PHOTOS WILL START YOU SMILING AGAIN



HERE are three pictures calculated to make old Ramses II, of the Hieroglyphic M. C., kick the wrappings off his mummy case and set up a howl for one of those Egyptola twins that the boys used to knock around on in his day. Of course, the Egyptola was a rather poor "can" as compared with the mounts on which we scale the Rockies semi-occasionally, but if "Rammy" could have one slant at the trio of pulse-quickening views shown above he would doubtless be willing to trundle out the old boat and take 'er up and down a few of the pyramids.

All of which is merely a post-impressionistic manner of remarking that these three photos will give you three distinct longings to buy a new machine or yank your old bus out of the camphor balls and start something. That's the proper spirit for the season, by the way, because snow and icy winds have only about three more weeks to go before checking out, and then—but what's the use of going into details when you have these photos before you.

DETAILS BOSCH VICTORIES IN MOTOR CAR FIELD

NEW YORK.—Al. H. Bartsch, advertising manager for the Bosch Magneto Company, of 223 West Forty-sixth street, is on the job once more, as is characteristic of this veteran magneto man, and his latest argument takes the form of a small four-page folder delineating 1915 Bosch victories in the motor car field. Twenty-six winnings are mentioned, being practically all the big four-wheeler events in the United States during that period.

ROOSEVELT IS HOST TO WISCONSIN DEALERS

MILWAUKEE, Wis., Mar. 7.—George M. Roosevelt, traveling representative of the Excelsior General Supplies Company, Chicago, was host to a number of motorcycle and bicycle dealers of this city and vicinity at a dinner and theater party during the week following the Milwaukee Motor, Cycle and Accessory Show.

The dinner was held in the Republican House and the following attended: R. E. Perdiu and Alex. Pelsrium, Perdiu Sporting Goods Company; Wallace Wrede and W. E. House, Mueller Cycle and Supply Company; C. D. Bremer, Bremer Cycle Company; J. J. Lantry, Henry Kaufman, B. Urich, M. Bernstein, R. L. Clark and Adolph Waech, Badger State Motorcycle Company; E. Miller, George Melcher, manager Milwaukee Show; Hugh Sharp, secretary Milwaukee Motorcycle Club, all of Milwaukee; T. Johnson, Oscar Johnson, H. C. Lawton, McLain & Lawton, Racine, Wis.; James Nelson, Racine, and Joseph Simon, Waukesha.

After the dinner Host Roosevelt invited the assembled guests to his room, where an informal half hour was spent discussing trade matters.

CHARLOTTE RIDERS FORM MOTORCYCLE CLUB

CHARLOTTE, N. C.—At an enthusiastic meeting of dealers and riders on February 23, the Charlotte M. C. was successfully organized. About 25 riders were present, and these will become the founders.

The object of the club will be to increase the interest in the pastime and sport in North Carolina and to stimulate trade. The first of a series of club runs has been arranged for, but the date is not yet decided upon. The run will be over the new Charlotte-Asheville highway which leads through the Blue Ridge mountains, the distance being 140 miles.

E. G. Graham is president of the Charlotte M. C. and J. D. Pickard is secretary-treasurer. The vice-presidents elect are E. L. Durham and C. C. Alexander. Fred Fletcher has been elected chairman of the entertainment committee.

SHOULD A RACER CHANGE MOTORCYCLES?

Limiting Rider to One Machine in Each Event Would Save Trouble and Give Better Test of Motors, Says Arthur Davidson

ONE of the questions now receiving considerable attention from followers of motorcycle racing throughout the country, and which is likely to agitate competition circles in the F. A. M. before long, concerns the advisability of allowing a racer to use more than one machine in a contest of 100 miles or over. Under existing F. A. M. regulations there is nothing to prevent a factory rider from using three or four different mounts in a long race. He can change as often as he feels that he can stand the handicap of stopping at the pits for another mount.

When the matter was brought to the attention of Sales Manager Arthur Davidson, of the Harley-Davidson Motor Co., a few days ago, he expressed himself emphatically in favor of limiting the rider to one machine in any race.

"The question," said Mr. Davidson, "is this—are we testing machines or riders? From our point of view, we wish to test motorcycles, not riders, and one machine should go through the race or else be disqualified.

"Racing at present has developed into a matter of riders and mechanics, the riders merely opening up the motors and letting them go with the knowledge that if anything happens the mechanics will take care of it. This has not helped to breed a better class of racers.

"Why should a professional motorcycle racer have a string of machines to ride, using another as fast as one gives out, any more than a jockey should have a string of horses with which to get through a turf race. If a jockey could change to a new horse every time he found that his mount was going slow or turning a little lame, the racing game would be something of a joke. It seems to me that the idea is no fairer in the motorcycle field.

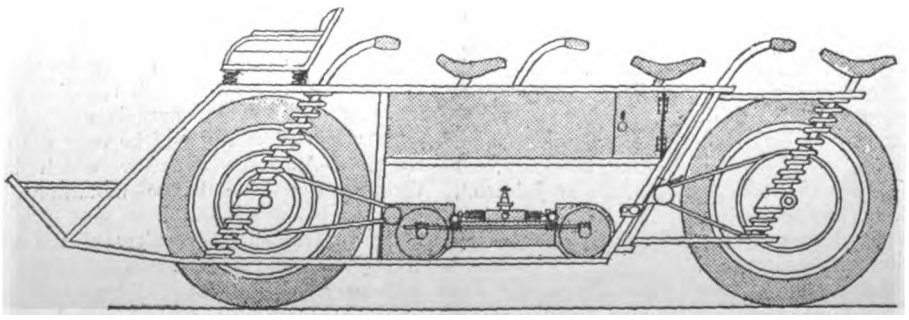
"It would save a lot of argument, give us a true test of the machines, show us just what will stand up and what won't, and ultimately lead to better machines for the public, if the rider should be confined to the use of one motorcycle in any 100-mile race. I would like very much to see a rule to that effect.

"At present it is necessary for the factory to send three or four machines to each 100-mile race—in order to keep on a par with the other folks—instead of sending out only two machines and two riders, as should be the case. In other words, we are now carrying a whole carload of scenery to put on one act, and the trouble and expense are hardly justifiable, especially when you consider that we do not get a true test of the machines after all."

FREAK MOUNT IS DESIGNED TO TRANSPORT FOUR

LONDON, England.—What may be termed a freak motorcycle for four passengers has been designed by a Teddington engineer for the use of an American railroad contractor. The frame on this machine is of the double trapezoidal type and has the front and rear wheels sprung somewhat on the lines of American spring forks, *i. e.*, with a shock spring above and a recoil spring below. The motor, which is to use kerosene, is a two-cylinder, water-cooled type, with two pistons per cylinder. It has two crankshafts which are coupled by means of a longitudinal rod having worm gears. This rod drives the camshaft, magneto and water pump.

The final drive is by V-belt to the front wheel. Steering is done by the rear wheel. Band brakes are fitted to both wheels and four-inch tires are used. The foremost passenger sits on a spring bucket seat, while the other three use regular motorcycle saddles. The wheelbase is 66 inches. The designer does not state whether one such machine has been constructed and what results have been obtained.



Four Passenger Motorcycle Showing Springing and Novel Power Plant

INDIAN VAN MAKES GOOD WHERE AUTO FAILS

NEW HAVEN, Conn.—Shelton Sturges, Indian dealer in this city, is highly elated over the showing made by a Powerplus sidevan outfit which he sold to the United Illuminating Company recently. The outfit was used by the firm's meter man and was designed chiefly for use in the suburbs.

A recent thaw following the big snowstorm left the roads seas of mud and the meter man was advised not to use the van for his trips by automobile men. He took their advice and hired an automobile, but there was too much mud and the motor overheated too frequently. Abandoning his trip he returned to New Haven. The next morning he started out with the sidevan rig.

It required some driving to get through and the meter man was unskilled. He got stalled and telephoned to Sturges, who went to him by trolley. Sturges took charge of the outfit right away and drove the rig all over the meter man's territory. It was mud-plugging with a vengeance. The meter man sat on the luggage carrier when he wasn't helping lift the rig out of a mudhole.

The trip was completed and the party went to wash off themselves and the machine. There is no longer any doubt in the minds of the illuminating company that the Indian outfit was a good investment, for that trip proved it.

DANVERS RIDERS GO IN FOR BOWLING HONORS

DANVERS, Mass.—The Harley-Davidson M. C. made up of local riders, started things moving on the evening of February 29 by holding a bowling tournament. Nearly all the members of the club turned out with their wives or sweethearts.

The prize for the highest string was captured by S. N. Henningar, the local Harley-Davidson dealer, said prize being a five-pound box of chocolates. Needless to state, all hands helped to dispose of the prize. This was the first of a series of social affairs planned by the club.

WASHINGTON M. C. HOLDS A SOCIAL EVENING

WASHINGTON, D. C., March 8.—The Washington Motorcycle Club, perhaps the oldest organization of its kind in this city, held a sociable at its headquarters on February 23. This club is composed almost exclusively of Indian riders, and membership can be secured by invitation only. The membership of the club is limited to twenty-five, and there is always a large waiting list. No attempt is made to promote public contests, though regular runs are held almost every Sunday during the riding season. H. A. French & Company's local branch is the headquarters for this exclusive organization.

BUTLER COUNTY OFFICERS FOR NEW SEASON

HAMILTON, Ohio.—The recently-elected officers of the Butler County Cycle Club were formally installed on the evening of March 1, in the presence of practically the entire membership. The officers are: President, William Glauch; vice-president, Jack Dedrick; corresponding secretary, Elmer Ortold; financial secretary, Walter Poffinbarger; treasurer, George Kendall; captain, Harry Reeder; standing committee, Edward Brannon, John Ruble, John Kersteiner and Clarence Schwab.

RACINE M. C. MASQUERADE DRAWS BIG CROWD

RACINE, Wis., Mar. 8.—More than a thousand persons attended the second annual masquerade ball held by the Racine Motorcycle Club in Lakeside Auditorium, a crowd that far exceeded the expectations of the local motorcyclists promoting the affair. The excellence of the costumes worn made it difficult for the judges to make a selection of prize winners. The judging committee comprised David F. Griswold, Frank J. Hilt and Dr. Froney.

ALBUQUERQUE WILL STAGE MONSTER RUN

Route Will Cover 1,347 Miles of Beautiful Country—The Dates Are May 28-June 30—There Will Be $2,000 in Prizes

ALBUQUERQUE, N. Mex., March 7.—Under the auspices of the Albuquerque Motorcycle Club will be held a thirteen hundred and forty-seven mile endurance run, F. A. M. sanction, from May 28 to June 30, over a course that lies through a section of the country rich in scenic beauty and historic interest. Prizes valued at $2,000 will be hung up.

The run will start and finish in this city. It will go through Socorro, the historic mining town; Isleta, the ancient Indian Pueblo; El Paso, Texas; Phoenix, the semi-tropic garden of the Southwest; Prescott, Ariz., in the heart of the rockies; Williams, and possibly the Grand Canyon of Colorado; Flagstaff, Ariz., where are the famous pine forests; Gallup, N. Mex., the great coal mining town; then across the Continental Divide; through the quaint Indian village of Laguna, and back to Albuquerque.

The officials of the A. M. C. are now in communication with factories asking them to enter their teams. Requests for entry blanks have been received from Grand Rapids, Mich.; Phoenix, El Paso, Roswell, Silver City, Las Vegas, Santa Fe, the last four towns being all in New Mexico.

The course will be definitely decided only after the club scouts have traversed the route described above. All developments in connection with this race will appear in **Motor Cycle Illustrated.** Not only the fellows, but also the lady members, of the club are keenly interested in the success of the huge endurance run, and are now hard at work in an effort to secure as much publicity as possible for the event.

JUDGES DETERMINE RATING FOR SALES LETTERS

NEW YORK, March 7.—The committee of judges who will pass on the merits of the numerous sales letters submitted to the Million Bicycles Committee met at the Hotel Astor in this city yesterday. This quartette of judges consists of R. G. Betts, of the *Sporting Goods Sales Journal;* R. F. Kelsey, of *Bicycle News;* Harry Williams, of *Motorcycling & Bicycling,* and Harold N. Condict, of **Motor Cycle Illustrated.** Chairman Charles S. Olin was present at the meeting.

The object of the meeting was the determination of a plan for rating the sales letters in order that the prize-winners could be determined. The judges are taking 25 letters each and reading them over, afterward exchanging these letters until each judge has read all letters submitted. The decision on the prize winners will then be made after a conference of all the judges. No definite date is as yet announced for the conference or the announcement of the winners.

SIDECARS MUST HAVE TWO WHITE LIGHTS

TRENTON, N. J., March 7.—Sidecars must carry two white lights to the front when operated at night in this State, the governor having signed the bill that makes this a law, effective immediately, on Saturday.

Wm. L. Dill, Motor Vehicle Commissioner, informed your correspondent that all touring motorcyclists while within the confines of New Jersey must obey this law as well as any other regulation regarding the operation of a motorcycle even though there is no law covering the question in their home State.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

BLUFF CITY, Kan.—C. A. Clift & Son have bought the Beckey hardware stock from Wilson Brothers, of Marquette. They will handle bicycles, automobile accessories, lubricating oils and small tools, and request catalogs in these lines.

PRESQUE ISLE, Me.—Sidney Graves has bought out the stock of T. H. Belyea & Co., and is handling bicycles and small tools. Catalogs on these lines are requested.

PINE CITY, Minn.—The Boyum Hardware Co. has purchased the business of the Smith Hardware Co. and requests catalogs on bicycles, automobile accessories, lubricating oils and small tools.

PASCAGOULA, Miss.—The Gulf Furniture & Hardware Company has opened for business and will add bicycles to its extensive hardware line. Cotalogs and prices from makers and jobbers are desired.

CLYDE, N. Y.—C. D. Adelfinger has sold out to Guy A. Roy, who requests bicycle, automobile accessory and lubricating oil catalogs.

SARANAC LAKE, N. Y.—George L. Starks & Co. request catalogs on bicycles and accessories.

KENMARE, N. D.—Catalogs on bicycles, automobile accessories and lubricating oils are requested by Bowman Brothers, who have just opened an implement store here.

KONOWHA, Okla.—O. W. Davis has sold his stock of automobile accessories and bicycles to G. A. Ruggles. Catalogs are wanted.

BRIDGEWATER, S. D.—C. A. Docker has purchased the stock of bicycles of Dirks & Payne and will continue the firm's business.

TIFFANY, Wis.—Catalogs on bicycles, automobile accessories, lubricating oils and small tools are requested by the H. P. Ratzlow Company, recently organized in this city.

LIVINGSTON, Tenn.—The Arnold Hardware Company has just been incorporated and will deal in bicycles, lubricating oils, automobile accessories, and small tools. Quotations and catalogs are desired.

NEW STEWART-WARNER BUILDING

The Stewart-Warner Speedometer Corp., Chicago, is to build a new Detroit branch, on Woodward avenue. It will be one story high, 40 x 250 feet, and will be in charge of Russell Baldwin, the company's Detroit representative.

PRESIDENT OF THE HAWTHORNE MFG. CO.

THE EIGHTH IN A SERIES OF BIOGRAPHICAL SKETCHES OF TRADE LEADERS

Ellsworth A. Hawthorne Achieved Prominence in Several Other Fields Before Devoting Himself Exclusively to Cycledom; A Lover of Athletics, a Progressive by Nature and an Inventor Whose Ideas Come in Rapid-Fire Order, Mr. Hawthorne Wouldn't Know What to do with an Idle Moment if He Had One

EVEN a keen observer would have found nothing in the early life of Ellsworth A. Hawthorne to indicate that his road to business success would be through the cycle industries, in as much as he achieved excellent results and considerable prominence in several other lines of endeavor before cycledom suggested itself to him as a permanent field of activity. Which is just a conservative way of remarking that the present energetic head of the Hawthorne Mfg. Co., of Bridgeport, Conn., is possessed of remarkable versatility and imbued with a spirit that would have carried him far along any line he might have decided to follow.

A Thorough Early Training

Mr. Hawthorne was born in Kansas City, Mo., but his family moved to Danbury, Conn., when he was four years of age. Farm life provided him with the robust physique which has stood him in good stead throughout his busy career, and his earliest book knowledge was obtained in a little red schoolhouse which he still recalls with a reminiscent smile.

At the age of 16, having graduated from grammar school and also finished a high school course, the youth went to Philadelphia and graduated with honors from a commercial college. Then his mind turned to the typewriter business, which was beginning to attract attention, and he became a master of the keyed machine, and, incidentally, of shorthand.

January, 1886, found Mr. Hawthorne in an office which he had opened for the handling of all kinds of expert reporting work. He progressed rapidly and soon established a string of reporting bureaus in Philadelphia, Baltimore and Washington. Forty top-notch stenographers were in Mr. Hawthorne's employ at one time.

The Hawthorne & Sheble Firm

It was in 1893 that Mr. Hawthorne entered into a partnership with Horace Sheble, the firm name being Hawthorne & Sheble. In 1900 the partnership was merged into a Pennsylvania corporation, and became The Hawthorne & Sheble Mfg. Co.

It was the firm of Hawthorne & Sheble that introduced the handling of Edison phonographs in the United States on a jobbing basis. Later the company branched out into the manufacture of talking machine accessories and supplies, and finally entered upon the production of records and machines. At the same time the firm handled a large retail and wholesale bicycle business. In 1896 they were Pennsylvania distributors for the Dayton, Pierce and Cleveland bicycles.

Hawthorne & Sheble established a branch in London, Eng., for the purpose of exploiting the "America" bicycle in Great Britain, and "Baby" Bliss, a 465-pounder, rode an "America" wheel through England to show what it would stand in the way of hard usage. At this time the firm exerted a wide influence upon cycle affairs and could always be counted upon to boost either trade or sporting features as they developed. The boosting tendency, by the way, is one that remains with Mr. Hawthorne to this day, and his generous donations of Old Sol lamps for F. A. M. membership contests have been of inestimable value to the national motorcycling body in strengthening its ranks.

That pioneer organization, the Century Wheelmen, included Mr. Hawthorne in its membership and found him as capable on the road as in an executive capacity. Mr. Hawthorne still goes to Philadelphia every year to attend a banquet of the "Old Guard," all that remains of the Century Wheelmen.

ELLSWORTH A. HAWTHORNE
Hustling Became a Habit with Him Years Ago and His Success Followed Naturally

Athletics have always attracted Mr. Hawthorne. He was one of the charter members of the athletic club of the Schuylkill Navy and was also a member of the Malta Boat Club. At one time he ranked high among amateur oarsmen, having profited by two years' training under the famous Bob Cook, Yale coach and daddy of the Cook stroke.

Many years of experience with metal goods have enabled Mr. Hawthorne to contribute valuable patents to the cycle trade and it is doubtful if any man in American cycledom has more worth while ideas credited to him in the Patent Office at Washington. The Old Sol line of lamps and accessories speaks volumes for the ingenuity of Mr. Hawthorne, and their standing with the trade is indicative of the fact that every innovation offered is based upon the actual requirements of riders. The Old Sol lamp line now includes over thirty models and meets the demand for both motorcycle and bicycle gas and electric lamps.

A Rapid-Fire Inventor

The president of the Hawthorne Mfg. Co. is too busy, too modest and too democratic to do much talking about his unusual success with lamp and accessory patents, but some idea of his energy and varied abilities will be gained when it is stated that he thinks nothing of applying for a patent a week when the inventive mood strikes him. And the mood is usually with him and in good working order.

Mr. Hawthorne is today a fine type of the men who are advancing American cycle affairs. He is always able to produce a smile; never has an idle moment when at the factory in Bridgeport, and gives promise of being able to help set the pace for many years to come.

TWENTY-FIVE NEW MEMBERS JOIN MILWAUKEE CLUB

MILWAUKEE, Wis., Mar. 7.—Twenty-five members were added to the Milwaukee Motorcycle Club's roll call as the result of an active membership campaign waged in connection with the recent Motor Cycle and Accessory Show, February 26 and 27. Irving Janke, the club's beau brummel, demonstrated his star salesman abilities at selling memberships by topping the list with close to fifteen names.

Saturday night, March 11, has been selected for a big banquet for the ladies in the club rooms. Among the speakers will be Arthur Davidson and J. J. Hegeman. Notable among the new members are E. J. Mueller, assistant sales manager of the Harley-Davidson factory, and T. A. Miller, Eastern sales correspondent. Arthur Herrington, the Newark endurance star, who has associated himself with the Harley-Davidson sales force to travel Wisconsin and Upper Michingan, has joined the Milwaukee club also.

The Milwaukee club will give a dance in Vizay's Hall, March 18.

WHY CLUB MEMBERSHIP IS WORTH WHILE

In Addition to Widening Your Circle of Friends and Fostering Sociability It Has Many Practical Angles; Every Club Should Be a School of Technical and Touring Information

By DUDLEY ESSEX

EVERY human being has a hobby and likes to mix with others who are interested in the same way. For example, observe the gun, bowling, camera and many other different kinds of clubs that enliven our towns. Isn't it natural then, that a bunch of motorcyclists should get together and form a club?

Motorcycling is not like a game of solitaire that you can enjoy off by your lonesome in some corner. Not at all, the more folks you meet and ride with, the more pleasure you are going to extract from the pastime.

Going with the Bunch

It's more fun to go off with the crowd on a Sunday or holiday to some country hotel for a meal and enjoy the day in a happy-go-lucky manner—for where is a more care-free lot of lads and lasses than those who ride motorcycles—than it is to beat it off by your lonesome at a break-neck pace that may land you in the cooler.

That is why the club spirit should be well developed among riders everywhere. Join the local motorcycle club, fellows, and mix in with the crowd whenever there is any thing on, be it on the road or in the club rooms.

This idea of hanging 'round the dealer's store is bad dope. Not only is it poor business policy for him to have you loafing about, but it is bound, sooner or later, to make you clannish. A dealer is human and can't refrain from knocking his competitor occasionally. The result will be the first thing you know you will be taking up the cudgels for him. You will snub Bill Jones simply because his motorcycle choice does not track the same as yours does.

Did you ever figure out what a monotonous world this would be if we all had the same taste. Gee! It would be simply awful.

Narrowing Field a Handicap

Not only that, but the big handicap the American motorcycle industry is under today is that about a half dozen manufacturers are producing in quantity. How can we have keen competition in business, not in a price reduction war, mind you, but in bringing out new ideas, kinks that make for comfort both in riding as well as adjustments or repairing, if the field continues to narrow yearly?

Laugh at the English motorcycle if you must, but remember that with about 40 manufacturers of machines competing for the market over there, the British makers brought out foot-boards, two and three speeds and side cars several years before we had them on our motorcycles.

But that is another story—far from the reason why every rider should join a club.

The motorcycle club that is open to every rider, irrespective of the make of machine he rides, can do more to break up this fool herding of all the riders of one make, than any other agency. That is one of the benefits of a club, fellows—it will broaden you.

On the level, isn't it laughable to see how the small dealers and riders act towards each other in some towns?—each camp with its adherents arrayed against the other crowd. Then read in the trade papers how the big fellows, the M. M. A., get together several times a year and talk over the general situation.

Clannishness never sent the sport ahead an inch, so bury the hatchet good and deep, join the local club and boost the game together; learn that the other fellow is a good sport and a real riding companion.

The best sight one can witness is a bunch of motorcyclists, all riding different makes, sailing down the road for a day's fun.

What the Club Offers

Think of the many pleasant nights you can spend at the club when the weather is not fit for riding. Here you can chin over past experiences, and many's the tip or kink you can learn or tell of; and you all know that the motorcycle is such a queer beast it sometimes stumps the best of us with its didoes. You may be planning a trip and some fellow member can post you as to the best route and stopping places.

Or you may be a new rider; if so, you are just the lad the club can benefit, in fact, the club was made expressly for you beginners. You are all of a sweat, perhaps, for fear you will have something mysterious get out of whack with your mount when you are miles from home every time you venture outside the city *limits*. And if it isn't that, you are in deadly fear that you will get lost so that you can't find your way home. Between the two fears you are not enjoying your *machine* at all. Take a man's advice, lad; join the local club and ride out with the bunch every Sunday until you know your 'bus better than the chap who designed it, and the State as well as the man who made the geography.

Educating Through Lectures

Lots of times a live club can get hold of an interesting talker from one of the many manufacturers of motorcycle parts or accessories; then the bunch can spend a profitable evening listening to a talk that will help to clear away more mysteries of the motorcycle. And believe me, the manufacturers are keen for this opportunity to get in direct touch with the consumers of their products.

Then the presence of a good club in a town will be of material benefit to all riders of the two-wheeler. For example, a few years back the National Capital M. C., of Washington, D. C., fought a drastic city ordinance to a standstill. Had there been no riders' organization in town the chief of police would have gotten away with his ruling against tandem-riding, but the club put a spoke in his wheel. And that same condition may arise in your own town.

SUGGESTING THE MODEL ENDURANCE RUN

Details Which Must Be Properly Taken Care of in Order to Insure Success in a Road Contest—Value of Endurance Contests As Boosters for the Pastime

By TOM MARTIN

IN order to obtain the fullest success in an endurance run, there are several points to be taken care of. The first of these is the laying out or pathfinding for the route, while a second is the publicity to be given the affair. Following this come the proper marking of the route, the checking arrangements and the methods of awarding places.

But before entering on these points, I would suggest that the term "endurance run" be applied only to contests in which the mileage is at least 200 per day, and the course one which will bring out the endurance qualities of both machine and rider. Many runs which have the least semblance of a contest are called endurance runs these days, even if the distance is only 100 miles and the course over boulevards. When I refer to an endurance run in this article I mean one of the real type and not a road trip en masse.

Laying Out the Course

In laying out the route for an endurance run, the club should appoint a committee of three or four experienced riders. These should agree on a course, then traverse it and make notes of road conditions, etc. As the committee consists of hard riders, it is very likely that the course will be a real endurance one. Having come to a decision as regards the course, the next thing is the publicity which should be given the affair. The committee should make up a form letter in which the nature of the contest is given, together with such advertising as the club proposes to put out. These letters should be sent to each newspaper in cities and towns along the entire route, as well as to the local papers. Addresses can be easily found by resorting to a state directory or gazette.

Good Marking Method

Next comes the marking of the course. The best plan I have seen is that used by the Grand Rapids M. C. in the recent Michigan State run. A committee of four with two sidecars work alternate miles and paint the route, using the letter R for a right turn, the letter L for a left turn and a cross at cross-roads to indicate "keep straight on." These letters are made large, red paint being used with a heavy outline or background of white. They are readily discernible and cannot become lost or pulled down, as in the case of signs. By all means take time and pains to do this and you will avoid the ancient wheeze after the run that the road wasn't half marked. Mark your course yourselves; never depend upon other clubs to do it.

Now, on the pathfinding tour checkers should be appointed in case club members are not available. A form letter of instructions should be given to each checker or at least two to a checking station, as well as an envelope with special delivery stamp, check sheets and blue flag. Also there should be special instructions as to watch-setting on the day of the contest. You will thus ensure the quick return of the check sheets for compilation of results and avoid disputes as to times of arrival, etc., if the checker's watch is set according to instructions.

Early Pathfinding Desirable

The pathfinding or laying out of the course should be finished at least one week before the contest to allow those who desire it to make a preliminary trip over the course. Such trips will also result in reports as to road markers.

Secret checking is optional, and in a severe contest is really unnecessary. Such checks can be used to advantage in many localities, endurance being the slogan at all times.

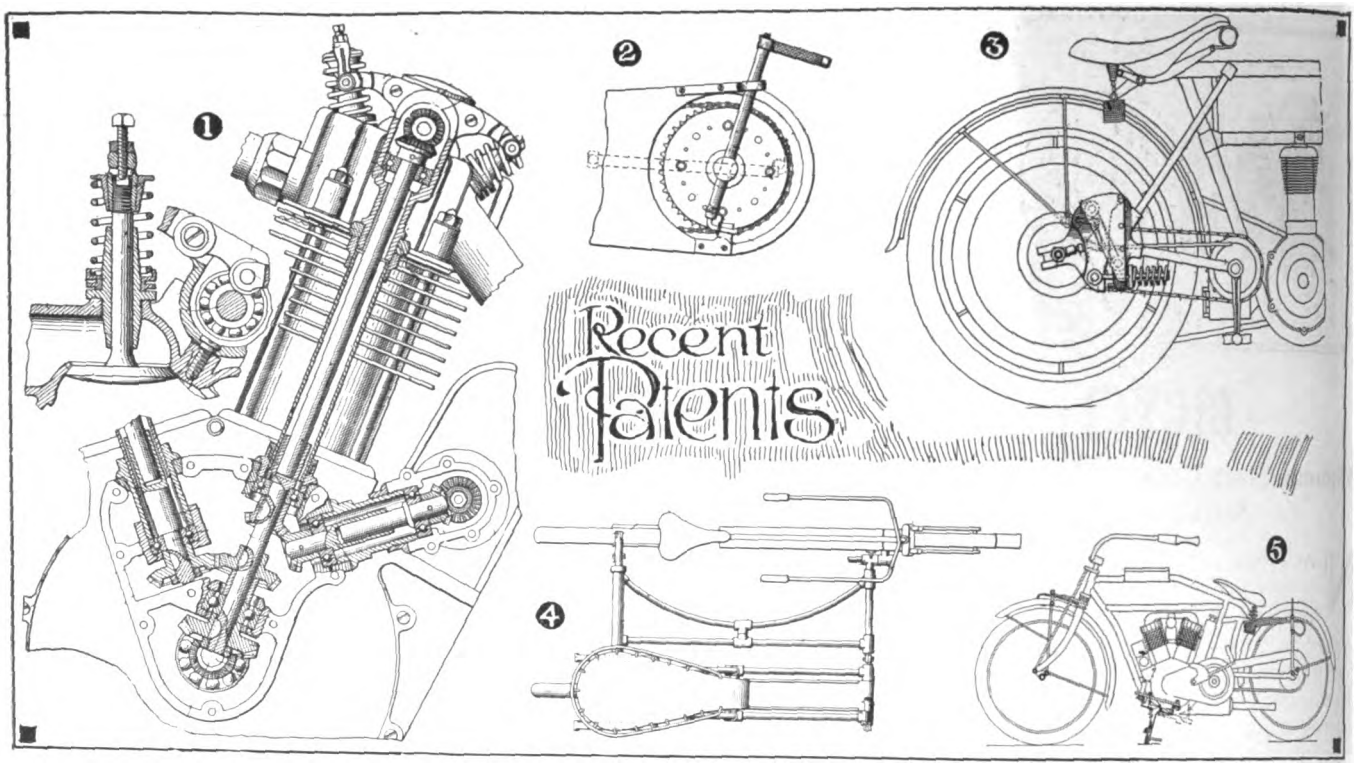
Finally, we have the methods of awarding place for starting. I find that the most satisfactory arrangement is to draw for position the night before the contest at a special meeting of the club. In regard to teams, each member should be positioned at least five minutes apart, thus throwing each rider on his own resources. This will even things up more between the individual riders and members of teams.

Value as a Booster

The endurance run should prove of as much if not greater value as a booster for sales as the race meet. The cost of the race meet is greater than that of the run. In the race meet one star rider cleans up at a certain track one day and he may be trimmed at the next affair. The average rider keeps track of all contests through the trade journals and knows the ups and downs to which the racing man is subjected.

On the other hand, the endurance run is the real interest of the motorcyclist. The machines used are the same as those he rides. The hard work put on clutches and brakes as well as on the motor do more to bring out the lasting qualities of a machine than does the ability to develop speed on a track in which conditions are always more or less favorable to such work.

Digitized by Google



CYCLONE VALVE GEAR

IN ORDER to lessen frictional stresses occasioned by the valve gear and thus attain more speed, Andrew Strand, of St. Paul, Minn., has patented an overhead valve-gear operated by a series of bevel pairs. The main shaft carries a bevel pinion meshing with a bevel gear on the end of a shaft parallel to the cylinder. The forward shaft carries another set of bevels to drive the shaft for the rear cylinder of a twin motor and a third set to drive the magneto. The valves in each case are operated by cams on an overhead shaft acting on rockers. The mechanism involves the use of seven pairs of bevels and is employed on the Cyclone twin models. Strand has assigned his patent, No. 1,172,640, to the Joerns Motor Mfg. Co., of St. Paul. Shown at Figure 1.

COMPTON REAR SPRINGING

MEANS for resiliently supporting the rear construction of a motorcycle are shown in Figure 3, being the subject of a patent issued to Clarence D. Compton, of New York, N. Y. The wheel and slider forks are attached by pivoted bars to the rear forks of the motorcycle. At the lower end of the plates forming the slider-forks are fitted rods which attach to springs, these springs serving to absorb shock and recoil. The faces of the rear fork ends and plates are so shaped as to have the plates rock on the fork ends under the influence of the springs. The patent is No. 1,173,770.

FOBES' FOOT-STARTER

OLIVER FOBES, of New Castle, Pa., has been granted Patent No. 1,172,969 on an ingenius foot-starter for motorcycles, adaptable to any machine having a countershaft-fitted clutch, and with a pedal-shaft running through the clutch. To the pedal shaft is fitted a bar which is partially revolvable, carrying at its upper end a pad for the rider's foot and an arm at its lower end. The arm has its extremity especially formed to engage one of the links of the drive chain when in operative position. On turning the pad to take the foot, the arm is also turned and the extremity engages with the chain, when a pressure downward will turn over the motor through the chain. On releasing the foot, a coil spring returns the starter to its normal position and a special piece on the chain case swings the arm and pad out of operative action. A clip holds the starter in an inclined position ready for use. See Figure 2.

HUNTER FLEXIBLE SIDECAR

CHARLES J. HUNTER, of Newport News, Va., has been granted Patent No. 1,172,995 for an improved form of sidecar. In this construction, the passenger is mounted over the sidewheel by a seat fitted with elliptical springs and a foot-board is provided for his use. The frame is made in two sections hinged to each other, the object being to allow of vertical movement of the sidecar with respect to the motorcycle, but means of rendering the sidecar rigid are also provided for. Shown in Figure 4.

KNAPP CENTRAL STAND

A CRANKCASE or central stand for a motorcycle is the subject of Patent No. 1,172,465, issued to Thompson P. Knapp, of Highland Park, Mich. This stand consists of a U-shaped piece to be attached to the lower frame or crankcase of a motorcycle, and a movable frame or stand with curved feet. The normal position of the stand is up clear of the ground, but the operative position is had when the stand is vertical and supporting the motorcycle. The stand finds its best use in making front wheel repairs or in connection with the regular rear stand. The form of the stand is such that the rider can operate it while in the saddle. See Figure 5.

MONTREAL CLUB HOLDS LIVELY MEETING

MONTREAL, Quebec, Feb. 26.—Eighty-five motorcycle enthusiasts of Montreal gathered for the organization meeting of the Montreal Motorcycle Club at the Windsor Hotel, and of this number seventeen rode through the snow on their motorcycles to attend. Plans were laid for a campaign to secure a reduction from the Quebec license fee of $10 per year, and arrangements were made for a series of smokers and other social events in the Windsor Hotel until the opening of the summer season, when racemeets will be staged. A large cup has already been donated as a race prize.

SHREVEPORT CLUB FORMED

SHREVEPORT, La.—Twenty-seven motorcyclists of this city have organized a motorcycle club known as the Shreveport M. C. and have registered the organization with the F. A. M. The following officers have been elected Frank L. Zimmerman, president; John B. Herbert, vice-president; H. C. Minor, secretary; V. L. Frankel, treasurer; E. K. Schlieppake, captain, and Walter Averett, lieutenant. The members have the use of the Shreveport one-mile track, stated to be one of the best in the South.

NEW CLUB ELECTS

AMARILLO, Tex., March 7.—At the second meeting of the Amarillo Motorcycle Club which was held here last week, the question of becoming affiliated with the F. A. M. came up for discussion, but no definite action was taken. Thirty-six members attended the meeting. Ray Kersey was chosen president; Carl Straub, vice-president; Harry Webster, secretary-treasurer; Carl Robinson, road captain, and Charles Hoppin, press agent.

BICYCLE DAY ELECTRIFIES THE TRADE

Vigorous Start Given to "One Million Bicycles" Campaign—Press Throughout the Country Gives Strong Support—What Organization Did—How Bicycle Day Was Observed

NEW YORK, N. Y., Mar. 7.—Bicycle Day has been a wonderful success. It has been an awakening. It has electrified the trade from coast to coast—dealers, jobbers, and manufacturers alike—and has effected a huge concentration of selling and advertising effort which roused the attention of the public to an extent that far exceeded the most optimistic expectations.

To anyone who has read the reports of Bicycle Day results in cities and towns scattered throughout the country, and who has glanced over the hundreds of newspapers that have co-operated with the dealers, it would seem an almost impossible task to represent adequately the staggering success that met the consistent team work of the cycle trade men.

One would, however, exclaim, "Gosh! Bicycle Day certainly has started something!" Yes, Bicycle Day has started something—it has started that campaign for "One Million Bicycles in 1916" straight toward the big goal. If the same combined effort, the same contagious enthusiasm which were manifest on February 29, will continue and increase as the year rolls on, then no one but the most pessimistic of pessimists can doubt for one moment that the year 1916 will go down in cycle trade history as the most prosperous year the trade has experienced.

Everybody's Happy—And There's a Reason

Dealers took opportunity by the forelock on Tuesday last; they brightened up their stores, dressed their windows, advertised in the newspapers, made use of the clever stunts suggested by the "One Million Committee." And on Wednesday there were few among them who didn't pat themselves on the back in well-earned congratulation of the fact that they had the kind of business judgment and initiative which got them to boost the bicycle with their brother dealers, resulting not only in sales, but also in securing splendid lists of prospects on Bicycle Day. But, of course, they realize that Bicycle Day is only a start. When the riding season is on, nearly every day will be Bicycle Day for the live dealer.

Some of the dealers up North believe that Bicycle Day would have been more productive of results for them, if it had been observed later in the season, when Jack Frost had disappeared from the scene. The cold, raw weather kept many people indoors who might have paid a visit to the dealers' establishment had the weather been more favorable. According to a number of reports received, the dealers thus affected will organize to hold a Bicycle Day of their own some time this spring.

Newspapers Played Prominent Part

The press of the country is to be sincerely thanked for the substantial support which was accorded Bicycle Day. On another page are reproduced a few clippings taken from newspapers in the East and in the West. These clippings show beyond a doubt that the newspapers are taking a renewed and lively interest in cycling activities. Of particular interest among these clippings are the effective advertisements used by the dealers, especially those which were made possible by co-operation.

The whole success of Bicycle Day was due largely to organization. In those cities where there were dealers' associations, Bicycle Day was celebrated with more enthusiasm and with greater results than in localities where dealer acted singly. In fact, the important lesson which Bicycle Day reveals is the value to the trade of organized and unified strength. To such strength is due the success with which the "One Million Bicycles Committee" promoted the big day and will continue to advance the interest of the "One Million Bicycles" campaign. Great credit is due the gentlemen on this hustling committee—Chairman Harry S. Quine, Secretary Charles F. Olin, Fred I. Willis, E. H. Hawthorne, J. W. Grady, W. A. Owens, J. F. Beck and F. A. Baker. Below are brief summaries, indicating what live dealers did in various cities:

USED COMBINATION AD

RACINE, Wis., March 7.—As indicating what can be accomplished by co-operative work, the success of Bicycle Day in this city is very interesting. Racine dealers got together and ran a combination advertisement in one of the local papers just prior to Bicycle Day. The bicycle as a general proposition was strongly boosted in the advertisement, and all of the dealers' names and addresses were listed in the ad.

"IN APPLE PIE ORDER"

BIRMINGHAM, Ala, Mar. 6.—In reporting the results of Bicycle Day one of the local dealers writes: "Everything came off in apple pie order, the race was a grand success, and all of us did a brisk business." Nearly every dealer in town ran an advertisement in one of the local papers, in return for which they were given strong editorial support that brought the crowd out to see the new models.

FIVE-PAGE BICYCLE SECTION

BUFFALO, N. Y., Mar. 7.—The special bicycle section of the Buffalo *Evening Times* stands head and shoulders above anything of its kind that appeared in connection with Bicycle Day. The section contained nearly two and one half solid pages of advertisements, which were placed not only by the local dealers, but also by local and out-of-town cycle and accessories manufacturers, and as many pages of text.

The subject of cycling was treated in a most comprehensive manner. Not only did articles appear of present-day activities, such as racing and touring in and around Buffalo, but also stories of a historical nature recalling many interesting incidents of the so-called "boom days." The manufacturers got breezy write-ups, and the dealers were more than satisfied with the results of the general boosting. Special window displays were to be seen at almost every store.

ALL HAD WINDOW DISPLAYS

ALBANY, N. Y., Mar. 7.—With few exceptions the dealers here had their windows effectively decorated, and enjoyed a good

Digitized by Google

business, though they did little advertising in the papers. The Albany Motorcycle Co. featured the Pierce bicycles, while G. Feltman showed the Excelsior and Red Wing two-wheelers. The Weber Cycling Works had an interesting display of Indian bicycles and accessories; juvenile wheels were prominent in the windows of the Albany Hardware & Iron Company. All of the dealers expressed themselves as being in favor of observing Bicycle Day at a later date, when the weather would be more favorable.

USED EFFECTIVE DISPLAYS

CINCINNATI, Ohio, Mar. 7.—Bicycle Day, February 29, which was taken up by most of the dealers here, was handled under rather adverse circumstances, as the weather was far from propitious; and this, coupled with the fact that there was no joint advertising of the event, was responsible for less enthusiasm on the part of the prospective buyer than might otherwise have been the case. Window displays were generally of an attractive nature, however, and direct sales work on the part of the leading dealers resulted in securing numerous prospects, although sales were not heavy. Souvenirs were also given away at some of the stores, the Brendamour Sporting Goods Co., for instance, presenting callers with a miniature bicycle in the form of a stick-pin. The general feeling among dealers is that the "One Million Bicycle" movement is sure to do much good.

A REAL AWAKENING

NEW BEDFORD, Mass., Mar. 7.—Bicycle Day was a real awakening here. It seemed like a return of the old days, according to one dealer, to see so many people taking an interest in the bicycle again. The dealers were nearly all on the job, and received much benefit from the publicity accorded them by the newspapers. The New Bedford *Evening Standard* reproduced a picture of the bicycle parade, which was held here in 1886, and called attention to the fact that more bicycles were being ridden and sold today than at any previous time.

SOLD FIFTY BICYCLES

INDIANAPOLIS, Ind., March 5.—A big smoker attended by the local trade men topped the busy proceedings of Bicycle Day here. More than 68 enjoyed the smoker at which the matter of forming an organization of dealers, jobbers and manufacturers was discussed. H. T. Hearsey was chairman of the meeting. It is reported that more than 50 machines were sold on Bicycle Day, Westing selling 10 and Habich 11. Guessing contests were staged by several dealers.

RUBBER COMPANIES BOOST

NEW YORK, N. Y., March 5.—Though the big metropolitan dailies hardly made mention of Bicycle Day, and there seemed to be little general interest, some dealers dressed their windows and enjoyed a more brisk trade than usual. The Pennsylvania Rubber Company and the Firestone Tire & Rubber Company each had very attractive displays which are produced on another page. Winges Brothers, of Brooklyn, decorated the entire front of their store on Saturday preceding Bicycle Day, which caused quite a lot of youngsters to come in and ask what it was all about. On February 29, they placed a big sign over the door: "February 29, Bicycle Opening Day." A picture of the Winges Brothers' store appears elsewhere in this issue.

84 BOYS IN RACE

BALTIMORE, Md., Mar. 6.—Bicycle Day in the Oriole City will go down in the history of the sport and trade here as a red letter day. The feature event was a bicycle race for boys at a half mile, which was promoted by the local branch of the Goodyear Tire & Rubber Co. It was a scratch affair, and not less than eighty-four riders lined up, making it necessary to run the race in seven heats and one final. Twelve cyclists contested in each heat and fourteen in the final. Every heat was hard fought and the victory finally went to Walter V. Igelhart, a junior member of the Crescent Bicycle Club.

This youngster captured both his own heat and ran away with the final, defeating Ed. J. Kulda and H. G. Seward. The Goodyear Tire & Rubber Company contributed all the prizes. The race was managed by Bill Logue, who has promoted a number of cycling events in the past and acted as the starter in the Bicycle Day event.

Dealers reaped a goodly harvest of sales on Bicycle Day, and with but few exceptions dressed up their windows. The finest window was that of the Howard A. French & Co. store, which was certainly a wonderful display and will be fully described in next week's issue.

MANY MOTOR WHEELS SHOWN

MILWAUKEE, Wis., Mar. 6.—Bicycle Day stirred up much interest in this city, all due to the aggressiveness of the local dealers in decorating their store interiors and dressing up their windows. The Smith Motor Wheel, whose home is in this city, appeared in the windows of practically all stores. The "bicycle booster" was also shown in sporting goods store windows. The local motorcycle and bicycle show Feb. 26-27, gave great impetus to Bicycle Day by reason of the newspaper publicity which was given the show.

CLUB HOLDS PARADE

FAIRMOUNT, W. Va., Mar. 6.—Though the weather for Bicycle Day was cold and raw, the Fairmount Cycle Club held its parade on scheduled time on Tuesday evening, which was witnessed by a fair sized crowd. "There was lots doing in the evening," writes H. C. Voelker, a local dealer, "and we hope to have a Bicycle Day of our own in the near future, when the weather becomes warmer."

"GUESSING CONTESTS" ATTRACT

WASHINGTON, D. C., Mar. 7.—The only persons in Washington, who did not know that February 29 was Bicycle Day, were either dead or very much secluded. No matter in what part of the city one walked or rode, the bicycle was brought forcibly to one's attention. There was a special display in every bicycle dealer's window, and also in those of the big tire companies and the accessory houses.

Eleven prominent bicycle dealers combined last week for a half-page advertisement in one of the leading newspapers. Four of the dealers held "guessing contests" with bicycles as prizes. Two dealers co-operated in staging a "six-day" home trainer bicycle race in their windows. The crowds literally thronged the agents' stores, and most of them rolled up a record number of sales on Bicycle Day. One dealer secured a list of 1,000 prospects by a "guessing contest."

The Goodyear Tire & Rubber Co.'s local branch conducted a sealed time bicycle race for boys, which started at 4 p. m. The race was over a two-mile course, and the following riders won: First, C. Burr; second, H. Mashmore; third, R. Whitman.

WEATHER "BUTTS IN"

LOUISVILLE, Ky., Mar. 6.—Nearly all of the leading bicycle dealers of Louisville took an active part in trying to start something on National Bicycle Day, but the weather man decreed otherwise. The Century Cycle Company, the Bomar-Summers Hardware Co., and several other concerns had attractive window displays, and several of the houses advertised in the local papers.

EXPECT A FINE SEASON

WHEELING W. Va., Mar. 5.—Local bicycle dealers bought generous space in the newspapers here, with the result that the reporters wrote some enthusiastic stories on Bicycle Day, as well as articles on the pleasures and health-giving qualities of cycling. Bicycle Day was a big success here, and the dealers are unanimous in their expectations of a fine season.

PROSPECTS ARE BRIGHT

ST. LOUIS, Mo., March 5.—Bicycle Day here was rather quiet, but some dealers made special displays and report prospects for future business as good. An effort has been made to organize the dealers here, but not very encouraging progress has been effected.

SPECIAL BICYCLE EDITION

ATLANTIC CITY, N. J., March 7.—A large bicycle supplement in one of the local papers, which was filled with bright and breezy stories on cycling, was made possible through the large advertisements run by the local branch of the Haverford Cycle Company and H. P. Gravatt, the Indian motorcycle and bicycle dealer, who also handles the Pierce.

BURTON FEATURED MOTOR WHEEL

FORT WORTH, Tex., March 7.—Newspaper advertising and news publicity also assisted the Burton Supply Company in making a success of Bicycle Day. Burton boosted the Smith motor wheel by giving a theater party and supper to all Smith motor wheel owners who had purchased their attachments from him.

STARS IN GOODYEAR WINDOW

SAN FRANCISCO, Cal., March 7.—Vic Spence, of the New Century Wheelmen, was the big star of Bicycle Day. Spence met Ed Carroll, of the Olympic Club, in a six-hour match race on rollers in the window of the Goodyear Rubber Company, and defeated the wearer of the Winged O.

Spence covered 147 miles on the rollers during the six-hour grind, while Carroll covered a half mile less. Spence showed remarkable endurance and his ability to sprint in the closing hour of the race was the main factor in bringing him the victory. Large crowds gathered around the window all during the race to watch the pedal stars at the grind.

ORGANIZE A CLUB

FREMONT, Neb., March 4.—A bicycle club was organized here on the evening of Bicycle Day. Thirty-five riders and local tradesmen joined, and it is expected that the membership will be doubled by the next meeting. The dealers were busy all day and report a good demand for bicycles and accessories. H. P. Kennersley and L. E. Fornlof, of the Goodyear Tire & Rubber Company, became members of the club. This is perhaps the first bicycle club to be organized in Nebraska, and meetings will be held regularly in the store of the Fremont Cycle Co.

LOOK TO FUTURE

DETROIT, Mich., March 7.—Detroit dealers are exceedingly well pleased with the results of Bicycle Day—not because they sold a lot of bicycles, but because they feel that the publicity given the industry is bound to produce good results as soon as the spring weather sets in. "It was not the number of machines we sold that day that counted," said one Detroit dealer. "It was the future effect. It attracted a lot of attention; people came into our stores who were never in before; it enabled us to work up a lot of prospects, and the fruits of our labor and money spent for advertising will come in the spring. Bicycles are here to stay and the proper co-operation between the dealer and the manufacturer in conducting annual national campaigns is an excellent idea.

"After all," he continued, "the bicycle business is just like any other business—it is what you make it. If you spend money in advertising, and publicity, and keep right after your prospects, you cannot fail to land a certain number of them. Where is there a boy or girl who wouldn't like to have a bicycle—even though their parents may own a motor car? Then there is the commercial value of them. I would like to see Bicycle Day come every year, and we even ought to go further, we ought to have some big stunt for May or June that will get publicity."

"A BIG SELLING DAY"

SALT LAKE CITY, Utah, March 7.—"Bicycle Day proved to be a great success," writes Norman C. Hopper, of the House of Hopper, the local Harley-Davidson agent, who also handles bicycles. "And it was a big selling day, because all of the local bicycle dealers have formed an association and are working hand in hand. We ran a full page of ads in the Salt Lake City Telegram and received a big write-up."

C. W. Brewer, of the Bicycle Supply Co., Pierce agent, held open house on Monday and Tuesday. Lon Claflin was on the job as usual and rounded up all the kids in his vicinity. Pil Wright, who also handles the Pierce, vied with Brewer to get the crowd. "Red" Broadbeck, of the Meredith Motor & Bicycle Company, made things hum, as did C. A. Fowler, Lou Anderson, and A. W. Knudson, who were three very busy men on Bicycle Day.

MERCURY NEAR ZERO

PITTSBURGH, Pa.—The mercury's active flirtations with zero prevented Bicycle Day from being the success that it might have been. Local dealers, however, are born boosters and have pinned their faith to the "One Million Bicycles Campaign." They believe that the bicycle is here to stay and look forward to staging meets and races this summer, of the sort that will have people sitting up and taking notice.

A RIP-ROARING SUCCESS

MASON CITY, Ia., March 4.—Bicycle Day was a rip-roaring success here. Three dealers made the most of the publicity that the newspapers gave them, by brightening their stores and setting up displays that had lots of "pep." The Mason City Cycle Co. showed its complete line of Pope machines, Frederick Bootz staged a cracker-jack Indian bicycle display, while K. I. Konvalinka featured effectively in his window the Great Western, Iver Johnson and National lines.

BAD WEATHER HANDICAPS

KANSAS CITY, Mo., March 2.—Bicycle dealers in this city were handicapped by the inclement weather. Snow covered the ground and kept folks at home. But in spite of this, Bicycle Day has started the dealers thinking. They have come to a full realization of the fact that increased bicycle sales will be dependent on increased publicity and advertising. The Sanfley Supply Co. featured the Smith Motor Wheel, while the sporting goods department of the Jones Dry Goods Company and the Schmelzer Arms Co. also had neat displays.

TOMMY HINDS NAILS RACE IN BIRMINGHAM

BIRMINGHAM, Ala., March 6.—Tommy Hinds, mounted on a Columbia bicycle, captured the five-mile race which was staged here on Bicycle Day, in the fast time of 12 minutes 52 seconds. Ellis Culpepper was second, while H. Davis accounted for third position. The winner's machine was equipped with Palmer-Goodrich tires. Forty-two riders faced the starter.

The success of the race was due to the interest shown by the tire company men and the local dealers. J. S. Taylor, of the Goodyear Tire & Rubber Company branch, Leeming of the U. S. Tire Company's local establishment, and Bowling of the Fisk Rubber Company's branch all worked like Trojans in promoting this race, the first which Birmingham has seen in some time.

IGLEHART WINS POINT RACE

BALTIMORE, Md., Mar. 7.—Walter V. Iglehart was again the winner, last Sunday, of the weekly point race of the Crescent Bicycle Club, riding the five miles from scratch in fourteen minutes. With a handicap of thirty seconds, Lester Nickles was second, while Ernest Nitz and L. M. Sanborn were third and fourth, respectively. This is the third time that Iglehart has captured a point race, four of these events having been held so far this season.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

In 1906 Kramer again went abroad and rode in France, Germany and England. Once more he disposed of Europe's best riders and captured the Grand Prix de Paris.

"IF I live to be as old as Methusaleh, I will never forget my trip abroad in 1906. It was eventful from start to finish, but one little incident—I say little, but it really grew into serious proportions at the time—impressed itself so firmly on my mind that I will never forget my sojourn in Europe that year."

In this manner Frank Kramer, the peer of all bicycle riders, greeted me on my arrival at his East Orange home when I asked him to talk on his European trip in 1906, and after his first few words, I became so interested, that, like the detective in the drama, I said, "Yes, yes, go on." Kramer did go on, and I will tell you why the year 1906 stands out so vividly in his mind.

On the twentieth day of May, Kramer rode a match race against Poulain, at Nantes, in France. This was Poulain's home town. He was born there and was naturally a great favorite among his townsmen. The race was at a mile and before it started Kramer and Poulain got together with the officials and decided that accidents of any kind on the last lap would make no difference and that everything was to go on the final lap of the race.

Kramer Booed and Hissed

Well, in the first heat, Poulain punctured on the last lap, and Kramer, of course, won easily. Kramer slid by Poulain very close in passing him on the last lap and when the crowd saw that Poulain was unable to sprint to the finish, they immediately set up a howl, blaming Kramer for the mishap. They wanted the race re-run. This was not done, however, and Kramer retired to his quarters until the second heat was called. When Kramer stepped on the track for the next heat he was booed and hissed to the echo. The Frenchmen threw at him whatever they could lay their hands on.

When Kramer won the second heat and the race, the crowd was as mad as a swarm of hornets and tried to attack Kramer. With difficulty he made his way to his dressing rooms and while going through the crowd, one of the Frenchmen cut the tires from his wheel. Once in the dressing room, the crowd blocked the entrance to the track to wait until he came out. At this point the police took a hand in the affair and six officers of the law escorted the peerless Kramer to the railroad station. As Kramer stepped on the train he breathed a sigh of relief to get away from the hostile fans. It seemed like a little incident, but Kramer remembers it vividly.

Kramer's greatest triumph in Europe was the winning for the second time of the Grand Prix de Paris, which was decided at the French capital on Sunday afternoon, June 17. When Kramer won this race he rode in the presence of the biggest crowd that had ever seen him ride. It was without a doubt the largest gathering that ever attended a bicycle race in any part of the world. At least 35,000 people were present, and the receipts amounted to $2,000 more than any previous Grand Prix gate in the history of the famous classic event.

Official dignity was given to this race, for it was run under the patronage of the French government. After Kramer had defeated Poulain and Friol, in the order named, he rode to the box of the Prime Minister, drank a glass of wine with that prominent official and was decorated with a silk sash. He also received a special prize from the government, consisting of a handsome china vase.

In addition to these honors, Kramer received a solid gold medal for defeating Francisco Verri, the Italian champion. Verri had won the Amateur Grand Prix, but was no match at all for Kramer in the special match race. Previous to Verri's victory in the Grand Prix, he had won all the important cycling events at the Olympic games, held in Stockholm, Sweden.

Above—Start of the Grand Prix de Paris on June 17, 1906. From Left to Right Riders are Friol, Kramer, Poulain. Below—Finish of the Grand Prix, Kramer Crossing the Tape First

Digitized by Google

The medal which Kramer captured he still has today and cherishes it highly. It bears the French coat of arms and the initials of the national cycling body in France. In 1906 was the first time that a race between the amateur and professional Grand Prix winners was ever held.

In the final of the Grand Prix de Paris, Kramer led all the way, not taking any chances whatever. Poulain and Friol both gave Kramer a terriffic battle; Poulain managed to get second place, while Friol was third. The picture shows just how close the race really was.

Kramer arrived in France early in April, and his performances during that month were not very good. Kramer was not in condition and did not do himself justice until May. He also changed to a high-geared bike. He was riding a ninety-six gear and changed to one hundred and four. Practically all the riders in Europe use high gears and Kramer said it was his salvation in the Grand Prix, for otherwise he would never have fought off Poulain to such a degree.

Kramer began his 1906 European racing campaign with two sweeping victories at the Buffalo track in Paris. He beat Van Den Born and Friol in a match race and also won an open event. A week later at the Parc des Princes track, in Paris, Frank finished second to Van Den Born in an open race. At La Fleche, on April 23, he was only second in a three-cornered match. Van Den Born was first and Teno finished after Kramer.

At Tours, on the twenty-ninth, Kramer had a "cinch" in beating Jacquelin; but the very next day at Roubaix, Van Den Born again beat him, while Friol trailed in third.

With the coming of May, Kramer rode in brilliant form once more and tucked away a majority of the races in which he appeared. He started off on the very first day in May by annexing a 1,000-meter open race, at the Buffalo track in Paris. Van Den Born trailed this time and Schwab was third.

Appears in London

On the fifth of May, Kramer rode in London, England, and won a three-cornered match race from Ellegaard and Benyon. Ellegaard was second and Benyon third. The next day, at Antwerp, Frank defeated Poulain and Ellegaard. This time Poulain breezed in second and the Danish rider was third. Kramer's next performance was at Bordeaux, where he defeated Friol in straight heats.

A large crowd gathered at Toulouse, which is just about two hours' ride from Monte Carlo, to see Kramer race against Friol. He beat Friol in straight heats. But on the twenty-fourth day of May, at Reines, Schilling, the German rider, defeated Kramer in a 1,000-meter open race. In Paris on the twenty-seventh of May the judges gave Poulain the decision over Kramer, but Frank said he won the race by a quarter of a wheel's length.

At the same track, on June 3, Kramer took the measure of Poulain and Friol. Poulain was the second rider home and Friol finished third. Riding behind the tandems at the Buffalo track on June 7, Kramer beat out Poulain and Walter Rutt, who finished in that order. Schilling, who defeated Kramer earlier in the season, had to bow in defeat to the American rider at Brussels on June 10. It was in a three-cornered match. Schilling was second and Jacquelin third.

Kramer's last race before the Grand Prix de Paris was at Antwerp, in Belgium, on June 11, and here he licked Poulain. Then came his victories in the Grand Prix de Paris, together with his triumph over Verri in the special match race.

Kramer finished second in the last two races in which he competed in Europe. Friol beat him on June 24 at Limoges, France, while Teuo was third. On July 1 Kramer rode in an open race in Berlin, Germany. Kramer did not train for this event as he was more interested in seeing the sights in and around Berlin. Ellegaard beat him by about four inches. It was Kramer's first appearance in Berlin and he says he had a fine time there, although he did not win the race. The next day he went to Bremen and then sailed for home.

(To be continued)

SPENCER TO MAKE LONG STAY IN NEWARK

TORONTO, Ont.—In a recent bicycle roller race in Toronto, Art Spencer, the Canadian champion, was soundly beaten by two club mates, Norman Webster and Coleclough. Webster turned the half mile in 32⅘ seconds; Coleclough's time was 38⅘ seconds, and Spencer made it in 41⅕ seconds. The race was one of the features of a sporting tournament in Massey Hall before 4,000 spectators.

Spencer is making arrangements to leave Toronto for Newark about April 1, and expects to spend the whole season at the Newark Velodrome.

Frank Martin, of the Salem Bicycle Club, Toronto, was recently awarded $700 damages in a suit against Joseph Crangle, whose automobile struck and injured him late last fall. The defendant has also been fined $200 in the Police Court because of careless driving at the time of the accident.

SCHULTZ SPILLS IN EXCITING BUFFALO RACE

BUFFALO, N. Y., Mar. 4.—Fully two thousand fans turned out last night to witness the indoor sports at the 65th Armory. Throughout, the programme was unusually good. More than once the riders brought the spectators on their feet.

A spill which F. A. Peterson took three yards from the finish, in the final, made the one and one-half mile bicycle lap race exceedingly exciting. Robert Schultz, who looked like a winner, yielded to Joe Schieder in the thrilling contest. Schultz, after riding in last place for some time, suddenly shot forward passing rider after rider.

He needed the last lap, however, to clinch the race. On the far stretch he outgeneraled Schieder. But as the riders swept by the fourth pole from the finish, Peterson came to the front unexpectedly and then tumbled right in the path of Schultz, who was leading. This gave Schieder an open field. Schieder took first place, and Schultz made second. In the one and one-half mile bicycle handicap, which was a rather tame race, C. F. Muth took first place while W. Frazer and E. V. Kohlmeyer, second and third.

ROSE LAMPS GIVE EFFICIENT SERVICE TO CANADIANS

PHILADELPHIA, Pa., Mar. 7.—According to advices received from the army officials of the Canadian government by the Rose Mfg. Co., of this city, the large shipment of "Neverout" lamps, which was made a few months ago for the use of the cyclists in the expeditionary forces, are giving effective service.

The officials of the Rose company were elated over the receipt of this letter, for they landed the contract in the face of the keenest sort of competition by guaranteeing the high quality of their products. The communication just received from Canada, they say, is one of the best indorsements the Rose lamps could possibly be given, for the conditions under which these lamps are being used put them to a very severe test.

DESIMONE IS U. S. I. HOME TRAINER CHAMPION

NEW YORK, N. Y., Mar. 7.—The final and closing race of the series for the home trainer championship of the Unione Sportiva Italiana, was won by Anthony Desimone, on Sunday, March 5. The series consisted of five races at various distances from a quarter to one mile, and was run on a point basis, a "win" scoring five points, second place three, and third place one. Desimone wins the championship of the club, having 18 points, while Bello is the runner-up with 13 points, and Johnson is third with 4 points.

Six members competed in Sunday's race, which was held at one mile, match style, and run in three heats, one semi-final and a final. Bello and Desimone met in the final heat, which was won by the latter in the slow time of 2:08⅖, neither rider wishing to take the lead in the first three-quarters of the mile, and fighting it out in a quater-mile sprint.

Point score for championship: A. Desimone, 18; T. Bello, 13; N. Johnson, 4; P. Giordano, 3; A. Ferrero, 3; E. Mullen, 2; T. La Rossa, 1; J. Mossuti, 1.

FLORAL PARK TO BE SCENE OF U. S. I. RACE

NEW YORK, N.Y., Mar. 7.—The Jericho Turnpike at Floral Park, Long Island, has been selected as the battling ground for the Unione Sportiva Italiana's monster ten-mile handicap bicycle road race on Sunday morning, April 9. This is recognized as the fastest five-mile course in the East, and is the same course on which the present N. C. A. record was established last year.

A very valuable and attractive list of fifty prizes, worth in the aggregate $550, including five racing model bicycles, three silver loving cups, five medals, eighteen pairs of tires and thirty other prizes is being offered. Four $50 Pierce light racers head the list of twenty-five place prizes, while a $55 Iver Johnson special racer leads the list of ten time prizes. A silver loving cup, fifteen inches high, will go to the club with the greatest number of starters.

Of a Personal Flavor

GRAND RAPIDS, Mich.—Tom Martin, one of Michigan's most enthusiastic motorcyclists, has accepted a position with the Svensgaard Sales Corporation, of Detroit, and in the future will hold forth in the eastern part of the State. Martin is one of the veteran members of the Grand Rapids Motorcycle Club, an organization of quite some fame in motorcycledom. He is also the local F. A. M. commissioner and is chairman of the big endurance run which takes place July 2, 3, 4. The local riders feel his loss quite keenly as in Martin the club had one of the best competition riders in the State.

G. B. Stone has been placed in charge of the Ohio-Indiana territory of the Remy Electric Company, of Anderson, Ind. Mr. Stone has been a member of the Remy engineering department for a number of years, doing specialized sales work in connection with engineering and is admirably fitted for his new position as sales engineer.

Raymond M. Anderson has been appointed chief engineer of the Master Carbureter Corporation, of Detroit, Mich. Mr. Anderson was in charge of carbureter design for five years with the Stromberg Motor Devices Co., of Chicago, and was recently research engineer for the J. I. Case Thrashing Machine Co., of Racine.

F. W. Suhr has been made manager of the New York tire department by the Firestone Tire & Rubber Co., Akron, O. He has been with the company for a number of years as special factory representative.

P. W. Kromer has been transferred to the Atlanta, Ga., office of the Prest-O-Lite Co., Inc., Indianapolis, Ind. He has been at the Buffalo office for some time, and will take up his new duties on March 1.

George T. Newton, formerly secretary and sales manager of the American Multigraph Company and one of the original promoters and developers of the multigraph, has accepted a position with the Fisk Rubber Company in their sales organization, at the general offices in Chicopee Falls, Mass.

C. M. Allen has just left for Detroit to promote the sale of the Heath carbureter, produced by the M. K. Bowman-Edson Co., of New York City. Mr. Allen is well known in the motor vehicle trade, being one of the first to introduce the automatic starter for automobiles.

YOUNGSTOWN, OHIO.—A. H. Harris, formerly superintendent of the Republic Rubber Co., has become connected with the Firestone Tire & Rubber Co., at Akron, O., and has also sold to that company a patented process for the manufacture of rubber goods. Mr. Harris is one of the leading experts of the country on rubber manufacturing processes.

John B. Maus, who for the past two years has been Eastern District manager of the Batavia Rubber Company, has been appointed manager of the export department of the Fisk Rubber Co. Maus is well known in the tire industry, having started ten years ago as special factory representative of the Goodyear Tire and Rubber Company, following which he became New York district manager for that concern. Four years ago he joined the U. S. Tire Company.

DAYTON, O.—W. A. Harland, traveller for the Dayton motorcycle and bicycle lines, has just returned from covering southern Michigan for two weeks. He visited fourteen towns in the interests of the Davis Sewing Machine Co., and signed up 12 agents to carry the Dayton lines. His batting average for the fortnight was thus 0.850.

F. L. Zimmerman, Jr., of Shreveport, has been appointed State F. A. M. Commissioner for Louisiana by President Coffman. Mr. Zimmerman was strongly recommended for the office, and he is counted upon to inject considerable ginger into motorcycling affairs in his state.

LINGENFELDER A BOOSTER OF EXPERIENCE

LOS ANGELES, Cal.—Eddie Lingenfelder, manager of the Goodyear Tire & Rubber Company's branch in Los Angeles, is one of the most consistent cycle boosters on the Coast—and that's going some. Eddie is one of the veterans who looked about for new worlds to conquer a few years ago when he decided that the racing game was hardly worth the time and risk involved. After a successful career as a bicycle racer Lingenfelder became the 10-mile champion in 1898, defeating such stalwarts as Earl Peabody and Eddie Llewellyn.

Eddie Lingenfelder

Among his trophies Lingenfelder prizes a large silver cup won at the Coliseum in Chicago. Eighteen three-men teams were entered in this race, but Eddie won it single-handed after his two team mates had dropped out.

When he turned to the motorcycle racing game Lingenfelder gave a good account of himself, and managed to annex several records. Then, having proved that he knew how to win out in both the bicycle and motorcycle speed fields, he determined to show his friends that he could make just as much of a success selling tires. He became a Goodyear salesman and produced such satisfactory results that he was rewarded with the managership of the Goodyear Los Angeles branch.

HENDERSON SQUAD VISITS THE ORANGE SHOW

LOS ANGELES, Cal.—Seventeen dyed-in-the-wool enthusiasts made up the party that left Los Angeles for the first Henderson run of the season, the destination being San Bernardino where the famous orange show was being held. George A. Klapp acted as captain of the brigade and reports that the outing was a success from every viewpoint.

The Hendersonites are planning a number of other sociability affairs and promise to contribute their share to the activity of motorcycle circles hereabouts throughout the year.

MARATHON TIRES HAVE 5,000 MILE GUARANTEE

ABILITY to stand up at speed on poor roads with a minimum of wear is a feature of the Marathon motorcycle tire, the product of the Marathon Tire & Rubber Co., of Cuyahoga Falls, O. This tire, which is made in all sizes to fit standard rims, has the Marathon angle tread and is guaranteed for 5,000 miles.

The angle tread consists of a series of Vees, with arms at wide angles, in three rows along the tread of the tire. Each row is so arranged with regard to the adjoining one as to assist traction and reduce side-slip. The Vees are formed deep and are long-wearing, while both carcass and tread proper are built to give a high factor of strength to more than amply care for arduous road service. Marathon tires can be had from the makers or through jobbers and dealers throughout the country.

WHY HE BOUGHT A MACHINE

"I am sending today two dollars for the renewal of my subscription. I did not own a motorcycle when I first started reading your paper. But the stories and news you print each week just made me buy a machine. I wish you and the sport every success."

ALLEN DAVIDSON.
310 Florida Ave., Columbus, Kan.

Along Technical Lines

FOOTBOARDS certainly have proved themselves far superior in lots of ways to the old pedal as a means of supporting the rider's lower extremities, but under certain conditions I think that the common or garden variety of board can be somewhat improved. One of these conditions is when traveling what I call "knobbly" roads—roads which are a series of knobs or humps, or cross-ruts.

Candidly, I think that both of my legs are the same length, but on my own boat along knobbly surfaces, my left foot used to do a sort of clog on the footboard, while the right one stayed firm. When this first happened, I had the idea that the saddle was out of true, but investigation showed that it was pretty nearly level when I sat on it. There was hardly a thirty-second of an inch difference in the height of both sides. That distance wouldn't make the left foot do the heel-and-toe.

Fitting Rubber Knobs

I shifted the saddle over a bit toward the left on one occasion, and then the right foot did the clogging. So I fitted the footboards, right and left, with a series of rubber knobs, just about 3 inches back of the tread on the clutch and brake pedals, and the clogging has disappeared. The illustration shows one of the boards with its rubber knobs.

In making the knobs I got a dozen little solid rubber balls from a toy-store and cut them in two. I drilled the footboard from the bottom side, through metal frame and rubber tread and cut holes in the tread to fit the bases of the half balls. Short woodscrews were then put into the holes, and the threads covered with jiffy solution; then the balls were screwed down on the threads and cemented to the footboard. I gave the job plenty of time to dry and, short of using the knobs for boot-scrapers, none of them will apparently pull out.

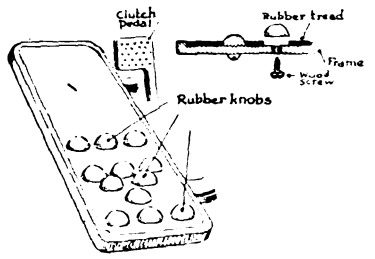
In riding the footboards, the heel and sole are to rest on the knobs, while for using clutch or brake, the heel will come between the first two sets of knobs and will keep the foot right in position for operating the pedal with the least effort. I am not going to give dimensions about these knobs, for the locating will depend on how long the rider's legs are and what position he sets his saddle at. The actual cost of the knobs was ten cents.

TWO CAUSES OF CRANKINESS IN A MOTOR

CARBURETION to most of us means simply twiddling a knob or moving a little lever on the nickel-plated object between the cylinders. The designers of our motors have figured out that the carbuters they fit would do all right except for special purposes, and they have hit the mark in practically all instances. But there are always motors which get cranky after leaving the works, and these present special problems to all hands, factorymen, dealer and rider alike. And then the rider writes to Courier for advice, generally omitting part of the details which might help solve his trouble.

Poor Running on Road

One of the recent cases which I took a journey through the snow and bitter weather to look at was a rider whose motor would not run well on the road with any possible setting of the carbureter. The factory test was running the motor in the frame only, and it is doubtful whether the crankiness of the motor would have shown up that soon in the motor's life. Well, I got out to his place and finally got the



Arrangement of Rubber Knobs on Footboard; At Right, Method of Attaching the Knobs Firmly

motor running at a good clip after taking out the jet needle valve and the entire auxiliary air valve, but the owner could not get less than 45 miles per hour out of the machine.

Another carbureter of different make permitted the motor to run about 36 miles per hour with everything taken out but the jet and the float-chamber. This got to be very interesting, so together we took off the inlet pipes and found a big ring of metal at the point where the tube to the carbureter joined the manifold. The ring was like a little mountain, with nice sloping sides, and was composed of spelter used in brazing. About an hour's work with a file cleaned it out and the motor ran much better, as low as 22 miles per hour on the original carbureter with the air-valve and jet-needle in place.

This is just an illustration of crankiness that was accidental. Here's one of about 400 similar ones that occur through the speed-mania. I know, for the 400 wrote me during two seasons about their troubles, after they had performed the operation which caused the poor running. The motor would not run well below 30-40 miles an hour, but it would *move* when the throttle was opened! The carbureter had a main jet and a pilot jet.

To get more speed, the riders had gouged the delicate little slots in the main jet, so that more gas would come through. They got the speed, but there was nothing like good running at anything like 20 miles an hour, for they had upset the mixture proportions and "loaded up" the inlet pipes with a rich mixture—too much gasoline to the air taken in. Then, after queering the motor—which ran nicely when they first got it—they asked what the trouble was or cursed the whole machine as no good.

I might have had a rubber stamp printed for these fellows, with the words "Why did you gouge the jet?" on it, but I didn't. It would have saved lots of typewriter ribbon and paper, also two-cent stamps. The moral of both instances is, when the motor doesn't run to suit you, don't tinker with the carbureter; merely adjust it with the levers or knobs that the instruction book tells you to.

MORE COMFORT TIPS FOR THE SIDECARIST

WITH the increase in the number of sidecars which has already made itself evident for 1916, there are a few little details which are well worth memorizing, if only for the sake of the passenger's peace of mind. One of these is the action of tires on ice and hard roads.

A sidecar combination is hard to skid, if properly lined up, and in winter weather there should be particular attention paid to this adjustment of the car to the motorcycle. However, with a car out of line, there will be a tendency to skid because of the sideways drag of the car. Now, rubber slides nicely on the ice and also on wet asphalt, and care should be taken when traveling over either surface against whipping. There isn't much real danger in whipping on ordinary roads, but the passenger, especially if he or she is not used to it, will not be any too comfortable in the mind when the rig starts to slither.

A little experience on ice with ordinary tires has caused the abandonment of a number of sidecar rigs this winter, owing to the driver not taking the precaution of going at a moderate pace when these surfaces were traversed. The passenger got the idea that the car was unsafe, in each case, and as she had a good deal to say about things, the sidecar was given up.

I spoke about special mudguarding in the last installment, as making the passenger more comfortable. Well, there's another thing: the position of the footrest. Some sidecars have them, but they are located too far for the ordinary passenger to reach with their feet. It's not comfortable riding with the feet flat on the floor of the car or with just the heels resting, so build out from the footrest with cushions and burlap.

Powerplus—The Motor That Convinced a Whole Country Over Night

Very few products have had their names become *nationally known* in so short a space of time as the 1916 Powerplus Motor.

Here is a tremendously significant case of a mechanical achievement *more than making good on the claims of its name—and receiving immediate recognition of its worth.*

The designation "Indian Powerplus" has swept from coast to coast because it has excessively satisfied everyone who has looked at it or operated it.

Thus, into the hands of each Indian dealer has been placed a selling, profit-making asset that has no duplicate in the whole motorcycle trade.

The motorcycle buyer is *demanding* Indian Powerplus Motor today. Consequently he MUST go to the Indian dealer.

How Powerplus has strengthened each Indian dealer is almost beyond computation. How it has made the best motorcycle agency a still more valuable one is something that will certainly show big when the 1916 returns are in.

EVERY POWERPLUS DEALER IS AN ASSURED PROFITPLUS DEALER. EVERY POWERPLUS SALE TO DATE HAS CREATED OTHER SALES. POWERPLUS IS A SUPREME ACHIEVEMENT IN THE LOGICAL RELATION BETWEEN A SPLENDID MECHANICAL MASTERPIECE AND ITS SELLING SUCCESS.

Indian Featherweight in Command of the Lightweight Division

By reason of extensive experimentation and test the Indian Featherweight offers to the purchaser the most seasoned machine of the junior type that 1916 affords.

In design, in mechanical features and authenticity of origin it takes the leadership by natural right as shown by splendid performance all over the United States.

The simplicity of lightweight machines make comparisons very easy—and Indian needs little checking up to show how advanced it is in the class which it heads.

The widespread enthusiasm regarding the Featherweight which dealers voice to us has a meaning of first importance. It not only expresses an extreme faith and appreciation in the new Indian product, but it shows the way to an unlimited future volume for the whole industry in the manufacturing of a good, sound, simple, low-priced lightweight machine.

The creation and promotion of the Indian Featherweight has more than ever increased the gilt edged value of the ownership of an Indian agency.

Let us make this prediction

AS PART OF THE INDIAN LINE THE INDIAN FEATHERWEIGHT TYPE MACHINE IS GOING TO BE PROPORTIONATELY INSTRUMENTAL IN DEVELOPING SOME VERY PROSPEROUS BUSINESS MEN.

HOW BAKER SET A NEW 24-HOUR MARK

Victorian Club Official Gives Details Regarding "Cannonball's" Lowering of Existing Australian Twice-round-the-Clock

MELBOURNE, Australia.—An interesting detailed account of Erwin G. Baker's recent shattering of the Australian twenty-four hours road record has been given by H. Gordon, one of the Victorian M. C. officials who was present at Baker's first and also at his second and successful attempt to better the existing mileage for that period.

When Baker went out for his first attempt at the twenty-four hours he chose a course at Mortlake, triangular in shape and measuring 33.9 miles around. The big American on his Powerplus Indian completed his first lap in 37 minutes and bettered this by 30 seconds on the next round of the triangle. For the next two laps, however, he lost time by taking on gasoline and oil and making carbureter adjustments. He rode brilliantly, hitting up a speed of close to 75 miles per hour on the straight stretches and covered 372.9 miles, when a broken spring support in the rear caused him to give it up. He covered the 372.9 miles in 7:23:00, averaging 53 miles per hour.

But the first attempt was not barren of results. Baker set a new mark for the Victorian 100 miles and for the Australian 200 and 300 miles, as well as for the three hours and six hours. His times were: 100 miles, 1:48:30; 200 miles, 3:41:00; 300 miles, 5:35:00; three hours, 163 miles; six hours, 315 miles.

A few days later Baker started on his second attempt for the twenty-four hours record. There was much driving rain and the roads were muddy. At the end of the first twelve and three-quarter hours, including eight hours of the night riding, Baker had covered 550 miles, averaging 43 miles per hour. The weather then became very boisterous, and Baker lost about four hours through mishaps, but covered 373 miles within the time limit and broke the existing record by 73 miles. His total was 930 miles, thus establishing a new Australian and a world's road record.

But for his poor luck Baker probably would have covered 1,000 miles in the twenty-four hours. The previous record was 857 miles, made by Carl Korner. Baker and his Powerplus have been creating a great sensation in Australian motoring circles ever since.

The New Year's reliability trial of the Victorian M. C. brought out a nice field of contestants, among which were two ladies riding Triumph two-strokes. Unfortunately the fair contestants did not figure among the winners. The weather was hot and the course, which included a passage over Black's Spur Mountain, proved arduous. There was considerable rain, which made going treacherous in places, and a few of the riders gave it up. First places in the solo class for machines over 600 c.c. and in the sidecar division went to Excelsior riders, L. G. White having a perfect score in the solo class, and Stan Nunan, with his Excelsior sidecar, being penalized two points for the entire course. White was the only perfect score man in the solo division, in fact. F. Fish with 5-6 twin Clyno sidecar, was second in that class, and won the novice prize also. There were 40 solo mounts and 15 sidecars entered in the trial.

NEW CLUB FORMED

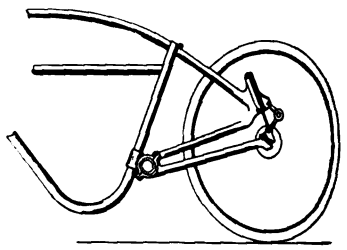
WEST BEND, Wis., Mar. 8.—The Excelsior Motorcycle Club has been organized with a charter membership of thirteen and prospects of an increase shortly after the riding season opens. L. F. Kuester was elected president of the new organization, Clarence Knoeck, secretary, and J. Seefekd, treasurer.

GRIGSON'S MOTOR BOB IS FULLY EQUIPPED

Electric Lights and Horn, Two-Speed Gear, and Hand Brake Are Fitted to This Henderson Bob by Rudolph Grigson, of St. Paul, Minn.

WAGNER SPRING FRAME

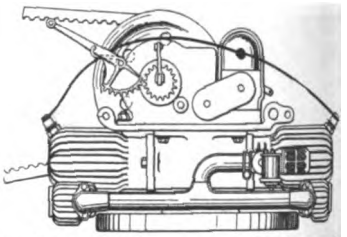
PATENT No. 1,171,371 has been granted to Otto A. Wagner, of Ensign, Kans., for a novel spring frame or mounting for the rear wheel of a motorcycle. The device consists of a pair of rocking forks journaled at the bottom bracket and having slider-



forks at the rear ends. To these slider-forks are attached plunger-rods entering inclined cylinders within which are compound springs for absorbing the road shocks. Friction absorbers of the Truffault or scissors type are also fitted, attaching to the rear of the main forks in which the spring cylinders are fitted and to the slider-forks. The function of the Truffault absorbers is to prevent violent recoil.

RAYNER UNIT POWERPLANT

GEORGE F. RAYNER, of Acton, England, has obtained a patent on a unit power plant for motorcycles in which the gearset is located above the crankcase of the motor, the latter being of the opposed cylinder type. The motor is arranged with its crankshaft vertical; at the lower end is the flywheel while the upper end carries a worm meshing with a worm-wheel on the



main shaft of the gearset. The latter is of the sliding dog clutch type and is controlled by a gate change. A multiple disc clutch is incorporated in the gearset housing and the final drive is by belt or chain. The magneto is driven by chain from an auxiliary shaft in the gear casing, while a kick-starter operates on the gearset main shaft. Means of readily attaching the unit power-plant to the frame and detaching the same are provided. The patent is No. 1,170,845.

OHIO TO SPEND $2,600,000 ON ROADS THIS YEAR

COLUMBUS, Ohio. — Approximately $2,600,000 will be distributed by the State to the various counties this year for good road purposes, so State Highway Commissioner Clinton Cowen has announced. Half of the money will be available the middle of March, and the rest some time in August. This money will be for main market roads, for inter-county roads and for maintenance of these roads.

In 1914 eleven counties were given money for main market roads and in 1915 the number was 19. This year 39 counties will get money for main market roads. For every dollar given by the State for main market roads, the county must put up at least an equal sum.

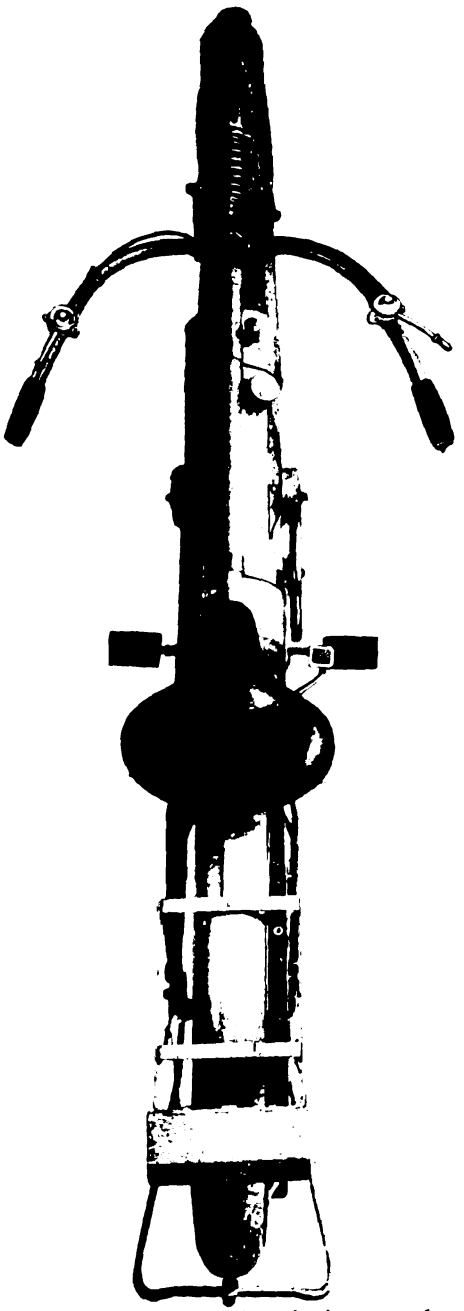
GRIP CONTROL



Gear control on left grip in neutral position. Throttle control on right grip in closed position. Compression release lever under right grip, does not show in illustration. Brake lever shows directly over right foot rest.

Do You Know—

That the EXCELSIOR was the first motorcycle with complete grip control of all functions of the power plant—

That in the new

EXCELSIOR LIGHTWEIGHT

this feature is still further developed to the point that Motor Speed, Gear Shift and Compression Release are entirely controlled by levers on the handle bar, so located that all may be reached without even loosening the grasp on the handle bar grips—

That this is the greatest possible insurance of safety for both the beginner and the experienced rider—

That the majority of accidents, particularly to inexperienced riders, is due to momentary loss of steering control while reaching for more or less inaccessible control levers—

That this is only one of the many features that make

THE EXCELSIOR LIGHTWEIGHT

everybody's motorcycle—

That EXCELSIOR LIGHTWEIGHTS are selling faster than any other motorcycle ever put on the market?

There are many reasons set forth in our LIGHTWEIGHT circular, number 17-L, and the dealer will gladly give you a most convincing demonstration. Get both.

GETTING FULL VALUE FROM SHOW WINDOWS

Demonstrating the Dollars and Cents Worth of the Glass Front and That the Window Contents Are an Index of Business Within—How Neglect Lost an Agency

By PATHFINDER

I STOOD in the drug store managed by a friend of mine the other evening and discussed various things with him while I waited for the vaudeville show in the next block to begin. We got talking about various phases of the business and during the course of the conversation we would be constantly interrupted by the tap, tap, on one of the show windows within which sat a corn cure demonstrator trying to attract the attention of passersby to his wares.

"Gosh, that must be a monotonous job," I couldn't help remark.

"Monotonous, maybe, but remunerative," replied my friend, the manager. "You may be surprised to hear that that window draws $10 a day under ordinary conditions. When there is a convention or anything special in town the price goes up as high as $50 a day. We certainly make our show windows pay dividends. Even when they are displaying our own stock we consider them worth that much to us so our conscience does not bother us. However, we never have any trouble getting our price."

Here is a little lesson in window value that had never been brought home so forcibly before. Instantly there formed in my mind's eye a picture of Bill Saxe's window. Bill is one of our oldest motorcycle dealers and occupies a store near my friend the druggist's place. Both have as good a location from the traffic standpoint. The druggist figures his windows worth $10 a day. Bill's windows are worth every bit as much. The only trouble is Bill can't see it.

In contrast to the gold mine value of the drug store windows, Bill never derives any more value from his than their capacity to hold all the junk for which place cannot be found anywhere else. If you went to him and said, "Bill, those windows are worth $10 a day to you," he would consider it just as much of a suggestion toward building up his business as if you told him that aeroplanes would make a good sideline.

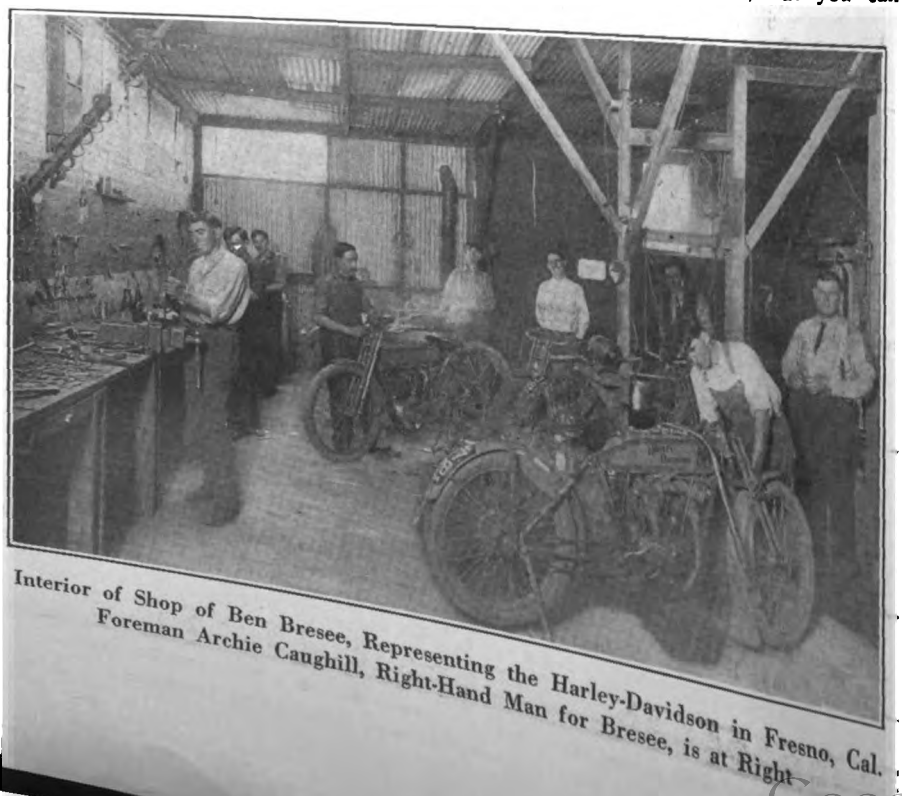
An Unchanged Front

True, Bill has spasms of enthusiasm over those windows of his. But they are far between times and explode long before they have a chance to start something. Bill's windows never perk up unless Bill has had a scrap over something and is mad. But he is such a neutral sort of a gent and so seldom can be drawn into an argument that the store has gotten to be a sort of landmark due to the fact that the front never changes.

Now Bill is not a bum dealer. I wish I had one-quarter of the money he has salted away in the First National and a small slice of the rent he draws each month on some high-class flats in our exclusive residential district. There's the rub. Probably if Bill's business took a sudden slump some time and he was forced to play on resources never worked before in order to build the business up again he could be made to realize the dollars and cents value of a good window display.

It is a well-known fact that the class of riders who are boosting for Bill's make of motorcycle constitute the rough neck element of the sport. Taking a look at Bill's show windows makes it easy to figure this out. They are the surest sort of index to both the character of the dealer and the riders he will draw to him.

Bill's time of reckoning is coming. He is going to find himself losing out on a whole lot of sales that Jimmie Alton is picking up. Jimmie has never been a Beau Brummel, but you can take any of Jimmie's riders and place him amongst the gang that frequents Bill's quarters and he will stand out like a tuxedo in a repair shop. Jimmie always has set the standard for his riders, unconsciously perhaps, but nevertheless a marked fact.



Interior of Shop of Ben Bresee, Representing the Harley-Davidson in Fresno, Cal. Foreman Archie Caughill, Right-Hand Man for Bresee, is at Right.

Not Up with Times

And Bill's time of reckoning is right now. Motorcycling is being elevated to that stage where it is possible for the dealer to walk into the best homes of the city for prospective buyers. He couldn't do it several years ago and he cannot do it in some homes now. But the time is coming. The sons and daughters of

GETTING FULL VALUE FROM YOUR SHOW WINDOWS

(CONTINUED FROM PAGE 38)

the rich are tiring of their automobiles and horses. Motorcycling is making its appeal to them. It furnishes them the sport they can enjoy for themselves and one which offers possibilities far in excess of any other amusement they ever tackled before. It has always been said that motorcycling is the sport of kings. That saying no longer is a mere slogan. It is becoming an established fact.

Here is where Jimmie is going to walk right in and make a killing. It won't be anything different for him. But Bill, what chance is he going to have with the new order of things? He may decide to reform, but the many years of rough neckism will have left their mark indelibly in his every action.

If Bill thinks he is getting away with something, he has another guess coming. The fellows at the factory are wise. They are more than ordinarily interested in this uplift stuff. They have always figured that the dealer should be the prime factor in its evolution. And the way a dealer keeps his store and, incidentally, his show windows, decides whether or not a dealer is doing his share toward elevating the sport and the commercial end of motorcycling.

The factory has had its eye on Jimmie Alton for a long time. They have been hearing so many good reports from riders voluntarily speaking a good word for the service they get from James Alton. Jimmie's machine has not had the boosting through advertising that Bill's has been geting all these years so that Jimmie is not very averse to taking over Bill's brand.

Well, we haven't said an awful lot about the dollars and cents value of the show window. But if Bill loses the agency for the machine he handles he is going to realize that it was the failure to appreciate the value of his windows as an asset for placing the motorcycle business on the same high plane as the best merchants in town that put him among the back numbers. His machine is one of the biggest sellers that has a factory back of it spending money like a drunken sailor on advertising and helps to its dealers, and the loss of the agency will hit him hard.

It takes a good man to sell a motorcycle these days. The increasingly high-class of trade being attracted to the sport is rapidly squeezing out the old type of dealer with his greasy paws and dirty clothes. In his place is coming the motorcycle salesman. Competition may have something to do with it, and if such is the case, more power to it!

COLORADO SPRINGS, COLO.

CHARLES T. LOWNDES has taken the agency for the Henderson in this city, the contract having been signed by D. B. Southard, Colorado distributor. Mr. Lowndes, who holds the rank of Major, is one of the prominent figures in the motor field in this city. His attention has previously been taken with automobiles, but Southard convinced him of the possibilities in the Henderson in short order.

"Major Lowndes' entry into the motorcycle field caused some stir in Colorado Springs," said Southard, "and has served to bring the motorcycle to the serious attention of many people who had previously passed it over as an impractical toy. They have decided differently since the Major took it up."

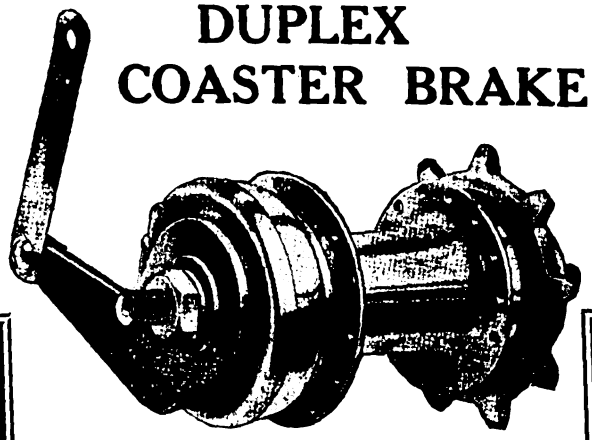
The Strongest Argument in Favor of the Superiority of the

CORBIN

DUPLEX
COASTER BRAKE



lies in the fact that it is considered the most satisfactory and durable brake on the market by dealers who rent wheels. They are the ones who are qualified by actual experience to judge the merits and reliability of this famous coaster brake.

This means a great deal.

It means that these brakes are constantly subjected to the hardest, most rigorous test to which a brake can be put; it means that day in and day out they are employed in the service of riders who are inclined to be careless in their treatment of them; it means that the Corbin Duplex has come through these tests with an absolutely clean service record.

It means to the rider it is the brake he can rely upon for service. It means to the dealer it is the brake he can rely upon for sales.

Equip the old or new wheel with the Corbin Duplex Coaster Brake.

METZGER ENTERTAINS BIG GATHERING ON INDIAN DAY

DETROIT, Mich.—Several thousand motorcycle admirers thronged the wigwam of the W. E. Metzger Co. at 501 Woodward avenue, on Washington's Birthday, otherwise Indian Day. The crowd was continuous, but was bigger at night than in the afternoon.

During the day refreshments were served and souvenir match boxes and cigars were distributed. The unusual feature of the crowd was the few of the regular riders who attended, the bulk being new faces. There were several sales made, although no attempt was made to sell during the celebration. H. D. Purinton, Harry Frey and Beverly Schlunt were on the floor the entire afternoon and evening to greet the visitors and explain things.

WASHINGTON, D. C.

INDIAN AGENTS in this city, Howard A. French & Co., and F. L. Leishaar, are highly pleased with the success of Indian Day this year. Invitations sent out by the factory attracted over 2,000 visitors to each agency and the lists of prospects were greatly lengthened. Nearly twenty-five Indians were sold outright during the day and twice as many Indian bicycles.

The Featherweight was easily the feature of the celebration at both agencies and was favorably commented upon by all visitors. J. Howard O'Brien, of the Hendee forces, and Traveler Frank L. Long, lent their aid to both establishments. "O'Bie" did some fancy riding to show the ease of control of the Indian and Long arranged for the parading of the streets by a rider wearing Indian dress.

LANSING, MICH.

OSCAR C. LENZ has opened a new shop at 130 East Washtenaw street and has taken the agency for the Henderson. He has already booked orders for late March delivery and sees a very bright outlook for the entire season.

Lenz had several years' experience in the motorcycle and bicycle field before moving into his new and larger place and is thoroughly familiar with the various angles of the business. His territory includes a wide distance around Lansing in addition to the city.

MIDDLETOWN, N. Y.

FRANK D. FANCHER, signed up to represent the Harley-Davidson in this city and immediately arranged for a booth at the Middletown auto show held during the last week in February. Fancher exhibited two models of the 16-F three-speed twin, one being fitted with a sidecar and one of the Harley-Davidson display cases. He was assisted by Traveler Walter Koch during the show and disposed of 3 machines and one sidevan before the affair closed.

DUBOIS, PA.

THE UNITED REPAIR SHOPS, of which J. M. Brody is manager, have arranged with the Vim Cycle Hardware Co., Buffalo, N. Y., to handle the Dayton Motor Bicycle for 1916.

MONARCH, WYO.

JOHN VODEHNAL has contracted to represent the four cylinder Henderson in this section for 1916 and has been using his demonstrator to convince folks here of the ability of the two-wheeler. Vodehnal reports a number of orders already on hand and all signs showing for a prosperous season.

Your Customers Are Your Salesmen

"EVERY SMITH MOTOR WHEEL I sell brings in other extra profits for me."

That dealer knew whereof he spoke because it is the SMITH MOTOR WHEEL owner who is his best business booster. One SMITH MOTOR WHEEL sells a host of others. Motor-Wheeling is contagious—and it's that kind of enthusiasm that reflects in the cash register.

Besides the profits on each Motor Wheel, there are extras rolling in on new bicycles, tires and accessories. Fifty-six per cent of all SMITH MOTOR WHEEL sales last season carried with them the sale of a new and high grade bicycle.

Have you tapped the big profit pipe that leads into your store from business with the merchant who uses the SMITH MOTOR WHEEL for light, quick deliveries?

Let your neighbor-merchant try the SMITH for half a day on one of the commercial bicycles for his deliveries, and see how quickly he'll want to become your customer.

Remember the big national magazine advertising which is at work for Smith Motor Wheel Dealers.

In a limited number of territories we have not as yet appointed representatives. We have an attractive proposition for the right kind of dealers. Write for details.

BIRMINGHAM, ALA.

ALABAMA AUTO SUPPLY CO., of which Earl Morrison is manager, has taken the agency for the Henderson four-cylinder motorcycle, Morrison will take personal charge of the motorcycles and has already started a live advertising campaign in the local newspapers. He has been busy demonstrating the 1916 models to prospective customers for the last three weeks.

A number of orders have been booked already and there is every indication that the firm will do the best year's business in motorcycles in this city during 1916.

ALBANY, N. Y.

WEEBER CYCLING WORKS, agent for the Indian, celebrated Indian Day by an entertainment and banquet at which over 300 were present. Indian business in this city is looking fine, according to the Weeber people, and 1916 sales are going to double those of 1915.

F. W. ANDERSON, distributing the Reading-Standard, has already sold seven of the brown, three-speed twins and has a nice list of prospects. Anderson is also agent for the Schickel and Cleveland lightweights, the Miami Power Bicycle and Smith Motor Wheel. "Lightweight sales are going to be fine this season" says Anderson, "but the sales of R-S twins and singles will be first class, also. I figure 1916 as a banner year."

BRONX, N. Y.

GENE COUGHLIN, of Gene Coughlin & Co., Inc., Bronx representatives for the Harley-Davidson, has sold his twenty-fifth three-speed twin for 1916. Three Harley-Davidson sidecars have also been delivered to satisfied purchasers to date.

"Sales of new machines are fine," said Coughlin, "and used mounts are called for pretty regularly. I am doing a cash business, so the time-payment problem doesn't worry me. Personally, I am looking forward to fine weather and the opening of the endurance run season, when I will enter the big affairs. I believe that every dealer who can ride should enter such contests."

KELSO, WASH.

THE PETERS MACHINE WORKS, handling the Harley-Davidson, has had a nine-fold increase in its business during the month of February 1916. For January and February, the increase over the corresponding months in 1915 has been over 450 per cent.

PORTLAND, ME.

H. G. ADAMS, representing the Henderson in this city, had an attractive display at the recent Portland motor show. Adams displayed four of the four-cylinder machines in both single-gear and two-speed models, as well as a Rogers sidecar, Rogers delivery van and Cygnet Rear Car. During the run of the show he placed several sub-agencies and lined up a number of live prospects.

MUNCIE, IND.

SARVER & RETZ have taken the agency for the Dayton Motor Bicycle for Delaware County. The contract was signed with the Davis Sewing Machine Co., of Dayton, O.

Ridden 50 Miles a Day 365 Days in the Year. Only $25.00 Spent for Repairs Including Cost of Small Accident.

That's typical of the records that Model M has been piling up for itself.

From all parts of the country come the stories of this single cylinder's hill-climbing abilities, the twins it has beaten, the roads it has conquered, and the dependable service it is giving day after day.

The 1916 Model M retains all the best features of those that have gone before it. It stands head and shoulders above all other machines for the man who wants the comfort of the spring frame

—the strength that has been proved by sidecar service

—the power that is assured by the Pope overhead valve motor which delivers in excess of its rated horsepower

—the oil and gasoline capacity for long tours

—combined with the simplicity of the single cylinder motor.

In offering Model M-16 to your prospect you've got the record, you've got the goods; and you know the motorcycle won't fall down on what you claim for it.

You should have one on your floor. If you haven't—why not order it now? (Immediate deliveries. 1916 catalog now ready.)

For Your Motorcycle

You want a chain that will give reliable day after day service under severe working conditions.

Such a chain is the Diamond No.

"149"

Why?—Because it is built that way; actual service tests have proven it. The rollers will not break under anything like normal service conditions and the breaking strength of the chain is several times what is needed for actual motorcycle duty.

Give the No. 149 a fair trial on your own machine—we are confident of the results.

For sale by all jobbers and dealers.

DEALER SHOULD BE WARY ABOUT ENTERING JOBBING FIELD, SAYS H-D OFFICIAL

By MECHANICUS

"THE tendency on the part of the motorcycle dealer to enter the jobbing field," says Arthur Davidson, sales manager for the Harley-Davidson Motor Co., "has brought many an otherwise successful motorcycle man to acute grief. He stocks up on this and on that, and gives over good space to carrying the stock instead of putting it to other and better uses.

"His store, perhaps, is located in a very fine retail section of the city, but in a section which appeals not at all to the wholesale trade. This the dealer never thinks of. His building with its show windows is ideally adapted to retail selling, but the expenses attached to the show window and the location are wholly unnecessary for the man who would enter the wholesale trade.

Retail Field Suffers

"The jobbing business can be conducted from a barn as well as from the finest office building. Long time credits, extended to him as a jobber, begin to come due at just about the time the dealer should be taking his new motorcycles off the train, and he is pinched at both ends for cash. Having bought the smaller goods, he must needs economize on the other end and his big retail field suffers.

"Unless he has unlimited capital, or capital at least approaching that desirable state, and a thorough knowledge of the jobbing business as well, the retail dealer will do well to leave it alone. In my broad experience, I have seen not one or two but nearly a dozen otherwise successful motorcycle dealers go to smash through their jobbing aspirations. The lure of extended trade and big orders is particularly hard to resist by the fellow who has made good in the retail end. But for the man without sufficient capital or minus the working knowledge of the jobbing business, to enter it is to simply chase rainbows."

Bargains the Lure

Undoubtedly, many a dealer has been led into considering the step toward becoming a jobber by the constant offerings of goods at bargain prices. The temptation to purchase at reduced figures is very strong for most motorcycle dealers, and not all of them are shrewd enough to inquire before they have signed the order, whether or no there is an immediate market for the device or fitment.

A good many dealers when they have reached the status where they may correctly be termed retail merchants, are bitten by the ambition to branch out and endeavor to enter the jobbing field. This ambition is usually stirred up, not by any definite insight into the broader field of jobbing, but simply by the fact that they can purchase the smaller cycle goods at very much cheaper rates when they buy in large quantities than in dozen or half-dozen lots.

These men forget the fact that it is easier to buy goods than to sell them, and thus handicap themselves by a big stock which is not readily marketable. As Mr. Davidson put it, given a choice of the smaller goods or the machines, he economizes on the latter and his real business is the loser.

FISHKILL-ON-HUDSON, N. Y.

WARD S. LENT has formed a partnership with Roger Howard of Poughkeepsie and opened a motorcycle and accessory store in addition to his automobile agency.

MERCED, CAL.

THE MERCED VULCANIZING WORKS has taken the agency for the Dayton Motor Bicycle for 1916.

TOMPKINS' NOVEL AD. DRAWS CROWDS TO INDIAN DAY CELEBRATION

G. H. TOMPKINS, proprietor of the local or Richmond tepee, had practically all visitors as prospects on Indian Day, when he set 'em up for all hands. Interest was quickened by the insertion of the following ad. in the local papers: "WANTED—Every citizen of Richmond to see the real Indian papoose at Tompkins' on Tuesday. Free." The Featherweight was, of couse, referred to.

Tompkins has an ideal establishment. At the rear of the store is the service station, the repair shop being in a separate building close to the service department.

NEWARK, N. J.

CARL W. BUSH CO., Harley-Davidson representative, held a reception for its patrons on February 22. The means of attracting non-riders and others used by Bush was a 1916 sidecar outfit duly placarded, with a rider impersonating George Washington. The show window was appropriately decorated with a new machine, cherry-trees, hatchets and small American flags.

WILLIAM R. SPEAR, representing the Thor, reports an unusually early demand for the blue motorcycle in both the 6 and the 12 horsepower sizes. He has several of the big fellows on the road, but the little twins are not in yet. "They will be due about March 8," says Spear. "I have booked orders on both models to date in excess of my entire 1915 sales." Spear attributes the demand to the three-speed gearset and dry plate clutch. He will handle Rogers and Pullman sidecars, also.

WATSON KLUCZEK, Reading-Standard representative, is finding deliveries slow at present. He is glad that the weather is not the kind that makes for good riding just now.

CHARLES KREBS, handling the Pope, will get his new models by the first week in March. He has booked orders for several of the L-16 models for sidecar and solo use.

M. I. BUNKIN, of the local branch of the Haverford Cycle Co., has two of the big-valve Excelsiors on view and a brace of lightweight two-stroke models, all ready for the big rush after Spring sets in.

TACOMA, WASH.

W. P. GLASGOW, handling the Harley-Davidson, has taken on the jobbing agency for Firestone tires. He signed up with Stewart Slosson, of the Firestone Tire & Rubber Co.

RAY PENTECOST and Harry C. Goble, proprietors of the General Cycle & Supply Co., are exceptionally busy these days since the advent of the 1916 three-speed Excelsior twin. Many enthusiasts are around the General store giving the mount the once over.

RAY PACKARD, expert repairman and motorcyclist, has joined the forces of W. P. Glasgow, local Harley-Davidson dealer. He was one of Tacoma's first riders.

LA GRANDE, ORE.

CHASE BOHNEN, handling the Harley-Davidson, has disposed of 25 of the Silent Gray Fellows so far in 1916. The machines were snapped up just as they came out of the freight cars, some purchasers taking them crate and all.

Already a Proven Favorite

It took just 17 days to introduce and sell the first carload of Cleveland Motorcycles in Los Angeles. This heretofore unheard of accomplishment was achieved without either catalogs or local advertising.

Orders are now being booked for the two carload shipments of Clevelands now enroute. The Cleveland appeals to those who want something classy—a machine that is clean, silent, comfortable, light in weight and simple to operate.

The fact that the majority of these 56 Cleveland buyers never before rode a motorcycle speaks volumes for the Cleveland among the people who want and recognize mechanical perfection.

Get the Cleveland proposition NOW. Tomorrow may be too late.

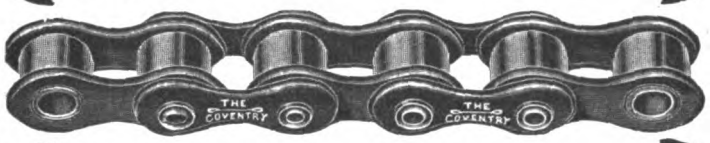
High Power—And the Chain that Can Handle It

Nine — eleven — fifteen horsepower — these ratings are more the rule than the exception this season. YOUR motorcycle will transmit its full power to the rear wheel with the aid of the strongest, the lightest, the most enduring chain on the market if you specify "The Coventry."



"The Coventry" Chain

"The Motor's True Mate"

With a breaking strength of 5700 lbs. to the foot, "The Coventry" Chain is stronger than it need be. It is prepared to withstand the power jerk of the strongest motorcycle motor—on any road, under any conditions.

"The Coventry" costs more, $1.00 per foot, but when the rider takes into consideration the absolute certainty of the transmission service rendered, it is well worth the advance.

ROSE MANUFACTURING COMPANY
933 ARCH STREET PHILADELPHIA, U. S. A.

TORONTO INDIAN SALES REMARKABLE, SAYS REPRESENTATIVE KIPP

TORONTO, Ont.—Indian sales in Toronto so far this season have been remarkable, according to a statement recently made by Herb. Kipp, of the H. M. Kipp Company, Ltd., Wigwam representative. Kipp declared that sales for the past two months have more than doubled those of the corresponding period of 1915 and that the prospects were that the total volume of business for 1916 would constitute a record for the company. Hitherto, the best season has been that of 1914, but the present activity exceeds the sales in the early part of that year.

The Kipp company is now housed in the largest retail motorcycle establishment in the Dominion, the total area of the new premises at College and Yonge streets being 7,500 square feet. The three floors and basement are occupied and several different departments are being fitted up to take care of the trade and to provide service for riders. Among these departments is one for bicycles, the sale of which Kipp intends to push this year for the first time, as he believes that the local bicycle field is a large one. At present he is looking for a manager for the bicycle department.

Kipp thinks very highly of the Indian Featherweight and already he has received many enquiries for this model. The Kipp store is located at one of the most advantageous corners in the city and many people using the stret cars are tempted to enter the salesroom in order to ask questions about the Indian lightweight which is prominently displayed on the floor.

The company has adopted the policy of taking none but good second-hand motorcycles in part payment for new models. Then, after a used machine has been accepted, it is entirely rebuilt by competent mechanics and worn parts are replaced by absolutely new pieces. Some of the used machines are re-enamelled and when the reconstruction is complete, the motorcycle looks almost like new.

MIDDLETOWN, O.

J. R. KILGOUR, handling the Henderson in this city, has outgrown his present quarters and is waiting for the completion of a fine place on one of the main business streets. He will move in before March 15, he expects. The new store has 60 per cent. more floor space and will have better facilities. The show-window is quite large and there is ample room for several machines in it. Kilgour will carry a larger stock of supplies and accessories in his new place than he does at present.

RACINE, WIS.

GUY DIXON, handling the Harley-Davidson in this city, has just sold the police department a three-speed electric Gray Fellow for immediate service. Racine County has extended its concrete roads so that an excellent highway is afforded tourists between Milwaukee and Chicago and this needs regulating to prevent accidents from reckless driving.

HUDSON, N. Y.

CHESTER HAYWOOD has taken the agency for the Harley-Davidson for 1916. He placed his first order for five three-speed twins and sold them all out of the crate. He increased his order to ten immediately for the second shipment and some of these are booked already.

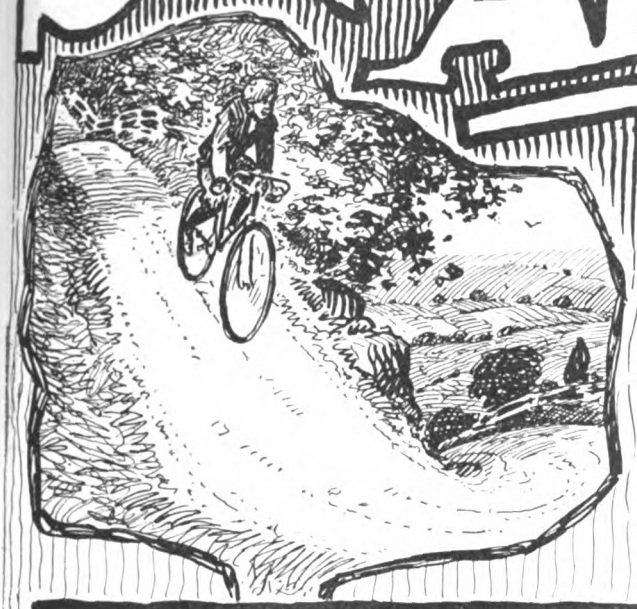
Safety A-Ways



The Eclipse-Equipped bicycle is now safe in **every** way——not only when in motion but also **when standing at the curb.** This latest ECLIPSE contribution to the bicycle field truly makes the bicycle safe "all ways." "ECLIPSE - EQUIPPED" counts heavily toward clinching a sale.

"Morrow" Coaster Brake

The brake that makes the bike's popularity possible. In no other device are the important factors of safety, convenience and ease so highly developed as in the MORROW. No other brake has anywhere **near** the number of ball-bearings of the MORROW. Twenty-four quarter-inch balls assure a remarkably quick and sensitive response to the slightest foot pressure. The MORROW stands alone. We cooperate with ECLIPSE dealers. Write and ask how.

"The Thief-Cheater"

The ECLIPSE LOCKING FRONT HUB effectually settles the problem of safe-guarding the bicycle. Made so that the front wheel is made immovable and can only be turned when the rider's key unlocks the hub. The simplest, strongest, most efficient locking device ever invented. It should be on the wheels YOU sell. A big selling feature. Write for details.

BINGHAMTON DEALERS SHOW PROVES A HUGE SUCCESS

BINGHAMTON, N. Y.—From the viewpoint of sales and interest in motorcycling, the Binghamton Dealers Association show which closed on March 3 was a success from start to finish. The Association is so pleased with the result that it will hold another next year on a larger scale, including sporting goods in the exhibition, as people who are interested in motorcycles are also prospects for sporting goods.

Nearest the door was the exhibit of Turners, the pioneer cycle house in Binghamton, showing the Reading-Standard motorcycle, Emblem light twin and Miami Power bicycle. There were also models of the Emblem, Pope and Miami bicycles on show. Manager Wolfe was in charge, assisted by Ralph Webster of the Miami Cycle & Mfg. Co., and Traveler Lou Guterman of the Reading-Standard Motor Co.

Norval S. Douglas showed a full line of Pierce, Red Wing and Queen City bicycles. F. R. Huntley was in charge, with Mr. Douglas assisting in the evenings. The Hartford, Rambler, Columbia, Niagara, Hudson and Fay Juveniles were shown at the booth of F. J. Abbott. In this booth was a Hartford bicycle enameled in white and framed in black bunting. Mr. Abbott was assisted by L. V. Davis.

Frank S. Bump showed the Indian line of motorcycles as well as Dayton and Raycycle bicycles. Bump's exhibit was very neat, the walls being draped with Indian blankets and other goods. His display included a Powerplus, a sidecar combination and a Featherweight. J. A. Braico showed the Cyclemotor and also the Dayton line of bicycles.

The Eclipse Machine Company had an exhibit featuring the new Eclipse locking hubs and Morrow coaster brake, as well as the firm's clutch and two-speed. A. C. Rice and G. S. Bush were in attendance. Harley-Davidsons were shown by George S. Carver, in the three-speed sidecar combination, three-speed twin with electric equipment, and a twin with sidevan. Assisting were H. N. McLean and B. C. Race.

The booth of E. E. Ayers showed the full line of Vim, Imperial and Blue Bird bikes and the Pope motorcycle. Next to this stand was the Excelsior exhibit of B. E. Jewell, at which a three-speed twin with sidecar, a short coupled speed model and a lightweight were staged. The Cleveland, Jewell Special and Excelsior bicycles were also shown. The Waldron Drug Company exhibited Iver Johnson bicycles, T. E. Wood being in charge.

The exhibitors were unanimous in their praise of the show, not only for the actual sales obtained but for the missionary work which the exhibition performed. It is figured that business in all lines will increase two-fold as a result of the displays.

HOQUIAM, WASH.

C. W. BECKER is getting his share of the general Harley-Davidson business all over the State and expects to double his sales record of last year on the Silent Gray Fellow.

NEWBURGH, N. Y.

MYRON AFFRON has taken the agency for the Harley-Davidson for Newburgh and vicinity for 1916. Affron is a veteran cycle man and is looking forward to a fine season with the Silent Gray Fellow. He signed up with Walter Koch, New York traveler.

CALLOWAY & SONS OPEN THEIR AGENCY ON WASHINGTON'S BIRTHDAY

LEXINGTON, Ky.—C. D. Calloway & Sons celebrated Indian Day by opening their agency on February 22 and entertaining all comers. In the showroom were the new Powerplus model, a cutaway motor and a line of Indian bicycles. Long after sunset the crowds came to see the new models and each visitor received as a souvenir an Indian matchcase.

The Calloway firm have been sporting goods dealers exclusively up to the present. They have made excellent preparations to handle the Indian for 1916 in addition to their other lines and are looking forward to a big season.

ARDMORE, PA.

JOSEPH J. NEFF has taken the agency for the Indian in this city, having signed up with George S. Maslen, distributor for this section. Neff's store is right on the Lancaster Pike, in the heart of the business district, and is kept spotlessly clean. He is building a large storehouse in the rear of his present location which will enable him to handle the Indian in addition to an increasing bicycle business, for Neff is one of the pioneer cycle agents in this county.

J. L. Neff in Front of Agency on Lancaster Pike, Ardmore, Pa. Neff Handles the Indian in This Section

HENDERSON, KY.

HENRY PARDON, Indian agent in Owensboro, Ky., has opened a store in this city under charge of James Noble, one of the best known local riders and mechanics. All the Wigwam products will be handled.

Pardon has been considering plans for extending his rapidly-growing business for some time and finally decided upon Henderson. Both Owensboro and Henderson are in a rich grain and tobacco district. Pardon was one of the Indian team which carried off the Kentucky Cup in 1914, the others being E. G. Baker and William H. Teubner.

LA CROSSE, WIS.

WILLIAM JENSEN, former repairman for the old Wisconsin Motorcycle Co. of Milwaukee, is now with Howard Campbell, Harley-Davidson dealer, in the repair department. Jensen is a La Crosse boy, so his new employment is right to his taste.

Kokomo, Ind. U.S.A. Feb. 29, 1916.

The Motorcycle Illustrated,
#13 Park Row,
New York, N. Y.

Gentlemen:-

ATTENTION OF J. LEO SAUER:

I am tempted to write and congratulate you on your issue of the 24th inst.

I feel that you deserve some commendation on the several supplementary pages, which are very handsome indeed. It is hard to understand how anyone could look through this issue and not get the bicycle fever. It looks more like one of the papers of the early booming bicycle days than any paper I have seen for a long time, and, as stated above, I feel that you should know from, at least, one of the old timers in the bicycle business that your efforts are appreciated.

With kind regards, I remain.

Yours very truly,

Lon Baker

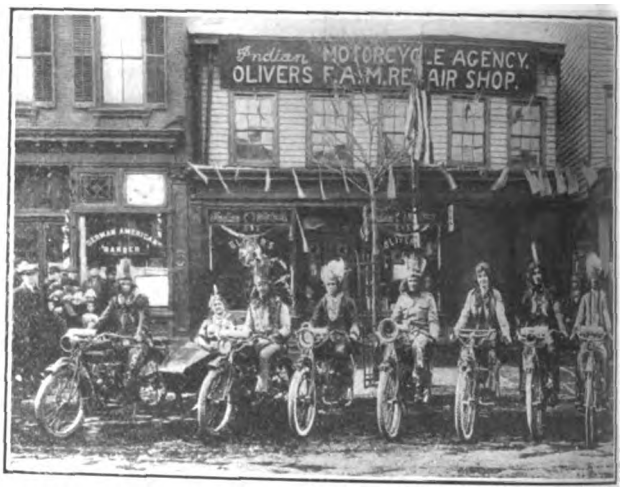
CANADIAN OFFICIALS PROHIBIT PREMIUM GIVING BY DEALERS

OTTAWA, Ont.—The authorities in Canada have shut down on the growing custom of offering premiums in exchange for coupons or other tickets which are offered to customers by dealers at the time of purchase of the articles. During the past few months, motorcycles were offered in various communities as prizes in business-boosting campaigns of the coupon sort, but the motorcycles never reached the paste-board collectors because of the interference of court officials

BRAVES IN WAR PAINT FEATURE OLIVER'S INDIAN DAY CELEBRATION

BRONX, N. Y.—Ollie Berckhemer, proprietor of Oliver's Indian agency at 992 Washington avenue, celebrated Indian Day by keeping open house to all comers. Ollie and his manager, Vic. Pelezzare, presented



Costumed Riders Who Assisted in Indian Day Celebration at Oliver's Busy Agency in Bronx, N. Y.

visitors with souvenirs in the form of embossed Indian match cases. Refreshments were served throughout the entire day.

A feature of the celebration was a party of painted and costumed braves mounted on Powerplus and other Indian models, who paraded the Bronx at regular intervals. The agency sold two machines from the floor and has added to an already extensive list of prospects.

MILWAUKEE, WIS.

E. MILLER has taken the agency for the Cleveland lightweight in Waukesha and Milwaukee Counties. He sold four at the Milwaukee show and ordered Cleveland Sales Manager Hauk to put him down for a machine every week until further notice so as to care for a sudden rush.

Mrs. Miller is an ardent booster of the Cleveland for her husband and is riding with another fair devotee. Mrs. Miller intends to take care of demonstrations among the ladies this season.

ABERDEEN, WASH.

ABERDEEN CYCLE CO. has again signed up for the Harley-Davidson and reports a nice business so far. The lumber industry is in good shape and the price of boards is mounting higher each week, so a big increase in sales of motorcycles is looked for.

Positive Grip

due to the generous design and construction—we think it is the best and strongest rat-trap pedal you ever put your foot on.

The No. 4 Standard

is a big, substantial, motorcycle-type pedal. It stands for the utmost mechanical value.

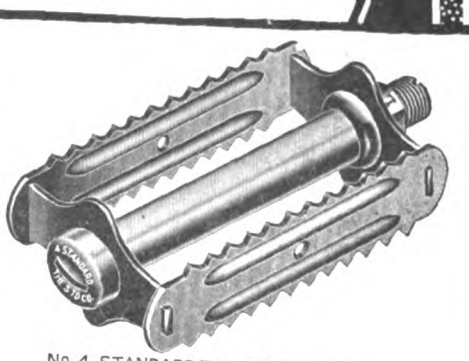
With a pair of these pedals on your wheel you are equipped with correct, up-to-date foot-holds, fairly representative of our business in the cycle industry.

Our products comprise:

Diamond E Spokes and Nipples for bicycles, motorcycles, tricycles, velocipedes, invalid chairs, sulkies, carriages, cyclecars and automobiles. Pedals for bicycles, tricycles, velocipedes and motorcycles. Toe clips for bicycle pedals. Emergency axles for pedals.

We are boosters for a "Million Bicycles in 1916"

THE STANDARD COMPANY
TORRINGTON, CONN.



No. 4 STANDARD RAT TRAP PEDAL

Make Your Electric Lighting Reliable
Use The "Exide" Battery

"Exide" Battery, Type 3-ZA-5 with cable type terminals

A properly designed storage battery furnishes the most dependable source of current for motorcycle lighting.

The "Exide" Battery, Type Z, has been especially designed for this service and is being used on thousands of machines with the most satisfactory results.

The "Exide" motorcycle battery is manufactured by the oldest and largest storage battery maker in the country. It is of the same design as the "Exide" Batteries with which a majority of all electric vehicles are equipped, the same design as is being used in hundreds of thousands of automobiles for starting and lighting and for numerous other storage battery services.

Users of "Exide" motorcycle batteries have at their command all of the facilities of the enormous "Exide" Service Organization, which includes 14 Sales Offices, 14 "Exide" Battery Depots and hundreds of "Exide" Service Stations.

Write our office nearest you and ask for our folder No. 1252 which describes in detail the construction of the "Exide" Battery.

A century in business! 1816-1916!
Peter A. Frasse & Co., Inc., Canal and Sullivan Sts., New York City

DETROIT, MICH.

H. D. PURINTON made a quick demonstration and a quicker sale one day last week. A young fellow came into the W. E. Metzger Indian agency at 501 Woodward avenue and wanted a demonstration. He got it and at the end of five minutes handed out $285 and rode away with the machine. Later, it was learned that the young fellow had a choice between a $2,000 automobile and a 1916 motorcycle and took the Indian in preference.

HARRY SVENSGAARD SALES CORPORATION, handling the Excelsior, is now in its new place at 214 Jefferson avenue east. The building is 30 x 135 feet and has four floors and basement. The repair shop and second hand machines occupy the basement, while the first floor is an exclusive salesroom. The offices are on the second floor and surplus stock is stored on the third and top floors. Svensgaard and his staff moved everything from the old place on Woodward avenue in 36 hours.

W. E. WANDERSEE CO., of 129 Gratiot avenue, received its first carload of Harley-Davidsons out of an order of five carloads placed last week. Another carload will arrive on March 15 and each two weeks thereafter until the order is filled. "Nothing can stop 1916 from being the biggest year the motorcycle business has ever seen" says Wandersee.

E. C. KICHERER, of the Haverford Cycle Co., has sold a lot of new and used machines but they have not been moving on account of the cold weather. "Everybody has money this year," says Kicherer, "and if dealers don't sell motorcycles—and bicycles—they might as well quit the business. Smith Motor Wheels continue to sell actively, and we look for a big year on this device."

ARTHUR P. KETCHAM has been appointed traveling representative for the Harry Svensgaard Sales Corporation to cover Michigan in the interests of the Cyclemotor and Excelsior motorcycle.

MISSION, TEXAS

W. H. WOOD has taken the distributing rights for the Dayton Motor Bicycle for Starr and Hildago Counties. Wood looks forward to a good season with the front-wheel drive lightweight during 1916.

WASHINGTON, D. C.

P. M. CORR, a veteran cycle dealer in this city, has taken the agency for the Cleveland lightweight and is hard at work lining up prospects for the little two-stroker. Corr has been in business in Washington for over 25 years, having handled the Yale motorcycle up to 1913.

FORT WAYNE, IND.

HARRY E. THOMPSON has signed up to represent the Dayton Motor Bicycle in this city, as well as the Dayton line of motorcycles. He recently visited the Davis Sewing Machine Company in Dayton, O. to arrange for shipments, etc.

MANITOWOC, WIS.

ALBERT SCHUETZE, of 1206 Washington street, will represent the Dayton Motor Bicycle in this city. The contract was recently signed by a representative of the Davis Sewing Machine Company.

PATENT YOUR IDEAS

Inventions bring fortunes when protected by good patents. New ideas in great demand. I will get a valuable patent for you and will help you make money from it. Ask about my free advice, or send sketches for free search of patent records.

LESTER L. SARGENT, Patent Lawyer
N. W. Cor. 9th and G Sts., Washington, D. C.

MANNINGTON, W. VA.

J. L. THORN, a former R. F. D. man, has taken the agency for the Henderson for this section. Thorn chose the motorcycle to help him cover his route quicker and found that it gave such effective service that he was soon recommending it to other carriers. The great interest aroused in the four-cylinder mount led Thorn to sign up for the agency.

The Mannington hustler is now busy spreading Henderson enthusiasm all over this section of West Virginia, and returns are coming in the form of orders.

PALO ALTO, CAL.

FRED H. SMITH has closed with the San Francisco office of the Davis Sewing Machine Co., for the local Dayton Motor Bicycle agency.

MOTORCYCLE CLOTHING CONTEST

(CONTINUED FROM PAGE 16)

suited to the special service in which it will be used? Has it been designed so as to meet all the specific requirements of the cyclist? Those are the questions to be considered under the adaptability heading. Obviously, a riding costume may present an excellent appearance without being at all suited to month-in-and-month-out wear in the saddle of a motorcycle.

Durability—This heading explains itself. If the costume will wear well under the varying conditions of road and weather to which it will be subjected—if it is of such weight, texture and pattern as to give the user maximum service it will be entitled to the full count of 20 per cent. for its durability.

Further Conditions Explained

Comfort—Admitting that a riding costume is attractive in appearance, well adapted to the special conditions of cycling, and assured of long life, the next question is "Can the rider wear it with comfort?" Under this heading must be considered weight, the proper distribution of pockets, method of lining, style of collar and cuffs, the method of reinforcing the seat of the pants and of fastening them at the knees, etc.

Inexpensiveness—A costume might easily be placed beyond the reach of the average rider through a prohibitive price, although combining most of the other desirable features of a standard riding outfit. Can the average rider who wishes to present a good appearance afford to invest in the suit you suggest? That's the big question under this heading.

Demonstration—The photograph will cover this point. It will show that the suit has been tried out, and that the contributor is basing his suggestions upon actual service obtained.

Ask Questions, If Necessary

If additional information is desired, questions may be addressed to the Editor, **Motor Cycle Illustrated**, 13 Park Row, New York, and prompt replies will be given by mail or in these columns.

Should two letters and the accompanying photos be considered of equal merit each of two contributors will receive the full amount of the prize. For example, if two contestants are tied for first place, each will receive an award of $10.

Mr. Dealer—This For Your Own Good

THE change in marketing conditions of today makes it necessary for every dealer to be more efficient, to be more progressive and with the same effort, to make more sales, so as to increase his income.

The usual motorcycle line is not sufficient; it should have a wider appeal: it should be supplemented by a good Lightweight Motorcycle, because this type of motorcycle doubles the sales possibilities of the territory—more people can ride and will ride Lightweight motorcycles.

In making a selection, be sure you choose a Lightweight having belt transmission, because it will be free from numerous additional parts, because it will have the most simple and cleanest form of drive and because this type of motorcycle obviously can be made to sell at a price popular with the newer and larger field of prospects you will solicit.

There is one point you must remember—belt transmission depends almost entirely on the belt. When you select your Lightweight, insist that it be fitted with a long lived and genuine

Selling Because It Is So Evidently a REAL Lightweight Should Be!

From Mr. Funke, the solid Eastern Distributor, motorcycles, tells in a crisp letter:

"So evidently all that we've said, one feature works with another, one feature is the secret. It lays bare, in one illuminating sentence, the reason for the Cleveland's grand success.

Selling points—each calculated to make for **completeness** and even **luxury** in operation—each one can sell a prospect when one can't. The Cleveland Motor, with its silent, vibrationless Counter-Shaft, that eliminates the need for much to smoothness of operation, is encased another set of gears—all in dustproof housing. Cleveland Honor accessories fight against.

The tide of sales is flowing to the Cleveland—you'll be in the current when you get our proposition today for our dealership.

W. S. Quinlan, Esq.,
The Cleveland Motorcycle Mfg. Co.,
7209 Platt Ave.,
Cleveland, O.

My dear Walter:

I have read with much interest and satisfaction your reports covering the wonderful success of the CLEVELAND in California, and would say that prospects look very bright in my territory and will increase as the season progresses.

You will no doubt be interested to hear that I have contracts and deposits on 380 Cleveland lightweights in my territory and this is only the beginning of March. I do not want to seem rash in my statements but am sure that 1,000 machines is a very conservative estimate of the business I am looking for from this territory.

Here is the secret of Cleveland success:- It is easy selling because it is so evidently all that a real lightweight should be.

ONE RIDE SELLS IT

Smith Motor Wheel

DETACHABLE

THE most successful SMITH MOTOR WHEEL dealer says that *Demonstration* is the *Big Thing*. He finds that when once a prospect has taken a ride the machine is sold. For that reason he handles the SMITH MOTOR WHEEL like this—

"I have one bright red SMITH in my window for show purposes. I have another in my store—not so bright, maybe, for demonstrating purposes and free rides for prospects. And I have another, all set up and attached in my store for display. I couldn't do very much with just one wheel."

And this man has struck the *Big Idea* in SMITH MOTOR WHEEL SALES.

"Let 'em try it—then they'll buy it"

Don't forget that the SMITH MOTOR WHEEL sells new bicycles, tires, appliances and accessories in goodly quantity. The merchant has found the SMITH MOTOR WHEEL just what he has been wanting for light, quick and economical delivery service. The live dealer will not forget to tie up the SMITH with some one of the many commercial bicycles on the market.

It *delivers the goods*, in more ways than one

Cash in on our big national magazine advertising. Cut out the Displays and post them in your window!

In a limited number of territories we have not as yet appointed representatives. We have an attractive proposition for the right kind of dealers. Write for details.

BLUE STREAKS

8,000 Dealers Sell Them

Because they know they can make more money selling Blue Streaks than any other bicycle tire.

They base this verdict on their past experience in trying to sell hundreds of unknown branded tires of unknown quality at unknown prices.

The Blue Streak price to the consumer is $2.50 each. There are many tires that will promise the dealer a larger profit per tire. But there is no other tire that will bring as large a volume of actual sales as do Blue Streaks.

This larger volume, and hence larger profit, is due to the Goodyear Square Deal Bicycle Tire policy of one tire—one brand—one quality—one price and one guarantee.

This policy benefits the rider by insuring him a dependable tire at a small cost. It benefits the dealer by insuring him satisfied customers, which is the shortest and surest road to permanent profit.

If you have not read the complete Goodyear Dealer Bicycle Tire Proposition drop us a postal today. We want you to see how thousands of other dealers are getting a new grip on new bicycle business.

Big New Record For 'Chain' Treads

400 feet of hill—so steep that you could hardly walk up or down it without falling.

400 feet almost straight up over cow-paths, gopher-holes, wet grass, sage brush and other obstacles. Time 13 seconds.

Such was the record made by Sam Hamilton in the Los Angeles hill climbing event last Sunday.

A great part of his success was due to 'Chain' Tread tires, for they clung to the steep surface and enabled him to go up in 13 seconds without a slip.

If you want sure Anti-Skid tires, tires that offer you far better value for your money than most, buy 'Chain' Treads.

LOS ANGELES HILL-CLIMB BOWLS 'EM OVER

Sammy Hamilton, Flying Merkel, Captures First Place in Thrilling 400-Foot Hill-Climb, Time 13 Seconds; Sahagin, Henderson, Wins Premier Honors from Amateurs in 16 4 5 Seconds

LOS ANGELES, Cal., March 12.—Before a cheering crowd of 2,000 motorcycle fans who had gathered from all corners of Southern California at a steep hill—precipice would be a more accurate word—off the Elmonte road, the most spectacular hill climbing ever witnessed in this section was staged yesterday.

The first feature on the program, which was being run under the auspices of the Los Angeles Motorcycle Club, was a four hundred-foot climb over cowpaths, gopher holes, hard bumps, wet grass, sage brush and a great variety of other obstacles common to Southern California, in which professionals participated. Sammy Hamilton, on a Flying Merkel, covered himself with glory by roaring up the hill in thirteen seconds. Wells Bennett, Excelsior, captured second place, eighteen and four-fifths seconds, while O. F. Gloystein, Excelsior, accounted for third honors, nineteen and one-fifth seconds.

Simon Pures Roar Up Hill

The amateurs were then given a chance to show their hill climbing ability, and Lem Sahagin, Henderson, romped into first position by negotiating the incline in sixteen and four-fifths seconds. Roy Dugranute, Flying Merkel, scored second with the time of eighteen seconds, while the third position was tucked away by Harley Reed, Excelsior, who was clocked at twenty-five seconds.

In both of these events each rider was given four trials, for the hill was so steep that it is almost impossible for a pedestrian to walk up or down, and no motorcycle rider who placed any value on his life would ever dare to descend the incline on his machine.

Dodging from side to side among the crowd, but sticking tight throughout the climb, "Hap" Gustafson, on a Harley-Davidson, made his trip up the hill in forty-seven seconds. This was probably the most difficult feat of the day. The most consistent performance was made by Wells Bennett, Excelsior, who attained the summit of the hill in three out of the four trials. During the fourth trial he got as far as 320 feet in second speed, when he struck a hole and was obliged to stop his engine. But he didn't stop climbing. He just shifted into low, started his motor again and finished in good time.

The contestants and the number of trials in which they were successful follow: Bennett, Excelsior, three times; Gloystein, Excelsior, twice; Reed, Excelsior, twice; Sahagin, Henderson, once; Hamilton, Flying Merkel, once; Dugranute, Flying Merkel, once; Boido, Indian, twice; Artley, Harley-Davidson, twice; Tice, Indian, three times; Gustafson, Harley-Davidson, twice; Averet, Pope, three times.

Paul Derkum, on an Indian, tried to climb up the hill without tire chains and got as far as 210 feet.

15 MOTORCYCLES FOR SERVICE IN MEXICO

They Will Be Bought at Once and Rushed to the Border for Courier Service with General Funston's Expeditionary Force

NEW YORK, March 14.—The Quartermaster's Department of the U. S. Army, located in the Army Building, Whitehall street, this city, is making arrangements to purchase fifty-four motor trucks and fifteen motorcycles for the use of the expeditionary force which will go into Mexico. Col. A. L. Smith, the depot quartermaster, was instructed a day or two ago to buy the trucks and motorcycles without the customary advertising for bids. He immediately sent out notice of his needs by telegraph, and it is understood that most of the trucks and all of the motorcycles will have to be ready for shipment in a week or ten days.

The motorcycles are to be used chiefly in courier service and will be equipped with tandem seats. It is explained that both motor trucks and motorcycles can be used to excellent effect in Chihuahua, where a good deal of the skirmishing after Villa is expected to take place, as there are highways over the desert. As a matter of fact, there are few sections of Mexico where a three-speed motorcycle cannot be depended upon for reasonably good service, and the fifteen new machines, with a number of others that have been in use for some time, along the border, are expected to do much towards convincing military men of the great value of the power two-wheeler in army operations as well as in manoeuvres.

ONE AMENDMENT NECESSARY IN CRISTMAN BILL

ALBANY, N. Y., Mar. 14.—Except for one amendment of small importance, as far as riders are concerned, it appears at this writing that the Cristman Bill, providing for a motorcycle license fee of $2.50 per year, will be signed by the governor in the form in which it passed both houses of the legislature recently. Last week it was stated that the bill was recalled for amendment by the governor's counsel, owing to a technical error incurred by the use of the word village in that part of the measure which dealt with the disposition of the revenue received from motorcyclists.

The governor's attorney contended that, if just the word village were used, all of the villages in the state, both large and small, would share in the motorcycle taxes. It is the intention of the bill to divide the revenues from each county equally between the county and the state. The wording will, therefore, be changed to county seat. The bill in its amended form will come up before the senate next Thursday. It will be several weeks before the measure will again be placed in the hands of the governor.

WILL HOLD MEMORIAL DAY BENEFIT RACES

Proceeds of Savannah Holiday Meet Will Be Placed in Fund to Aid Widow of Motorcycle Patrolman—Annual Dance After Lent

SAVANNAH, Ga., Mar. 14.—Memorial Day, April 26, will be observed by the Savannah Motorcycle Club with a number of speed events on the half-mile dirt track here, the proceeds of which will revert to a fund now being raised to build a home for Mrs. James McGinley, the widow of Motorcycle Patrolman McGinley, who was killed in an accident several weeks ago.

A subscription fund of $2,500 has been started for this purpose. The local club expects to clear at least $500 on the Memorial Day racemeet, and members, as well as unattached riders, are also giving personal contributions.

The annual dance of the Savannah M. C. will be held after the Lenten season. A committee was appointed at the last regular meeting of the club which will take charge of the dance and decide definitely on the date.

Intense interest is being manifested by the riders in the proposed meet which will be staged on July 4, and the majority seem to favor a 100-mile and 50-mile race for that day. Should the club decide to hold the meet, at least $150 in cash will be got.

GOODRICH DIRECTORS NOW NUMBER EIGHTEEN

At the annual meeting of the stockholders of the B. F. Goodrich Co., the board of directors was increased from 14 to 18; a regular quarterly dividend of 1 per cent. was declared on the common stock, and the authorized preferred issue was reduced from $28,000,000 to $27,300,000.

FOUR NEW DIRECTORS FOR WESTFIELD MFG. CO.

WESTFIELD, Mass., Mar. 14.—At the special meeting of the stockholders of the Westfield Mfg. Co., held on March 9, highly satisfactory business reports were read by Secretary and Manager Fogarty. A number of resolutions were passed, amending the by-laws for the purpose of making still greater the efficiency of operation.

At this and a succeeding meeting of the board of directors, the directorate was increased to nine members, with the addition of Chas. E. Walker, former vice-president of the Pope Mfg. Co.; Arthur C. Wise and Horace P. Wood, of Boston, and Scott McLanahan, an attorney, of New York City.

C. P. Gorman, former credit manager, was appointed to fill the newly created position of controller of the company. Mr. Gorman is a veteran Pope worker and is well-known throughout the trade.

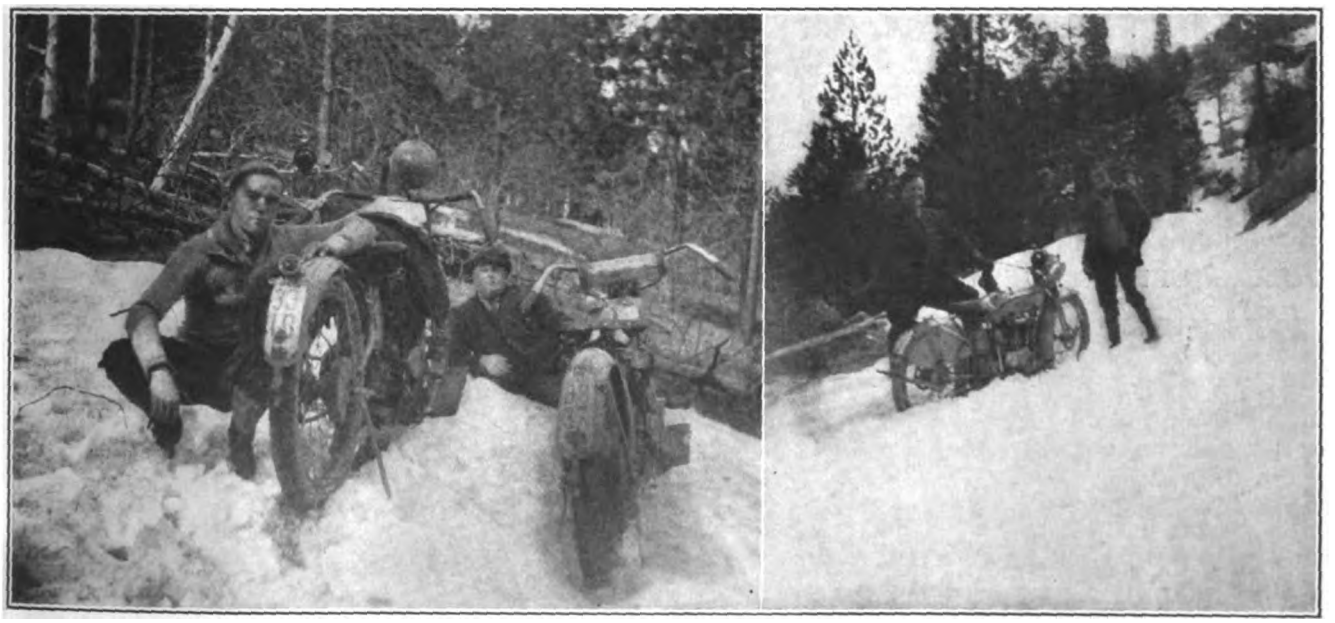
SNOW-PLUGGERS IN ELLENSBURG, WASH.; A REMARKABLE 8000-FOOT CLIMB

These Members of the Ellensburg M. C., Newly Organized, Are Equal to Any Weather Conditions



Los Angeles Motorcycle Riders Fighting Snow in the San Bernardino Mountains. See Item Below

RIDERS BUCK SNOW ON 8,000-FOOT CLIMB

LOS ANGELES, Cal.—One of the most interesting demonstrations of the power of the 1916 three-speed motorcycle which could be devised has just occurred in the trip of Earl Larrison, manager of the Los Angeles Special Delivery Co., and Arthur Blakely and George Langford, both employed by this company, from Los Angeles into the San Bernardino Mountains to Little Bear Valley, 8,000 feet in altitude.

Larrison and Langford rode 1916 three-speed Harley-Davidsons and Blakely a 1915 three-speed Harley-Davidson. They made the trip up and back in a single day, and at about 5,000 feet in altitude encountered heavy snow, which they bucked successfully for miles, getting in almost to Little Bear Lake. The return trip was a "thriller," everyone said.

$92,861,015 TOTAL FOR U. S. RUBBER SALES

DURING 1915 the total sales of the United States Rubber Co., New York City, were $92,861,015, as compared with $83,678,812, the year before. Profit from the operations totaled $13,617,134, as contrasted with $12,088,469 for 1914. The surplus on December 31 last was $22,962,321, whereas at the end of 1914 it was $20,005,322.

"SOLD OUT" BERRY TELLS MIAMI PROSPECTS

LOS ANGELES, Cal., Mar. 12.—On Saturday, March 4, T. E. Berry, the Miami Power Bicycle distributor, was obliged to display a sign on his store front reading as follows: "Sold out. Next shipment March 7. A deposit now will insure prompt delivery of a Miami Power Bicycle." His last two machines had been bought on that day. The Miami has been selling steadily—sometimes as many as five or six in a single day. M. Anlauf, of Anaheim, has set the pace for small town agents, having bought and sold 15 of the lightweights in 30 days. Others are now out after Anlauf's scalp.

MIAMI SALESMEN IN ROUSING CONVENTION

Travelers for Middletown, O., Factory Join Home Office in Three-Day Assembly to Discuss 1916 Sales Plans—To Boost Power Bicycle

MIDDLETOWN, O.—The Miami Cycle & Manufacturing Company, maker of the Miami Power Bicycle and Flying Merkel motorcycles held a rousing salesmen's convention at the home office last week. The travelers and others of the sales staff spent three days at the convention, leaving on March 12 for their respective territories. All representatives, with the exception of J. E. Steuer, Pacific Coast traveler, were present. Steuer is so busy in California that he could not spare the time for the trip East.

The convention was held mainly to go over the changes and improvements in the Miami Power Bicycle. Each sales representative went carefully over the details of its construction and expert factory men gave instructive demonstrations. The very satisfactory business transacted with this model was reported to the salesmen, enthusiastic letters from dealers were read and a number of dealers' co-operative plans were decided upon.

Miami salesmen will spend practically all their time this spring on the Power Bicycle, co-operating with agents already established and signing up new ones. The three days' meeting was a most hearty one, and after all business had been transacted, the firm gave the sales force a banquet.

Following is a list of dealers who recently signed up for the Miami Power Bicycle: Harry Seamark, Washington, D. C.; Ingham & Ring, Modesto, Cal.; J. Fink, Stockton, Cal.; Jos. Bickerstaff & Sons, Richmond, Va.; Bert Prangner, Hanford, Cal.; H. A. Jackson, Scottdale, Pa.; W. M. Hammond, Seaford, Del.; C. J. Howard, Charleroi, Pa.; W. B. Shortman, Portersville, Cal.; Thomas Tauber, McKeesport, Pa., and West Side Cyclery, Turlock, Cal.

CONSIDER FREIGHT EMBARGO TO AID RAILROADS

WASHINGTON, D. C., Mar. 14.—Although manufacturers in all lines, including motorcycles, bicycles and accessories have suffered greatly of late through freight congestion, the Interstate Commerce Commission at a hearing in Washington, a few days ago, seriously considered the declaration of a general freight embargo. It was argued that only by this method would the railroads be enabled to catch up and start material moving again on a systematic schedule.

The method of enforcing the proposed embargo raised a big problem, and it was suggested that a Central Embargo Committee would be necessary. It was admitted that such a policy would cause much annoyance, and some monetary loss, for the present, but that the future results would justify the stringency of the plan.

GUARANTEE WITHDRAWN ON OLD MUSSELMAN BRAKES

MIDDLETOWN, Ohio, Mar. 14.—That the guarantee on old style Musselman coaster brakes is withdrawn was announced by the Miami Cycle & Mfg. Co. last week in a special letter sent out to all Miami jobbers. On the new Musselman positive drive coaster brake, which the Miami company has been manufacturing for the last eighteen months, the usual guarantee will remain in force. The full text of the notice sent to jobbers is as follows:

"We hereby beg to advise that the guarantee on old style Musselman coaster brakes is withdrawn.

"We have now been manufacturing and selling the new Musselman positive drive coaster brake for the past 18 months, and the usual guarantee will remain in full force on the positive drive type, but, effective April 1, no more replacements will be made on the old style brake, and any parts that you may have on hand at this time that are defective kindly ship to us, charges prepaid, immediately, so that they will reach our factory on or before April 1, and these we, of course, will replace free of charge if found defective in workmanship or material.

"We would suggest that you give your sales organization proper notification of this announcement."

PULLMAN RIG CARRIES MANY TUNES IN MILE-HIGH CITY

Outfit Belonging to Robert D. Sharp Music Company, of Denver, Colo., Used in Music Delivery. The Motor Is an Excelsior and the Sidecar Is a Svensgaard Product

WORK IS STARTED ON HUGE CHAMPION ADDITION

TOLEDO, Ohio.—About 300 guests, including engineers and others interested in the motor industries saw President R. A. Stranaham, of the Champion Spark Plug Co., lay the cornerstone of the huge new building which will be an addition to the Champion plant in Toledo. The new structure will more than double the size of the company's plant. The present buildings have been occupied only two years, but the demand for Champion spark plugs has already outgrown the factory accommodations.

After the present factory had been inspected the Champion guests were entertained at the Toledo Club, an elaborate banquet being the feature.

FINE NUMBER OF THE GOODRICH HOUSE ORGAN

ONE of the finest issues of a house organ that has ever come to hand is "The Goodrich" for March, put out by the B. F. Goodrich Company, of Akron. It tells the story of Goodrich progressiveness in a most attractive manner, deals in detail with some of the company's products and presents an unusually artistic array of photographs and line drawings.

A striking feature of the number is a four-page layout of photographs showing the sales organization of the Goodrich Company. Interesting articles and photos show the scope of the Goodrich products, and many sales suggestions for the dealer are worked in.

200 GATHER AT ANNUAL BANQUET OF REVERE CO.

PROVIDENCE, R. I., Mar. 14.—At the first annual dinner of the Revere Rubber Company, the largest manufacturer of automobile, motorcycle and bicycle tires in New England, held last Saturday night, preliminary steps were taken toward the formation of an organization of the company's employees. More than two hundred men from the plant enjoyed the banquet at the Crown Hotel.

Harlow W. Waite acted as toastmaster and the following men spoke: Dr. T. Whittlesley, of New York; Col. C. F. Tillinghast, Lieut. Henry D. Littlefield, A. W. Perkins, A. H. Carr and W. R. Gates.

ORGANIZING MOTORCYCLISTS FOR DEFENSE

Now Is the Time to Begin Training Riders for Service With the Colors; How About Forming a Military Corps in Your Club?

ONE of the outstanding features of the European war, from the viewpoint of equipment, is the spectacular service rendered by the motorcycle. Everyone who reads the newspapers knows that. There is no ground for argument about it. It is already history. Knickerbockered lads of the next generation will find it in their school books. What Paul Revere was to his period, the helmeted and khaki-clad motorcyclist is to-day in hundreds of cities and towns behind the ever-swaying lines of battle in Europe. The motorcycle is no longer merely a masterpiece in steel—it is one of the nerves of the army.

Powered two-wheelers are in use by all the contending nations—the number of machines behind the fighting fronts being estimated all the way from 12,000 to 20,000—and no European strategist thinks of ignoring them in his calculations. They are ranking close to the aeroplane in versatility and value of service rendered, and certain it is that no other vehicle known to the mind of man to-day could have performed some of the war feats proved to the credit of the motorcycle—and brought back its pilot to tell the tale.

But—now let this sink in—*through all the voluminous records of the debates at Washington during the past month concerning a policy of preparedness for the United States there are discoverable only two or three definite references to the motorcycle as a military adjunct.*

WHAT'S more, it is plainly evident from the two or three references spoken of that Uncle Sam's military advisers have only a vague idea of the motorcycle's scope in war. There is no excuse for this lack of information. The facts are in sight. Europe has done the experimenting and shown the motorcycle to be an essential to modern warfare. It only remains for Uncle Sam to buy his motors and train riders.

Under existing conditions the United States could place at least 2,000 motorcycles to advantage in military service throughout the country, and it is roughly estimated that no more than 75 or 100 are actually in use. In time of war—considering the extent of our coast lines—it would be well within reason to count upon the services of at least 5,000 motorcycle volunteers. It might easily be found advisable to increase that number.

Now, motorcycle soldiers are not made overnight—any more than soldiers of any other class. Some training is necessary; there must be co-ordination of thought and action. Riders must know what is expected of them.

THIS CONVERSATION MIGHT JAR UNCLE

***Uncle Sam*—I have just discovered that the U. S. army must have motorcycles. We need 5,000 machines at once.**

***Motorcycle Manufacturer*—Sorry, Uncle, but our total output for the year has gone to the dealers.**

THAT brings up the first object of this article: The recommendation of a system of training limited numbers of motorcyclists in all the larger cities so that they can work effectually with the other military units for national defense should such action become necessary. That is for the dealers and riders to think about. We'll have more to say concerning it next week.

The second object is to call to the attention of military men the undisputed value of the motorcycle in army service, to impress upon them the necessity of considering the motor two-wheeler now, when there is time to work out systematic plans, rather than later, when there may be no time for anything but confusion.

To that end marked copies of this number of **Motor Cycle Illustrated** will go to military officials in Washington and to others at Albany. Future numbers, in which the military value of the motorcycle will be treated more in detail, will be forwarded i nthe same way, and military men in all the capital cities will ultimately be included in the mailing list.

Motor Cycle Illustrated is ready to go the limit to see that Uncle Sam does not overlook the motorcycle, and the co-operation of trade men and riders the country over is solicited. Address a letter to the Editor offering any suggestions you may have in mind, send along an appropriate photo of military interest if you have one, and tell what you believe can be done along military lines by motorcyclists in your city. You will be displaying patriotism and aiding in a big movement that is certain to have important results.

Preparedness means the sane development of every force that could be used for national defense, and it is the purpose of **Motor Cycle Illustrated** to show that the motorcycles of the country constitute such a force. Let's get busy.

On the Pacific Coast

SMITH TOURS SPLENDID NEW HIGHWAY

Los Angeles Distributor Runs Out of Adjectives in Describing Motorcycle Trip to Bakersfield and Return

LOS ANGELES, Cal.—There is no man in southern California who is better posted on mountain scenery than C. L. Smith, Los Angeles motorcycle and bicycle jobber and distributor. Smith has just returned from Bakersfield, making his first trip to the Kern County seat since the opening of the Ridge Route State Highway which traverses the crest of the mountains and cuts off many miles from the old route between Los Angeles and the headquarters of the oil industry.

Smith is enthusiastic over this new road and says its fame is certain to become national among motorcyclists. To hear him describe it would make any motorcyclist want to hop on the saddle and beat it clear across the country for the sake of feeling the thrills of this splendid path.

A Picturesque Record-Breaker

"It is the most picturesque route between two cities to be found anywhere in the United States," says Smith. "The road, even after the flood, is in absolutely perfect condition; you have all paved highway from Los Angeles to the foot of the ridge, which is a true ridge with a deep valley on both sides. Here your road runs on the height for twenty-nine miles. There are some ups and some downs, but any 7 h. p. twin can make it all on high, so wonderfully is it graded. Dropping down at the end of the ridge you will pass Bailey's Lake in the extreme corner of Antelope Valley, which is, of course, a part of the Mojave desert. You pass the lake and start right up the Tejon Pass. Then going out of the Tejon you have a twelve-mile coast down the other side. That makes 49 miles of continuous driving in the mountains. Through the mountains the road is of natural decomposed granite, and makes a perfect highway. When it is fully settled, however, it is to be covered with concrete. The road is so broad on all turns that two machines can pass, and is full 26 feet wide all the way.

A Wonderful Straightaway

"When you arrive at the foot of the Tejon, you come into the most wonderful piece of paved straight road in the world. It runs straight before the eye for 31 miles to the main street of Bakersfield and then one mile more in a straight stretch to your hotel, just as straight as the surveyors could draw the line.

"Coming out of the Tejon you make your last turn and then see 31 miles of straight highway, with Bakersfield, through the clear California air, at the end of it.

"When you are coming from Bakersfield south, over this straight road it looks as if there were no place to enter the precipitous mountain wall which you are approaching. It is only when you come very close to the mountain that you see there is a curve, and you ride around it, and then enter the Tejon Pass.

"On Washington's birthday coming back I noticed several motorcyclists who were making the round trip. It is just 125 miles from my store to Bakersfield."

MERRY'S NEW DEPARTMENT PLEASES THE DEALERS

SAN FRANCISCO, Cal.—Edwin F. Merry, the San Francisco jobber, has opened a new department through which he handles the distribution of a number of high grade automobile specialties, including Vitalic auto casings, Oilzum Oil and Kokomo inner tubes, which he is putting out to be handled through the motorcycle trade. Dealers can thus buy goods for which they have an occasional call from the same house they do other business with.

CLEVELAND OFFICIALS STUDY TRADE CONDITIONS

LOS ANGELES, Cal.—C. A. Nieracher, chief engineer, and W. S. Quinlan, secretary of the Cleveland Motorcycle Co., manufacturing the Cleveland two-stroke lightweight, have been in Los Angeles for several days investigating trade conditions.

LOS ANGELES FLOWER RUN SLATED FOR MARCH 25

LOS ANGELES, Cal.—Captain Charlie Wride will lead the Flower Run of the Los Angeles Motorcycle Club over a 150-mile course on March 25. He has already picked out his route and is keeping it secret. There will be plenty of turns and plenty of good scenery. The boys say that when Charlie leads he invariably gives them a ride and keeps them moving. The route will be almost entirely over macadam and asphalt paving, so there will be plenty of ladies occupying the tandem seats.

TEST BRINGS CROWD IN

LOS ANGELES, Cal., March 14.—A big crowd of likely looking prospects was drawn into the establishment of the Henderson Motorcycle Sales Corporation last week, when the motor of one of the four-cylinder machines was kept running continuously in the window for three days. The machine had to be stopped at the end of that time, for the local agents secured more than enough prospects on their list to keep them very busy for some time to come.

HAMMETT KILLED IN ACCIDENT

FRESNO.—J. H. Hammett, traveling salesman for the Pennsylvania Rubber Co., formerly of the Pittsburgh branch and later with the Los Angeles branch, was killed by the overturning of an automobile in which he was riding at Fresno on March 5.

SIMON AND MURPHY ARE BUSY

LONG BEACH.—In their first three weeks as Harley-Davidson agents at Long Beach, Simon & Murphy have sold two machines and taken a third from the distributors, so they may be ready to make prompt delivery.

DON'T FORGET THAT THE RIDERS' CLOTHING CONTEST CLOSES MARCH 25

READERS who are preparing to submit letters and photographs in the Riders' Clothing Contest should guard against putting off the mailing of their contributions till the eleventh hour. No letter or photograph reaching the office of **Motor Cycle Illustrated** after 5 p. m. on Saturday, March 25, can be considered for the prizes.

Describe your ideal road costume in full, emphasizing all the essential features, enclose a photograph of the suit in service, and mail the material to **Motor Cycle Illustrated** today. The full conditions governing the contest appeared in the March 2 and March 9 numbers of this journal. Read them over again if you are not sure about any point.

For the most practical and helpful letter, accompanied by photo, a prize of $10 will be awarded; the second prize is $5, and the third, $3. If your letter does not win a prize and the photo accompanying it is still interesting enough for publication, **Motor Cycle Illustrated** will pay one dollar for it.

Mail Your Contribution Today And Get in Line For a Cash Prize

THE COLD-WEATHER ALLIES ARE ON THE RUN

IN another fortnight the Cold-Weather Allies will have completed their evacuation of the roads and hills and all will be in readiness for a concerted movement by the motorcycle expeditionary force which is to take possession of the country.

That is merely a seasonable way of remarking that the 1916 riding term is close at hand. This is the time to get out maps and plan trips, arrange for club reliability runs and other contests that will arouse interest in the sport.

If you haven't placed an order for that new mount, today is not too soon to do it; and if you are going to get another season out of the 1915 model it ought to be turned over to the repairman for overhauling without delay. Beyond a doubt, 1916 is going to be a banner motorcycle year.

HARLEY-DAVIDSONS EQUIPPED FOR FIRE-FIGHTING

Milwaukee Company Announces Unique Arrangement for Introducing the Motorcycle to Fire Departments; Adapted to Both Solo and Sidecar Outfits

Fireman with Pyrene-Equipped Harley-Davidson Being Directed to Fire at Call Box

IN ORDER still further to broaden the scope of the Harley-Davidson motorcycle, and to open a new field of activity for dealers, the Harley-Davidson Motor Co. has just made an arrangement with the Pyrene Mfg. Co., makers of the well-known line of fire extinguishers, to catalog and promote the sale of Harley-Davidson motors equipped with Pyrene tanks. In addition to getting his usual profit on the motor, the dealer who sells one of the Pyrene-equipped Harley-Davidsons will also make a neat commission on the extinguishers. The Harley-Davidson company is now preparing special literature which will explain all the details of the new arrangement.

The Pyrene tanks may be attached to a solo mount in two ways: Two of the extinguishers can be bracketed on the front forks of the motorcycle, or four of them can be attached to the luggage-carrier, as shown in the accompanying photo. When a sidecar outfit is used, provision is made for carrying three of the extinguishers on the cowl of the car, in addition to the four attached to the luggage-carrier of the motor. Fastened to the sidecar also are two regulation fire axes and a four-foot pike pole.

The motorcycle fire-fighting outfit can be used to advantage by departments in either large or small cities, the aim being to get one or two firemen to the scene of the blaze so quickly that the Pyrene apparatus can be used and the flames prevented from spreading.

LIVELY DOINGS AMONG LOS ANGELES CLUBSTERS

LOS ANGELES, Cal.—Among recent affairs of the Los Angeles M. C. was a "flower run," somewhat on the order of a paper-chase. Captain Charles Wride was given 30 minutes start on his machine and rode off, dropping a flower at every corner he turned. The field then followed the tortuous course, locating it by the dropped flowers. The first rider to catch up with the captain was declared the winner.

The last club run in February was to Riverside and return, a distance of about 275 miles. Thirty members turned out and all had a good time. The February dance was run off in great shape and netted the club a nice little sum.

RACING ASSOCIATION TO BE FORMED AT ELMIRA

ELMIRA, N. Y., Mar. 14.—A preliminary "get-together" meeting of thirty-five dealers and enthusiasts for the purpose of organizing the Elmira Motorcycle-Automobile Racing Association will be held at the Hotel Langwell, Thursday, Mar. 16. A banquet will be served at eight o'clock in the evening, to be followed by a business session.

A. B. Hickox, manager of the Fisk tire agency; P. B. Rutan, a local motorcycle dealer, and F. G. Maloney, of the E. W. L. & R. R. Co., are the originators of the association, which will manage racing on a large scale during the summer. Arrangements have already been completed by the promoters to hold bicycle, as well as motorcycle and automobile meets at the Maple Avenue Park on Decoration Day, July 4, Labor Day and Election Day.

KLAPP BOOSTING CALIFORNIA MOTORCYCLE RESERVE

LOS ANGELES, Cal.—George A. Klapp, of the California Henderson Motorcycle Sales Corporation recently staged an interesting demonstration of machine gun practice from a motorcycle sidecar at the California National Guard Rifle Range a few miles outside of Los Angeles. The photograph shows George with his eagle eye in front of the sight. It is lucky he is not in earnest, for George's reputation, built up in going after police motorcycle business, is that of one of the livest "go-getters" in the trade.

MOST ENDURANCE RUNS ARE TOO SEVERE

IT is doubtful if any one movement along competition lines could do more for the advancement of motorcycle interests during 1916 than a policy calling for less severe endurance runs. Heretofore the average endurance run has been in danger of degenerating into a road race. A running schedule of about twenty miles an hour is customary, and the contestant who

suffers even a brief delay, through a puncture or other minor trouble, is then forced to strike a breakneck pace in order to check on time at the next control.

This system, or lack of it, imposes an unnecessary risk and is unfair both to the rider and his mount. If the endurance run is to be made worth while it must incorporate more of the features of a reliability contest and fewer of the points of a heart-breaking speed grind. A somewhat slower running schedule over bad roads and more attention to the reliability performances of the machines would have remedial effects.

Aside from the risk and hardship to contestants the endurance run as we have it today has another undesirable angle: It creates an unfavorable impression upon the general public. Mud or dust-covered riders roaring at top speed over the countryside make no friends for the motorcycle. A milder form of road competition would arouse as much interest, demonstrate the dependability and speed of the motors equally well and also make an appeal to the man who may contemplate the purchase of a power two-wheeler simply for routine service.

Motor Cycle Illustrated does not mean to suggest the transformation of the endurance run into a "baby parade," as one seasoned endurance rider put it a few days ago, but does wish to go on record as favoring less severe running schedules with a recognized system for judging the competing motorcycles on reliability points.

This journal stands ready to assist any club or dealer in working out the general plans for a reliability checking system, to the end of having this season's endurance runs more constructive and more helpful to both trade and riders than those of other years—without in any way detracting from the sporting interest in them.

CHAPPLE'S OUTFIT UNDER EDITORIAL FIRE

COMMENTING upon the article and illustration which appeared in **Motor Cycle Illustrated** recently descriptive of Arthur Chapple's sidecar or trailer attachment for machine gun service, our capable contemporary, *The Motor Cycle*, of London, gets right up in meeting with an objection.

Passing lightly over the fact that Chapple's car is designed for attachment to either side of the motorcycle, as well as for trailer use, the London Journal has this to say: "As a matter of fact, it is doubtful whether a trailer would be practical under any conditions of fighting. In France a heavy, unstable machine towing a heavy trailer would be impossible owing to the grease.

"Arthur Chapple, the designer, is 'dickering' (whatever that means), with representatives of several European war departments with regard to the adoption of his outfit, but however much 'dickering' he does, we do not think the Clyno Company need have any fears!"

We wouldn't for the world have the Clyno folks entertain any fears and if Art Chapple's fighting machine is going to cause sleepless nights abroad we will undertake to have it banned, barred, proscripted, inhibited and embargoed. We know that "Chap" feels the same way about it. He's too considerate of the rights of others even to "tickle" a carbureter without giving the little jigger fair warning of his intentions.

Webster's Unabridged, by the way, defines "dicker" in this way: "To negotiate

a dicker, to barter." And as between Webster and our friends of *The Motor Cycle*, of London, the writer finds on a personal poll that he is ninety-nine and one hundred one-hundredths per cent. for Webster. We may be X-Y-Z-boated for saying so, but we can't get away from the idea of fostering home industries.

Getting back to Art Chapple for a moment, the writer has direct knowledge of the willingness of engineers representing two European governments to buy the sidecar-trailer attachment if Chapple could guarantee that production of the car would start at once. But with every factory in the United States fifty to sixty per cent. behind on orders, Arthur couldn't guarantee anything of the kind.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

DELANO, Cal.—The Delano Hardware will erect a fireproof building as its headquarters and will occupy the same about April 1. The company will deal in automobile accessories, lubricating oils and small tools.

CENTRALIA, Wash.—The Oliver Hardware Company has been incorporated as the successor to the Oliver Hardware, with a capital of $60,000. Catalogs are requested on bicycles, lubricating oils and small tools.

MAITLAND, Mo.—The Smith Hardware Company, successor to McNaul & Lee Smith, requests catalogs on automobile accessories, small tools and lubricating oils.

DANVILLE, Ark.—Sharpe Brothers, general merchandise, have added bicycles, lubricating oils, small tools recently and will be glad to hear from manufacturers and jobbers.

MARSHFIELD, Wis.—The Marshfield Hardware & Auto Company has been incorporated with a capital of $32,000, to deal in bicycles, automobile accessories, mechanics tools, lubricating oils, etc. Catalogs are requested.

BLUFFTON, Ind.—Grover and Milton Spitler, doing business as Spitler Brothers, have sold out to the Bluffton Hardware Company. The firm will deal in bicycles and small tools.

BATTLE CREEK, Mich.—Bauer & Hamilton request catalogs on automobile accessories. They handle both wholesale and retail stock.

PARKERSBURG, W. Va.—R. L. Neal & Co., of 413 Market street, have sold out to the Wiant & Barr Hardware Company, which requests catalogs on bicycles, lubricating oils, automobile accessories and small tools.

AKRON, Iowa—The Akron Implement Company has taken over the W. W. Keech implement business. Lubricating oil catalogs and prices wanted.

VARINA, Iowa—Clampitt & Reis have taken over the business of F. Fitzgerald and are inquiring for catalogs, etc., on lubricating oils and automobile accessories.

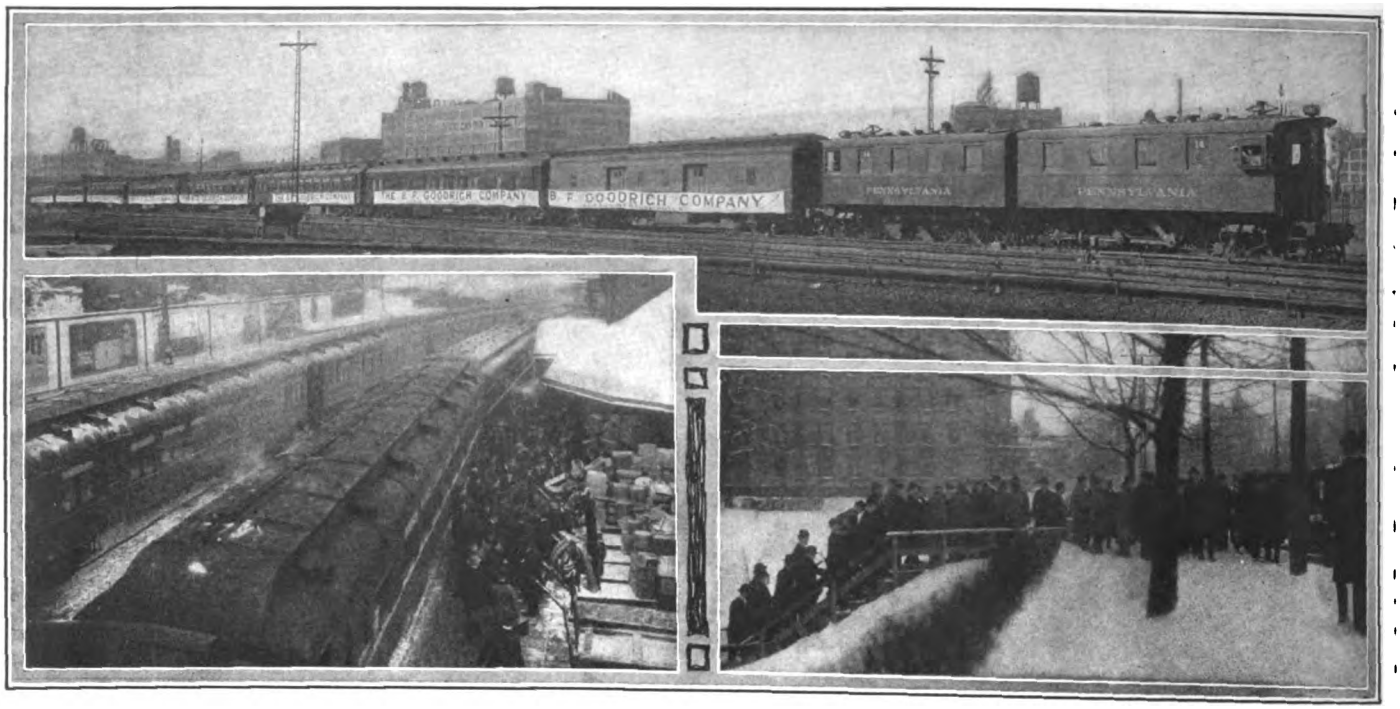
HOW THAT BIG GOODRICH CONFERENCE WAS HANDLED

Four Special Trains Were Required to Carry the 450 Salesmen to Akron and Emphasis Was Placed on the Fellowship Idea; Addresses by Factory Officials



Above, One of the Specials Entering Akron; Left, Eastern Salesmen Disembarking; Right, Entering Cars to Ride to Factory

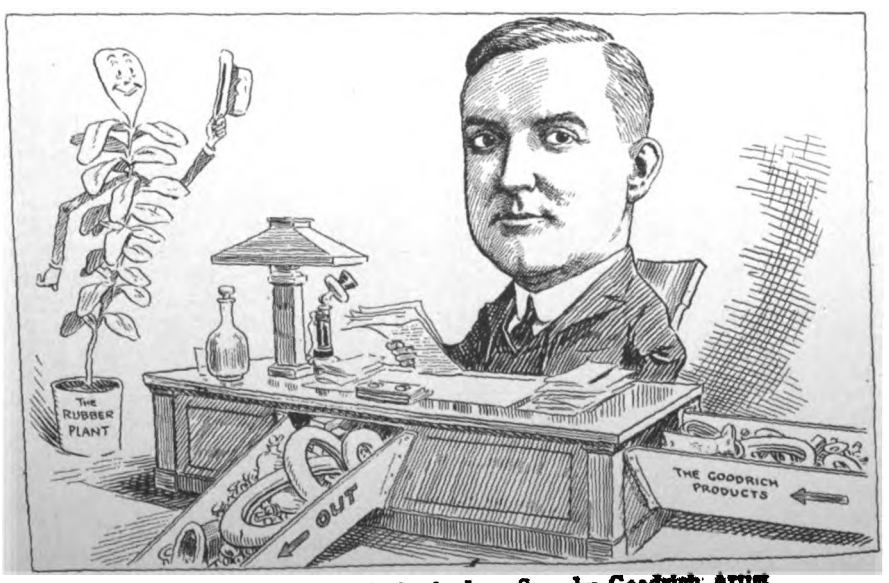
AKRON, Ohio.—In many ways the salesmen's conference of the B. F. Goodrich Co., held in this city March 2-3, and which was briefly reported in the March 9 issue of **Motor Cycle Illustrated,** was the most remarkable of the kind ever held. The event, under the direction of W. O. Rutherford, general sales manager of the corporation, was a good-fellowship "homecoming," attended by 450 Goodrich salesmen from every section of the country except the Pacific Coast.

Sales problems and policies were not discussed at this conference. Tho program centered around the one idea of bringing into closer personal relationship the many specialized units of the Goodrich sales organization. Men who sell Goodrich automobile, truck, bicycle and motorcycle tires, boots and shoes, belting, hose, mechanical goods, drug sundries, etc., rubbed elbows together as members of one great commercial family.

The salesmen were brought to Akron, and returned to their territories in four special trains. They represented the organizations of fourteen Goodrich branches, those at New York, Philadelphia, Boston, Pittsburgh, Buffalo, Detroit, Cleveland, Chicago, Minneapolis, Kansas City, St. Louis, Indianapolis, Cincinnati and Atlanta.

A trip through the great Goodrich factories afforded the salesmen an opportunity to get close first-hand information on the romance of rubber manufacture. Three new factory buildings, erected during the last six months and adding 700,000 square feet to the rapidly-expanding Goodrich plant, were also thoroughly inspected. The conference banquet was followed by an informal vaudeville entertainment in which talented department heads and visiting salesmen took leading parts.

Addresses, all of which sounded the note of continued prosperity for the B. F. Goodrich Co., because of the loyalty of the men in the field who are making a world-wide market for Goodrich-made goods, were made by W. O. Rutherford, general sales manager; E. C. Shaw, second vice-president; C. B. Raymond, secretary; E. C. Tibbitts, advertising manager; J. C. Lawrence, credit department manager. Dr. W. C. Geer, head of the development department, told the wonderful story of how crude rubber is successfully compounded to make it adapted to the hundreds of commercial uses to which it is the pre-eminent ingredient today.



Sales Manager W. O. Rutherford, as Seen by Goodrich Artist

BECK SELLS 8 SIDECARS IN ONE BUSY DAY

NEW YORK, March 10.—Irving Beck, Eastern representative for the Rogers Manufacturing Company, of Chicago, Ill., received a shipment of Rogers sidecars last week and started in his usual fashion to sell them. During the first four days of March, 16 were sold, while on March 4, Beck delivered eight sidecars before sunset. "This is a record one-day sale for sidecars," says Beck, "and I can foresee the Saturday that 25 sidecars will be sold here —Rogers, of course."

Beck has now 101 sidecars on the way from Chicago. Beginning March 20, he will have a carload shipped every ten days to New York in order to care for the increasing demand in his territory.

MANAGER OF CONTINENTAL TIRE SALES

NINTH IN A SERIES OF BIOGRAPHICAL SKETCHES OF TRADE LEADERS

W. J. Surre Started His Climb to Trade Prominence at the Age of Fifteen and Has Made Consistent Progress Ever Since; Equally Successful as Sales Executive and Manager of Cycle Industries Convention Programs; Was Recently Honored by Election to Second Vice-Presidency of Continental Rubber Works

CYCLE trades folks who are intimately acquainted with W. J. Surre—and about ninety-nine one hundredths of them are—agree in saying that once he is convinced of the saneness and general value of a project he can generate more result-getting energy behind a movement than is ordinarily expected of two or three full-fledged boosters, and the facts in the case back them up.

As a general thing, the man who is rated high as a business vitalizer cannot be persuaded to divert any of his enthusiasm to the lighter phases of trade work, but Mr. Surre has demonstrated his ability to shift from high-class tire salesmanship to equally high-class convention managing without for an instant missing his stride. This temperamental flexibility has had a great deal to do, doubtless, with the trade conviction that "W. J." never lets go till he rings the bell—whether the bell happens to be at the ever-expanding plant of the Continental Rubber Works, in Erie, Pa., or at the annual convention of the Cycle Trades Industries in Atlantic City. And through it all Mr. Surre presents the modest mien of a man who feels that staging successes is simply a part of the day's work.

An Early Business Start

Mr. Surre was born in New York on January 3, 1871, and his ability to grasp business principles was demonstrated before he reached his sixteenth year. He was a little over fifteen when he obtained a position with the hardware house of Patterson, Gottfried & Hunter, of New York City, and for seven or eight years the youth applied himself closely to a study of the line handled—machinists' and engineers' supplies. Passing steadily through various stages of advancement, Mr. Surre reached the responsible position of buyer for the house, and it was while he held that title that he decided to broaden his field of endeavor.

In June, 1894, he joined the staff of P. & F. Corbin, of New Britain, Conn., and traveled with uniform success in behalf of the company's screw department. This line of work naturally brought him in touch with the bicycle manufacturers and jobbers, and the facility with which he was able to make friends soon proved that his new connection would have highly satisfactory results. An excellent insight into Mr. Surre's character will be gained when it is known that all of the friends he made in those days are still as keenly interested in "what Bill Surre is doing" as they were when he was getting around to see them regularly. In other words, his friends "wear well"—which is just another way of saying that Mr. Surre has mastered the art of combining tact with a sympathetic understanding of his fellow workers.

Beginning the Upward Climb

When the Corbin Screw Corporation was formed in July, 1903, Mr. Surre was called in off the road and promoted to the position of assistant secretary of the company. He was also made assistant sales manager. In this capacity he had under his direct supervision the Corbin lines which he had formerly handled to such good effect on the road, and he continued to obtain highly satisfactory results. That he was equal to all the demands made upon him is shown by the fact that in February, 1907, he was advanced to the position of secretary, and was also placed on the Board of Directors of the company.

In October, 1908, came the opportunity

W. J. SURRE

For Him a Tire Sales Coup or a Cycle Trades Convention Is All in the Day's Work

which brought Mr. Surre to the staff of the Continental Rubber Works, with which he is still connected. The Continental folks offered to place Mr. Surre in charge of their eastern business and the proposition proved sufficiently alluring to change him from the Corbin line to the Continental. Early in 1911 Mr. Surre was promoted to the position of manager of sales of the Continental tire department, with headquarters at Erie, and this title he still holds.

At the last semi-annual meeting of the directors of the Continental Rubber Works the office of second vice-president was created and Mr. Surre was chosen to fill it. This latest development is sufficient proof that the Surre energy is still meeting all expectations, and that ability to move ahead with the industry is not the least of "W. J.'s" qualifications.

Again on Convention Committee

Mr. Surre was retained as chairman of the committee in charge of general arrangements for the 1916 convention of the Cycle Industries at Atlantic City, with C. E. Morehouse as his capable co-worker. Messrs. Surre and Morehouse raised strenuous objections to serving on the committee again, but it appears to be taken for granted that no other team could put the big program through with quite the finish and thoroughness they have shown, and the convention committee shows signs of becoming a permanent one.

Mr. Surre is inclined towards conservatism when it comes to discussing trade matters and seldom has a word to say about his plans until the actual results are ready to be announced. This reticence accounts for the fact that the present biographical sketch is being written without his knowledge.

LICENSE BILL INTERESTS KENTUCKY RIDERS

LOUISVILLE, Ky.—Dealers and riders in this State are much interested in House Bill No. 355, calling for a reduction of the present motorcycle license fee from $5 to $3 a year. This bill was introduced by Representative Purnell, of Owensboro. The motorcycle fraternity has been up in the air for two years over the high license fee set by the 1914 legislature. The Purnell measure is expected to pass both the House and the Senate, and will be well received by all hands.

PASTIME M. C. ORGANIZED

BROOKLYN N. Y., Mar. 14.—The newest club in Brooklyn is the Pastime M. C., which was organized last week with a membership of sixteen. William Dodge was chosen president; Charles Wilde, secretary; J. H. Raidel, treasurer. All Brooklyn riders over eighteen years of age are invited to join. Meetings will be held on alternate Mondays at Jack's Cyclery, 1507 Bushwick avenue. The next meeting has been called for March 20.

MEET WITH HAIR-RAISING ADVENTURES

Four Los Angeles Riders Journey Through Flood District to San Diego—Encounter a Real Redskin, Brandishing a Gun

LOS ANGELES, Cal., Feb. 25.—Spills and a variety of adventures taught a party of local motorcyclists that it is a long, hard way to San Diego when floods have washed out the bridges. "Dynamite" Ralph Starry, on an Indian, with Bob Funk as tandem passenger, and Lorren and Frank Starry, on a Harley-Davidson, were the Los Angeles riders who were hotly pursued by the jinx.

The boys took plenty of rope, which was intended for use in fording rivers on their forty-eight-hour trip. And the rope certainly did prove a life saver, and a motorcycle saver, too. Late at night they were riding over a trestle that crossed a roaring river, when they saw a train come right on top of them at a mad clip. They quickly tied the machines to the timber and let them dangle over the side of the trestle, while they clung to the ties for dear life as the train passed above them. The train was fortunately a short one.

Other adventures were a moonlight collision with a guard fence, a dash into a concrete bridge and an encounter with a real Indian, who was driving his team along the road. "Dynamite" shouted "Stop!" to the redskin, who thereupon poked his head out the wagon, brandishing a gun as large as a cannon. He threatened to shoot the whole crowd, if anyone tried to hold him up.

The Injun cooled down, however, when the boys told him of their plight, and he finally consented to give them a "lift" to his hut, where his squaw greeted the party at 11 p. m. She boiled sixteen eggs for the famished riders, baked a huge pan of biscuits and some potatoes, and then made a pot of steaming hot coffee, that, so "Dynamite" says, "sure did hit the spot." The kind-hearted Indian was a splendid host; he even robbed his own bed of its pillows to make the fellows comfortable on the hard cabin floor.

The following morning the Indian, whose name was Vejar, took the riders and their machines seven miles to Temecula. At that place, the party replenished their supply of gasoline and continued on their way. They hit their home city a tired quartette, but they appeared happy in spite of their experience.

THIS OUTFIT IS CARRYING 777 POUNDS

IN the accompanying photograph are shown Joe Metzger and family, of Flint, Mich., using an Excelsior motorcycle with Pullman sidecar. The outfit is carrying a total weight of 777 pounds. Mr. Metzger weighs 242 pounds, Mrs. Metzger 175, one youngster 160 and the two remaining children weigh in at 200 pounds together.

They report that both motorcycle and sidecar give excellent results under the unusual strain, and that all the passengers manage to travel quite comfortably in spite of the fact that five is pretty close to a record number to carry in general service.

DESCRIBING VIEWS ON THE OPPOSITE PAGE

ON the opposite page will be seen a series of pictures taken along the Columbia River Highway during a trip made by Edward Carlson, of Portland, Ore. In the upper left hand picture is the Columbia River Gorge with the mighty Columbia completely frozen over. In the right hand view is Carlson and a companion on a muddy section near the Gorge. Second row at left is a portion of the highway near Seco, Ore., while below is one of the rivers entering into the Columbia with Carlson's Indian on the bank. The snow picture shows Carlson near Multonomah, while the small one below is a view on the Base Line Road.

The winding road with its parallel ruts is typical of the old mountain roads in this section of the State. Below is Carlson's Indian with that of H. Zerung, his companion, at the lower bridge of Multonomah Falls. The last view gives an idea of the beauty of the frozen Multonomah waterfall, with its two bridges. Zerung is in the saddle on the lower bridge.

REGISTRATIONS INCREASE IN PENNSYLVANIA

HARRISBURG, Pa.—Statistics of the Pennsylvania State Highway Department show that farmers have been purchasing both motorcycles and automobiles during 1915, and that the power two-wheeler has taken the place of the saddle-horse with many a farmer's son.

During the comparatively open weather of this winter there was a great increase in the number of motorcycles registered in this city. January registrations numbered 4,300 while the 1915 total was 17,502. This is several thousand above the figures for 1914. It is believed that the machines registered this year will exceed 25,000.

RIDERS GETTING INTO FORM FOR DIXIE MEETS

ROANOKE, Va., March 14.—Riders in this vicinity who expect to take part in the Dixie M. C. racemeets which are to be held on Easter Monday, Decoration Day, July 4th and Labor Day are now out on the roads working in their racing machines. Some of the fellows are practicing on the half-mile track in this city.

All of the meets promoted last season by the club were financially successful and the club expects to pour more money into its treasury as the results of this season's events.

"THEY'RE EAGER TO READ IT"

"I want to assure you that Motor Cycle Illustrated is welcome at our shop always. We have a bunch of fellows coming around to the shop every Saturday morning waiting for your paper—they're just as eager to read it as we are."

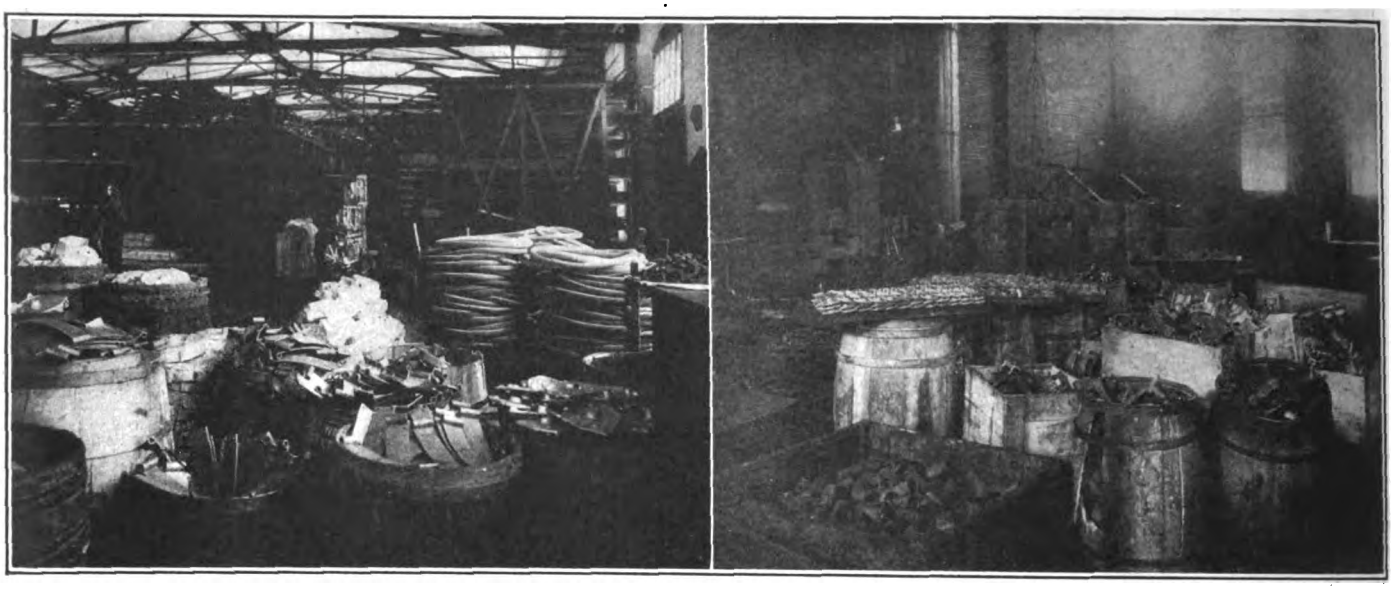
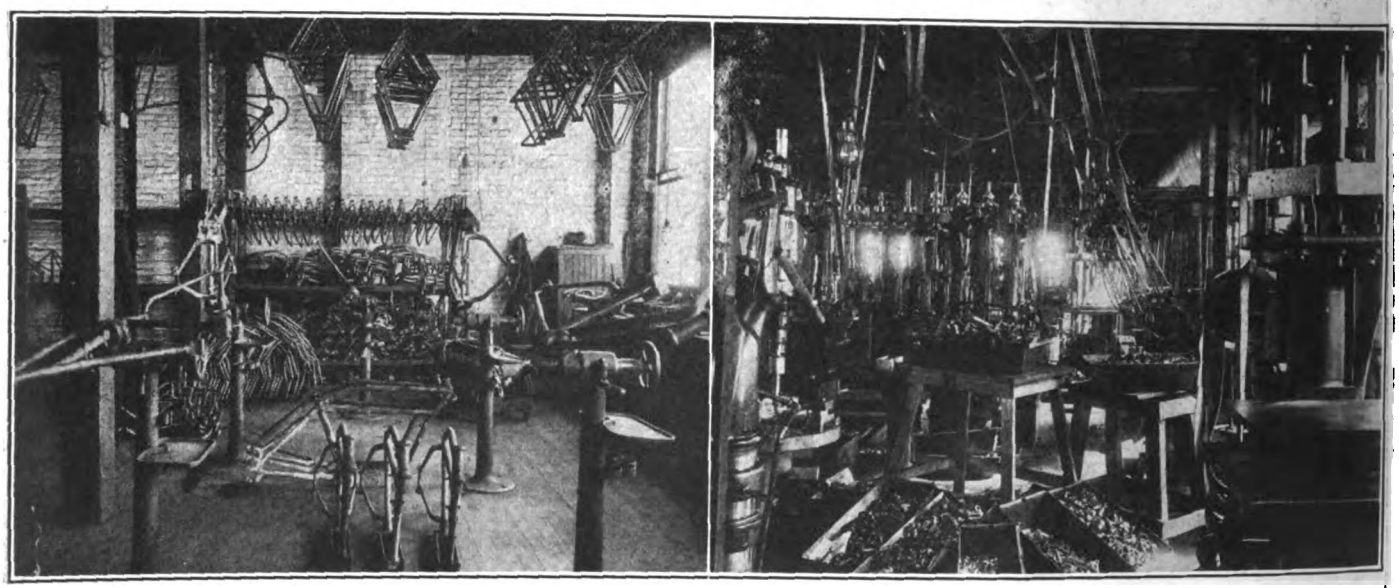
WESTFIELD MFG. CO. STRIKES RECORD PACE IN SPITE

Plant Is Operating on Day and Night Schedule and More Men Are Employed in Production
Factory Shows How the Busy Organization Is Getting R



Left, Crankcases, Gear Covers and Other Parts in Receiving Room; Right, Cam Gears and Other Components in Heat Treating Room



Left, Where Front Forks Are Brazed and Made Ready for Filing; Right, a Corner in the Busy Machine Room

IN these days of hum and bustle in the cycle trades, when orders for both motorcycles and bicycles are considerably ahead of present production rates, it is interesting to note that manufacturers are meeting the abnormal conditions on a much more satisfactory basis than could reasonably be expected. Makers of motorcycles and bicycles are being hampered at every turn by the scarcity of material, the excessively high prices which have gone into effect during the last few months and by the failure of the railroads to deliver material—some of which is delayed along the line for a month or six weeks. But in the face of all obstacles the manufacturing companies are making excellent progress and exerting every effort humanly possible to meet the shipping demands of their dealers.

An excellent demonstration of this businesslike policy is now being given at the plant of the Westfield Manufacturing Company, Westfield, Mass., where great numbers of motorcycles—and also some of the firm's bicycle lines—have been held up of late awaiting the arrival of material for one or two minor parts. All the work possible was done on these machines and the handling of them was so systematized that with the arrival of the necessary material, which is now coming in, they can be completed and rushed out in record time.

So great is the present demand for Pope products, that the factory is working day and night, with more men on both shifts than have ever been on the roll of the company since its entry into the cycle business. Throughout the plant there is a striking optimism, and when a staff representative of **Motor Cycle Illustrated** arrived there recently, he found all heads of departments much pleased to receive visitors and to show them around. It was the ex-

pressed wish of Sales Manager L. E. Harden, in fact, that every Pope dealer in the country could be taken through the factory, so that all could see what was being done.

After signing the visitors' book, a tour of the big plant was started. The first department seen was the receiving room, where, massed in groups all over the floor, were barrels and boxes of material for the Model T-16—the three-speed twin machine for which there has been such a huge demand. The materials had just come in on the morning of the visit. Aluminum castings for crankcases, and gear-covers, front fork springs, gear shifters and muffler ends were being piled on hand trucks and hauled away. At the other end of the room were tier upon tier of bicycle and motorcycle tubing, steel bars and sheet metal.

Following the path taken by a truck loaded with cylinder castings, the party entered one of the heat treating rooms, where material is carefully heated for working. Here were new parts, three-speed boxes, cam gears, barrel cam housings, frame yokes, starter cranks and more muffler ends ready for the furnaces. This room was somewhat congested, but the new and latest type furnaces are now in operation in another location which gives ample capacity for the increased product.

The next room was the stamping room, where huge presses were forming mudguards and other parts. Next came the brazing rooms where frames and forks were assembled and brazed by the dip process. Followed the frame room, where the frames are made up and later filed and lined. Here the handlebars are formed. Together with the frames of different models, the men were working upon hundreds of front forks and handlebars for the Model T-16.

SIDE-SEATERS HAVE FINE FLORIDA TRIP

Excelsiorites From Sellersville, Pa., Take 3,000 Mile Tour to Jacksonville and Return with One Puncture as Only Trouble

SELLERSVILLE, Pa.—A. C. Groff, Excelsior agent in this city recently returned from a trip to Florida, taken on his twin machine fitted with a Miller Triplex seat. Groff had as his running mate George Groth, another Sellersville enthusiast. The trip took nearly two months and over 3,000 miles of roads were covered.

Groff and his mate started on December 9, 1915, and reached Washington, D. C., at the end of the first day. Together the pair weighed 300 pounds and the machine carried an extra 100 pounds of baggage on the carrier. The route to Washington was through Philadelphia, Chester, Wilmington and Baltimore. Just before entering the District of Columbia, Groff was held up by a constable for speeding on a practically deserted road with few houses on it.

Seeing the Magistrate

"The magistrate was about 70 years old," said Groff in telling about the arrest," and looked as if he was out to boycott the barbers. He wore a suit of overalls and a jumper and held 'court' in a dirty little shack. He fined me $10, but I got it reduced to $4 by pleading poverty. We lost two hours and $4 by this arrest."

At Washington Groff put up his mount with the Haverford Cycle Co. for the night and left the Capitol the next morning for Raleigh, N. C. The pair with their sideseater had 70 miles of muddy road to traverse, with a plentiful sprinkling of creeks to ford or water holes to rush. At some points both men had to drag their feet to keep upright and moving at all. Following this mud stretch, the roads were better through North and South Carolina to Raleigh.

In this city the pair had their first stop for repairs. A nail went through the front tire but fortunately only a puncture resulted. This was the only trouble encountered in the 3,000 miles of the trip.

The weather had gotten milder as the side-seaters proceeded nearer the Gulf of Mexico, and some of their heavier clothing had to be shed. The ride through Georgia was about 400 miles but the scenery was interesting all the way. Jacksonville, Fla., was soon reached and only the lightest clothing was comfortable there. The arrival at Jacksonville was made just seven days out of Sellersville. Groff and his partner enjoyed speeding on the hard sand beach at low tide, which they said was better than a race track. They enjoyed the bathing hugely and were rather sorry to trace their route homeward. They rode on their 1915 Pennsylvania license until reaching Virginia, where they had to procure a 1916 tag.

Puncture Was Only Trouble

Outside of the puncture in Raleigh, N. C., there was no trouble during the whole trip. The Excelsior had been ridden some 5,200 miles during 1915 with two passengers on a side-seat and had not been cleaned or given any special attention before Groff started on his Florida trip. He found no difficulty in negotiating the rough and frozen roads of the North or the muddy surfaces of the South with the side-seat and 400 pounds of passengers and baggage.

TAPERED INSULATION IN ANSWER SPARK PLUG

SPECIALLY recommended for use in dirty motors is the Answer spark plug, the product of the Hill Manufacturing Company, of 105 West Thirty-eighth street, New York. Each plug is of one-piece, unbreakable construction and has an extra amount of insulation. There are no gaskets and no cement used in the Answer plug. The price is 70 cents, and any standard thread may be obtained.

The Answer spark plug has a tapered mica insulation under constant pressure from the top to the base. This insulation is 3/32-inch thick, which is more than ample for any high-tension current produced on a motor vehicle. This insulation surrounds the center electrode which is tapered and terminates in a Meteor wire "point." The shell electrode is bent at right angles to meet the center one; this is also of Meteor wire.

The exterior insulation is of mica, compressed and polished. It is unbreakable. All insulation is under constant pressure and continues past the spindle at the end of the plug, completely covering the entire inside surface of the shell. The terminal is a combination type for snap-on or other forms of connector. The use of Meteor wire for the electrodes renders the plug immune from burnt terminals, while the form of the plug prevents sooting or oil-soaking. The Answer spark plug may be had in ⅞-inch (S. A. E.), metric or ½-inch standard. It is guaranteed by the makers to give satisfaction.

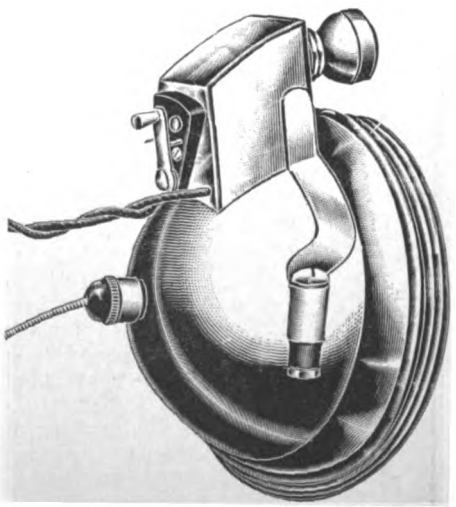
THREE FUNCTIONS IN AUXILIARY HEAD LIGHT

THOSE who ride at night, especially with the lighting restrictions now in force, will be interested in the latest product of the Electric Automatic Cigar Lighter Company, of 556 West 27th street, New York. This is the Auxiliary Head Light and Trouble Finder, an electric lamp of novel construction which is applicable to any electric or acetylene headlight on the market. It performs the functions of a pilot light, trouble finder and also can be used to read signs by the side of the road. It lists at $6.

The auxiliary head light consists of a bull-eye lens carried in a neat and stout holder. To this holder is fitted four feet of cable at one end and the other end is attached to a drum within the body of the light. This drum is fitted with a spring, which normally keeps the lamp and holder in place in an aperture at its front. When in this position, the lamp acts as a pilot light for city use or when standing still.

When it is desired to use the light for trouble hunting, the holder is withdrawn from the aperture. The cable allows of its being approached to any part of the machine so that light will fall on it. The lamp keeps burning no matter what position it is in with regard to the body. It will be seen from this that road signs can be read by approaching the lamp toward them. On releasing the lamp, it returns to its normal position under the action of the spring.

As will be seen by the illustration, the auxiliary head light is fitted above the main head light, being held in place by stout metal straps which attach to the lamp brackets. A switch is provided, permitting the light to be cut off or put on at the will of the rider. The switch will be of a different type than that shown in the illustration. Two wires lead from the body of the light to either a pair of dry cells (2 volts) or to the regular storage battery equipment (6 volts).



Auxiliary Headlight on Motorcycle Lamp

The auxiliary head light is finished in heavy nickel all over and will fit on any lamp. It weighs 6 ounces complete. For dry cell work it is fitted with a 2-volt bulb, while for storage battery it is fitted with a 6-volt bulb. The nature of the source of current should be mentioned when ordering.

This device will be invaluable for those riders who are not provided with head lights having pilot bulbs, and has the additional advantage of combining a trouble finder and road-sign reader in the one apparatus. Its price is $6 in either 2-volt or 6-volt sizes. Application should be made to the maker, at 556 West 27th street.

TO MAKE VULCANIZERS

CINCINNATI, O.—The National Rubber & Specialties Co., incorporated by local men with a capital stock of $25,000, will engage in the manufacture of vulcanizers and rubber cement for the trade. G. W. Drach, J. E. Bancroft and G. M. Allen are among those interested.

THE MEETING OF THE CHIEFS — A DISPATCH RIDER'S SHAVE

IN the above photo appear Chief George M. Hendee; Greenbow Johnston, organizer of the first motorcycle military squad in the country outside of the regular army, and Chief Yellow Bear, of the Oneida tribe. Johnston hails from Richmond, Va., and Chief Yellow Bear from Green Bay, Wis. They called on Chief Hendee at his office in Springfield, Mass., recently, and were taken through the big plant and shown just how Indian motorcycles are produced. Every Indian chief, and in fact most other visitors of note, who have visited Springfield for years past have made a point of seeing the big chief of the motorcycle wigwam.

Below is shown a motorcycle division of the English army at Saloniki. One of the riders is enjoying (?) a hurried shave with the aid of a mirror tacked against the lid of a sidevan.

Looking Down the Stretch

March 19, Wheeling, W. Va.—Run to St. Clairsville, O., and return of Wheeling M. C.

March 27-April 1, Manchester, N. H.—Annual motor show.

April 12, Springfield, Mass.—Spring meeting of the Motorcycle Manufacturers' Association.

April 16, Fresno, Cal.—100 mile free-for-all race under direction of Fresno M. C.

April 30, Brooklyn, N. Y.—Annual spring run of Invincible M. C. to Southampton and return, 200 miles.

May 7, Jamaica, N. Y.—Endurance run of Jamaica M. C., to Patchogue and return.

May 7, Providence, R. I.—Annual run to Westerly of M. C. of Rhode Island.

May 14, Bronx, N. Y.—Second annual endurance run of the Crotona M. C. to Monticello, N. Y. and return, 250 miles.

May 21, Providence, R. I.—Annual photograph run to Roger Williams Park, M. C. of Rhode Island.

May 21, Harrisburg, Pa.—Endurance run of Keystone M. C. to Altoona, Shamokin, Pottsville, Reading and return.

May 27-28, Providence, R. I.—Week-end run of Providence M. C. to North Adams, Mass., and return.

May 28-30, Boston, Mass.—Three-day endurance run of Bay State, M. C.

May 30, Roanoke, Va.—Race meet of Dixie M. C.

May 30, Wheeling, W. Va.—Race meet of Wheeling M. C.

May 30, Philadelphia, Pa.—300-mile race on Hatboro Speedway.

May 30, Seattle, Wash.—Run of Seattle M. C. to Portland, Ore.

May 31, Newark, N. J.—400 mile run, day and night of New Jersey M. C.

June 10-11, Worcester, Mass.—Fifth annual 24-hour endurance run of Worcester M. C.

June 18, 19, Wheeling, W. Va.—336 mile endurance run to Bedford, Pa., and return, of Wheeling M. C.

June 30, Wheeling, W. Va.—Sealed time run of Wheeling M. C.

July 2-3-4, Grand Rapids, Mich.—Michigan State F. A. M. reliability trial, under auspices of Grand Rapids M. C.

July 4, Roanoke, Va.—Race meet of Roanoke M. C.

July 4, New Brunswick, N. J.—Elimination run of the New Brunswick M. C.

July 4, Savannah, Ga.—Race meet of Savannah M. C.

July 4, Wheeling, W. Va.—Race meet of Wheeling M. C.

July 16, Wheeling, W. Va.—Tri-State endurance run and open house, distance 100 miles, Wheeling M. C.

July 30-August 12, Wheeling, W. Va.—Run to Atlantic City and return, 600 miles, of Wheeling M. C.

September 3, Harrisburg, Pa.—Endurance run of the Keystone M. C.

September 4, Roanoke, Va.—Race meet of the Dixie M. C.

September 6, Wheeling, W. Va.—30 mile road race of Wheeling M. C.

October 1, Providence, R. I.—Annual Triangle run, Providence-Boston-Providence of M. C. of Rhode Island.

November 13-18, Chicago, Ill.—National cycle and accessories show.

November 30, Wheeling, W. Va.—Hill climb of the Wheeling M. C.

December 4-9, New York—National cycle and accessories show.

PLANNING SPEEDFEST TO PIKES PEAK

DENVER, Col.—Plans are now being worked out for a motorcycle race meet to be held over the Pikes Peak Auto Highway in August, and the fact that the races will finish at the summit of Pikes Peak, 14,109 feet in the air, will make the program unusually interesting.

The arrangements are in the hands of D. B. Southard, of the Rocky Mountain Motorcycle Co.; Eugene A. Sunderlin, president of the highway company; N. L. Drew, traffic manager of the highway company, and Major Charles T. Lowndes. All the men mentioned are of Colorado Springs, with the exception of Mr. Southard.

BIG PROGRESS IN OHIO ROAD BUILDING IN 1915

COLUMBUS, O.—During 1915, the State Highway Commission had under supervision the construction of 843 miles of road at a cost of $10,514,707.67, according to the annual report of State Highway Commissioner Clinton Cowen. There were 905 miles of roadway completed in 1915, at a cost of $804,753.22, or an average of $889 per mile, the report further states.

Of the 843 miles constructed under the direction of the Commission, 226 were of brick, 159 of concrete and 448 were of macadam. The work was done in spite of unfavorable weather. Much economy has been obtained through standard plans for culverts and bridges of various types and for different widths or roadway. Plans for 69 bridges with spans of from 30 to 178 feet were furnished by the Commission during the year.

GASOLINE FIRM GOES UP

LOUISVILLE, Ky.—The Purified Petroleum Products Co. has gone into involuntary bankruptcy and a receiver has been appointed. This concern surprised the motor industry a few months ago when it issued coupon books free to leading motorists, the coupons being good for 50 gallons of gasoline in one, five and ten-gallon lots. The receiver of each book was requested to pay for the book after having used it.

POLICE WILL BUY MACHINE

PITTSFIELD, Mass., Mar. 11.—An appropriation of $300 for the purchase of a motorcycle to be used in the police department was voted at a recent meeting of the city council, as the result of an appeal made by the Chief of Police.

WESTFIELD MANUFACTURING CO. STRIKES RECORD PACE

(Continued from page 25)

The machine room was next in order, with its trays of small parts, barrel cam end covers, clutch and brake levers, rear axle yokes, fork truss-end yokes which were all-important to the Model T-16. In one corner of this room were handlebars, cylinder castings and gear blanks.

In the automatic room, the party stopped at intervals to admire the monster machines turning out hubs and other parts from five bars of metal simultaneously. This room is the largest of its kind in Massachusetts and the second largest in the New England States. It was with difficulty that the members of the party were induced to move on to the next department—the inspection room—as there is a fascination about automatics which makes one want to keep on watching them indefinitely.

Waiting for the Inspectors' O. K.

In the inspection room were to be seen finished cylinder castings, three-speed boxes, cam case covers, crankcases and gear shafts awaiting the O. K. of the inspectors. Through the wire netting, as one of the store-rooms was passed, could be seen shelf upon shelf of finished 1916 cylinders, pistons and rear hubs with brakes, awaiting assembly, while magnetos in huge numbers stood ready to fit into place. Right outside were several big racks of flywheels.

In the assembling room though, were the parts that immediately suggested the Model T-16 on the road. On one side were rows of new motors, some with cylinder heads and magnetos on, some waiting final equipment. On racks above were finished T frames, easily distinguished from other models by the arrangement for the double spring rear suspension. At the other side of the room were many of these frames on jacks ready to be equipped with oil and gas tanks, and mudguards surrounded them. There were more frames awaiting fitting on the floor.

Lack of time forbade more than a glance at the stacks of tires that reached to the ceiling, at the 12-ton pile of flywheels and the many metal bins of completed parts. Work was going all at full speed in all departments; in the enamelling room, lined with frames in various stages of finish; in the plating room, the polishing room, the testing room and the experimental room.

The Model T-16 appeared to be ready, but as was explained by Mr. Fogarty, it was being held up by some few small but essential parts. Delivery on the material for these is long overdue, but either on the way from the mills or promised for shipment this month. There is no doubt that the delay in putting out the new motorcycle could have been shortened if the company had been willing to accept stock that did not fully meet the rigid specifications of the firm. This the Pope people will never do.

With all the parts along as far as they are, it seems a certainty that when the missing material is received, the Westfield Manufacturing Company will be in a position to put through and ship Model T-16 Motorcyles at the rate of thirty-five to fifty a day. In other words, the shipping date is really in sight, and no one is more anxiously awaiting its coming than the men behind the Pope.

CYGNET SALES ARE MANY AT BOSTON SHOW

Agents From All Over New England Sign Up to Handle Rear Car with Sales Manager Leadley Ogden—Exhibit Was Much Admired

BOSTON, Mass., March 12.—The doors of Mechanics Hall closed last night on the most successful automobile show ever held in this city, according to the statements of the exhibitors. This was in spite of some of the worst weather ever encountered during the regular automobile show season.

The only motorcycle exhibits were those of the Pope models in Paul Revere Hall and of the Cygnet Rear Car in the basement. The Cygnet exhibit, which was in charge of Sales Manager Leadley Ogden, with Harry E. McKay as his assistant, showed Rear Cars attached to Indian, Harley-Davidson, Henderson and Excelsior machines. The roomy, chummy bodies certainly made big hits.

Dealers Signed Up by Ogden

During the show, Mr. Ogden signed up a number of representatives for the Rear Car, among these being W. J. Walker, Boston Harley-Davidson dealer; General Motorcycle Sales Company, Boston Henderson representative; Brockton Sporting Goods Company, Indian agent in Brockton, and H. M. Beach, Harley-Davidson dealer at Waterville, Me. In addition to these contracts were made with the following: Kendall-Winch Co., Harley-Davidson dealer at Bangor, Me.; W. E. Wiswell, handling Indians at Lynn, Mass.; C. F. Jackson, Indian dealer at Manchester, N. H.; H. G. Ramsay, Indian dealer at Uxbridge, Mass.; Flanders & Goodfellow, handling Indian at Barre, Vt.; George Seavey, Haverhill, Mass.; J. F. Kilham, Indian agent at Beverly, Mass.; H. F. Hildreth, Harley-Davidson representative at West Somerville, Mass.; H. G. Adams, Cumberland Center, Me.; Keough & Cartwright, Pope dealers at Dedham, Mass.; F. B. Dawes, Pope dealer at Hudson, Mass.

to Your Every Day Selling

Indian Day is still bringing to the surface some big merchandising lessons that every Indian dealer should consider and continually think about.

Indian Day has conclusively shown what organized sales procedure can do as against spasmodic, hit or miss selling.

Every single move of Indian Day was planned beforehand.

Every bit of material in this Indian Day Campaign was laid out months before, so that it would tie up exactly with the merchandising aim of this most successful selling event.

The motorcycle dealer must no longer regard his store as the only necessary thing for the selling of goods.

His store is merely his central operating point and the selling thought which he carries out from this working basis is what produces the business for him, and creates whatever prosperity he secures.

THINK—ORGANIZE—PLAN!

Find out what other successful merchants are doing. Talk with other merchants continually! Get their ideas! Couple them up and adapt them to your own business. This country is alive with a wealth of selling experience and knowledge.

There isn't any reason in the world why every Indian dealer can't constantly get enough selling inspiration and thought from the merchandising masters of this wonderful country to make his business a splendidly successful undertaking.

Indian dealers have a tremendous advantage this year as a basis for Bigger and Better business. The Indian dealer has the strongest and most complete line ever presented to the American public by the long recognized leaders of the motorcycling and bicycling world.

"INDIAN POWERPLUS"—proven by actual test the superior motorcycle motor of all time!

"INDIAN FEATHERWEIGHT"—the most seasoned leader of the lightweight class—not an experiment—but by its splendid performances on the road a proven leader.

"INDIAN BICYCLES"—by reason of their advanced design, backed by the recognized guarantee which the name HENDEE implies—the fastest and easiest selling bicycle in this country.

Arise to your wonderful opportunities which this—the best selling line obtainable—gives to every Indian dealer.

And remember that never in the history of the country has there been such "good times"—plenty of work, excellent wages—this is, indeed, a tremendously prosperous period, with plenty of wealth about you, GO GET YOURS!

THINK—ORGANIZE—PLAN!

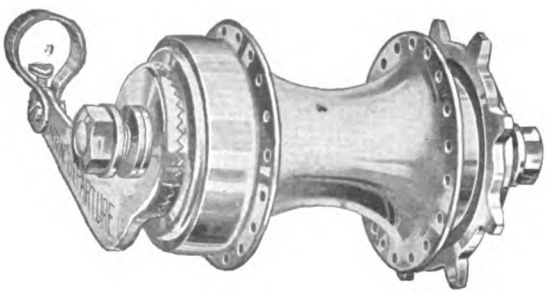
Is a Quality Talking Point for any Bicycle



By reason of its reliability, its durability, its strength, efficiency, handsome design, and high-grade finish, it deserves the good name it has won.

This reputation helps you sell more bicycles in less time and with less selling effort.

It was the New Departure that helped bring the bike back to popular favor among the men and women, boys and girls of today.

Throughout the years, 5,000,000 New Departure Coaster Brakes have safe-guarded 5,000,000 satisfied cyclists in all parts of the world.

This record reflects the quality, the stability, the permanence of the New Departure and points with tremendous emphasis to the fact that the New Departure is the Coaster Brake that will best boost the business of the Bicycle Dealers of this day and generation.

Write us for full particulars

Our interest in the Bicycle Dealer does not end with the knowledge that he is selling New Departures. We would co-operate with you every day in the year with aids to new business, with new plans to help you in your boost for

"A Million Bicycles in 1916"

HOW FRENCH LASSOED AN OPPORTUNITY

Baltimore Dealer Set Up an Original Window Display That Rang the Bell on Bicycle Day and Brought Home the Bacon—Interesting Letters Received From Local Business Men

HOWARD A. FRENCH is of the broad-gauged type of cycle dealer who grabs an opportunity when he sees one and makes it do a tune on his cash register. He saw a big opportunity in Bicycle Day. He realized that the bicycle in Baltimore needed some mighty strong pushing, and that an original window display, with an idea in back of it, was one of the best ways of arresting the attention of the public—one of the best ways of telling the people something that you want them to know.

He got one of his best salesmen on the job. They talked over the idea that the window ought to put across. Having settled that, the salesman—Clarence Mahrer is his name—rolled up his sleeves and got to work. He wanted to make every boy who passed the window feel that the bicycle was just the thing for him. And he was determined to convince every parent who stopped before the window that bicycling was the form of recreation which would yield the biggest returns in health and pleasure for the young folks. The result was the dandy display which you see illustrated on the cover of this supplement.

The display is very simple, the central figure being a life-sized "dummy" dressed in boy scout uniform, mounted on an Iver-Johnson bicycle, which is apparently riding along a country road that can be seen winding away in the distance. The road is cleverly simulated in the window by a path of sand with grass along the sides. The background is painted on a screen and so naturally does the painted road join the "real" road that at night or, when a few feet away, the illusion is almost perfect.

Mahrer has been wise enough not to litter the window with a lot of odds and ends. He draws attention solely to the central figure—the boy scout on the bicycle. Colored electric lights were placed on the rims of the wheels which were kept revolving constantly and thus produced a very striking effect. Mahrer is not a professional window decorator, yet he designed the entire display himself and also painted the road scene on the screen.

That window attracted a surprising amount of attention and brought forth much favorable comment. Mr. French reports that at no time in the past has he sold so many bicycles during any week in February or March as during Bicycle Week.

An interesting commendatory on the display gotten up by Mahrer are the commendatory letters which were received from men in the local trade and also from persons who are not interested in the bicycle business. A few of these letters are reproduced below and will make splendid reading for those dealers who have not yet fully realized the great value of a neat and original window display:

Direct Factory Representatives.
HOLLAND-BADEN-RAMSEY CO.
Automobile Accessories, Bicycles,
Bicycle Sundries, Motor Cycle Supplies.
Exclusively Wholesale.
25 Hanover Street,
BALTIMORE, February 29, 1916.

MR. H. A. FRENCH,
W. Baltimore Street, City.

My dear Howard—In passing your store this morning my attention was attracted to what I considered one of the best Bicycle Window Displays that I have ever seen, and I just want to take this opportunity to congratulate you upon it, and to let you know that it attracted the attention of an "old timer" in the Bicycle Game, and I feel that I am qualified to judge matters of this kind on account of having been in the Bicycle business since the good *Old High Wheel Days*, and have seen window displays from Maine to Florida, and yours should certainly be the means of making the boys take notice of the bicycle.

With very kind regards and best wishes, beg to remain, Yours very truly,

HOLLAND-BADEN-RAMSEY CO.,
WH-JFS. Wm. Holland, President.

Morning—Evening—Sunday
THE SUN.
The A. S. Abell Company, Publishers.
BALTIMORE, Md., March 1, 1916.

MR. HOWARD A. FRENCH,
304 W. Baltimore Street, Baltimore, Md.

Dear Howard—Your window display showing a boy on a bicycle is certainly very unique, realistic, and attractive. I consider the idea excellent and you should be able to do a great deal toward making Baltimore a large unit in the sale of 1,000,000 bicycles this year.

Being an old bicycle enthusiast myself, I was much gratified to see the crowds around your window each time I passed.

I have talked with a number of riders recently and they all feel very optimistic about the future of the bicycle, and it certainly seems to me that the spring of 1916 will again see the bike in its old glory. Very truly yours,

CHARLES O. REVILLE,
LP Automobile Editor.

KNICKERBOCKER CHOCOLATE CO. OF NEW YORK.
Baltimore Office, 216 W. Pratt Street,
Louis Kuethe, Manager.
BALTIMORE, Md., February 29, 1916.

MESSRS. HOWARD A. FRENCH & CO.,
304 W. Baltimore Street, City.
Attention of Mr. Howard A. French.

Dear Mr. French—As I may not see you in the near future, could not resist writing to compliment you on your unique Bicycle Display.

It is certainly artistic, original and attractive, which is best proven by the crowds of interested gazers, that I notice, every time I pass your place of business.

I trust this display will be the means of as many sales as you can possibly handle, the display certainly meriting these results.

Sincerely yours,
LK/B. LOUIS KUETHE.

STOP AND READ THESE LETTERS

They tell what Baltimoreans thought of the fine window display used by Howard A. French & Company.

DR. L. E. NEALE,
822 Park Avenue,
BALTIMORE, Md., March 1, 1916.

HOWARD A. FRENCH,
304 W. Baltimore Street.

Dear Sir—Believing that a good thing should be encouraged, I desire to compliment you on and express my appreciation of the very attractive scene displayed in your show window this week.

I regard it as one of the best I have ever seen and hope the artist who designed it may be afforded every opportunity to develop his very evident talent. Sincerely,

L. E. NEALE.

THE GOODYEAR TIRE & RUBBER CO.
General Office and Factories, Akron, Ohio.
BALTIMORE, Md., March 2, 1916.

H. A. FRENCH & CO.,
307 W. Baltimore Street, Baltimore, Md.

Subj: National Bicycle Day, Window Display.

Gentlemen—In passing your place of business today, the writer's attention was very forcibly drawn to your window display which celebrates "National Bicycle Day."

The writer has never seen anything that more forcibly depicts the spirit of bicycling, as does this display. The background and floor of the window are an absolutely natural reproduction of a very beautiful countryside, and the imitation work on the wayside gives it even more lifelike appearances.

The wheels that are set in motion by the ingenious electric device with the lighted electric lamps within the revolving wheels, could not fail to attract the attention of all passersby.

No details have been overlooked in this display, and it certainly lives up to the slogan: "One Million Bicycles for 1916." Yours very truly,

THE GOODYEAR TIRE & RUBBER COMPANY,
A. E. Hertzig, Manager.

THE BALTIMORE NEWS
February 29, 1916.

MR. HOWARD A. FRENCH,
304 W. Baltimore Street, City.

Dear Mr. French—Your window display of the figure on a bicycle is certainly striking.

You have been clever enough not to fill your window with a lot of junk that would detract from the article which you wish to display most prominently.

The lighted wheels turning, excite considerable attention in the day time, and even at night the appearance is intensified when darkness comes on.

The grass and the gravel path are as near nature in appearance as it is possible to reproduce it without actually planting seed in the ground—and I am writing to tell you this, as in my mind it is one of the cleverest and most attractive window displays we have had here for a long while.

Very truly yours,
J. THOS. LYONS,
JTL/MWB Asst. Advertising Manager.

WHAT THE MANUFACTURERS AND DEALERS ARE DOING

Yep! Returns Were Great

Now for Some Stiff Plugging

EVERLASTERS GOING TO HAWAIIAN ISLANDS

KOKOMO, Ind., Mar. 14.—"We were very much gratified," wrote Edwin F. Merry, the Pacific Coast representative to the Kokomo Rubber Co., recently, "to receive an order this week from our Hawaiian Islands agents for 115 pairs of Kokomo tires, 105 pairs of which were the Everlasters. This surely speaks well both for the tires and our Hawaiian Islands representatives."

The Everlaster bicycle tires are about the highest-priced tires on the market, and the Kokomo Tire Co. was happy to learn that quality is appreciated in some places abroad as well as at home.

SMITH MOTORWHEEL OUTPUT TRIPLED IN FEB.

MILWAUKEE, Wis., Mar. 14.—The A. O. Smith Company announces that it has shipped during February three times as many motor wheels as during the same month last year. The makers of the "bicycle booster" expect to produce 25,000 motor wheels in 1916. Nearly 40 new dealers were added during February, while 169 agents renewed their contracts. The present list of motor wheel dealers in the United States and Canada is now close on to 1,800, and General Manager W. V. C. Jackson is bending every effort to bring this number up to 2,000, before the active buying season commences.

Among the new motor wheel dealers recently signed up are the following: Potter Company, Syracuse, N. Y.; J. W. Megee, Tulsa, Okla.; C. F. Braunlich, Wheeling, W. Va.; Wyman & Anderson, Mayfield, Ky.; Tom Bird and the Autocycle Co., St. Paul, Minn.; Frank Wheaton, Kalispell and Frank Prince, Lewiston, Mont.; H. A. Parker, South Haven, Mich.; W. J. Pettee & Co., Oklahoma City, Okla.; Excelsior Cycle & Supply Co., Dodge City, Kan.; Dixon Hardware Co., Cleburne, Tex.; W. M. Zeigler, Eunis, Tex.; A. G. Shurman, Greenville, Tex.; Fred Williams, San Angelo, Tex.

HICKEY IS PROMOTED

LOUISVILLE, Ky.—R. E. Hickey, formerly manager of the Dow Wire & Iron Works' downtown store, is now with the jobbing sales force at the firm's factory. John Casey, formerly connected with an electrical supply house, is in charge of the sales store. The Dow firm is a jobber and dealer in cycle supplies.

GOLDMAN TAKES IVER JOHNSON

NEW YORK, N. Y., Mar. 14.—M. J. Goldman, of 115 Greenwich avenue, has taken on the agency for the Iver Johnson bicycle, having already received his first shipment of twenty machines from the Fitchburg factory. Goldman also handles the Pope line of bicycles and the Pierce.

PURNELLE MOVES STORE

BOSTON, Mass., Mar. 14.—R. E. Purnelle, whose bicycle store was located for several years at 22 Broad street, has added a hardware department and moved to larger quarters at 55 Broad street.

BECKWITH OPENS SUPPLY HOUSE

BOSTON, Mass., Mar. 14.—S. J. Beckwith & Co., has just opened a large bicycle and cycle supply store at 120 Washington street. This concern has landed the Boston agency for the Pierce and Reading-Standard bicycles.

GLIESMAN SELLS 3,044 BICYCLES IN A SINGLE DAY

NEW YORK, March 13.—H. A. Gliesman, the genial and always-on-the-job traveling representative of the Miami Cycle & Manufacturing Co., has just returned from a trip through Virginia with a pocket full of orders and a renewal supply of sales optimism.

Gliesman celebrated Bicycle Day by hanging up what appears to be a bicycle sales record. In one day, after his return to New York, he took orders for 3,044 bicycles, 275 coaster brakes and three Miami Power Bicycles. All this business was obtained from three jobbers and two dealers.

The estimated retail value of the 3,044 bicycles is $97,408, and allowing for three dollars' worth of accessories to each machine—a conservative estimate—there will be an additional $9,132 worth of business. This gives a total retail value of $106,540 for the orders signed by the indefatigable Gliesman in a single day.

If that does not stand as a sales record, Gliesman would like to have someone show him figures to the contrary. That's all.

NEW CATALOGS ISSUED BY HUB CYCLE CO.

BOSTON, Mass., Mar. 14.—The Hub Cycle Co., 14 Portland street, of this city, is ready to distribute its new 250-page catalog, describing fully the lines of bicycles, bicycle tires and supplies handled by this company. Part of the catalog is devoted to motorcycle tires and accessories. Three of the Hub Cycle Co.'s leading bicycle lines—Pierce, Reading-Standard and Princeton—are well illustrated, and special brands are attractively shown. A smaller bicycle and tire catalog is also being issued to dealers.

ST. LOUIS CYCLING CLUB ELECTS OFFICERS

ST. LOUIS, Mo., Mar. 14.—At the March 9 meeting of the St. Louis Cycling Club, W. J. Rodgers was unanimously elected president; Fred W. Hunicke, who was treasurer for the past four years, was chosen vice-president, while L. M. Stringer was made treasurer, Waldron Martin road captain, George Henry and A. Dietrich first and second lieutenants, respectively. Reports were read by the various committees and officers, and the club discussed at length the new bulletin which is to make its first appearance before the April meeting. The captain announced that he had a surprise in store for the boys in the form of ten new stopping places to which runs will be called this season.

ANNUAL C. R. C. A. BANQUET

NEW YORK, N. Y., Mar. 14.—The annual banquet and re-union of the Century Road Club Association will be held at the Broadway Central Hotel on Saturday evening, March 25. This will be the sixteenth annual banquet. Last year ninety-five members and guests attended the affair. Reservations are now being made and a cordial invitation is extended to all cyclists to be present. Communications may be sent to Sylvain Segal, 110 Greenwich avenue, New York City, who is a member of the committee in charge of the banquet.

WESTERLY CLUB HOLDS ITS 25th ANNUAL MEETING

PROVIDENCE, R. I., Mar. 14.—The twenty-fifth annual meeting of the Cycle Club of Westerly was held last week at its club rooms, with a large number of members present. The treasurer's report showed the club to be in splendid financial condition, and from the speeches made indications are that unusual interest will be taken in cycling this year.

The following are the new officers: President, David S. Myers; vice-president, John Payne; secretary, F. Earle Babcock; treasurer, Elmer E. Babcock; captain, Charles T. McSparren; bugler, Daniel Crandall; Entertainment Committee, Frank Ahern, Everett Taylor, Daniel Crandall, John Sutcliffe and John Brophy; Board of Directors, the president, vice-president, secretary, treasurer, captain, Harry Crandall and E. E. Palmiter.

DESIMONE WINS RACE AT SECOND "SPORT NIGHT"

NEW YORK, N. Y., Mar. 14.—Anthony Desimone, the Interclub League home trainer champion, showed his superior ability as a cyclist at the second "Sport Night" of the Unione Sportiva Italiana, held on March 9, when he captured the half-mile match style home trainer race from a field of ten riders. The race was run in five heats, two semi-finals and one final, with the winners of the four fastest heats to qualify in the semi-finals. The summaries:

PRELIMINARY HEATS.

Winner.	Time.
1—A. Desimone—N. Johnson	:32⅕
2—P. Giordano—J. Mossuti	:36⅕
3—T. Bello—G. Harvey	:32⅗
4—J. Alfonso—E. Mullin	:34
5—A. Ferrero—C. Buscaglia	:36⅕

SPECIAL HEAT.

P. Giordano—A. Ferrero	:36⅗

SEMI-FINAL HEATS.

1—A. Desimone—P. Giordano	:34⅘
2—T. Bello—J. Alfonso	:33

FINAL HEAT.

Anthony Desimone—Tom Bello	:31⅘

WILL HOLD NATIONAL MOTOR WHEEL RACING DAY

MILWAUKEE, Wis., Mar. 14.—A national Smith motor wheel racing day has been decided on by the A. O. Smith Company, when motor wheel dealers throughout the country will stage races for the owners of "bicycle boosters." The exact day will be announced later. The plan now contemplated is to have each dealer conduct a race in his town and report the results to the company, which has hung up two prizes in the form of silver loving cups—one for the rider making the best time, and the other for the dealer having the largest number of entries. The age of the rider and the population of the town will be taken into consideration in awarding the prizes.

DANCE HALL STAGES RACE

DETROIT, Mich., Mar. 14.—The general publicity being given the bicycle in this city has led one of the local dancing halls to hold a Bicycle Revival Night on March 8. After the dancing a race was staged at five miles, in which eight riders participated, the bicycles being borrowed from the Addison Cycle Company, Excelsior agent. In return for this courtesy the dealer was permitted to display a banner in the hall, which bore his name and address, together with an announcement that the bicycles used were furnished by him.

OPENS NEW QUARTERS

LOUISVILLE, Ky., Mar. 14.—Clarence Fisher is now busy fitting up a new bicycle shop and store at 808 South Preston street, where he moved last week after having been at 403 East Broadway for several years.

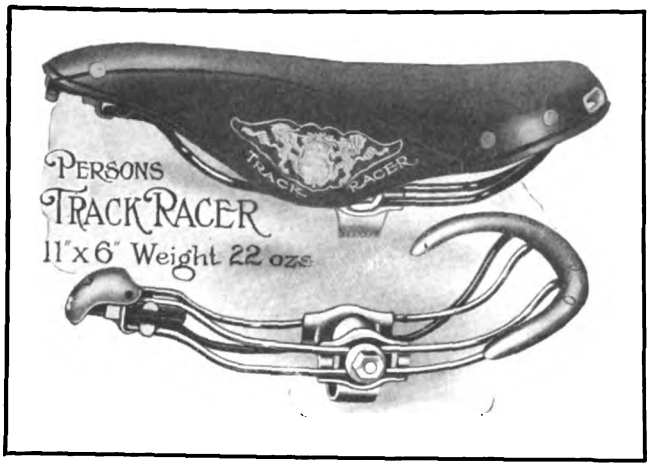
"TRACK RACER," A NEW PERSONS SADDLE

Four Springs Are Used in the Framing, Affording Lighter and Stronger Saddle—Tension Screw For Adjusting Tension of Leather

WORCESTER, Mass., Mar. 15.—Complying with the needs of the many racing men throughout the country, who are expressing their intention of getting back in the game earlier and stronger this spring than ever before, the Persons Manufacturing Company, of Worcester, has brought out a new saddle called the "Track Racer," which incorporate many up-to-date features.



This new saddle contains certain original Persons details of construction, which are the embodiment of such advice as furnished by Frank Kramer and other riders of international fame. Thus, to secure lightness four springs are used, instead of two, in the framing, so that their strength may be distributed and carried to the points where most needed. The lower springs spread abruptly at their rear and run to the widest part of the cantle, thereby making the saddle rigid and capable of always resisting side thrust.

The pommel is a light and of highly improved design, being formed of a special sheet steel, triply reinforced at the portion through which the tension screw passes for added strength, and is annealed to remove all strains therefrom and make breakage impossible. This steel pommel is attached to the leather by the use of solid copper harness rivets, nickel-plated and hand set. The Persons Manufacturing Company is the only American saddle maker to use these rivets, and claim that there is but one other saddle in the world on which they are used, this being of English make.

The tension screw, allowing adjustment of the tension of the leather, is made of 7/16-inch diameter stock, both sides of which are milled concave for lightness as well as to prevent any tendency of the front of the saddle to rock to one side or the other, or get out of line.

The four springs pass endlessly through an improved clip at the front end, and this clip also acts as retaining aperture for the tension screw, a construction combining lightness, strength and rigidity.

The clamp, as shown in the illustration, is fitted with side plates two inches long, and these add greatly to the strength of the springs and rigidity of the "Track Racer."

The tops are formed dome-shaped at the rear, and the cantle ends drop considerably lower than is indicated by the illustration, the sides of the seating surface being one and one-half inches lower than the center. The tops are made from a special leather of which the Persons company had had a quantity in tannage for many months past, the hides having been carefully selected for this particular model. The texture is soft, yet tough, and is guaranteed to neither stretch nor to lose its shape.

EVERLIT LAMP HAS ALL ITS PARTS ACCESSIBLE

EDWARD MILLER & CO., of Meriden, Conn., are producing the Everlit bicycle lamp shown in the illustration. This lamp, which burns kerosene oil, is 5¾ inches in height, and weighs 13 ounces complete. It has a hinged front door with 2½-inch convex lens. The oil font is fitted to the lamp body with a bayonet joint, ensuring easy removal for filling. The wick is flat, and is regulated by a knurled button from the exterior of the lamp. All parts are readily accessible.

Right and left colored jewels are fitted to the cylindrical body. There is a rear bracket for flat or tongue connection to the machine, a neat springing device being incorporated. The draft arrangement is such that the lamp will stay lighted in the strongest wind. The finish is full nickel. The Miller firm also produces the well-known Miller, Juno and Vestal lamps.

TOBEY REPORTS PROSPERITY IN ARIZONA

LOS ANGELES, Cal., Mar. 14.—C. Tobey, who is setting the same fast pace in his work as salesman for C. L. Smith, the local jobber, as he did when he kept his Pope among the leaders on the speedway, is making monthly trips through Arizona, with fine results. Returning from one of these trips last week, he gave a glowing report of the prosperous conditions in that State. The mines are more active than ever and wages are high—even the muckers are making $5.35 per day.

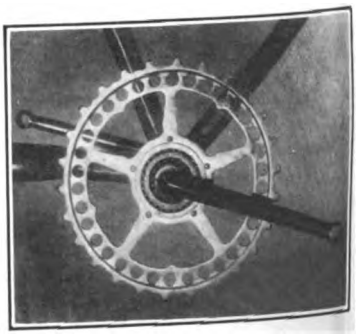
On his recent trip Tobey placed agencies for the Great Western line of bicycles, which C. L. Smith distributes in the Southwest, with Stewart & Templin, a large company, located at Phoenix, and also covering the towns of Glendale, Tempe and Mason. J. B. Buck's Cycle Shop will handle the Great Western exclusively at Tucson, while Moses Klein has signed up for this line at Douglas. The new Great Western agency at Yuma, Cal., was placed with Paul R. Hobby.

NEW CYCLING CLUB FORMED

PATERSON, N. J., Mar. 14.—The organization meeting of the Triangle Cycling Club was held in the club's quarters at the Federal Building last week. Joseph Dabaghian was chosen president; Charles Simone, vice-president; Mars De Gast, secretary, and John Cooke, treasurer.

GIRARD HANGER ELIMINATES SIDE DRAFT

IN order to overcome side draft on the crank hanger of a bicycle, A. L. Girard, of the Girard Cycle Company, of 140 North Fourteenth street, Lincoln, Neb., has patented and is now marketing a device known as the Girard Duplex Crank Hanger. This hanger has several ingenious features in its construction, and these features, says Mr. Girard, entirely eliminate the draft and its resulting unnecessary friction and interference with the free running qualities of the cycle.



There are two separate bearings on the sprocket side of the hanger. The sprocket is mounted on its own bearing independently of the crank bearings. The crank is fitted with a lug loosely engaging in one of a series of holes in the sprocket, and although each individual member has its own bearings, they combine and do the work of one bearing.

The Girard Duplex Hanger makes a strong appeal to the rider who desires an easy operating wheel. Further information can be had from Mr. Girard, care of the company at Lincoln, Neb.

THREE STAR RIDERS DESERT THE OUTLAWS

NEWARK, N. J., Mar 14.—Reggie McNamara, Bob Spears and Frank Cavanaugh, three of the best riders who competed in the outlaw six-day grind in Chicago, have deserted the outlaw movement and applied for reinstatement in the National Cycling Association. Their application will be considered this week. With these three cyclists endeavoring to crawl back into the fold, it is generally conceded that the backbone of the F. A. C. is broken.

Joe Fogler and Jack Clark, who did not ride in Chicago, but were supposed to be in sympathy with the F. A. C., have joined hands with the local velodrome management. Alfred Goullet, the president of the Cycle Racing Men's Union, denied that he considered asking for reinstatement, and declared that he would stick to the outlaws.

Last week it was rumored that a track would be constructed for the outlaws at Belleville, but the property owners of that town object to having a velodrome in their midst.

At a meeting of the F. A. C. held here last night, Harry Pollock, the Newark fight promoter, announced that he would proceed immediately with the erection of tracks in Brooklyn and the Bronx.

Dissension is said to be splitting up the ranks of the outlaws. A number of riders are reported to be dissatisfied with the results thus far secured by the F. A. C.—or, rather, the lack of results. Tracks galore were promised, but none have actually been constructed yet.

The management of the Newark Velodrome has already secured a number of new foreign riders for its track, and will stage the opening meet as per schedule on April 2. With the cream of the outlaw riders now practically back under N. C. A. colors, the local promoters expect no trouble from the outlaws.

A PROSPEROUS BUSINESS CATERING TO SOCIETY

Bicycles for Hire at One of the Palm Beach (Fla.) Hotels

PLAN TO STAGE 100 ROAD RACES

Worcester Manufacturers Are Asking for Co-operation in Securing 100 Sets of Prizes for Events Which Will Be Held All Over Country

WORCESTER, Mass., Mar. 14.—James W. Grady and William P. Farell, of the J. W. Grady Company, and Charles A. Persons, of the Persons Mfg. Co., have launched a movement for securing one hundred sets of prizes which will be hung up for as many races, to be held in cities throughout the country where the local cyclists are organized. This project has already been taken up with the "One Million Bicycles Committee."

An effort will be made to obtain one hundred bicycles as first prizes, and to get as many manufacturers and jobbers as possible to contribute some of their products as prizes. To show their willingness to assist, the Worcester men will do their share. Mr. Grady and his partner will donate 100 pairs of bicycle tires, while Mr. Persons will offer 100 saddles. Speaking of this movement, Mr. Grady said:

"The plan is to have a road race in every city and town where local organizations will promote it. The clubs in the city where the race takes place would have only to make arrangements such as furnishing officials, policing the course and the like. The prizes will be furnished and handicapping done by the general committee in charge. The idea is to have every race a handicap race because in a handicap road race every rider has as good a chance to win as any other rider.

"There would be a prize for every rider who finishes and maybe two and three for some of them. It is our plan to insure at least 50 prizes for every race, and that is why we are seeking donations in lots of 100. It will be done on a big scale.

"We are willing to do our share. My firm will give 100 tires, the best we have in the place. Mr. Persons will give 100 of his best saddles. When the race is being arranged in the different cities, of course, the dealers and men who are benefited by an increase in the business would lend assistance. When the race is arranged for Worcester, we would further contribute to sustain the reputation of the city in a project which has nation-wide dimensions.

"There is unusual interest in bicycling this year," continued Mr. Grady, "and we will certainly have a race in Worcester and we plan to make it one of the biggest road racing events in the East."

CANADIAN "BICYCLE WEEK" BEGINS MARCH 27

TORONTO, Ont.—At an important conference of Canadian bicycle manufacturers, jobbers and members of the Bicycle and Motorcycle Dealers' Association in Toronto on Thursday evening, March 2, it was definitely decided to hold the Canadian bicycle sales campaign during the week of March 27, and special features are to be staged on a co-operative basis in Toronto, Hamilton, Ottawa and Montreal. The representatives of the trade present appeared highly enthusiastic over the sales campaign.

Among other things, the association decided to ask the newspapers to establish a bicycle section in their issues of the week, and one Toronto daily, the *Daily News*, plans to have a two-page department the Saturday preceding the special week.

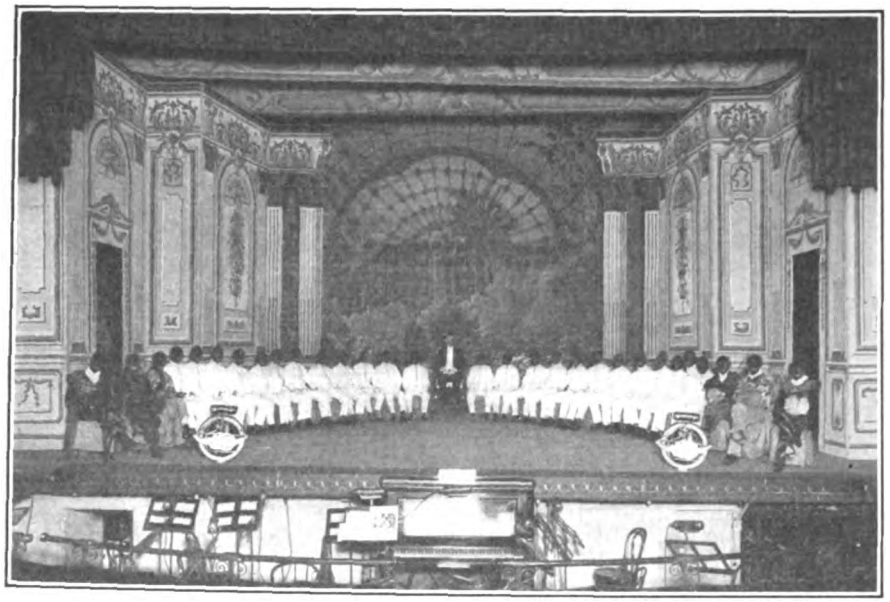
SMITH MOTOR WHEEL MINSTRELS PERFORM



Flashlight Taken During the Minstrel Show Staged by A. O. Smith Co. Employees, at the Pabst Theatre, Milwaukee, Wis., on March 6

HOW BAIRD GOT 563 NEW PROSPECTS

THE February issue of the *Tire Merchant*, the house organ of the Continental Rubber Works, Erie, Pa., makers of Vitalic Tires, contains the following interesting letter from Roy J. Baird, a bicycle dealer of Newark, N. J., in which he describes a clever stunt that secured 563 prospects' names and addresses:

"December 15 last I set up in my window a Dayton Bicycle, equipped with Vitalic Tires, inserting in the spokes red and green cards set diagonally. I then concealed an electric fan in a small box, the front of which was covered with wire cloth, placing the box in such a position that the air currents would play upon the cards and rotate the wheels. The box was decorated with accessories and made a neat appearance. The wheel ran eight hours per day for ten days, making 80 hours of actual running, and the mileage was recorded by a cyclometer with the glass painted to hide the figures. People were invited to register a guess on the number of miles the wheel would run, and suitable prizes were offered the winners.

Still Blowing the "Booby Prize"

"Five hundred and sixty-three boys and girls, men and women, registered their names and addresses and placed a guess in a box. These guesses ranged from 290 to 15,000 miles, the majority being from 350 to 430. The actual mileage was 390.2 miles, the nearest correct answer being 392. The 'Booby Prize,' a small whistle, went to a small Italian lad, and the last we heard from him he was still blowing for Baird. High school and college boys spent many evenings in front of the window trying to work out the problem mathematically, and great was the interest they created.

"The contest cost me in prizes about $11.60 and 80 cents for electricity, so you see $12.50 will cover all costs. I consider the advertising I received from this at over four times that amount. I can already trace the sale of six pairs of Vitalic Tires absolutely to this advertising, and of course many other sales were made that came from this publicity.

"I am getting up a circular letter to send to these 563 names, and intend to mail it in the early spring when people are thinking of the bicycle. I mean to use this list in every way possible and am confident the nature of my business will be firmly entrenched in the minds of the people before the summer is over. I look for a splendid harvest this season as the result of this work."

KEEN INTEREST IS SHOWN IN FRISCO'S BIKE DAY

SAN FRANCISCO, Cal., Mar. 12.—Though the celebration of Bicycle Day has been put off until March 25, because of the bad weather here, interest continues at a high pitch in the many features which will boost the bicycle forcibly in the Bay City. As the result of a temporary organization of the dealers and jobbers here more than $600 in prizes have been hung up for the sixteen bicycle races which will be held at the Park Stadium.

Prior to the racemeet a parade, in which more than 6,000 cyclists are expected to participate, will be held through the Golden Gate Park, headed by a band and police escort. Some of the leading business and professional men of San Francisco have promised to appear in the line, dressed in regular riding costume. Officials of the day will be racing men who starred in the early days of bicycling. Edwin F. Merry, the local jobber, has been working hard and with much success in persuading Frisco's leading citizens to take part in the celebration of Bicycle Day. He found that men like Judge Kerrigan, of the Appellate Court, were enthusiastic cyclists in their youth and are only too glad to climb on the boosters' stand. Splendid support is being given by the San Francisco press.

FRISCO BICYCLE NEWS

SAN FRANCISCO, Cal., March 13.—Local bicycle riders were surprised recently to see a man riding along the streets of the city on a unicycle. He was George Mitchell, who had just completed a trip of 675 miles, from San Diego to the metropolis, on his single wheel mount. He used United States tire, which gave efficient service during the five weeks required to make the journey. Mitchell carried a letter from the mayor of San Diego to the mayor of San Francisco.

Chas. Baxter, who for the past five years has been a salesman for the Bean & Son Company, Pierce bicycle distributor, has opened up a store of his own at 633 North First street, San Jose. Baxter is a member of the Garden City Wheelmen, and knows the bicycle sport and trade thoroughly.

The New Century Wheelmen held their annual ball and home trainer contest on the evening of March 2, at the Mission Turn Hall. A large crowd attended the affair. The New Century boys won the race, the victorious team being composed of W. Rhodes, L. Drury, M. Castillo and R. Welsh.

200 SOLD IN CAPITOL CITY

WASHINGTON, D. C., Mar. 14.—Although handicapped by unfavorable weather, the bicycle dealers of this city report the sale of over 200 bicycles during Bicycle Day week. It is conceded by all dealers that not more than ten per cent. of this number of bicycles would have been sold at this time of year under ordinary conditions, and all the dealers attribute this success to the special displays and co-operative advertising which were used by them at a small cost.

THIRD STORE FOR MUNGERS

WASHINGTON, D. C.—Munger Brothers, a well-known firm of bicycle dealers in this city, have opened a new store at 824 Ninth street, N. W., in the heart of motorcycle row. This makes the third of the firm's chain of stores, the first being at North Capital and H streets, opposite the Government Printing Office, and the second at South Carolina avenue and Third street. The three brothers comprising the firm have built up a splendid business by steady and persistent hard work. They handle the Pierce, Miami and Racycle bicycles.

198 DEALERS IN NEW YORK

NEW YORK, N. Y., Mar. 7.—There are now 198 dealers in the state of New York, outside of New York City and Brooklyn, handling the Smith Motor Wheel. A great deal of this increase is due to the personal sales efforts of "Billie" Cahn, who has taken to the road this year, representing A. O. Smith Company.

Digitized by Google

MORE REASONS WHY BICYCLE DAY WAS A SUCCESS

1. Riders competing in a home trainer contest staged in the window of the Goodyear Tire & Rubber Company's San Francisco branch. 2. An old high wheeler stirred the curiosity of those who stopped before the window of C. C. Pugh's Great Western Bicycles Agency at Terre Haute, Ind. 3. This gives an idea of the crowd that was drawn to the Goodyear window in San Francisco while the home trainer contest was going on. 4. Special window decoration featured by the Firestone Tire & Rubber Company's Philadelphia Branch. 5. An original display gotten up by the Remelin Company, Cincinnati, O. 6. Another Firestone window at the Buffalo branch of the company. 7. Start of the big Bicycle Day at Birmingham, Ala., the first event of its kind held there in many years.

NEW FISK STATION

MARINETTE, Wis., March 7.—Work has been started on the remodeling of the Risdale block in this city for a Fisk service station, which is to be opened in about a month under the direction of the Milwaukee branch. It is estimated that a stock of more than $10,000 in rubber goods will be carried here.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

Tenth Installment

When Kramer returned from Europe in the summer of 1906, he rode in but a few races and had rather an easy time retaining the championship.

FRANK KRAMER, on his return from Europe in 1906, hied off to Salt Lake City, where he took three out of four match races from Iver Lawson. These events were equivalent to national title affairs and Kramer was acknowledged by all as the champion of the United States for 1906, making the sixth successive time that he captured the title. Racing was on the wane in Newark when Kramer arrived home from Europe on July 10, and after riding at one race meet in Newark, he packed up his grip and set forth for Salt Lake City where practically all of the stars were competing.

Lawson Had Barrels of Speed

In the Mormon City, none of the riders classed with Kramer and Lawson. Lawson had barrels of speed, while "Big Steve," who had had a highly successful season on the other side of the water, was just as good as ever. This made match races between these two cyclists a great magnet, and every time they rode the Palace track was jammed.

On Kramer's first appearance in Salt Lake City he was beaten by Lawson in a one-mile match race. There were three more races ridden after that, and on each occasion Frank flashed over the tape a winner. The one race that Lawson won was questionable. Lawson cut down on Kramer in taking the lead and the papers in Salt Lake City "roasted the tar" out of Lawson for his unfair tactics. Whereupon Iver became a very much peeved individual and would not ride against Kramer for some time. Finally after a delay of two weeks they were brought together again and Kramer won an event at two miles. Three days later Frank proved his superiority by defeating Lawson in a mile and a three-mile match race on the same night.

Wildly Cheered by Crowd

Although Kramer arrived home on July 10, he did not mount his wheel for competition until Sunday, July 22, when he showed that he still possessed all of his old time speed. His appearance on the track was the occasion for a great burst of applause from the spectators, although it was far from being a regular old Vailsburg crowd.

Kramer rode in the half-mile open which he won with ease, beating out Floyd Krebs, Alfred Ashurst and Eddie Rupprecht. He was also entered in the five-mile handicap, but after he rode a couple of laps his saddle post became loose and he had to quit. This was the only race that Kramer rode in Newark in 1906. He then made off for Salt Lake City and on Tuesday night, August 14, competed against Iver Lawson.

Lawson won the first race from Kramer by three lengths. This event drew a crowd of 4,000 spectators who paid double prices to see the speedy cyclists perform. There was a lot of jockeying for position at the start of the race, but Lawson finally forced Kramer to go out and take the lead. For six laps Kramer, ever watchful of Lawson's movements, led the way, but coming around the turn on the seventh lap, Lawson sprinted. He shot by Kramer like a flash, but in doing so interfered with the champion, cutting him down. Kramer set sail for the flying Lawson but was unable to overcome the lead and Iver finished three lengths to the good.

Was Not a Sore Loser

Kramer took his defeat without complaint. After the event was over he said: "Just say, Lawson caught me unawares and beat me fairly and I have no kick to make of any kind." When asked if he was not cut down by Lawson, Kramer replied: "Well, I am not a sore loser and do not care to discuss it."

Lawson and Kramer were carded to meet again on the following Friday, but Lawson, because he was criticized in all the papers for his unfair tactics, refused to go on against the champion. There were about 4,000 people on hand and Lawson was hissed, hooted and jeered for refusing to ride against Kramer. Hardy Downing was substituted and was easy for Kramer.

After a delay of two weeks the mutual friends of Kramer and Lawson finally succeeded in getting the riders to meet again. It was then announced that three match races would be run to decide the better rider.

The first was staged on Tuesday night, August 28. Kramer defeated Lawson in a two-mile race before 5,000 spectators. The conditions of the race stipulated that the riders be paced until the second lap from home. Lawson followed the pace maker and Kramer rode second. A lap and one-half from home the champion began his fight and for a full lap the men struggled neck and neck with Kramer riding high on the bank in an effort to get by. Lawson switched Kramer high up the board in an effort to stave him off, but Frank stood the "gaff" through superior strength, and while coming to the stretch Lawson began to tire. Turning into the home stretch, Kramer made his final jump—he shot by the Swede and led him over the tape while the spectators roared their applause.

IVER LAWSON
He again was Kramer's chief opponent for the National Title in 1906

The next Friday, Kramer made a clean sweep over Lawson in the final of their series of match races. He defeated Lawson in the first race at one mile, and the second at three miles.

Won by Division of Judges

The mile was the first race on the program and it was by far the better of the two. The finish was so close that the big crowd of spectators were about evenly divided as to who had won and Kramer got the verdict only on a division of the judges. Lawson had the lead on the pole when the pacemakers dropped out two laps from home with Kramer on the outside. Kramer and Lawson came down the stretch neck and neck, almost to a dead finish. Two of the judges favored Kramer, as did the majority of the crowd, but one said he thought Lawson had won, and about one-third of the spectators thought as he did.

Lawson Sulky Over Ruling

Although the ruling was just without a doubt, Lawson was sore and for over an hour refused to ride the next race. After considerable persuasion, he came back on the track. This time Kramer took no chances. He secured the pole and held it to the finish. When the pacemakers quit, the East Orange boy went out and Lawson fell in behind until a half lap from home. Here Lawson made a bit for the lead, but Kramer fought him off and Lawson fell behind again, trailing Kramer to the finish mark. This ended Kramer's successful campaign in Salt Lake City and the next day he started for his quiet home in East Orange.

(To be continued)

MORAN IS LIVE ONE

ASHTABULA, O.—J. C. Moran, handling the Miami and Pierce bicycles, is one of the livest cycle dealers in this city. His chief delight is to stage bicycle club runs. On Bicycle Day he ran a full page advertisement in both of the Ashtabula papers and also had 5,000 extra copies of the ad. struck off. These were handed to the workmen as they left the factory on the evening of February 29.

Moran also handles the Harley-Davidson motorcycle and the Cyclemotor in Ashtabula.

FROM REPAIRMAN TO STATE DISTRIBUTOR

Describing the Steady Rise of B. A. Swenson, of Providence, R. I., From Small Cycle Business to Control of Indian Sales in Lower New England

By WILLIAM L. STRONG

FIRST IN A SERIES OF SUCCESS STORIES ABOUT DEALERS

THERE is probably no motorcycle man in the United States who has not heard of B. A. Swenson, "The Indian Motorcycle Man" of Providence, R. I. Swenson was also known as the "Terrible Swede" when he was one of the best endurance riders in the country. The name of Swenson is practically synonymous with the word motorcycle.

B. A. Swenson is an example of the self-made business man; a type which only reaches the top of the ladder of success by persistence and good, hard work. From a modest beginning, Swenson has built up a business which possibly exceeds any other of its kind in any city of like size in this country. In fourteen years of bicycle and motorcycle selling he has between 3,000 and 4,000 sales to his credit.

Start in Cycle Business

Swenson's son, Eddie, then a baby, was the cause of his entering into the business end of the motorcycle field. He had previously been an employee in various lines, but with the coming of the son, B. A. hired a place on Prairie avenue for $3 a month and repaired bicycles and soon branched out to a store renting at $25 a month. He put in a small stock of bicycles as a starter. This was in 1902-1903, and since that time Swenson has built a four-story structure and a two-story building at 522 Broad street. He occupies this now and can increase this by five stories if need be.

When asked to what he owes his success, Swenson replied that success comes with fairness to customers. "Make no misrepresentations, and don't permit your salesmen to do so," says Swenson. "Make the same statement every time you make it. Back up everything you say, and above all, if things go wrong, right them."

His Early Career

B. A. Swenson was born in Skane, Sweden. He came to this country when sixteen years of age and worked in a general store for about six months. For the two years following he cut velvet in a fabric factory. Being naturally a mechanic he entered the employ of Corp Brothers in Providence and soon was made foreman of the bicycle repair department.

Swenson stayed with this firm for seven years. He married in 1900 and soon after hired a small place on Prairie avenue for $3 a month, working in the evening repairing bicycles. With the advent of Eddie, B. A. branched out and took a store for which he paid $25 a month, stocking a number of bicycles. He sold wheels until the spring of 1903, when his first motorcycle customer appeared.

Starting In with Motorcycles

This customer wanted a motorcycle badly. He left money with Swenson to buy one, which Swenson promptly did. Three bicycle customers appeared later in one day and left money for motorcycles. After this, Swenson took the agency for the Indian, the machine he sold to his first customer. He has sold Indians ever since.

His business grew steadily, chiefly because of his fairness and his ability to do repair jobs. In 1906 he found that more room was needed, so he purchased a lot on which he put up a four-story building. Using the lower floor for motorcycles and bicycles he rented the upper floors as apartments. Six years later, Swenson had an opportunity to buy another lot at 522 Broad street. He purchased it; ground was broken in January, 1912, and in June he occupied it as a repair shop and sales-room on the first floor and as a club-room on the second floor. This is the site of his present business.

B. A. Swenson

Work His Recreation

During those early days, B. A. formed habits which have never deserted him. If he was called out at 6 a. m. to repair a machine he did it. If he was summoned at midnight to sell a bicycle he came out on the jump. Work has been, and is now, his principal recreation. His chief sport is riding his motorcycle, although he occasionally draws out the rod and line for a day or two in the Spring.

Swenson states that constant plugging, temperate habits, publicity through various motorcycle contests and the general promotion of the motorcycle interests of all fans, whether they ride his goods or not, have built up his business to where it is today and that these will make for success for any dealer. That he has stuck closely to his business is proved by a story told of him that he and Mrs. Swenson went on their honeymoon ten years after he entered business for himself. On this occasion they took an eight-weeks' trip to the Swenson home in Sweden.

The Social End

As an argument for boosting the motorcycle, Swenson holds that there is nothing greater than runs, picnics and contests, given from time to time. A bottle of pop and a Frankfurter at the end of a trip, or a cup at the finish of a contest are things

Digitized by Google

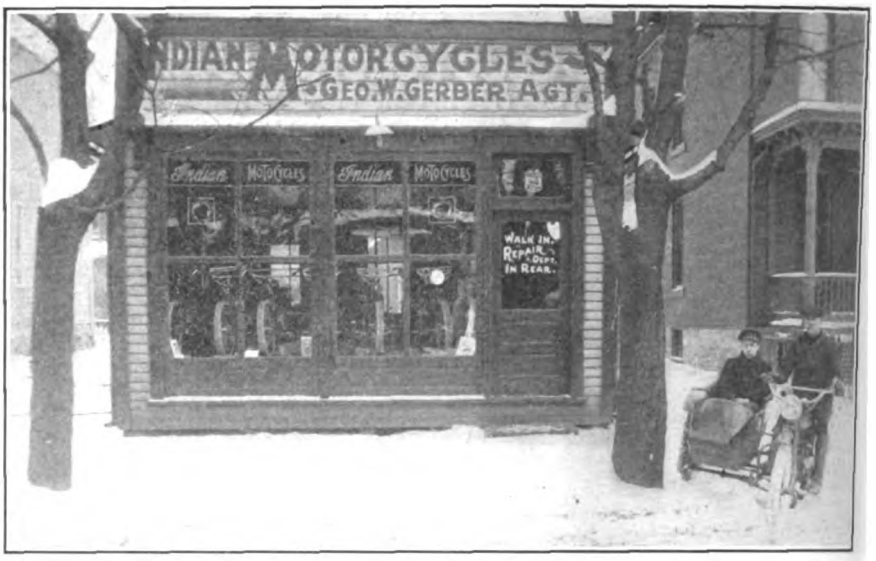
which keep up interest and bring the man who loves the motorcycle to the store. These mediums have been highly effective in Swenson's business. As a campaigner, Swenson does not boast of being in that class, but when the spirit moves with him, he allows that his ideas always work to good advantage.

The Swenson establishment has from ten to 75 Indians on hand at all times, in addition to a large number of second-hand machines. It is the practice of the store never to allow a used machine to leave the premises until it has been overhauled.

With regard to B. A. Swenson's record as a rider, he points with pride to the F. A. M. Endurance Contest in August, 1909, in which he came in ahead of many of the best riders in the country. In this run, Swenson obtained a perfect score in Class 2-B, trade riders, covering the 440 miles between Rochester, N. Y., and Cleveland, O., in 21 hours. He was nearly all in with fatigue and thirst when he rolled in to the control in front of the Cleveland *Plain Dealer* office on August 9 of that year.

In 1911, Swenson conducted the F. A. M. Eastern Tour to Buffalo, from Springfield, Mass., to the Bison City, being chosen as tourmaster by reason of his reputation as a rider. In July, 1908, he rode from New York to Chicago in 49 hours and 40 minutes. It was then prophesied of him that he would do some remarkable things on both road and path, especially over the longer distances. True to this, Swenson has done this and a lot more, if the album of press clippings he shows with pride is any criterion of a motorcyclist's successes.

HOW A JOHNSTOWN DEALER IS GROWING FAST



Headquarters of Gerber, Showing Six Machines in Window

CYCLE dealers who feel that they are laboring under a handicap because they are obliged to occupy a comparatively small store can pick up a few pointers from George W. Gerber, who sells the Indian in Johnstown, Pa. The accompanying photo shows that Gerber's store is extremely neat, and that he has managed to find room in his window for six machines.

Gerber reports that he has done as much business in the last four months as he transacted during the whole 1915 season. He sold fifteen machines in 1915, and so far this season he has disposed of four 1915 models and started to clear out an allotment of fifteen of the 1916 machines. He is confident of selling about 45 motorcycles during the current season, all of 1916 model.

An up-to-date repair shop is a feature of the Gerber establishment and a full line of parts and accessories is carried. Gerber pays particular attention to the market for second-hand machines and has found it a paying one.

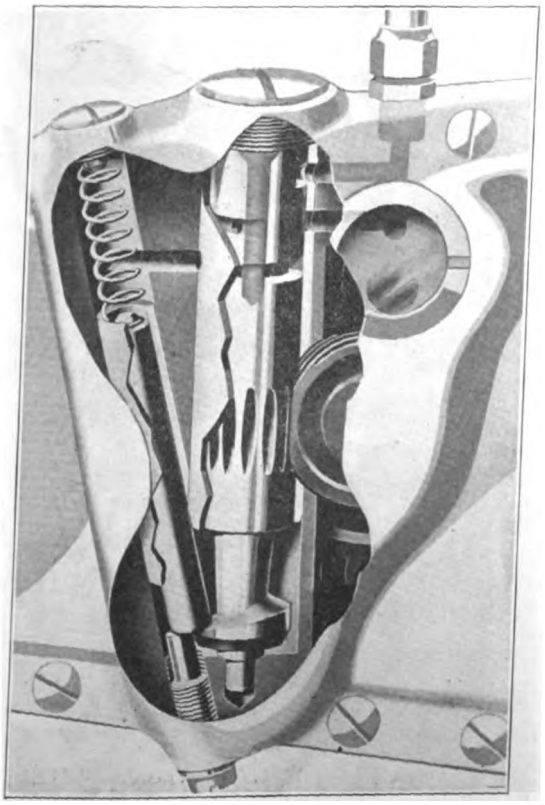
The Patented Harley-Davidson Automatic Oil Pump

THIS oil pump is a perfected device—sturdy and efficient. It is absolutely automatic. With oil in the tank, lubrication failure is an impossibility. This pump has no check valves to stick, no valve springs to break, no ball valves to float and no small parts to go wrong. It is the very *acme* of simplicity. All valve functions are controlled by a single mechanically driven rotary valve member, which also operates the pump plunger. Pump has but two moving parts.

This pump has doubled the life of the Harley-Davidson motor, for it furnishes lubrication to every internal moving part, and has eliminated, for all time, scored cylinders and seized pistons and rings.

After eighteen months of service, the verdict of thousands of Harley-Davidson owners and dealers is that this mechanism is *perfect* — and that is all that can be said of any mechanical device. We have not heard of a single case where a Harley-Davidson motor equipped with this pump has been damaged through lubrication failure.



This pump is just another example of Harley-Davidson superiority. The material and workmanship, of course, are of the very best and the design shows the simplicity so characteristic of Harley-Davidson engineering practices.

The Harley-Davidson automatic oil pump is patented—no other one is like it, and we venture to say that the remarkable satisfaction it has given has been responsible for many sales to experienced riders who appreciate reliability in a device so highly important as an oil pump.

CORRECT COST CALCULATING ESSENTIAL TO SUCCESSFUL BUSINESS

By R. FRANKLIN MUNDORFF

COST FIGURING is one of the most essential features of any merchant's business. The merchant who does not know how to figure cost and profits will not be in business very long. The one who does not know how much he has made until he takes his monthly or yearly inventory will soon be among those who used to be in business.

If a merchant has to wait for the inventory and still has a little left, he will install a cash register, suspect his clerks and indulge in the strictest vigilance in his effort to stop the leakage. Some merchants have even proceeded in this plan so thoroughly that even the mice have to ring up the amount of damage done in a night.

The largest percentage of bankrupts in any line of business is caused by improper methods being used to figure costs and profits. There is only one real safe, quick way, and it is simple.

How It Is Figured

Suppose, for example, a dealer has billed to him a motorcycle at $100. The first thing that he must know is just what his exact cost of doing business is. He should divide his annual expenses by his total annual sales. If the machine is billed to the dealer for $100 and his cost of doing business is 22 per cent. and he desires to make a clear 20 per cent. on the transaction, what will he have to receive for the motorcycle?

Generally, the dealer goes at it this way: The machine cost me $100 and I sell it for $150, making $50 on the deal. This is wrong. Another false way of figuring is for the dealer to add the cost of doing business to the billed price of the machine—$100 plus 22 per cent., equals $122. But this, too, is incorrect. This is the proper way:

Begin in decimals. 100 per cent. is your selling price. Then, if the cost of doing business is 22 per cent. and 20 per cent. profit is to be made, add the two together, making 42 per cent. This leaves 58 per cent. Next divide the billing price ($100) by 58, which amounts to 1.724, and multiply by 100, giving $172.40. This is the selling price.

To prove this correct is but a simple operation, as will be seen below:

22 per cent. of $172.40 is	$37.928
20 per cent. of $172.40 is	$34.480
58 per cent. of $172.40 is	$99.932
100 per cent. of $172.40 is	$172.40

If the dealer will but follow this little example, supplying his own figures such as the cost of doing business, the profit he desires and feels he must make and the cost of the article, the simple rule will work out every time. The motorcycle is only taken as an example, but motorcycle men should apply this rule to every little thing that goes into their salesrooms.

With regard to a motorcycle, the factory has set the retail price. If you are not making a just profit, then the cost of doing business is too high and your efforts should be toward cutting down the overhead charges instead of blaming your clerks and salesmen.

LOS ANGELES, CAL.

PASSMORE & SAYRE, handling the Harley-Davidson in this city, think that Saturday, March 3, was the real opening of the Spring season in the Southwest. They sold six machines on that date, three being new three-speeders and the others used Gray Fellows. This practically cleaned out their store, but on March 8, their tenth carload came in to replenish the stock.

CARR SALES COMPANY TO DISTRIBUTE DAYTON IN INDIANA

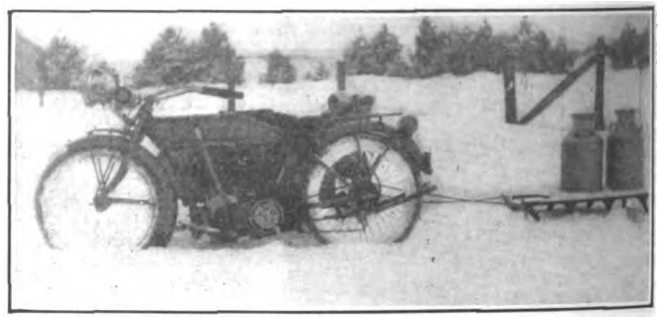
INDIANAPOLIS, IND.—Jack C. Carr, State F. A. M. Commissioner, is at the head of a newly-formed concern, the Carr Sales Company, which will distribute the Dayton motorcycle and the Dayton Motor Bicycle in Indiana. The headquarters is at 13 When Building, Indianapolis.

Carr has John Hohle, a veteran motorcyclist, as a demonstrator for the Motor Bicycle. Hohle weighs over 200 pounds and naturally attracts great attention when he rides along the streets or roads. He is mounted on the first Dayton Motor Bicycle built at the Davis Sewing Machine Company's plant in Dayton.

Carr was manager of the motorcycle department of the G. H. Westing Company in this city until February 1. He and Hohle will cover the central part of the State on Motor Bicycles and will close agencies in every county not now represented. In addition to the Dayton lines, the firm will act as representatives for manufacturers who ship directly to the dealer.

SHELBY, O.

DALE ROPP has just opened a fine motorcycle store in this city and has signed up to represent the Henderson. Most of his time these days is spent in giving demonstrations of the Detroit-made four-cylinder product, which gives every indication of being a big seller.



How Sam C. Epley, Pope Dealer in New Richmond, Wis., Uses Sidecar Outfit to Deliver Milk in an Emergency

ERIE, PA.

THE ERIE CYCLERY, representing the Henderson, is very busy with demonstrating and booking orders these days. Manager C. E. Nagorski is planning to expand his business and has applied to the Henderson Motorcycle Company, of Detroit, for an increase in territory, and increased facilities will allow of a greater volume of business to be taken care of.

Under the new arrangement, the Cyclery will distribute the Henderson in Erie County as well as several adjacent ones and Manager Nagorski reports the lining up of a number of sub-agents in different parts. Demonstrating machines have already been ordered for the sub-agents and a retail shipment is expected in Erie within a few days and another will soon follow it.

HARRISBURG, PA.

JOSEPH CHIARA, proprietor of the Harrisburg Motorcycle Exchange, at 1302 North Sixth street, is handling the Reading Standard line exclusively for 1916. He has sold four of the three-speed twin models already and has several on order, deposits have been made on the same. Chiara formerly handled the Emblem and R-S, but has decided to concentrate on the Reading Standard this season.

Unequalled for Mechanical Accuracy and Finish

The huge automatic machines used in the "Elisco" process of tube-making combine six operations in one—and insure a mechanical accuracy, and smoothness of finish that is little short of a revelation.

Each of these huge machines receives the coil of cold rolled steel, forms it, burrs, rounds, straightens, smooths, cuts it to length and delivers it ready for inspection and shipment —untouched by human hands.

Our new plant in Cleveland is equipped with twenty of these huge units, with a total yearly capacity of over twenty million feet of tubing—and additional machines are being installed. We are in position to make reasonably prompt delivery on sizes up to 2 inch outside diameter.

Elisco Steel Tubing is furnished in straight lengths or formed to suit your requirements. Let us submit samples and quote prices.

IMMELS OPEN SELLING SEASON WITH BIG RECEPTION TO RIDERS

PITTSBURGH, Pa.—The 1916 retail selling season was formally opened on March 4 and 5 by Immel Brothers, at their headquarters for the Henderson. A big reception was held, with all the new models ready for exhibition. The center of attraction was a specially-finished 1916 Henderson, enamelled in pure white with dead green striping. It had been ordered by one of Immels' customers who has a strong liking for artistic effect.

Harry Immel, one of the partners, reports the exhibition as very successful from a business viewpoint. Several sales were closed and a number of new prospects were interested in the four-cylinder mount. He plans to make this Spring opening an annual event. Harry Immel is a rider of considerable note, being one of the few to get a perfect score in the last Grand Rapids M. C. endurance run.

Interior of G. H. Tompkins' Indian Agency at Richmond, Va., Showing Neat Arrangement of Stock

POTTSTOWN, PA.

DIENER MOTOR COMPANY, which recently signed up to represent the Henderson in this city, has been going after business in a very vigorous manner. Newspaper ads. are frequently used and no chances are overlooked to stir up interest and enthusiasm for the sport among the people of this territory. There is a large list of prospects for the company and a number of orders have already been booked.

"Special demonstrations are among the most effective sales arguments available" said one of the Diener firm recently, "as real action does the business in convincing the purchaser what the machine can do. We are working to educate the young fellows in particular to an understanding of the pleasure to be obtained from a powerful and silent machine, not only with greater physical benefits but with less expenditure than is connected with pool-room and cigar-store methods of time-killing."

ASHEVILLE, N. C.

J. F. MEANS has signed up to sell the four-cylinder Henderson in this territory for the 1916 season. Means was awarded the agency, although three other dealers had their applications in at the Henderson factory at the same time. He says that prospects in this section are the brightest that he has ever known.

HOW BUFFALO DEALERS' ASSOCIATION IS SOLVING USED MOUNT PROBLEM

By GEORGE W. GRUPP

BUFFALO, N. Y.—Used or second-hand machines have always been a problem to local dealers and much thought and hard words have been expended upon the disposal of these mounts. Buffalo agents have organized the Buffalo Motorcycle Dealers' Association and upon joining, each dealer pledges himself to handle used machines only on certain conditions.

This is the plan. When an old rider comes in to get a new machine and wants the dealer to take his used mount in part payment, the Association member tells him that he (the rider) must first find a buyer for the machine. If the buyer that is found has not all the money to pay for the used machine outright, the dealer will agree to accept one-half down and the balance in weekly installments. The selling price of the machine is then credited to the old rider's new machine.

Should the old rider say that he will not be able to sell the machine and that the dealer should sell it for him, the dealer will do so on a 10-per cent. commission basis only. In addition to this, the new machine will not be delivered until the old one is sold. When the old machine is disposed of, the rider is credited with 90 per cent. of the selling price toward his new purchase.

Buffalo dealers believe that this plan will be extremely beneficial to the trade and it has proven so in the short time it has been in service. They say that a private owner can always get a better price for a used machine than they can. If the private owner puts an ad. in the newspapers, the dealers maintain that prospective buyers are more inclined to call and see the machine. And the seller can offer all sorts of excuses for selling which a dealer would not dare to mention.

With every old rider a salesman, the chances of selling used motorcycles will be increased several hundred per cent. "All of this" says one prominent dealer, "will probably develop a type of motorcycle man who will deal in used machines exclusively."

DENVER, COLO.

THE BELT-FRANKLIN COMPANY, at Fifth & Gay streets, is Central Ohio distributor for the Indian. O. C. Belt is in charge. The original firm name was the Belt-Barr Motorcycle Co., but Mr. Barr recently retired from the firm and a change was made in the title to the Belt-Franklin Company.

LOUISVILLE, KY.

FRANK MARSHALL, managing the Century Cycle Company, has had considerable trouble during the past few weeks getting shipments through the East, the freight embargo having tied up several shipments of Indians from Springfield, Mass. Last week he got six machines after a long delay, and has hopes of making other deliveries in a short time.

FORT COLLINS, COLO.

ROGERS & ALEXANDER are the new dealers for the four-cylinder Henderson motorcycle in this city, having closed up with D. B. Southard, Denver distributor, recently. Both partners have kept their demonstrating machine busy since the day of its arrival and have a nice long list of prospects, as well as a number of sales already made.

"Morrow

24 Quarter-Inch Steel Balls!

Few bicycle riders know exactly WHY they get such supremely satisfactory braking and coasting service out of the MORROW. They get it—that's all they want to know.

But you dealers, who *sell* the MORROW, should be made aware of the most vital reason for the velvety smoothness of the MORROW'S service. It's in the steel balls that are set at every friction point—***more balls than are used on any other brake made.*** These 24 diamond hard steel balls help give that abrupt, silent, satin-smooth "hold" on the steepest down-hill—a quick, effective stop from speed on the level path. They reduce friction to the vanishing point, giving the delight of free coasting. One pedal-push generally means a block of coasting on the level road. Hills become half as hard to climb—the rider "rests" all the way up.

The dealer who harnesses MORROW quality and MORROW reputation to his bicycle stock makes a clean-up in his territory.

Write for full details on how we cooperate with MORROW dealers.

WARNER COMPANY IS OFFERING REAL TIRE SERVICE TO RIDERS

LOUISVILLE, KY.—The Roy E. Warner Company, local Firestone agent, has just announced a departure in tire service to riders and automobilists. On and after March 10, the company will keep in repair all inner tubes sold for one year after date of sales and free of cost to the purchaser.

This is the first of several service features which the Warner firm is figuring on. Its definition of free road service is "tires changed anywhere at any time, day or night." Now it adds to this offer the one of keeping the tubes repaired free of cost.

The tube repair service is of the day and night order, a rider being able to obtain a tube at any hour of the twenty-four. The service station is always open, but the office hours are from 8:30 to 5:30, with closing on Sunday. In order that customers who purchase on open account may charge while the office is closed, the company has a file of credit cards to which the night men can refer. Unless listed on these cards, it is impossible to have charges made at night.

NEW YORK, N. Y.

GUS ROTHOLZ, distributing the Reading-Standard in this section, sold a R-S sidecar combination last Sunday in quick time. A machine came in on Saturday afternoon late and it was left to be uncrated the following morning. Shortly after eleven o'clock on Sunday, Rotholz's man was striking off the first boards when a man came in and asked for a Reading-Standard. He asked them to take it out of the crate and then paid the full price. After filling with gasoline and oil, he started the motor and rode off.

"The sale took about fifteen minutes, if you count getting the machine uncrated," said Rotholz. "It would have been made quicker if we had uncrated it the evening before." Rotholz has also sold an electrically-equipped Excelsior with side-car to one of the officials of Weber & Heilbroner, the big metropolitan tailoring establishment.

DENVER, COLO.

D. B. SOUTHARD, distributing the Henderson in this section, has just completed a quick run through his territory, in the course of which he closed several deals. An agent was signed up for Leadville and arrangements have been made for agencies in Ouray, Fort Morgan, Pueblo, Goldfield and Montrose.

Negotiations are also under way with live dealers in several other towns in Colorado, and Southard will close these in the next few days. Southard's men are covering his territory thoroughly and all report that the four-cylinder machines are meeting with a remarkably enthusiastic reception.

The Cleveland lightweight, handled by Southard, is also taking a firm hold in this State and big sales of the little two-stroker are looked for.

GLOVERSVILLE, N. Y.

GEORGE DENCE has signed up for the Harley-Davidson in this city and has sold 34 machines and 18 sidecars so far. However, the deep snow has prevented any deliveries being made, and there are only two machines now in action in Gloversville. These are a Silent Gray Fellow owned by a mail clerk and Dence's sidecar combination on runners.

Dence sold 28 machines and 13 sidecars during 1915, all Harley-Davidsons. This is his second season with the Milwaukee-made machines.

Model L-16

Price $225.00

Seven Thousand Miles—Seven Months —Seven Days a Week!

Read What Police Chief Hill Says—

CITY OF WORCESTER,
DEPARTMENT OF POLICE

Feb. 28, 1916.

Westfield Manufacturing Co.,
Westfield, Mass.

Gentlemen:

We used in this department during the year 1915, six Pope motorcycles, for patrolling the residential districts. I cannot speak too highly of the service rendered by these machines. They gave us practically no trouble during the year and in consequence there was very little expense to their upkeep. I am so well satisfied with the machines that I am giving you an order for seven Pope motorcycles of this year's model.

Trusting you will have a successful season, I am,

Very truly yours,
(Signed) Goerge H. Hill,
Chief of Police.

Not one day out of more than two hundred lost for the riders of Pope Motorcycles!

There's a record for you! It was hung up by the motorcycle police of Worcester, Mass., last year and it is typical of Pope Performance the world over.

Under all sorts of the most trying weather conditions the crack squad of Worcester found that their single-speed, twin cylinder Popes gave such perfect service and cost so little that it was decided to increase the squad by another member. Every year it is the custom to replace the police motorcycles with new ones, so when it came time to sign the new contracts Police Chief Hill ordered seven 1916 Single-Speed Twin Cylinder Popes—Model L—the same type as was used last year.

Most significant of all perhaps was the cost for mechanical repairs which averaged only $1.74 per motorcycle for over seven thousand miles of service per machine.

Think what this record of actual achievement made by the fast-moving, ever-dependable Pope Model L means to you and to your customers. Here's a motorcycle you can offer assured that your most particular customer will find it simple of operation, dependable in service and costing next to nothing to maintain.

Write today for our dealer's prices—they'll surely interest you.

ISON CELEBRATES FIRST ANNIVERSARY OF SUCCESSFUL BUSINESS

BROOKLYN, N. Y.—Harry Ison, proprietor of the Patchen Motorcycle Exchange, invited all riders in this section to participate in the celebration of his first anniversary in the motorcycle business. The affair was held at Ison's headquarters at 224 Patchen avenue, on March 2, and all had a most enjoyable time.

Ison's Busy Agency at 224 Patchen Avenue, Brooklyn

Ison took this occasion to welcome the Kings County M. C. to his place as its new home. He has given the club the free use of rooms in his building for the entire season. Ison has just closed a successful year in both the motorcycle and bicycle lines, his repair business having been unusually large.

PROVIDENCE, R. I.

B. A. SWENSON, the Indian Man, has just delivered a sidecar combination to the Providence Gas Company, a Powerplus model to the Narragansett Electric Lighting Company and another to the Providence Telephone Company. He has also made deliveries to several private parties.

On Bicycle Day, Swenson closed out seven machines and talked to a number of live prospects. He is enthusiastic over the new store in New Britain, Conn., which opened on March 4. Mr. Hadfield, who is managing the establishment, made five sales on the opening day.

PATERSON, N. J.

JOHN STEELE, representing the Indian in this city, has left the right side of one of the Powerplus models open and will be unable to seal it up for some time to come. The visitors have been numerous since Indian Day and all have feasted their eyes on the partially-disassembled power plant. There is hardly an hour in the day that someone is not feeling the cams or pulling out the parts of the gearset.

The fact that everything has been reinforced in the "works" of the Indian for 1916 has made a number of sales, according to Steele. "Hereafter I will show the insides of each new model," says Steele, "as I have found no better method of sales-getting demonstration than the Powerplus with the side open."

ELMER HAVENSTRITE, Harley-Davidson dealer, recently took a few days' recreation, spending the time at fox-hunting. He took the time off to rest from a very busy season and went out to Blackwell Mills, where he visited relatives. His first day's bag was a fox, but on examination the animal turned out to be a vixen with six cubs almost ready for birth. Havenstrite would have preferred a male fox, but is going to exhibit his game at the store when he has time to spare.

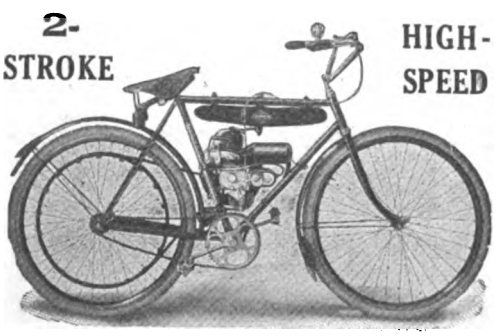
Cyclemotor
WILL LUNG WITHOUT WORK
2-STROKE HIGH-SPEED


Price $55.00
Weight 21 lbs.
The Cyclemotor wins both ways. Its reasonable price brings it within easy reach of every bicycle rider and it makes good profit for the dealer because it is a cash proposition with an unlimited field for sales.
Cyclemotor dealers say it is their liveliest line.
Booklet "J-3" tells you why.
CYCLEMOTOR CORPORATION
Arlington Bldg. Rochester, N. Y.

LOS ANGELES, CAL.

HENDERSON MOTORCYCLE SALES CORPORATION, handling the Henderson four-cylinder and the Pope lightweight, is now adding a line of bicycles. Since adding the bike, the firm has been surprised at the extent of the demand for pedal machines.

The motorcycle business during the past two weeks has made the firm more enthusiastic than ever. The way business is going, this will positively be the best year for the Henderson in Southern California since the machine was put on the market.

L. E. REED, of the staff of Passmore & Sayre, Harley-Davidson agents, had a nasty experience while out with his family on a sidecar. He was run into a ditch by an automobile 20 miles outside of San Bernardino and sustained a broken ankle and disclocated knee. Reed drove home holding his damaged leg with one hand, and is now recuperating.

HARRY LYONS, a veteran Los Angeles rider, has joined the staff of the Henderson Motorcycle Sales Corporation, as demonstrator and salesman.

LAWRENCE, MASS.

J. E. FERLAND, representing the Henderson in this city, has set March 18 as the date for his formal opening. He has advertised the occasion widely and sent out invitations to all riders in and around Lawrence.

Ferland's idea is to accelerate the big Spring selling season and get riders to book their orders early. Special decorations have been made at the store for the affair, with an attractive window display to draw the attention of the passerby. The new models of four-cylinder Henderson are already on display. Ferland will be assisted by several local riders as demonstrators.

MEADE, KAN.

G. A. SPECHT will represent the Henderson in this section during 1916. He says that Kansas is going to be a stronger and better motorcycle State this year than in any previous season and expects to set a record for sales in his section.

Specht finds that the demand for sidecars is becoming steadily stronger. "The four-cylinder Henderson is meeting with special favor from sidecar buyers" says Specht, "as they appreciate the even pulling-power, particularly on Kansas roads."

INTERNATIONAL FALLS, MINN.

LLOYD SEYBOLD has just closed contracts whereby he acquires the Henderson dealership in this section for 1916. His territory includes all of Koochiching County.

International Falls is right on the Canadian boundary line, but the war has had little or no effect on the residents, in spite of a considerable trade with the Dominion. Business has been good in all lines and Seybold is looking forward to a continuation of the nice little trade which he has been doing during the last three months.

FREEPORT, N. Y.

THE FREEPORT MOTORCYCLE EXCHANGE has been opened on South Main street, opposite the post office. Expert repairmen are employed and a full line of accessories is carried. Bicycles are handled in addition to the Indian.

BERNARD IS LINING UP THE WHEELING DEALERS

WHEELING, W. Va.—Harvey Bernard is lining up the local cycle dealers for a banquet with the idea of having them organize and pull together. He is also suggesting that every purchaser of a new motorcycle be presented by the dealer with a membership in the F. A. M. and another in the Wheeling M. C., provided the buyer is not already enrolled in those bodies.

The Rogers auto supply house has taken the agency for the Flying Merkel machine. Rogers is a new hand at selling motorcycles, but has been a rider for some time. "Just watch my smoke," he says.

VINE PROTESTS LACK OF DOT FOR LAKE LINDEN

ARTHUR J. VINE, who is agent for the Harley-Davidson in Lake Linden, Mich., let out a strong holler when he looked over the 1916 Manual issued by the Harley-Davidson Motor Company, of Milwaukee, Wis. On pages 40 and 41 of the Manual there appeared a map of the United States with dots representing each Harley-Davidson service station, but there was no dot for Lake Linden. Vine lost no time in shooting in the following letter to the firm about the absence of the dot:

"In your 1916 Manual on the center pages you have a map on which you state that every dot represents a Harley-Davidson service station, a place where you can expect courteous, intelligent service. I notice that you eliminated Lake Linden from the map or where it should be, and I must say that I never had any complaints from any of the tourists or riders on the service received from me or my territory."

The Harley-Davidson folks immediately wrote and squared themselves with Agent Vine, and, while sorry that the omission of Lake Linden was made, were pleased with the fact that he had read the Manual from cover to cover. The fact that Vine wrote in about the matter demonstrated his alertness and appreciation of the value of service and co-operation.

PREPARING THE MOUNT FOR ENDURANCE COMPETITION

A RECENT letter inquires how to prepare a machine for an endurance run. I hope the rider will not get his feet chilly when I give a brief description of how to do the trick. The first thing is to dismount the motor, clean off all bearing surfaces and examine them for scars or pits. Next, each bearing should be rubbed with Prussian blue and put on its shaft, and any looseness or "high-spots" taken care of. The valve should be ground in and the fit of the valves in the guide noted and corrected, even at the expense of replacement. The piston rings should be fitted—new ones, if old ones will not do, and the motor assembled once more. The carbureter should be disassembled and cleaned, the clutch examined and adjusted, the hubs re-lubricated, the brake looked to, the chains replaced if worn and the controls lubricated and seen to work properly.

Some list, isn't it? But that's not all of it. After the motor is in the frame again, the machine should be taken for a trial run and final adjustments made then. After everything is ready, leave the mount alone until the day of the run, and then start off with the realization that if it doesn't get through it's the rider's fault.

LOCKING A KLAXON AGAINST UNAUTHORIZED USE

I HAVE frequently been bothered—once the horn was put out of business—by boys and other unauthorized individuals experimenting with my Klaxon. The experimenting usually consists of a hard blow down on the handle. I devised a very simple lock which has effectually prevented all meddling.

From a shoe maker I secured a piece of thick sole leather about 2¼ x 4½ inches. This I bent into a cylinder, punching a hole through the middle of each end. The leather cylinder can be locked in position around the upright arm of the horn by a small padlock through the holes, after which it is impossible for the horn to be operated.

Of course, any evil-minded person could, out of spite, cut off the leather and carry the lock away with him, but such an act is not likely to be done, especially if the machine is in a public place. However, if one wished to be doubly sure, it would be easy enough to make the locking cylinder out of sheet copper or some similar material. But so far as I can see, the leather is plenty good enough. At any rate, I have used it for over a year and am entirely satisfied.

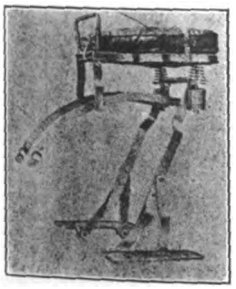
To The Smaller Dealers



It is an undisputed fact that practically all of the larger dealers of the United States are now using great quantities of F-N tandems, but many of the smaller dealers have been afraid to order one F-N tandem and find out how different it is from all the rest—why, you can sell one F-N with every machine you put out.

Start the Spring right—order an F-N for your demonstrator from your jobber or from us—it will fit your machine like a glove, and help you sell motorcycles.

Fentress Newton Mfg. Co. Detroit, Mich.

NATIONAL Motorcycle and Bicycle Spokes

We are selling several of the representative motorcycle and bicycle manufacturers, as well as some of the largest jobbers in the country.

For Motorcycles—.135 x .110 and .128 x .100. Made of high grade wire, either hand buffed or regular bright nickel finish. For Bicycles—.092 x .072; .080 x .060; .072 x .056. Furnished in National hand buffed or regular finish. Finest grade of wire. Rust proof!

REMY

Motorcycle Lighting-Ignition System

The POWER for Your LIGHT and HORN

When you have sure ignition—when you can depend absolutely upon your light and when your horn never fails to sound—in other words, when your mount is "REMY" equipped—then you are prepared to get the most out of your motorcycle, prepared to enjoy motorcycling at its best.

The automobilist has long enjoyed the advantages of REMY equipment and thousands of riders of Harley-Davidson motorcycles testify to the efficiency, simplicity and durability of the REMY Motorcycle Lighting-Ignition System.

Twenty-four hours of daylight and strong, synchronized ignition always available—briefly, lighting and ignition satisfaction is the privilege of every motorcyclist whose mount is "REMY" equipped.

REMY ELECTRIC COMPANY

Thor

REPUTATION

Reputation is not easily acquired. It takes years of patient hammering to chisel the word "Reputation."

The Thor has done it. The Thor has made a reputation for being a peerless motorcycle by its faultless performances on track and road—in sand, on hills and mountains, in clay and mud.

That is how the Thor has won—by living up to its claims. That is why you should stock the Thor for 1916 business—because it will live up to any claims you may be called upon to make.

Pope-made Bicycles

The Inside of the Track

You take the inside of the track in your race for bicycle deliveries when you hold an agency for any one of the high-grade Pope-made lines.

It is becoming more plain every month, that 1916 is to be a wonderfully prosperous year for dealers in all high-grade bicycles.

Never before have the facilities of our plant been so severely taxed in delivering to our trade such famous leaders as Columbia, Cleveland, Tribune, Rambler Crescent and Pope bicycles.

Pope dealers have the advantage of all the others, because, even though the demand for Pope-made bicycles is greater than last year by more than fifty percent, we are better equipped to keep pace with it than any other manufacturer of high-grade bicycles in the world.

That's what it means to you to have behind you the organization, the resources and the facilities of the Westfield Manufacturing Company.

No time in recent years has seen such a demand for high-grade bicycles, nor such a shortage of materials from which to make them. Unless you act—and act quickly—you are going to risk losing the big prize of profits that is almost within your grasp.

Write us for details regarding territory and dealers' prices.

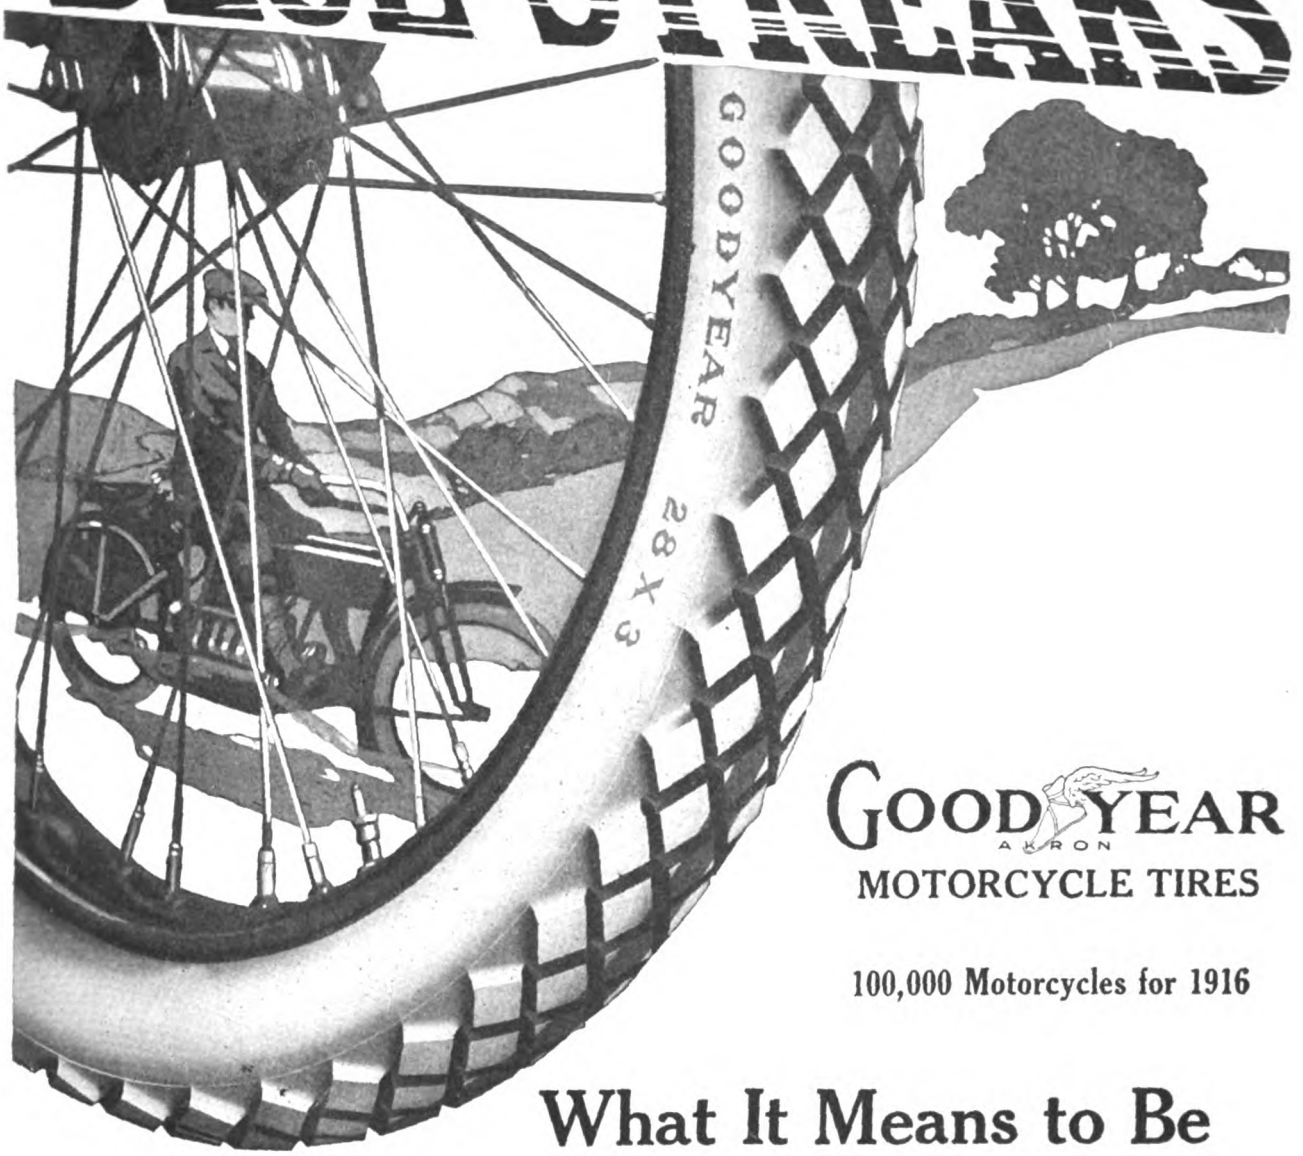
BLUE STREAKS



GOODYEAR
AKRON
MOTORCYCLE TIRES

100,000 Motorcycles for 1916

What It Means to Be a Goodyear Service Station Dealer

We told you in January that to be a Goodyear Service Station Dealer meant to have public opinion on your side.

We told you that it meant a nation-wide state of mind friendly and favorable to Goodyear.

We told you that it meant pulling with the stream instead of pulling against it.

We told you to be a Goodyear Dealer because it meant that swifter and easier selling which is the shortest and surest road to permanent profit.

Goodyear Blue Streak sales so far this year have broken last year's record for the same period many times over.

Every leading motorcycle manufacturer is using Blue Streaks as standard tire equipment. This means 3 out of 4 new motorcycles this year.

The Blue Streak tire has in fact done for dealers just what we predicted.

In view of this popularity is there any profitable reason why you should not carry Blue Streak tires? We can ship you a stock immediately.

The Goodyear Tire & Rubber Company
Akron, Ohio

"Eighty Per Cent. Were Equipped With United States Tires"

That phrase refers to the motorcycles entered in a racing meet held recently, which fact alone tells the story of popularity.

We were informed that "every machine entered, which was equipped with United States Tires, came out of the race without having tire trouble." This and similar experiences prove beyond the possibility of a doubt that United States Motorcycle Tires are the most thoroughly dependable tires on the market.

Follow the example of Mr. E. G. Baker, and thousands of other riders, and use United States 'Chain' Tread Motorcycle Tires.

PLAN BIG MOTORCYCLE DOINGS FOR NEW YORK

Speedway Motorcycle Club, Inc., Backed by Prominent Eastern Trade Men, Will Stage Big Programs on Sheepshead Bay Speedway and Apply for State F. A. M. Convention

NEW YORK, March 21.—The biggest proposition in the motorcycle racing line that the eastern states have ever seen is the Speedway Motorcycle Club, Inc., which has just been formed in this city. This club, numbering among its incorporators the best-known men in the motorcycle trade in this part of the country, has been formed to promote racing, endurance runs and social runs, as well as other features which will extend the popularity of the pastime. The club has arranged to use the Sheepshead Bay Speedway for its racing events. It will be affiliated with the F. A. M.

In addition to its activities in the directions mentioned, the Speedway M. C. will apply for the New York State Convention of the F. A. M. and the amatur championship races for this state. If the convention is secured, the club will hold the races which accompany it on July 4 at the Sheepshead Bay track.

Following are the officers of the club: Everard Thompson, Sheephead Bay Speedway Corporation, president; Irving W. Barnard, New York Sporting Goods Co., vice-president and secretary; G. W. Richardson, Sheepshead Bay Speedway Corporation, treasurer. Among the incorporators are J. Leo Sauer, publisher of **Motor Cycle Illustrated;** D. R. Hobart, technical editor of the same publication; M. E. Toepel, of the Splitdorf Electrical Co.; Fred A. Baker, of the New York Sporting Goods Co.; Walter Goerke, A. H. Patterson, T. K. Hastings, J. U. Constant, J. W. Brewer, Bob Brazenor, S. H. Du Bon, T. J. Sixsmith, Irving Beck, Ferd Mercier, O. S. Brant and Wallace Stuart. Practically all these men have been connected with motorcycle competition since its earliest days.

The officers of the Speedway M. C., Inc., are at present at 15-17 Warren street, New York. For further information communicate with Irving W. Barnard, secretary, at that address.

SITE PURCHASED FOR NEW FLXIBLE FACTORY

Flxible Sidecar Company Acquires Eight Lots in Good Location for Erection of Modern Plant

LOUDONVILLE, Ohio, Mar. 20.—A strong indication of the progress that is being made by the Flxible Sidecar Co., of this city, is given in the announcement that on March 16 the company purchased eight lots opposite the Pennsylvania depot, on which a thoroughly modern factory will be erected. Schenck & Williams, well-known architects of Dayton, O., who superintended the construction of such plants as the Dayton Engineering Laboratories Co. and the National Cash Register Co., have been placed in charge of the erection of the new Flxible factory.

Flxible business has increased steadily of ate until the present factory is operating n a capacity schedule.

FIRESTONE SERVICE MEN IN ANNUAL CONFERENCE

AKRON, O.—In order to secure new and better ways of serving the tire-ing public, and to broaden the scope of eir present highly-efficient service sys-m, service men of the Firestone Tire & ubber Company from every corner of the nited States met in their fourth annual conference at Akron on March 16, 17 and 18.

The work of the past year was reviewed at length, and the various programs, carefully followed out, proved of the utmost benefit. The problems connected with tire usage were discussed in detail, and the profit accruing not only to the men attending, but to the tire user in general will be demonstrated during the coming motoring season by the greater efficiency which is certain to characterize Firestone service.

PREPARING TO SPEED UP THE HENDERSON OUTPUT

DETROIT, Mich.—Production Manager Charles H. Parker, of the Henderson motorcycle factory, is laying extensive plans for increasing the output in 1917. Many thousands of dollars worth of new machinery has been ordered, including automatics, grinders, lathes and special high-speed equipment. All of this will be installed as soon as it can be delivered, though the shortage of factory equipment caused by conditions incidental to the war is causing considerable delay.

Parker expects to have all the new equipment in operation in time to start on the 1917 production next fall. Some departments of the factory may be reorganized at the same time to speed up handling material, so that each piece will pass directly from one operation to the next, with the least traveling to and fro.

300 READING STANDARDS ARE BOOKED FOR ITALY

Two Carloads Have Been Shipped and More Will Go Soon; Expect To Place 1000 R-S's in England

NEW YORK, Mar. 21.—One of the busiest motorcycle plants in the country just now is that of the Reading Standard Company, Reading, Pa., where an increased staff is working at top speed to keep abreast of the domestic demand, and also fill an unusual number of export orders. The Reading Standard Company has booked orders calling for 300 of the 1916 models to be shipped to Italy, and two carloads of these machines have already left the factory. A letter received a day or two ago requested another early shipment of 100 machines, these being included in the total order of 300.

These machines are all for general distribution and will not be used in war service. As a matter of fact, the Reading Standard Co. has sold no motorcycles for war purposes, although its export business of late has increased by leaps and bounds.

A letter received yesterday from London states that about 1,000 Reading Standard motorcycles will probably be needed to meet the 1916 demands in Great Britain. Two carloads of 1916 R-S vans have already been sent to London.

PROMISES TEN-DAY RIDING PRIVILEGE IN CANADA

Commissioner of Customs Says New Regulation Will Become Effective April 1, Admitting U. S. Motorcyclists Without Charge in All Provinces Except Ontario

OTTAWA, Ont.—An announcement of great importance to touring motorcyclists of the United States has just been made by John McDougall, Commissioner of Customs, in reference to the entry of foreign motorcycle riders into Canada. He announces that, according to present considerations, a regulation to permit the entry of motorcycles brought in by tourists under a ten-day permit will go into effect from April 1 next. This privilege was extended to foreign automobile tourists some time ago, but the widening of the clause to cover motorcycle tourists has been urged by President F. A. O. Johnston of the Canada Motorcyclists' Association with the above result.

The passing of the amendment to the regulation means that motorcycle riders of the United States will be able to cross into any province of the Dominion, with the exception of Ontario, without paying a cent for either a bond to cover duty or for a provincial riding license, providing the period of stay is limited to ten days. Ontario has not yet adopted reciprocal relations with the States with regard to inter-recognition of licenses, but the Ontario provincial authorities promise that a reciprocal arrangement will go into effect in a few weeks. With the adoption of this measure by Ontario, the whole country will be wide open to motorcycle tourists of the States without cost for visits not exceeding the stated period.

The action of the Dominion Government with regard to the free entry of tourists' motorcycles is a notable victory for the Canada Motorcyclists' Association.

CRISTMAN BILL AGAIN READY FOR GOVERNOR

Amended Measure, Providing for $2.50 Registration Fee in New York, Passes Both Houses

ALBANY, N. Y., March 21.—The Cristman Bill, providing for a $2.50 registration fee for motorcycles, has passed both Houses of the Legislature and is again awaiting the signature of Governor Whitman.

It will be recalled that the bill went through both Houses a week or ten days ago and that it was withdrawn at the eleventh hour for amendment on recommendation of the Governor's counsel. The amendment concerned the disposition of the fees received through motorcycle registrations.

The bill as it now stands provides that 50 per cent. of the fees shall go to the State Treasury, and 50 per cent. to the County in which the person paying the fee resides. All fines, penalties or forfeitures by motorcyclists under the bill are to be apportioned as follows: Fifty per cent. to the State Treasury and the balance to the County in which the violation occurred.

The portion of the fees paid into the State Treasury will be used for the maintenance and repair of the improved roads of the State; the money turned over to the various Counties will go for maintenance and repair of State and County highways within the County.

Much credit is given to J. A. Hall, of Brooklyn, former F. A. M. State Commissioner, who has worked tirelessly for the passage of a reasonable motorcycle registration bill for several years past. It is largely due to Mr. Hall's efforts that the bill has been accepted in its present satisfactory form.

PRIZES FOR PHOTOGRAPHS OF MIAMI POWER BICYCLE

THE Miami Cycle & Mfg. Co. has sent out a circular letter to all the dealers it has signed up to handle the Miami Power Bicycle, informing them that two dollars will be paid for every interesting photo of a Power Bicycle submitted to the company between March 13 and May 1. For the best—that is, the most triking and unusual —photo contributed during the period mentioned a special prize of $10 will be awarded, and a prize of $5 will be given for the picture that ranks second best.

In order to be acceptable, a photo must be 6 by 9 inches, must be sent to the company flat—not rolled—and must show a Miami Power Bicycle undergoing some unusual test. The photos will be sent out to the trade press and otherwise used in connection with publicity work.

HENDERSON BRANCH WILL BE OPENED IN PARIS

Holland Representative of the Four-Cylinder Mount Arranges to Handle Sales in France Also.

THE HAGUE, Holland.—Plans have been concluded for extending the sale of the four-cylinder Henderson motorcycle in France, with a branch office in Paris as distributing headquarters for that country. The Paris distributing office will be conducted by H. Englebert & Co., who have been so successful in the sale of the Henderson in Holland.

Sales Manager Geerkins, of Englebert & Co., called at the Henderson factory a short time ago in the course of a trip in America, and arranged the details of the new distributing plan. Englebert will open a big salesroom and distributing station in Paris, from which agencies will be placed in all parts of France. A large stock of parts will be carried on hand at all times, so that effective and prompt service can be given to dealers and riders in that country.

AN ORDER FROM ENGLAND FOR PULLMAN SIDECARS

DETROIT, Mich., Mar. 18.—That the market for American sidecars continues to grow abroad is further indicated by an order received this week by the Harry Svensgaard Sales Corp., of Detroit. The order was from Russell & Co., Ltd., of London, Eng., and called for a substantial shipment of the popular Pullman third-wheelers. The envelope containing the order was opened by the English censor, but arriving at the conclusion, no doubt, that there couldn't be the slightest objection to bringing in a batch of Pullmans he placed his formidable-looking stamp on the envelope and sent 'er through.

CLEVELAND OUTPUT IS SHOWING BIG ADVANCES

Secretary Quinlan Tells of Giant Strides in Firm's Production—75 Per Cent. to New Riders.

THAT 1916 will be a big year for the Cleveland lightweight and that a record will be set by the Cleveland Motorcycle Manufacturing Company in its first year's output, is the statement made by Secretary W. S. Quinlan during a recent interview in Los Angeles, Cal. Mr. Quinlan also said that 75 per cent. of the Clevelands have gone to new riders, according to an analysis of sales in this section.

"Advices from our factory are to the effect that our February production exceeded January by 100 per cent." Mr. Quinland stated. "This ratio will be exceeded in March, and by April 1 our output will be quadruple what it was in February. Our plans for 1916 call for a total production of between 10,000 and 15,000 machines.

"We have sent the second and third carloads of Clevelands to Los Angeles already. Each of these consists of 75 machines. Half of one carload is already sold.

"Analysis of our sales in Los Angeles show that, at the very least, 75 per cent. have gone to absolutely new riders. This convinces me firmly in the belief that the lightweight will not be a competitor of the heavyweight, as it appeals to an entirely different class of people. The lightweight interests a class of people who never before have been favorably inclined toward motorcycles, and the development of this new market will in nowise affect heavyweight sales, because a large proportion of the lightweight potential buyers could not be regarded as heavyweight possibilities."

UNFILLED STEEL ORDERS REACH NEW RECORD

NEW YORK CITY, Mar. 20.—In its last monthly statement the United States Steel Corporation reports unfilled orders on its books as of February 29 last of 8,568,966 tons. This compares with 7,922,767 tons on January 31, an increase of 646,199 tons, and with 4,345,371 tons on February 28, 1915.

The total of 8,568,966 tons on the books establishes a new high record, and exceeds by 79,248 tons the previous top-mark of 8,489,718 tons on December 31, 1906.

H. N. KIRK IS SUCCEEDED BY C. B. O'HARE

Veteran Sales Manager to Resign from Thor Company on April 1—His Successor Is Also an Experienced Sales Director

CHICAGO, Ill.—H. N. Kirk, sales manager for the Thor, has announced that he will sever his connections with the Aurora Automatic Machinery Company, to take effect on or about April 1. He will be succeeded by Charles B. O'Hare.

Mr. Kirk is a veteran in the cycle field. Up to May 20, 1913, he was sales manager for the Excelsior Motor Manufacturing & Supply Co., having been with that firm for twenty years, as salesman and sales manager. Following his leaving the Excelsior firm, Mr. Kirk became sales manager for the Thor, and has been with them some two months short of three years.

Has Wide Circle of Friends

Mr. Kirk has been boosting Excelsior sales under the elder Robie, then under Fred Robie, and later under the creditors' committee. When the firm was bought up by Ignatz Schwinn, Kirk was the "Little Giant's" right-hand man until his severance of relations in 1913. Few men in the trade have made such a wide circle of friends among dealers as has H. N. Kirk, by reason of his square deal policy and friendly attitude toward all. He has made no positive statement as to his future plans, but it is stated that he will not discontinue his interest in the motorcycle trade.

The New Thor Sales Manager

Charles B. O'Hare was formerly sales manager for the motor car division of the Texas company in Chicago for two years, and also sales manager for the solid tire department of the United States Tire Company in the same district. Before connecting with the tire and oil business he was a newspaper man with the Buffalo, N. Y., *Courier*, Chicago *Chronicle*, and *American*.

INDIANAPOLIS LIVE ONES

Harry Dipple, Local Harley-Davidson Dealer (in Saddle) and Frank Baldridge of G. & J. Tire Company

ERWIN G. BAKER RETURNS TO GOLDEN GATE

SAN FRANCISCO, Cal., Mar. 20.—E. G. Baker, of "Warhorse" fame, returned last week on the S. S. *Matsonia*. Baker was in fine shape and said that he had enjoyed his tour immensely.

A few days prior to Baker's return, A. Freed, president of the Pacific Motorcycle Supply Company, Northern California distributor for the Indian, received a wire from "Cannon Ball," while he was still in the Hawaiian Islands, as follows: "My Powerplus Indian carried me to another heart-breaking record around Oahu Island, 90 miles over very rough, mountainous, muddy roads and high cliffs. My time was 22 hours, 4 minutes and 36 seconds, beating the previous record of 23 hours and 25 minutes."

Baker did not say what his plans were for the immediate future. He expects to visit the Hendee factory at Springfield.

CYCLE TIRE OUTPUT NEARS SEVEN MILLION MARK

Reached Total of $6,905,852 for Year 1914 According to Figures Secured by Government

NEW YORK, March 20.—According to "Commerce Reports" the production of rubber tires in the United States during the year 1914 constituted almost half of the total value of all kinds of rubber goods manufactured in the country during the year. The value of tires produced during that year was a little over $146,000,000, or about forty-nine per cent. of the total.

The aggregate was made up from reports received from 331 establishments, of which 290 manufacture automobile, motorcycle and bicycle tires, casings, and inner tubes. The production of automobile tires and casings was valued at $105,671,223; motorcycle, bicycle and aeroplane tires, $6,905,852.

The products reported for the 331 establishments for 1914 were valued at $300,251,827. At the census of 1909, 267 establishments were reported, with products valued at $197,394,638. The increase in value of products, therefore, was $102,857,189, or 52.1 per cent.

Statistics of the manufacture of tires were not obtained for 1909, but it may be safely assumed that the increase of 52.1 per cent. in the total annual output of rubber goods during the five-year period is accounted for in very large part by the enormous growth of this branch of the industry.

HOW WANDERSEE GETS HIS MIAMI MOTOR BIKES

GIVES UP AUTOMOBILE TO DRIVE MOTORCYCLE

Crippled Enthusiast of Cleveland, Okla., Can't Operate Motor Car But Two-Wheeler Suits Him

LOS ANGELES, Cal.—J. H. Booher, of Cleveland, Okla., has bought of the Passmore & Sayre Co., Harley-Davidson retailers, the most expensive motorcycle and sidecar outfit ever sold in Southern California. Mr. Booher has been using an automobile for pleasure and to get about his ranch, employing a chauffeur. He is unable to handle an automobile himself, being crippled both in his legs and hands. He is able to work the controls of a motorcycle, however, and as he wants to drive himself is going to substitute a motorcycle and sidecar outfit for a four-wheeler.

IMPORTER WANTS MOTORCYCLES FOR HOLLAND

J. H. SITTERLEY, of 47 Broadway, New York, writes this journal that one of his clients in Holland is interested in purchasing motorcycles. He desires quotations and printed matter in duplicate, with shipping details and agency proposals, which he will transmit to his client. The client is in a position to make the necessary shipping arrangements with the authorities and, is already doing considerable business in cycles and accessories.

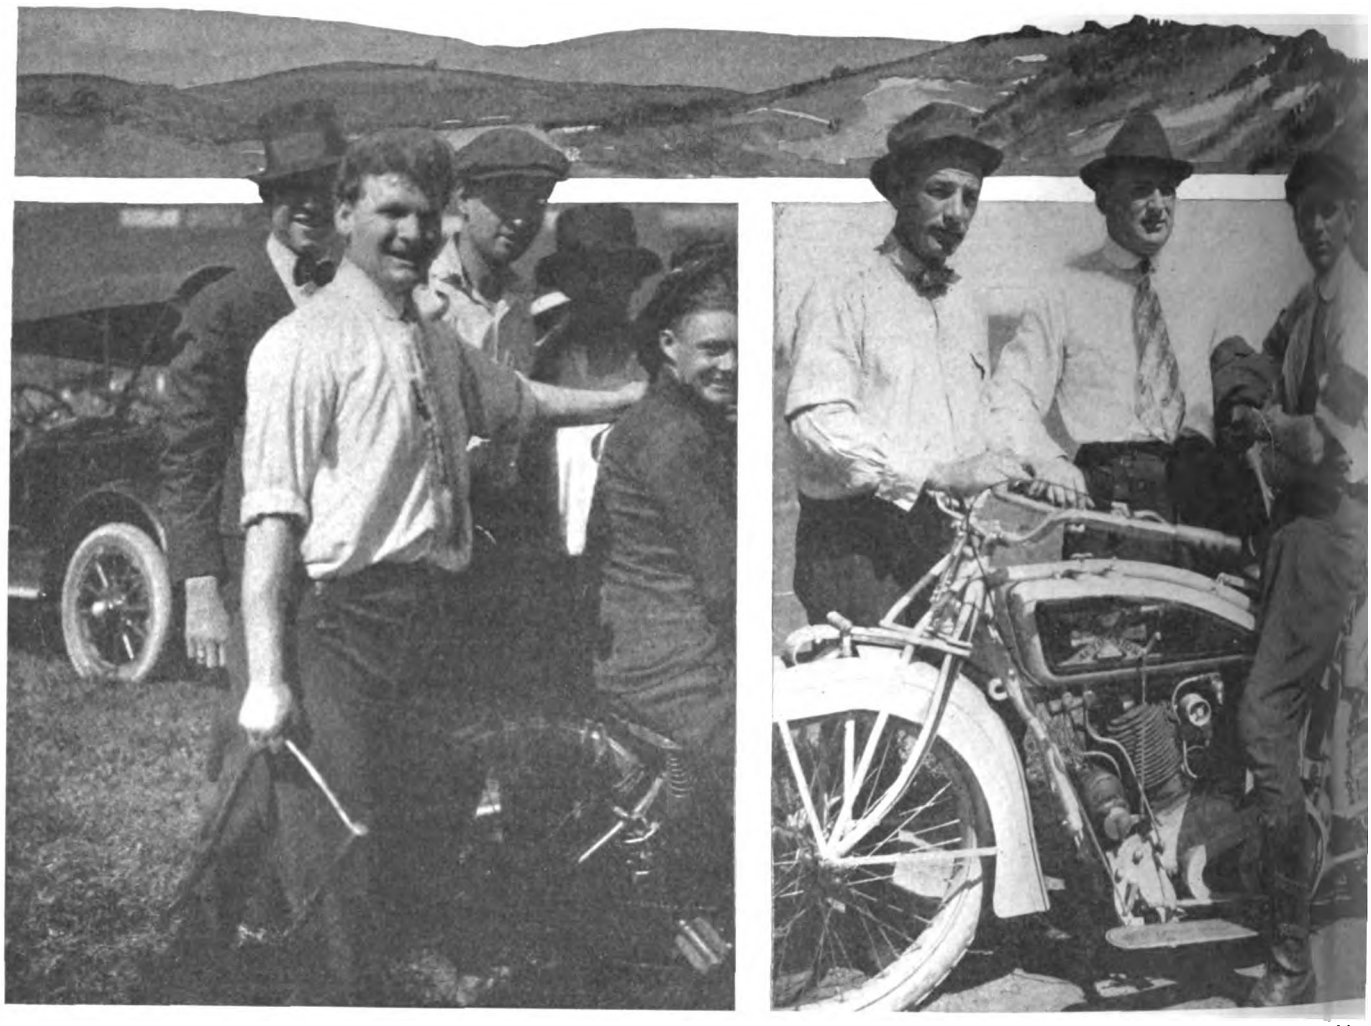
THAT SPECTACULAR HILL-CLIMB OF THE I

Further Details on the Most Remarkable Contest of the Kind Ever Staged in This Country; Just H Waterloo of Many of the Daring Riders; Full Offical Re



Left, F. E. Berry, the Genial Dealer, with Sammy Hamilton Who Won Pro. Climb on Flying Merkel; Right, Wells Bennett, Excelsior

LOS ANGELES, Cal.—While the official results of the spectacular Los Angeles M. C. hill-climb were given in the telegraphic story which appeared in the March 16 number of **Motor Cycle Illustrated**, enough interest has been aroused in the outcome to justify a partial review of the program with a few sidelights on just how the boys went through. It was some circus stuff, buh-lieve me, and all of the performers are entitled to another mention anyway.

It surely was some sky rocketing! It made a fellow's heart beat forty extra to the minute when Wells Bennett got past that terrible hump at the 280-foot mark and straightened out, completing that awful grind to the summit. And you ought to have seen little Sammy Hamilton with his light racing Merkel—well, Sammy's four-foot jump in the air certainly had the crowd gasping. When he was 'way up in the air, he shut off and hit the ground, a very much surprised man.

The **Motor Cycle Illustrated** correspondent was one of the first to reach the hill with, E. A. Trabant, the Valvoline oil man. The latter gave one look to the top of the hill and then gazed at the towering Sierre Madre range to the left, saying: "Ugh! Might as well try the side of Mount Lowe." While the riders were watching the boys placing stakes to mark off the course, one of them was heard to remark: "If anybody spills backwards, he'll fall 20 feet before he hits the ground." And he seemed to be pretty right about it.

There was a hump in the course that turned out to be the Waterloo for more than one rider. The hump was well sur-

rounded by gopher holes, and seven men in succession who tried to cross it failed. To A. L. Rix, the Harley-Davidson agent at San Pedro, went the honor of being the first to get by the hump, but he unfortunately came to grief after climbing 280 feet, the entire length of the course being 400 feet. George Martin also got over and was doing well until he struck a hole at 330 feet and spilled.

Riders and Committee Who Participated in Los Angeles Hill Climb

Wells Bennett, Excelsior, roared up the hill like a veteran Alpine climber. At the hump he clung to his saddle like a leach, dodged the holes, and had the crowd cheering wildly when he passed the flag in the time of 27½ seconds. The next man to get over was Gilmore, Excelsior, while everyone of the remaining starters in the first trial managed to get past the 200-foot mark.

"Blick" Wolters was the first man to tackle the hill in the second trial—each of the riders being allowed four trials in all. When Wells Bennett's turn came again, a ripple of applause went through the throng of 2,000 spectators. Again he shot past the flag, this time in 20 3-5 seconds. Everybody began ot wonder if Bennett would make it straight four. Sahagin, Henderson and Fletcher, Indian, both went out at that heart-breaking hump, and then Roy Artley brought the first Gray Fellow past the flag in 27 seconds.

Lorenzo Boido carried his Indian up in 26 1-5 seconds; Ed. Tice, the Bakersfield speed demon, lowered this mark by 2 1-5 seconds, a performance which he repeated on his Harley-Davidson. "Hap" Gustafson, Harley-Davidson, made a very spectacular climb. He was riding in every

FREIGHT SITUATION BOTHERS COAST TRADE

Jobbers Are Paying $1.50 More Per Hundred Pounds Than When the Panama Canal Was Open; May Have to Raise Their Prices

LOS ANGELES, Cal.—Dealers in California are paying strict attention to the transcontinental freight situation which is imposing upon jobbers added burdens of cost that must inevitably be reflected in prices to dealers, and which will supply another legitimate reason dealers should advance their prices to the general public. The public is reconciled now to the idea of an advance in prices of goods, and there is no sound reason why dealers in bicycles and motorcycles and accessories should not price their goods according to what it will cost to replace them.

Briefly, the history of the trans-continental freight situation is that before the opening of the Panama Canal jobbers having goods shipped from the Atlantic Coast via the Panama railroad saved about a dollar per hundred pounds in freight on their merchandise. When the Canal opened, rates were very slightly reduced, but railroads advanced the coast rate in conformity with the Inter-State Commerce Commission's ruling in the famous Reno freight rate case. Coast jobbers were able to save about $1.50 per 100 pounds on shipments via the canal. Now the closing of the canal and the scarcity of ships has made Isthmian shipments even by the Panama railroad, a practical impossibility, so the freight situation causes an increase in cost to the jobber of $1.50 per 100 pounds over the cost laid down when he was able to utilize the canal.

This means a complicated situation, involving the tying up of large amounts of money, slower "turn-over" and other additional expense which raise the actual cost of doing business considerably above the mere net difference in laid down costs due to the advance in freight rate. Dealers are beginning to appreciate that the war is not altogether responsible for the advance in cost of materials, excepting indirectly as it affects the freight situation. About the only thing they can do is to anticipate future advances by adopting a "buy-it-now" policy, and educating the public to the situation so that they will be prepared for further advances in rates as they are announced by the carriers.

TAMPA SPEEDSTER WINS ON EXCELSIOR

TAMPA, Fla.—One of the most popular and capable speedsters in this district is Louis Torres, shown in the accompanying photograph, who won two five-mile races on

Louis Torres

the half-mile flat track here in the recent meet. Torres mounted an Excelsior.

His time for the first five-mile dash was 6:14 and in the second race he was clocked at 6:12. There are indications that the local speed boys will be active during the coming season and Torres will be found at the tape in nearly all of the races.

BAY STATE ASSOCIATION MEANS BUSINESS

BOSTON, Mass., Mar. 20.—One of the first moves of the Bay State Motorcycle Dealers' Association, which was organized recently, as reported in **Motorcycle Illustrated**, has been to lease and furnish a fine suite of rooms in the Hotel Oxford on Huntington avenue and then turn the headquarters over to the Bay State Motorcycle Club for use as clubrooms. Plans are now afoot to raise the membership of the club to 300 or more.

The Hotel Oxford thus becomes the official F. A. M. and motorcycle headquarters in Boston, where all visiting riders will be given a warm welcome.

The Bay State Dealers' Association is looked upon as the nucleus around which will be built up a very strong body, including all the cycle dealers of Massachusetts, if not of New England.

FETTERLY OBTAINS PATENT ON FRONT WHEEL JACK

ALTOONA, Pa.—John Fetterly, of this city, has been awarded a patent on a jack for the front wheel of a motorcycle. This jack is designed to be carried in the toolbox or in a coat pocket, and is made of very light steel. It is placed under the front axle and raises the wheel by the single motion of a handle.

The jack, after use, lowers the front wheel by the release of a catch on the body of the apparatus.

U. S. RUBBER CO. WILL USE "SUPER TRADEMARK"

NEW YORK, N. Y., Mar. 20.—To clearly distinguish its products from those of other rubber companies, the United States Rubber Co. has determined to use what it terms a "supertrademark" on all of its goods. The U. S. company will make it a point of honor to market under this mark only the best product. In the words of the company, this mark will symbolize what the stamp "sterling" means in connection with silver.

The "supertrademark" consists of a three-part ribbon, the center portion being white, while the outer parts are blue. In the white section will be printed the seal of the U. S. Rubber Co.

STRATTON TO SELL INDIANS FOR NEAL, CLARK & NEAL

BUFFALO, N. Y.—Alva Stratton, well known as an Indian track-man and factory tester, has joined the staff of Neal, Clark & Neal, Indian dealers in this city.

Alva Stratton

Stratton will sell the Powerplus and Featherweight in his new position.

Alva Stratton has ridden in most of the big classics in this country during the last two years, among these being Dodge City, Sioux City, Savannah and Chicago.

COLLEGE FRAT. TOURS FROM CHAPTER TO CHAPTER

NEWARK, N. J., Mar. 18.—Wilbur M. Walden, president of the New Jersey M. C., with Clarence L. Eckhardt in sidecar, left town to-day on his Harley-Davidson outfit for a 2,000 mile—16-day trip—that will take them through Pennsylvania, Virginia, Maryland and New York.

Walden is member of a college fraternity, and each night a stop will be made at a different college that has a chapter of his fraternity. As all arrangements were made several months ago, the two tourists look forward to a big time in each town.

Humming Along in the Face of All Obstacles

***HAMPERED** at every turn by abnormal conditions arising from the European war, by the shortage of materials and the soaring prices asked for those that are at all available, the American motorcycle manufacturer has been sorely tried of late—and has stood the test nobly.*

Even the imposing combination of Mars, the dilly-dallying and rate-boosting railroads and the grab-it-all steel magnates has succeeded only in causing delay and some annoyance in the motorcycle field. The industry is bowling busily along in spite of much interference from sources beyond its control, and the men who produce the power two-wheelers have fully earned the right to consideration among the country's most solid and dependable manufacturers.

BIG CAMPAIGN TO INCREASE F. A. M. MEMBERSHIP

Officials Are Lining Up All the Forces of the National Organization for a Concerted Drive at the 20,000 Mark; Special Plans for Week of April 17-22

WHAT promises to be a thorough-going, whoop 'er up membership campaign, with all the trimmings, has been started by President A. B. Coffman, of the F. A. M., and his lieutenants, and the prime feature of the plans as they have been worked out so far is the big drive that will be made during the week of April 17-22. During that week all the forces of the F. A. M. will be concentrated upon boosting the membership by leaps and bounds, and it is hoped that the pace then set will be continued until the National Body reaches a size commensurate with its importance in the motorcycle field.

Schwinn's Generous Offer

Attention is again called to the fact that Ignatz Schwinn, head of the Excelsior Motor Mfg. & Supply Co., which manufactures the Excelsior motorcycle, offered at the last national convention in Sacramento, Cal., to donate $500 to the treasury of the F. A. M. as soon as its membership reached 20,000. He supplemented this offer with another to give a second $500 when the F. A. M. became incorporated. So there is a purse of $1,000 hung up as an incentive for Federation workers to get out and do their prettiest.

Mr. Schwinn simply adopted that method of proving that he is a practical booster, and he asserts that nothing will please him more than an opportunity to place his monicker on two $500 checks when the F. A. M. has lived up to the stipulated conditions. "It'll be worth that much to me to see the Federation of American Motorcyclists assume its proper place in the motorcycle affairs of the country," said Mr. Schwinn a few days ago, "and I am quite sure that once the riders have such a representative organization they will take pains to see that it continues to grow. Let the clubs and members get out and hustle to increase the membership. As soon as the required amount of work is done the rewards will be waiting for them."

Snappy Literature Coming

President Coffman is now working on a choice line of F. A. M. literature which will be sent out broadcast within a week or ten days, and already a number of the "old line" boosters throughout the country are whooping things up in their districts. P. E. Zimmerman, the picturesque and ever-ready live wire, of Lindsborg, Kan., is shooting out characteristic letters in all directions, instructing his friends to get into the harness for a big pull and a long pull. And "Zim" knows how to start things. He winds up his appeal for co-operation with this typical sentence: "Kindly acknowledge this letter something like this—'Zim, I'm GAME TO THE CORE. Count on me to THE LIMIT.'"

Help of Dealers Wanted

The F. A. M. counts on the assistance of every motorcycle dealer, in view of the fact that a strong Federation membership in a city or town means a strong and prosperous club, and a live club means business for the dealer. The membership campaign is being presented to dealers largely as a business proposition, but in addition they are being appealed to on a sentimental basis.

From present indications the dealers of the country will give an excellent account of themselves in the membership work. Many of them have already pledged their enthusiastic support for the project of obtaining 20,000 F. A. M. members.

G. B. Gibson, secretary-treasurer of the F. A. M., and John L. Donovan, chairman of the F. A. M. Competition Committee, are working like beavers these days on membership plans to supplement those of President Coffman, and both predict that the Federation enrollment will not be far from the coveted 20,000 mark when the present movement has been carried to the climax.

Suggestions From Commissioners

State F. A. M. commissioners are invited to write to Chairman Donovan, 811 Ashland Block, Chicago, Ill., stating their membership plans and offering any suggestions they may have for furthering the work. In return Chairman Donovan will pass out all the pointers at his disposal and give his fullest co-operation. General information concerning the membership campaign may also be obtained from Secretary-Treasurer G. B. Gibson, Westboro, Mass., and from President Coffman, Toledo, Ohio.

HERE'S A SUGGESTION

If you line up fifteen or more members for an F. A. M. club you will save each of these riders one dollar on his entrance fee. The initiation fee and a year's dues amount to two dollars for the individual, but by entering as a club a group of riders will be called upon to pay only one dollar per man. Fifteen riders or more gives you the privilege of entering as a club.

NOW GO TO IT!

THIS IS CHAIRMAN DONOVAN'S FIRST GUN IN THE CAMPAIGN FOR 20,000 F. A. M. MEMBERS

TO THE MOTORCYCLISTS OF THE UNITED STATES

The F. A. M. is the only association which looks after and protects your interests. Its ability to serve you depends upon the support you give it. The more members the more it can do for the motorcyclists. At the National Convention held in Sacramento, Cal., Mr. Ignatz Schwinn, of Chicago, made the following offer: When we have 20,000 members in good standing he will donate to the Treasury Five Hundred Dollars. If we then incorporate as a legal body, he will add another Five Hundred Dollars; making in all, One Thousand Dollars.

To meet these conditions it is only necessary that each member get at least one more motorcyclist to join. This should be easy to do with 200,000 motorcyclists in the United States. F. A. M. Clubs should be especially interested as they receive a part of the membership fees, and doubtless each new member would join the local Club, to its benefit.

April 17th to 22nd, inclusive, has been set aside as a special week in which to secure the new members. All memberships should be sent direct to G. B. Gibson, Lockbox 947, Westboro, Mass. Do not wait until then, however; send them along so the Secretary can readily handle the work. The membership receipts will put the F. A. M. in a good financial condition so it may increase the benefits to its members. CONCERTED ACTION WILL BRING THIS RESULT AND SECURE THE ONE THOUSAND DOLLARS.

Yours very truly,

JOHN L. DONOVAN,

Chairman.

THAT $10 ACCOUNT MAY COST YOU $500

A Heart-to-Heart Talk with Dealers on the Wisdom of Keeping Small Bills Off Their Books; How a Long-Standing Account Often Scares a Patron Away

By RODMAN BARRY

WHEN a patron with whom you are fairly well acquainted asks you to carry over a small account on your books for him, and you grant the request, it is quite natural that you should regard the operation as a fine little diplomatic hook in that patron's future business. Perhaps you are right—we would like to believe that you always are—but the cold facts are against you. *Very often you are wrong.*

If you could be shown that by carrying over a trifling account of $8 or $10 you were framing up a situation likely to cost you the sale of Mr. Patron's next motorcycle you would begin to think pretty hard—wouldn't you? Still that is just about how the credit proposition works out, unless it is kept well in hand by a dealer who knows how to watch his step.

Where Diplomacy Is Needed

"But I can't grab a customer by the neck and take the money away from him, can I?" you remonstrate. "If I squeeze him for a small accessory or repair bill, he'll get sore and quit me cold."

Well, there is a chance that you will lose his trade, but if he doesn't pay his bills you won't suffer greatly by having him shift his patronage elsewhere. And—this is the big point—*you are going to lose his business anyway before many moons pass if you continue to carry that small account of his on your books.*

It is one of the queer twists of human nature that the average man will not continue to patronize a store after the proprietor has carried a bill against him for a long period. Mr. Patron will usually begin to change his attitude by experiencing a certain feeling of shame, and from time to time he will resolve to settle the little bill and get it off his mind. *But while he is making those good resolutions he is more than likely to remain away from the store.*

Making Excuses Is Unpleasant

If he is forced to come in for supplies or repairs he will probably appear somewhat shamefaced, and will offer an excuse for not cleaning up the old account. *But making those excuses is unpleasant to him, and finally the idea of facing you while that account is hanging over his head will become extremely distasteful.*

"I'll have to dodge Jim's place until I wipe out that rotten little bill," he soliloquizes finally. "I'm tired of going around there and feeling like a dead-beat. I don't intend to trim him, of course, but I can't loosen up that much spare coin at this minute, so I'll buy the few things I need somewhere else until I can go around, plank down the cash and look Jim in the eye. Jim's a good skate, and he's certainly given me a square shake, but gosh-darn it! I'm touchy about money matters and I don't want to show up at his place again until the slate is clean."

Now, the chances are excellent that Mr. Patron is a good fellow, and a worthy member of the motorcycle fraternity at heart—but he's human. Other men put off paying bills as long as they reasonably can, and it would be rather strange if he didn't do the same thing. So the little bill drags on; and the longer it drags the less Mr. Patron likes the idea of going around to pay it.

The Beginning of the End

Finally there may develop (it's strange, but we've watched it work out) a certain feeling of mild resentment on the part of Mr. Patron against the dealer. There's no use in going into the psychology of the thing. It's enough to know that such things have happened, and that they are likely to go on happening as long as human nature holds out.

And once that feeling of resentment comes into existence, Jim has lost a friend and a buyer; and Mr. Patron begins to look about for another place to take his trade.

Just why Mr. Patron should get "sore" when Jim has done nothing but befriend him is a problem the writer will leave for some one else to tackle—but the fact remains that in many cases he does get "sore"; so "sore" eventually that he may knock Jim's methods and Jim himself. He feels, no doubt, that Jim is "thinking things" about that little account; that Jim is misjudging him.

Some One Else Gets the Business

And finally he says: "Let him misjudge; there are other motorcycle stores I can deal with. I never meant to keep him out of the money, but if he wants to get uppish about it, why I'm through."

Jim didn't get "uppish," mind you—in fact, he's beginning to sweat a bit over the thought of losing Mr. Patron's business—but just the same that's the way Mr. Patron comes in the end to think of the matter.

And there you are. When the time arrives for Mr. Patron to buy a new motorcycle he is almost certain to buy it from some one other than Jim. It is possible that he will even be willing to change his make of machine to avoid going back to Jim. So it comes about that Jim and the factory both suffer—without the motor being at all in fault. There are seasoned dealers who can give you all the facts in such cases. They will stand investigating.

As you read this, leaning back calmly in your desk chair, you may feel that the picture has been overdrawn; that a little $8 or $10 bill could never start such a costly train of trouble. But don't fool yourself on that point.

NEW SPLITDORF BUILDING TO COST $200,000

Huge Addition to Plant in Newark Will Have Floor Area of 115,000 Square Feet and 30,000 Square Feet of Windows; Will Probably Be Occupied About July 1

NEWARK, N. J., Mar. 20.—What will, it is said, be one of the best lighted factory buildings in this part of the country is about to be erected for the Splitdorf Electrical Company, of Newark. It will be a fireproof building of reinforced concrete, to cost approximately $200,000, and will contain more than 30,000 square feet of window glass about its four sides.

The buildings comprising the present plant will not be disturbed in any way, and will continue to be fully utilized for manufacturing purposes.

The new structure is to be erected by the American Concrete-Steel Company on plans prepared by Monks & Johnson, architects, of Boston, and specialists in factory construction. It will have a frontage of 300 feet and will be 60 feet in depth. Considerable progress has already been made.

The total floor area will be 115,000 square feet, or about 2¾ acres. The welfare and convenience of the employes have been carefully considered. Adjoining the main building and centrally located is an "L" measuring 65 by 20 feet and completely equipped on each floor with washrooms, toilet facilities and locker rooms of the most modern type.

While the building will be of concrete, its exterior will be relieved of plainness by a skillful use of colored tile and embossing work. Practically the entire four sides of the building will be of glass, excepting the columns of concrete supporting the roof. There will be 180 windows on each of the long faces, these to have dimensions of 17 feet by nine feet four inches. On each of the ends there will be 18 windows of similar size.

To safeguard the contents of the building a sprinkler system is to be installed. It is understood that this is the first of several extensive improvements about to be made in the plant of the electrical company. The new structure will probably be ready for occupancy by July 1.

The Splitdorf Electrical Company has long since outgrown its old quarters and the addition is necessary to enable it to care for increasing demands. The company produces magnetos and electrical starting systems exclusively, and at the present time is furnishing electrical equipments for over 35,000 automobiles per month. During the past year the output was more than doubled and the working force has grown to 2,400 employes. In additions 400 are employed in the factory at Sumter branch and 300 in the branch stores.

MILWAUKEE M. C. ENTERTAINED THE LADIES

Pleasant Affair Was Held in the Clubrooms at Which an Excellent Menu Was Topped Off by Speeches and Lots of Sociability

MILWAUKEE, Wis., Mar. 22.—The local fraternity will be a long time forgetting the recent banquet tendered by the Milwaukee Motorcycle Club in honor of the ladies of the organization. It had been intimated that the club was not doing the right thing by the wives and sweethearts, also sisters and friends feminine. There were altogether too many stags on the program of sociable events at the clubhouse.

So the matter was brought to a climax by a rousing speech made by E. Miller, the quietest man in the club's membership, against the growing spirit of what he frankly termed roughneckism and the evil which it would accumulate if allowed to continue. "One nice, big feed for the ladies," he said, "would circumvent all the power of evil likely to be held against the club's reputation." It was with misgivings that details of the plan were taken up. "It can never be done," was the consensus of opinion.

On the night of the banquet the clubrooms were crowded. Every member had a lady and some had two. President Grier, leader of the bachelors, could not help but carry a smile of satisfaction all evening. The speeches that followed the serving of the excellent menu were short. E. J. Mueller, the club's first president, who resigned at the time he was married and became the responsible head of a family, but who has since rejoined the Milwaukee club, expressed the hope that the organization would promote many short tours this season. Lacy Crolius put in a plea for clean riding.

E. Miller, the fellow responsible for the banquet, also spoke, as did Alex Landry, tour chairman; Don Stevens, local Firestone publicity man, and Hugh Sharp, the club secretary, who asked the ladies to keep after their gentlemen friends so that affairs like the banquet would frequently be held in the clubrooms.

UTICA EXCELSIORITES ENJOYING WINTER'S SNOWS

FOUR CLUBS CLIMB MOUNT HAMILTON DURING RUN

SAN FRANCISCO, Cal., Mar. 20.—The opening of the motorcycle sporting season was marked here on March 12 by an interclub run of 150 miles to the Lick Observatory on the summit of Mount Hamilton. Four clubs participated in this event, which was a success from start to finish, these clubs being the San Francisco, Gilroy, Bay City and San Jose.

The weather was magnificent and the clear, crystaline air afforded a view of more than one hundred miles in all directions from the top of the mountain. The roads were in ideal condition except for a few dusty spots. A large number of riders were in the long line of machines, over 75 motorcycles being counted on the summit of Mr. Hamilton at one time.

Perhaps the most notable feature was the presence of such a large number of side cars. After the San Francisco M. C. awarded souvenir ribbons to those who reached the top of Mt. Hamilton, the riders went through the conservatory. Members of the San Francisco M. C. left their city as a body and stuck together throughout the run, winding up the affair with a little informal banquet at the Mission Restaurant.

Several very interesting features were noted on the trip, one being the fine performance of an Excelsior lightweight. A rider of a Thor twin negotiated the 365 curves up the steep grade between the Smith Creek and the summit in remarkably quick time without stopping.

WHY THE FUNKE COMPANY'S A HUMMER

TENTH IN A SERIES OF BIOGRAPHICAL SKETCHES OF TRADE LEADERS

After Gathering Laurels in Practically All Branches of Athletic Endeavor Herbert F. L. Funke Tackled Big Business and Once More Rang the Bell; Some First-Hand Pointers on How He Has Cornered Most of the Attributes of a Movie Hero and Also Found Time to Bring His company to Success

CRACK shot, expert ice-hockey player, motor and sail-boat adept, chairman of one famous yacht club, one of the governors of another, swimming "shark," automobile and motorcycle enthusiast—no, Nectarine, this isn't a description of a Laura Jean Libbey hero—it's just a partial list of the accomplishments, predilections, tastes and offices of one of the most picturesque figures in the cycle trades. Meet Mr. Herbert F. L. Funke, president of the Herbert F. L. Funke Company, importers of "The Coventry" chains, exporters of cycle and automobile accessories and eastern distributors of the Cleveland lightweight motorcycle.

He Jes' Kept on Growing

This six feet three inches of American manhood first opened his clear blue eyes and squalled his Declaration of Independence thirty-three years ago in a little cottage on Long Island—College Point, to be exact. He wasn't *quite* six foot three then. Like many other children, as soon as Herbert was born he started to grow. But—here's the difference—poor little Herbie didn't seem to know exactly when to *stop* growing. As a natural consequence of his superiority in size and strength, he quickly assumed the leadership among his friends in all sports and games. Thus, to-day, Funke is endowed with the manly accomplishments of a popular moving-picture hero, with the physique of a Jess Willard and the complexion of a debutante.

But brawn without brains is like a grape-juice cocktail; it doesn't get you anywhere, and Funke's training was by no means confined to development of his physical prowess. His parents being blessed with a fair share of the root of all evil, Herbert was sent to private school for a time until his naturally democratic proclivities rebelled at the implied snobbishness of private tutoring and he prevailed upon his folks to send him to the Flushing Institute. After graduating with honors, Funke was enrolled as a student in Columbia University, where he took a special engineering course. But two years of this was enough for him, and in 1899, at the age of 16 years, Funke scuttled the ship of Education and jumped with both feet into the sea of Business.

First Job in the Cycle Field

His first job was with Herman Boker & Co., who were at that time importers of bicycle accessories and agents for the Badger Brass Manufacturing Company. They also handled the Belvidere and IXL bicycles. As Funke humorously puts it, "I was a director in the company. What did I direct? Oh, envelopes, circulars and other mail matter." Very shortly after joining the company, Funke was relieved of his directing responsibilities and was sent on the road as a salesman. He made good and remained with Boker & Co. until 1901, when he transferred his allegiance to A. H. Funke, his uncle, who took over the auto and cycle accessories departments of Boker & Co.

Funke assisted materially in imbedding the roots of the motorcycle's fame in this country. He claims the distinction of importing the first motorcycle into the United States—a Belgian machine, the Kelecom. As he recalls it, it was a single-cylinder, belt-drive, two-cycle, battery ignition arrangement that worked somewhat erratically, due perhaps to a perfectly pardonable homesickness. In 1902, the Funke Company took the agency for the F-N carbureter, first used by the Pope Manufacturing Company.

HERBERT F. L. FUNKE
He Stands Six Feet Three Inches High and Does Everything on a Proportionately Large Scale

In 1905 the Funke Company took over the agency for "The Coventry" chains, which department was handled by Herbert Funke. In 1907 Funke personally took over the handling of "The Coventry" chains, S. Hofnung & Co., a large importing and exporting firm, acting as his financial backers. In 1912 S. Hofnung & Co. closed their New York office, and Funke made the same arrangement with the Sarco Engineering Company, importers.

In the summer of 1912 Funke threw back his huge shoulders, heaved a couple of sighs, sighed a couple of heaves, unbuckled the Sarco Company's life belt from about his financial waist, and struck out boldly for himself. He incorporated his own company, formed principally to exploit "The Coventry" chains, secured the representation in the United States for the Brown & Barlow carbureter and other important motorcycle, bicycle and automobile fitments, contracted for the exportation of a few million feet of bicycle tubing and otherwise disported himself in the sea of business like a young sea-lion. But, as stated before, Funke is a fiend at swimming, and so far has managed to keep afloat, if the following items are any indication:

Count 'em, Folks, Count 'em

One superb residence in Flushing, Long Island; one immeasurably charming wife (acquired in 1912); one husky youngster, Herbert, Jr., who arrived in due course; one Kisselkar, 1916 model; two 32-foot motor boats, one sailing vessel. Money in the bank? Sure, we saw the bank-book. How much? S'nuff. In addition, Funke has just secured the extremely lucrative post of eastern distributor for the Cleveland motorcycle and has so far exceeded even his own roseate sales expectations.

And so, before fading out the picture, we will take a "close-up" of this really big man, seated in a big chair, at an imposing desk, dictating in a big, calm voice to a large, handsome lady stenographer who smiles a big beaming smile as the curtain falls.

VALVE TUNING DESCRIBED IN MARCH "DEALER"

ELOQUENT of the coming joys of spring and summer riding is the colored scene which occupies the cover of the March issue of the *Harley-Davidson Dealer*, the instructive house organ of the Harley-Davidson Motor Company, of Milwaukee, Wis. The scene, which is in natural colors, shows two riders on a country road waiting for a companion to overtake them.

The leading article in the book is on the importance of valve tuning, with illustrations showing the proper stem clearance and other details relating to the operation. The use of the front mudguard place as an advertising feature for the dealer is mentioned. Full reports, with photographs of the various attractive Harley-Davidson exhibits at different motor shows, occupy a goodly portion of the issue, as well as news of live dealers from all parts of the country.

WHY THE U. S. ARMY NEEDS THE MOTORCYCLE

A Summing Up of the Widely Varied Military Branches in Which the Power Two-Wheeler Will Give Inestimably Valuable Service; Interesting Data for Army Men and Motorcyclists

By D. R. HOBART

ANOTHER article in the military series being published by Motor Cycle Illustrated is given below. It is of special interest in view of the fact that it presents the first complete summing up of the motorcycle's military possibilities ever printed in an American journal. The branches of service referred to have been included in the list after due consideration of both mechanical and military requirements, and after consultations with military officials who advocate extensive use of the motorcycle in the United States Army.

This is in line with the constructive work started by **Motor Cycle Illustrated** a year ago to call attention to the military advantages of the power two-wheeler, and is the second article in a series now running which is designed to impress upon military men, and upon motorcyclists, the necessity for a reasonable system of provisional training to the end of fitting riders for service in defense of their country. The first article in this series appeared last week.

Consider the widely varied branches of service possible to the motorcycle as set forth below. Mr. Army Man and Mr. Motorcyclist, and then see if you can conceive of any other vehicle more likely to prove its general worth in military work than the power two-wheeler.

AS has been demonstrated ever since the opening of the European war, the motorcyclist is invaluable to the army in a variety of ways, and this with very little preliminary training. Practically all riders have read or heard something of despatch work, in which the rider is sent from one headquarters to another bearing messages, but the scope of the machine and rider does not consist wholly of this work. A most important point is in scouting, of which there is comparatively little said in the reports nowadays, although much of it is going on.

In scouting, the rider is sent ahead of the forces on his machine, equipped with field glasses and a note book. Dismounting and placing his machine out of sight, he takes cover and endeavors to locate the enemy by signs such as smoke (when the troops are in camp), dust (low-lying and slow rising indicating infantry, etc.), shaking of bushes (troops moving through woods), cries of birds, and the like. Carrying a pocket compass, he locates the general direction of the movement with regard to north and south; when troops are visible, he endeavors to estimate their numbers by the ground occupied. On getting the news, he mounts his machine and rides back to make his report.

The signaller is very often a motorcyclist, using a flag or hand-signals by day and electric torches by night. Elaborate systems of signals by the position of the legs or hands when the motorcyclist is lying down or crouching have been worked out, and the field for this purpose is unlimited. Outside of the necessary signal-training, any intelligent motorcyclist can learn these things in a few days of work in the field.

For Convoy Service

Convoy work, i. e., accompanying wagon trains or armored cars, is another line for the motorcyclist. The riders scout ahead for information; form an advance guard or rear guard; carry orders to and from the train; assist in defending it or bringing up troops for its aid. The pace for such work is relatively slower than that used in despatch service, where the highest speeds are often needed, but the rider is kept on the alert at all times.

The telephone and telegraph find extensive use in modern warfare, and the rider is employed in caring for wires—making connections, cutting in instruments to get information to headquarters, and protecting the lines from destruction by the opponents. He also works to interrupt communication in enemy telephone and telegraph systems.

The speed and cross-country ability of the motorcycle makes it a fine vehicle for raids. These go to the rear of the enemy, or on his flanks, in small parties, often armed with means for blowing up bridges, etc. These parties destroy signal stations,

GET YOUR CLUB IN LINE

MOTORCYCLE clubs all over the country are invited to co-operate with Motor Cycle Illustrated in the campaign for provisional training of riders along military lines. As soon as a sufficient numbers of clubs have signified their willingness to assist in the movement this journal will print an Honor Roll of the clubs and riders and later a special pennant, bearing suitable insignia, will be prepared by Motor Cycle Illustrated for distribution to the motorcycle corps of the various clubs.

Take the matter up now in your club, and write Motor Cycle Illustrated of your plans. Your letter will be published by way of assisting other clubs to work out their plans.

KEYSTONE M. C. GETS BUSY

The first club to promise its co-operation is the Keystone M. C., of Harrisburg, Pa. Secretary Walter Holtz writes as follows:

"I noticed that in the March 16 issue of Motor Cycle Illustrated you had a page devoted to training motorcyclists for defense, so I am writing to tell you that the Keystone M. C. started a corps with twenty-five volunteers on the first night that we mentioned the subject. We have written to the Secretary of War at Washington for information. Three members of the club have been named to look into the matter, and we would be glad to receive any suggestions you may have to offer."

bridges and stores depots, ambush supply trains or artillery without escort, stampede horses and gain information. Their speed makes them difficult to capture, unless the roads are blocked or the force is surrounded. It is needless to state that work of this kind is risky, but is highly attractive, even in manoeuvres.

Transporting Troops

Troops in small numbers can be rushed to a threatened point by mounting them on tandem. This was shown on a small scale during the Van Cortlandt Park, New York, manoeuvres last fall. When automatic rifles are used, this brings added gun-power into the firing line, as the gunner with his rifle can go on tandem and other 'passengers" can carry the ammunition. Ammunition can be carried by strapping it on the carrier.

Wheeled machine guns can be moved at speed from point to point by the motorcyclist towing them, or carrying the piece dismounted with its operator. The tripod can be transported on a second machine.

The motorcyclist can assist the forces in blocking roads. As an illustration, a party of riders can impede enemy movements by tearing down fences to prevent cavalry or vehicles moving on them. They can put down barb-wire entanglements and hold them until reinforced.

These are a few of the things which the solo rider can do to serve his country in war. The sidecarist can transport one or two other troopers or can carry a machine gun and two of the crew, as well as ammunition. Fitted with a stretcher, the combination can carry wounded. Supplies of all kinds can be carried in the sidecar, in fact. Portable searchlights can be transported, with dynamos driven by the motor of the machine to furnish current.

NINE REASONS WHY UNCLE SAM'S ARMY CANNOT GET ALONG WITHOUT THE MOTORCYCLIST

1—Despatch riders are needed. The horseman has not enough speed and is too prominent a mark for such work, while the infantryman is much too slow.

2—Scouting work as well as signalling can be efficiently performed by motorcyclists, by reason of the high speed of the machines, the ease with which they can be concealed and their readiness for service at all times.

3—For convoy work, with the wide use of motor vehicles for transport, the motorcycle is the only vehicle which can keep pace with the train and at the same time keep in communication with headquarters, etc.

4—For telephone and telegraph service the lines can be kept in order by riders who can swiftly move from place to place with the necessary repair kit and apparatus.

5—As raiders, motorcyclists can be used to advantage because of their speed and ability to take cover. They can carry means for demolishing enemy structures.

6.—The motorcyclist can put two men in the firing line at any threatened point, carrying a man on tandem for the purpose, and do this at speed.

7—Machine guns can be carried in emergencies by riders, or towed in and out of action.

8—The sidecarist can transport three men to threatened points during an action and can carry ammunition, supplies or machine guns. It can be used for foraging.

9—Searchlight work, wireless telegraphy and the transportation of wounded are functions to which the sidecar is best adapted in quick operations over varying country.

DELIVERED THE GOODS FOR UNCLE SAMMY

Harley-Davidson Motor Co. Received An Order For Motorcycles Last Friday Morning and Shipped Them the Same Day

MILWAUKEE, Wis., Mar. 21.—To be asked for a bid by the government at 10 o'clock Thursday morning, to submit figures, get the order, and then have the Gray Fellows at the Mexican border by 10 o'clock Saturday morning, is the remarkable record achieved by the Harley-Davidson Motor Company in shipping a consignment of the Milwaukee product to Uncle Sam's forces at El Paso and Fort Sam Houston.

"The government order was a good test case for us," says E. J. Mueller, assistant sales manager of the Harley-Davidson factory. "We received the order to ship twelve machines at 9 o'clock Friday morning and at 5 o'clock that afternoon the Wells Fargo dray was at our shipping door loading up to catch the 5:45 express for Chicago, Ill.

"Each machine had to be fully equipped with lights and tandem carrier. An extra casing and inner tube went with each. The train carrying the machines had the right of way from Chicago clear through to El Paso and San Antonio."

While it is not definitely known what purpose the Harley-Davidsons will serve in the Mexican rumpus, it is expected that they will be used in connection with motor truck divisions, the aviation corps and for dispatch riding. Under present military practice there is assigned to each motor division five motorcycles and each aeroplane has a motorcycle escort besides those used by the mechanicians in the aero squadron.

MOTORCYCLE ESCORT FOR ARMORED CARS

Plans Call for Twenty-five Motorcycles in New York National Guard Body—More Soon

NEW YORK, Mar. 20.—The first armored car battery in the United States has just been formally organized in connection with the New York State National Guard, and will have an escort of about twenty-five motorcycles for the present. It is the intention of the officials to add to the motorcycle corps from time to time until the single-trackers number about 75.

The generous allowance made for motorcycles is the direct outcome of the excellent impression created during the military maneuvers last Fall in Van Cortland Park, when scores of motorcycles were employed in various branches of service.

NEW YORK N. G. FORMS A MOTORCYCLE SQUAD

Twelve Riders Are Regularly Enlisted in State Body to Act as Despatch Bearers and Scouts

NEW YORK, March 21.—The National Guard of the State of New York has its first quota of regularly-enlisted riders, at present 12 men strong. It is proposed to raise this number of 18 in the course of a few days. The detachment is in charge of Lou Guterman, a veteran rider and guardsman, who holds the rank of second lieutenant.

By reason of there being no provision at present for the distinct formation of a motorcycle squad, the men are assigned to Company F, 71st New York infantry. They are detailed to division headquarters for work as despatch riders and scouts. Their formation has received the sanction of Major General John F. O'Ryan in command of the New York Guard.

The move in this direction was the outcome of the efforts of Captain Lorillard Spencer, now on the Governor's staff, and Major Allen L. Reagan, Inspector General for the Guard. This movement first took shape in the maneuvres at Van Cortland Park last September, where the motorcycle demonstrated its abilities as a vehicle for war service. Those desiring to join the detachment, apply to Mr. Guterman, 178 East 95th street, this city.

MANY WINNIPEG RIDERS ARE NOW IN KHAKI

WINNIPEG, Manitoba.—President R. G. Irvine and officers of the Winnipeg Motorcycle Club have decided to keep the club on the active list this year although fifty per cent. of the members are now in khaki. Several of the club's prominent track speedsters and others are now serving as despatch riders with the British and Canadian armies in France and the activity of the club in holding many race-meets has been justified on this account. The officers are already making arrangements for the annual spring meet on May 24. The club held an enthusiastic meeting and concert on March 1.

FIVE MORE INDIANS FOR MEXICAN SERVICE

Last Week's Order for Fifteen Has Been Supplemented by a Call for Another Quintet to Be Used by United States Army Riders

NEW YORK, Mar. 20.—Out of a field of five competitors among whom were four factories, the New York Sporting Goods Co., Metropolitan distributors of Indian motorcycles, was successful in securing the order for fifteen Indian motorcycles, to be used in Mexico in connection with the U. S. Army expedition against Villa.

The bids were opened at 11 a. m. last Tuesday, and not until 9:30 a. m., of that day, was the New York Sporting Goods Co. aware of the opportunity to secure this business. However, prices were figured out quickly, and the bid was in the hands of the Quartermaster's Department within the required time.

In less than a week the machines were equipped and delivered to the Adams Express Company, to be sent direct to the Quartermaster's Department, El Paso, Tex.

An order for five more of these same machines has since been awarded, and the last five will be rushed through the factory so that they will arrive at their destination only a few days after the original shipment.

The machines furnished on the above bid were Model G, three-speed, 1916 Indians, with the following equipment: F-N tandems, Old Sol headlights, Prest-O-Lite gas tanks, 20th Century tail lights, Hand-Phone mechanical horn, and Corbin-Brown rear-drive speedometers.

The frame and all nickel parts of these motorcycles are enameled olive drab. This color is extremely unobtrusive; in fact, motorcycles finished in this way, when placed against a green background, such as an open field, shrubbery, trees, or even against open plowed ground, are practically invisible at a short distance.

FOLLOWING IN FATHER'S TIRE TRACKS

Edwin and Herbert Gale, Sons of M. E. Gale, on Emblem Lightweight Twin in Angola, N. Y.

ANOTHER MERKEL GOES TO HELP GUARD CANAL

NEW YORK, Mar. 21.—The corps of motorcycles now being used for army patrol work along the canal in Panama has been increased by the purchase of another Model 675 Flying Merkel. Six Merkels of this model have been supplied to the Government of late for similar service in Panama, and the fact that another order has been put through by the Quartermaster indicates that the results obtained from the motors on the Isthmus are satisfactory.

THEY ARE FIRESTONE-EQUIPPED

AKRON, O.—The shipment of Harley-Davidson motorcycles which was rushed to the Mexican border on twenty-four hours' notice, carries Firestone Non-Skid tires and Firestone tubes throughout. The Firestone folks are rejoicing over this opportunity to prove that their tires are capable of standing up under all the unusual stresses and wear of service along the border and in Mexico with General Funston's force.

MAKE YOUR DOORWAY A MAGNET, MR. DEALER

Businesslike Methods and a Friendly Smile Will Do It.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

MANSFIELD, O.—W. C. Reinohl, proprietor of Reinohl's Garage, at Mulberry and Sixth streets, is anxious to communicate with manufacturers and jobbers of bicycles, automobile accessories, small tools and lubricating oils. Catalogs are requested as a preliminary.

STURGEON BAY, Wis.—H. S. Hall will hereafter continue the business of Hall & Wilke, recently dissolved from partnership. Catalogs on bicycles, automobile accessories, small tools and lubricating oils are requested.

LA PORTE CITY, Iowa.—St. Clairs & Franklin have bought out the business of the E. G. Moon Hardware Company and will deal in automobile accessories, lubricating oils, small tools and bicycles. Catalogs are requested.

MILDFORD, MASS.—Cass Brothers have moved to 61 Main street and will carry a line of automobile accessories, bicycles, lubricating oils and small tools.

CLAREMONT, S. D.—The Home Lumber Company requests catalogs on bicycles, automobile accessories, and small tools.

WEST PALM BEACH, Fla.—The East Coast Hardware Company has just been incorporated and requests catalogs and prices on automobile accessories, bicycles and lubricating oils.

ODESSA, Mo.—The Allen & George Hardware Company has opened a store and will deal in bicycles, automobile accessories, small tools and lubricating oils. Catalogs are requested.

VERNON, Texas.—The Vernon Hardware and Implement Company has just been incorporated and will deal in bicycles, lubricating oils and small tools, on which catalogs are requested.

PRETTY PRAIRIE, Kas.—The Western Hardware and Implement Company has been incorporated to deal in small tools and lubricating oils, on which catalogs are desired.

HOWELLS, Neb.—Baumert & Bogner have purchased the store of Joseph Novak and request catalogs on the following: bicycles, lubricating oils, accessories and small tools.

PHILMONT, N. Y.—A. F. Dexheimer, handling the Excelsior in this city, is desirous of hearing from jobbers and manufacturers of motorcycle accessories. Catalogs and other information are requested as a preliminary.

VERNDALE, Minn.—The E. W. Dickinson Company has succeeded Dickinson & Ireland. Catalogs on bicycles, lubricating oils and mechanics tools are requested.

WHAT "O'B" DID WITH A FEATHERWEIGHT

Indian Parts Man Carries Heavy Passenger on Luggage-Carrier of the Little Fellow Through a Severe Snowstorm in Newark's Suburbs

By GOSLIN

NEWARK, N. J.—James Howard O'Brien he was christened and Newark was his home town until the Hendee Manufacturing Company wanted a good man, so he now registers from Springfield, Mass., and is known from Maine to California as "O.B." His regular role is managing the Indian Parts Department, but ever so often he hits the trail for this man's town and with his advent motorcycle doings speed up a trifle.

"O'B," back in 1914, introduced to the Newark riders that now well-known trick of aeroplaning the sidecar wheel, which is on the police blacklist as being too spectacular. That same year he piloted the Indian team to victory in the New Jersey M. C. run to Baltimore. Last year he came down with his braves and again cleaned up in the N. J. M. C. contest.

Boosted the "Little Papoose"

Last week he was in town and was eager to "show" anyone who doubted the ability of the latest addition to the Indian tribe—little papoose Go-Bang-Every-Time. As a supreme test of the newcomer's stamina he rode the little cuss through a regular blizzard, and when it was at its height invited E. B. Holton, of the New Jersey Club, to ride along as passenger on the luggage-carrier. The snow at that time was four inches deep and still coming. The two men weighed in the neighborhood of 350 pounds, but the Featherweight went to it with a steady pull that took the load with ease. As the scenery in the down-town section of Newark did not look desolate enough the pair headed for Weequahic Park, on the outskirts, with the idea of snapping pictures.

On the way out the machine mounted several long grades with never a falter, except when "O'B" hit a car-track, slid about six inches and then gracefully tumbled off.

"O'B" on the Featherweight

Several photos being taken, the return journey was made. Again several skids and resultant spills followed, but nothing of the sort that a heavy twin gives the rider; in fact, neither of the men would have undertaken the trip, over five miles, on a 7-horse machine.

Without doubt the ride has been the most severe test that a two-stroke has been subjected to in this country to date and it is characteristic of "O'B" to be trying something before the other lad does. He has gone back to Springfield now, so that the normal course of the motorcycle business prevails again.

WILL HOLD FIRST BAY STATE RUN ON APRIL 19.

BOSTON, Mass., Mar. 21.—The Bay State Motorcycle Club will hold its first run of the season on April 19, with Worcester as the turning point. Moving pictures will be taken of the start, which will be made from Park Square at 10 A. M.

The new headquarters of the club at the Oxford Hotel, on Huntington Avenue, are expected to be dedicated on March 31. An entertainment and dance are planned for this occasion. About seventy-five entries have been received by the endurance run committee for the one thousand mile run which will be staged on May 28-29-30, and the list of merchandise prizes is growing every day. The recent storm has packed the roads with two feet of snow, making it impossible to survey the course.

SEASON'S PLANS DISCUSSED AT ALTOONA BANQUET

ALTOONA, Pa., Mar. 21.—Runs and races that will be staged this season were the chief topics of discussion at the banquet of the Blair County Motorcycle Club, which was attended by more than a score of riders, at the Schmitt House, last Thursday. R. J. Anslinger, president of the club, and Jos. Wolf, the local Harley-Davidson dealer, were given a rousing vote of thanks by the riders present for the huge success of the banquet.

The menu was as follows:

Grapefruit Maraschino
Pickles Celery Olives
Chicken Consomme
Young Roast Turkey, Stuffed
Cranberry Sauce
Mashed Potatoes Green Peas
Combination Salad
Neopolitan Ice Cream Fancy Assorted Cakes
Cheese Crackers
Coffee

BICYCLE MANUFACTURERS' ASS'N FORMED

Harry S. Wise, of Miami Company, Is Elected President, and E. J. Lonn Vice-President; Movement for Allied Association Progressing

NEW YORK, N. Y., March 23.—At the invitation of Keyser Fry, president of the Reading Cycle Manufacturing Co., Inc., a number of the leading bicycle manufacturers met recently and organized the Bicycle Manufacturers' Association.

Harry S. Wise, of the Miami Cycle & Manufacturing Co., was chosen president of the new organization. E. J. Lonn, of the Great Western Manufacturing Co., is vice-president, while W. G. Schack, of the Emblem Manufacturing Co., was elected treasurer, and Horace Huffman, of the Davis Sewing Machine Co., secretary.

It was stated on good authority that the Cycle Manufacturers' Association will cooperate with the Standardization Committee and lend its hearty support to the "One Million Bicycles" campaign.

Keyser Fry reported splendid progress in connection with the movement, launched at the recent cycle trades meeting in New York, looking forward to the organization of a body that would include all of the cycle and allied trades men.

TWO CYCLE RACES HELD AT SYRACUSE ARMORY

SYRACUSE, N. Y., Mar. 20.—Two thrilling bicycle races were included in the program of athletic events which were staged at the 74th Armory last Saturday night. A two-mile lap race was run in five heats and a final. It proved to be a hard fought battle between Joseph Schieder, of the Y. M. C. A., and A. Ciacinch, the former winning with 47 points, which was just one point better than Ciacinch's score. I. J. Gronkowski was third and Elmer Bundt, fourth. The one and a half mile handicap race was run off in four heats and final. W. J. Anthony finished first and A. Di Carlo, second. Robt. Shultz, the Buffalo star, spilled in one of the races on Saturday, and failed to qualify in the second.

LATE WEEKLY BICYCLE NEWS OF SAN FRANCISCO

SAN FRANCISCO, Cal., Mar. 20.—Frank Carroll, manager of the Goodyear Tire & Rubber Company's local branch, left this city last week to pay a visit to the factory at Akron. Carroll is the big power behind the bicycle race meet which will be staged here on March 26. He is one of the liveliest boosters in the game and an active member of the Olympic Club.

As the result of the membership campaign recently launched by the New Century Wheelmen, twenty-seven new riders have joined the club. Nearly all of them will be eligible to try out for the novice team race in April.

BUFFALO BICYCLE TRADE ASS'N MEETS

John W. Henry Is Elected President, While William Emerson Heads the New Board of Directors; Manager Titus Gives Talk on Rubber

BUFFALO, N. Y., Mar. 20.—The annual election of the Buffalo Bicycle Trade Association was held here last week at one of the most enthusiastic meetings of the local cycle trade men. Prominent men in the industry delivered practical talks, and earnest discussions followed.

John W. Henry, of the Vim Cycle & Hardware Co., was chosen president to succeed Frank D. Barton, while Chas. Haberer is the new vice-president, and John J. Oliver will perform the duties of secretary-treasurer. William Emerson, of the Buffalo Metal Goods Co., maker of the Atherton Coaster brake, will head the new board of directors, which includes the following members: Wm. F. Kendt, Edw. J. Young, Albert Schwegler and Adolph May.

The main speaker of the evening was F. E. Titus, the recently appointed manager of the B. F. Goodrich Co.'s local branch. He gave a brief and interesting sketch of the development of the rubber industry. When the rousing applause for Mr. Titus' instructive talk had subsided, the chairman called upon A. W Parry, of **Motor Cycle Illustrated.** Parry presented a plan for the organization of bicycle clubs among the school boys, and suggested that such clubs be affiliated with the National Boy Scouts.

He declared that clubs, if properly conducted, would result in the sale of thousands of bicycles to school boys who are now non-riders. Parry concluded by suggesting that the dealers obtain from their boy customers names of youngsters who do not ride at present.

A lively discussion followed this talk on the club idea, which resulted in the appointment of a committee that was instructed to investigate the plan. The committee will ascertain how much co-operation can be expected from the school authorities, what arrangements can be made with the boy scouts and other necessary information.

The members then took up the matter of launching a concerted advertising campaign in the Buffalo daily papers. Tentative plans were formulated that insure plenty of publicity for the bicycle in the Bison City. The local dealers are very proud of the six-page bicycle section which appeared in the Buffalo *Times* on February 27. They have been told that it was the largest bicycle section ever printed.

KOENIGS HAVE EXCLUSIVE IVER JOHNSON RIGHTS

NEWARK, N. J.—E. G. Koenig's Sons, the leading sporting goods house in this city, has taken the exclusive agency for the Iver-Johnson line of bicycles. Frederick W. Geissler, an old-time road rider, is in charge of the bicycle department and is after the bike riders of Newark and the Oranges hot-foot.

Geissler's window display on the recent Bicycle Day aroused much interest and he has made five sales with a dozen more prospects in view. Changing a long-practiced policy of selling on a cash basis, Geissler will transact sales on time with responsible parties in the future. The revival of the Irvington-Millburn 25-mile road race this Decoration Day will create a big demand for cycles in this section of the State, say the Koenig people, and they are out to get their share of the business.

NEW R-S BICYCLE CATALOGUE

READING, Pa., Mar. 20.—The complete line of Reading-Standard bicycles is fully described and illustrated in a new, handy-size catalogue, which is now being distributed to dealers representing the Reading Cycle Mfg. Co., Inc. Copies of this catalogue will be sent to any dealer on request.

TREBLED BICYCLE BUSINESS

OTTAWA, Ont.—Hurd & Co., who have sold bicycles in Ottawa for the past twelve years, announce that they have more than trebled their bicycle business during the past five years. They attribute some of their success to their policy of keeping their windows well dressed, and enjoy a fine reputation for artistic displays.

REVERE TRACK WILL OPEN APRIL 19

Twenty-five Mile International Motor-Paced Race Will Be the Feature; Hub Track Has Been Greatly Improved During Winter

BOSTON, Mass., March 22.—The bicycle racing season here will get under way on the afternoon of April 19, when Manager Nat Butler will swing open the gates of the new Revere cycle track and present a well balanced card of amateur and professional events.

The feature will be a twenty-five-mile motor paced race between such stars as Victor Linart, of Belgium; George Wiley, of Syracuse; Clarence Carmen, of Long Island, and Leon Didier, the Flying Frenchman. Didier is now with the French army, but has cabled Butler of his success in securing a leave of absence.

Another feature of the preliminary events will be the introduction into the amateur ranks of the three Fox brothers, of Beachmont. These boys have never been in competition, but Manager Butler was so impressed by their work on the road that he persuaded them to try their hand at racing.

During the winter many improvements have been made in the track, the most noticeable of which is the new 50-cent pavilion, just opposite the grandstand. The seating capacity has been enlarged so that the track will be better able to handle the overflow crowds, such as attended last year's events.

ROBERT T. PARKER DIES

PITTSFIELD, Mass., Mar. 21.—Robert T. Parker, well known to all old-timers of the bicycle business, died of apoplexy at his home here on Friday, March 10. He was for nine years in the employ of the Hartford Rubber Works Co., at Hartford, Conn., becoming sales manager; later he was transferred to the New York branch, which he managed for two years.

INDIANAPOLIS DEALERS FORM NEW ORGANIZATION

INDIANAPOLIS, Ind., Mar. 22.—A new association of local cycle dealers was organized here last week to take the place of the defunct body, which came into existence some years ago, but was not successful. The new body will be known as the Indianapolis Cycle Dealers' Association. Seventeen firms handling bicycles and motorcycles in this city were represented at last week's meeting.

Harry Robinson was unanimously chosen president, and he will be ably assisted by W. A. Kelso, who was elected vice-president. The secretaryship was tendered to R. J. Douglas, and Walter Roeder will act as treasurer.

The first official act of the association was to transfer all the funds still in the old organization to the treasury of the new body. It was also decided to limit the membership to retail dealers only, each firm being permitted one vote Price-cutting and the standardization of retail prices will be two of the chief objects which the association hopes to realize.

A committee composed of the officers, E. C. Ambuhl and John Merz, has been ordered to draft a constitution and by-laws. A membership committee was appointed.

THREE OUTLAWS REINSTATED BY N. C. A.

Spears and McNamara Are Each Fined $150, While Cavanagh Pays Penalty of $50; Six Races Will Decide National Title This Year.

NEWARK, N. J., Mar. 21.—Reggie McNamara, Bob Spears and Frank Cavanagh, three of the riders who competed in the outlaw six-day race at Chicago, have been reinstated by the National Cycling Association. At a special meeting of the Board of Control McNamara and Spears were fined $150 each, while Cavanagh got off with a penalty of $50. The money collected in fines will be given to the City Hospital here.

Another important step was taken by the National Cycling Association when it decided to limit the number of races for the national championship to six. In past years an unlimited number of races were held, the number being optional with the track management. There will be one race each at the following distances: quarter mile, one-third mile, half mile, one mile, two miles and five miles. The races must be held between May 30 and October 1.

While the American championship will hinge on the outcome of these six races, provision has been made for a special competitive championship for all the professional races at the local Velodrome throughout the entire season. An official record will be kept of the points scored by the riders, and the cyclist scoring the greatest number of points will receive a special prize of $500. Second prize will be $300, and third money is to be $200.

The cycling season will get under way in Newark on Sunday April 2.

DESIMONE AGAIN VICTOR OF TRAINER RACE

NEW YORK, N. Y., Mar. 21.—The weekly home trainer race of the Unione Sportiva Italiana last week was open to all members of the club, owing to the fact that there were not enough non-prize winning members on hand. The affair was run in four heats, two semi-finals and one final. All heats were at a distance of one mile and the final at two miles, with eight members competing. Anthony Desimone again captured the race, riding the fastest heat of the evening in 1:14, and the two miles in 2:35⅕.

BIG ADVERTISING CAMPAIGN FOR VITALICS

National Publications Will Be Used to Boost Vitalic Bicycle Tires; Dealers' Helps Now Ready; Big Season Ahead, Surre Believes

ERIE, Pa., March 22.—The 1916 advertising campaign of the Continental Rubber Works, in which the Vitalic tires will be effectively boosted, will start within a few days with large display advertisement in such national publications as the *Saturday Evening Post, Popular Mechanics* and the *American Boy*, in addition to the cycle trade journals.

Special Sales Boosters for Dealers

Dealers' helps in the form of attractive literature, Vitalic signs and lantern slides have also been gotten up in quantities and will be mailed free of charge to all Vitalic dealers. Of particular interest is a folder entitled, "From Boston to San Francisco on One Set of Tires," which tells the story of a bicycle trip made last year by a Y. M. C. A. man to the exposition. This folder and others, now being printed, are intended for distribution by Vitalic dealers among their customers and prospects.

No Change in Price

In a letter recently sent out to Vitalic dealers, in which the extensive advertising campaign was announced, it was stated that in spite of the increased cost of rubber and other materials entering into the manufacture of tires, no advance in the price of Vitalic tires has been made nor has the quality of the tire been changed because of the stringent market condition.

W. J. Surre, head of the Vitalic Sales Department, believes that this will be a banner year for the bicycle field in general and that all Vitalic dealers will get their share of the big business in prospect, if they get on the job now, place their orders early for the spring trade and make use of the helps which the Continental Rubber Works is prepared to give to all of its dealers.

NATIONAL SUPPLY INCORPORATES

LOUISVILLE, Ky., Mar. 20.—Articles of incorporation have been filed by the National Supply Company, 107 West Market street, listing a capital stock of $10,000 for the purpose of dealing in bicycles, supplies and sporting goods. The incorporators are Coleman B. Long, the local Merkel dealer and a prominent bicycle and repairman; Hyman Frockt and Max M. Lipski. It is understood that the concern will have to change the name slightly as it conflicts with another concern out in the state. The new company takes over the business of the old National Supply Co., of which Sol Lipski was the head. The latter, it is understood, will re-enter the bicycle business in Chicago.

CRESCENTS STAGE RACES ON RUN TO CARNEY

BALTIMORE, Md., Mar. 21.—William H. McAvoy and Lester Nickles were the winners of the races which featured Sunday's run of the Crescent Bicycle Club to Carney, on the Harford road. McAvoy came in first in the regular weekly five-mile point race, and Nickles was the winner of a third-mile sprint race for Class B riders and also the third of a mile handicap race open to all club members.

Captain Langdon M. Sanborn and Walter Doersch finished second to McAvoy and Nickles, respectively. The third-mile sprint for Class A riders resulted in a dead heat between Walter V. Iglehart and Capt. Langdon M. Sanborn, Wm. McAvoy finishing second and Fred M. Sanborn third. The summaries:

Five-mile point race—First, Wm. H. McAvoy; second, Langdon M. Sanborn; third, Lester Nickles; fourth, Ernest Nitz; fifth, Walter V. Iglehart. Time, 12:12.

Third-mile sprint for Class B riders—First, Lester Nickles; second, Walter Doersch; third, Ernest Nitz; fourth, Roland Bishop.

Third-mile sprint for Class A riders—Walter V. Iglehart and Langdon M. Sanborn, tied for first; Wm. H. McAvoy, second; Fred. M. Sanborn, third.

Third-mile handicap—Open—First, Lester Nickles; second, Walter Doersch; third, Ernest Nitz; fourth, Roland Bishop; fifth, Wm. McAvoy.

C. F. WING COMPANY HAVE ANNUAL BICYCLE OPENING

BOSTON, Mass., March 20.—Each year the C. F. Wing Company holds an annual bicycle opening day, when prospects and customers are invited to the store to inspect the new bicycle models and listen to talks given by experts. This year the opening was held on the evening of March 15, when Mr. Van Doren of the Miami Cycle and Mfg. Co., and Mr. Ryan of the Westfield Mfg. Co. showed the big crowd that had gathered the merits of their particular lines, both of which are handled by the Wing company.

Especially for this occasion the Miami company made a black and white checkered bicycle, and another machine one side of which was enameled in yellow, while the other was covered with blue. The latter bicycle was placed with the yellow side before a mirror and had the crowd guessing, for they were unable to locate the yellow machine on the floor without looking very closely.

A large sign that the Wing company had painted and placed in a conspicuous part of its bicycle department made the visitors laugh heartily. It announced that Dave Ryan claimed the Columbia bicycle, made by the Westfield Co., to be the best in the market. And it further stated that Van Doren believed the Racycle, the Miami model, to be a world beater. Below this the Wing company declared its absolute neutrality and maintained that the Irish (Ryan) and the Dutch (Van Doren) would have to fight it out before the audience. Then there was a postscript at the bottom of the sign reading: "P. S. We might add that they are both very good bicycles." That hit the crowd in the right spot.

FRANK MORAN TRAINING FOR BIG FIGHT

Type of Home Trainer Used by Pittsburgher, in Preparing for the Battle Fight with Champion Jess Willard

C. R. C. OF A. WILL STAGE SPRING CENTURY

NEW YORK, N. Y., Mar. 21.—The New York division of the Century Road Club of America will hold its twenty-fifth anniversary spring century run on April 2. Two divisions will start: one from Columbus Circle, Manhattan, and the other from Prospect Park Plaza, Brooklyn. The divisions will meet at Richmond Hill, and from that point ride as one body. The route will be as follows: Columbus Circle or Prospect Park, Jamaica, Floral Park, Hicksville, Huntington, Smithtown, Huntington, Westbury, Floral Park, and back to starting points. A silver loving cup will be awarded to the club having the largest number of entries, twenty being needed to qualify. Entry blanks can be secured from Chas. Kudrle, 513 E. 79th street, or at any bicycle or sporting goods store in the metropolitan district.

BICYCLES INCREASE IN USE AS GASOLINE GOES UP

TACOMA, Wash.—Retail grocerymen are turning to the bicycle more and more in this city as the price of gasoline ascends. A number of automobiles which were in use up to two weeks ago by these traders are now on dead storage and the proud drivers are now using cycles with carrier baskets instead. The deliveries are made in short order and a steady increase in business has been noted by several firms.

GIVES OUT SOAP AND PENCILS

NEWARK, N. J., Mar. 21.—The Belmont Cycle Co., of which Harry Schnell is manager, is advertising extensively in street cars and a guessing contest is now in progress at the store. To further arouse attention and bring the crowd to his store, where Pierce bicycles and Indian motorcycles are handled, cakes of soap and pencils, bearing the Belmont Cycle Co. name and address, are being given to school children.

ALL READY FOR U. S. I. BALL

NEW YORK, N. Y., Mar. 21.—All arrangements have been completed for the sixth annual charity ball of the Unione Sportiva Italiana, which will be held on Sunday evening, March 26, at the Palm Garden, 58th street and Lexington avenue. Part of the proceeds of the dance will be turned over to the Italian Red Cross Society and the Italian hospital. Music will be furnished by S. Busoni and his full orchestra from the Ritz Carlton hotel.

A PROSPEROUS CYCLE STORE

EDMONTON, Alberta.—Owen S. Wright now has one of the finest stores on Whyte avenue, Edmonton, although he started to sell bicycles in a small way and with very little capital only four years ago. He is now located on the main business street in South Edmonton.

FEATURING FLYING MERKEL

SPOKANE, Wash.—The Falls City Cycle Co. is now featuring the Flying Merkel bicycle in this city and finds a ready market for this line.

C. R. C. OF A. ROLLS UP 93,275 MILES

J. Zabelicky Wins Last Season's Century Competition of the Century Road Club of America, with 55 Centuries; Mileage Honors Go to Herman Hintze, Who Pedaled 12,158 Miles During the Year

JERSEY CITY, N. J., March. 21.—The National Century competition of the Century Road Club of America for last season was captured by J. Zabelicky, who rode 55 centuries, two of which were doubles. Zabelicky's performance was remarkable in view of the fact that he had never before appeared in a cycling competition of any kind. A veteran of the game, Herman H. Hintze, proved to be the victor of the National Mileage competition, having covered 12,158 miles during the course of the year.

To L. Andre Fraysee goes the honor of winning the combined mileage and century competition. He rode 15 centuries and 11,091 miles. Fraysee has also completed a very creditable racing year, having finished well among the leaders in all of the open races, though in each instance he started near scratch.

In the National Century competition F. J. Perreault, of Malden, Mass., finished second while W. T. C. Yorke was third both in the century and mileage competitions. Emile H. Gerard captured the New Jersey State century and mileage competitions. In the state century contest, A. L. Everard was second, while E. T. Taborelli accounted for third position. These two riders changed places in the state mileage competition.

The results of the mileage and century competitions of the Century Road Club of America are given in the box below.

WINNERS IN C. R. C. OF A. CONTESTS

1—H. H. Hintze; 2—L. Andre Fraysee; 3—Joseph Zabelicky; 4—E. H. Gerard; 5—A. L. Everard

RIDE TO ST. AUGUSTINE

JACKSONVILLE, Fla., Mar. 20.—A run to St. Augustine, the oldest city in the United States, and return, was enjoyed by a party of local cyclists recently, headed by Joe Hartwell. The distance between the two cities is about forty miles, and the roads were in fine condition. For beauty of scenery and picturesqueness this route is unsurpassed, and the huge oak trees on either side of the roads afford cool riding. These trips are very popular among the Jacksonville riders, and are usually taken over week-ends.

POLICE WILL CLEAR COURSE

WEST HOBOKEN, N. J., Mar. 22.—The Boulevard police have notified the officials of the New Jersey division of the Century Road Club of America that they will co-operate with the club in keeping clear the course for the twenty-five-mile handicap race on May 7. This event will be held over the Hudson County Boulevard. Fifty prizes will be offered. Entries are coming in steadily, and blanks can be secured from Emile E. Fraysee, 742 Syms street, West Hoboken.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

Tenth Installment

The battle for the title in 1907 was waged between Kramer, Clark and Lawson. The Swede had been ill the preceding fall, and though he was not in good shape he put up a stiff fight. Clark teamed with Kramer in most events.

WHEN the curtain was rung down on the cycling season for 1907, Frank Kramer, the East Orange thunder-bolt, had annexed the championship of America for the seventh successive time. His efforts during the entire season were confined to Salt Lake City, where all the stars appeared. Newark, the mecca of crack cyclists previous to this season, was without professional races. With Kramer away from Newark, the fans failed to come out for the game and the Newark track was closed down.

Jackie Clark Was Partner

Kramer's record in Salt Lake City was an excellent one. He finished first in fourteen races, took second twice, finished third twice, and was fourth once. Frank started in thirty-five events and was unplaced sixteen times. On many of these occasions Kramer paced Jackie Clark to win and then dropped back. Kramer finished the season with seventy-eight points. Clark was second and Iver Lawson third.

Teaming was permissible in 1907 and Kramer had Jackie Clark, the Australian rocket, for his team mate. Lawson used Floyd McFarland and Ernie Pye to pull him up front. Kramer rode strong the entire season and had little trouble taking the title. It took Lawson a long time before he got in any sort of shape to put up a hard battle.

Crimps Another Record

Kramer scored two notable victories that season. He took the hour-a-day six-day race and on July 5 broke the world's record for three-quarters of a mile. He rode from scratch in this race and covered the distance in 1 minute 21 seconds. This was four-fifths of a second better than the former record of 1 minute 21⅘ seconds, made by Iver Lawson. Kramer had a hard fight of it to qualify in his trial heat. In the final Ernie Pye pulled Kramer, getting the handicap cyclists on the last lap. Kramer then shot out and won the race by inches.

On that same afternoon Iver Lawson scored his first victory of the season over Kramer. The Swede showed good form and won the mile open. However, Iver was in a three-cornered combination when he did it. McFarland was pulling Lawson and Downing was protecting him from behind. Kramer was all alone, as Clark failed to qualify. Kramer trailed the combination until the last lap, then he attempted to go around. The other three riders swung wide, completely blocking the East Orange cyclist. Lawson shot by McFarland in the stretch and won, with Downing second, while Kramer beat out McFarland for fourth place.

Nip and Tuck Battle

The abbreviated six-day race carried with it a purse of $400 and Kramer won the race from Iver Lawson in one of the most sensational finishes ever seen at the Salt Lake City saucer. Clark finished a close third and Downing came home fourth. Kramer and Lawson were riding alongside of each other for the last hour of the race. Three laps from the finish, Lawson jumped away from the other riders, with Kramer right after him. Kramer tacked on and followed him around. Coming into the back stretch, Kramer pulled up beside Iver and a fierce struggle ensued between two of the best cyclists in America. As they rounded the last turn Kramer pulled ahead of Lawson and gained just a couple of inches and when he crossed the tape Frank was just a few inches to the good.

Kramer made his initial appearance in Salt Lake City on Tuesday, June 18, when he carried off the two-mile race. He was teaming with Clark while Lawson and McFarland were in a combination. In the quarter-mile open, Kramer got away from the mark badly and was obliged to go the limit in order to win out over Ernie Pye. Clark ran into a pocket and finished third. In the two-mile race, Kramer, Lawson and Clark were on scratch in the final, while McFarland was on the forty-yard mark. Kramer set the pace and pulled Clark up to the leaders four laps from home. Kramer then jumped and took Clark with him, copping the race by a half-wheel's length. Clark finished second, while McFarland and Lawson came in third and fourth respectively.

On June 21 the East Orange flier captured the one-mile open, which was paced.

Jackie Clark

The pace was fast and Kramer kept right behind the leader. At the fifth lap Wilcox challenged, and Kramer was compelled to go around the pace maker to hold the lead. Wilcox then faded away and Hollister took a try at the champion. Kramer easily shook him off and won out, while Floyd McFarland, who was taking a "sleigh ride," came home second.

The crowds were turning out in droves for every race meet at Salt Lake City in 1907, Kramer being the powerful magnet. When Kramer went to Salt Lake City in 1906 and defeated Iver Lawson, who was Utah's greatest rider, he won the hearts of all the Salt Lake City fans. Clark also won high in their favor.

Lawson Collapses After Race

Kramer told the writer of the first race Iver Lawson won in 1907 and of the pathetic scene that marked his victory. Lawson had a severe sickness in the fall of 1906 which greatly impaired his strength, and when on Friday, June 28, he won his initial race of the season, the struggle was too much for him and he collapsed at the finish.

He rode a game race that night and though he fell unconscious from his wheel at the tape, the spectators tendered him a great ovation. Lawson was carried to his dressing room by friends and it was necessary to summon a physician to revive him.

The race was a one-mile handicap and it was a gruelling affair. Kramer fell down the steep bank in his preliminary heat after a puncture, while Clark retired after ripping the spokes from his wheel. Lawson was on scratch in the final from where McFarland and Hopper took turns at pulling him up with the leaders. Lawson fought it out to the tape with West, a youngster who had just been turned professional. Lawson won by inches.

On July Fourth, in one of the hardest fought finishes at Salt Lake City that year, Kramer won the three-mile lap race in 6 minutes and 5 seconds. As usual Kramer and Clark teamed. On July 9 Lawson was back in shape; but he and McFarland were completely fooled by Kramer in the two-mile open staged that day. Jackie Clark won the race. Ernie Pye was taken into the Kramer-Clark combination. Kramer laid back with Lawson and McFarland, while Pye took Clark to the front, and the Australian rocket won easily. Hollister finished second, while Kramer beat out Lawson and McFarland for third money.

Lawson demonstrated that he was getting in trim again on July 12 by making Kramer go to the tape in the two "pro" events. Kramer won one, while Iver annexed the other. In both races it was a fight to the tape between this pair. In the final of the half-mile open McFarland pulled Lawson, with Kramer tacked on to Lawson's wheel. Kramer tried to pass Lawson in the stretch but failed.

There was another stiff battle in the two-mile handicap. McFarland again did the

NO BOULEVARDIERS NEED APPLY ON THIS ROUTE

Motorcyclists in a Wonderfully Picturesque Spot on the Columbia River Highway

The Remarkable Photograph Shown Above in Duo-Tone Was Obtained by Edward Carlson and H. Zerung, of Portland, Ore., on a Recent Trip. They Had Plenty of Tough Climbing Through Snow, but Felt Amply Repaid by the Grandeur of the Scenery, Especially Near the Upper and Lower Bridges Over the Columbia. The Photo Shows the Motorcycles on the Lower Bridge. The Tourists Used Indian Motors.

BRITAIN CLAMPS LID ON EXPORT BUSINESS

NEW YORK, Mar. 21.—Export conditions were still further complicated a few days ago by an order of the British government forbidding steamers flying the British flag from accepting any freight excepting munitions and grain for the British government. The order affected all the steamships of the White Star line, the Cunard line and such units of the International Mercantile Marine Company as are carrying the British flag, and several motorcycle manufacturers who have booked foreign orders of late will thus be affected.

The freight situation, which had already become serious at the railroad terminals in New York, Boston, Philadelphia and Jersey City, is thus aggravated, and Western representatives of the railroads have been instructed not to accept further freight for shipment eastward.

HE CHOSE A HENDERSON

RIVERSIDE, Cal.—John Thompson was recently appointed motorcycle officer for the Riverside police department and allowed the choice of his mount. He called in right away to see George A. Klapp, of the Los Angeles office of the Henderson Motorcycle Sales Corporation, and picked out a 1916 short-coupled model with electric lights and standard police equipment.

DETROIT DEALERS WILL REDUCE ALLOWANCES

DETROIT, Mich., Mar. 20.—The Detroit Motorcycle Dealers' Association, at a special meeting held last Friday evening, discussed some important plans, which, if carried out, will keep enthusiasm and interest very much alive in the motorcycle sport. The nature of these plans will be announced later.

One of the things which received considerable discussion at the meeting was the matter of allowances. Dealers went on record as favoring much smaller allowances than are being given at present. There is a brisk demand for used motorcycles here—but at second-hand prices.

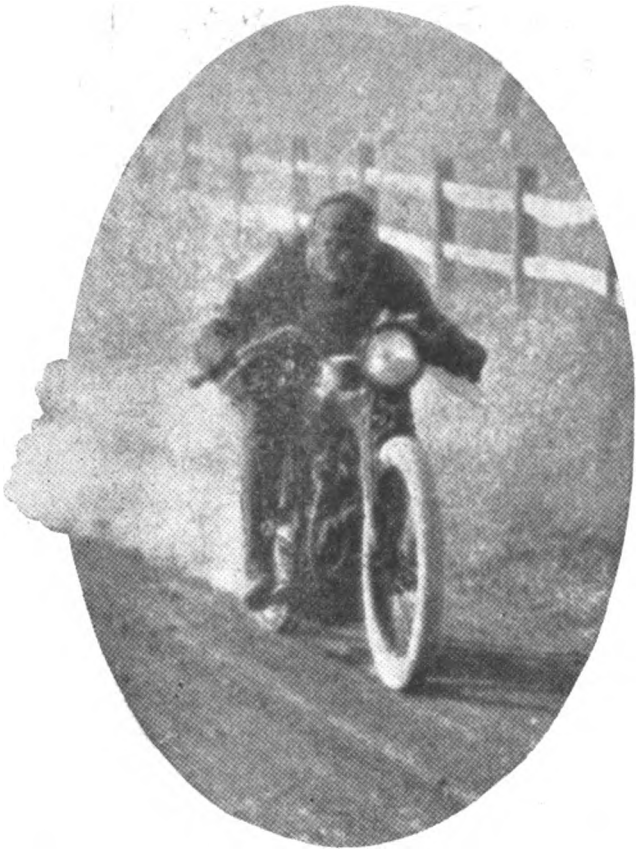
A Truly Wonderful Demonst

"Cannonball" Baker and his Powerplus machines are back in the United States after the greatest Australian conquest motorcycling has ever known.

Baker not only cleaned up a long string of Australian records, but in doing so also established THREE WORLD'S RECORDS. The following list gives the remarkable Baker-Powerplus performances in Australia:



BAKER DOING 75 MILES AN HOUR, DURING HIS 24-HOUR WORLD RECORD RUN

2 Hours, 37 Minutes (Hobart to Launceston)	123 Miles
3 Hours	163 Miles
4 Hours	215 Miles
5 Hours	266 Miles
6 Hours	316 Miles
12 Hours	576 Miles
18 Hours	876 Miles
24 Hours (World's Record)	1028 Miles 30 Yards

200 Miles	3 Hrs., 41 Mins.
300 Miles	5 Hrs., 35 Mins.
500 Miles (World's Record)	9 Hrs., 58 Mins.
1000 Miles (World's Record)	21 Hrs., 3 Mins.

Thus again is the claim substantiated that the Indian Powerplus is the fastest and stoutest stock motor ever put into a motorcycle frame.

Digitized by Google

...n of Powerplus Consistency

No stock motor before has shown itself so consistently to be head and shoulders above its fellows in actual road trials and under riding conditions which subjected it to every possible unfavorable test.

Powerplus surprises are only beginning. With thousands of Powerplus machines going into riders' hands at the season now before us, the forthcoming reports are going to be of the most startling character as to speed, endurance cleanliness and silent operation.

ARE YOU GOING TO ENJOY ADVANCED MOTORCYCLING IN 1916?
THEN YOU'VE GOT TO HAVE A POWER-PLUS.

BAKER TAKING A DANGEROUS CURVE IN HIS 24-HOUR WORLD RECORD RUN

About That Bicycle Number

Frank Effinger

Advertising Manager of the

A. O. Smith Co., Says

"The writer compliments you most highly upon the splendid and directly practical color page inserts contained in your Bicycle Day number for dealers to cut out and display in their windows or stores. This kind of material is the best that dealers can secure and in the writer's opinion is far more beneficial than much editorial matter suggesting and explaining the ways and means for store and window decorations and displays of selling signs and literature. The writer believes that if you put such things into your book from time to time you will not only be giving the dealer readers a great service, but it will prove to be a good circulation getter. The appearance of those pages caught the writer's eye and instantly made a big hit with him."

Every dealer should make good use of these inserts. Write us if you need more.

REPORTS ON HENDERSON EXPORT SALES

Factory Figures Show That Four-Cylinder Mount Sells Readily in Foreign Countries—Agents Active in India, Japan and South America

DETROIT, Mich.—The demand for motorcycles from foreign countries remains consistently strong at the Henderson motorcycle factory in this city, with increased business standing out strikingly in some portions of the map. All of the European countries to which shipment can be made are buying machines eagerly, and there is keen competition for the Henderson dealership in many places.

In the cases of Italy, Denmark and Sweden, for example, several prominent firms made application for exclusive selling rights, and a number of others have written to the factory for the same purpose since 1916 contracts have been closed in those places.

In other sections far from the center of hostilities, however, interest is also keen and sale of four-cylinder Hendersons is increasing rapidly. The Henderson dealer in Java has built up an extensive business and has progressive sub-agents appointed in the principal cities of the island. This distributor has a standing order for monthly shipment of machines so as to be sure of having a stock on hand to make prompt deliveries at all times.

India is coming to the front rapidly, and the Henderson dealers at Calcutta, Bombay, Allahabad and Rangoon have enjoyed excellent sales during the last month.

A marked livening up of interest is seen in Japan, as dealers in various parts of that empire report brighter prospects than ever before. The number of direct inquiries received at the Henderson factory from Japan has increased greatly during the last couple of weeks, and several new applications for agencies have been received this week.

In South America, the Argentine Republic is alive and hustling for business, large shipments of machines being sent to the Henderson distributor in Buenos Aires every month. Most other parts of South America have been rather slow to show signs of awakening, though a few late inquiries from various parts of Brazil indicate that that country will be much more prominent on the motorcycle map before long.

GOODYEAR STICKERS BOOST 100,000 MOTORCYCLES

IN line with its policy of encouraging all movements in boosting the motorcycle trade, the Goodyear Tire and Rubber Company, of Akron, O., has had struck off a huge number of attractive blue stickers which it is furnishing to motorcycle manufacturers. These stickers have the words "100,000 Motorcycles in 1916" on a blue ground, both the lettering and the Goodyear trademark which accompanies them being in white, well embossed. The sticker has a broad white border and is very attractive.

ROGERS DEVICES INCREASE PASSENGER'S COMFORT

DEVICES which make for the greater comfort of sidecar passengers have been a specialty with the Rogers Manufacturing Company, of 326 West Madison street, Chicago, Ill., for some time, and among these may be instanced an adjustable foot rail, adaptable to any Rogers car. This footrail has two positions: one far forward enough to let the rider stretch the legs out to the full length when leaning back comfortably in the upholstery, and the other about 12 inches nearer the passenger, who then rides with the heels on the rail and the knees bent.

The forward position does away with the discomfort of the feet shaking about in the front part of the car or needing to be braced at uncomfortable angles to ensure a firm seat. The rear position gives a change to the passenger, and this ability to change gives greater ease, especially if distance work is done.

Another addition to the Rogers car is a waterproof apron furnished with a hole in the top for the head of the passenger in case of rain. Snap buttons enable the apron to be fitted closely to the neck, and with the addition of a cap, the passenger is completely protected from the weather.

Slip covers are also made by the firm. These fit over the upholstery and keep it free from dust and dirt. By their use, a sidecar at the end of a season looks as good as new and will bring a much higher price in the second-hand market. These covers are dust- and weather-proof.

New Marathon Motorcycle Tire, in 28 x 3 Inch Size, Produced by Marathon Tire & Rubber Co., Akron, O.

REMARKABLE FIGURES ON GOODYEAR DEVELOPMENT

AKRON, O.—District managers of the Goodyear Tire & Rubber Co.'s great sales organization, assembled at the Akron factory to exchange ideas and views, heard some astonishing facts in connection with the development of the tire industry of this country in general, and the Goodyear tire development in particular. At the end of the convention it was the unanimous opinion of the men gathered from all parts of the country that the company is now entering upon what is thought to be the most prosperous and most successful manufacturing and sales year in its history.

That the factory organization has been able to supply the growing demands of the sales staff is due to the extensive additions made to the plant in the last few years, and the greatly improved equipment with which the buildings have been stocked. Commencing business in 1898 with a capital stock of $45,000 and a factory of 38,000 square feet of floor space, the company now has a capital stock of $25,000,000 and a factory with a floor space of 55 acres. The 100 original Goodyear workmen have expanded into an army of 12,000 men. The original factory no longer exists, not a brick from it is left standing.

GET YOUR TIRE PRESCRIBED AT U. S. AGENCY

NEW YORK.—The United States Tire Company has completed a plan, which it started several months back, of providing its customers with a full line of "individualized" tires. The motorcyclist can now go into any U. S. Tire branch or agency and have a tire "prescribed" for his machine or form of service.

The U. S. tire line includes the well-known Nobby Tread, designed for hard, continuous use with a guarantee of long mileage; the Chain Tread tire, and the Usco Tread, for low cost with non-skid properties, in addition to the automobile series made by the company.

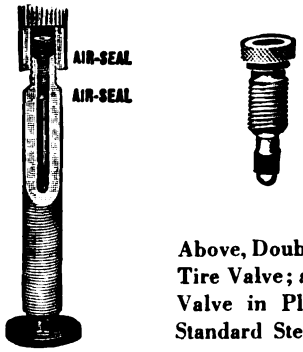
DOUBLE SEAL VALVE FITS STANDARD STEMS

EASE in pumping combined with tightness under as much as 300 pounds pressure are features of the Double Seal tire valve, the product of the Double Seal Tire Valve Company, of 1790 Broadway, New York. This valve, which is a valve inside of unit construction, operates perfectly with all standard motorcycle and automobile valve stems, and works efficiently with all overhead pump connections and tire gauges. It opens at one ounce of pressure, and is, therefore, of great advantage to those using a hand pump.

The Double Seal valve screws directly inside the regular valve stem. It has two



Above, Double Seal Tire Valve; at Left, Valve in Place in Standard Stem.

"seals" or joints, which prevent leakage of air, hence its name. The lower seal is on the shank near the base; this seal being of rubber and cylindrical in form, while the upper seal, also of rubber, is conical in form. This latter seal is close to the knurled head and renders the inside tight in the end of the stem.

The valve proper is spring-loaded and is located inside the base, with the axis or priming pin extending through the bore and easily reached for relieving air at a cup in the head. The end is, however, below the level of the knurled head, so that accidental release or holding of the valve open is prevented. It can be inserted with the fingers sufficiently tight for service purposes, if desired, and can be as readily removed. It prevents the possibility of sticking cores.

While primarily designed for use with air, the Double Seal tire valve has been proven efficient with steam and water up to the limit stated: 300 pounds to the square inch. It will be seen that there is an enormous margin of safety in this, as motorcycle tubes rarely require as much as 55 pounds air pressure. It is to be had of all first-class dealers and jobbers, or direct from the company.

CYCLE POLICE PREVENT DISORDER IN CAR STRIKE

WASHINGTON, D. C.—Little disorder, if any, was evident during the car strike here last week, due largely to the fine work of the bicycle and motorcycle patrolmen of whom there are nearly one hundred in Washington. When the news reached police headquarters that a strike had been declared, Major Pullman, chief of the department, ordered all of the cycle-mounted police to patrol the tracks of the car line which was affected. The mounted men rode along, inspecting the tracks for possible tampering or obstructions, and kept a sharp watch on the strikers. In many cities, not so fortunate in having cycle policemen, the news of a strike is the signal for thieves and crooks to gather for a big harvest, while the police are away from their regular beats and on strike duty.

FIRESTONE PUBLICATION IS INTERESTING BOOK

MANY interesting matters relating to Firestone folks, both at the factory in Akron, and throughout the country, are listed and pictured in the March issue of *The Firestone*, the house organ of the Firestone Tire and Rubber Co. In the motorcycle section, the performance of this make of tires on the sidecar outfit used by the Morleys of Jacksonville, Fla., on their transcontinental tour is demonstrated, as well as the winning of the Argentine championship race by Arnoldo Bernasconi, in Buenos Aires, last month.

WOLTER RETURNS FROM HIS HAWAIIAN TRIP

CHICAGO, Ill.—Joe Wolter arrived in this city on March 13, straight from the Hawaiian Islands, and enthusiastic over his victory in the 15-mile race in Honolulu on February 26. After paying his respects to the Excelsior folks, he left for his home in Guttenberg, Ia. He will be back in two weeks, he says, to take part in the racing season on his speed Excelsior.

Wolter said that there was $200 in the purse for the Honolulu races, but as a pro. he was only allowed to ride in the 10-mile and the 15-mile events, the others being for amateurs. In the 10-mile, Joe's compensating sprocket went bad, but he won the 15-mile, pulling down $75 for first money. A number of local riders, he said, signed a protest against riding, on the ground that the track was not safe. Wolter used Bob Perry's Excelsior during his trip.

POUGHKEEPSIE RUN TO COVER 288 MILES

POUGHKEEPSIE, N. Y., Mar. 21.—The big motorcycle endurance, which will be staged for Poughkeepsie and Dutchess county riders, will start from here on Saturday, May 27, at midnight, and wind up at eight o'clock on Sunday evening. The running time has been changed from 24 to 20 hours, and provides for an average speed of 16 miles per hour over 288 miles of the best New York State roads.

Several cups valued at close to $100 have been hung up as prizes. The checking stations and time of checking are as follows: Albany, 5 a. m.; Canajoharie, 8:45 a. m.; Oneonta, noon control, leave at 1 p. m.; Kingston, 6 p. m.; Poughkeepsie, 8 p. m. Entries can be secured from Herbert Gindele, 50 Market street, Poughkeepsie.

A FIRESTONE TRAVELER SHIFTS

C. W. Sullivan has been sent to Syracuse, N. Y., by the Firestone Tire & Rubber Company, Akron. He will be a traveling representative of the Syracuse branch.

NON-SET PISTON RINGS ARE VERY RESILIENT

STEVENS & COMPANY, of 375 Broadway, New York, are bringing out the Non-Set piston rings, for both regular and oversize cylinders. These rings are made in a different manner from the ordinary

piston rings, in that they are separately moulded and cast, instead of being cut from the pot. All sizes are carried in stock.

The Non-Set ring, by reason of its being an individual casting, is homogeneous and very resilient throughout. The three bearing faces of each ring are accurately ground to size, but the tough skin of the casting is allowed to remain on the inside of each ring, thus greatly increasing its life and efficiency. Rings can be had with angle cut or with step cut as desired.

When being machined, each Non-Set ring is ground to diameter when closed. This process insures a uniform but light contact with the cylinder walls and a perfect circle within the cylinder. For worn or oversize cylinders, these rings give excellent results, as they are made 0.002-inch larger in width and diameter to allow for proper fitting.

JACK PRINCE TO BUILD TRACK AT KANSAS CITY

KANSAS CITY, Mo.—Jack Prince, who now resides at St. Joseph, Mo., visits Kansas City very frequently. The reason for the trip and the visits with the motorcycle dealers is the fact that he will soon begin work on the motorcycle track here. He also declares that it is possible that another track will be built at Topeka, Kan., thus forming a triangle racing circuit between Kansas City, St. Joseph and Topeka.

The railroad fare between the three points is very low, the interurban car having solved his problem, and the trip can be made between any of the points within two hours' time. Thus Prince believes that this circuit should get the people coming and going. He is planning to stage the races in the form of one big season meet, running race after race between the three cities in much the same manner as a league baseball game.

Newsy Tips for Exporters

JAMAICA'S CYCLE INCREASE DURING 1914

DURING the year 1914 bicycles and parts to the value of $26,084 were imported into Jamaica, British West Indies, as against an average importation of $24,805 annually during the previous four years. Motorcycles valued at $5,923 were imported into the Island of Barbados, also in the British West Indies, during 1914. Of this total, machines and parts valued at $2,930 came from Great Britain, and $2,993 from the United States. It will be noted that, insofar as motorcycles are concerned, this country has a slight lead on Great Britain. The situation is radically reversed with reference to bicycles, $5,271 worth having come from Great Britain, and only $199 worth from the United States, out of a total of $5,933 during 1914.

This condition seems to apply generally to the British Colonies; that is to say, although our motorcycle manufacturers seem able to compete on almost even terms with the British manufacturers of motorcycles, our bicycle manufacturers are usually outdistanced by their British competitors. If the motorcycle manufacturers have succeeded in overcoming prejudices in favor of British-made machines, there is no good reason why American bicycle makers should not be able to produce similar results, provided they go about the task effectively.

DANISH DEALER HAS BIG TRADE

COPENHAGEN, Denmark, Feb. 3.—Hans Lystrup, who acquired the Henderson dealership in Denmark a short time ago, views indications for business very cheerfully, as he finds sales in goodly quantities despite the uneasiness caused by the big conflict near at hand.

The 1916 four-cylinder Henderson has made an excellent impression on his customers, and the orders already booked indicate a record volume of business for the coming season.

Lystrup recently cabled an order for 35 machines to the Henderson factory at Detroit, and says all of them will be sold and paid for before they reach Denmark.

The purchasers will use these Hendersons for a great variety of purposes to which motorcycles are adaptable, as the previous source of supply from which other motorcycles were obtained is cut off by the war.

TESTS FOR MOTORCYCLISTS.

The Diario Official of December 9, 1915, contains an order issued by the chief of police of Rio de Janeiro, establishing regulations respecting the traffic of motorcycles and similar vehicles. Under this order the present regulations, which require automobile chauffeurs to pass an examination, are extended to drivers of motorcycles, cyclecars, tricars, voiturettes, and similar vehicles. Candidates were ordered to appear before December 29 and stand an examination, consisting of three parts—two oral examinations on the mechanism of motor-propelled vehicles and traffic signals and police regulations, and a practical demonstration of the operating of such vehicles under the direction of the examining board. Owners of motorcycles, who are registered and licensed as such, will be relieved of the first part of the examination.

RUSSIANS DESIRE DIRECT RELATIONS WITH U. S.

THERE is at present a widespread desire in Russia for direct trade relations with the United States, the opinion strongly prevailing that there should be an elimination of all unnecessary handling of such trade through other countries. It is obvious that the profit on commercial transactions between Russia and the United States, both import and export, until the war broke out, accrued chiefly to intermediary European countries through which the goods passed. While it is undeniable that the services rendered by such firms may have been in many ways mutually convenient and advantageous to American and Russian interests, nevertheless the extra freight charges made necessary by sending the goods to an intermediary country instead of direct to Russia, and also the middlemen's commissions or profits, created such a burdensome extra cost as to result in a serious handicap to Russian-American trade. American firms that should have had not only an extremely large but a highly profitable trade with Russia, have allowed the profits to be skimmed off their business, and the business itself to be retarded in its development simply because of being unwilling to do any business in Russia on a credit basis.

DANE WANTS AGENCIES

NEW YORK, N. Y., Jan. 28.—S. F. Krause, who is acting for a number of Danish firms in America, recently announced that he would like to get in touch with any manufacturers of motorcycles, tires, or other accessories who are not now represented in Denmark, with a view to establishing agencies there. Mr. Krause is staying in New York and can be reached by addressing him at 29 East One-Hundred and Seventy-seventh street.

SHIPMENTS TO ARGENTINA

Although the total imports of Argentina dropped from $219,000,000 in 1914, to $154,000,000 in 1915, exports from the United States to that country increased from $27,000,000 in 1914 to $36,000,000 in 1915. Our imports from Argentina just doubled, from $30,000,000 in 1914 to $60,000,000 in 1915.

A FINE OPPORTUNITY FOR AMERICAN MACHINES

WE learn from the American Consul at Punta Arenas, Chile, that the following motorcycles are already represented at that port: Douglas, Motosacoche, L. M. C., Borgo, Peugeot, Puch, Indian and one or two others.

The Consul is of the opinion that light weight machines are bound to be always more popular in that section, on account of the absence of good roads. The first motorcycles imported into the territory of Magallanes, Chile, were received in 1913, and it was generally believed at that time that such vehicles would not prove equal to the difficulties offered by the unimproved roads. This belief has since been conclusively proven to have been erroneous, and long distance runs through the country districts have been made with entire success.

Until now, machines have not been carried in stock by local merchants or agents, orders being sent for machines desired for individual purchasers. Also, up to the present, most of the machines received have been of European make, of comparatively low horse power and price. At the same time, no preference as to specifications has developed, and the Consul believes that this is an especially opportune time for the introduction of American-made machines. He is of the opinion that if any American manufacturer would place one or several machines with a reliable house in Punta Arenas for exhibition, it would result in a profitable representation.

Bicycles are popular and the trade is a steady one of substantial proportions. A ready sale can be found for a moderate priced substantial American bicycle, as the present retail price is about $60.00, the principal sources of supply being England, France and Germany.

No customs duties are collected on motorcycles and bicycles entering the territory of Magallanes, but Chilean consular certification of invoice and bill of lading should be procured and forwarded to the consignee.

The publishers of this journal have a list of the leading dealers in Punta Arenas, and will be pleased to furnish them to any manufacturer desiring the same.

DUTCH TO HOLD ALL RUBBER

THE HAUGE, Feb. 1.—A royal decree has been issued forbidding the future exportation of rubber. Its aim was to cut off exports to Germany. Great Britain, it is understood, will reciprocate by ordering no further interference with shipments of rubber to Holland.

In the past rubber cargoes have been held up until it was proved conclusively that they were not consigned to German agents in Holland.

Our Canadian Letter

3,000 DEALERS PLAN "BUY-A-BIKE" WEEK

Arrangements Have Been Perfected for Big Sales Drive from March 27 to April 1; Manufacturers, Jobbers and Retailers Hold Busy Conference at Toronto

TORONTO, Ont.—Three thousand bicycle dealers in Canada are aware that the week of March 27-April 1 will be a special occasion in bicycle trade circles of the Dominion because that number of tradesmen, large and small, have been notified of the intention to hold a "big spring drive" during the week. At a meeting of manufacturers, jobbers, and retailers in Toronto on Thursday, March 16, final plans were laid by the generals of the industry and all is ready for the launching of the attack.

The idea to give prominence to the number of bicycles to be sold in Canada in 1916, namely 100,000, was dropped for a slogan, which, in itself, would give thought to the purchase of a wheel. The slogan for the spring campaign is "Buy-a-Bike Week." Mr. A. A. Briggs, advertising manager for the Dunlop Tire & Rubber Goods Company, Limited, who was delegated to act for the bicycle trade association, has sent a special request to every newspaper in Canada to give some editorial prominence to the bicycle during the week and to run a special page of reading matter to accompany the advertising of local dealers. Mr. Briggs has also written to every dealer in the country to ask the trade at large to get busy. In addition to these letters, every retailer has received cards and other material for a window display and a sheet containing many samples of bicycle advertisements of different size—all of which refer to the "Buy-a-Bike" campaign.

The decision to hold a "Buy-a-Bike" Week has brought the bicycle and accessory interests together in a way that could not have been accomplished in any other way. Only one manufacturing concern, the branch of an American house, is the only one which has not fallen into line, but this firm will join the crowd according to present indications. Representatives of Toronto distributors have even gone to Ottawa and Hamilton to boost the co-operative scheme in those cities and the local associations have contracted the fever. A fine feature of the arrangements is that every dealer in the Dominion, without exception, knows about the sales-boosting feature and is either preparing to add to the enthusiasm or is aware of the fact that he is one of the very few who are on the cold outside—looking in.

The bicycle trade of Canada is setting an example of co-operative spirit which is a model for many other trades.

McBRIDE ESTABLISHES NEW REPAIR SHOP

Canadian Excelsior and Henderson Distributor Takes Part of Adjoining Building to Use as Shop—Big Increase in Business Shown

TORONTO, Ont.—In order to take care of a steadily growing business, Percy A. McBride, distributor in Eastern Canada for Excelsior and Henderson motorcycles, Miami Power Bicycles, Rogers sidecars, etc., has taken possession of the basement and one floor of a building on Gould street, adjoining his retail headquarters, for a new repair department. This gives him 4,800 square feet of additional floor space. The adjusting department was formerly located in the basement of his main store, but this portion of the building has been remodeled for use as the showroom for used motorcycles.

McBride recently received a carload shipment of Rogers sidecars, the latter being in a variety of styles to fit the different makes of motorcycles. Two of the "side-wheelers" were delivery vans, orders for which had already been secured.

This dealer reports that his business so far this year is fifty per cent. greater than the early trade of 1915. Money is plentiful, declares McBride. One difficulty experienced is that many young men have hesitated in placing orders for motorcycles because of the possibility of enlistment in Canada's overseas army. Conscription, or the division of the male population into military and non-military classes, would help the general situation a great deal, according to McBride's opinion. He believes that the present voluntary system of recruiting is causing considerable uncertainty in many trades, and he would welcome a definite military reform.

HAMILTON CYCLE DEALERS HELP SALES CAMPAIGN

HAMILTON, Ont.—At an enthusiastic meeting of the Hamilton Motorcycle and Bicycle Dealers' Association, final arrangements were made for the "Buy-a-Bike" week which is to be held here starting March 27. Every dealer promised his co-operation in the matter and a stirring campaign is anticipated.

Victor Severy and wife recently drove from Hamilton to Toronto, forty-five miles, on a two-speed, electrically-equipped Henderson with Rogers sidecar when the mercury was flirting with the zero mark and the roads were banked high with snow. In fact the weather conditions were so severe that the radial services were blocked temporarily, yet Severy made a grand conquest of drifts, icy hills and a biting wind.

NEW TORONTO DISTRIBUTOR

Don Allan, Formerly of Hamilton, Who Has Large Cycle Territory in Ontario Metropolis

TOM ANDERSON TO TRAVEL

TORONTO, Ontario.—Thomas Anderson, a former secretary of the Toronto Motorcycle Club and for many years a prominent figure in local motorcycle circles, has been engaged by the John T. Wilson Company as a travelling salesman for the Cyclemotor.

OUTING CLUB ACTIVITIES

INDIANAPOLIS, Ind.—The members of the Excelsior Outing Club, of this city, held a banquet at the club rooms on the evening of March 16. A Dutch lunch was a feature of the affair. The club carried election returns at the recent primaries and spent the proceeds in the arrangement of this banquet. Several tours have been planned for the coming summer, and large attendances in each are promised. The membership of the club is not limited to riders, but will admit any person athletically inclined.

FURTHER DETAILS ON LOS ANGELES HILL-CLIMB

(Continued from page 13)

direction and had the girls screaming and dodging. He made the summit in 47 2-5, and covered perhaps three times the total distance of the course. Next came Gilmore, who scored four straights, his best time being 23 1-5 seconds.

In the third trial, the boys seemed to have become accustomed to the gopher holes, and the first man who flashed past the flag was Gloystein. To show what a little man could do on a big machine, Sahagin, Henderson, roared up to the top of the grade in 16 4-5, winning the first prize of the amateur class.

Both Hubbard and Clapp, of the Henderson Sales Corporation, had to delay their congratulations, for the pretty girls besieged Sahagin and wouldn't let him go. Roy Artley got over for the second time, as did Boido. Gilmore romped to the top on his Excelsior in 33 1-5 seconds, being two seconds faster than Reed, Excelsior. Barney Aviret, Pope, showed his ability as a steep hill climber by turning the trick in 26 seconds.

The fourth trial was a fitting climax to the big hill climb. Nine men got past the summit flag, Sammy Hamilton, Merkel, making the best climb of the day by breezing up the incline in 13 seconds. Gloystein and Bennett both made quick trips, the time being 19 1-5 and 18 4-5 respectively. Ed. Tice looked at his watch, again said he'd do it in at least 24 seconds and proved his word. He was followed by his fellow Harley-Davidson rider, Gustafson, who made one more dash following a rather circuitous route and reaching the summit in 43 seconds. In this trial Gilmore, Excelsior, got over in 29 2-5 seconds; and the next three men wound up the event with a whirlwind finish: Reed, Excelsior, 25 seconds; Barney Aviret, Pope, 27 seconds; Roy du Granute, Merkel, 18 seconds.

FIGURES TELL REMARKABLE HILL-CLIMB STORY

Rider	Machine	1st Trial	2nd Trial	3rd Trial	4th Trial
Derkum	Indian	210 feet			
Wolters	Excelsior	255 feet	250 feet	285 feet	
Rix	Harley-Davidson	280 feet	280 feet	280 feet	233 feet
Rubsch	Indian	10 feet	160 feet	265 feet	275 feet
Hamilton	Merkel	350 feet	277 feet	310 feet	13 secs
Gloystein	Excelsior	210 feet	290 feet	24⅕ secs	19⅕ secs
Martin	Harley-Davidson	330 feet	Injured foot and retired.		
Bennett	Excelsior	27⅕ secs	24⅕ secs	320 feet	18⅘ secs
Sahagin	Henderson	285 feet	270 feet	16⅘ secs	300 feet
Fletcher	Indian	225 feet	251 feet	225 feet	265 feet
Artley	Harley-Davidson	275 feet	27 secs	25⅗ secs	
Boido	Indian	285 feet	26⅕ secs	25 secs	290 feet
Leonette	Excelsior	255 feet	240 feet	270 feet	
Tice	Harley-Davidson	260 feet	24 secs	24 secs	24 secs
Gustafson	Harley-Davidson	235 feet	47⅖ secs	275 feet	43 secs
Ludlow	Indian	290 feet	285 feet	300 feet	300 feet
Gilmore	Excelsior	35⅘ secs	23⅕ secs	33⅗ secs	29⅖ secs
Breiter	Thor	210 feet	230 feet	225 feet	
Nelson	Harley-Davidson	235 feet	260 feet	240 feet	260 feet
Reed	Excelsior	250 feet	160 feet	33⅕ secs	25 secs
Aviret	Pope	280 feet	26⅕ secs	26 secs	27 secs
Du Granute	Merkel	380 feet	283 feet	355 feet	18 secs

The figures in feet show the distance traveled up the hill by each entrant. The seconds show the time in which the full course was completed.

Some Equipment Data

The following riders had their motorcycles equipped with Firestone tires: Tice, Sahagin, Boido, Artley, Leonette, Aviret, Reed, Wolters, Gloystein, Martin, Gustafson, Ludlow, Nelson and Rix. United States tires were used by Gilmore, Bennett, Derkum, Hamilton and Breiter. Fletcher had his mount equipped with Goodrich Black Tread tires and Rubsch used Goodyears.

Bosch magneto equipment was used by Wolters, Rix, Hamilton, Gloystein, Martin, Bennett, Sahagin, Artley, Leonette Tice, Gustafson, Gilmore, Breiter, Nelson, Reed, Du Granute and Ludlow. The Indians, excepting Ludlow's, were equipped with Dixie magnetos, the following using them. Derkum, Rubsch, Fletcher, Boido. Aviret's Pope motor carried a Splitdorf magneto.

Valvoline oil was used in the trials by the following: Derkum, Fletcher, Ludlow, Hamilton, Rix, Artley, Rubsch, Boido, Sahagin, Bennett, Martin, Gustafson and Nelson.

FRANK KRAMER'S LIFE STORY

(Continued from page 30)

pacing for Lawson and Clark pulled Kramer. Two laps from home Lawson went out in front, followed closely by Kramer, with Hollister and Hopper close up. In the home stretch Kramer jumped and passed Lawson.

Kramer got a nasty fall in the half-mile open on July 23. Jackie Clark also went down and both were eliminated from the race. McFarland failed to qualify in his heat and Lawson secured Downing to pace him in the final. Downing was pulling Lawson, when two laps from home Clark with Kramer on his wheel started an irresistible sprint. Lawson tried to go through on the pole and shoved Downing up the track. Downing collided with Clark, both going down. Kramer and Hopper rode into them and fell, too. With but three riders left, Lawson won the race easily.

Although badly bruised up and suffering with a sore leg, Kramer made a runaway of the two-mile open. Clark did not ride, his injuries being too painful. It was Kramer against Lawson alone and two laps from home Kramer went around Iver and opened up a gap of four wheels' length. He held this lead to the finish.

The next race after the six-day affair for Kramer was a one-mile open on Friday, August 16. Kramer won easily and the interest was really in the fight for second and third places between Clark and Hopper, the latter winning out. Kramer competed in a few more races and then left for his home in East Orange. Floyd McFarland, Jackie Clark and Ernie Pye went to Australia to race, while Lawson lingered in Salt Lake City.

(To be continued)

ROUTE CHOSEN FOR WASHINGTON ENDURANCE RUN

WASHINGTON, D. C., Mar. 22.—The National Capital Motorcycle Club has selected the route for its annual endurance run on April 30, choosing a course through Virginia, covering a distance of 128 1/10 miles, to be completed during the space of 24 hours. The route is undoubtedly one to try the endurance of the staunchest motorcycle and the sturdiest rider.

No less than six streams will have to be forded en route, the water in some places being several feet deep. The greater part of the run will be over the famous red-clay roads of Virginia, some of them still in the same condition as when used by Pocahontas and her tribe. The run will be through very historic territory, the scene of desperate fighting during the Civil War. The route and mileage is as follows:

Miles.	Towns.
0.0	Washington, D. C.
2.5	Georgetown
9.0	Langley, Va.
10.6	McLean
11.9	Lewinsville
13.9	Tysons Cross Roads
16.2	Vienna
18.6	Oakton
20.2	Wiley
21.2	Fairfax Court House
28.1	Centerville
31.4	Bull Run P. O.
38.7	Gainesville
42.3	Buckland
45.5	New Baltimore
50.8	Warrenton
55.5	Bethol
64.0	The Plains
72.7	Middleburg
78.9	Aldie
91.0	Leesburg
105.6	Dranesville
109.3	Colvin Run
113.0	Tysons Cross Roads
117.8	West Falls Church
119.5	Falls Church
121.5	Livingston Heights
122.8	Cherrydale
128.1	Washington, D. C.

PHOENIX RUBBER FORMED

AKRON, Ohio, Mar. 20.—The Phoenix Rubber Company has been incorporated here with a capital stock of $125,000 for the manufacture of tires and rubber sundries. The incorporators are: J. E. Whigam, John R. Brown, F. Hopper, A. H. Rash and A. J. Noble.

"ZIMMIE" PRACTICED WHAT HE PREACHED

August Zimmerman Advocated Modern Business Methods When a Factory Traveler and Applied Them When He Took Harley-Davidson Agency in Washington, D. C.

By HARRY B. COHEN

SECOND IN A SERIES OF SUCCESS STORIES ABOUT DEALERS

AUGUST ZIMMERMAN, representing the Harley-Davidson in Washington, D. C., is an example of the dealer who has made good by using modern merchandising methods. Several years ago "Zimmie," as he is familiarly known throughout the East, was a road man for the Hendee Manufacturing Company; then, a traveler for the Harley-Davidson Motor Company, and finally the representative of the Silent Gray Fellow in the National Capital. Throughout his career he has employed "live wire" methods of boosting the motorcycle.

As a Hendee traveller, Zimmerman did more than the average road man in keeping the dealers in his territory up to snuff. He relates one of his first experiences in trying to force a dealer in a good-sized town to get more business—and lost out in the trying. This dealer kept his store in a disreputable condition and this resulted in his selling only a small percentage of the number of machines possible in that section. "Zimmie" started right in on him, to spur him on; he pointed out various ways to interest the dealer so that the business would be as big as the territory indicated that it should be. He showed him how to keep his accounts properly, too. The dealer listened with but scant attention, stating that while those ideas might look good on paper, anyone attempting to put them into practice would very shortly have the sheriff's sign over the door.

Gets Washington Agency

"There were quite a number of this kind of dealers in my territory," said Zimmerman in recalling his experiences, "but I got most of them into good shape. Later, I went with the Harley-Davidson force." While on the road for the Milwaukee factory, Zimmerman heard of an opportunity to secure the Harley-Davidson agency for the city of Washington and in September, 1914, he signed up for the agency. He immediately began to put into practice the ideas he had preached for years to dealers all over the country. He was handicapped at first by the fact that the agency had changed hands once before but a few months back and riders had suffered from a lack of service through the former agent having been seriously injured in a street car accident. Nothing disheartened "Zimmie," but rather made him get busier.

Thorough Preparations

Before opening the agency, he procured a salesroom in the heart of the motorcycle district, at 912 Ninth street, N. W., and proceeded to remodel it. He next devised a system of accounts for the proper conduct of his business. The salesroom was provided with a new oak floor and the walls were panelled and decorated neatly but plainly. The accounting system was specially adapted to his business and so thorough was it that it has been continued ever since. His ledger arrangement for caring for deferred payments has been adopted by the Harley-Davidson folks as a standard form in its accounting system recommended to agents.

Zimmerman next secured a shop in the rear of his store. This he used as a repair department and place for storing used machines. The shop was entirely separate from the store. Nothing but new machines were allowed on the floor of the salesroom, nor have they been since. The repair jobs go into the shop through a rear entrance. A big stock of repair parts was put in and signs were posted that no lounging of any kind was allowed in the shop. This rule has always been enforced.

Opening the Store

On November 1, 1914, everything was ready and Zimmerman held his opening day. He passed out cigars and souvenirs, and all hands were happy. They admired his fine new place, and—bought Harley-Davidsons. Zimmerman got the names of all riders in Washington, D. C., from the local license bureau and mailed invitations to everyone on the list a few days before the opening, hence the attendance was good.

Soon after starting, Zimmerman took up the commercial end of the business. He was

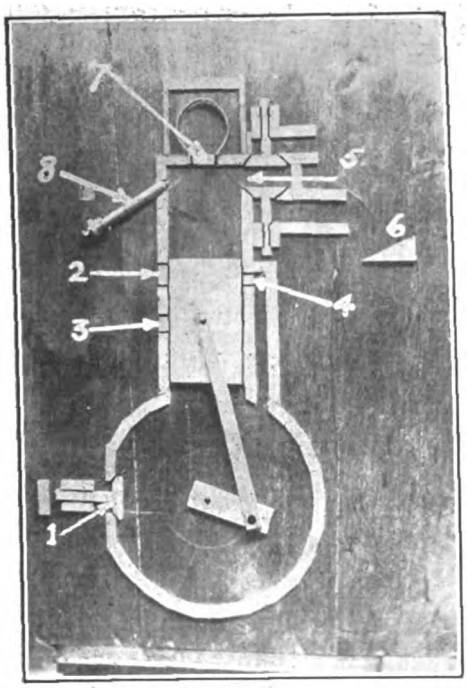
BECKWITH'S MODEL SHOWS DIFFERENT KINDS OF MOTOR

HARTFORD, CONN.—So interested were patrons of the Beckwith Motor Sales Co., Indian agent at 1283 Main street, this city, in the model shown to visitors on Indian Day, that R. A. Beckwith is keeping it on hand to show all comers. This model was made of wood and has the piston, connecting rod and flywheel movable by means of a crank on the rear of the board. It is shown in the illustration.



To show the ordinary four-stroke motor, the inlet and exhaust valves 5 are used, being opened by hand at the proper intervals. For a three-port, two-stroke motor, plugs 2, 3 and 4 are withdrawn, plug 2 representing the exhaust port and plug 4 the transfer port. Plug 3 is the admission port. For a two-port, two-stroke motor, plugs 2 and 4 are withdrawn, leaving 3 in place, the charge coming into the crankcase through valve 1. For the Diesel type of motor, the priming gun 8 represents the injection device and exhaust valve 6 the exhaust valve, while plug 7 withdrawn shows the hot ball used for ignition on many two-stroke stationary motors. Piece 6 is to fill the valve chamber 5 when demonstrating two-stroke or Diesel action.

BROOKLYN, N. Y.

CHARLES M. HART, of 173 Seventh avenue, has just taken the agency for the Miami Power Bicycle for this section. Hart is a veteran cycle dealer in Brooklyn, having been one of the earliest agents for the Pope and allied lines. His bicycle lines include the Hudson, Pope and Great Western models.

BAY CITY, MICH.

GRAVES CYCLE & SUPPLY COMPANY, local Harley-Davidson dealer, has just located in a new store at 136 Washington avenue. The show windows are of the most modern design and the show room is very ample. A line of bicycles and sundries will be carried in addition to the motorcycles and their accessories. A specialty is being made of quick service in repair parts, a large stock of which is carried.

MOUNDSVILLE, W. VA.

ARCH. STULTZ, agent for the Harley-Davidson, recently sold two electrically-equipped models in two days. "The first had a sidecar," says Arch., "and the appearance of the owner with his rig made another fellow think hard. The next day he came in and took a duplicate rig."

BIG DAY'S SALE OF HARLEY-DAVIDSONS BY GENE COUGHLIN IN BRONX

BRONX, N. Y., March 20.—Gene Coughlin, of Gene Coughlin & Company, 922 Washington avenue, had a profitable wind-up for the week of March 13. He sold five Harley-Davidsons, of which two were fully-equipped sidecar outfits, in one afternoon. The total of these sales was $1,440.

The first sidecar outfit cost $384, the motorcycle being electrically-equipped and fitted with an F-N tandem. The Rogers sidecar had covers for the upholstery and an adjustable footrest. The second combination cost $374. The three solo mounts were all three-speed twins.

"I guess that I am not far wrong when I say that the first sidecar rig was the most expensive ever sold in the Bronx," said Coughlin. "With the five machines sold Saturday, my 1916 total to date is 30, while the company has sold 23 second-hand mounts. The accessory trade is in fine shape."

COLUMBUS, O.

BELT-FRANKLIN MOTOR COMPANY, handling the Indian in Central Ohio, is having all its shipments in car-load lots these days. "This saves considerable time," says President Belt, "and time is valuable just now, as the agents are asking for machines right and left. The demand for Indians is much better so far this season than all of last year, and 1916 will be a record-breaker."

PROVIDENCE, R. I.

GENERAL MOTORCYCLE SALES COMPANY, of which M. W. Kibbe is manager, has taken the agency for the Henderson in Providence. Its headquarters are at 314 Broad street, in a good section of the outside business district.

The company will carry a full line of the four-cylinder models in stock and will keep a reserve of 1916 models on hand to cover immediate demands. The accessory department has been finely organized. A stock of bicycles will be added later on. United States, Firestone and Goodrich tires are handled.

HARRISBURG, PA.

THE WEST END CYCLE COMPANY, of which George F. Hewitt is manager, has taken the agency for the four-cylinder Henderson for this city. Manager Hewitt is launching his spring campaign in spite of the severe weather, and has already received orders for delivery at the end of March. His list of prospects is a long one.

NEW YORK, N. Y.

STERN BROTHERS have opened a motorcycle agency in their new two-story building at 1519 Second avenue, corner of 79th street. They will handle the Indian motorcycles and the Miami Power Bicycle. They have registered their shop with the F. A. M.

In connection with the Miami Power Bicycle, which Stern Brothers recently added, twelve machines have been sold, this number being two more than their contract. A second lot of ten has accordingly been ordered from Middletown, O.

BEAVER FALLS, PA.

ANDREW BRYAN has signed up with H. D. Immel & Brother, distributors of the Henderson in this section, for the selling rights to the four-cylinder Detroit-made mount. Bryan will cover the entire country, using one of the 1916 two-speeds for the purpose.

An End to Chain Trouble

When you buy "The Coventry" Chain you are buying practical transmission insurance. You KNOW, for a positive fact, that your transmission troubles are definitely at an end.

"The Coventry" Chain

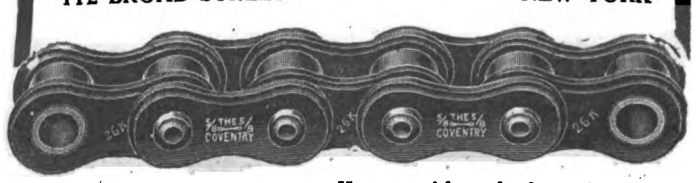
Strongest Motorcycle Chain in the World

is designed to permanently remove from the rider's mind any doubt as to the absolute readiness of his transmission to tackle the worst road conditions in the country and come through triumphant.

Heavier rivets, a special secret process of hardening and heavier side-plates makes "The Coventry" Chain by far the strongest, yet the lightest motorcycle chain in the world.

"The Motor's True Mate" is a booklet that is both interesting and instructive, in that it tells an amusing transmission story and also directs how best to take care of your transmission. It's free for the asking.

HERBERT L. FUNKE CO., Inc.
112 BROAD STREET NEW YORK



INDIANAPOLIS, IND.

H. L. DIPPLE has been pushing the Silent Gray Fellow among the business men for the last season or two and the latest sale made was to W. T. Miller, of the Miller Rubber Co., Anderson, Ind. The Miller outfit, designed to give quick service to disabled motorcycles and automobiles on country roads, is a 1916 three-speed electric model with sidevan. Inside the van is an air-tank charged to 500 pounds and there is also a small vulcanizing outfit for use on the road.

The Taylor Carpet Company, now using three Harley-Davidsons, has ordered two more from Dipple. These mounts will be used in suburban and rural service, in carrying carpets and small tools.

BRADFORD, PA.

DEMLER & ADAMS, of 18 Kennedy street, exhibited the Powerplus and Featherweight models of Indian at the Bradford automobile show in Company C Armory last week. The firm distributes the Indian product in McKean County and handles a full line of accessories and bicycles.

Window Display of Howard A. French & Co. in Baltimore, Md., During Recent Indian Day Celebration

LOS ANGELES, CAL.

GIRTON-HOFFERITES and their customers rejoiced muchly when the first shipment of 20 Excelsior lightweights arrived last week. The crates were taken off in quick time, but when the day was over, the firm was minus eleven of the lot; the owners had ridden them away. In another two weeks, there will be a second shipment along. One of the firm's recent deliveries was a big-valve three speed Excelsior to the Santa Monica police.

T. LEE, who manages the Henderson Motorcycle Sales Company, has returned from a three-weeks sidecar trip upstate. He has signed up a number of dealers for the Henderson and attracted much favorable comment by the way that the four-cylinder sidecar rig traveled the bad roads in that section.

RECENT TRADE BULLETINS CONCERNING DEALERS IN NEWARK, N. J.

WATSON KLUCZEK, representing the Reading Standard, received five of the big brown twins this week and has but one left at the present time. He is displaying an Emblem light twin in his windows and this little boat is attracting much attention from near-riders as well as from the motorcycle fans.

CHARLES KREBS, who for years has handled the Pope line of motorcycles and bikes, is preparing to move from his present place at 51 William street to the hill section of the city. He is negotiating for a store on or near Springfield avenue.

WALTER GOERKE was awarded the contract for supplying the Orange police with new Indians last week. He will turn over to them two Powerplus three-speeders, to replace two Indians purchased in 1913 and still in good service after 17,000 miles of hard going.

HAVERFORD CYCLE COMPANY, Excelsior and Motor Wheel representative, has about completed the alterations which were started a short time ago. A mezzanine floor has been fitted for the office while the repair shop is now in a building in the rear. This building is 18 feet square and of concrete; it has fire-proof window frames and doors.

Manager Bunkin says that the interest in motorcycles, both new and used, surpasses anything he has experienced, not excepting the banner year of 1913. He will shortly increase his sales and repair force. At present, he has ten Excelsior three-speeders and three Rogers sidecars on the way, all being booked for.

CARL W. BUSH COMPANY has sold a three-speed Harley-Davidson twin to the Essex Falls police department and another to the Montclair health department. The firm reports that sales have passed the half-hundred mark and that the electrically-equipped Silent Gray Fellow is daily gaining more adherents. Sidecars are selling at the rate of one for every other machine and the market for used mounts is very brisk.

KANSAS CITY, MO.

JOHN MURRAY is now busily arranging details of his salesroom at 914 East Fifteenth street, into which he has just moved. Murray handles the Harley-Davidson in Kansas City. In his new quarters he has a better lighting system and a more modern building than the former place at Fifteenth street and Grand avenue.

PATERSON, N. J.

Edward Mutter, the veteran rider and official of the Haledon M. C., is now a partner in the W. Edward MacDougall Company, Harley-Davidson agent in this city. He is an expert repairman, in addition to his riding abilities, and can be seen these days working alongside the rest of the mechanics in a new Firestone "union suit."

OTTAWA, ONT.

H. L. BYLES has taken the agency for the Thor and also arranged to handle the Miami Power Bicycle. Byles conducts a delivery service for a number of commercial houses and is fitting up a Thor with Rogers delivery car for the purpose. He is also agent for the Rogers sidecar in Ottawa and vicinity.

POPE PRODUCTS ATTRACT AT BOSTON AUTOMOBILE EXHIBITION

BOSTON, MASS.—The Pope-Hartford Company, recently appointed Pope distributor in this city, had an attractive exhibit in Paul Revere Hall during the recent Boston automobile show. The booth showed the three-speed twin, Model T-16, as well as other twin and single cylinder models and a line of Pope bicycles. Among the latter the chief favorite to the visitors was the Columbia chainless. Good business was done at and after the show.

The Pope-Hartford Company has a nice location at 591 Boylston street, in the heart of Automobile Row, with ample space for both motorcycles and bicycles. Part of the main salesroom will be devoted to the two-wheelers, while a complete repair department will be located in the basement. The building itself sets back from the sidewalk about 20 feet, permitting the erection of two large glass cases on either side of the entrance; one of these will display the Pope motorcycle and the other the bicycle.

PITTSBURGH, PA.

THE MOTORCYCLE EXCHANGE, representing the Indian, has delivered 40 machines and 15 sidecars so far and has deposits on 100 machines. This is double the output of last year. The second carload from the Hendee factory will be in before the end of the week.

A. G. Schmidt is now sole owner, having bought out the interest of H. F. McKane, his partner. Schmidt has added Cameron Kaup to his sales force for the coming season. The present headquarters are at 5606 Penn avenue.

TOLEDO, O.

MANAGER OBERWEGNER, of the Oberwegner Motor Company, has been very active during the past three weeks closing up orders for Henderson motorcycles for the last of March delivery. He held a special exhibition in his store a few weeks ago which served to cystallize the interest which had been aroused in his territory, and the direct result was the sale of a number of four-cylinder mounts within the last few days.

Oberwegner has a number of salesmen out to get sub-agents and care for retail sales. In addition to his agency he has built up a substantial jobbing business with steady custom in Ohio, Indiana and Illinois.

READING, PA.

WILLIAM L. AND ALBERT RHODE are now conducting the business of their father, the late L. A. Rhode, at 636 Cherry street. William attends to the business end, while Albert has charge of the repairing. The Rhodes are sole agents for the Emblem in Berks County, and do an extensive business in bicycles and bicycle repairing. During 1915, repairs were made on over 5,000 bicycles.

LANCASTER, PA.

HARVEY R. WILLIAMS, handling Indian and Thor in this city, has sold two Thors and one Powerplus Indian during the past week to local riders. He has also disposed of twelve Relay bicycles in the same period of time.

NASHVILLE, TENN.

W. E. DAVIS has taken the agency for the Thor line in Nashville and vicinity and has just received his 16-V demonstrator. Davis has several good prospects and figures that 1916 will be a banner year for motorcycles in this section.

Easy Sales Big Profits

'SMITH MOTOR WHEELS are *bought*, not sold," says one enthusiastic dealer.

Motor-Wheeling is gaining popularity every day. One sale brings a multitude of inquiries to your store. To see a Motor-Wheelist is to be interested in the device.

And the great national magazine advertising campaign is doing wonders in boosting sales for dealers.

Besides its rapid sales as a pleasure vehicle, the SMITH MOTOR WHEEL is making big headway as a quick and economical delivery device among merchants. Readily attached to one of the many delivery bicycles — basket or box attachment—it speeds up house-to-house deliveries and brings the merchant better satisfaction among his customers.

There is a goodly profit on every wheel sold and it does wonders in boosting the sale of new bicycles, appliances and accessories.

More than 56% of all SMITH MOTOR WHEEL sales last season carried with them the sale of new and high grade bicyles. Tires and accessories go hand in hand and the cash register works over time.

Our big national advertising campaign is working night and day for dealers.

In a limited number of territories we have not as yet appointed representatives. We have an attractive proposition for the right kind of dealers. Write for details.

THAT LITTLE $10 ACCOUNT MAY COST YOU $500

(CONTINUED FROM PAGE 17)

It has cost many dealers hundreds of good hard dollars to learn the lesson set forth in this article. They know it's straight goods.

Now for the remedy—the brighter side of the picture. When Mr. Patron asks permission to run up a little bill, remind him—with a friendly smile—that your business compels you to sail close to the wind and that you must get your money promptly if you are to continue in business. If he persists, give him a little time. It is not necessary to sand-bag him for the account the moment it is due. But when the first of the month rolls round see that Mr. Patron gets his statement. And see that the matter is kept in his mind—always in a friendly, soft-pedal manner—until the bill is cleared up.

Don't be stiff about it. Tell Mr. Patron something about what it means to keep up an establishment like yours, and explain that you must depend upon your friends to help you continue it. Appeal to the fairness in him—you'll nearly always find he has his share—and show him how you are hampered when the money fails to come in as it should.

He'll come through. He may roughen up a bit at the time, but if you handle him properly he will continue to patronize you. What's more, he will give you his respect.

If he can't be made to respond to such treatment, you had better lose him. Be convinced of that. But your chance of losing him then is only fifty per cent. as great as if you let him drag on till he reaches the resentment stage. When he gets that far, he's gone for keeps.

No motorcycle dealer can afford to carry a large number of small bills on his books. He is obliged by force of circumstances to turn his money over. He must get returns. If his money stands out, he's blue and discouraged; and if, to top off the situation, he loses the very man he has sought to assist he has received a sad wallop indeed.

The moral is obvious: Be fair, even generous, but be businesslike. And remember that the small account you carry over on your books is just as likely to be a knockout as it is to be a boost.

WHEELING, W. VA.

T. A. HOGE & COMPANY, Thor agents in this city, have just sold the first Cygnet Rear Car in this city to Leo Pack. Pack has it hitched up to a big Thor twin and is enjoying life with it.

HERMAN FRIEDRICH, Pope representative, is awaiting the coming of a Pope three-speed twin from the factory in Westfield, Mass. "It is coming—and then going"— says Friedrich, "for there are three waiting to gobble it as soon as it arrives. The man who put in the first order gets it, of course."

EARL BRAUNLICH, Harley-Davidson and Cleveland lightweight representative, has sold three of the Silent Grays within the last week as well as a Cleveland to the son of one of the city's leading physicians. The Harley-Davidsons were all fitted with side cars.

MANCHESTER, IOWA

HAROLD ADAMS, representing the Henderson in this section, has arranged for the sale of 17 of the four-cylinder mounts so far and expects to double this before the end of the 1916 season. He says that sales will be much more rapid than at present when the first bunch of machines get on the road.

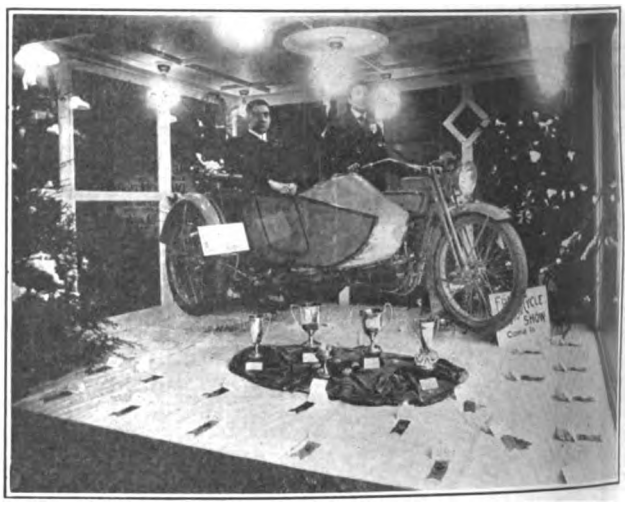
WILLARD-MORAN BOUT TICKET DRAWS CROWDS TO SWENSON'S STORE

PROVIDENCE, R. I.—As another demonstration that B. A. Swenson, "The Indian Man," takes advantage of every little thing which will aid his business in any manner, is the use he made of his Willard-Moran bout ticket. Swenson got his ticket for the big mill and then attached it to a sign which he hung in one of his show windows. On the sign was the announcement that this ticket was for the championship bout. A crowd started to collect soon after the ticket was put up, and quite a number of people entered the store to ask for details. Incidentally, Swenson and his aides got a number of prospects from among the visitors. So great was the crowd the first day of the "exhibition" that the policeman on that beat asked B. A. to take the ticket out of the window over night.

SIDECAR SUSPENDED BY CONTROL WIRES AT HEAGY BROTHERS' STORE

HARRISBURG, PA.—As a demonstration of the sound quality which enters into the Silent Gray Fellow, Heagy Brothers, local agents, suspended a full-rigged



The Heagys in Their Harley-Davidson Sidecar

sidecar combination by three control wires in their show window. There was much doubt on the part of many of the local riders whether the wires would hold the combination, but the matter was settled for good and all when Ray Heagy mounted the machine and Harry sat in the sidecar, and the wires held them securely.

The Heagys in their wire-carried combination were one of the features of the recent show-week. The Heagys have their headquarters at 1204 North Third street.

ROCKY MOUNT, N. C.

F. Y. ARRINGTON has taken the agency for the Henderson for Rocky Mount and vicinity for 1916. Arrington has sold his first lot of ten machines already and is awaiting another shipment from the factory in Detroit.

VALENCIA, SPAIN

FRANCISCO CATALÁ, of Carniceros. 21 Pral., has taken the agency for the four-cylinder Henderson for Valencia and vicinity. Sr. Catalá has received his demonstrator and is interesting the sporting fraternity in this city in the powerful four-cylinder model.

LOUISVILLE TIRE CONCERNS SET STANDARD REPAIR PRICES

LOUISVILLE, KY.—The leading tire concerns of this city have standardized all repairs and the prices for these repairs are now being advertised in the local papers. The five concerns, all of whom conduct vulcanizing plants and service stations, are: Roy E. Warner & Co. (Firestone); Federal Rubber Mfg. Co. (Federal); Falls City Vulcanizing Co.; Kentucky Tire & Rubber Co. (United States) and the Quick Service Tire Co.

Following are the standard prices: Tubes, one puncture, 50 cents; each additional puncture in same tube, 25 cents; one inch blowouts, 75 cents; two-inch, $1; three-inch, $1.25; four-inch, $1.50; splicing, $1.50; new valves, $1.50 each. Casings, three-inch tire, spot and pad, $1. Larger tires for automobiles have their own standards.

Rider in Colonial Costume Used to Advertise Harley-Davidson by Agent Carl W. Bush of Newark, N. J.

PORTLAND, ORE.

THE MOTORCYCLE SALES COMPANY, handling the Reading Standard, at 1506 Market street, will enlarge its quarters, as T. A. Mitchell, who has occupied part of the store, has taken on a line of automobile supplies and has moved downtown. The company can use the space to good advantage, as in addition to handling the R-S for Northern California, the Henderson agency for the Bay Counties and the local Thor agency are held. The firm feels that 1916 will be the biggest motorcycle year ever seen here.

THE APEX BICYCLE CO., has renewed its contract for the Thor motorcycle agency for 1916. Mr. White, head of the company, says that after seeing the new season's models, everybody around his store will talk, boost and ride Thors.

FIRST MOTORCYCLE SHOW IN WHEELING TO OPEN MARCH 27

WHEELING, W. VA.—The first motorcycle, automobile and accessory show ever held in this city will open on March 27 and continue until April 2. All local dealers have reserved spaces. C. F. Braunlich will exhibit the Harley-Davidson line, the Excelsior lightweight, Cleveland lightweight and Smith Motor Wheel, while Wesley House will show the Indian line and Indian bicycles.

T. A. Hoge has planned to show the Thor, Cygnet Rear Car and Excelsior bicycle, as well as accessories. Earl Rogers will exhibit the Flying Merkel, while H. G. Friedrich will be on hand with the Pope models. The show will be an annual affair hereafter.

MOTOR SLED PROVES FINE PUBLICITY MEDIUM FOR NIEDENGARD

STEUBENVILLE, O.—G. H. Niedengard, Excelsior agent, at 162 South Third Street, has been using the motor sled shown in the photograph, not only as a means of enjoying life between demonstrations and sales, but also as an advertising medium. Driving through the snow in this city, the rig attracted a lot of attention and a number of sales of Excelsior motorcycles have resulted. The sled was hit by a trolley car and smashed up pretty well, but the Excelsior motor was not damaged and Niedengard says he can trace one sale directly to this fact. Nick, Niedengard's able helper, is at the wheel in the picture.

Niedengard's Excelsior Motor Sled

SAN FRANCISCO, CAL.

PACIFIC MOTORCYCLE SUPPLY CO., Indian distributor for Northern California, is getting a carload of machines every two weeks now, and in addition, is awaiting a full car of Featherweights from the Hendee factory. Local dealers throughout the State are anxiously awaiting this latter shipment, for there has been a big demand for the little two-strokers.

FRED H. BENTE, representing the Excelsior at 1550 Market street, is making a short visit to Los Angeles just now. Bente always combined business with pleasure and will return in a few days with a number of extra orders.

W. E. JACKSON, of W. E. & W. H. Jackson, Coast agents for the Dayton line, has taken a few days for a trip to Portland, Ore., in order to look over things in the Rose City.

"ZIMMIE" PRACTICED WHAT HE PREACHED.

(CONTINUED FROM PAGE 40.)

assisted in this by the fact that in Washington motorcycles can be used nearly all the year round, the streets being well paved and very little snow falling during the year. He called personally on the manager or proprietor of the leading business houses and personally saw that they received a copy of Harley-Davidson literature. Next he interviewed those employees who would be called upon to use the machines and very soon showed them the advantages which would accrue by using a motorcycle in their work. Soon Zimmerman placed a number of machines with local real estate corporations and with several department stores for the use of their collectors and adjusters. These gave such good service that he had no difficulty in introducing his machines into local utility corporations such as the Potomac Electric Power Company and the Washington Gas Light Company. He has placed over 50 for commercial use in Washington so far and is in receipt of repeat orders from many concerns as their business expands.

Performances on the Road

August Zimmerman is an ardent believer in developing the sporting side of the motorcycle business. Two years ago he won the New Jersey M. C. endurance run and in 1915 finished first as a member of the Harley-Davidson team in the same club's two-day event. In two hill-climbing contests promoted last season by the National Capital M. C. of this city, he won four first places and two second places out of six events. It is his intention to participate in the coming 300-mile endurance run of the National Capital M. C. to Philadelphia and return.

SECOND-HANDS SELLING FAST AT BAUMGARTEN'S

SAN FRANCISCO, Cal., Mar. 20.—John H. Baumgardner, the Indian agent on Van Ness avenue, had quite an accumulation of "trade-ins" the first of the month, but is getting them well cleaned out, reporting a sale of used machines ten times as large as at the same time last year. New machines, also, he says have been selling for the last few weeks at the rate of 2½ to 1 last year.

NEW HENDERSON DISTRIBUTOR IN JOHANNESBURG

JOHANNESBURG, So. Africa.—An announcement of considerable importance in motorcycle circles of this part of the country is of the appointment of a new distributor for the four-cylinder Henderson motorcycle. The new man is J. B. Ritchie, of this city, who has had wide experience in distribution of motorcars throughout South Africa.

Mr. Ritchie has previously sold Studebaker automobiles in this territory, and is, of course, continuing the line in conjunction with the Henderson motorcycle. As an indication of the scale on which he conducts operations, his sales of Studebakers last year totalled over 1,000 cars. He says that there is no reason why motorcycle sales should not be in proportion.

General conditions are extremely favorable to good motorcycle business here, Mr. Ritchie reports, as the mines are all working at full capacity and the people generally have plenty of money. There are a few good roads in this section, such as the one from this city to Pretoria, but many of the roads are little developed, so that a machine must be strongly built and have plenty of power to be equal to the requirements.

SHIFTING THE VALVE GIVES MORE TIRE MILEAGE

TEN years of motorcycle riding has taught me much, particularly about tires, but it was not until recently that I felt that I was getting the full wear out of my pneumatics. It is next to impossible to keep a motorcycle wheel true and the tire wears hardest where the rim is flattest and consequently where it strikes the road with a swat instead of rolling evenly.

There is only one hole for the valve in the inside flap, and therefore the tire always goes on in the same position. If you will cut a new hole for the valve about a foot from the original one, and put the valve through this second hole, you shift the place in the tube where the greatest wear occurs. By the time you get the hole all the way around the shoe, you will find that the tire will be worn quite evenly and at least 500 more miles can be had from it.

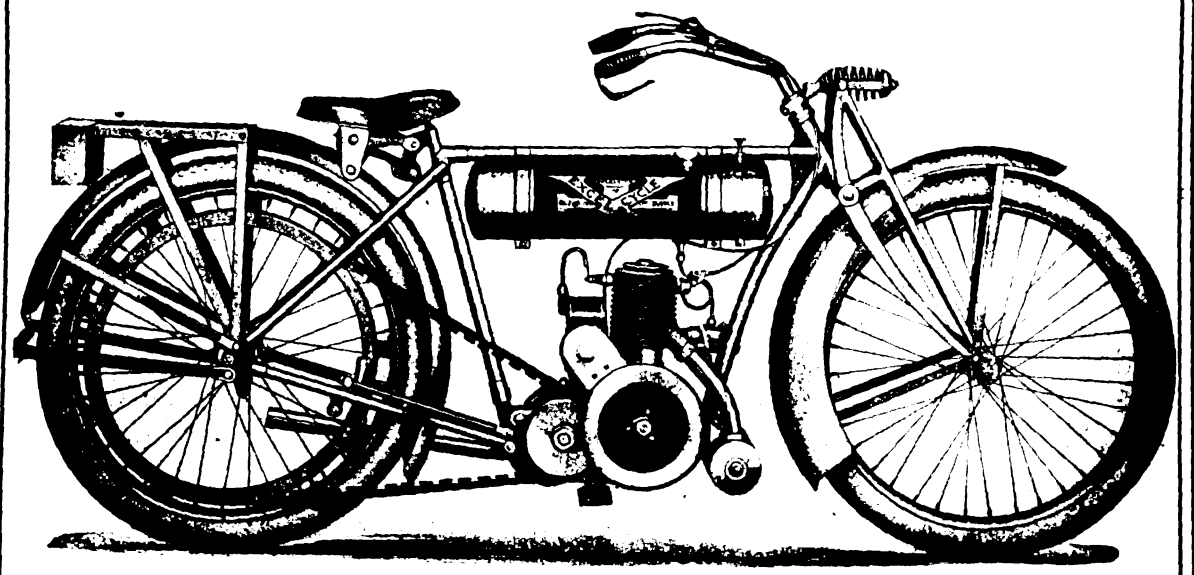
EXCELSIOR LIGHTWEIGHT

The First and Only Lightweight to Climb Mt. Hamilton



On March 12th, the San Francisco, Oakland and San Jose Motorcycle Clubs held a joint run from San Jose to the Lick observatory on the summit of Mount Hamilton.

E. D. Stevens showed his nerve and confidence by entering the run on an EXCELSIOR LIGHTWEIGHT and not only made the complete trip but was the first one to arrive at the top.

The distance from San Jose to the observatory is 26 miles, with a rise of 4,250 feet, with over 500 sharp turns, many of the hairpin variety.

Mr. Stevens' time was 1 hour and 57 minutes, only 12 minutes greater than the average time of the big three speed twins.

Motorcycling, in their story of the run, comments on the performance of the Lightweight as follows:

On the tip top point of the mountain, with engine still warm and with a happy, smiling rider standing very near by was the surprise of the day, a little 135-pound Excelsior Lightweight, and standing alongside was its 175-pound rider, the first motorcycle to arrive at the top. This rider had left San Jose at 6:58 a. m. and had arrived at the top at 8:55 a. m., 1 hour 57 minutes on the way. The average time of the heavy machines was noted as being 1 hour 45 minutes.

Some of the heavier machine riders wished to be shown that the little baby could actually climb, so the little machine went down the road, turned in the steep grade and again came to the top, engine roaring and making the very top of the mountain, using the high gear, the low being used only for starting purposes and for some of the hairpin turns.

This Lightweight is an EXCELSIOR and therefore ALWAYS MAKES GOOD

REACHING OUT FOR MORE SALES

If the name "Smith Motor Wheel" is not on the flywheel of your motor, it is not a Smith Motor.

In certain localities we have not as yet appointed representatives. We invite correspondence with established dealers.

AGGRESSIVE SMITH MOTOR WHEEL dealers are discovering new ways every day for bettering their sales' record. Our advertising in these pages from time to time will take the form of fisherman's gossip. When we find a new "bait" or a new "hook" that has proved successful, we intend to pass the good word along.

For example—one of our men in Illinois does business in a small college town. He saw no reason why the students and instructors should not be logical customers. He worked hard and secured a young man of the school to try out the Motor Wheel Way.

Result—the new bicycle device proved so attractive and fascinating that the Motor Wheel fever spread like an epidemic. His orders have been jumping ahead steadily ever since. The first wheel he introduced into the college community proved the lure. Others followed quickly and his first rider was the best asset he could have worked for in the whole town.

This is one instance of how the SMITH MOTOR WHEEL will advertise itself and bring new customers.

Remember, the SMITH MOTOR WHEEL appeals to everyone because of its simplicity, ready attachment to any bicycle—and, you know, bicycling is becoming more popular every day. Many SMITH WHEEL purchasers will also want new bicycles, tires and accessories.

The opening season of 1916 is starting off with a blaze of new sales—more than we ever expected.

Let us hear from you—perhaps we may have a suggestion that will help boost your business.

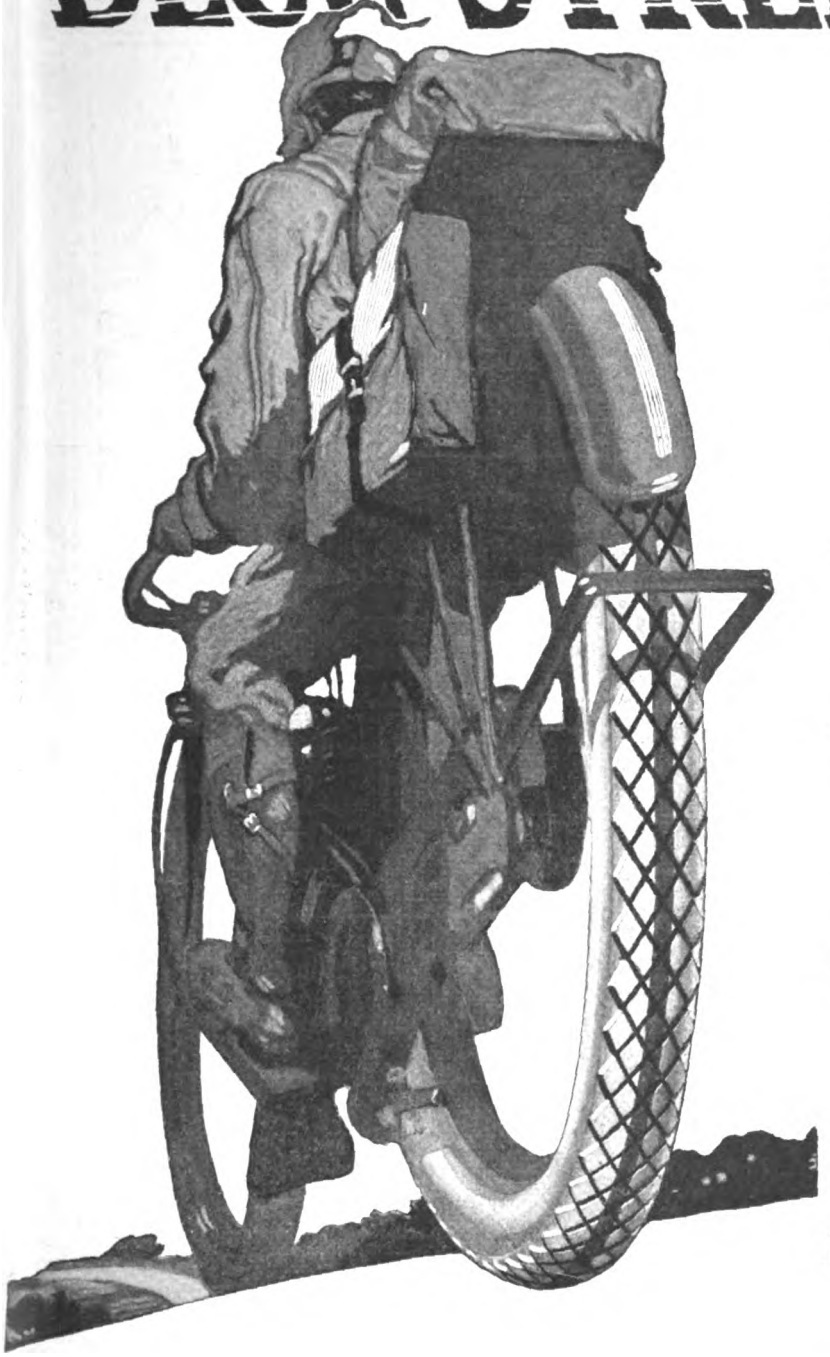
BLUE STREAKS



A Balance In Your Favor

Do you think the motorcycle manufacturer does not know which tire gives the best service and which way the wind of popular approval is blowing?

Three out of every four new motorcycles manufactured this year will carry Blue Streak tires.

This is a pretty strong preference for Blue Streaks. But these tires won their way to this extraordinary position because of their actual performance.

When you know that they are the choice of the majority of riders and every leading motorcycle manufacturer, think how much harder it is to sell any other tire.

Don't retard longer the growth of your tire sales and the satisfaction of your customers.

Write us today in order that we may send you our complete plan for cashing in to the greatest possible extent on Blue Streak popularity.

JANUARY MOTORCYCLE EXPORTS HEAVY

Figures Just Compiled Show Increase of More Than 100 Per Cent. Over Same Month in 1915; Seven-Months Period Shows Jump of More Than 350 Per Cent.; Shipments of Bicycles and Parts Reach Value of $55,581 for Premier Month of This Year

NEW YORK, Mar. 28.—Foreign trade statistics for January, just compiled by the Bureau of Foreign and Domestic Commerce, reflect, as have the figures for the past year, the healthy state of our ever increasing export trade in both motorcycles and bicycles. During January of the present year, for instance, the figures show that we exported 917 motorcycles as against 424 for the same month of 1915, which represents a percentage increase of better than 100. The valuation of the shipments during January just past was $173,409 as against $71,839, the valuation of the exports for the premier month of 1915, the percentage increase being in the neighborhood of 110. The average valuation of the machines shipped during January just past shows an increase of $20 a machine over those exported during January, 1915, the figures standing at $169 and $189 for the respective periods.

Records for Seven-Months' Period

However impressive these figures may seem, those dealing with the exports of motorcycles during the seven months ending with January, 1916, as contrasted with the exports for a like period ending with January, 1915, are even more so. Some 9,068 machines were shipped during the period terminating with the January just past, as against 1,964 for the same period a year ago, the increase reaching better than 350 per cent. The valuation of the shipments for the seven months terminating with January, 1916, was $1,795,405, as against $364,219 for the shipments of a like period a year ago.

Shipments of bicycles and parts during the month of January, 1916, also exhibit a healthy increase in value, being 100 per cent. better than during the corresponding month of 1915. The valuation of the shipments during last January is put down at $55,581, as against $21,057 for January of the year previous. During the seven months terminating with January, 1916, bicycles and parts to the value of $42,492 were shipped "across the pond," while during the same period ending with the premier month of 1915 the valuation of such shipments was only $208,656, representing an increase of better than 110 per cent.

To Insular Possessions

The figures relating to shipments of motorcycles, bicycles, and parts to our insular possessions held much of interest. During January of 1915, for instance, we shipped two-wheelers and parts to the value of $2,593 to Hawaii; during the same month of 1916 the valuation of such shipments totaled $9,035. During the seven-month period ending with January, 1915, the valuation of such shipments was $35,158, while during the period ending with the present year they aggregated $55,762. The shipments to Porto Rico, however, exhibit a marked decrease, both for the single month of January, as contrasted with the same month of 1915, and for the seven-month period. During January just past Porto Rico took two-wheelers to the value of only $998, as against $1,809 for the year previous, while during the seven-month period ending with January just past the shipments were valued at $15,560, as against $18,320 for the like period ending with January, 1915.

The statistics for the Philippine Island shipments are contradictory in character. Thus, during January, 1915, the total valuation of the shipments of two-wheelers was $2,315, while during the premier month of this year they were only $1,100, showing a decrease of 50 per cent. For the seven-month period, on the other hand, the figures show an increase of nearly 75 per cent, totaling $20,426, for shipments made during the period ending with January, 1915, as against $34,767 for the period ending with January just past.

European Production Low

If any further proof than the jump in our export figures were needed to demonstrate utter stagnation of European two-wheeler industries, the figures dealing with our imports from the European countries supply it. During January, 1915, we imported motorcycles, bicycles, and parts to the value of $7,117. During January just past the valuation had decreased to $4,722. During the seven-month period ending with January, 1915, the valuation of such imports was $63,911, but the valuation of the shipments during the like period ending January, 1916, had dwindled to $17,561. These figures tell their own story.

VAN CLEEF WILL BUILD PLANT ADDITION

CHICAGO, Ill., Mar. 28.—Van Cleef Brothers are riding right on the tiptop of the prosperity wave that is sweeping the country. Last week they announced that their books show an increase in business of 150 per cent., since the first of the present year, over the same period for 1915. Orders continue to come in at a record pace, but these are being filled promptly, for the Van Cleef brothers looked ahead, saw the big demand for their goods, and stocked not only their present plant, but also a large warehouse nearby. They are now contemplating the building of an addition.

FIGHT FIRESTONE FIRE FOR THREE HOURS

AKRON, Ohio.—A blaze which broke out in a storage room of the Firestone Tire & Rubber Co. on the night of March 20 threatened for a time to do heavy damage and brought out six fire companies. Fireproof construction and active work on the part of the fire department, aided by employes of the company, confined the fire to the building where it started. Burning rubber and chemicals made the work of the force difficult, but the blaze was subdued, at the end of three hours, with a loss of only about $5,000.

The conflagration has in no way interfered with Firestone shipments.

TELLS OF MOTORCYCLE DISPATCH WORK IN FRANCE

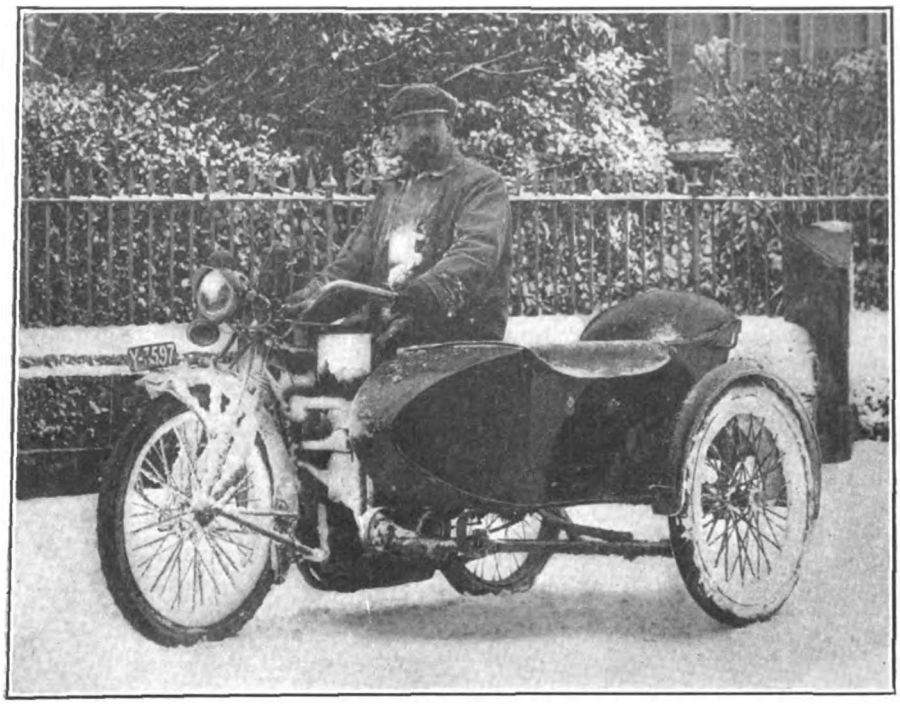
Canadian Rider Just Back from the Inferno of the Western Battlefront Says Motor Two-Wheelers Show Well in Fighting and Also in Less Spectacular Service

TORONTO, Ontario.—One of the Canadian soldiers who was recently shipped back to the Dominion after doing his bit for the country was Corporal E. R. Lewis, 836 Yonge St., Toronto. Corporal Lewis was originally a member of the Sifton Motor Machine Gun Battery which was made up of many armored automobiles. The officers and men of this battery soon became separated from their fine equipment, according to Corporal Lewis, and the armor-plated cars are probably now being used for transporting supplies of various kinds in the war zone. The machine gunners were taken from the autos and were placed on motorcycles as soon as they reached the front, and with the motorcycles and sidecars they were able to render considerable service, particularly at crises.

"There was absolutely no use for fighting cars at the front," declared Corporal Lewis, in conversation with a representative of **Motor Cycle Illustrated.** "Many soldiers who had never ridden a machine before were placed on motorcycles, however, and the two-wheelers have made good. The motorcycles have shown up well in both fighting and dispatch work, because of the ease in which they can be manipulated on roads cut up by big shells or by entrenchments which run in every direction and through everything. Motorcycles would become still more ideal for fighting if only some means could be devised to protect the rider. In the case of motorcycles which have sidecars on which machine guns are mounted, the man on the sidecar is protected by a shield, but the rider sits there without any cover. If the rider is shot, the motorcycle outfit either runs away and is wrecked or the operator of the machine gun has to jump over to the motorcycle. Some very daring attacks have been pulled off by motorcyclists. Not long ago a number of motorcyclists with Scott machines dashed right up to the firing line, in full view of the enemy, and started to blaze away at the foe."

Corporal Lewis was compelled to return home because of the manner in which he was shook up through tumbles into unseen shell holes. Riding into these craters at dead of night forms a sensational diversion to mere dodging of bullets.

UNUSUAL SIDECAR PHOTO FROM BRITAIN



Snowstorms Are Rare in England, Hence Such Pictures Are Hard to Get. The Rider Is A. C. Coles, of Bridgewater, Who Sends the Photograph

DAYTON CATALOG DESCRIBES EIGHT MODELS

ALL eight of the Dayton motorcycle models are effectively pictured and described in the 1916 catalog issued by the Davis Sewing Machine Company, of Dayton, O. The various models are colored in Dayton red, while the various gearsets and other components are in half-tone. The various details, such as the dual clutch control, dry disc clutch and double brake are briefly but thoroughly described.

PREST-O-LITE GETS DAMAGES IN REFILLING SUIT

INDIANAPOLIS, Ind.—The Prest-O-Lite Company has been awarded damages to the extent of $286.75 from the Cut Price Auto Supply Company, of Boston, Mass., for illegally filling and selling Prest-O-Lite tanks with Searchlight gas, marketed by the Searchlight Gas Company, of Chicago, Ill. Other dealers have been restrained by permanent court injunctions from filling Prest-O-Lite tanks, among them being John G. Honecker, Mutual Auto Supply Co., and the Windermere-Euclid Garage Co., all of Cleveland, O.

FISK HAS WELFARE DEPARTMENT FOR EMPLOYEES

CHICOPEE FALLS, Mass.—The Fisk Rubber Company has started a Department of Industrial Relations, under the supervision of Dr. W. H. Coon, formerly of the Massachusetts Health Department. This department will have charge of the welfare of all Fisk employees, in particular as regards safety and health. The scope will be very broad.

The company has provided free health insurance and free life insurance for its workers, also. The life insurance starts at $500 at the end of the first year of employment and rises by $100 a year until a maximum of $1,000 is reached.

U. S. RUBBER OFFICERS ARE RE-ELECTED FOR 1916

NEW YORK, March 24.—Officers of the United States Rubber Company, of this city, were re-elected yesterday at a meeting of the board of directors. The officers are: Samuel P. Colt, president; James B. Ford and Lester Leland, vice-presidents; Homer E. Sawyer, vice-president in charge of footwear department; Elisha Williams, vice-president in charge of mechanical department; Raymond B. Price, vice-president in charge of development department; James Newton Gunn, assistant to president; W. G. Parsons, treasurer; E. J. Hathorne, assistant treasurer; Samuel Norris, secretary, and John D. Carberry, assistant secretary.

On March 22, the stockholders held their annual meeting at New Brunswick, N. J., when the 17 members of the board were re-elected, and a new member, Edgar B. Davis, was elected.

SHOWING ROGERS SIDECARS FOR STANDARD MACHINES

ROGERS sidecars as adapted to various standard makes of machine are described in a series of attractive circulars just issued by the Rogers Manufacturing Company, of 337 West Madison street, Chicago, Ill. At the head of the series is a general circular, of four pages like the others, with a picturesque scene for a front cover. In this circular, the general details of Rogers products are described and illustrated.

The other circulars of the series show the Rogers sidecar with connections to fit Excelsior, Indian, Harley-Davidson and machines, each one having a view showing the Rogers attached to that particular mount on the cover. It is planned to issue circulars descriptive of the Rogers for use with other machines in the near future.

CLEVELAND WILL HAVE MOTORCYCLE WEEK

Association Is Formed at Luncheon Given to Dealers by S. A. Falor, of the Goodyear Company—First Move in 100,000 Motorcycles Campaign

CLEVELAND, O., March 28.—S. A. Falor, of the Goodyear Tire & Rubber Company, gave a luncheon to the motorcycle dealers of this city on Friday, March 24, in the interest of Motorcycle Week, which is to be observed in this city by all of the local agents during probably the last week in April.

Among the men at the luncheon, in addition to Mr. Falor, were H. S. Quine, E. R. Stilwell, W. J. Cameron, all of the Goodyear Tire & Rubber Company; Charles F. Olin, of the New Departure Manufacturing Company; reporters from the Cleveland Plain Dealer and the Press and all but one of the Cleveland cycle dealers.

"The object of the luncheon," said Mr. Cameron to a representative of **Motor Cycle Illustrated,** "was to help the dealers of Cleveland in a co-operative organization movement to further the plans of motorcycle week, which is to be celebrated with a huge motorcycle parade and will secure such publicity for the dealers as will arouse widespread interest in the motorcycle and will bring returns to dealers in the form of dollars and cents. In a word, the luncheon was the first definite movement toward the boosting of the 100,000 motorcycles campaign. We look for many other such movements to follow closely upon the heels of this one."

Olin Stirs Up Enthusiasm

Mr. Quine spoke briefly about the wonderful prospects of the 1,000,000 bicycles campaign, and he was followed by Mr. Olin, who gave a very instructive talk on the value of co-operation. He had all the dealers present so enthusiastic that they formed an association and elected L. J. Mueller president and William Lister secretary. They also appointed committees to lay plans for motorcycle week.

PROGRAM FOR AUGUSTA RIDERS APRIL 14

AUGUSTA, Ga., March 27.—The Augusta Racing Association announces that it will hold two motorcycle races at the Fair Grounds track April 14, at 10.30 a. m.

The first event will be at five miles, for professionals, with $25 as the first prize. The second race will be at 25 miles, and the prizes will be $100, $50 and $25. This event, like the first, will be for pro. riders. Entries will be received till noon on Friday, April 7. The entry fee is $2, and the post entries will cost $4.

Communications should be addressed to the Augusta Racing Association, Box 751, Augusta, Ga.

Just before the races a motorcycle parade will be held and prizes wil be awarded for neat riders, for the fastest get-away in 30 feet for three-speed mounts, for the best decorated machine, and for the oldest machine in line.

AGENTS SIGN UP FOR MIAMI POWER BICYCLE.

MIDDLETOWN, O.—Among the recent agents who have signed up to represent the Miami Power Bicycle for 1916 in Pennsylvania are James Mayo, of Reading, and W. P. Swartz, of York. R. B. Gardner has signed up for Mansfield, O., while F. C. Scott will handle the bike in Tiffin, in the same State. In Evansville and Terre Haute, Ind., the Miami product will be represented by the Koch Outfitting Company and Reinhard Brothers respectively.

The Hall-Williams Company will sell Power Bicycles in Minneapolis, Minn., and Charles J. Farthing will do the same for Effingham, Ill. E. F. Chase has taken the agency for Coffeyville, Kan., the Remillard Brothers for Sturgeon Bay, Wis., T. B. Burke for Lexington, Ky., and Powell Brothers for Grand Island, Neb.

TRIANGLE CLUB ORGANIZES IN PATERSON

PATERSON, N. J.—Riders who for the past two seasons have met at the store of Walter Babb, local Pope agent, have organized the Triangle M. C. The headquarters will be in the Federal Building, at 365 Market street.

The following officers were elected for the 1916 season: Joseph Dabaghian, president; Charles Semin, vice - president; Horace De Grasse, secretary, and John H. Cook, treasurer. Arrangements have been made to hold club runs on the second and fourth Sundays of each month, beginning May 14.

WHEELING M. C. IS THRIVING

WHEELING, W. Va.—The Wheeling M. C. had a most successful meeting on March 21 with a record attendance. Earl Braunlich, Harley-Davidson representative, made an address on the benefits of F. A. M. membership, while President L. Bier made a detailed report on road conditions and urged the members to get out and ride.

BUSY TIMES AHEAD FOR SAVANNAH CLUB

Five Features Were Placed on the Club's Program at the Last Meeting and a Membership Boom Is Expected to Result From the Activity

SAVANNAH, Ga., March 27.—At its meeting last Tuesday night the Savannah M. C. lined up an interesting string of events for the near future.

The first outing is scheduled for next Tuesday night when the riders will meet at the clubrooms, ride to the outskirts of the city and then return to the clubrooms, where the entertainment committee will have a spread ready.

Big Field Day April 2

On Sunday, April 2, will be held the field day which was postponed from Washington's Birthday. The program will be staged at the German Club. Events of all kinds are being arranged, and one of the largest gatherings of riders this vicinity has known is expected.

Then will come the Memorial Day races for the benefit of Motorcycle Policeman McGinley. The club will run about four races. The riders have donated their services, as have the dealers here who will enter machines. Besides this, the club has bought 200 tickets. A crowd of not less than 3,000 is looked for.

The night of May 31 the club will hold its fourth annual ball.

By way of observing the last day for "near-beer" and other exhilarating drinks the club will hold a wine festival at the clubrooms. This affair is slated for April 29. Prohibition hits Georgia on the last day of April.

INDIAN DAY FOR CANADIAN DEALERS APRIL 1

Manager Buffum of Dominion Factory Branch Has Lined Up Every Indian Dealer in Canada for Special Sales Campaign and Appropriate Window Displays

TORONTO, Ontario.—Indian motorcycle dealers of Canada will celebrate Saturday, April 1, as Indian Day, according to an announcement by Edward Buffum, manager of the Canadian branch factory of the Hendee Manufacturing Co. Arrangements have been made for a special demonstration in the store of every Indian agent in the country. Store fronts will be decorated, the various models will be attractively exhibited and souvenirs will be distributed. It will be like one vast motorcycle show all over the Dominion.

The motorcycle business in Toronto continues brisk—increasingly so. One reason advanced for the very satisfactory state of affairs is that the motorcycle trade in this city has become very concentrated and the whole local industry has reached a very high plane. There are absolutely no so-called curbstone agents dabbling in the trade, to the detriment of legitimate storekeepers, and the active dealers are able to conduct their business along stricly legitimate lines.

One trade change is noted this week in the appointment of E. M. Peer to the position of assistant sales manager of the Canada Cycle & Motor Co., Limited, in succession to F. W. Dunn, who now has charge of the purchasing department of the company.

Toronto now has several motor-bobs. One belongs to Joseph Russell, Jr., son of Joseph E. Russell, a local member of Parliament. Russell has rigged up a three-speed Excelsior twin in a fairly large sleigh and has been using the late Winter snow in the country districts to the utmost.

MIAMI FACTORY BUSY ON FLYING MERKELS

Orders For Motorcycles Larger Than for Several Seasons Past—Many Improvements Have Been Effected

MIDDLETOWN, O., March 23.—The Miami Cycle & Mfg. Co., maker of Flying Merkel motorcycles, have been pushing these models very hard since they were first announced for 1916. Orders for Flying Merkel models, in fact, have been larger so far this season than for several years past and the factory has been busy on them. The 1916 models have been meeting with an enthusiastic reception wherever shown.

The Miami factory organization has given the Flying Merkel models great care and thought and has effected a number of improvements as compared with previous models. Thus, in the spring frame, the riding position has been lowered and the plunger barrel reinforced at the bottom to prevent expansion of the metal. The main frame has been heavily reinforced in front with double-D reinforcements. The front forks are now well cleaned before assembling and the crown is carefully fitted so as to give greater resiliency and action.

Pistons Are Redesigned

Priming cups are fitted to the cylinders of the Flying Merkel models for 1916, these permitting the gasoline to be injected directly into the center of the combustion chamber. The pistons have been redesigned with the walls strengthened by means of a reinforcement permitting of more perfect grinding. The cam governing the inlet valves has been changed to give a greater lift, thus increasing the power.

The inlet valve cages have been redesigned and the method of opening the valves changed. They are now constructed with separate tappet-pins, eliminating side motion. The inlet valves are fitted with stiffer springs than those fitted in 1915, giving a quicker closure and increasing power. The flywheels are lighter in weight and are perfectly balanced, increasing the flexibility of the motor.

1916 Oiling System

The oiling system consists of the drip-feed oiler, so arranged that it can be easily understood by a novice. The oil window is in the crankcase instead of the outside gauge. The crankcase lugs have been made heavier and the metal of the case around the lugs has been reinforced. The segment on the kick-starter has been changed so as to give the motor an additional revolution per kick. The surfaces of contact in the starter are now hardened sufficiently to prevent wear.

In the planetary two-speed gear, the spring pressure on the clutch has been increased, doing away with slipping on both high and low speeds. The muffler has been changed to give greater road clearance and the cut-out has a larger opening and a new spring shutter, to relieve back pressure. The handlebars are fitted with a brace and the front mudguards have a neat drop side to give the greatest possible protection.

The tire equipment on Flying Merkel motorcycles for 1916 is 28 x 3 inch Goodyear Blue Streak, or Firestone of U. S.

PREST-O-LITE ADDITION IS NEARLY COMPLETED

INDIANAPOLIS, Ind.—The large addition to the main plant of the Prest-O-Lite Co. is practically completed. The building is 40 x100 feet, one story in height and adds 40,000 square feet. It is of reinforced concrete, and will be used to increase the firm's production of storage battery.

The new building will enable the Prest-O-Lite firm to increase its output from 400 to 1,200 batteries a day when completed.

TO HANDLE NEW DEPARTURE BEARINGS IN N. Y.

NEW YORK, March 24.—Sales and service on New Departure ball-bearings in the metropolitan district are now handled by the New Departure Ball Bearing Co., Inc. This firm has been incorporated by George T. Gwilliam and Mark R. Gwilliam, with a capitalization of $10,000, and headquarters at 253 West 58th St. The Gwilliams were the Gwilliam Co., ball-bearing agents.

PRIZE-WINNERS ANNOUNCED IN PHOTO CONTEST

DAYTON, Ohio, March 28.—Announcement is made by the David Sewing Machine Co. that the prize-winners in the photo contest which closed recently were as follows: First prize ($5), John C. Hill of Los Angeles, Cal.; second prize ($3), J. L. Moritz of Cleveland, Ohio; third prize ($2), Miss Marie F. Hinchy of New York city.

The object of the contest was to bring in a collection of striking photographs showing Dayton motorcycles and bicycles in action, and the company's publicity department was somewhat surprised by the great variety of uses to which the Dayton products are put, as well as pleased by the general picturesqueness of the contributions.

WILL PROHIBIT RACERS CHANGING MOUNTS

CHICAGO, Ill., March 27.—A majority vote of the F. A. M. Competition Committee has been cast in favor of the following amendment to the competition rules:

"That article 7, section 1, of the Competition rules be revised by inserting the words 'or professional' after the word 'amateur' in line five of the section, and by striking out all words of the section following the word 'program' in line seven."

This revision eliminates the possibility of a change of machines by professionals during a meet or an event, considerable dissention having resulted over this point last year.

MASON CITY RIDERS FORM MOTORCYCLE CLUB

MASON CITY, Iowa.—Riders of this city recently met at the Harley-Davidson agency of S. J. Snyder to discuss plans for a motorcycle club here. All were very enthusiastic over the proposition and a set of officers was named during the meeting. These are: Frederick Bootz, president; L. J. Berry, vice-president; S. J. Snyder, secretary and treasurer, and M. M. Ward, road captain. The club is planning to hold a number of runs in the future and Messrs. Bootz, Indian agent, and Snyder, are co-operating to make the organization a strong one.

WORK IS PROGRESSING ON CINCINNATI SPEEDWAY

CINCINNATI, Ohio.—Any lingering suspicion that the Cincinnati Speedway Co. might be one of those concerns which make a lot of noise and then do nothing may speedily be dissipated by a visit to the site of the track on the Sharon Pike. A considerable amount of work has already been done and $40,000 has been paid by the company for the necessary ground. Bids will be received within a few weeks, as plans and specifications are now virtually complete, and it is estimated that the track and stands can be made ready in ample time for use on Labor Day, on which occasion it will be opened with a speedfest of large proportions. Several crack riders have already signed entry blanks.

SILVEX CO. REFUSES MAIL ORDER BUSINESS

Takes Determined Stand Against Cut-Rate Houses; Bethlehem Spark Plug Dealers and Jobbers Appreciate Co-operation

NEW YORK, N. Y., Mar. 29.—The Silvex Co., maker of the Bethlehem Five Point spark plug, is taking a determined stand in its efforts to protest its dealers and jobbers from the unfair competition of cut-rate and mail order houses. It is consistently refusing to accept any orders from concerns that make it a practice to retail under list prices.

"It is costing us something to adopt this policy," said General Manager E. H. Schwab of the Silvex Co. recently, "because we are refusing to accept orders from cut-rate and mail order houses for thousands of Bethlehem Five Point spark plugs.

"But we are cheerfully making this sacrifice, because, aside from the standpoint of fairness to our jobbers and dealers, we believe it to be good business to adopt this policy. We know that by giving the legitimate jobber and dealer full support we will in return secure their co-operation, and that the loss sustained through non-acceptance of orders from cut-rate and mail-order houses for the Bethlehem Five Point spark plug will be more than made up by the increased business that our jobbers and dealers will do."

That dealers and jobbers keenly appreciate the stand taken by the Silvex Co. is evidenced by the letters which they are sending to Mr. Schwab. One of the biggest jobbers in the country wrote: "We certainly think that you are doing the right thing when you take your present position, as the practice in vogue at present among cut-rate houses will destroy legitimate accessory business." Another jobber stated: "We certainly appreciate your stand . . . we will use our best efforts to see that your prices are maintained in our territory, and are to-day insisting that our salesman push the sale of Bethlehem plugs more than ever before."

INGALLS IN METROPOLIS

Warren M. Ingalls, of the Eclipse Machine Company, Elmira, N. Y., is in New York City visiting the trade about the new Eclipse locking hubs. He reports a big demand for these products throughout New England.

CRISTMAN BILL BECOMES EFFECTIVE APRIL 1

Governor Whitman's Signature on Measure Providing for $2.50 State Registration Fee for Motorcyclists Closes Long Fight; Credit Due Those Who Aided in the Campaign

ALBANY, N. Y., March 23.—Shortly before noon today Governor Whitman placed his signature on the Cristman Bill, which provides for a registration fee of $2.50 for motorcyclists in New York State, and the measure which has occupied the attention of riders and trade men throughout the State for about two years became a law. The new law goes into effect April 1, but it is stated that a reasonable period will be allowed after that date for motorcyclists to conform to the regulations, in view of the fact that such a short time elapses between the signing of the bill and the date on which it becomes operative.

Information relative to the procedure for obtaining license plates, etc., is given fully elsewhere on this page.

Now that the measure has been finally approved in a form satisfactory to the great majority of motorcyclists in New York State, it is only just to give due credit to Secretary of State Francis M. Hugo, and to his deputy, A. B. Parker, for their liberal views concerning the needs of motorcyclists and their consistent efforts in behalf of reasonable motorcycle legislation. Both the Secretary of State and Mr. Parker have been ready and willing at all times to co-operate with **Motor Cycle Illustrated** and with individuals who have labored for the passage of a satisfactory bill, and it is largely due to Secretary Hugo's decision that a $2.50 registration was a fair one that the lawmakers did not stand out for a $5 fee.

Great credit is also due former State F. A. M. Commissioner J. A. Hall, of Brooklyn, who worked like a Trojan against the unreasonable motorcycle bills which cropped up from time to time in the New York legislature, and who had a great deal to do with the preparation of the measure which was finally adopted. Mr. Hall camped on the trail of the legislators as the special representative of **Motor Cycle Illustrated**, fought day and night for proper consideration of the rights of motorcyclists, and at various times interviewed all the Assemblymen and Senators of consequence in Albany. His service to the motorcyclists of the State was invaluable.

Motor Cycle Illustrated is in receipt of a letter from Secretary Hugo, and another from Deputy Parker, stating that they have felt fully justified in giving this journal their earnest co-operation in the Albany campaign, and that their relations with all those who were working for the passage of the present bill have been most pleasant.

NEW YORKERS ARE APPLYING FOR REGISTRATIONS

NEW YORK, March 27.—Following the signing of the motorcycle law by Governor Whitman, to take effect April 1, the offices of the Secretary of State have been receiving applications for licenses. The New York office, at 74th street and Broadway, will have charge of motorcycle registrations for owners living in New York, Kings, Westchester, Richmond, Nassau, Suffolk, Rockland and Putnam counties. While the law goes into effect on Saturday, April 1, a reasonable time will be given for compliance with its provisions and registration will probably not be in full swing before the middle of April.

The motorcycle plates will be of the same color as the 1916 automobile license plates, but considerably smaller.

EXCELSIOR CYCLE MOVES OFFICE TO NEW PLANT

MICHIGAN CITY, Ind.—The Excelsior Cycle Company, maker of the De Luxe line of motorcycles and bicycles, is now completely moved to this city from Chicago, Ill. The new plant was opened some time back, but the office force stayed in Chicago till March 21 to make all final arrangements. The Chicago office is now closed.

The firm started to make shipments on March 20 from this city. Business has increased greatly in the past three weeks, and repeat orders have been numerous.

DELANO WOULD ALLY MOTORCYCLISTS WITH FLYERS

NEW YORK, March 27.—Col. Mortimer Delano, Corps Commander of the First Aviation Corps, Provisional Volunteers, calls attention to the fact that if the Hay Army Bill is passed the Aviation Corps will become a part of the Federalized National Guard. This expected development is interesting because of Col. Delano's long and earnest advocacy of the power two-wheeler for military service.

It has been Col. Delano's aim to have the motorcyclists of the country allied with the First Aviation Corps, and if this were brought about the Federalization of the Aviation Corps would involve the formal recognition of the motorcyclists by the military authorities.

NEW INDIAN CLUB FORMED IN TRENTON, N. J.

TRENTON, N. J.—The patrons of John Sykes, Jr., local Indian agent, have formed a motorcycle club known as the Indian M. C. There are 25 members so far, most of whom are seasoned riders. It is intended to pull off a good race meet this summer, as well as a number of club and other runs.

President John P. Hooper

The officers are: John P. Hooper, president; E. E. Heates, secretary; John Sykes, Jr., treasurer, and B. Newlyn, road captain. The club will meet at the rooms of John Sykes, Jr., 105 North Broad street.

LAY OUT DIXIE HIGHWAY IN CINCINNATI

CINCINNATI, Ohio.—Harry L. Gordon and George W. Harris, Ohio commissioners of the Dixie Highway Association, have announced the route of the highway in Cincinnati's downtown district. The streets covered take the tourist through the heart of the city and up Gilbert avenue, through Eden Park and over the new bridge. The extent of the interest in the highway here may be gathered from the fact that officers of the Hamilton County Council of the Association confidently expect to have 5,000 members before the year is out. Motorists, dealers, business men and others interested in the success of the great North-and-South highway are expected to furnish this number, if not more, and the united work of such a body, with others along the route organized for the same purpose, can hardly fail to bring about the speedy completion of the project.

POPE PRIZE WINNERS

WESTFIELD, Mass.—The Westfield Manufacturing Company, making Pope products, announces that the February first prize of $100 in gold for the greatest increase in sales of Pope-made bicycles and motorcycles over last year has been awarded to T. B. Hallbourg.

The second prize of $50 in gold was awarded to O. J. Oberwegner, of Toledo, Ohio.

MOUNDSVILLE CLUB TO FEAST

MOUNDSVILLE, W. Va.—The run scheduled for last Sunday by Moundsville M. C. members was called off, as the weather made the roads too muddy. The club has appointed a committee to arrange for a banquet and "open house" for April 1; this is to be an inter-club affair and roast young pig will be the piece de resistance. The club is larger by several new members and is considering the applications of a number of other motorcyclists.

WATCH THE CLOCK FOR F. A. M. MEMBERSHIP GAINS

As New Members Line Up the Gauntleted Hand Will Tell the Story on the Dial; Everybody Else Is Working for That 20,000 Record—Are You?

HOW fast the hand is to move on the F. A. M. Membership Clock shown above is a matter that is entirely up to the boosters who are now entering upon the country-wide campaign for recruits, and the motorcyclists who will be expected to show their appreciation of the national governing body by signing up. They can make 'er fairly hum around the dial, or—but there isn't going to be any "or."

The movement for a big addition to the Federation membership list is starting with a vim that promises big things, and it is expected that in a few weeks the hand will be well on its way around to the 3,000 mark. The work will then be well started, and the remainder of the trip to the 6,000 figure should be comparatively easy.

After That 20,000 Mark

When that time arrives **Motor Cycle Illustrated** will have to provide a new clock, but our artist is already getting his good right hand in training to turn out a dial numbered from 6,000 upward. The ultimate aim of the F. A. M. officials and riders is to bring the total paid-up membership to the 20,000 mark. When that point is reached the national body will receive a check for $500 from Ignatz Schwinn, of the Excelsior Motor Manufacturing & Supply Company, and when the organization is incorporated Mr. Schwinn will place his signature on another $500 check payable to the F. A. M. Twenty thousand members and the incorporation of the Federation will add $1,000 to the treasury without further parley.

Chairman John L. Donovan, of the Membership Committee, is sending out special boosting literature; Secretary Gibson is making Westboro, Mass., another center of activity; President Coffman is firing his characteristic ginger-up letters in all directions; F. A. M. commissioners in a number of States are opening up their big guns and—well, that's going some for a start, isn't it? Give them your boost, and get others to do the same.

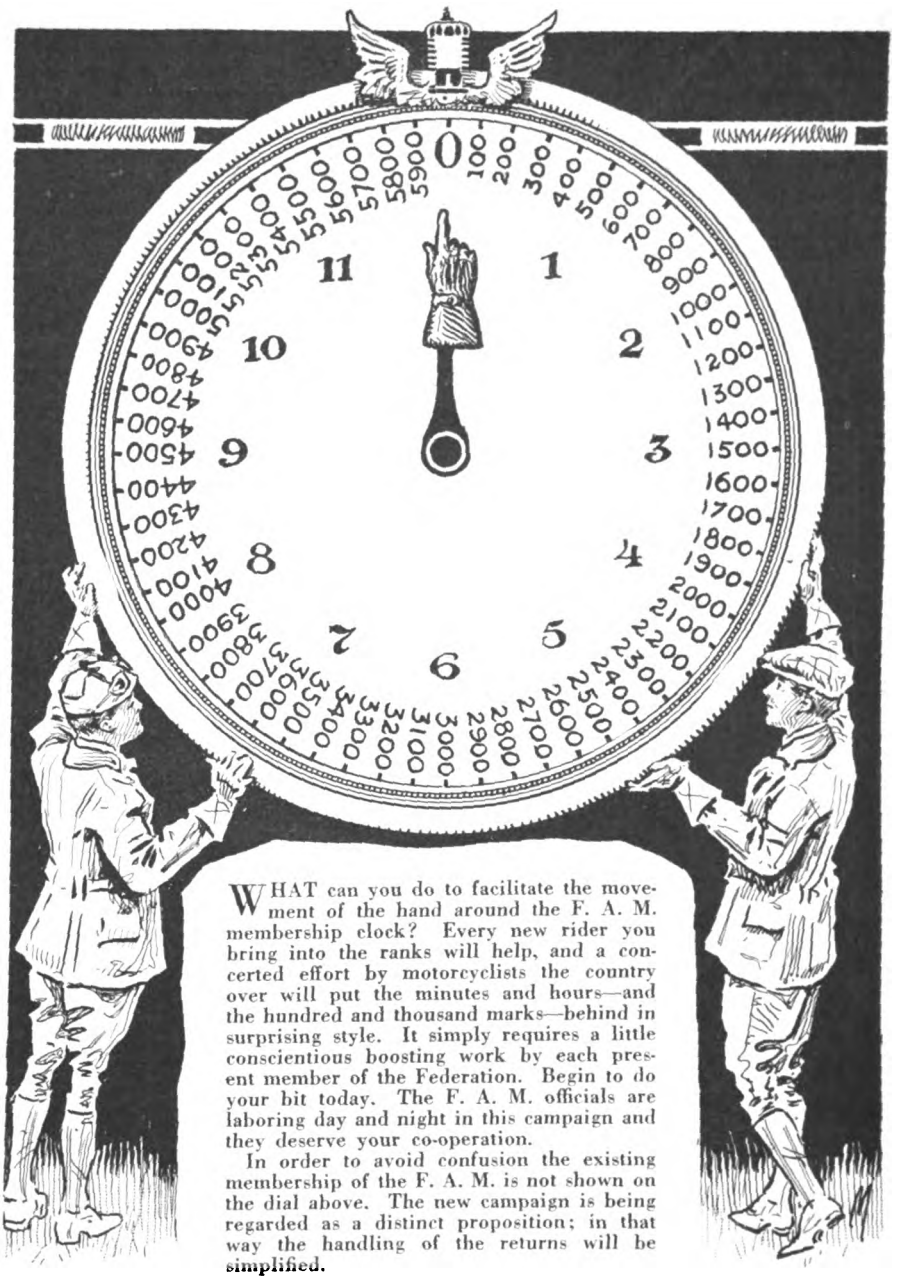
Start Something Today

Any official of the F. A. M. will be glad to hear from you, Mr. Rider, and to tell you why you should join the national body. If you can form a club of fifteen riders in your city or town you can apply for membership in a body and thus save each rider of the club one whole dollar. That's an idea worth thinking over. Get the boys together and go to it. If you can't quite arrange for the club, come in yourself now and try to put the club across a little later. But start something without delay. Go right to it.

There are enough wide-awake motorcyclists in the country to build up a 20,000 membership for the F. A. M. without even breathing hard, and the Federation officials have decided to put the boys to the test. You are expected to do your bit, and when the membership is large enough to show that the riders of the country mean business, the F. A. M. may be depended upon to meet the members halfway—and then some. If you don't wear the F. A. M. emblem you are hardly living up to your full creed as a motorcyclist. Better get that matter adjusted without further delay.

Watch the Clock!

And watch the clock! The hand will move around the dial as the returns come in to **Motor Cycle Illustrated** and every time you sign up a new member you will have the satisfaction of knowing that you have brought the pointer just that much nearer to the 20,000 mark.



WHAT can you do to facilitate the movement of the hand around the F. A. M. membership clock? Every new rider you bring into the ranks will help, and a concerted effort by motorcyclists the country over will put the minutes and hours—and the hundred and thousand marks—behind in surprising style. It simply requires a little conscientious boosting work by each present member of the Federation. Begin to do your bit today. The F. A. M. officials are laboring day and night in this campaign and they deserve your co-operation.

In order to avoid confusion the existing membership of the F. A. M. is not shown on the dial above. The new campaign is being regarded as a distinct proposition; in that way the handling of the returns will be simplified.

BRITAIN PUTS BAN ON IMPORTED MOTORCYCLES

CLASSING motorcycles for the time being as luxuries, the British Government has prohibited their importation, by an order-in-council, to take effect March 27. An exception is made for motorcycles licensed to enter by the Board of Trade.

The order includes parts of motorcycles and accessories thereto, as well as the machines themselves. To obtain entry under Board of Trade license, the goods must be shown to have been en route for the United Kingdom or paid for on March 21, 1916, or when found to be necessary for the service of the Crown.

300-MILE MILITARY RELAY RUN FOR CANADIANS

C. M. A. Starts Movement for Motorcycle Trial Between Ottawa, the Army Headquarters, and Niagara-on-the-Lake, Which Will Be a Large Military Camp This Summer

OTTAWA, Ontario.—Officers of the Canada Motorcyclists' Association have taken the first step for the staging of a military relay run from Ottawa, the home of the Canadian army headquarters, to Niagara-on-the-Lake, which will be the largest military camp in Canada this summer.

The entire distance is approximately three hundred miles. A military dispatch will be relayed from the war department here to the officer in command of the camp and teams of two or three motorcyclists will cover each sector of the dash.

Last year a military relay from Windsor to Ottawa was staged, but on this occasion it was found that the worst roads were encountered on the final stages of the trip. Night had also fallen before the speedsters reached the final legs of the journey with the result that the riders were not only unable to make up lost time, but many minutes more were lost as well on account of the difficult conditions. This year the dash will be somewhat shorter, but it will have far more military importance. Also, by reversing the progress of the ride the best roads will be used for the final relays and very fast time should be accomplished.

Invitations are to be extended to the riders of all cities and towns along the route to participate in the event and the services of probably forty motorcyclists will be used. Among the cities along the route are Trenton, Kingston, Port Hope, Bowmanville, Oshawa, Whitby, Toronto, Hamilton, St. Catharines and Niagara. The precaution will be taken to request the authorities to give the motorcyclists the right of way through all cities and towns. The event will be held in June.

SPANISH INDIAN DISTRIBUTORS INSPECT HENDEE PLANT

Señor Julian Olave

Señor Alfonso Macaya

SPRINGFIELD, Mass.—Senors Julian Olave and Alfonso Macaya, distributing the Indian products in Spain, recently paid a visit to the factories of the Hendee Manufacturing Company in this city and in Hendeeville. The visit was part of an extensive business trip which both gentlemen are making throughout the United States. Senor Olave is general distributing agent and Senor Macaya is distributor for the Indian in Barcelona and vicinity.

The two Spanish representatives were taken through the plant by C. K. Andrews, acting head of the Foreign Department office. The visitors were keenly interested in the many manufacturing operations which were necessary to finish the Indian motorcycle. The organization in the plant was commented upon by them as most excellent. The testing department, where all parts of the machine are tested, was probably the section which interested them the most.

Motorcycling in Spain, the representatives explained, was not so popular as in America, by reason of very poor roads, high tariff duties and the huge price for gasoline. The cost of an American motorcycle to a Barcelonese would be about $450 as compared with $250 in this country. Gasoline costs from 80 cents to $1.00 a gallon, depending upon the grade.

CONGRESS ASKED TO REDUCE CANAL ZONE FEES

NEW YORK, Mar. 28.—Two bills are now pending in both houses of Congress which, if passed, will materially reduce the large license fees which Panama Canal Zone riders are obliged to pay. One of these measures is being fostered by Senator James A. O'Gorman, of New York, and the other Congressman Fred A. Britten of Illinois. Both of these bills have been referred to the Committee of Interstate and Foreign Commerce, of which Wm. C. Adamson is chairman.

At the present time Panama Canal Zone riders are paying an annual license fee of $10, together with $1 for a tag and $2 for a Panama reciprocal tag. On the other hand, the riders of Washington, D. C., which is also under the control of the federal government, pays but $2 for a license, which need not be renewed as long as the rider uses the same machine.

Realizing the ridiculously unjust conditions obtaining in the Canal Zone, the F. A. M., through Legal Actions Chairman W. M. Johnson, has called this matter to attention of the Canal Zone authorities who are now in favor of a large reduction in the fees. Chairman Johnson urges riders the country over to write to their senators and congressmen to support the bills introduced by Senator O'Gorman and Congressman Britten.

BUFFALO M. C. HOLDS A PEDRO PARTY

BUFFALO, N. Y., March 28.—Last Sunday the Buffalo M. C. held a pedro party, which was attended by one hundred and fifty riders and their lady friends. The winners and donors of prizes follow:

First ladies' prize, cut glass dish, donated by Ira Palmer, won by Miss May Darling; second prize, library table cover, donated by Mrs. Ed. Windisch, won by Mrs. Catherine Boldt; third prize, a fancy hand-painted dish, donated by Mrs. Ed. Windisch, won by Mrs. R. Rosenthal; fourth prize, a gold ruler, donated by G. Hunt, won by Miss Harriet Johnson. The first prize for men was a box of perfectos, donated by Mr. and Mrs. Fred Lein, which was won by Ira Palmer; second prize, given by A. J. Meyer, won by Tom Wells; third prize, motorcycle gloves, offered by Neal, Clark & Neal, was captured by Fred Schudt.

HALEDON CLUB IS NOW PATERSON M. C.

PATERSON, N. J.—At a meeting of the Haledon M. C. on March 21, it was decided to change the name of the organization to the Paterson Motorcycle Club. The change in name caused a considerable amount of discussion among the founders of the club who are Haledonites, but the final vote was 35 for Paterson M. C. against 30 to retain the old name.

A SAFE AND DEPENDABLE PRESCRIPTION

THIS is the time of year when many city toilers—and lots of toilers who don't live in cities—are teetering on the edge of physical collapse after a hard winter and wondering ruefully if life really is worth while. The finest prescription any physician could give such a man is an order to buy a motorcycle or a bicycle—and use it. Incidentally, there is a sales field for dealers among the confined class of city workers that has never properly been followed up. Now is the auspicious time to go after it.

PROMOTERS ORGANIZE TO HOLD RACES IN ELMIRA

ELMIRA, N. Y., March 28.—At a meeting of about 40 garage owners, motorcycle and bicycle dealers, held after a banquet in the Hotel Langwell, last Thursday night, plans were definitely laid for the formation of a stock company, to be capitalized at $1,000, which will promote automobile, motorcycle and bicycle races in this city on Decoration Day, Fourth of July, Labor Day and Election Day.

The movement to hold races here on a large scale started about three weeks ago, when A. B. Hickox, manager of the Fisk Tire Company's local branch, Phay B. Rutan, the Indian motorcycle dealer, and a number of other men prominent in the motor and cycle trades decided to call a meeting of those interested in promoting races. As a result of the meeting held last week, nearly half of the necessary capital stock was subscribed, and the balance, the promoters announced yesterday, has been secured since.

YONKERS M. C. ELECTS AT OPENING MEETING

YONKERS, N. Y., March 20.—The Yonkers M. C. held its first meeting last night at the headquarters, 282 Main street, and elected officers for the 1916 season. Thomas F. Lyons is president, Charles Peene, Westchester County, F. A. M. commissioner, is vice-president, and Charles Hassey, financial secretary. H. Browne is recording secretary and Thomas F. Lyons, Jr., is treasurer. There are 50 active members.

Following the meeting, plans were decided upon for the first club run, which will be held on March 31. This will be followed by weekly or fortnightly runs and a standard fixture in the form of an endurance affair.

ELECTRIC WHEELMEN HOSTS TO ALLENTOWN RIDERS

READING Pa., March 29.—The Electric Wheelmen of this city last week were hosts to a delegation from the Allentown Motorcycle Club at a luncheon and smoker. John Gring entertained with buck and wing dancing and Howard Clauser gave several humorous recitations. Allen Stein of the local club made the address of welcome and John Newhard of the Allentown delegation responded.

The committee in charge of the affair consisted of Harold Becker, chairman; Howard Clauser, Robert Reber, Walter Meyer and John Gring.

CONSOLIDATED M. C. TEAM ISSUES A CHALLENGE

INDIANAPOLIS, Ind.—The Consolidated M. C., of this city, has placed a road-racing team in the field, and issues a challenge to any team of riders in the country representing an affiliated club to a race over any course. Frank Irish, who won the annual Turkey Trot of the Indianapolis M. C. on Thanksgiving Day, is teamed with Dan Rheinhardt, who has considerable local reputation as a speedster. Replies to this offer will be received at club headquarters in this city.

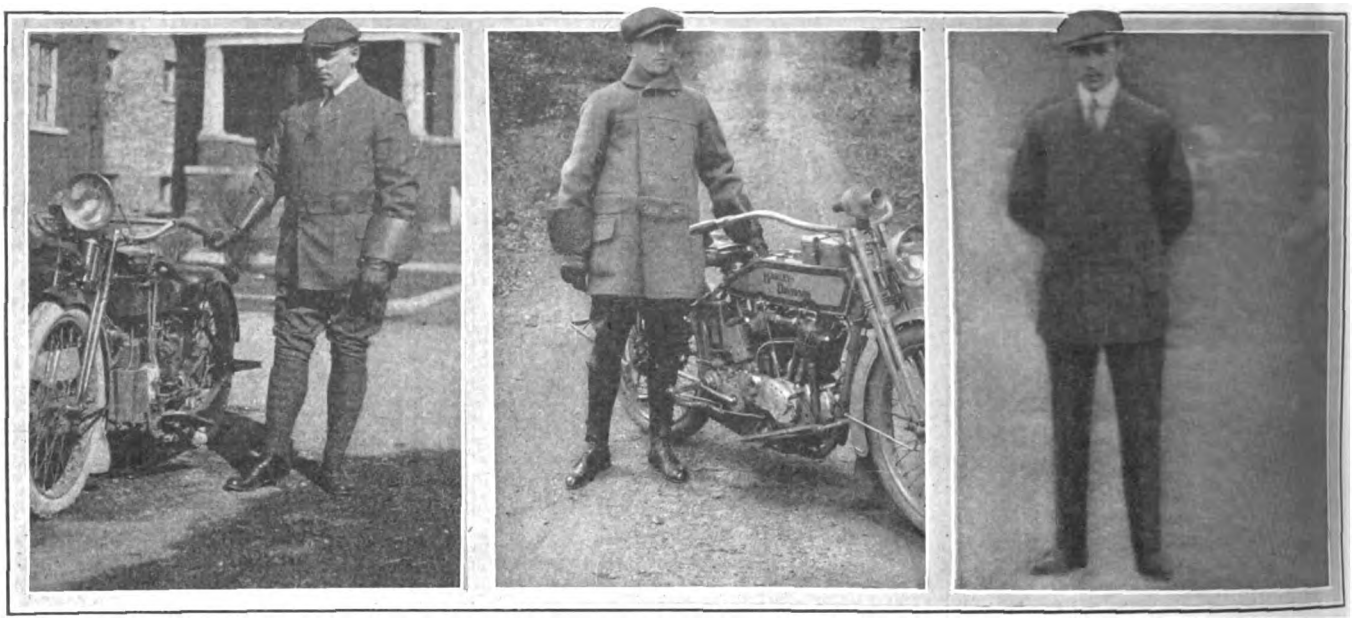
WINNERS IN RIDERS' CLOTHING CONTEST TELL HOW TO COMBINE ATTRACTIVENESS AND WEARABILITY

First Prize Goes to R. F. Rogers, of Chicago; Second to H. F. Beidleman, of Philadelphia, and Third to J. G. Edwards, of Providence — Letters Advise Liberal Outlay For Riding Apparel on Ground That Only High-Quality Garments Can Give Satisfaction — Winners Describe in Detail Three Outfits That Have Met All Exacting Requirements of Roadwork



R. F. Rogers H. F. Beidleman J. G. Edwards

AFTER careful consideration of the letters and photographs submitted in the Riders' Clothing Contest, which closed Saturday, March 25, the judges have made the following awards: First prize ($10), R. F. Rogers, of Chicago, Ill.; second prize ($5), H. F. Beidleman, of 5316 Pine street, Philadelphia, Pa.; third prize ($3), J. G. Edwards, of Providence, R. I.

The photographs of the prize-winners, shown above, leave little to be said concerning the attractiveness of the riding costumes. They are so obviously neat, simple and serviceable that they would probably gain special consideration anywhere, and they are by long odds the most desirable outfits described by contributors to the contest.

Two of the prize-winners were allowed the full 35 per cent. under the heading of appearance, and one lost five points. Some tall arguing was done by the judges before the remaining qualifications were threshed out and complete ratings decided upon.

Mr. Rogers Receives 95 Per Cent.

Mr. Rogers' standing was finally decided upon as follows: Appearance, 35 per cent.; adaptability, 20 per cent.; durability, 20 per cent.; comfort, 10 per cent.; inexpensiveness, 5 per cent.; demonstration, 5 per cent.; total, 95 per cent.

It will be noted that the winner of the first prize was credited with the full percentage under each heading, with the exception of "inexpensiveness," where he lost five points. The costume suggested in this case is admittedly somewhat costly, as compared with the average outlay for a riding outfit at present. Still it was not considered unreasonably expensive in view of the excellent combination of desirable features. It was therefore credited with 5 per cent. Under the "Demonstration" heading the 5 per cent. was allowed for proof of the costume's qualities in actual service.

Mr. Beidleman's Standing

Following is Mr. Beidleman's rating: Appearance, 35 per cent.; adaptability, 12 per cent.; durability, 20 per cent.; comfort, 10 per cent.; inexpensiveness, 8 per cent.; demonstration, 5 per cent.; total, 90 per cent.

Mr. Beidleman received his first setback under the heading of adaptability. As his outfit is obviously intended for Fall and Winter riding, his score was cut 8 per cent. The judges defined the "most adaptable" costume as one that would give the highest percentage of service over the longest period throughout the year.

The costume described by Mr. Rogers is not intended for use in extremely cold weather, any more than the Beidleman suit is designed for warm weather service, but the judges decided that the Rogers outfit could be used to advantage over a much longer period of each year than the suit suggested by Mr. Beidleman. That accounts for the difference in the scores under the heading of adaptability.

Mr. Beidleman also had his score cut 2 per cent. under the heading of inexpensiveness.

Edwards Has Score of 87 Per Cent.

The judges credited Mr. Edwards as follows: Appearance, 30 per cent.; adaptability, 12 per cent.; durability, 20 per cent.; comfort, 10 per cent.; inexpensiveness, 10 per cent.; demonstration, 5 per cent.; total, 87 per cent.

The rating of Mr. Edwards under the heading of appearance raised a knotty

Digitized by Google

question, but it was finally decided that the points should be based upon the rider's appearance *when ready to ride.* It will be noted that the photograph shows Mr. Edwards without leggings, the latter having been discarded, of course, when he left his machine. In other words, the costume as shown is for service off the motorcycle. The addition of leggings, gloves and goggles would be necessary to complete the outfit for road use. Naturally, Mr. Edwards uses a complete outfit when riding, but as his photograph did not show it the judges were compelled to deduct five per cent. from his appearance rating and eight per cent. from the adaptability of the costume.

MAKE-UP OF MY IDEAL RIDING COSTUME

Its Only Drawback Is the Comparatively High Cost

By R. F. ROGERS

THE experience of the United States Army, as well as of all sportsmen, is that satisfactory clothes for outdoor wear must be woolen. Some of the advantages of woolen goods over cotton are that they do not soil easily, you do not take cold when wet and always look presentable. The lightweight material, such as is used for the officers' uniforms, and similar to the American Woolen Company's "olive auto," is just as cool as cotton in the summer, is shower-proof and will stand a tremendous amount of abuse without soiling.

Of course, this would make an expensive suit for riding only. But you must have street clothes, so why not have a riding suit made so it can be used both as a riding and street suit? In this way there will actually be a saving over the cost of a street suit and another khaki suit that can be used for riding only.

The coat would be made up as a Norfolk, with what is known as a "combination collar." The latter, when open, forms a conventional appearing business collar, and when closed makes a collar of the military type, excluding dust and rain. The Norfolk style should be insisted upon, on account of the comfort in very hot weather of opening up the coat, but still keeping it from flying by the use of the belt.

The trousers should be knickerbockers, with about six buttons on the side, below the knee, in place of the lacing of the usual riding trousers; this saves time and bother.

All the pockets should have flaps and re-enforced seat for the pants is desirable. The cost of this two-piece suit should not exceed $18, and a cap of the same material can be gotten with the suit for $1; extra trousers will cost $5; making a total of $24.

The extra trousers should be conventional long trousers that can be carried along on the luggage-carrier, or in the sidecar, so that at the end of the day's journey one may appear in absolute conventional costume.

Tan high shoes are preferable on account of not showing the dust, and the English type Fox puttees will be found by all means the most satisfactory. Part of the natural oil is left in the wool, so that they are practically waterproof and very much more comfortable than the leather; price, $3. If a low shoe is worn on account of the greater coolness, canvas leggings, such as formerly used by the privates in the army, costing about 90 cents, are the most comfortable.

The Grinnell type of ventilated gloves, with about a dozen holes on the back of the hand and fingers, are the most comfortable, and strange as it may seem, are the warmest glove that can be worn in the winter time. They cost $1.75.

For a low-priced goggle, probably the all-rubber type is the most satisfactory, but for genuine comfort nothing will touch the Hardy auto-glass, with gold rims; the slight tinge of amber lessens the glare of the sun and the ventilation is such that there is almost no sweating. They are an absolute protection from dust and dirt. They do not cause eye-strain. The price is $5.

THIS OUTFIT GIVES LONG SERVICE

It Was Adopted After Low-Priced Suits Had Proved Disappointing

By H. F. BEIDLEMAN

HAVING been a rider of motorcycles for seven years I have gradually acquired this costume, which, while not low in price, is about as close to perfection as anything that can now be bought.

Let us take each article or garment in turn. The shirt and riding breeches are of the standard type adopted by the United States Army, and can be bought from any dealer in army goods for $7 or less, according to the quality.

The shoes must be strong and durable, and in my opinion it is better to have them black. They will cost $3. The puttees are of solid leather and will add $3 to the bill, while the Patrick mackinaw (grey) will cost $12. A Patrick cap to match will mean another item of $1.50, while gloves, strong and well lined, will necessitate an expenditure of $2.50.

The mackinaw, of course, would be worn only in season, and a lighter cap would be substituted in summer. On the luggage-carrier I strap a regular U. S. Army haversack, in which I carry an oiled poncho and hat for rainy weather. This haversack also contains my spare tubes, a piece of strong rope, etc.

This costume I have worn several years and it is just as serviceable as when I bought it. The pants and shirt have been washed a number of times, and look as good as new each time. I bought several cheap suits during my first couple of years of riding, but they did not last very long. In fact, one of these suits I ruined in one ride of 100 miles through mud and had to throw it away.

My riding partner has adopted the same costume throughout and we feel that we have the best purchasable.

SELECTIONS BASED ON LONG EXPERIENCE

Satisfactory Combinations for Both Winter and Summer Riding

By J. G. EDWARDS

I GENERALLY have two suits for riding, both made up with the Norfolk coat. Norfolk coats are made up in several styles, and I favor two of them, one with yoke, pleated front and back from yoke down and a belt; the other has the yoke also but is made with plain front, pleated back and belt across the back only. Both styles are very neat and having the two enables a rider to change now and then.

The trousers I use are long, with turn-up bottoms. I use puttees, a sensible style of glove and wear a linen collar and regulation scarf on all my trips. The suits are made of homespun, or some similar material that will not show the dust quickly.

When I go on a long trip I wear a long duster that buttons around the legs while riding, and when I am off the motor the duster simply becomes one of the conventional automobile types. When I want to stop and leave the motor I remove the duster, gloves and leggings and after ridding my cap and shoes of dust I am prepared to make a very good general appearance.

Some care should be used in selecting headgear. Personally, I do not favor the loud and gaudy cap. I wear as plain and becoming a cap as I can get. I have found that a cap of good make and material is the best in the end.

For summer shoes I select a tan Oxford.

For summer wear I usually select a homespun suit of fairly light color, with patch pockets and little or no lining. This will not show the dust readily and will prove quite cool. For winter I use a suit of brown cloth, and considerably heavier, of course. In cold weather riding I add hip-length leggings and a good mackinaw. I pay just as much attention to my appearance in winter as in summer.

Such suits as I describe can be bought for $18 and up. I do not recommend the purchase of any suit costing less than $15, for they give no satisfaction and soon show their class. This is my riding slogan: "Keep clean, always appear neat and be ready with a good smile for all."

Other letters and photos submitted in the Riders' Clothing Contest will appear in the April 6 issue

MANAGER OF U. S. RUBBER CYCLE TIRE SALES

ELEVENTH IN A SERIES OF BIOGRAPHICAL SKETCHES OF TRADE LEADERS

It Was in 1893 That Martin C. Stokes Began His Business Career, With the Hartford Rubber Co., and Quickly Mastering the Principle of Resiliency He Bounced From Promotion to Promotion Until He Reached His Present Conspicuous Post; Busy? Why, the Traditional Busy Bee by Comparison With Him Seems as Indolent as a Subway Contractor

"YOU want a story of my career?" asked "Marty" Stokes, manager of the Bicycle and Motorcycle Tire Department of the United States Rubber Company. "Well, I'd like to oblige you, but"—here he gestured suggestively at two desk trays piled high with correspondence—"this tray is full of incoming mail, this one is loaded with outgoing matter. I've just got back from Baltimore and I haven't had a chance to look at my mail. If I spent twenty-four hours a day at this desk I couldn't begin to catch up with my work. And I've got a man outside who's been waiting for the past couple of weeks for me to go to Detroit with him. So you'll excuse me, won't you?"—and he grinned that winning grin that accounts somewhat for his country-wide popularity. "Besides, I haven't a darn thing to say about myself."

Sure He Was Born!

"Well, tell it, Marty," we urged. "It won't take more than a couple of minutes and I'll stop bothering you."

"All right, shoot," he said resignedly.

"Born?"

"Yep," said he laconically.

"No, no, *when* were you born?"

"Oh—well, say, leave that out. I don't believe the boys give a hang about that sort of thing. Let's skip all that boyhood genius stuff—about how I tore apart my rubber teething ring to see how it was made, and dissected a rubber doll to find out whether grade A stock was used. Let's jump to the time I began my business life with the Hartford Rubber Company in 1893. The Hartford people saw that I had fighting blood in me so they set me to licking stamps." We smiled audibly.

Was an Expert Stamp-Licker

"No, seriously, I think I was the best stamp-licker they had in the place. I got the thing down to a system so that I could look out of the window and watch the trains go by while my fingers automatically attached stamps to the mail. I quit this absent-minded stunt when I found one day that I had put perfectly good two-cent stamps on some letters that had just come in and then had mailed them again!

"Then came the glad day when I was relieved of my office-boy duties and promoted to the post of time-keeper. That was the happiest period of my life! Imagine it—keeping tab on other people's work! At that time there weren't many people in the office. Just a bookkeeper, a stenographer and myself. I filled this post with honors for a while, and then they wished the job of Shipping Clerk on me."

"Then," and "Marty's" level, matter-of-fact tones became warmer as he leaned forward, "came the pneumatic tire. I am proud to say that my real interest in the rubber business dated from that time on. The wonder of pneumatic tires grew upon me. I lived and dreamed tires, tires, nothing but tires. With the growth of my interest grew my knowledge of rubber. I read, I investigated, I made myself a durned nuisance about the factory, sticking my nose into machinery, asking about a thousand questions a day. But I learned. And they made me buyer."

A reminiscent smile played on Stokes' keen face as he seemed to live over again the sweet satisfaction of merited promotion.

MARTIN C. STOKES

A Modest Man Who Has Climbed Up the Ladder of Tire Sales Fame by Hard Work

Forgotten for the moment were the clamoring duties of the present. Marty, with that marvelous concentration of mind that focussed itself on one thing at a time—and one thing only—was telling his story. He told it simply, yet one could visualize what it meant in grim, dogged work, in nights of patient research after facts, in hours of overtime spent in zealous probing after the knowledge that was to fit him for his important post. And with the triumphal march of the tire itself, the story of Martin C. Stokes kept pace.

In 1898 he became Manager of the Bicycle and Carriage Tire Department. As such, he had charge of branches extending from coast to coast. With such a powerful organization behind him, Stokes began to do big things. Wherever bicycle and carriage tires were sold, the name "Hartford" meant "Stokes." The business grew by leaps and bounds, for the tremendous driving power of Stokes was behind each man in the organization.

Such a Modest Cuss!

Mind you, Stokes didn't say these things. He didn't even intimate them. He told his story in a dry, common-sense way, but it was easy to see the workings of cause and effect in his history. He's such a modest cuss, is "Marty." When he takes a quick trip to Chicago, or Florida, or Milwaukee, or Hoboken, or some other distant place and noses out a competitor to an order for ten thousand pair of tires he comes back and says: "Gee, I was lucky!"

In 1911, the Hartford Rubber Company was consolidated with the United States Tire Company. Stokes came to New York and stepped into his present position—the big Mahatma, the High Priest, the Grand Sachem, the Imperial Oofty-Goof of the Motorcycle and Bicycle Tire Department. He's as busy as a one-armed paper hanger with the itch. He is like unto the gleesome flea, one minute he's here, the next minute he's there. One day he can be seen dictating his mail into a dictaphone in his big offices in the U. S. Tire Building in New York; the next day some jobber out in Mishawaka or Oskaloosa is having his hand pumped by this self-same M. C. Stokes.

How does he do it? Ask us something easy, f'rinstince, the number of notes Caruso sings in Pagliacci or the estimated fuel consumption of a Ford automobile on a trip to Mars—but don't ask us how Marty finds the time, despite his incessant work, to play billiards—to go motoring—to play golf and tennis—to bowl—all of which things he does well—and in addition play the part of a well-broken-to-harness husband with a proper liking for a big chair, a smoking jacket, a pipe and all the other things that go to make up domestic felicity.

Marty, how do you do it?

LIGHTWEIGHT "X" POPULAR

LOS ANGELES, Cal., March 17.—Wells Bennett, salesman of the Girton-Hoffer Co., Excelsior distributors, made a round trip to Riverside on an Excelsior lightweight a few days ago. During the trip he made a lightweight sale at Pomona which he credited to the agent there, and found on arrival at Riverside that the local agent, the Riverside Cyclery, had just sold one of the lightweight "X" machines.

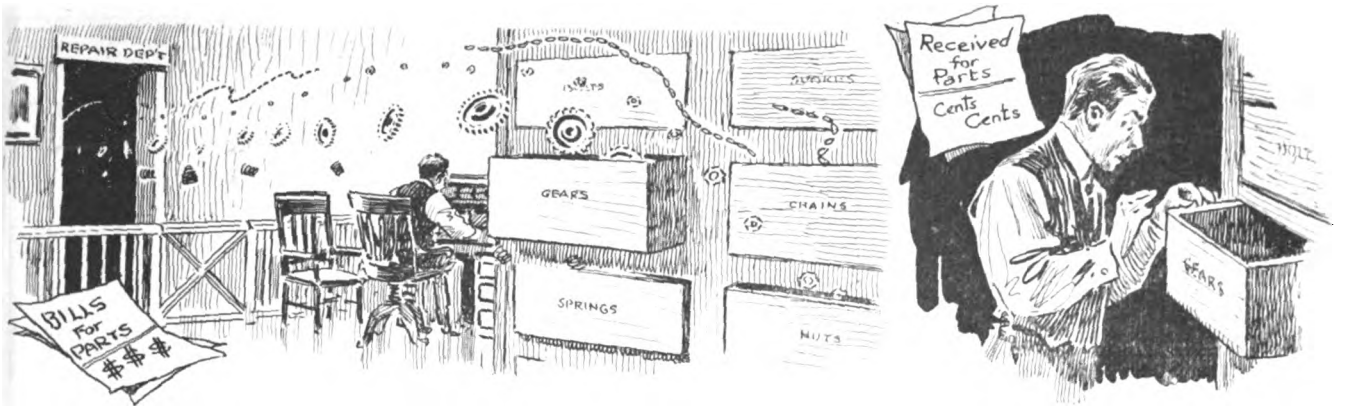
ARE YOU GIVING YOUR ESTABLISHMENT AWAY?

Perhaps You Are Unless You Have an Ironclad Checking System Between Parts Department and Repair Shop; What Happened to One Dealer Who Overlooked the Danger Signals

By RODMAN BARRY



"When the Time Came to Check Up There Was a $1,100 Deficit in the Parts Department"

WE have among our friends a capable, fairly keen-witted shake-'em-up-Charley type of hustler who formerly retailed motorcycles on his own hook, swinging quite a large business, and who now pulls down his weekly pay envelope from some one else, retaining only a very minor interest in the company he used to own. We had a hunch that his story would make interesting reading, so after due deliberation we tucked a railroad pasteboard in the band of our sombrero, had our passport stethoscoped by a specialist in international complications and went out to his town. We found him in—and also out. How much? Well, that's coming.

Machine Sales Were O. K.

"What's the answer?" we inquired, when the cigars were working and the weather, the war and other staple conversational sundries had gone into the discard. "We had you gaited as a money-maker in the motorcycle game, but the wires seem to have been crossed somewhere. Couldn't you sell machines?"

"Surely could," came the prompt reply, *"and what's more the market for motorcycles is as good today as it ever was.* The boys ought to hand them out this year about as fast as the factories can put them across; but——"

Friend Hustler went into "high" on his cigar and added several miniature clouds to the smokebank before he continued.

"But," he resumed finally, "there has never been a piece of mechanism produced that didn't occasionally need repairs and replacements, and *I couldn't make money as fast in the salesroom as my mechanics threw it away in the repair shop.* There's your answer. Go to it."

"Then your repair shop lost money?"

"A little over $1,100 in a year. That's losing some, isn't it?"

"Bad bills?"

A Checking System That Failed to Check

"A few—*but most of the* $1,100 *was given away in parts, supplies and time by my mechanics.* I had a checking system between the parts department and the repair shop, but no one paid any attention to it. I seldom did myself, to be frank about it. We kept a lot of items in our heads—or thought we did—*and they were never charged for.*

"A repairman would need something in a hurry; he would rush in, grab the article, hop out to the repair shop again, place it on the waiting motorcycle, roll the machine over in a corner pending the owner's arrival—*and then forget about the matter.* When the patron came to settle his account it would in many cases be just about *half what it should have been.* But that wasn't his funeral, of course; he paid what we asked and went his way.

"My repairmen were honest enough," continued the dealer, "but I just could not make them understand the value of parts, supplies, etc. Parts were common things to them; they handled them month in and month out and *failed to look upon them as just so much hard cash.* They were lax—and I was lax—and between us we simply *gave my establishment away.* Finally I sold out for what you might call a song; couldn't stand the pressure any longer. I learned my lesson, but the tuition came high."

"But you don't mean to say that material to the amount of $1,100 actually went out of your place without showing on the books," we remonstrated.

An Easy Way to Lose Money

"I mean just that," was the rejoinder. "Don't ask me how; I can't give all the details, naturally, but I know that I paid good money for the material—I carried between $3,000 and $4,000 in parts alone, and when the time came to check up there was a $1,100 deficit in the parts department. That's all.

"And I'm ready to wager that half the motorcycle dealers in the country are giving away real money in their repair shops. It's the easiest thing in the world to do, and one of the hardest things I know of to stop.

"There must be a sure-fire remedy for that sort of thing," we suggested.

"There is," was the reply, "and that remedy lies in making it absolutely impossible for a repairman to get any part, or any supplies, without leaving a definite record of them. If it could be made possible the man in charge of the repair shop ought to be obliged to fork over the actual money for every piece of material he takes out for use in his department. That would entail the use of a cash register in the repair shop, of course, but believe me I

On the Pacific Coast

FEW WILL FINISH LOS ANGELES RUN

Partial Survey of Route Shows That Mountain and Desert Riding Will Be the Most Gruelling Ever Experienced by Local Motorcyclists—Course Covers 1,015 Miles

LOS ANGELES, Cal., Mar. 27.—According to motorcycle wiseacres here, if the plans now contemplated for the Los Angeles Motorcycle Club endurance run are put through, the prizes will all have to be awarded to the men who ride the farthest. It is practically certain, they believe, that no rider will finish. And they base their opinion on a trip made by a party of "scouts" last Sunday.

This party consisted of Wells Bennett, Jimmy Leonette, Ed Peterson, "Hap" Gustafson and "Blick" Wolters, who surveyed a part of the route, which will include a new course from Victorville to Palmdale. This party went to San Bernardino, through the Cajon Pass to Victorville, thence to Palmdale and down to Boquet Canyon to Saugus and back to Los Angeles.

They found that the country between Victorville and Palmdale was all desert, with a few settlements scattered about. The road, after the rains, was fair, but there was a ridge of hard drifted sand trailing out from every bush, about once in every twenty feet. The washes were full of boulders and there was plenty of depths in the desert. In spite of these conditions they averaged 30 miles, but two of the men had trouble due to speeding in running off the mountain grades at the turns. By the time the run is staged the sand will be all loose.

The course considered for the endurance run is a three-day route of about 1,015 miles, covering the worst desert and mountain roads in southern California. The gruelling journey for the first day is from Santa Barbara to San Luis Obispo, and over the triple coast range to Bakersfield through the San Marcos Pass, totaling 365 miles. Thirty miles of the worst mountain roads in the state are on this route, and as the schedule is 25 miles an hour—and 15 would be good traveling over these sandy grades—if a man has the slightest machine or tire trouble he will not be able to travel fast enough on the moderate grades to make up for the time lost in the mountains.

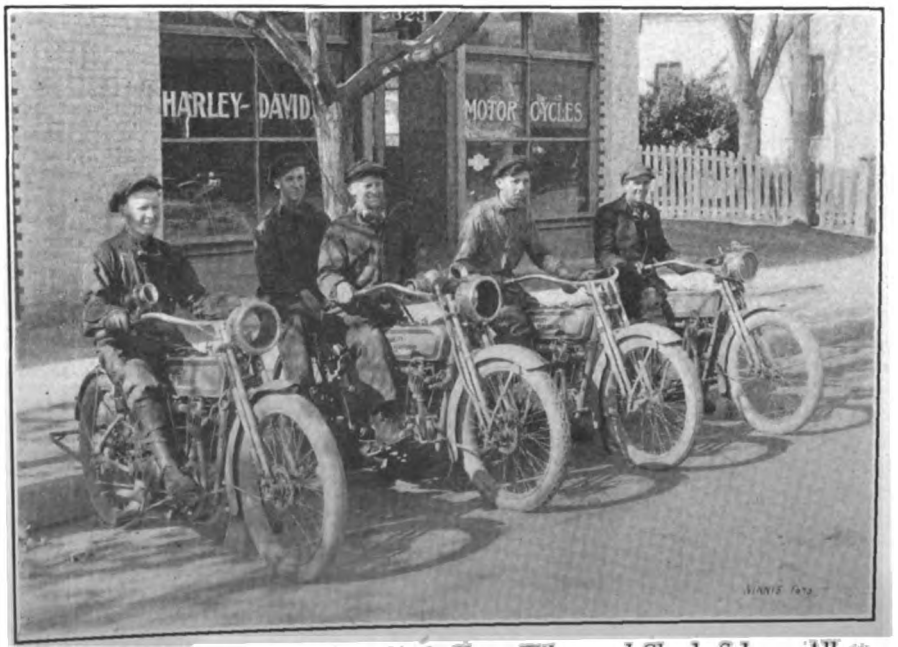
The second day's route is from Bakersfield to Mojave, thence across that terrible 75 miles to Barstow and then to Victorville, back across the desert to Palmdale down through Saugus to Los Angeles, making 330 miles. The third and last day—if anyone is left—he will have to ride twice over last year's stiff desert course from Los Angeles to Saugus, Mojave, Barstow, Victorville, San Bernardino and back over the same route, covering 320 miles. The schedule will be so close that a man will have to count on having his machine in perfect condition throughout the entire route to finish.

MERRY ENJOYS MOTOR TRIP OVER VALLEY ROUTE

LOS ANGELES, Cal.—Edwin F. Merry, distributor for the Excelsior in San Francisco, has just returned a few days ago from a motor car trip with David Troxel, head of the Troxel Mfg. Co., Elyria, O., over the Valley route from Los Angeles. Mr. Troxel, who has been wintering in Los Angalese, had Merry and R. W. Sayre, of the Appeal Mfg. & Jobbing Co., as passengers. All had an excellent trip, with fine roads all the way. They say that the trip could have been made in one day.

Tennant Lee, manager of the Henderson Motorcyle Sales Co., has just come in on his motorcycle via the Coast route, and tells a different story. He spent five days en route, calling on the dealers. He says that the road from Salinas is not so bad, but betwen there and Santa Barbara it had been completely washed out in many places and he passed a number of autos which had been abandoned.

PERFECT SCORE WINNERS IN FRESNO COUNTY RUN



Left to Right, Floyd Holcomb, John Chick, Harry Wilson and Claude Salmon, All on Harley-Davidsons. Chick Was Only Tandem Entrant. Item at Right

SIX PERFECT SCORES IN FRESNO ENDURANCE RUN

FRESNO, Cal., March 27.—Four Harley-Davidson riders and two Indian boosters made perfect scores of 1,000 points in the 200-mile endurance run given by the Fresno County Motorcycle Club on March 12. The two Indian machines finishing with perfect scores were a 1916 and one 1912 model. The Harley-Davidson riders coming through with no points against them were Floyd Holcomb, John Chick (who carried on tandem with him George Bramblett), Harry Wilson and Claude Salmon. There were 18 entrants who rode a course over rough country roads from Fresno to Sanger, Reedley, Sultana, Visalia thence return to Fresno via Goshen Junction and Kingsburg, and then a second lap over the same course, ending at Fresno. The schedule was 25 miles an hour.

AFTER RIDGE ROUT RECORD

LOS ANGELES, Cal., Mar. 27.—Plans are being made by Don Johns for a speed dash to establish a record over the new Ridge Route from Bakersfield to Los Angeles, Bakersfield to San Diego, and Los Angeles to San Diego. He will ride a Powerplus Indian.

CLEVELANDS MOVE FAST

LOS ANGELES, Cal., March 26.—The Cleveland lightweight is "catching on" rapidly in Los Angeles. The first carload of the little machines went in seventeen days; the second carload was received by the distributor on Wednesday night, March 14, and were all accounted for by Saturday noon.

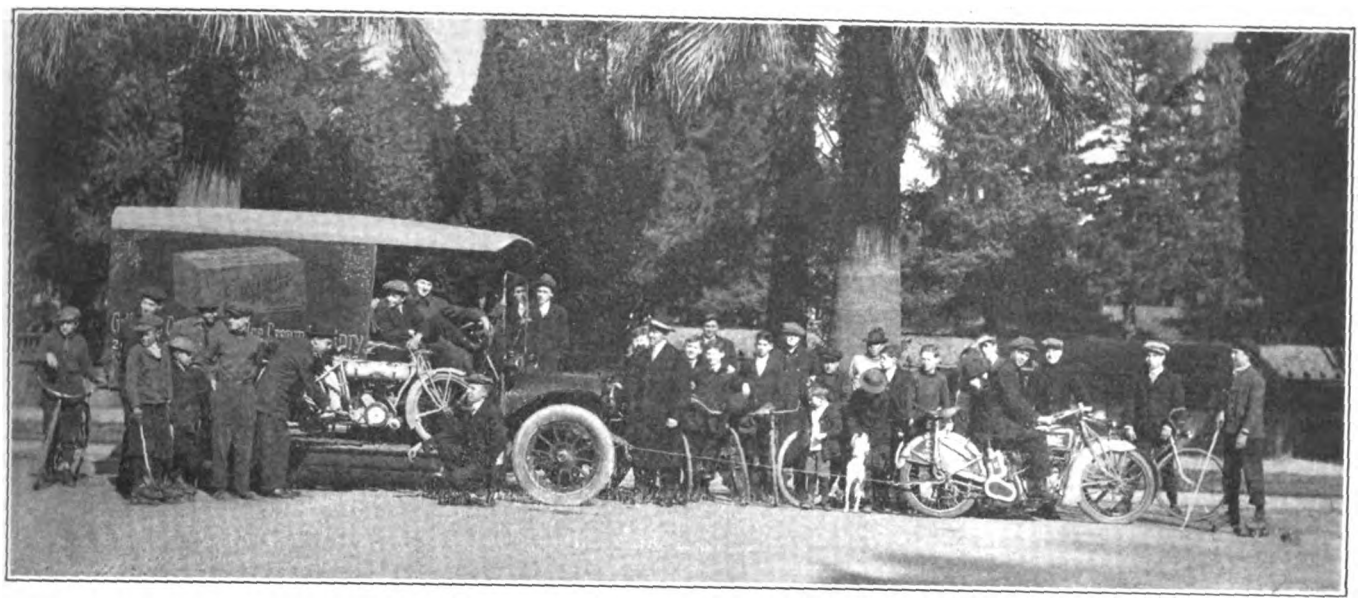
DISPLAYING EXCELSIOR'S PULLING ABILITIES TO INTERESTED CALIFORNIANS



Heavy Truck Being Towed by 16-3 Twin Through Streets of Sacramento, One of Many Demonstrations by Agents Putzman & Bowman

FRISCO CLUB DECIDES ON APRIL SCHEDULE

SAN FRANCISCO, Cal.—The San Francisco M. C. has completed its schedule for April. The run to Woodside, planned for March 26, was postponed to April 2, and on the evening of the 6th there will be held a Hard Times party. On April 16, there will be a run to Pleasanton and Sunol via Castro Valley, returning by Niles canyon, and on April 30 a run will be made through the Santa Clara Valley to Los Gatos.

MOTORCYCLES OUST HORSES IN SAN DIEGO.

SAN DIEGO, Cal.—All mounted patrolmen on the San Diego force will exchange their horses for motorcycles on April 1. This will give the city 13 motorcycle policemen. The decision to re-mount the police was based on a careful investigation in which the city authorities found that the motorcycles were faster, cheaper and more efficient than the horses, as well as performing service for many more hours a day.

The police department has been paying $20 a month for board for each of its seven horses. The steeds will probably be sold at public auction and the money used for motorcycles. To improve the service to residence districts, three new stations, at which motorcycle officers will be maintained, have been established in fire halls. These sub-stations will be connected to police headquarters by private telephones.

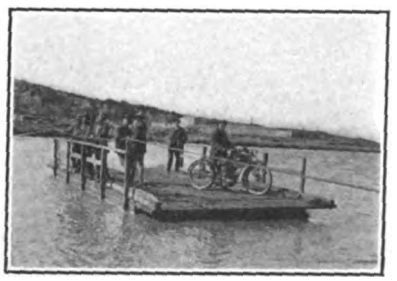
THOR DEALERS RECEIVE FINE SERVICE ON COAST

SAN FRANCISCO, Cal., Mar. 20.—Thor dealers on the Pacific Coast are now receiving prompt service in parts and maine deliveries since the active operation the factory branch on Fremont street, der the management of Z, Barton.

Last week Barton made a trip through Sacramento Valley, where he found the lers all looking forward to an active motorcycle season. A new agency has been placed by Barton at the Pullman Tire Shop, Pullman, Wash.

FLETCHER FINDS BUSINESS BRISK IN OIL COUNTRY

LOS ANGELES, Cal., March 27.—J. A. Fletcher, the Los Angeles Indian scout, has returned from the oil country in the San Joaquim Valley, reporting good business in that section. C. A. Watson of Maricopa sold three machines last week, and B. R. Gilmore's branch at Taft delivered two machines. J. A. Burges of Bakersfield also delivered two new Powerplus Indians. The 300 derricks which were blown down in the oil



Fletcher Crossing River at Del Mar

fields by the winter storms are now all replaced and the wells operating. The destruction of property created a lot of work for the men, and this is being reflected in the increased sales of motorcycles. Fletcher made the trip north from Los Angeles to Bakersfield over the new Ridge route in 3 hours 45 minutes. The fastest trains on the Southern Pacific cover the distance between the two cities in just 6 hours 1 minute.

TAKE ON BICYCLES

WILLOWS, Cal.—The Superior Vulcanizing Works has decided to take on a line of bicycles and motorcycle and bicycle accessories for 1916. The firm does general tire vulcanizing and repairs.

NOTES OF THE CYCLE TRADE IN SAN FRANCISCO

SAN FRANCISCO, Cal.—Manager Fraser, of the Appeal Manufacturing & Jobbing Co. branch, has returned from a trip through northern California. He found all the dealers very optimistic and business already opening up in fine shape.

FRANK AMERAL, the well-known dealer of Salinas, is in this city, resting up after an attack of appendicitis and visiting his friends in the meantime.

FRED H. BENTE, local Excelsior dealer, will shortly return to this city from a three months' trip through southern California.

Z. BARTON, of the local Thor branch, has left for a week's trip to San Diego, intending to stop at a number of towns en route. The contracts will begin to come in right away.

J. ANGWIN, of the Motorcycle Sales Company, representing the Reading Standard, is making a tour of the northern Sacramento Valley, signing up dealers to handle the big brown twin.

MAGGINI & PERKINS, retailing the Harley-Davidson, disposed of 14 new models last week. "They went by threes," said Perkins, "with five on the last day."

NEW ASCOT TRACK SPEEDY

LOS ANGELES, Cal., March 27.—Southern California motorcyclists are anxious to hold a meet on the new Ascot track. Paul J. C. Derkum has lived up to his reputation in constructing turns and paving that will assist to record-breaking speed. This was shown at the opening meet by Barney Oldfield, Bob Burman and other leading automobile drivers. Oldfield, in his front-drive Christie, lowered the flying start time for the mile to 45 seconds, and the 50-mile race was won by Eddie O'Donnell in 43.05.

INDIANS READY FOR SERVICE IN MEXICO

Fifteen Powerplus Twins Recently Ordered by U. S. Quartermaster's Department and Now Across the Border. F. N. Tandems Are Fitted on All

MOTORCYCLE SERVICE PLEASES MILITARY MEN

EL PASO, Tex., March 28.—Reports on the service given by the motorcycles used so far in the Mexican campaign have been uniformly satisfactory. Although the line of communications over the border has been cut up by motor trucks and left in an almost unrideable condition, the motorcycle couriers have been able to make regular and fairly speedy trips between General Funston and the field forces. This has been of the greatest value, especially in view of the fact that the aeroplane branch of the service has so far been able to do very little.

Army men are openly amazed at the durability of the motorcycles and speak in highly complimentary terms of the service they are rendering. Incidentally, it would be hard to find any field of operations in the world more likely to discourage a motorist than Mexico. The weather is bad and the roads are worse—but the motorcycles continue to come and go.

SIX MORE HARLEY-DAVIDSONS SENT TO THE BORDER

MILWAUKEE, Wis., March 27.—The Harley-Davidson Motor Co. this morning received a wire from the United States War Department giving instructions for the shipment of six more Harley-Davidsons at once for army service in connection with the Mexican expedition. Late today the six motors were sent off by express, four of them going to Fort Sam Houston and two to El Paso.

This makes a total of twenty-four Harley-Davidson motors which will be used in Mexico and along the border by United States Army men. Twelve were rushed to the border a week ago, and six were already in use when the Villistas pulled off their little fuss at Columbus that started the boys over the line.

PEORIA RIDERS TO ORGANIZE SCOUT COMPANY

PEORIA, Ill., Mar. 27.—Another body of motorcyclists will soon offer its services to the country for military purposes. Peoria riders are planning to organize a motorcycle scout company to operate in connection with the Illinois National Guard.

It is the object of the organizers to secure fifty riders, after which officers will be chosen, drills established, and official recognition asked of Adjutant-General Dickson of the State Militia. It is believed that the militia will gladly avail itself of the motorcyclists' service, for each rider would furnish his own machine. One of the chief organizers is Fred Waldron, a former motorcycle policeman, who has seen active service in the Philippines.

LOS ANGELES RIDERS FORM MILITARY CORPS

Two Wideawake Trade Men Start the Movement and Motorcyclists Organize as Auxiliary to California National Guard; May Ultimately See Service in Mexico

Lineup of California Guardsmen on Their Harley-Davidsons at Parade Ground Adjoining Armory in Los Angeles

LOS ANGELES, Cal.—Prompt action was taken by Manager E. E. Welborn of the Appeal Manufacturing & Jobbing Co., California Harley-Davidson distributors, and A. T. Smith, Los Angeles Firestone tire branch manager, with a view to organizing motorcyclists as an auxiliary to the California National Guard, along the lines suggested in **Motor Cycle Illustrated.**

On Sunday, March 18, a large squad of Harley-Davidson riders with their machines reported to Captain Jesse McComas at the Armory of the California National Guard in Los Angeles. They were supplied with uniforms, photographed on their machines, and given information as to the possible duties of a motorcycle reserve of the Guard. On Thursday, March 23, a large squad of Harley-Davidson riders reported at the Armory to consider definitely the matter of enlistment as a motorcycle reserve squad of the California National Guard, which in the event of continued military action in Mexico will be called out.

EXCELSIOR PROVES ABILITY IN OPORTO RUN

Portugese Enthusiast Demonstrates Its Endurance Qualities With Three Up in Trip to Lisbon and Return Over Marshy Roads

OPORTO, Portugal.—Senhor Silverio Nobre, one of this city's best-known sportsmen and an ardent Excelsior enthusiast, recently made a run from Oporto to Lisbon and return to demonstrate the power and endurance of his mount. He had a sidecar fitted, as well as a tandem attachment and carried as passengers the brothers Geraldo and Nuno de Carvalho.

"The run from Oporto to Lisbon was made nicely," said Senhor Nobre, "but there were numerous places where the traveling was like going through marshes. In many of these the mud was up to the crankcase, but the motor kept on doing its work and we got through. A broken chain link was the only trouble encountered by us.

"By way of demonstrating the power of the Excelsior, the return was made through Coimbra and the steep hills surrounding the city were surmounted with great ease, even with three aboard. Our ascents were witnessed by several sportsmen of Coimbra, who were astonished at the speed made with such a load.

"I cannot see," continued Senhor Nobre, "why anyone would choose a light car of any kind in place of a motorcycle with its superior speed and climbing abilities, comfortable riding and high class finish. There is no comparison between a car and my Excelsior as regards economy of running."

Jose Marinho, Excelsior representative, at 373 Costa Cabral, is awaiting a large shipment of 1916 models.

Digitized by Google

Of a Personal Flavor

Stewart Slosson, special Firestone motor cycle and bicycle tire representative on the Pacific Coast, is now on his way toward Arizona, after having covered Washington, Oregon and upper California. Slosson says that the lightweight is a big hit everywhere any models have been delivered. He uses his Harley-Davidson combination for all his travelling.

B. H. Bayless, formerly in charge of the advertising department of Berdan & Co., of Toledo, O., has joined the advertising forces of the Champion Spark Plug Company, of Toledo, O., where he will assist Advertising Manager H. L. Corey. The doubled output of Champion products for 1916 makes closer relations with the trade necessary, and in this connection Mr. Bayless will chiefly render his services.

Arthur O. Lemon, traveller for the Henderson Motorcycle Company, of Detroit, Mich., is completing a hasty loop around a number of Eastern cities, calling on Henderson dealers and noting progress. Lemon expresses himself greatly pleased at the results of his trip so far and states that the majority of Henderson dealers have their hands full demonstrating and taking orders.

A few of the many recent visitors to the plant of the Westfield Manufacturing Company at Westfield, Mass., are William Roberts and William C. Dawe, of New Bedford, Mass.; Walter G. Wood, of Springfield, Mass.; Bob Lawson, the touring cyclist from New York City; F. H. Lucas, of Boston; R. MacDonald, the man who sold the Popes to the Worcester police department; Ernest S. Broadbent, of Attleboro, Mass.; A. E. Bregent, Pope distributor in Montreal; W. H. Howe, of Bridgeport, Conn., and Nat. C. Cohen, of the Goodby-Rankin Co., of Providence, R. I.

Lou Guterman, traveler for the Reading-Standard, has just completed a trip throughout New York state and has closed up every part of that territory. He recently returned from covering his Florida territory, in which he reports excellent results. Mr. Guterman will travel Connecticut beginning next week.

W. E. Newton, of the Fentress-Newton Mfg. Co., is again a resident of Tacoma, Wash., being now the head of the Newton-Enger Company. Although actively engaged in the motor car business, Mr. Newton states that he will never lose his loyalty for the bicycle and that nothing is of more interest to him than bicycle racing.

L. H. McDonald, former Wisconsin representative of the Harley-Davidson Motor Company, has resigned his position to become affiliated with the sales force of the Cleveland Motorcycle Sales Company, of Indianapolis, Ind. He will travel Illinois and Wisconsin in the interest of the Cleveland lightweight, making his headquarters at Chicago.

McDonald has developed a host of friends since his connection with the motorcycle industry. He has been a familiar figure at all the tours of the Milwaukee M. C., and these, together with his extensive travels in Wisconsin and upper Michigan have given him an unsurpassed acquaintance with the sport in this section. He has been riding motorcycles since 1906.

In 1913, McDonald joined the sales staff of Gordon Bent, Harley-Davidson dealer at Green Bay, Wis., and was very successful that season. He paid a visit to the Harley-Davidson factory late that year for an inspection trip and signed up to travel Wisconsin for the factory. He made good in this position as he did when with Bent.

"Firestone," otherwise A. T., Smith has just returned from a tour through Arizona, where he covered all the large cities and towns. He reports things in fine shape.

F. H. Adams, treasurer of the Goodyear Tire and Rubber Company, of Akron, O., has gone to Los Angeles with his family for the remainder of the winter.

Going Out to Get the Business for Jobber C. L. Smith of Los Angeles, Cal. Left to Right, Harry Smith, C. W. Lewis and Charles Tobey

VACUUM BAR TIRES HAVE LOW INFLATION PRESSURE

LOW inflation pressure, combined with long wearing qualities and a combination of non-skid features in the tread are the Sterling Vacuum Bar motorcycle tires, the product of the Rutherford Rubber Company, of Rutherford, N. J. These tires are made in two sizes, 28x2½ and 28x3 inches, and all carry a 5,000-mile guarantee.

The tread of the Sterling Vacuum Bar tire is a series of chevrons or V projections crossed by two parallel and circumferential ribs. The construction combines the non-skid features of the bar and V with the vacuum principle, which is a great advantage on wet asphalt, Warrenite and country dirt roads. The unusual height of the bars and ribs as well as the thickness of the tread greatly reduces the chances of puncture, fabric bruising and cutting.

The carcase is made with four plies of 17¼-ounce high-grade tire fabric. For the three-inch tire, the firm recommends an inflation pressure of 40 pounds. The 28x2½-inch tire is designed to fit the standard BB rim, while the three-inch tire is built to fit the CC rim. The list prices are. 28x2½, $9.07; 28x3, $9.90. A special combination offer of the tire with the firm's armored blue tube is made.

The Sterling firm also makes extra heavy red motorcycle tubes in all stock sizes and an armored blue tube, as well as tire sundries and an extra tread known as the "Snap On" for use in retreading. Communication should be had with the firm at Rutherford or its many branches in various parts of the country.

Shipment of 15 U. S. Army Indians Ready To Go Into Their Crates

WHY THE INDIAN IS THE FRONT RANK MILITARY MACHINE

THE U. S. Army has just purchased—through the N. Y. Sporting Goods Company—20 Indians for use in the Mexican Campaign. Fifteen of these machines were ordered March 15th, and although special equipment and special khaki finish were required, these machines were shipped 4 days after receipt of order.

Five extra machines were ordered later and these, too, were shipped four days from date of order.

Digitized by Google

Thus did Indian prompt delivery become a factor in the military operations of our own army.

Practically every big nation in the world is using Indians for military purposes—a tremendous tribute to Indian efficiency, speed and endurance. In many of the news dispatches and pictures of the titantic European struggle now being waged the Indian is constantly appearing.

Fighting today is largely a matter of highly efficient mechanical ways and means. It is noteworthy that the motorcycle has become an absolute war necessity—and foremost of all the

WINNIPEGGERS WILL START SEASON WITH A JUMP

Extensive Plans are Laid for Club Activity at Annual Talk-Fest and Banquet; Will Hold Racemeet to Raise Funds for Dependents of the Boys in Khaki

WINNIPEG, Manitoba.—The Winnipeg Motorcycle Club renewed its lease of life when the annual talk-fest and feeding session of the club were successfully and safely conducted at the Grange Hotel, Winnipeg, on March 23. Forty dyed-in-the-wool clubsters were on deck and the way they sallied into the arrangements for the coming year made everyone feel that a large year of activity is in front.

The event sprang into immediate prominence through the presence of two big sportsmen of Manitoba, Mr. Thomas Boyd, president of the Amateur Athletic Union of Manitoba, and Mr. A. R. Morrison, who has a distinct standing in several sports. The members were so pleased that they decided to make Mr. Boyd the honorary president of the club for another year, while the names of Mr. Morrison and A. C. Emmett, the latter a busy automobile booster, were coupled in the honorary vice-presidency class. The patrons, by the way, include Mayor Waugh and the various dealers of Winnipeg.

The gathering not only drank to the health of fellow-members in the firing line, but preparations were started for the holding of a patriotic racemeet at Exhibition Track on May 24, so that some money can be raised for the dependents of Winnipeg soldiers. R. G. Irvine, president of the Winnipeg club, is already scouting the horizon of the Middle West for professional racing stars for the spring speed clashes.

The following officers were elected: President, R. G. Irvine; vice-president, F. W. Marples, Jr.; secretary, William Barr; treasurer, Bud Meyers. Captain and lieutenants will be picked out when the season for endurance and pleasure runs is reached.

The members delved into the question of finances and it was wisely decided to reduce the annual membership fee from $3 to $1. At this rate, the club expects to obtain a long membership list before the leaves fall again.

WANT A LOWER AGE LIMIT FOR RIDERS

Ontario Trade and Club Leaders Believe It Should be Changed From 18 to 16 Years; Early Revision Is Expected

TORONTO, Ontario.—Following up its successful efforts in connection with the extension of the ten-day free privilege to motorcycle tourists entering Canada, the Canada Motorcyclists' Association has taken up with the Ontario Government the question of reducing the age limit for riders of lightweight motorcycles or motor-propelled bicycles. The Government has already given a favorable reply to the request of the C. M. A. that the age restriction for this class of riders be reduced from eighteen to sixteen years. The association is, however, continuing its efforts by bringing the matter to the attention of five members of the Legislature.

The Toronto Bicycle and Motorcycle Dealers' Association has also made a move in the same direction, the request of the trade being similar to that of the riders' organization. The distributors are anxious for the reduction because many sales are prevented on account of the present high age limit. It is pointed out that many business firms would purchase lightweights for commercial purposes, such as message and delivery work, if the boys they now employ could make use of the machines.

The Toronto dealers have also sent a recommendation to city council for a change in fees for licenses to sell second hand bicycles. The junk dealers now pay $1 per year for the privilege while storekeepers pay $15. According to the request of the association, the dealers would pay $5 while the peddlars would contribute $15. The association also wants the peddlars to report the make and number of every bicycle or bicycle part which they handle, as it is believed that considerable of the stolen wheels pass through the junk shops.

TO ORGANIZE A CLUB

ST. CATHARINES, Ontario.—John Marshall, 22 Facer street, St. Catharines, has in mind the organization of a motorcycle club in this city and he is conferring with the officers of the Canada Motorcyclists' Association on the subject. It will be the first motorcycle club for this center, although there have been several score riders here for many years.

THIRD CORPS FOR SALONIKA

TORONTO, Ontario.—According to a semi-official report received in Toronto from England, the 3d Divisional Cyclist Corps, made up of 200 officers and men, has been sent to Salonika, Greece, for service. This corps was recruited mainly in Toronto and is under the command of Captain Schwartz (formerly of the Corps of Guides. The corps was in England for only one month, training at Salisbury Plain camping grounds.

A GIFT ON ENLISTING

TORONTO, Ontario.—Alfred Neville, an employe in the Canadian branch factory of the Hendee Manufacturing Company, was presented with a wrist watch by his fellow employes on the occasion of his resignation from the company to enlist with the 180th Battalion, Canadian Expeditionary Force. Neville already is a veteran of wars in India and South Africa, having gone out with the First Canadian Contingent in 1899 to Cape Town.

CYCLEMOTOR MEN BUSY

BEAMSVILLE, Ontario.—J. Amiss, an enthusiastic bicycle retailer of Beamsville, has been appointed distributor of Cyclemotors in Western Ontario. He will shortly cover the whole of his territory for the John T. Wilson Company, Limited, the Canadian makers of the bicycle powerplant.

Tom Anderson, a former well-known motorcycle official of Toronto, is now on the road in Eastern Ontario for the placing of Cyclemotor agencies for the year.

HILLS NO DRAWBACK

QUEBEC, P. Q.—The city of Quebec, with its ancient fortifications and quaint buildings, is noted for its many steep hills. In fact some of the local thoroughfares are not paved streets at all but wide stairways. Yet there are motorcycle dealers here, one of whom, Rod. Douville, expects to do a nice business again this year. He has again contracted to handle the Excelsior and has already placed three machines in this city.

NEW VANCOUVER MANAGER

VANCOUVER, B. C.—The new manager of the Vancouver branch of the Canada Cycle & Motor Company, Limited, is Mr. J. G. Pape who, for many years, was an Ontario traveler for the company. He knows thoroughly the many products which are distributed by the C. C. M. company.

An enthusiastic customer is your best advertisement

THIS is a fundamental principle of business, well known to thoughtful dealers in every line of trade and recognized by the Associated Advertising Clubs of the World.

Good goods promote satisfaction and satisfied customers are a powerful asset, but when good goods are so good as to combine satisfaction with enthusiasm in the buyer, then and only then, is knowledge of the sale advertised throughout the length and breadth of your territory.

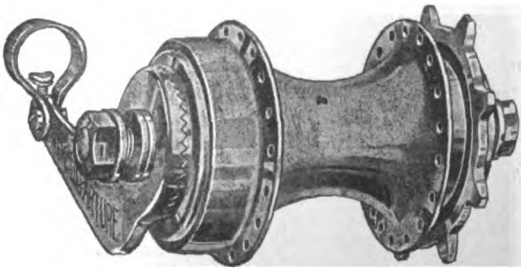
The bicycle dealer who specifies and sells

The New Departure Coaster Brake

has back of him an army of five million enthusiastic customers who have bought, used, and rely on New Departures and who advertise them in a way that keeps your business constantly before prospective purchasers.

Then, too, we work with every New Departure dealer with sales helps that in themselves insure and increase the already created demand for "The Brake that Brought the Bike Back."

May we co-operate with YOU in the boost for



"A Million Bicycles in 1916"

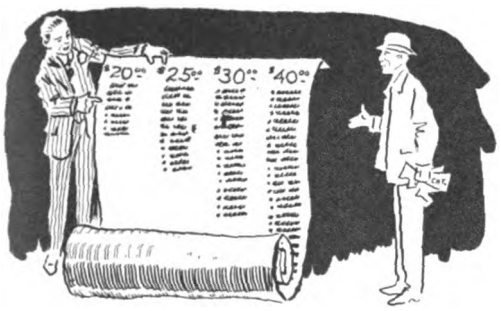
PUTTING YOURSELF INTO A CUSTOMER'S SHOES

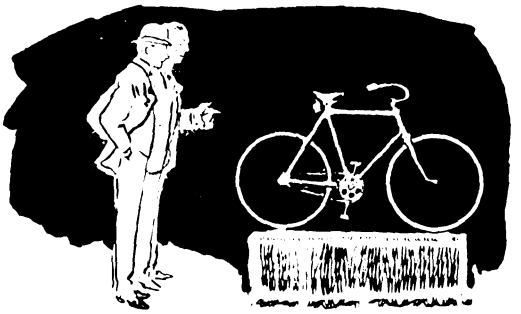
Best Results Can Be Obtained by Leading a Customer to Buy and Making Him "Sell Himself"; the Importance of Bringing Out All the Strong Points of Your Line

By JOS. W. BREEN
Advertising Manager, Haverford Cycle Company



Show a Man What He's Getting

Mr. Breen is the "high-priced" type of salesman. He has the knack of selling bicycles reduced to a science. In this story he tells some of his "secrets" of good salesmanship.



Imagine Yourself in the Buyer's Position

IN the bicycle business particularly, as in all business generally, the easiest way to get to a customer's pocket book is to get into his shoes. In other words, the secret of selling bicycles is leading the customer to buy rather than trying to sell him.

Getting right down to hard facts, there is really not a vast difference between the $35 bicycle John Jacques across the street sells and the one you are selling at the same figure. A difference in color combination, in equipment or finish, perhaps, distinguish your wheel from that of your competitor's. In general, the construction is the same. What then, are your selling points? What is going to make your bicycle sell better in comparison to the one across the way?

Individuality Essential in Bicycles

Individuality is just as essential in a bicycle as in an automobile, and much harder to find. Because of this comparative lack of individuality in bicycles, it is absolutely necessary that the salient points of your bicycle be brought most completely to the attention of the prospect.

Your competitor's machine has the same drop forgings, the same crank hanger as yours. It is just likely, however, that he has taken for granted that the man in the market was not interested in such details and failed to bring out any specific points. It is, of course, probable that he has. At any rate, all depends on how these little details are brought to the prospect's attention.

It will not suffice merely to mention that your bicycle has drop forgings, seamless steel tubing, one-piece hanger and the like. This may simply be a jumble of words to the man in the market. You must show him the advantage of such construction—make him feel that every part of that bicycle is built, as it were, to suit his particular needs, if you would have him put his money into your cash drawer. Do not waste words proclaiming your bicycle the finest or most reliable in the city. Rather, by bringing out the good points of your wheel, convey to him the idea of fineness, reliability, individuality, and he will sell himself.

Encourage Customer to Use His Judgment

Honest description of the relative merits of the different models on your floor goes a mighty long way in closing a sale. Let your customer know what he actually gets for $20, $25, $30 and $40. He will then have before him a standard by which to judge. Bring out forcibly the features of the machine you think best suited to him, encourage him to use his own judgment, and nine times out of ten he will take your judgment and your bicycle.

In a word, be specific in explaining the good points of your bicycle. Tear the wheel down, as it were, and then build it up with your own personal enthusiasm into a harmonious whole—a thing possessed not only of beauty and reliability, but also of individuality.

ALL THE BIG NEWS—FIRST

Within a few weeks everyone of the large bicycle tracks throughout the country will be in full swing again. We know that all of our readers want the results of the races—and want them first—every week. We have secured exclusive correspondents in all the cycling centers who will be on the job the entire season. As in the past the Bicycling World will have the best bicycle news service.

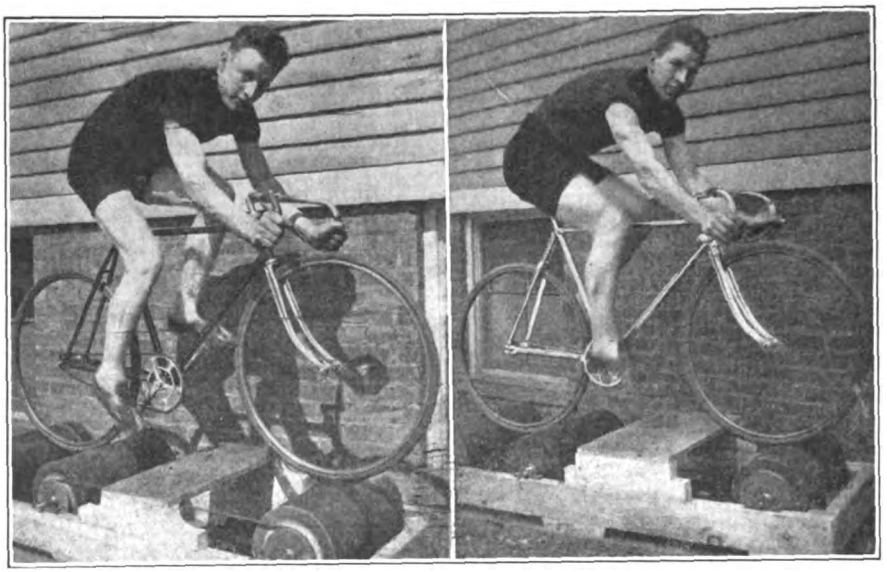
RODE IN OUTLAW HOME TRAINER RACES



William Weimer (at Right) and John Staehle (at Left), who Met in One-Mile Home Trainer Race of the Bay View Wheelmen, a Club Hostile to the N. C. A.

MORE PRIZES RECEIVED FOR U. S. I. RACE

Entries Coming in at Faster Rate Than Expected; Ten Additional Prizes Added to List; Big Clubs Will Enter Teams

NEW YORK, N. Y., Mar. 28.—With entries coming in at a faster rate than expected, the officials of the Unione Sportiva Italiana believe that one of the largest field of riders ever seen in a New York event will line up for their ten-mile bicycle road race on the morning of Sunday, April 9.

The attractive list of prizes, as well as the fact that this race will open the amateur outdoor season in the East, are largely accountable for the unprecendented interest which is being manifested in the U. S. I. classic. Four Pierce and one Iver Johnson racer are in the big prize list, which includes 20 pairs of tires, three silver loving cups, five medals and 35 other prizes of substantial value. Ten additional prizes have been received since the printing of the official entry blanks.

As was announced in a recent issue, the race will be held over the famous Jericho Turnpike course, starting from the Oriental Hotel at Floral Park, L. I. The contestants will be started promptly at 10 o'clock in the morning.

The clubs that will try for the various trophies are: Acme Wheelmen, New England Wheelmen, C. R. A. Association, Superior Wheelmen, C. R. C. of America, all of New York City; Glunz Wheelmen and Empire City Wheelmen, of Brooklyn, N. Y.; Hudson County Wheelmen, of Bayonne, N. J.; Bay View Wheelmen, of Newark, N. J.; Queen City Wheelmen, of Plainfield, N. J.; Big Mac Cycle Club, of Inwood, L. I., and Baldwin Cycle Club, of Baldwin, L. I.

Some of the best simon-pures in the East will appear in the race. Among these are: Fred Woisin, Inter-Club League champion for 1913; Ed. Jensen, 1914 Inter-Club League champion; Tom Bello, ten and twenty-five-mile American competition record holder; Eugene Aickelin, runner-up in the 1915 Inter-Club League championship races; Anthony Desimone, 1915 Inter-Club League home trainer champion; Nelson Johnson, ten-mile unpaced record holder.

Entries close at 6 p. m. April 3, with George Harvey, secretary, 23 East 115th street, New York City. After that date all entries will be subject to a charge of 25 per cent. extra, as per N. C. A. ruling, and no entries will be accepted after 9 a. m. on the morning of the race.

RIDERS IN FIRST WORK-OUT AT NEWARK VELODROME

NEWARK, N. J., Mar. 27.—About two score bicycle riders had their first work-out of the season at the Newark Velodrome, last Sunday, preparing for the racing season which opens here on April 2. Frank Kramer, the national champion, was one of the first riders on the track and, after having a good workout, he retired to his quarters for a stiff rub down. Besides Kramer on the track there were Reggie McNamara, Bob Spears, Oscar Egg, Fred Weber, Victor Linart, Eddie Root, Bobby Walthour, Frank Cavanagh, Gordon Walker.

At the right is shown the design which will be used on the medals to be awarded to all those finishing the Spring Century of the C. R. C. A.'s New York Division, April 23.

OUTLAWS IN EXHIBITIONS AND RACES AT NEWARK

NEWARK, N. J., March 27.—Amateur and professional cycle riders affiliated with the Federation of American Cyclists gave exhibitions and rode races on home trainers at the club house of the Bay View Wheelmen here in Newark last Friday night. Alfred Goullet, the blond Australian, was the big attraction of the night. Goullet rode a half-mile exhibition in 31⅕ seconds.

Harry Kaiser, the Bronx boy, beat Tommy Grimm, the local rider, in a one-mile match race in 1 minute and 10 seconds. John P. Cobert, Charles Osteritter and Arthur Staehle presented a clever comedy act on the rollers.

Eddie Kane, the president of the Amateur Cyclists of America, defeated John Dreher in a one-mile match race in 1 minute 24⅘ seconds. Al Krushel, of Buffalo, lost to Robert Henderson, of the Bay View Wheelmen. Joe Seltson defeated Jack Bell and Cobert defeated Nick Horvath. Louis Macciverna beat William Keller and John Staehle won from William Weimer.

ANNUAL TEN-MILE C. R. C. A. RACE, MAY 21

NEW YORK, N. Y., March 28.—The annual ten-mile handicap road race of the Century Road Club Association, to be held at Floral Park, May 21, is securing a list of prizes that promises to bring out the biggest field of riders that ever lined up for an "Association" race. The prizes will include bicycles, sets of wheels, tires, medals, loving cups and a long "string" of valuable merchandise.

The committee, composed of A. R. Jacobson, chairman; Isadore Taub, Adolph Wiener and Sylvain Segal, is bending every effort to make the event a big success. Detailed information concerning the proposed race can be secured from Mr. Jacobson, whose address is 149 West 98th street, New York.

WOISIN WINS ACME RACE

NEW YORK, N. Y., March 28.—In the time of 6:14 Fred Woisin of the Acme Wheelmen captured the club's two-mile race, staged over the Pelham Parkway course on Sunday morning. Second position went to Paul Reinsky, while the third honors were accounted for by Henry Neibhur. Among those who started in the race were Harry Kaiser, Paul Reineke, Henry Neibhur, N. Fesselmeyer, E. O. Spillane, F. Fesselmeyer, E. H. Spillane, John Herson, Fred Miller, R. Kurtzdorfer and S. Lindquist.

BELLO WINS CORK RACE

NEW YORK, N. Y., March 28.—The weekly cork race of the Unione Sportiva Italiana, held over the Shore Road in Brooklyn, which covers a distance of 18 miles, last Sunday, was won by Thomas Bello. The course was very heavy in places, but in spite of this fact there were 16 starters. A dead heat resulted between George Harvey and Charles Rabbino for second place, with Elmer Mullin following a few yards behind.

PIERCE FACTORY NOW WORKING TO FULL CAPACITY

BUFFALO, N. Y., March 28.—The Pierce Cycle Company reports that it is now more than 2,000 bicycles behind in its shipments, in spite of the fact that every department of the factory is being worked to capacity day and night, and that additional help is being put on nearly every day. It is difficult for the Pierce Company to secure freight cars, and as a result of this condition they were obliged recently to send a carload of machines to New York by express.

Fred L. Brown, general sales manager, is now away on a two weeks' trip to Boston, New York, Baltimore, Washington, Louisville, Cincinnati and Indianapolis. Yesterday he advised the home office that "Al" Ray of Louisville, Ky., had been appointed State agent for the Pierce bicycle. He also stated that business all along the line was exceptionally good.

ROOSEVELT OPENS CYCLE JOBBING HOUSE

CHICAGO, Ill., Mar. 28.—George M. Roosevelt, formerly a traveler for the Excelsior General Supply Co., has started the Roosevelt Cycle Supply Co. here and will cater to the bicycle and motorcycle trade as a jobber and distributor. George M. is both president and general manager of the new company, while J. E. Roosevelt is secretary-treasurer, and Otto Baer, chairman of the board of directors. The address of the firm is 2337 Wisconsin avenue, Chicago.

U. S. I. HOLDS DANCE

NEW YORK, N. Y., March 28.—The Sixth Grand Annual Charity Ball of the Unione Sportiva Italiana was held on Sunday evening, March 26, at the Palm Garden. The famous Busoni, with his two well-known orchestras from the Ritz-Carlton and Hotel Knickerbocker, rendered the music. The committee in charge of the dance consisted of John Toletti, M. Bozzone and George Bieregel.

NEW SAUCER FOR NARRAGANSETT PARK

Revere Association Is Trying to Secure Big Speedway for New Oval in Providence; Will Hold Night Races Twice a Week

PROVIDENCE, R. I., Mar. 28.—Announcement was made here last week that the Revere Cycle Track Association, of Boston, Mass., is trying to secure the Narragansett Park Speedway, which was built last year at a cost of $100,000, for staging bicycle races at night.

The Revere association plans to build a new oval track within the big track should suitable arrangements be affected with the speedway management. It is intended to start the work of building the oval as early as possible, so that the opening racemeet may be held on May 30, Memorial Day. After that, races will be held every Tuesday and Friday evening of the outdoor season.

Riders from the C. R. A. circuit will appear on the proposed Providence track, and motor-paced races will be the feature performances. Many of the local boys, also, will be seen at the new velodrome. Quite a number of Providence riders have won their spurs at the Revere track in Boston, including Vincent Madonna, Alvin Loftus, Lormier Winslow, Tony Lancellotto, Ed. J. Goyette and Egisto Cini.

Madonna is the young Italian rider who took up paced racing for the first time last season, and he forged to the front rank of pace-followers in a short time. Before the summer was over he was pitted against such crank cyclists as Linart, Wiley, Carman, Walthour, Lawrence and Moran. He will appear regularly here, should the new track be built.

A. O. SMITH COMPANY AFTER PRICE-CUTTERS

Motor Wheel Manufacturers Exerting Every Effort to Prevent Sales at Reduced Figures and Protect Dealers All Over the Country

ADDITIONAL impetus has been given the rapidly-spreading campaign against price-cutting in the cycle fields and allied industries by the firm stand of the A. O. Smith Company, of Milwaukee, which has just announced formally that every effort is being exerted to prevent Smith Motor Wheels from coming into the hands of dealers or others who will be likely to offer them for sale below the list price.

A notable instance of price cutting with regard to Smith Motor Wheels was that of a New York department store. This concern advertised the Motor Wheels for $56.50, in accordance with its custom of quoting all goods under established figures. The price created considerable uneasiness among metropolitan dealers, but the A. O. Smith Company acted rapidly and the department store has been unable to get more motor wheels, even by the roundabout course by which it obtained the ones advertised.

How Motor Wheels Were Bought

"This store never purchased any motor wheels from the A. O. Smith Company or its representatives," said General Manager W. V. C. Jackson, of the Motor Wheel division, with regard to the affair. "The situation came to my attention immediately after the advertisement appeared and I at once traced down the two motor wheels secured and found that they had been purchased for the department store in a roundabout and deceitful manner from a dealer at considerable distance from the store. The Federal laws at present offer us no protection in this respect, but we are quite sure that this store or any other of its kind will have great difficulty in securing any number of Smith Motor Wheels anywhere hereafter.

"We have taken every possible measure to protect our dealers in this respect in all parts of the country and we are pleased to say that our 1,800 dealers have shown the proper co-operative spirit and good business sense in following the rules. The house mentioned, we discovered, did not intend to sell any motor wheels, but had them and advertised them as a bait to get people into the store, the common bargain motive. We have the lines against price-cutters pretty well drawn, but if such unfair competition should come to our dealers' attention we would certainly like to hear about it."

October 8. — Bicycle run, Chicago to Hammond, Chicago Club.

October 22.—Bicycle run, circuit of Chicago outer belt, Chicago Club.

October 29.—New York. One hundred and fifty-kilometers (84 miles), Italian road championship, Union Sportiva Italiana. Rain date, November 5.

November 23. — Newark, N. J. Two-hour team race, Bay View Wheelman of Newark. Rain date, December 25.

MONTREAL BICYCLE CLUB REACHES 39TH YEAR

MONTREAL, Quebec.—The thirty-ninth annual meeting of the Montreal Bicycle Club was held at the headquarters of the Montreal Amateur Athletic Association on Thursday night, March 16, when many old veterans of the bike game gathered to renew affiliations for another year. One item of business was the passing of a vote of condolence to the relatives of the late A. T. Lane, a past president of the club and a real pioneer of cycling in America, who died a few weeks ago. Officers for the ensuing year were elected as follows: President, Art Harries; First Vice-President, Alderman Louis Rubenstein; Second Vice-President, F. Wathley; Honorary Secretary, James Macdonald; Treasurer, R. E. Melville; Captain, E. A. Venning; Bugler, T. G. Potter; Standard Bearer, J. J. Louson; Committee, Gordon C. Bowie, C. D. Bentley and W. E. Findlay.

These men have been staunch devotees of the bicycle sport for many years and the majority are now very prominent in various spheres of commercial and public life. Alderman Rubenstein, who has been the acting-mayor of Montreal, has been the president of the Canadian Wheelmen's Association for more than twenty years.

CLEVELAND DEALERS ORGANIZE TO HOLD RACES

CLEVELAND, O., Mar. 28.—Local bicycle dealers recently formed an association for the purpose of securing more publicity for the two-wheeler by staging events during the riding season which are calculated to arouse the public interest. On April 9 the dealers will ride through the main streets of the city on 1916 machines, and a decorated bicycle parade will be run off on the evening of May 10, for which liberal prizes will be offered. A big bicycle racemeet is promised for May 30, while a night lantern parade will be held on June 14. Another racemeet will bring out the local riders on the Fourth of July, and a dealers' outing, to which all Cleveland cycling enthusiasts will be invited, is on the program for July 30. The last two events of the season are to be a "Surprise Day," Aug. 16, and a final racement on Sept. 4.

FOUR BUSY CYCLE STORES IN BIRMINGHAM, ALA.

BICYCLES INCLUDED IN SPRINGFIELD ORDINANCE

SPRINGFIELD, Ohio.—Springfield's new traffic ordinance, which is before the council for enactment, provides with great detail for every phase of motor operation, and takes in bicycles as well. Among other provisions is one to the effect that no person on a motorcycle or bicycle shall allow any person to ride in front of him, but the not uncommon prohibition of tandem motorcycle riding is not found. Every motor vehicle shall be provided with a good brake and with mufflers, and lights must be not more than three feet above the surface of the street. Operation of a motor vehicle by a person under 16 years of age is forbidden, but as a reference to "said automobile" follows this immediately, it is understood that it does not cover motorcycles, so as to shut off boy riders. It is believed that the ordinance will pass, as little or no complaint has been received.

CROWD BLOCKED THE TRAFFIC

LYNN, Mass., March 28.—The Lynn Sporting Goods Company is holding a home trainer contest in its large display window and has secured two local riders to pedal for one hour each day. The contest will last one week, after which time the sealed dial, which is marking the distance the riders are covering, will be opened. Everybody is permitted to register a guess of the mileage, and to the four persons making the best estimates valuable prizes will be awarded. This contest is creating so much interest here that the police had to be called out to prevent the crowd from blocking the traffic.

GOODBY-RANKIN CO. IS KEPT STEPPING LIVELY

PROVIDENCE, R. I.—Nat C. Cohen, sales manager, and Frank McCarty, manager of the motorcycle and bicycle department of the Goodby-Rankin Co., of this city, agree enthusiastically in the statement that 1916 will be a banner year for cycles. Mr. Cohen has recently returned from a trip to a number of the factories making the various products sold by the Goodby-Rankin company, his object being to obtain more speedy deliveries in order to meet the Spring demand. He reports that his trip was successful.

As indicating the splendid demand for bicycles, Mr. Cohen states that they have sold as many bicycles already as they did in the entire year of 1915. He gives due credit to the fine constructive and sales producing work of the "Million Bicycles Committee."

Mr. McCarty added to Mr. Cohen's remarks by stating that the company has received substantial mail orders from localities far outside their territory. "Our business for November increased 97 per cent. and for December 125½ per cent.," said Mr. McCarty, "and our only trouble had been to obtain the goods fast enough to meet the orders."

BERRY AND O'KEEFE MOVE

LOUISVILLE, Ky., March 29.—A. C. Berry and Jerry O'Keefe, who have been running a bicycle store as A. C. Berry & Co., at 415 South First street, have moved their business to 308 South Third street and taken on the Thor agency. This concern has changed its name to the O. K. Cycle Company. A full line of bicycles, including the "Princetons," is being handled, and the 1916 three-speed Thor is now on display.

MOTOR WHEEL NEWS

JACKSONVILLE, Fla., March 28.—Melms-Weisenfeld Company has taken on the distributing agency of the Smith Motor Wheel for Florida. Melms-Weisenfeld Company has two large retail stores in Jacksonville.

LITTLE FALLS, N. Y., Mar. 28.—Little Falls Motorcycle Co., which recently renewed contract to handle "The Bicycle Booster" for the present year, has sold 16 of the Motor Wheels within the last four days despite the fact that two feet of snow is on the ground.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

Twelfth Installment

In 1908 Kramer's chief contenders for the title were Bardgett, Fogler and Clark. He not only defeated this strong trio, but also lowered two more world's records.

ALL the excitement during the cycling season of 1908 came in the last two months and when the smoke of the battle had cleared Frank L. Kramer had once more won the cycling championship of America. This was the eighth consecutive time that the East Orange tornado had annexed the premier bike honors of the land. Walter Bardgett was the runner up to Kramer and Joe Fogler, the Brooklynite, finished third.

Kramer shattered two world's records in 1908 and riding with Joe Fogler set up a new mark in a tandem race. The first record was lowered on Sunday, August 23, when Kramer, riding with Fogler, finished a two-mile tandem race in 3 minutes 46⅖ seconds. This was eleven seconds better than the previous world's figures. The following Sunday, "Big Steve" clipped one-fifth of a second off the half mile record. He traveled over the boards in 54 1/5 seconds, bettering the former record made at Salt Lake City by Jackie Clark by one-fifth of a second.

Against Field of 25 Riders

In next to the last meet of the season, Kramer eclipsed all of his previous performances of the season when he beat thirty riders in the twenty-five-mile open and knocked 26 3/5 seconds off the world's record made by himself seven years previous at Madison Square Garden. Kramer's time was 57 minutes 26 3/5 seconds. The old mark was 57 minutes 52 4/5 seconds. Joe Fogler finished second to Kramer in this event.

Bicycle racing, which was dormant in Newark in 1906 and 1907, sprung into popularity again in 1908, and during the last two months of the season drew banner crowds. Jackie Clark and Floyd McFarland rode in Salt Lake City the greater part of 1908 while Iver Lawson was out of the game for some time, due to injuries received at the Newark track and at Salt Lake City.

Early in September Johnny Chapman came on from Salt Lake City with Jackie Clark, Henri Mayer and Iver Lawson. Chapman was made manager of the Newark Velodrome, which position he holds today. The first meet Chapman put on drew the record crowd of the season. Jackie Clark beat Champion Kramer in the one mile handicap. Clark's victories after this, however, were few and far between. On the Saturday night previous at Madison Square Garden Kramer disposed of Clark, Mayer and Fogler.

When Clark beat Kramer by three-quarters of a length on his first appearance in Newark naturally the fans were greatly surprised and gave the little Australian a tremendous reception for his victory. Kramer trailed Clark the entire distance and could not beat Jackie down the home stretch.

On the following Wednesday there was a different story to tell; the old master came back and led Clark to the finish in the one mile open. Kramer also won the three mile handicap and in this event Clark did not figure. Kramer led Clark to the tape by a half length in the mile race.

On Saturday night, September 12, Clark proved easy "pickins" for Kramer in a match race at Madison Square Garden. Kramer defeated the "rocket" in two straight heats, the first at a half-mile and the second at one mile.

Dispels All Doubt

Kramer rode one of the finest races of his career on Sunday afternoon, September 13, and whatever doubt existed as to the superiority of Kramer over any of the other riders, whether from home or foreign climes, was completely dispelled. Kramer won the one mile national championship race in one of the most sensational finishes and with one of the greatest bursts of speed that was ever seen in Newark.

The rider most signally defeated in this race was Jackie Clark, the little Australian. Kramer up to this time had defeated Clark in an open race and a match race and here once again he demonstrated his superiority.

WALTER BARDGETT
He Captured Second Place in the 1908 Championship Series

Clark made his bid in the mile championship race a lap and one-half from home and went to the front. Kramer knew that it was up to him to stick close and he surely did. Finally when the bell clanged, Kramer started a fight on the first turn and, with the old-time Kramer jump, which has made him so famous in the cycling game on two continents, he shot out past the others. Before the last turn was reached Kramer was in the lead and he won the race in a brilliant finish. His burst of speed shown on the back stretch has often been said to be one of the greatest bits of racing of his career.

Kramer got a tremendous hand and a big floral horse shoe for his victory. The presentation of the horseshoe of flowers was made by Miss May Warshaw, of Vailsburg, a little girl of three years, attired in white and pink. Kramer disregarded the large crowd present and leaned over and kissed the little miss on the cheek. Some say that this was the first time Kramer ever kissed a pretty miss. Kramer just blushes and smiles when now asked if this is so.

Gets Five More Points

But getting away from kisses. Norman Anderson with a burst of speed nipped Clark at the finish mark and Walter Bardgett finished fourth. It was a wonderful finish all around.

On the following Sunday Kramer clinched the national championship when he crossed the tape a winner, amid thunderous applause, in the five-mile titular race and added five more points to his count in the championship. Clark, due to injuries received the Saturday previous at Madison Square Garden, was unable to start. Joe Fogler finished second, Walter Bardgett was third and Norman Anderson fourth.

On the night that Clark was injured, McFarland and Downing won the two-hour-a-day six-day race which finished up in the Garden. Kramer and John Bedell finished second while Lawson and Clark were third.

On Tuesday night, September 22, Kramer scored an easy win over Henri Mayer, the German champion, in a special match race at Madison Square Garden. The German rider had every opportunity to win but he was clearly outgeneraled in both heats. The first at a half-mile and the second at one mile.

The next Sunday, Kramer defeated Clark in a match race at Vailsburg practically as easy as he had defeated the German rider in New York. Kramer rode from the rear both times and just rode around Clark to victory.

The first of the national championship races of the season was run at Madison Square Garden, on Monday, June 29. It was a half mile affair. He was grouped with Fogler, Bardgett and Rupprecht in the final and won handily.

On Wednesday, July 8, Kramer won the five-mile lap race by inches. He

C. R. C. A. MEMBERS GATHER AT ANNUAL BANQUET

At the Banquet of the Century Road Club Association Held in New York on March 25

NEW YORK, N. Y., March 28.—The sixteenth annual banquet of the Century Road Club Association was held last Saturday evening, March 25, at the Broadway Central Hotel, in this city. Seventy-five members and their friends formed a genial company that enjoyed the entire program.

The master of ceremonies was Mr. Paul Thomas, president of the association, who after distributing the souvenirs to the ladies and passing around the "smokes," called upon the prominent cycling men present for brief talks. Among those who addressed the diners were Harry A. Gleisman, eastern representative of the Miami Cycle & Manufacturing Co.; Emile E. Fraysee, president of the Century Road Club of America; D. J. McIntyre, president of the Inter-Club League; Sylvain Segal, national secretary of the C. R. C. A.

National prizes—cups, medals and certificates of merit—were then given out, after which the floor was cleared for dancing. The following received prizes:

National Century and Mileage Competition: F. M. Sanborn, gold medal; W. M. Winquist, silver medal; Sylvain Segal, bronze medal.

New York Division Century and Mileage Competition: F. M. Sanborn, gold medal.

National Membership Contest: Isidore Taub, bronze statue.

W. F. Thompson, 500-Mile Record Trophy: F. M. Sanborn; time, 51 hours.

Mitchell First Century Trophy: Won by E. Kuno.

New Year's Race Cup: Edwin Jensen.

Miscellaneous New York Division Contests: Membership Competition—Isidore Taub, gold medal; Louis Zemo, silver medal; Sylvain Segal, bronze medal. Weekly Point Races—Edwin Jensen, gold medal; Raymond Caldwell, silver medal; George Harvey, bronze medal. Annual Championship Races—Edwin Jensen, gold medal; Nelson Johnson, silver medal; John Marquart, bronze medal.

---

id Fogler choked off Bardgett at the pe. The next day Kramer and Fogler ere summoned before the National ycling Association and told to cut out e teaming.

John Bedell beat out Kramer by inches in a twenty-five-mile open race at Vailsburg on the first Sunday in August. Only inches separated the first three riders over the tape. Joe Fogler crossed the tape first but was disqualified for taking the pole from the inside. Walter Bardgett got third place and Eddie Root was fourth.

The curtain was rung down on the season of 1908 on Sunday, November 1. Jackie Clark and Floyd McFarland lowered the colors of Frank Kramer and Joe Fogler in two straight heats of a one-mile team match race.

(To be continued)

BIKE DAY AGAIN POSTPONED

SAN FRANCISCO, Cal., March 28.—The Bay City's Bicycle Day has again been postponed, because of inclement weather. In spite of these postponements, however, interest in the events which will be staged continues to grow greater every day. It is not known definitely now just when Bicycle Day will be observed, but the dates will probably be April 2 or 9.

"BLUE STREAK DAY"

AKRON, O., March 28.—Enthused by the huge success of Bicycle Day, the Goodyear Tire & Rubber Company has set aside May 3, as "Blue Streak Day," when some novel events will be staged by Goodyear branches throughout the country to boost the bicycle and "Blue Streak" tires. The nature of these plans has not been announced yet; but, as one of the Goodyear men said, it's going to be "something very unusual."

SALES FREQUENT IN COLUMBUS

COLUMBUS, O.—Bicycle dealers in this city all are speaking of a marked revival in bicycling in and around Columbus. Sales are more frequent and many of the wage-earners are resorting to bicycles as a means of getting to and from work.

LETTER BOOSTS BICYCLE AS DELIVERY VEHICLE

NASHVILLE, Tenn.—R. M. Eberhardt, president of the R. M. Eberhardt Co., bicycle dealers at 69 Bridge avenue, this city, is sending out a snappy letter to all merchants in this city and surrounding towns regarding the superiority of the bicycle as a delivery vehicle. The letter follows:

"Mr. Merchant:—Are your delivering expenses costing you too much—are you trying to cut them down—or do you ever think about that? If so this letter ought to appeal to you. Just sit down for a minute, and figure what it cost to send a twenty-five or fifty cent order a half mile or perhaps a mile, if you are using an auto or horse and wagon, don't you think you could deliver it cheaper by using a bicycle? We know you could—that is the reason we are sending you this letter.

"Some people have the idea that the bicycle is a toy and is only made for boys and girls to have a good time with, but they are mistaken, for a bicycle can be made as useful as an auto or horse and wagon and cost less to keep it up. We don't ask you to take our word for it; just call up some of your friends who are using bicycles for delivery purposes, and ask them what they think of them for delivering.

"If this letter interests you at all, call Main 1884, and let us come out and explain, or if you are using a bicycle we would appreciate a trial on your repair work.

"Hoping you will give this letter a few minutes' thought, we beg to remain."

COMMERCIAL BIKES HIS SPECIALTY

HENDERSON, Ky., March 27.—James Noble, manager of the new Indian store opened here by Henry F. Pardon, the Owensboro dealer, is featuring Arrow, Indian and Rollfast bicycles, and is specializing on bicycles for merchant's delivery.

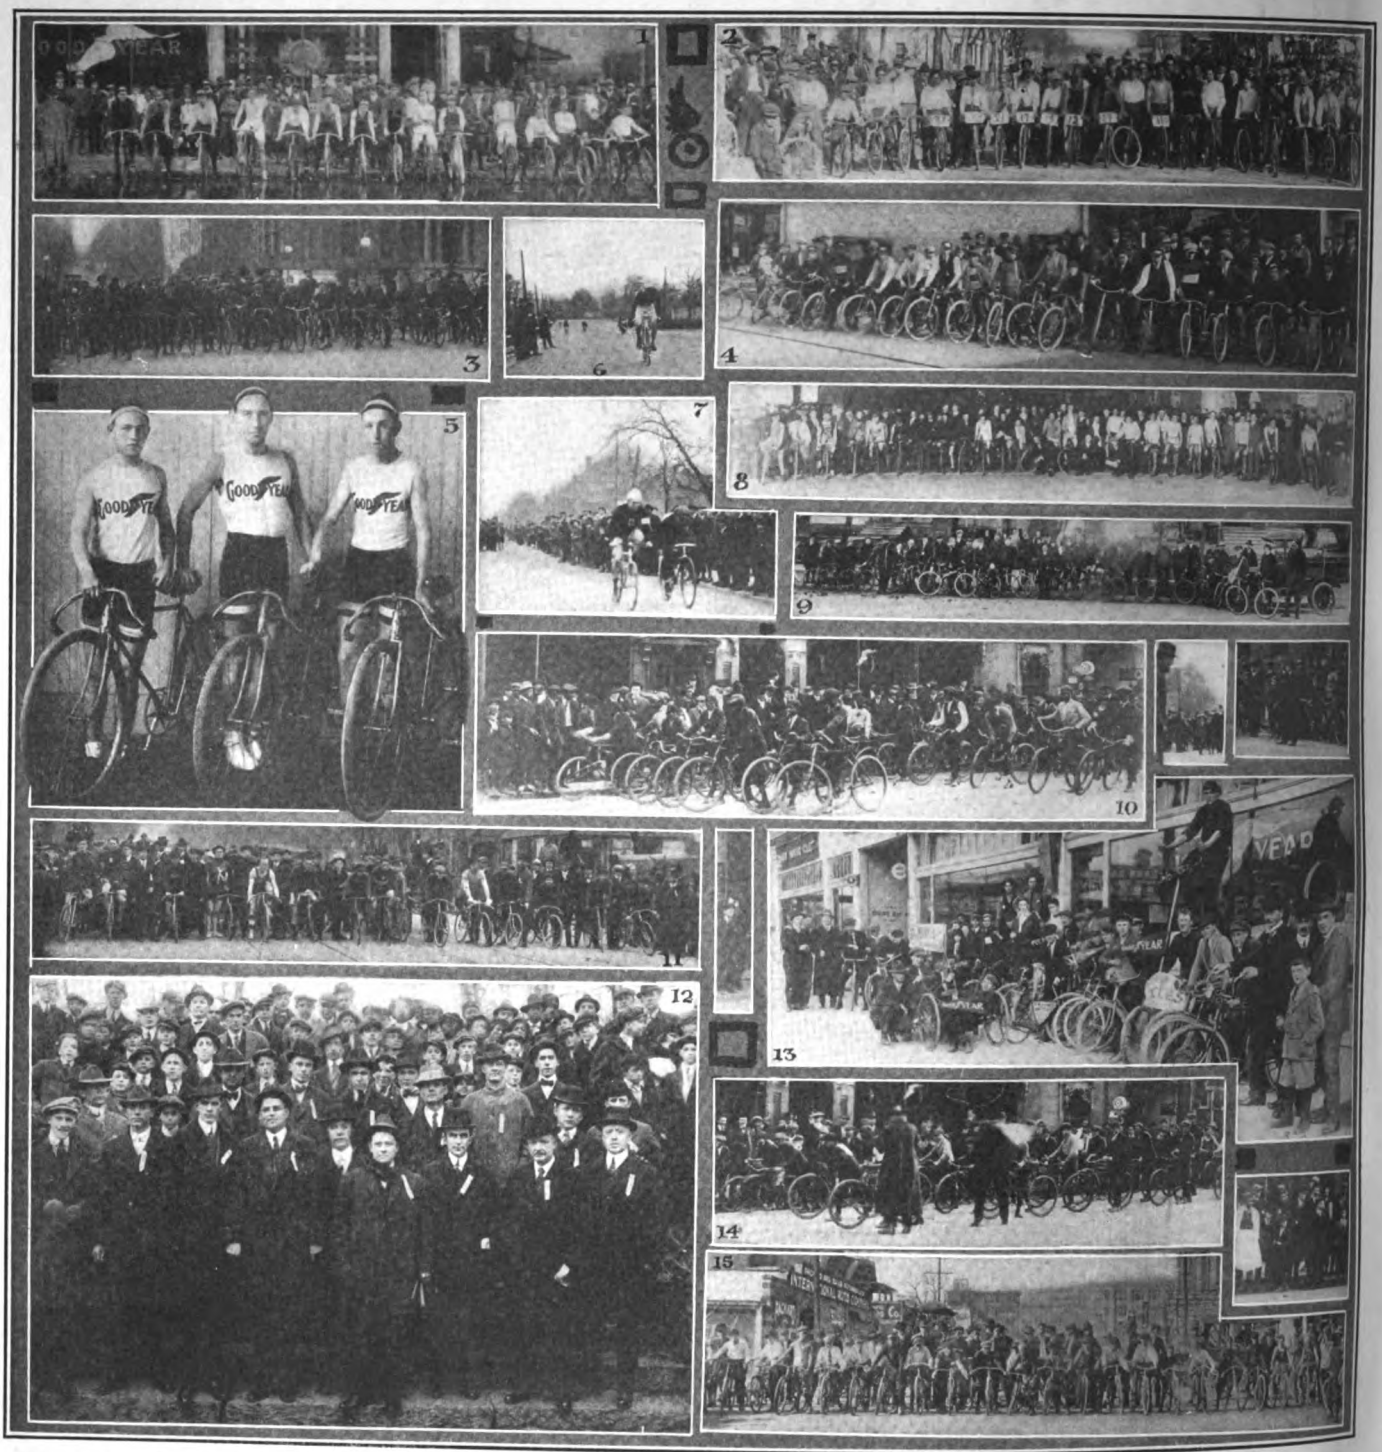
BICYCLE RACES STAGED BY GOODYEAR COMPANY



EVIDENCES of the widespread interest aroused by Bicycle Day are still being received, and perhaps one of the most impressive proofs of the constructive work accomplished in the southern and western states are the photos shown in the above layout. These pictures illustrate the races which were staged by various local branches of the Goodyear Tire & Rubber Company on Bicycle Day.

It was originally intended to hold sixteen races, but unfavorable weather conditions cut this number down to eleven. Local dealers were invited to co-operate in making these events a success, and in some instances city officials also gave their support Three prizes were hung up by the Goodyear company for each of the eleven races.

In addition to staging races, the Goodyear company set up special bicycle window displays in all of its 65 branches, and appropriate posters were mailed broadcast to dealers.

The Photos Described

Descriptions of the photos shown above follow: 1—Jacksonville race; 2—San Antonio race; 3—Baltimore race; 4—Dallas race; 5—San Francisco home trainer riders; 6-7—Finishes in Birmingham race; 8—San Diego race; 9—Oklahoma City race; 10—Charlotte race for colored boys; 11—Birmingham race; 12—Birmingham officials; 13—Oakland race; 14—Charlotte race; 15—El Paso race.

Needless to say, the races have started many local booms.

HARVEY WINS FINAL U. S. I. HOME TRAINER RACE

NEW YORK, N. Y., Mar. 28.—The final weekly home trainer race of the Unione Sportiva Italiana was held at its clubhouse last Thursday evening. The affair was run off in match style, two preliminary heats and a final, each being at a distance of one mile. George Harvey was the winner, covering the mile in the excellent time of 1:21⅕. Summaries:

HEATS.

Winner.	Time.
1. C. Zoccola—C. Buscaglia	1:24⅗
2. G. Harvey—J. Mossati	1:29⅗

Two More Popular Treads of the

Rollfast

TRADE MARK

Line

The ROLLFAST line is a remarkably complete one. When you become the exclusive ROLLFAST dealer in your town you have a line to be proud of.

ROLLFAST is the best known line of tires in the country. It is becoming a standard of comparison. When some article is particularly good and sells well, the dealer calls it a "ROLLFAST."

The two tires shown here are strictly new and very handsome and efficient treads. The tire on the left is made of red rubber throughout, with **real automobile tire fabric.** It is handsome, skidless and remarkably resilient and enduring.

The tread on the right has wonderful riding properties, combining resiliency with just the proper amount of suction grip to hold the road, and without retarding the wheel-turn, as is common with deeply cut suction treads.

REMEMBER THE ROLLFAST AGENCY BRINGS WITH IT THE EXCLUSIVE SELLING PRIVILEGE FOR YOUR SECTION. ACT TODAY. WRITE TO YOUR NEAREST DISTRIBUTOR.

BEING ON THE JOB BOOMED HIS BUSINESS

From His Start as Cycle Agent in High-Wheeler Days, Charles Hanson, of Kansas City, Has Closely Applied Himself to Bettering His Trade and Developed a Big Indian Following

By R. FRANKLIN MUNDORFF

THIRD IN A SERIES OF SUCCESS STORIES ABOUT DEALERS

IF WE can consider success in the motorcycle business to be building it up and faithfully devoting the entire time to serving satisfied customers; to investing a good part of the profits in bettering the service and keeping on doing these things, year in and year out, then Charles Hanson, the Indian agent in Kansas City, Mo., has achieved success, for these things he has done. He is a believer in the square deal for everybody and in the raising of standards of shop and salesroom.

Charles Hanson is one of Kansas City's pioneer machinists as well as a veteran cyclist. He came to that city early in its history and worked as a mechanic, then took to the bicycle business. In this line, he worked as a mechanic for a now defunct cycle shop, but saved his money religiously and soon opened his own bicycle salesroom and repair shop at 1406 Grand avenue.

In High-Wheeler Days

At that time the "ordinary" or high-wheeler was still in use to a certain extent, and progress in the bicycle business was only in its infancy. Hanson had the agency for the Tribune, National, Viking, Racycle and Pierce wheels in 1894. By close application to business, he made a quick success of it. The first few years were hard sledding and while Hanson was busy in the shop, Mrs. Hanson took care of the salesroom.

When the bicycle boom struck Kansas City, it found Hanson and his two competitors prepared to handle the rush of business. Within a period of eight months there were 51 bicycle shops in the city. Bicycles were sold from barbershops, poolrooms, saloons, drugstores, grocery shops and clothing stores. The result was that the flood of wheels was terrific; everybody in Kansas City rode a bicycle. Then came the crash.

The Veterans Survive

At the end of that memorable year, the three original bicycle shops alone survived the shock. "There was very little business the next few years to follow," said Hanson, reflectively, "but we managed to stick through it doing only a small amount of repairing."

When his son, Albert, was but twenty-seven months old, Hanson set about to construct a bicycle for him and to teach him how to ride it. Albert is now in charge of the parts department of his father's Indian agency and is an enthusiastic motorcycle devotee. He was formerly employed as manager of the parts department of the Kansas City branch of the Hendee Mfg. Co., joining the force at his father's store when the Wigwam abolished its branch there.

Boosting Amateur Racing

A bicycle track was built where old Electric Park now stands and Hanson devoted a great deal of his attention to the amateur races that were run there on Sundays and holidays. "The track created an interest in the racing models of bicycles and business in this line became very good for a while," said Hanson. In 1900, Hanson annexed the agency for Columbia motorcycles to his bicycle business. Next year, however, he dropped the Columbia and took the Indian, which he has continued to hold ever since.

Hanson brought one of the first Indians produced to Kansas City, the number on the machine being 251. The business and interest in motorcycles continued to increase rapidly, and in 1907 he was forced to drop the bicycle business because of lack of floor space for the increasing motorcycle business.

The Second Carload in a Month!

Here is Motorcycle History

For assurance of prompt attention to your wants mention MOTOR CYCLE ILLUSTRATED.

Digitized by Google

[illegible] of Los Angeles exactly 17 days to sell his first carload of Cleveland Light Motorcycles *at retail*. He telegraphed his order for another carload of 75 machines, and they were shipped *immediately*. THEY ARE ALREADY SOLD! All in less than a month! A third carload is in transit.

Can anyone connected with the motorcycle industry recall in his entire experience, a circumstance as epoch-making, a sales-record as gripping, as that of the CLEVELAND?

What is the answer? It means that the CLEVELAND LIGHT MOTORCYCLE *is what the public wants*—that its lightness, its grace, its mechanical perfection, its wonderful silence and ease of handling, have placed it in a dominating sales-position. It is THE Light Motorcycle—and the public knows it.

Are YOU Ready to take orders for the Cleveland? Note we do not say "sell"—for the Cleveland sells itself—you do nothing but take the orders. Write for our dealers proposition.

BEING ON THE JOB BOOMED HANSON'S BUSINESS

(Continued from Page 41)

In 1913, Hanson was forced to move to larger quarters at 1421 Grand avenue to get enough room to handle his motorcycle trade. He took on bicycles once more in 1915, signing up for the Indian line when it appeared.

These are Hanson's means of ensuring success: Turning a portion of the profits back to better the business and service; taking every advantage of opportunities to advertise and to advertise extensively; promoting weekly trips in good weather; giving an annual chicken dinner with a good run into the country to the customers; making friends of each and every customer and giving him a square deal, and keeping the standards of shop and service ever advancing. "To these I might add not to look for big profits," says Hanson, "and these will multiply with the number of customers. Lastly, to read the trade journals, thus keeping in touch with the industry and its movements."

Five Men on Staff

Hanson's business is such that he has five men constantly employed. Ross Landes is in charge of the sales of motorcycles; Grant Kinnel is in control of demonstrations and teaching novices to ride; Albert Hanson has charge of the parts department and Frank Archer has charge of repairs. The Hanson store is large and well appointed. The rear of the building is given over to the repair shop, while the front is occupied by the salesroom. In one corner of the salesroom are the parts cabinet and showcases for accessories as well as Hanson's office. Directly opposite is the space given over to used machines. In the basement are stored crated machines and goods held in reserve.

ERWIN G. BAKER STIRRED HAWAIIAN ISLANDERS

BAKER'S ride around the island of Oahu on his homeward bound trip from Australia aroused great enthusiasm among the Hawaiian Islanders. The distance around, following the shore line, is 89.6 miles, and Baker's time was two hours, four minutes and 36 seconds. This is 23 minutes and 24 seconds faster than the previous record held by Frank Taveras, a well-known local rider.

There had been heavy rains a day or two before his ride and the roads were cut up into chuck-holes and with many boulders standing out for the rider to dodge. When Baker could let out he averaged 78 miles an hour with his Powerplus.

The ride was arranged by E. O. Hall & Son, the Hawaiian Island Indian distributors, and they had several leading citizens and Captain Baker of the police to act as judges. The start and finish were in front of the Advertiser newspaper office. The island people, knowing the local conditions, think that this ride of Baker's makes him one of the greatest motorcyclists in the world.

DETROIT DEALERS PLAN RACE MEETS.

DETROIT, Mich.—The Detroit Motorcycle Dealers' Association has made definite plans to promote a series of five race meets for the 1916 season, the dates for which are as follows: May 14, June 25, August 13, September 17, October 8. Arrangements have been made so that several official State Championship events will be run, both professional and amateur. All events will be under F. A. M. sanction.

The track used will be the Detroit oval, on which fine time has been made in the past, and therefore it is believed that some fast company will participate in the meets. The first race, on May 14, will have 5, 10, 15 and 100-mile events and a purse of $400 will be awarded to the winners.

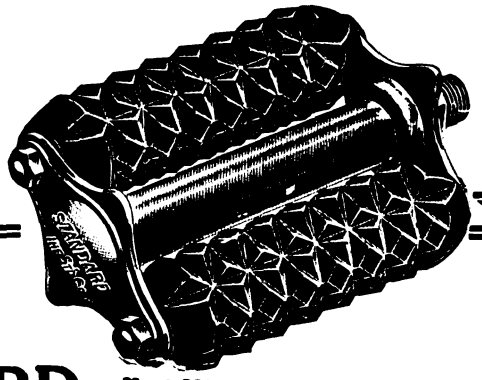
The officers of the association are: J. B. Trossel, secretary, and Joseph Adcock, treasurer. The chairman is appointed at each meeting.

LUCKY SATURDAY FOR KLAPP

LOS ANGELES, Cal., Mar. 14.—Five important sales before noon on Saturday, Mar. 5, gave George A. Klapp, of the California Henderson Motorcycle Sales Corporation, plenty of reinforcement for his usual state of optimism. One of the sales was a Pope lightweight, which was bought by a man who intends to use it for business purposes. The four Hendersons were sold to the following prominent concerns: L. A. Gas & Electric Corporation, Standard Oil Company the Fairchild, Gilmore and Wilton Company, contractors, and the Los Angeles Times. These concerns buy the machines and sell them to their employees on the instalment plan provided the motorcycles are used on company business.

NEW HARLEY-DAVIDSON AGENTS

MARYSVILLE, Cal., Mar. 20.—Mayo and Easterbook have formed a partnership and opened an exclusive motorcycle store, having taken on the local agency for the Harley-Davidson. Motorcycles have formerly been handled in this city only as a side line, but as the new firm is composed of live wires who fitted out an attractive store it is expected that they will meet with considerable success.



No. 3 MOTORCYCLE PEDAL

No. 3 STANDARD MOTORCYCLE PEDALS

Our products comprise:

Diamond "E" trade mark brand Spokes and Nipples for Bicycles, Motorcycles, Tricycles, Velocipedes, Invalid Chairs, Sulkies, Carriages, Cyclecars and Automobiles. Pedals for Bicycles, Tricycles, Velocipedes and Motorcycles. Toe Clips for Bicycle Pedals. Emergency Axles for Pedals. Screw Machine Products.

When you buy a motorcycle, make sure that it is equipped with STANDARD PEDALS.

Most manufacturers have reasoned out that "STANDARD" EQUIPMENT means increased value on the machine.

STANDARD PEDALS are big, roomy, soft and minimize the shocks. Deeply corrugated to insure positive foot grip. Insist upon STANDARD EQUIPMENT.

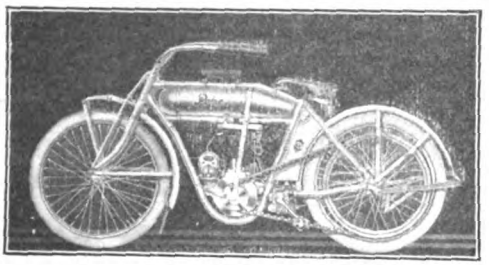
Prospects That Pass Your Door

When the factories, the stores, the public utility companies—in fact, all the places in your town where men are employed—let out at night, a stream of prospective customers flows past your door.

Hundreds of employes take their long trip homeward on foot, in cars, and in trains, when they could be riding motorcycles.

With high-priced, heavy machines in mind, you may not have thought of them as motorcycle prospects—but they are, nearly every one of them—and you'll find it easy to convince them that they need a



Pope

Lightweight

They've read about, and heard about this dependable, ever-popular motorcycle that goes so far at such little cost—that is so simple to operate and keep in perfect shape—that has power enough to climb any ordinary hill—and has all the speed most people desire (from 5 to 45 miles an hour).

It's up to you to see that this stream of prospective customers comes through your door instead of past it—to bring home to them the fact that in its saving of health, carfares and time the Pope Lightweight quickly repays its first low cost of $150.00.

Do this by displaying—and pushing—a stock of Pope Lightweights. There's good profit in it for you. The field for the sale of lightweights is almost unlimited, and the demand for this most popular lightweight in America is greater this year than ever.

Before you are an hour older, write for our catalog and dealers' prices—you'll find them interesting.

Model H-16 Price $150.00

TRENTON, N. J.

R. S. WOODS, manager of the Motorcycle Exchange, has signed up to represent the Henderson in this city for 1916. Woods expects his initial shipment to arrive in a few days and already has his demonstrator on the road.

"I believe the increased price will hardly have any influence on my business," says Woods, "as riders want this kind of machine and are willing to pay what we ask. They realize that the cost of labor and materials has gone up considerably and that a higher price is necessary to maintain the Henderson quality. Business is going to be fine in Trenton this season and I have a bunch of riders on my books for March delivery already."

FAIRBURY, ILL.

JOHN L. PURDUM, handling the Indian in this city, states that there is one motorcycle for every six inhabitants in the city. "There are 400 machines in service here today," says Purdum, "and a good part of them are Indians. The number, which is surely a huge proportion with regard to the population of the place, has been made possible by the active co-operation of Fairbury dealers."

COLUMBUS, O.

WOODLAND AVENUE CYCLE CO., of which Arthur Machanic is proprietor, has moved from 2707 Woodland avenue to 2939 Woodland avenue. By the move, the firm gets a corner store with larger floor area and more window space. The distribution rights for the Reading Standard and Pope motorcycles for Cuyahoga County are held.

Business has improved to such an extent following the move that several new men have already been put to work. The firm handles bicycles and supplies also.

WASHINGTON, D. C.

HOWARD A. FRENCH & COMPANY, Indian agents at Washington, D. C., report that the Indian featherweight motorcycle sold by them to Browning & Middletown, wholesale grocers of Washington, D. C., for the use of one of their salesmen, has proven so successful that the firm will shortly equip its entire force of 15 salesmen with these machines. The salesman who made the test reported that with the aid of the machine he was able to cover two and one-half times the territory formerly covered at a cost of only 10 per cent. of his former transportation expenses.

DETROIT, MICH.

HARRY SVENSGAARD, of the Harry Svensgaard Sales Corporation, has found it necessary to employ a salesman speaking a number of foreign languages, so great has been the call for Cyclemotors among this city's foreign-born population. In all, 200 Cyclemotors have been sold up to March 20, and another shipment is looked for this week. Sales of bicycles have broken all previous records, partly on account of the Cyclemotor.

W. E. WANDERSEE CO., local handlers of the Harley-Davidson, has done over 300 per cent. more business to date than during the corresponding period in 1915. Manager Roscoe Brown is awaiting the second carload shipment from Milwaukee this week, and states that a goodly part of the load will not be more than two days out of the crate before being taken by the owners.

The EDISON Motorcycle Special Alkaline (Non-Acid) Storage Battery for Lighting and Ignition

CITY OF NEW YORK
POLICE DEPARTMENT

Office of the Fourth Deputy Commissioner

January 18, 1916.

Edison Storage Battery Co.,
Attention of Mr. H. G. Thompson,
Vice Prest. & Gen. Sales Manager,
Orange, New Jersey.

Gentlemen:

In reply to your communication of the 8th instant, inquiring as to our experience with the Edison Battery in use on the motorcycles of this department, I desire to say that the original installation of forty-five sets of Edison Storage Batteries have been in continual operation on the Indian motorcycles of this department for the past six months.

The use of these batteries has proven very satisfactory, as they have required a minimum of care and attention. The six months of actual service I believe has demonstrated that they are both satisfactory and economical for use in connection with the lighting system on motorcycles.

Very truly yours,

E. P. Daniel

M/E

Fourth Deputy Commissioner.

HARD PLUGGING BROUGHT GOTLIEB ON TOP

Strict Attention to Business and a Square Deal to All Built Up Big Bicycle Jobbing Trade for Head of City Supply Co., of New York

WHAT the results of a tenacity of purpose, strict attention to business and the following of intelligent merchandising methods will be is demonstrated by the career of David Gotlieb, proprietor of the City Supply Co., of 56 Warren street, New York, one of the largest bicycle jobbing houses in the trade. Mr. Gotlieb commenced business in 1902, renting his present store to sell cigars, but in the course of a season or two took on talking machines and finally bicycles. Shortly after taking the pedal cycles, his progressive business methods increased his trade to such an extent that he threw out the cigars and phonographs and became a bicycle man exclusively.

Things grew so that in 1908 he decided to become a jobber and started in. Things went hard for him at first, for retailers and manufacturers thought that there were jobbers enough in these parts and withheld their trade. But Gotlieb went right ahead and fought for five years, building up the business steadily. Since 1914 he has held a major position in the cycle trade, and in 1915 transacted business to the extent of over $250,000. Part of this was for 4,000 bicycles.

The City Supply Co. has four road men out to-day and employs eight clerks, three bookkeepers and two stenographers to care for the wants of the numerous dealers who are now its sole customers, as well as for filling and shipping orders. For 1916 the floor space has been increased by a loft, which has already effected an improvement in the service.

Recognizing the value of having absolute control of a reasonable territory for a standard make of bicycle, Gotlieb has taken the Hudson line, the product of the Miami Cycle & Mfg. Co., of Middletown, O., for 1916. With his characteristic push, he has already established no less than 75 agencies in his territory, which includes Greater New York, Long Island, Westchester and Rockland counties and the whole State of New Jersey. These agencies are as follows:

David Gotlieb

C. Filipo, Rye; N. Iaccino, New Rochelle; International Cycle Works, Mt. Vernon; Westchester Motorcycle Exchange, White Plains; Horn & McCracken, College Point; Jos. Mayer, Sayville; H. C. Tooker, Southampton; C. H. Thomas, Easthampton; T. C. Kiefer, New Hyde Park; A. H. Lank, Hicksville; T. Nielsen, Roslyn; Ned Morris, Jamaica; C. B. Satterlee, Patchogue; N. Rose, Flushing; E. W. Eddy, Glen Cove; C. Nielsen, Oyster Bay; Freeport Sporting Goods Co., Freeport; M. Friedman, Bayshore; F. O. Ward, Rockville Center; H. B. Smith, Babylon; B. G. Sammis, Huntington; A. N. Basile, Sag Harbor. N. Y.

In New York City, Stern Bros., H. Hugger, J. Smith, W. Marcowitz, G. H. Bielefeld, E. Bielefeld, S. Serinedes and M. J. Goldman have signed up. In Brooklyn, the Hudson is represented by Charles M. Hart, M. Liffschutz, George Uniss, J. Treibus, S. Slotnick, Ashley Sporting Goods Co., S. G. Ross, Kingston Hardware Co., M. Friedman, B. Robbins, S. Litman and P. Mishel. Max Adler handles the Hudson in Stapleton, S. I.

In New Jersey the agents signed up include S. Kessler, Bergenfield; S. Marks, Brick Church; Central Cycle Co., Bound Brook, and J. W. Terhune, Hackensack.

THE MIAMI CYCLE & MFG. CO. Middletown, Ohio

GLIESMAN SIGNS UP MANY AGENTS ON FIRST TRIP

HARRY A. GLIESMAN, traveler for the Miami Cycle & Mfg. Co., of Middletown, O., has just returned from his first season's trip over his territory with full order books. He has covered New Jersey, Delaware, Maryland, Virginia, Long Island, Greater New York and Rockland and Westchester counties, New York, in the interests of the Hudson line of bicycles, a leader in the Miami products, and has made a total sales of 1,792 Hudsons. "This beats the 1915 figures in my district by exactly 1,685 machines," says Gliesman, "and is some big jump."

Gliesman stated with regard to this territory that it had been neglected by the former distributors for some years and he went out to "recover it" for 1916. He found that dealers are more and more appreciating the value of standard bicycles and exclusive representation for the same in their districts. He had no difficulty in signing them up, especially when he pointed out the advantages of being assisted in their sales efforts by catalogs and other advertising material by the manufacturer.

New York Sales

While in Greater New York Gliesman sold a number of Hudsons to the Police Department and some to the Street Cleaning Department. He had two teams in the ast six-day race in Madison Square Garlen mounted on Hudsons, and this paved he way for placing a distributing agency or the line for New York, Long Island and New Jersey with the City Supply Co. of 56 Warren street. The initial order from this firm was 1,500 Hudsons and it has since been increased to 1,800.

Gliesman has signed up the following agents in Maryland: Baltimore Cycle Co., Baltimore; A. H. Wilson, Annapolis; H. E. Lambert, Hagerstown; H. W. Shenk, Cumberland; C. W. Bunting, Pocomoke; G. H. Hayman, Princess Anne, and A. C. Blades, Crisfield. In Virginia the following have taken Hudson representation: Hamilton-Cook Co., Waynesboro; Auto Tire Co., Charlottesville; W. H. Langham, Buena Vista; E. T. Munger, Roanoke; D. W. Branch, Petersburg; Brothers Pruden Co., Suffolk; W. N. White, Portsmouth; A. Goodrich, Norfolk; W. T. Cochrane, Hampton; Lenz Cycle Co., Newport News; J. Bickerstaff & Sons, Richmond; Interstate Hardware Co., Bristol; Adkins Hardware Co., Lynchburg, and the Onancock Supply Co., Onancock.

F. D. Hazelton has signed up in Washington, D. C., and R. H. Stout in Wilmington, Del. In Atlantic City, N. J., Frank P. Cravatt has taken the Hudson agency.

Besides Hudsons, Gliesman sells Racycles, Flying Merkel and Miami bicycles, Miami power bicycles, Flying Merkel motorcycles and the Musselman coaster brake, all made by the Miami firm. He states that the factory is working day and night with full force, but owing to difficulties in getting material it has approximately orders for 20,000 bicycles still to make before it can announce "even with the board."

LIGHTWEIGHT POPULAR IN NORTHERN CALIFORNIA

SAN FRANCISCO.—Edwin F. Merry, the San Francisco jobber who handles the Excelsior, was a pioneer in advocating the lightweight and is now reaping the reward of his foresight. He stated to the representative of **Motor Cycle Illustrated** that business already has fulfilled his prophesy. He sold the first carload of Excelsior lightweights almost immediately and the second carload is moving fast. A big advantage to the dealer is that these machines go into the hands of people who not only did not ride a motorcycle before, but were antagonistic to the high-powered machine. They take to the lightweight because it is quiet, economical and easy to handle. This feature enlarges the scope of the dealer's business and brings new blood in as buyers, giving the jobber and dealer a greatly broadened market.

Merry says the Excelsior big-valve is being taken hold of in great shape in the northern half of the state. Dealers are even paying special freight rates to get machines at the earliest possible date.

BRIGNOLI FORMS A CLUB

HOBOKEN, N. J.—Peter Brignoli, representing the Pope in this city, has just organized the Hoboken Motor and Cycle Club. This club is confined to riders of Pope motorcycles and Pope-made bicycles. The clubrooms are over Brignoli's store and are fitted with a pool table and other means of amusement.

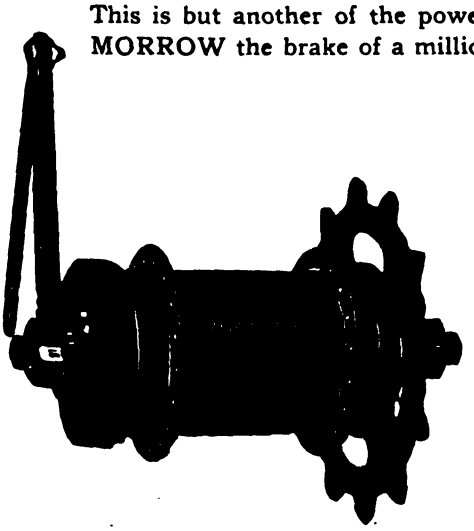
Here's another striking feature of the MORROW Coaster Brake. It has the largest and most efficient braking surface of any brake made.

The interior expanding sleeve of spring steel, with a bronze outer lining, being equally expanded from both ends *along the entire centre of the hub shell* insures an *even pull* on all spokes when pressure is applied. There is no side-pull on MORROW equipped bicycles—this means a total absence of loose spokes.

Morrow Coaster Brake

"The Brake That Cancels Danger"

This is but another of the powerful MORROW features that have resulted in making the MORROW the brake of a million riders.



Thus, with the MORROW for coasting and riding ease and safety, and the "Thief Cheater" on the front hub, the bicycle so equipped becomes a "sale-on-sight" proposition.

Dealers, write for our co-operative literature.

HEAGY BROTHERS OPEN AN AGENCY IN CARLISLE, PA.

CARLISLE, PA., March 22—Heagy Brothers, representing Harley-Davidson in Harrisburg and this city, celebrated the opening of their new agency here yesterday, in the Y. M. C. A. building at 25 West High street. The store was opened at 1 p. m. and closed shortly before midnight and was packed the entire time.

As a souvenir of the occasion a carnation was presented to each visitor to the store. The attendants, led by the Heagys, demonstrated the entire Harley-Davidson line, as well as the other sporting goods handled by the firm. During the evening, orchestral music was provided, and the Keystone M. C. of Harrisburg, came over and paraded the streets. Many of the local riders joined the march, which was conducted in an excellent manner.

Previous to the opening, the Heagys took full page announcements in the leading Cumberland and Dauphin County journals, and sent out letters to all local riders, notifying them of the affair.

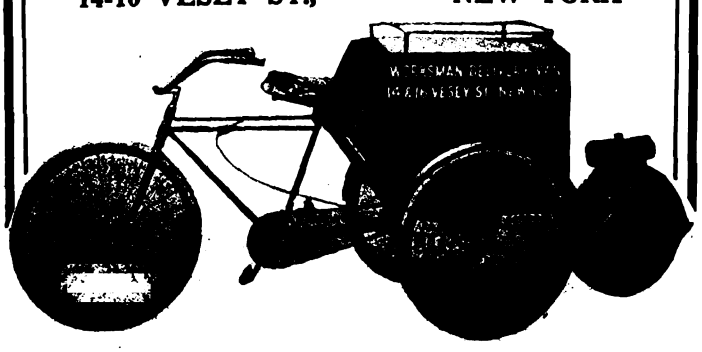
14-16 VESEY ST., NEW YORK



WYANDOTTE, MICH.

THE WYANDOTTE CYCLE CO. has signed up to represent the Henderson in this city. The contract was closed with E. C. Kicherer, who has charge of Henderson distribution in Detroit and vicinity. The Wyandotte firm is planning an active campaign for the Spring and expect to push the sales for Henderson to a very high figure this season.

READING, PA.

GEORGE L. DENGLER, handling the Thor at 710 North Ninth street, tests all 1916 models by riding them to the top of Mount Penn along the steep boulevard. Before the spring thaw sets in, Dengler expects to ride to the top of Point Lookout at Wernersville, a more elevated peak and one up which the road is harder than on Mount Penn.

LOUISVILLE, KY.

MOTORCYCLE DEALERS in this city are awaiting the issuance of a new rule by the City Building Inspector concerning the storing of gasoline in garages and repair shops. It is understood that the new regulation will prohibit storage of gasoline in any shop of frame construction, while additional safeguards will be required on buildings of more substantial character. There are about 100 shops in the city, only a few of which are not in brick buildings.

Mr. Dealer, You Can Say "NO!"

IF the salesman offers you the agency for a motorcycle that has not the name Bosch on its ignition system, you will protect yourself only by decisively and immediately saying "NO."

"A magneto" and "the Bosch Magneto" are very different as means of producing that very vital requirement, Ignition. Bosch Products are all marked with the name Bosch. If you are offered a motorcycle with an unnamed magneto claimed to be made by Bosch, the claim is an untruth; if a magneto "as good as Bosch" is offered you, a wrongful trade on the Bosch Reputation is being attempted. ¶ The ignition of the motorcycle is vital to your success as well as to the motorcycle's—don't chance it when it comes to ignition, for there are plenty of good motorcycles that use Bosch Magnetos—they are sure winners.

Be Satisfied **Specify Bosch**

BRASECKER SOLD MIAMI TRAVELLER'S MACHINE; THEN TOOK AGENCY

PITTSBURH, Pa.—F. R. Brasecker, managing the Indian Equipment Co., has signed up to represent the Miami Power Bicycle for Pittsburgh and vicinity, but the preliminaries to the closing of the contract were decidedly novel. District Sales Manager Ralph Webster and Motor Sales Manager E. F. Gilbert, in company with C. F. Pineau, Miami factory demonstrator, called on Brasecker with a sample machine, after showing off its paces to several dealers in Alleghany. The trio left the sample machine in Brasecker's place while they went to lunch.

While they were away Brasecker took the Power Bicycle out of the store to try it out, but did not get far with it. A man from McKees Rocks stopped him and wanted a ride, which was given him. He then told Brasecker to come over to McKees Rocks with him for the money. Brasecker went along, got the $115, and then returned to meet Pineau at the store and explain matters to him.

In the meantime, Webster and Gilbert went out to East Liberty to see some more dealers and waited for Pineau and the machine. Pretty soon Pineau and Brasecker came along on a big sidecar outfit and explained matters, which ended with Brasecker signing up and ordering six Power Bicycles for immediate delivery. Webster, Gilbert and Pineau never made the demonstrations to the East Liberty dealers, but got a fine distributor in Brasecker instead.

PORTLAND, ORE.

J. W. LONGCOR, otherwise "Jap," has celebrated his ninth year as head of the motorcycle and bicycle department of Ballou & Wright, Indian distributors in the Northwest. Longcor is generally called upon to act as judge or starter when any endurance run or race meet is held in or around Portland. He first entered the bicycle field with Watt Ship, of Salem, Ore., and learned the repair business while with Ship. He came to this city to go with Ballou & Wright.

J. E. Ferland, Live Wire Henderson Dealer in Lawrence, Mass.

UNION HILL, N. J.

BOLLER BROTHERS, local agents for the Indian, are very busy demonstrating the little two-stroke Featherweight as well as the Powerplus twins. Following a recent parade along the Hudson County Boulevard in which the Bollers had the new models out, three sales of Powerplus twins were made and two for the Featherweight. The 1916 season, according to the Bollers, is going to be a pippin.

This Transmission was Designed for *Service*

The Harley-Davidson three-speed sliding gear transmission is built to stand up indefinitely.

The gears are of chrome nickel steel, heat treated by special processes. The main shaft is mounted on big generous ball-bearings—the jack shaft on special high duty roller bearings.

This transmission is absolutely silent in operation.

It is fool proof and trouble proof. It has no small parts to break or wear out. It has nothing to continually tighten up—no adjustments are necessary. Lubrication is the only attention required.

A patented interlocking device makes it impossible to shift gears until the clutch is released, affording no chance of stripping gears.

The Harley-Davidson transmission was designed for hard road service and many thousands of riders in all parts of the world have proved that it renders the kind of service it was built for.

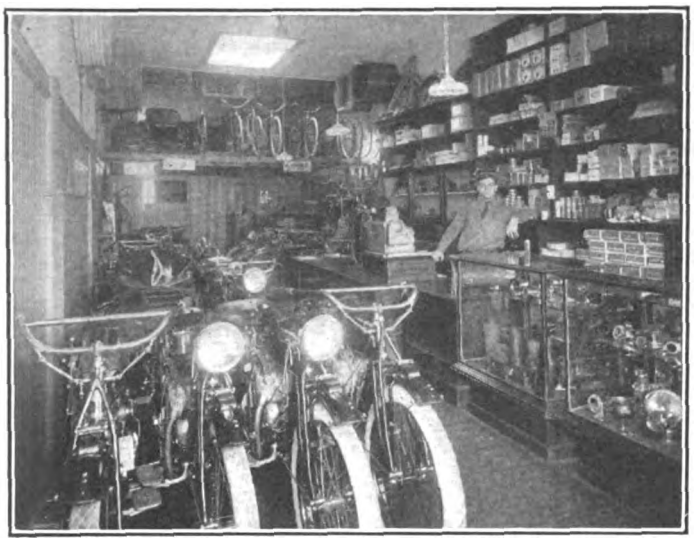
PAWTUCKET CHIEFTAIN CONDUCTS LIVE WIRE ESTABLISHMENT

PAWTUCKET, R. I.—The Motorcycle Supply Co., Inc., of 73 East avenue, this city, is now entering on its fourth year of successful business. Manager Edward A. Lutz has organized things so that the establishment



Interior of Motorcycle Supply Company's Store. Proprietor Lutz Is Standing Behind the Counter

is a model of cleanliness and order. The sales room is located in the front of the building, with the workshop at the rear, access to the latter being along a large driveway to a rear yard of ample capacity to take eight machines with sidecars comfortably. A large stock of Indian parts is always on hand.

The store was opened by Lutz and B. A. Swenson in July, 1912, in order to give better service to the Indian users in Pawtucket and Blackstone Valley, and it has not taken long for the place to get on a paying basis. Lutz is a well-known road rider with a number of victories to his credit, one of these being a perfect score and gold medal in the 1915 Worcester M. C. 24-hour contest. He has competed in sidecar contests on the Taunton and Readville tracks. He now has a team of four road-pluggers who will enter any contest to be held during the season in New England. B. A. Swenson, the "Indian Man," of Providence, is a partner in the company with Lutz.

LANSDALE, PA.

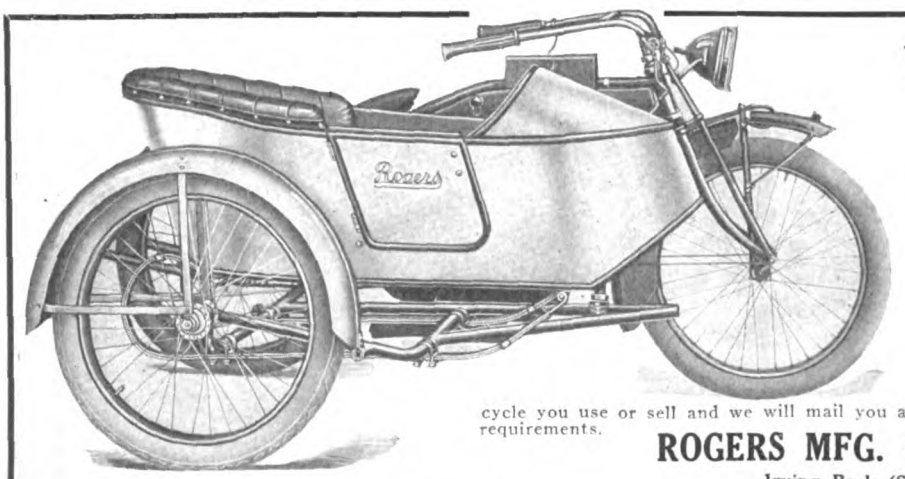
LEROY VOORHEES has taken the local representation for the Henderson in this city. He has received his demonstrator and has got busy in spite of deep snow and icy roads. His list of prospects is a long one, and when the warm weather comes, Voorhees expects to land a bunch of orders.

MAYFIELD, KY.

WYMAN & ANDERSON have taken the agency for the Smith Motor Wheel. They have started a strong advertising campaign in the local press and are going after prospects with a vim. The firm consists of Payne Wyman and Elmer Anderson.

MOLINE, ILL.

OSCAR SAELENS will handle the Henderson in this city as well as in Rock Island and East Moline. He has his demonstrator out and is busy showing the points of the four-cylinder model to prospects.



When You Buy A Rogers

You have a sidecar that fits perfectly the motorcycle you buy it for, and with only the addition of a few inexpensive fittings **will fit equally well any standard motorcycle in the market.**

As a ROGERS SIDECAR is practically everlasting and will outwear any motorcycle ever built it means that you do not have to buy a new car whenever you get a new motorcycle. This feature is of even greater interest to the dealer, as it means that he may carry a stock of ROGERS SIDECARS to match his line of motorcycles and at the same time be able to make immediate delivery to the owner of a motorcycle of other make.

This is but one of the many points of ROGERS superiority. Write stating the make of motorcycle you use or sell and we will mail you a circular fully describing a ROGERS to meet your requirements.

Indianapolis, Indiana

NEW YORK, N. Y.

GUS ROTHOLZ, distributing the Reading Standard in Greater New York and Westchester County, has been busy demonstrating the R-S for sidecar work this last week, in spite of snow and inclement weather. Repair work is keeping Gus' shop busy until late at night, and he has been obliged to utilize all available space in the store at 1493 Fifth avenue, to store machines awaiting overhaul for the Spring season.

"While our main line is motorcycles of course," says Rotholz, "we occasionally get orders for bicycles, generally with Motor Wheels attached. The last outfit of this kind had a Pierce cycle with special equipment for motorwheeling, and was sold to a traveler who covers this city in the interests of an installment house."

MORGANTOWN, W. VA.

THOMAS D. WILLIAMS has signed up with the Henderson Motorcycle Co., of Detroit, Mich., to cover Monongahela County for the Henderson. He has been actively at work with his demonstrator already, around this city, and will be out along the roads of his territory as soon as the weather clears up a bit more.

Attractive Garage of C. W. Eggers, at Garden City, Kan. The Indian Is Handled for Garden City and Vicinity

KANSAS CITY, MO.

E. AMES, Emblem agent in this city, has moved his store and salesroom from East Eighteenth street to Fifteenth street and Prospect avenue. The Ames agency at Brooklyn avenue and Fifteenth street was destroyed by fire several months ago and he then opened temporarily on Eighteenth street.

This location was a very poor one, but did until the move to the modern place now occupied was made. Ames believes that emblem bicycles will be one of the big features of 1916 business at his new store.

NATCHEZ, MISS.

CASSIUS L. TILLMAN, JR., who operates a sporting goods establishment at 109 North Pearl street, has arranged with the Davis Sewing Machine Co., of Dayton, O., to represent the Dayton Motor Bicycle for Adams County.

CALHOUN, GA.

CHARLES W. HUNT has signed up to represent the Dayton Motor Bicycle for this city. The contract was closed by the Alexander-Seewald Co., of Atlanta, distributors for this make.

THE obedient response and ease of handling the four-cylinder Henderson is a vital element in the remarkable success of this machine in overcoming the difficulties of bad roads and unfavorable conditions. It is one of those qualities that are hard to attain, and depends on many factors, but can scarcely be over-valued. Partly by the extremely low center of gravity made possible by the four-cylinder type of motor, partly by the careful distribution of weight between the wheels, partly by scientific frame design and the angle of forks and rocker arms with relation to other members—all combine to produce the perfection that makes the Henderson hug the road so beautifully and steer so steadily at high speeds or on rough and treacherous roads.

YALE MOTORCYCLES

The Consolidated Manufacturing Co.
1730 Fernwood Avenue, Toledo, Ohio

TACOMA, WASH.

THE FULLER MOTORCYCLE & SUPPLY CO., distributing the Henderson, has adopted the following slogan: "This is the best day I ever saw," and it is the desire of Manager Fuller to have this slogan adopted by all the other dealers and motorcycle salesmen. "Keeping this in mind" says Fuller, "will mean increasing sales, not only right away but in the future, as a dealer who feels this will make more friends—and these mean future sales."

GENERAL CYCLE & SUPPLY CO., representing the Excelsior, has had the place cleaned for the Spring season, and many riders think that it looks like a new establishment. The firm maintains day and night service in the repair shop and turns out work in record time. Ray Pentecost, the head motor mechanic, is on the job for long hours each day, looking after the repairs and testing out rebuilt machines.

F. M. BAILEY has recently added the Miami Power bicycle to his line, which consisted of the Smith Motor Wheel and the Pierce bicycles. "People around here used to look at the little side-by-side valve motor in the Miami and then figure that it would only go on the level, but a little climbing in the hills has made them change their ideas some."

RAY DAY, representing the Wigwam products, acted as host to thirty Indian braves who came across on their mounts from Seattle on Sunday. Day is boosting runs of this kind and expects that there will be one each week during the Spring and Summer.

NEW YORK, N. Y.

FELIX LEWIN, manager of the Henderson Motorcycle Co. branch at 227 West 106th street, reports the sale of 53 of the 1916 models of four-cylinder mount to date. "Most of these were two-speed machines and a good proportion of the purchasers got sidecars with them," says Lewin. "We had no anxiety whatsoever about sales when the change in prices was announced, for our prospects have in no case argued over the increase. The sidecar that practically all buy is the Rogers, standard for the Henderson."

Lewin and Charley Drude, his head mechanical man, have been kept pretty busy demonstrating to prospective purchasers, in spite of the occasional cold and snowy weather. Drude will enter the big endurance runs in this section for 1916, in company with Bert Coryell, of Newark, N. J., and Les. Cobban, Jr., of Bronx, N. Y.

KANSAS CITY, MO.

NEWBY BROTHERS, agents for the Thor, Flying Merkel and Henderson motorcycles, have announced that they will move to the southwest corner of Twenty-fourth street and Grand avenue after April 1. They are now located on Nineteenth street and Grand avenue. The business so far has been most excellent in all lines, and in particular with the four-cylinder mounts.

PHILADELPHIA, PA.

I. E. WEISEN, formerly a salesman with the Haverford Cycle Company, Excelsior and Motor Wheel distributors, has opened a motorcycle and bicycle store at 2206 North Broad street under the name of the North Philadelphia Auto & Cycle Supply Company. He will handle the Excelsior.

HOW ROBERTSON CONVERTED SKEPTICAL DEALER TO FEATHERWEIGHT

SPRINGFIELD, Mass.—E. A. Robertson, otherwise "Robbie," who travels Pennsylvania and Virginia for the Hendee Mfg. Co., and who has been a lightweight exponent even before the Indian produced a machine of that type, recently converted a skeptical dealer to the two-stroke light machine. The tale points a moral to dealers who are apt to discount the sales possibilities of the little fellows.

George Maslen, who conducts the Philadelphia tepee, was the skeptic. Maslen could not see the lightweight with a telescope when it was first announced. He was certain that riders of heavyweight machines could never be induced to shift to the little "one-lunger." He was likewise certain that it was going to be an awful, if not impossible, task to create a new class of riders by means of the smaller machine to induce folks who would not consider the big twin to adopt the Featherweight.

On his first proposition, says Robertson, his experience with the lightweight has proved him nearly right—the heavyweight riders who have gotten used to the feel of the high-power motor cannot be considered good live prospects for the little two-stroker. But on the second count he is all wrong.

Following Robertson's suggestion, Maslen began to dig out new prospects. First he tackled the department stores which sell goods on the installment plan and employed a great many collectors. He found that it was comparatively easy to convince them that the Featherweight was just the thing in the shape of a vehicle for getting around town.

Maslen went after salesmen and men employed in similar lines next. He was also successful in this direction. As matters stand now, according to "Robbie," Maslen cannot get enough machines from the factory to care for the demand which he has created for them.

ASSOCIATED PRESS OFFICIAL GETS HIS FIFTH HENDERSON

NEW YORK, March 24.—James A. Mills, secretary to the general superintendent of the Associated Press, has just ordered his fifth Henderson from Manager Felix Lewin, of the local Henderson branch. Mills has bought a Henderson each season since the four-cylinder machine came from the factory in 1912. His latest will be an electrically-equipped two-speed.

The Mills sale is another feather in Lewin's cap for the 1916 season. The genial New York manager sold a two-speed electrically-equipped model to Alfred P. Lane, international champion pistol and revolver shot and Olympic Games victor, a short time ago, in the face of keen competition, and has other well-known men on his list of purchasers.

HARTFORD, WIS.

PETER STEICHEN has taken the agency for the Henderson for this city for 1916. Steichen came to Hartford a short time ago, and seeing a bunch of good motorcycle business in view, he signed up with the Henderson folks and opened a nice shop. He has received his demonstrator, a two-speed model with electrical equipment and Rogers' sidecar.

ILION, N. Y.

EMERY A. SMITH, of 391 Otsego street, has signed up for the Dayton Motor Bicycle and has received his demonstrator. He is using the front-wheel drive machine to good effect and has sold machines several customers and obtained a good list of prospects.

THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS

Fogarty Says

MR. J. P. FOGARTY, Secretary and General Manager of the Westfield Manufacturing Company, where America's Pioneer Lightweight Motorcycle is made, in signing another contract for Spartan Belts said:

"In looking up matters in connection with this contract, I have discovered that this is the sixth consecutive year we have given you a contract for Spartan Belts for our Pope Model H Lightweight Motorcycle. It is needless to add that Spartan Belts are satisfactory."

Six years for one kind of belt—belt drive proving satisfactory for six consecutive years, surely that is conclusive proof. Belt drive must be the proper drive for Lightweights, or else the Pope makers, with their extensive experience, would have changed. Their policy no doubt has been—no complaints, entire satisfaction, full efficiency and complete reliability, requires no alteration in the drive medium.

The Lightweight is the coming popular motor vehicle—most people who are to ride will ride a Lightweight, a belt drive Lightweight, because that type is simple, smooth running and least expensive. The best Lightweights use belt transmission, belt drive by the long lived, all sufficient

ARE YOU GIVING YOUR ESTABLISHMENT AWAY, MR. DEALER?

(Continued from page 17)

could have bought quite a flock of cash registers with the money my repair shop lost on me.

"There is no business in which the 'little things' foot up faster than in the motorcycle game. Even the gasoline and oil used in the repair shop run into a lot of money, and they are seldom charged for. Still the dealer can't afford to give them away; as a matter of hard fact he can't afford to give anything away. He has to pay—and pay promptly—for everything he gets, and if he doesn't get his money back he can't last."

"But every motorcycle dealer of standing must have a checking system between his parts department and his repair shop," we insisted, "he couldn't last a year without it."

The Costly Leakages

"And nine out of ten of the so-called systems are allowing material to leak through every day of the year," was the emphatic reply. "Dealers are not strict enough. Most of them are happy as long as the sales look good. They don't realize that a lot of the cash that comes in the front door soon goes out the back door in uncharged for parts and supplies. It takes a crash to awaken them.

"I'm not going to outline a system for any other dealer to follow," continued Friend Dealer, "because every man ought to be the best judge of what his shop needs. All I'm going to say just now is that any dealer who is complaining about profits ought to look into his repair shop conditions—and do it instanter.

"He should not place all the blame on the repair men, either; he's largely to blame himself. It's his shop, and he can make his employees do thus and so—or get new employees. That's all. But it takes constant watchfulness and a lot of determination. It requires hard-pan business principles, in other words. If the policies of the hardware store or the butcher shop were applied consistently to the motorcycle game every dealer would be buying real estate with his cash surplus."

NEW BRITAIN, CONN.

F. C. MONIER & BROTHER, representing the Harley-Davidson in this city, set March 17 and 18 as souvenir nights at their new store. In addition to entertaining a number of bicycle patrons, the brothers had their hands full in welcoming motorcycle men, prospective and otherwise, who came to look over the new models.

F. C. Monier says that the firm's sales to date have been double those of the total for last season, and that the reason for taking a new store was that the space was lacking at the former quarters.

COLUMBUS, O.

O. C. BELT, of the Belt-Franklin Co., Central Ohio distributor for the Indian, reports a much better trade since the spring weather has arrived. The sales have been increasing and the list of prospects has lengthened. "Industrial conditions show a wonderful improvement in every way" says Belt, "and the 1916 season will undoubtedly far eclipse that of 1915."

SALEM, IOWA

CHARLES H. MARTIN has taken the agency for the Dayton Motor Bicycle for Henry County, with headquarters in this city. Martin is the leading sporting goods dealer in this section.

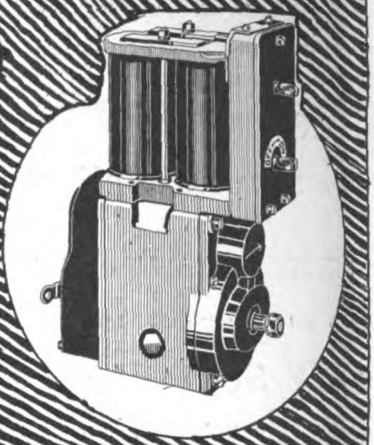
REMY

Motorcycle Lighting—Ignition System



The average motorcyclist thinks, talks and acts quickly—the result of riding a powerful, speedy machine. He believes in efficiency—wants the best. He has a wholesome respect for properly made electrical equipment.

That's why thousands of Harley-Davidson riders enthuse over the REMY Motorcycle Lighting-Ignition System. It's so efficient—safe—trouble-proof.

Electric light—brilliant, unfailing, always available. Strong, synchronized ignition; **sure** ignition at the touch of a finger. Less bulk to the motorcycle; protected and vibration-proof wiring; spill-less battery —That's what the REMY System means to the motorcyclist—first class lighting and ignition service.

See the REMY System at work on the Harley-Davidson Motorcycle—at the dealers or on the road.

BLUE STREAKS

Chosen By the U. S. Government for Service In Mexico

Forty-four motorcycles, each equipped with Blue Streak Tires, are serving with the U. S. Army in Mexico.

For what better evidence of Blue Streak endurance and dependability could you ask?

Here more than mere tire service is imperative. Sun, sand, alkali and quick despatch are conditions to be met without flinching.

The supreme attainment of every American manufacturer is recognition of his product by the U. S. Government in the form of actual purchase and utilization. Such endorsement is of itself a mark of merit.

So the U. S. Army has selected Goodyear Blue Streaks for service in Mexico. No higher compliment could be paid a tire.

Quality, durability and dependability, as expressed by the U. S. Government's choice of Blue Streaks for active service, all mean something to you in increased tire sales and customer-satisfaction. Write today for attractive dealer proposition which points the way to a bigger than ever tire business for you.

BLUE STREAK

Dealers—We Put You First!

The Goodyear Blue Streak Selling Plan is the strongest, the broadest and most comprehensive sales idea ever offered you by a tire manufacturer. It represents the results of years of practical experience and the expenditure of thousands of dollars.

The enthusiastic reports from Blue Streak dealers and the tremendous growth of Blue Streak business prove that we are offering you a Bicycle Tire Policy and a Bicycle Selling Plan that will prove a money maker for you.

We know that our success depends upon the success of Goodyear dealers. Goodyear business can grow only as Goodyear dealers grow.

That is why everything we offer you—our Square Deal Policy and our Selling Helps—is for one purpose—to help you SELL MORE bicycles and bicycle tires. All of the powerful advertisements, the Letter Service, the Posters and Cards, the Window Display, the Bike Caps and our Tire Guarantee, are to help you make REAL SALES.

If you have not seen the Goodyear Bicycle Tire Policy and the Goodyear Selling Helps write us at once. We will let you be the judge of their selling value.

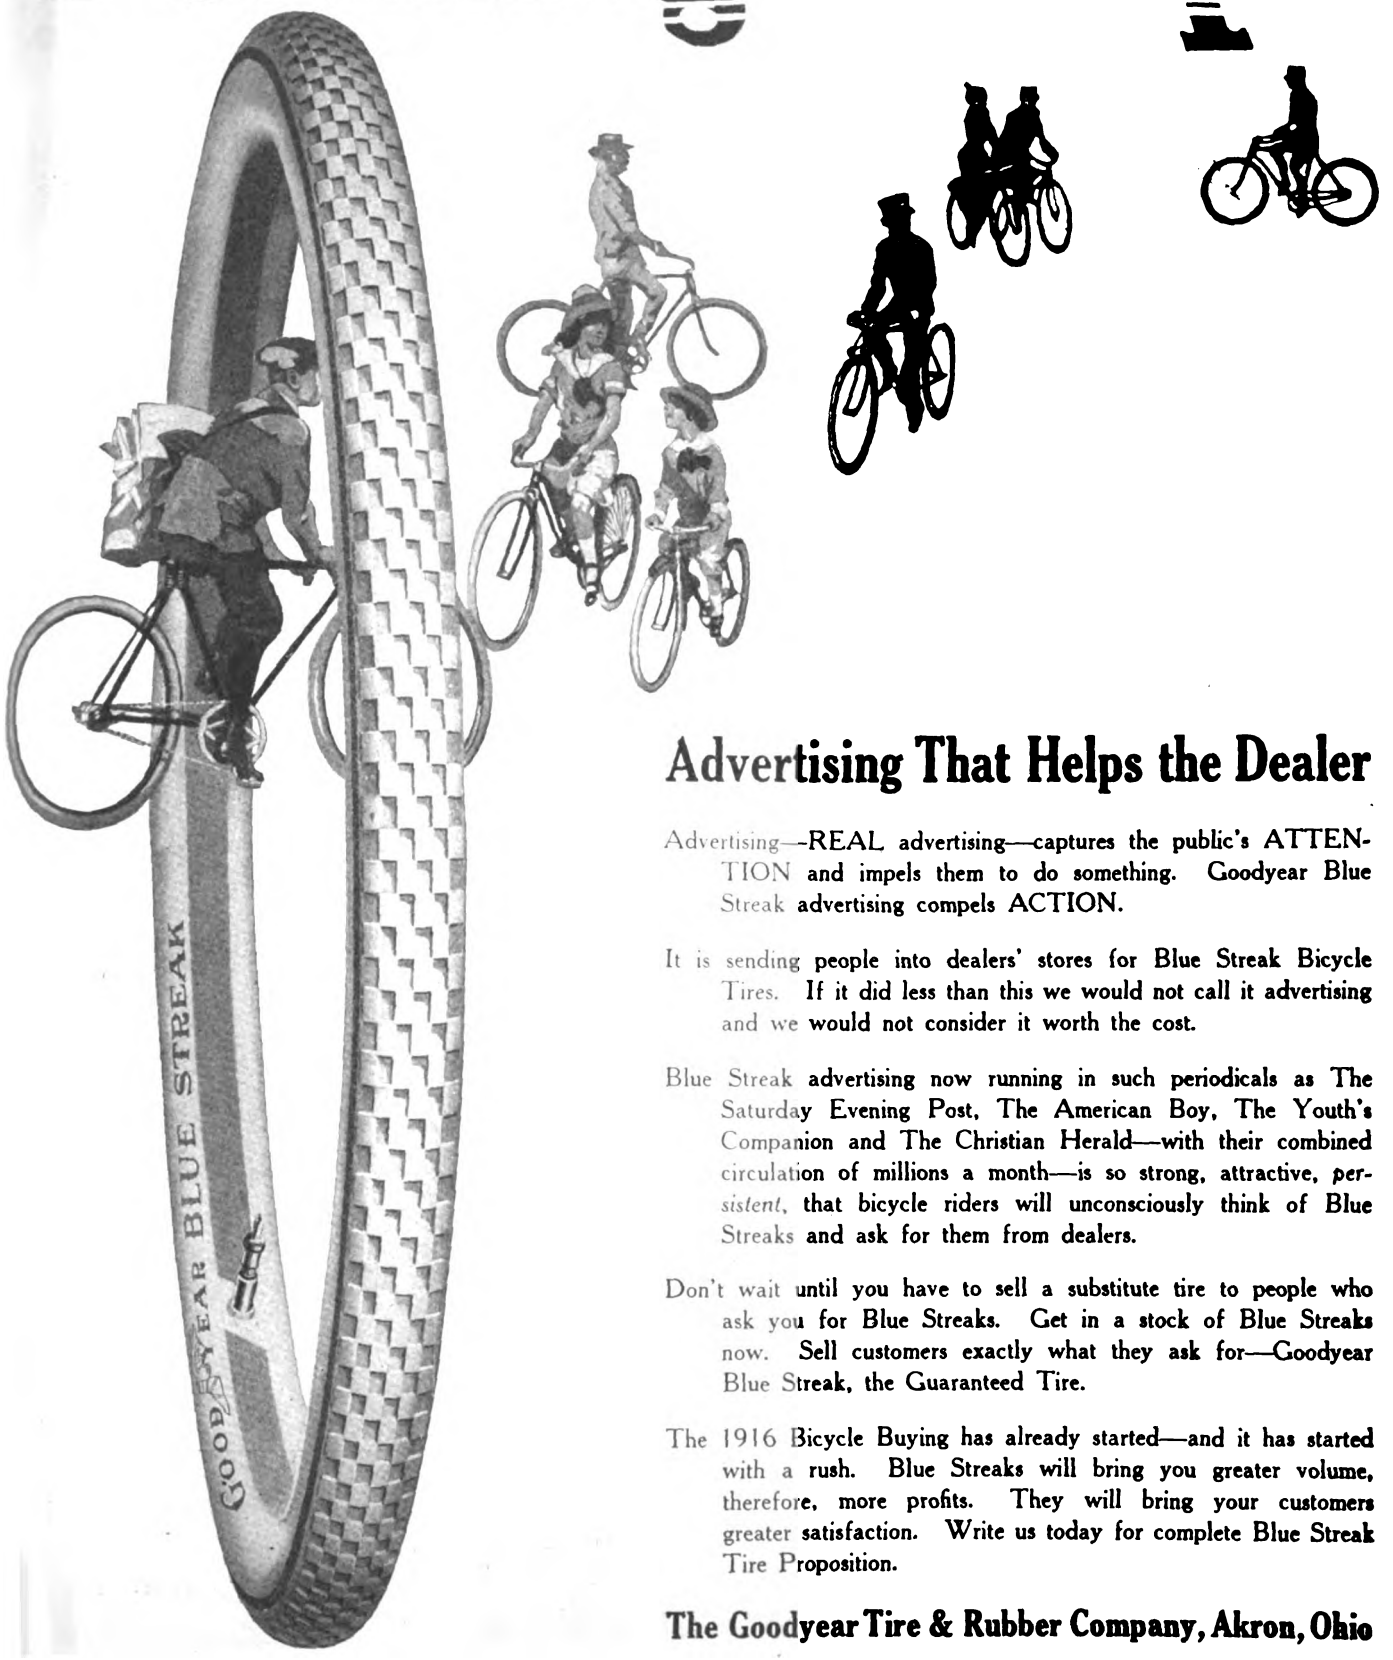
Selling Helps



Advertising That Helps the Dealer

Advertising—REAL advertising—captures the public's ATTENTION and impels them to do something. Goodyear Blue Streak advertising compels ACTION.

It is sending people into dealers' stores for Blue Streak Bicycle Tires. If it did less than this we would not call it advertising and we would not consider it worth the cost.

Blue Streak advertising now running in such periodicals as The Saturday Evening Post, The American Boy, The Youth's Companion and The Christian Herald—with their combined circulation of millions a month—is so strong, attractive, *persistent*, that bicycle riders will unconsciously think of Blue Streaks and ask for them from dealers.

Don't wait until you have to sell a substitute tire to people who ask you for Blue Streaks. Get in a stock of Blue Streaks now. Sell customers exactly what they ask for—Goodyear Blue Streak, the Guaranteed Tire.

The 1916 Bicycle Buying has already started—and it has started with a rush. Blue Streaks will bring you greater volume, therefore, more profits. They will bring your customers greater satisfaction. Write us today for complete Blue Streak Tire Proposition.

HOW TO REGISTER YOUR MOUNT IN NEW YORK STATE

Full Information Concerning the Necessary Procedure of Motorcyclists Under the New State Law; Every Rider Must Have Registration Card But Plates Are Not Yet Ready

IN order to answer fully the numerous inquirers who have applied to **Motor Cycle Illustrated** during the last few days for information concerning the new State registration law, this journal has obtained from the New York office of the Secretary of State one of the application blanks which motorcyclists will be required to fill out. The address of the Secretary of State's office in New York City, by the way, is 227 West Seventy-fourth street, and the telephone connection is Columbus—7348.

Motorcyclists who write to Albany for application blanks should address Secretary of State's Office, Automobile Bureau, Albany, N. Y.

Questions to Answer

It is necessary to answer the following questions on the application blank: What s the name of the manufacturer of the nachine? What is the factory number ffixed by maker to engine? What is the ype of machine (state whether with side, ear or front attachment, and number of heels)? In what year was machine ade? Will machine be used solely for ommercial purposes? Has this machine en registered in New York State since pril 1, 1916? Is machine provided with equate brakes, suitable and adequate bell, rn or other device for signaling, and mps in number and kind to conform to rticle 11-A of the Highway Law? What the age of the applicant? Is the maine owned by individual, co-partnership, ociation or corporation? If corporation, what State incorporated?

If the motorcycle is owned by a partnership or a corporation it is necessary to give the names of the partners, or the principal officers of the corporation, blanks being provided for such names and addresses.

Term of Registration

The fee of $2.50, which must accompany the application, covers registration from April 1, 1916, to January 31, 1917. Registrations applied for on and after August 1 will cost $1.25. Applicants are instructed o remit by money order or certified check. The application must be signed twice by the rider, the last signature being before a Notary Public or Commissioner of Deeds.

The rider must sign his full name—initials won't do. There are thirteen questions to be answered on the application blank, and if any question is ignored the blank will be returned.

One of the questions frequently addressed to **Motor Cycle Illustrated** during the past few days concerns the date on which the officials license plates will be ready for distribution. The plates are now being made, but the Secretary of State's office cannot tell definitely when they will be available.

New York State's registration law for motorcyclists became operative April 1. You will avoid trouble by applying at once for registration. The accompanying article tells you just how to go about it.

Pending their arrival, the rider will simply show his registration card if stopped by a policeman or other officer.

It is not advisable to delay filing the application for registration merely on the grounds that the license plates are not ready. The law is now in effect, and every motorcyclist is expected to be able to show his registration card on request. The plates will be sent out to registered riders as fast as they arrive.

That the new registration law covers sidecars and Motor Wheels under the general motorcycle heading, has been understood thoroughly, but when a question was raised by an applicant as to the standing of the Cygnet Rear Car, those in charge of the Secretary of State's office in New York City were unable to give a definite decision. The question appears to be fully answered, however, in Section 301 of the law, which reads as follows:

Defining the Motorcycle

"The term motorcycle, as used in this article, except where otherwise expressly provided, shall include all motorcycles. A motorcycle is a vehicle with two wheels, one following the other, propelled by other than muscular power, or such vehicle with a car attached to the side, front or rear *and operated on one or more additional wheels.*"

Motor Cycle Illustrated has communicated with Secretary of State Hugo at Albany regarding the full interpretation of the section above quoted.

STOLL COMPANY ISSUES A BOOSTER STAMP

DENVER, Colo.—The Stoll Mfg. Co., makers of the well-known line of Stoll tandems, is getting out a neat poster stamp in colors for distribution to dealers and interested riders. The stamp has an outline cut of a motorcyclist with tandem-fitted machine and bears the words: Boost With Us for 100,000 Motorcycles and 20,000 Stoll Tandems for 1916.

Those who desire these stamps should communicate with the Stoll Mfg. Co., at its headquarters, 3232 Walnut street, Denver, Colo.

HENDERSONS SELLING FAST IN CALIFORNIA

LOS ANGELES, Cal.—Mr. T. Lee, of the California Henderson Motorcycle Sales Corporation, has just placed several agencies for the Henderson machine in important cities in northern California, announcement of which will be made in a few days.

Loudenclos & Henry, the General Motorcycle Sales Company San Francisco agents, have just taken ten machines from the State distributors, and are having a very active season. In Southern California A. H. Small, Santa Ana Henderson agent, has just sold a new machine to the extra speed cop that Orange county added to its force a few days ago. This makes the tenth machine for Small this season.

FOREIGN INQUIRIES FOR THE LEONARD BRACKETS

BURLINGTON, Vt.—The G. A. Leonard Mfg. Co., maker of the Leonard Prest-O lamp bracket, has been having a wide sale for its product all over the country, and in addition, has been receiving a large number of inquiries and orders from all parts of the world. Recent inquiries have been received from the Hawaiian Islands, Spain and India, as well as a request for a quotation on a large order from a British firm.

The inability to readily obtain material in sufficient quantities to meet the strong demand and the big volume of orders in hand has necessitated making deliveries at a much slower rate than would be the case otherwise. The company takes this opportunity to explain to the trade for a seemingly neglectful attention to their orders and wishes the acceptance of the foregoing explanation as a reason for the delay in receiving their goods.

1916 HAND-PHONE IS MORE DURABLE AND SIMPLE

IMPORTANT changes which make for durability have been incorporated in the 1916 Hand-Phone, the product of the Automobile Supply Mfg. Company, of 220 Taafe Place, Brooklyn, N. Y. The flywheel is now cut in one piece, while the shaft and plunger are of bar steel. The horn casing is stamped from one piece of steel, while the bell is of brass, to insure correct resonance.

The notches and teeth in the working parts are carefully cut into the plunger and shaft so as to insure long wear. The bell and casing are securely fastened together. The construction of the Hand-Phone is very simple and the maker states that it has the least number of parts of any mechanically-operated warning signal made.

Two styles of bracket are furnished, one for attachment to the frame of the motorcycle and the other for fitting to the handlebar or cross-brace. The price is $3.25 with either bracket.

ROBERTSON TO JOIN SPLITDORF FORCES

NEWARK, N. J., April 3.—E. A. Robertson, the veteran Yale and Indian traveler and endurance run rider, has given up his position with the Hendee Mfg. Co. and will join the engineering staff of the

E. A. Robertson

Splitdorf Electrical Company, of this city on April 10. He will pass some months in the laboratory of the company and then act as sales engineer for the Splitdorf interests.

Robertson is an electrical engineer by profession, so that his move is right in line with his early training. He entered the motorcycle business as a traveller for the Consolidated Mfg. Co., several years ago, and on the break-up of the Yale staff in 1914, he went with the Hendee Mfg. Co., covering Pennsylvania, Virginia and Maryland, in that firm's interests. He participated in most of the big endurance runs since 1912, being one of the winning Indian team in the 1915 New Jersey M. C. run, as well as one of the Yale sidecar team winners in the previous season's run of the same club. His departure from the Hendee forces is regretted by all of the Indian fraternity throughout his territory as well as by the Wigwamites.

RACING BODY INCORPORATES

ELMIRA, N. Y.—The Elmira Automobile, Motorcycle and Bicycle Racing Association has been incorporated here with a capital of $1,000, to conduct racing exhibitions. The incorporators are George C. Miller, Arthur B. Hickox and Earl J. Sterling, all of this city.

OMAHA MOTORCYCLISTS IN MILITARY CORPS

OMAHA, Neb., has just joined the movement to obtain greater recognition for the motorcycle in army service, and a hustling corps of motorcycle recruits has been organized. It is the intention to have these riders drill at stated periods, and to supply them with suitable uniforms.

The Nebraska riders, in common with volunteers in similar corps in other states, are furnishing their own mounts. They are planning motorcycle manoeuvres along military lines for the near future, and special scouting and mapping programs are being arranged. The motorcyclists will spread out to cover all the roads, bridges, camping sites, water supplies and points of forage for cavalry animals, and will thus obtain a great deal of information of genuine military value.

MOTORCYCLE MACHINE GUN UNIT IN ENGLEWOOD

ENGLEWOOD, N. J.—A motorcycle machine gun unit has been formed by members of the recently-organized branch of the National Rifle Association in this place, and plans are now being completed for equipping and training the riders.

Subscriptions are now being received to assist the riders in obtaining the necessary equipment, and there are strong indications that the machine gun squad will be ready for the field before the summer is far under way.

MONTCLAIR RIDERS WANT A MILITARY CORPS TOO

MONTCLAIR, N. J.—Motorcyclists of this city have the preparedness fever and arrangements are well started for the formation of a military corps. Plans for military squads of riders to work in conjunction with the National Guard, or on a purely provisional basis, is in the air in half a dozen cities and towns in this vicinity, and Montclair riders are determined that they will be well to the front.

Caldwell residents are talking of a summer camp for military training purposes, and it is possible that all the motorcyclists of this district will unite in manoeuvres if the Caldwell camp becomes a reality.

INVINCIBLE RUN TO BE A SANCTIONED EVENT

BROOKLYN, N. Y.—The officers of the Invincible M. C. announce that the Spring run, slated for April 30, will be a sanctioned F. A. M. affair. The club at first thought that as the event was a pleasure run, it was not necessary to have a sanction, but on writing Competition Chairman John L. Donovan, and getting his answer that it would be best to have it sanctioned, the sanction has been obtained.

The fact that the run might be unsanctioned led other organizations to stand aloof from it, but with the obtaining of the required permission, several of these have entered men. The Crotona M. C., of the Bronx, has entered 25 men in the affair.

NEW YORK CONVENTION AT SHEEPSHEAD BAY

Date for Empire State F.A.M. Gathering Is Set for July 4 at Noted Track —Amateur Championships to Be Held

NEW YORK, April 3.—New York F. A. M. Commissioner George F. Ellis announces that the State convention will be held in 1916 on July 4, at the Sheepshead Bay Speedway, Sheepshead Bay, N. Y. The convention program will include a number of amateur State championship races, as well as several professional events, following the custom in previous affairs of this nature. The championship races will be open to riders from New York State only.

The meet will be held under the auspices of the recently formed Speedway M. C., Inc. The track, which was opened for the first time last season, is a two-mile speedway, with excellent surface and banked to give the highest speeds with any motor vehicle. This will be the first motorcycle meet of any importance on the Speedway, as previous races were all for automobiles. At these meets the four-wheelers attained very high speeds, an average for one race being 101.5 miles per hour. Accordingly, the July 4 meet will furnish plenty of thrills in the way of speed, and it is rumored that more than one existing record will be shattered on that date.

As regards the race meet, promises from some of the country's best speedsters in the pro. class have been received, and the crack amateurs of the State will all attend. Other details of the convention program have not yet been made public by Commissioner Ellis.

SPEEDWAY M. C. TO HOLD FIRST MEETING ON APRIL 9

NEW YORK, Apr. 3.—The first meeting of the newly-organized Speedway M. C., Inc., will be held at Sheepshead Bay Speedway, on Sunday, April 9, at 2 p. m., when plans for the New York State F. A. M. Convention and amateur championships will be topics of discussion. Members of the club are notified to attend in order that important matters shall be understood by all.

The Speedway M. C. has now 60 members and is affiliated with the F. A. M. as club No. 580. It will hold a racemeet at the Speedway on July 4, with nine events. For these races, cups to the value of $140, medals valued at $159, and cash amounting to $775 will be offered. The track will probably be open for practise after April 9 for any club member. For further information write to Irving Barnard, secretary, at 15 Warren street, New York.

The Speedway M. C. was incorporated on March 21 in New York City, with prominent men in the trade and sport as the incorporators. It started with 38 charter members, but the charter has not as yet been closed. Those desiring membership should apply to Secretary Barnard, at the address given above.

IPP WIGWAM IS SCENE OF MUCH ACTIVITY

TORONTO, Ont.—"Buy-a-Bike Week" in Toronto closed on Saturday night, April 1, with a reception at the local wigwam, H. M. Kipp & Co., Ltd., 447 Yonge street. "Open house" was held all day, the real "at home" was celebrated in the evening, when probably more than 1,000 motor-wire enthusiasts visited the new headquarters of the company. H. M. Kipp was present and H. W. Kipp, traveling representative of the Hendee Manufacturing Company, Ltd., Toronto, assisted. Bert Webb, H. Lemon and Cliff Olmsted also served. There was orchestra music and refreshments for the many visitors, while the entire store was tastefully decorated with festoons and streamers of bunting.

The windows of a cycle establishment probably have never been so tastefully decorated as the Kipp store front for this Spring display. On one side was built up a fancy wigwam with bonfire, grass, sand and painted scenery. In this window was only one Indian bicycle. The other window was decorated in the national colors, and the principal object was an electrically-equipped three-speed power-plus Indian of 1916 design. Small cards and ribbons were used to point out various important mechanical details.

HENDERSON WINS NEW ZEALAND BEACH RACE

CHRISTCHURCH, New Zealand.—The second series of beach races held by the Pioneer Motor Club, of this city, was conducted at New Brighton a short time ago. There were two events on the card, a 20-mile handicap race for sidecars and a race for single-cylinder solo machines. A. Woodman, riding from scratch with a Henderson outfit, covered the 20 miles in 24:45, overhauling the distance men and finishing with a big lead. The solo race was won by G. Moffatt on a Triumph.

Woodman's time was considered very fine, particularly as regards the nature of the course. He carried a heavy passenger and used a stock machine and sidecar.

FEATHERWEIGHT CARRIES HIM

Bob Jawkins, Former Pugilist, of Richmond, Va., with Indian Pet Mount. He Weighs 330 Pounds and Is Over Six Feet

THIS PHYSICIAN PRESCRIBED MOTORCYCLE RIDING

ONE of the best pieces of publicity material turned out of late by Secretary Ed. Hallock from the headquarters of the M. M. A. in New York is a copy of a bona fide doctor's prescription ordering a run-down city worker to use a motorcycle. The prescription was written by Dr. Frank W. Abel, 300 East 83rd street, New York, and Secretary Hallock has sent news of it broadcast to the newspapers. Many papers devoted liberal space to it.

Dr. Abel explained his action by saying that the motorcycle guarantees plenty of fresh air for the user, coupled with a helpful change of scene, and that the exercise obtained is just right to tone up both mind and body. He also places emphasis upon the exhilaration that comes with spinning through pleasant country, and asserts that the combination of benefits derived is in most cases ideal for the man whose recreation opportunities would otherwise be very limited.

YONKERS M. C. HOLDS FIRST SPRING RUN

YONKERS, N. Y.—The Yonkers M. C. held its first Spring run to Peekskill, N. Y., on Sunday, April 2. About 20 members participated in the affair. The departure was made from the club house at 9 a. m. and Peekskill was reached at noon. After a lunch, the return was made and all entrants arrived home at 3:30 p. m.

The club will shortly name a team to participate in endurance runs, as well as a track team. Challenges will be issued to other club teams in New York and New Jersey in the near future.

TRANS-CANADIAN HIGHWAY MAY BE BUILT

MONTREAL, Quebec. — One of the beneficial results of the war will probably be the construction of a national military highway from coast to coast in Canada, according to the discussion aroused among highway officials regarding a trans-continental roadway across Canada at the third annual International Good Roads Congress held in Montreal during the second week in March. The information was given out that the Federal Government will consider a proposition to build the road, using only returned soldiers for its making. At present Western Canada is entirely isolated from the East, excepting the lines of railway communication.

BRASS CITY CLUB FORMED

WATERBURY, Conn., Mar. 28.—The Brass City Motorcycle Club was formed here on St. Patrick's Day, when twenty-four riders met in Lang's Cyclery, and, after hearing a short address by Jess Campbell, F. A. M. director, became members of the national body. C. J. Boileau was elected president and Fred S. Smith secretary. A committee was appointed to draft by-laws and a constitution. A fine entertainment was enjoyed by the local cyclists, which closed with a one-act comedy sketch.

PLAN GREATER MOTORCYCLE PROGRESS

Meeting of Trade Men at Cleveland Gives New Impetus to Co-Operative Campaign; Will Report at M. M. A. Meeting in Springfield April 12

CLEVELAND, O., Mar. 29.—At the invitation of S. A. Falor, of the Goodyear Tire & Rubber Co., a number of motorcycle and parts manufacturers met at the Statler Hotel, in this city, today and a movement was started for boosting the motorcycle along systematic lines.

The Lineup of Live-Wires

Among the live-wires who helped to make the session a busy one were the following: J. C. Ferguson, of the Eclipse Machine Co.; E. W. Jackson, of the Hendee Mfg. Co.; W. L. Quinlan, of the Cleveland Motorcycle Co.; S. Lacy Crolius, of the Harley-Davidson Motor Co.; S. C. Hurley, of the Diamond Chain & Mfg. Co.; Brownie Carslake, of the Cygnet Rear Car Co.; H. S. Quine, of the Goodyear Tire & Rubber Co.; S. A. Falor, also Goodyear.

One of the features of the meeting was a luncheon at which the Goodyear company played host. Before and after the luncheon the motorcycle situation was discussed from all its various angles, and it was agreed that, while certain individual companies had shown true progressiveness, there had been no spirit of co-operation influencing the industry in general. It was the opinion of those at the meeting that a better pull-together policy for motorcycle manufacturers and more co-operative work among the dealers would work wonders.

H. S. Quine, chairman of the "Million Bicycles Committee," which has been getting big results for the cycle manufacturers and jobbers, made an interesting report on what his committee had been able to accomplish and referred briefly to some of the things that will be brought up before the Bicycle Committee for 1917 and 1918 work when the cycle men hold their annual convention this summer in Atlantic City.

To Report to M. M. A.

A resolution was adopted appointing Mr. Quine to make a full report of the meeting to the Motorcycle Manufacturers' Association at its meeting in Springfield, Mass., April 12, and to urge upon the M. M. A. the inauguration of a co-operative campaign for the advancement of the motorcycle.

EBONY TREAD TIRE IS LATEST PENNSYLVANIA PRODUCT

IN addition to its well-known Vacuum Cup line of tires, the Pennsylvania Rubber Co., of Jeanette, Pa., has brought out the "Ebony Tread" tire. This tire, as its name implies, has a black tread and in construction is up to the high standard inaugurated and maintained by the company in all its tires.

The Ebony tread tire is moderate in price and is distinctive in appearance. It is sturdy and lasting and is a fitting team-mate for the Vacuum Cup tread tire. The same fabrics that secured the success of the Vacuum Cup tire form the foundation of the Ebony Tread.

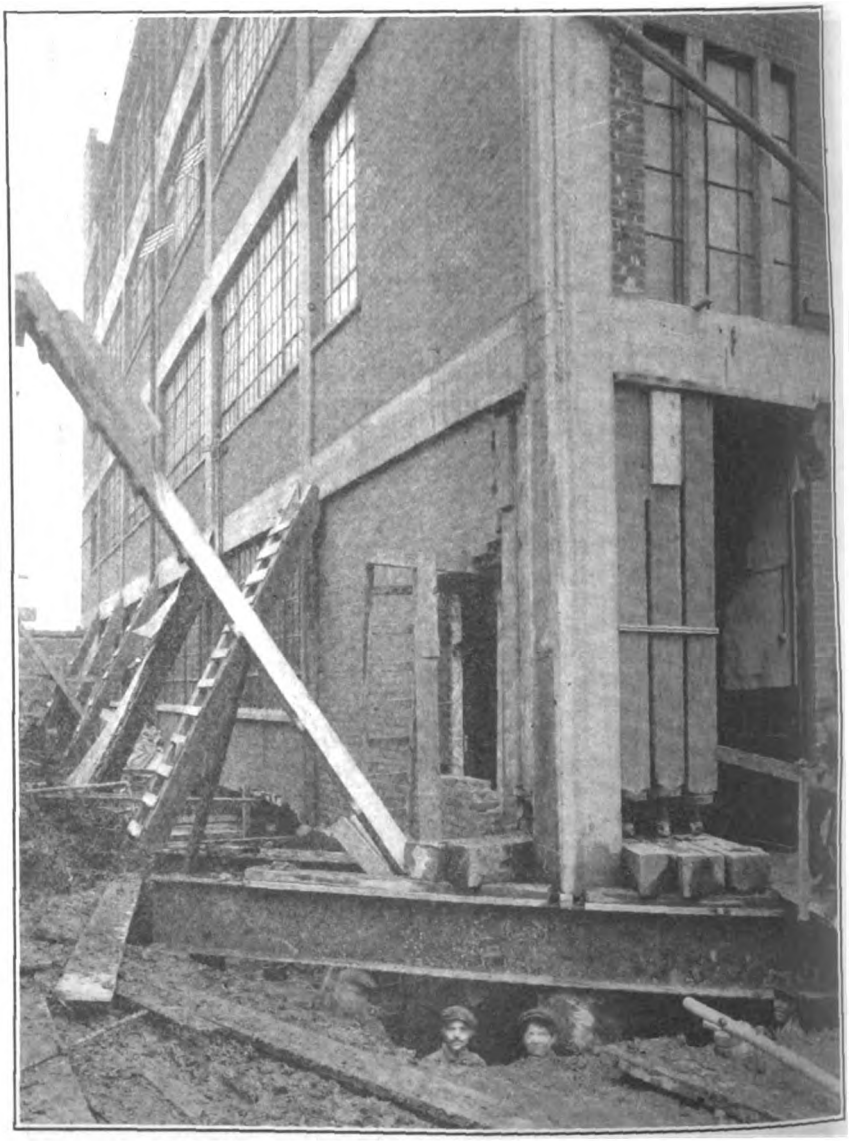
CASH BUYING IS POPULAR IN LOS ANGELES

LOS ANGELES, Cal.—A hatful of jingling gold is getting to be a common sight on Motorcycle Row these days. As the correspondent of **Motor Cycle Illustrated** makes his rounds, he is always dropping in on some salesman ambling leisurely across to the register with a heavyweight payment in bright yellow money, as paper is not popular in the Golden State. On Thursday of last week this sight was noted in rapid succession at the Miami Power Bicycle store of T. E. Berry, across the street at Passmore & Sayre's Harley-Davidson shop, and further down at the Henderson store where two cash sales that day of machines fully equipped brought in an aggregate of close to $700 in gold.

BIG GAS COMPANY BUYS POPE LIGHTWEIGHTS

LOS ANGELES, Cal.—Eight of the sixteen Pope lightweights which comprised the first lot taken by the Henderson Motorcycle Sales Company from Jobber C. L. Smith to retail in Los Angeles, were disposed of in short order. They went to the Los Angeles Gas & Electric Company, which is placing them in service work. The company has made a careful investigation and has purchased Henderson motorcycles for one class of work.

CHAMPION PRODUCTION IS NOT AFFECTED



ALTHOUGH the contractors engaged in constructing the big six-story addition to the plant of the Champion Spark Plug Co. were forced to provide braces for the side of the old plant, while the foundation was being prepared, the production of over 50,000 complete Champion spark plugs did not diminish in the least.

The illustration shows the extreme care taken by the company in order to maintain its present production schedule.

When the addition is completed the Champion Spark Plug Co. will have over 125,000 square feet of working space, and ample facilities for the daily production of 100,000 spark plugs.

On the Pacific Coast

FRESH BULLETINS OF THE SAN FRANCISCO TRADE

SAN FRANCISCO, Mar. 28.—As an indication of how widely the new Pacific Coast branch of the Thor factory is coming to be known, Mr. Barton, manager for this territory, has received letters inquiring for agencies from dealers as far east as Massachusetts, addressed to the San Francisco office. These, of course, are promptly referred to the Chicago headquarters. Owing to the activity around San Francisco, Mr. Barton was unable to get away on his contemplated trip south last week.

The local store of the Appeal Manufacturing Company expects a carload of new machines before the end of the week, and the shipment is eagerly awaited by Harley-Davidson dealers in this section of the country.

Paul Johnson of Oakdale, Cal., has just closed a deal for the Harley-Davidson agency. This will give the H.-D. a pretty complete distribution in that part of the San Joaquin valley, especially as Mr. Johnson is planning to establish a branch in Sonora.

Mr. Angwin, of the Motorcycle Sales Company, is back from a trip through Northern California, where he stirred up considerable interest among the various dealers. He and his partner, Mr. Loudenclos, made a jaunt up to Sacramento Sunday.

Mr. Hinckley, a special representative from the Hendee Manufacturing Company, is calling on the Indian dealers in San Francisco this week.

Cygnet Appears on Coast

The Pacific Motorcycle Supply Company, distributors of the Indian, have just received the first machine with a Cygnet Rear Car that has appeared in this vicinity.

W. E. Jackson, Western representative of the Davis Sewing Machine Company, returned a few days ago from a trip through Oregon and Washington, and announces that the Washington Cycle & Supply Company of Seattle has closed its new contract for the agencies for the Dayton motorcycle, Motor Bicycle, and bicycles. At Portland, Ore., the Dayton Cycle Company has renewed its contract for the motorcycle, and also taken up the Motor Bicycles. At Red Bluff, Cal., Joe Souza has renewed his motorcycle contract, and will handle the Motor Bicycle also.

W. E. & W. H. Jackson expect their first shipment of Dayton motor bicycles in about two weeks.

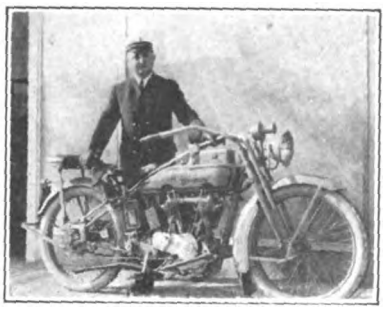
Oliver Baxter, sales manager for the Bean Son Company, agents for the Pierce bicycle, says that there has already been more call for racing bicycles than for many years, not only here but in all parts of the state.

G. W. Crane, a bicycle dealer of Livermore, Cal., was in town last week.

H. L. Pfeiffer has sold out his bicycle store in Alameda to J. B. Tompkins.

Arnold & Middlemiss have bought out the motorcycle and supply store of G. M. Julier at Sacramento.

A NAVAL ENTHUSIAST



Chief Yeoman P. H. Chapman, U. S. S. Hopkins, at San Diego, with His Harley-Davidson

NEW ROUTES ARE OPENED IN CENTRAL CALIFORNIA

SACRAMENTO, Cal.—The new Yolo Causeway, a long concrete trestle connecting this city with the west side of the Sacramento Valley, will be open on and after March 26. The Causeway, which took 18 months to build, and cost $396,000, makes the first all-year direct highway connection between Sacramento and San Francisco, as the former route lay over bottom lands which were overflowed much of the year. The opening of the new route will greatly stimulate motorcycle travel out of this city.

The new boulevard to the summit of Mt. Diablo was announced as formally open on the same date, but rainy weather did not bring out any motorcyclists to try it. Mt. Diablo is the highest in this part of the state, giving even a better view over the country than Mt. Hamilton, and the place will undoubtedly become a popular resort for riders.

'FRISCO CLUB RIDES TO SAN JOSE PARK

SAN FRANCISCO, Cal., April 2.—Last Sunday's social run of the San Francisco M. C. was made to Alum Rock Park, San Jose, the riders starting at 8.30 in the morning and traveling down the Alameda county side. The distance covered was 120 miles and the run was made in quick time owing to the excellent condition of the roads.

Stops were made on the way down at Hayward and Niles, and also at San Jose for lunch. On the return trip the riders hopped out of their saddles at a 30-acre poppy field near San Jose, where everybody loaded up with California poppies.

NEW CLEVELAND ARRIVES IN SAN FRANCISCO

SAN FRANCISCO.—"Hop and Hap," otherwise Hopkins & Alzina, whose opening on Van Ness avenue was announced recently, are now getting down to business, having just received their first shipment of the new Cleveland lightweights which they will distribute in San Francisco and vicinity. They took a pair of the machines to the Beach Sunday, and drew crowds wherever they stopped. They are also handling the Pope bicycle, and believe they have come back into the game at just the right time.

FRESNO CLUB WILL ACT AS HOST ON APRIL 23

FRESNO.—Motorcyclists of the San Joaquin valley will celebrate April 23 as Motorcycle Day, under the direction of the Fresno M. C. The club will act as host to the Valley riders and will put on an interesting program of sports.

The riders will gather at Herndon, on the San Joaquin River. Among the clubs represented will be those from Visalia, Bakersfield, Madera, Stockton, Modesto, Merced and Reedley.

SILENT GRAYS AT SUMMIT OF MOUNT HAMILTON

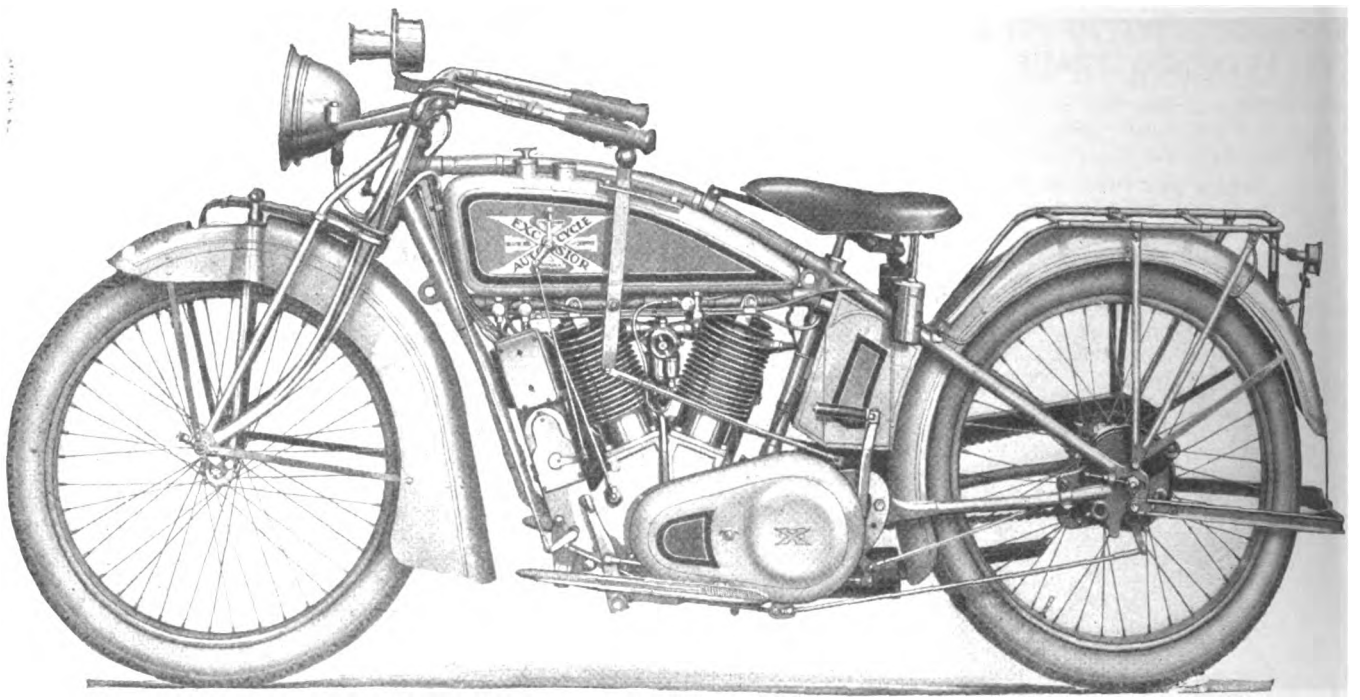
ULTRA POWER MOTOR IN SERIES 17 EXCELSIORS

Powerplant in New Products of Excelsior Motor Manufacturing & Supply Co. Has Larger Valves and Increased Power Output—Automatic Compression Control, New Change Gear Arrangement and Encased Primary Drive Are Other Features



Left Side of Excelsior Model 17-3E Showing New Gear Change Lever and Housing for Primary Drive Chain

"WE have always maintained," says the Excelsior Motor Manufacturing & Supply Company, of 3700 Cortland street, Chicago, Ill., in its announcement of the new series of Excelsior models, "that the time to bring out new models was whenever structural improvements had been developed to mechanical perfection and practical efficiency, regardless of the calendar."

Having by rigid tests proven the efficiency of a number of new ideas, the manufacturers of the Excelsior have embodied them in Series 17, a new line which is now offered for public consideration. The improvements referred to in the announcement were not put on last fall, because, as the announcement states: "Such procedure would have necessitated leaving the experimental work to the buyer." In brief, the improvements which characterize Series 17 Excelsiors are the Ultra Power motor with its increased size of valves, reinforced crankcase, automatic compression control, new muffler, and silenced action of the valves; a new change gear control, dry plate clutch, more powerful brakes, enclosed primary drive, enlarged rocker arms on the front fork, and combined hand and foot operated clutch. The service brake is also operated by the clutch pedal and a large breather pipe from the crankcase sends oil to the primary drive chain.

Four Models in Series

The Series 17 consists of four models. These are 17-3, a three-speed twin with high-tension magneto ignition; 17-3E, a three-speed twin with MIDCO ignition and lighting system; 17-S.C., a speed twin for track or road service, and the Excelsior lightweight. The three twin models are engined with the new Ultra Power motor, which has 25 per cent. more power than that on previous models. This motor has a bore of 3-21/64 inches and a stroke of 3½ inches, giving a piston displacement of less than 61 cubic inches. The Excelsior lightweight has a three-port, two-stroke motor of 2¼ horsepower.

CHANGES ON NEW EXCELSIOR MODELS

MOTOR—Larger inlet and exhaust valves; inlet valves silenced by springs in tappet housings. Reinforced crankcase to care for increased power. Large breather pipe delivering surplus oil on primary drive chain. New compression release automatically operated in connection with foot-starter. New extra heavy pressed steel muffler with direct cut-out.

On Model 17-3E, a new attachment warns the rider when the motor stops, a buzzer sounding until the ignition switch is opened, thus preventing running-down of the battery.

CLUTCH—Dry plate type, operated by hand and foot.

GEARSET—New shift-lever on left side of frame; positive gear lock automatically and directly operated by the clutch arm.

BRAKES—New Type; service brake, centrally-pivoted double-acting band, operated by left foot lever in combination with clutch; emergency brake, expanding ring, applied by right foot lever.

PRIMARY DRIVE CHAIN—Enclosed in steel housing along with clutch and clutch mechanism and proof against dirt and water.

FRONT FORK—Enlarged rocker arms, nickel steel forgings of extra large size.

The Ultra Power motor, used on Series 17 models, is fitted with larger inlet and exhaust valves than on previous Excelsior motors. These valves insure a full charge of gas being taken into the cylinder and a perfect evacuation of the burnt gases on exhaust. As in the 15 and 16 models, the exhaust valves are operated by direct thrust and the inlet valves by means of a rocker working in a substantial pivot on each dome. The rockers for the overhead inlet valves are large in diameter and have a ball and socket joint at the head of the tappet rod. They are thoroughly lubricated by means of oil cups at the pivot bearing. Adjustment is made at the upper end of each rod, the most accessible point on the motor.

Inlet Valves Silenced

In the Ultra Power motor the inlet valves are silenced by springs fitted in the tappet housings. The entire exhaust valve mechanism is covered and thoroughly protected from dirt and water. Telescoping sleeves surround the stem and its spring for this purpose, but their construction is such that instant access can be had for any adjustment.

The cylinders are of the finest grade of grey iron, perfectly designed to give the required strength without unnecessary weight. The main shafts and connecting rods are of special steel composition, carefully developed for Excelsior use. The rods and shafts are first machined to slightly oversize, then heat treated to glass hardness. They are finished on precision grinders to perfect size and smoothness. Following Excelsior construction in previous models, the shafts are made of more

Digitized by Google

than ample size and diameter for the work, in order to give a high factor of safety under all conditions of service.

Crankcase and Breather

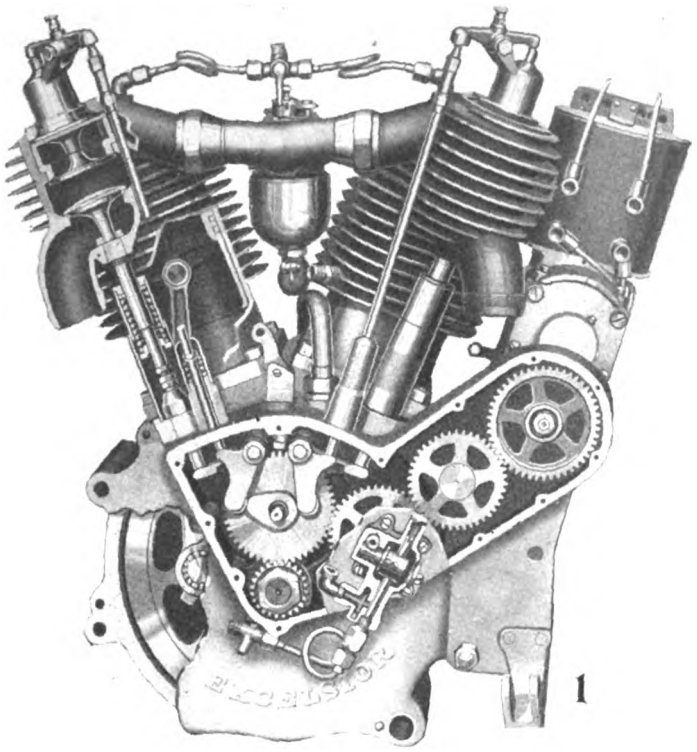
The crankcase has been reinforced to take care of the increased power of the Ultra Power motor. There is a large breather pipe fitted, which delivers surplus oil on the primary drive chain. The carbureter is a Schebler especially designed for use with this motor. It is fitted with a choking device for easy starting and an adjustable auxiliary air valve. The throttle has been given an increased opening, permitting of a wider range of speed, and a friction device automatically holds it at any desired position. Ignition on the 17-3 model is by high-tension magneto, while the 17-3E has the MIDCO generator as the source of ignition and lighting current.

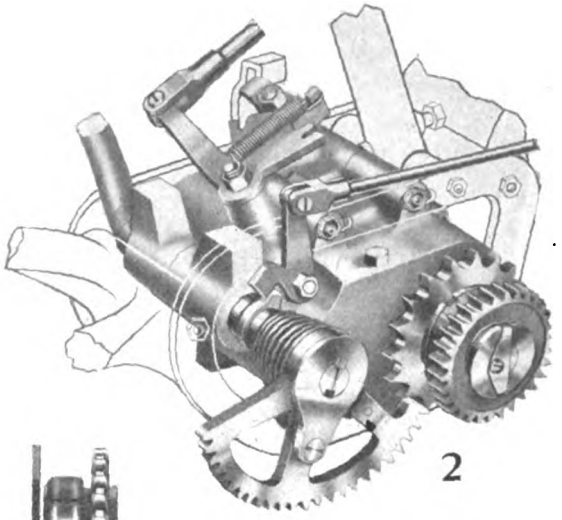
Lubrication is by means of a gear-driven, positive-acting oil pump, located on the right side of the motor. This pump delivers a volume of oil in direct relation to the speed of the motor. Oil leads go to the right main bearing and to the front cylinder. An independent hand pump is provided for emergencies. The muffler is of new pattern, with extra heavy steel shell and drawn steel ends. A long tail pipe is provided. The interior of the muffler is so constructed that the exhaust is silenced without back pressure. The cut-out is direct.

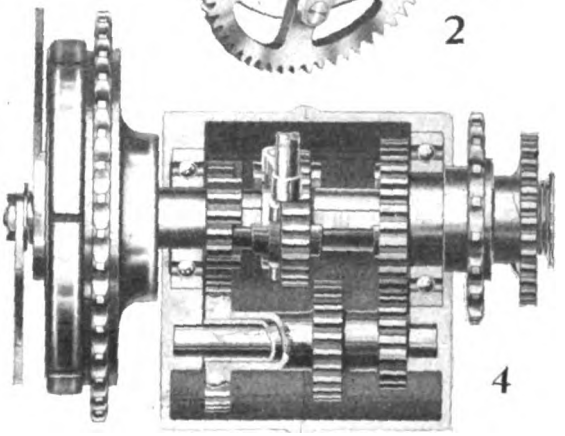
Automatic Compression Release

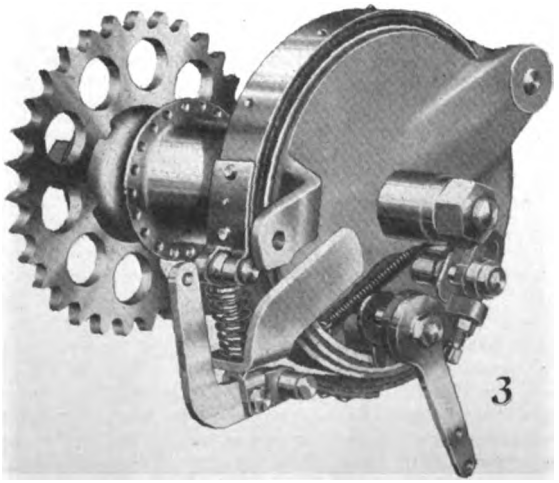
While on former models the compression release was hand-operated, on the Series 17 the operation is automatic. It is connected up to the foot-starter in such a manner that at the downward thrust of the starter lever the exhaust valves are lifted at the proper instant and closed at the proper instant. The rider is thus relieved of all responsibility in this connection, and

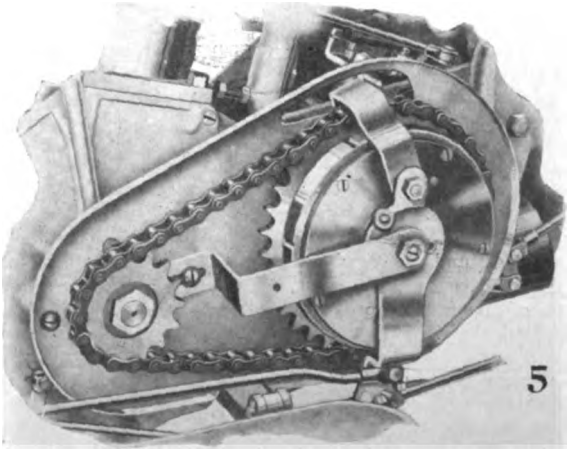
POWERPLANT, GEARSET AND BRAKES ON SERIES 17





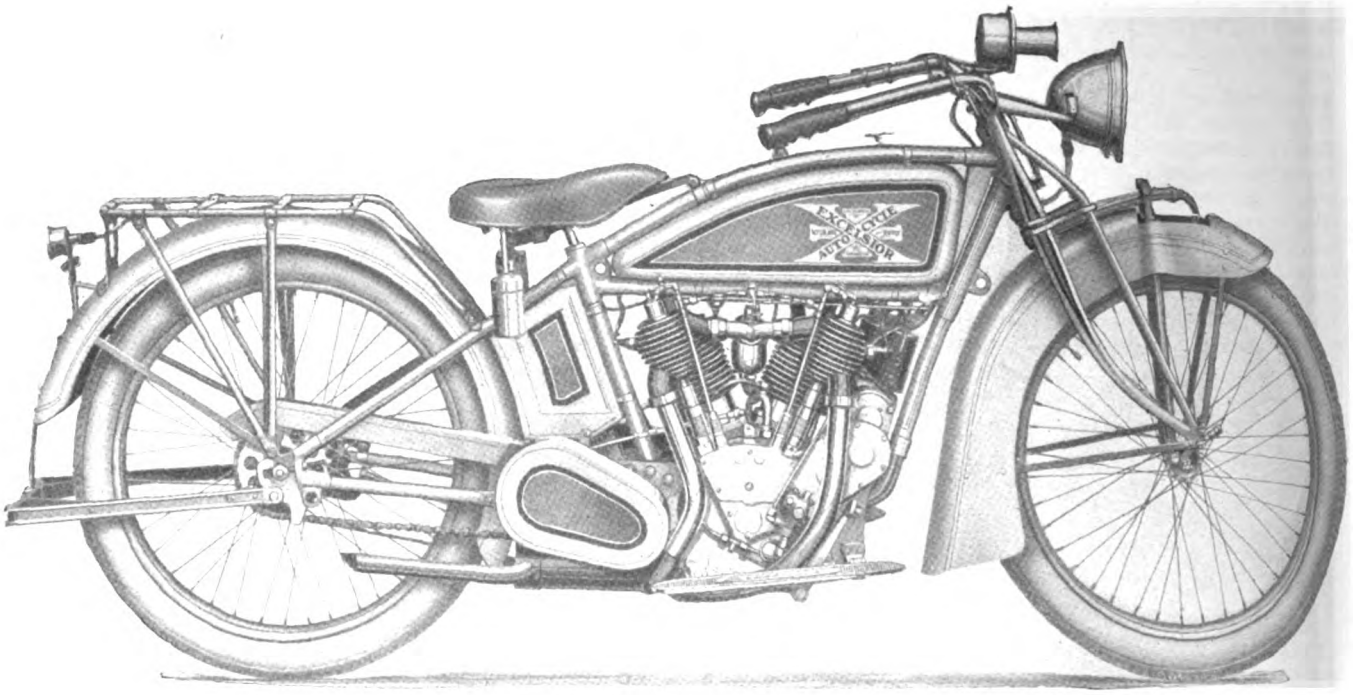






Cross Section of Ultra Power Motor, with MIDCO Generator, as Fitted to 17-3E Model; 2, Phantom View of Gearset, with New Clutch Interlock and Compression Relief Device; 3, Brake System on Rear Hub, Showing Double Brakes; 4, Excelsior Three-Speed Gearset; 5, Primary Drive with Housing Removed Showing How Clutch Is Enclosed

Digitized by Google



Right Side of Excelsior Model 17-3E Twin, with MIDCO Generator and Full Electrical Equipment

a start is insured regardless of other conditions, it being only necessary that a supply of gas be formed at the carbureter ready to be drawn into the motor. This arrangement is unique in motorcycle construction and its value cannot be overestimated.

The starter is of the segment and pinion type, as in the 15 and 16 models. A single downward thrust on the starter lever rotates the motor four complete revolutions, and, as mentioned before, lifts and lowers the exhaust valves at the proper instants. The starter lever is so located as to be readily accessible either with or without a sidecar and can be readily operated with the rider astride or at the side of the machine. All danger from backfires is eliminated.

New Dry Plate Clutch

The clutch is of the dry-plate type, mounted on the extension hub of the main shaft of the gearset. This eliminates springing of the shaft under extreme loads. The clutch mechanism is housed in an oil-tight case and runs on large annular ball-bearings. On the clutch body is carried the sprocket for the primary chain drive. Control is by means of the left hand grip and a foot-lever at the left side. The grip is used principally to temporarily or partially release the clutch, while the foot-lever is employed for stopping or for gear-shifting. The clutch is thus under control by either hand or foot.

The primary drive, together with the clutch and clutch operating mechanism on Models 17-3 and 17-3E, is entirely encased. By this construction the chain is completely protected from dirt and water and runs lubricated, the oil coming from the breather pipe. The case is of drawn steel, handsome in appearance and readily removable. It is also noiseless.

Both Models 17-3 and 17-3E are fitted with the Excelsior three-speed gearset. This change-gear has been subjected to two seasons of hard service and has always made good. It is of the progressive type, giving direct drive on high. There are two sets of dog-clutches and a pinion on the slider. One set of dog-clutches is for the high speed and the other for the low. The pinion is meshed with a gear on the lay-shaft to give the intermediate speed. All shafts in she gearset are carried on extra heavy annular ball-bearings.

The primary drive is taken at the left side and the final drive at the right side, following previous Excelsior practice in transmission. The final drive front sprocket is fitted on its shaft next to the gearbox, while the ratchet device and starter pinion are on an extension of this shaft to the right.

Improved Gear-Change

The change of gears on Models 17-3 and 17-3E is effected by a vertically-moving lever at the left side of the frame, in place of the short lever and quadrant on the 16 models at the right. There is a single connection rod from the change-lever to the gear-shift mechanism, avoiding all joints, rockers and other complications. The arm or gear-shift lever is made in one piece with a notched sector, the notches corresponding to the different gear positions. A lock which fits into the notches is operated directly from the clutch lever, thus preventing shift of the gears with the clutch engaged. This lock is held in place by a spring and is only withdrawn by the disengagement of the clutch.

Brakes on Series 17 Excelsiors have been improved and strengthened in everay possible manner. The service brake is of the expanding ring type, acting on a drum at the left-side of the hub. It is operated by the left foot-lever. This lever, as mentioned above, also operates the clutch, but the action is progressive: a pressure on this foot-level first withdraws the clutch, then operates the gear lock and finally sets the brake. The external contracting brake, operating on the same drum, is of the hinger center type such as is used in high-power automobiles. It cannot bind or lock. A foot-lever on the right side operates this brake. Both brakes are independent and can be applied separately or together as desired.

Enlarged Fork Rockers

The Excelsior front fork in the 17-3 and 17-3E is of the cradle type, as in previous models. The rocker arms are enlarged and forged of nickel steel. The crown and fork ends are extra-heavy nickel steel drop-forgings. There are five leaves in the spring section, all of vanadium steel. The rocker arms are lubricated by means of large compression grease cups. Head bearings have heavy tool-steel cups and cones of the inside type, with 5/16-inch high duty steel balls. The cups are set deep in the frame head forging, making a dust-tight bearing.

The handlebar is the familiar Excelsior three-point connection type with horizontal brace bar. The frame is the same as that used in the 16 models, with nickel steel drop-forgings throughout. It has strong sidecar lugs fitted in the 17-3 and 17-3E models. The frame incorporates the double support for the gearset and the rear of crankcase which characterizes Excelsior construction.

Other Constructional Details

The Excelsior Kumfort Kushion spring seat post is, of course, fitted to the new models, and an air-cushion saddle is used in connection with it. The footboards are of the firm's characteristic type, being long and comfortably located. The covering is rubber, for comfort and cleanliness. Wide Non-Splash fenders are fitted, with heavy bracings to prevent loosening and rattling. The rear fender is supported independently of the tubular luggage-carrier, thus allowing the latter to be removed if desired without interfering with the fender. The luggage carrier has been proved in hard service and is designed with especial reference to its possible use as a tandem seat. The stand is of the armless type, made extra strong and rigid, as well as wide enough at the bottom to give safe support of the machine.

The tank on Series 17 models has great

Digitized by Google

strength, as well as pleasing lines. The corners are nicely rounded and reinforced to prevent denting from falls. All fittings are solid brass, with anti-leak needle valves. In place of the priming gun heretofore used, there is an instantaneous-acting priming device by which gasoline is delivered direct from the tank to the inlet valves on both cylinders. In the oil compartment of the tank is the auxiliary hand pump, feeding directly to the crankcase. Both gasoline and oil filler caps are fitted with deflectors to prevent splash and leakage through or around the caps. The capacity of the tank is 2¼ gallons of gasoline and one gallon of lubricating oil.

Wheels and Tires

Wheels are 28 inches in diameter, fitted with Firestone, Fisk, Goodyear, Goodrich or United States non-skid tires. The wheelbase is 59 inches. Finish is Excelsior grey, with red panels having maroon borders, and blue and gold striping. All exposed metal, except crankcase, is heavily nickeled and hand-buffed. Model 17-3 is listed at $265, f.o.b. Chicago, Ill.

Model 17-3E

The electrically equipped model, 17-3E, has the MIDCO system in lieu of the high-tension magneto. The equipment consists of the generator, electric head and tail lights and electric horn. The generator, transformer and circuit-breaker are combined in one piece of apparatus, entirely automatic in operation and requiring no attention on the part of the rider, except occasional oiling. The ignition and lighting switches are both controlled by a positive lock, so that either or both may be secured against use, as desired. A unique detail of this device is a buzzer which is blown automatically in case the rider neglects to turn off the ignition current on stopping the machine. This prevents wastage of current, and, when the key is removed, affords a safeguard against theft.

The headlight is extraordinarily powerful and is fitted with main and pilot bulbs. A plug switch controls both bulbs. The tail light fully illuminates the license plate. There is a junction block for inserting a plug for an inspection or sidecar light. All wiring is encased in metal conduits and is thus protected from oil, accidents and the weather. The MIDCO generator develops an intensely hot spark at low speed, insuring easy starting and slow running without jerking.

The Model 17-3E has the same power unit, frame and other details as the 17-3. Its price is $295, f.o.b. Chicago, Ill.

Short Coupled Model

The Model 17-S.C., or Short Coupled Excelsior, is a machine whose motor conforms in general lines to that of the Ultra Power Stroke motor. In addition to the large valves and manifold, all gas passages are finished perfectly smooth throughout to facilitate the entrance and escape of gases before and after combustion. The carburetor is a special Schebler for speed work on this model. The lubrication system is the same as that on the 17-3 models, but the hand oil pump is on the outside of the tank instead of being contained in it. The frame conforms in general lines with the standard Model 17-3, but the rear is shortened and the wheelbase is 56 inches.

The front fork is rigid, heavily trussed and fitted with drop bars. The tank is the regular 17 model. Double brakes are fitted, one being operated by the pedals and the other by a foot-lever at the left side of the frame. Folding footboards are part of the equipment. Color is standard Excelsior grey with red panels and striping. This machine can be had with spring fork, raised bars, 3-inch tires and regular road equipment, the same as in Model 17-3, but minus a luggage carrier, at the same figure. The price of the Model 17-S.C. is $265, f.o.b. Chicago, Ill.

The motor used in Model 17-S.C. can be fitted to either the 17-3 or the 17-3E at $25 additional to the regular prices of those models.

Excelsior Lightweight

The Excelsior lightweight two-stroke motor in Series 17 is practically the same as that of the 16 model. The power plant is a single cylinder motor of the three-port type, with a bore 2/17-64 inches and a stroke of 2¾ inches, the piston displacement being 13.8 cubic inches. This model has a straight line frame, with the motor and two-speed gear carried on a nickel steel support at the base. The front fork on this model is of the rocking type, each side being a one-piece drop-forging. The pivot is at the crown, and shock and recoil are taken up by a special spiral spring.

Controls on this model are of the handle-bar type. The throttle and air slides in the carbureter are operated by levers and Bowden wire on the right bar, while a separate inverted latch operates the compression release. On the left bar is a lever for effecting the speed changes. The brake is of the shoe type, acting on the back of the rear wheel belt rim. Final drive is by V belt, on the right side. It will be noted that the flywheel on this motor is outside.

The gear ratio is 5-7/16 on high and 8-11/16 on low speed. The tank has a gasoline capacity of 1¾ gallons and of oil ½ a gallon. A measure for transferring the oil to the gasoline compartment, at the rate of 4 measures to the gallon is fitted, for the motor uses injection oiling. The wheelbase is 51 inches. Wheels are 26 inches in diameter with 2¼-inch Firestone tires. Weight is 135 pounds. Price is $135, f.o.b. Chicago, Ill.

CARRYING DRIVER AND DELIVERYMAN

Cygnet Rear Car Equipped Machine with Side-by-Side Seat, Enabling Two Men to Be Carried to Facilitate Delivery Work

PROVED POWERPLUS ABILITY IN CHEYENNE CONTEST

CHEYENNE, Wyo.—J. W. Henderson, the Denver representative for the Indian, recently demonstrated the power and speed ability of the Powerplus in a sidecar race in this city. When Henderson visited N. D. Folkrod, the local Wigwam representative, he was challenged by a competitor to a speed contest with sidecars and the crowd repaired to the mile track to see the race.

In a five-mile preliminary, Henderson lapped his challenger, while in a second event Henderson's lead was so great that his opponent withdrew. The Powerplus made 57 miles per hour in this one event.

Agent Folkrod recently had a hurry-up call to go to a motorcar with inner tubes 13 miles out of the city, and rode the distance on a rigid frame Powerplus in 12 minutes flat. It took him 40 minutes to make the 26 miles there and back, put in the inner tube, pump up and carry a passenger back to Cheyenne.

HOBOKEN CLUB ELECTS

HOBOKEN, N. J., April 3.—The Hoboken Cycle Club held its annual election of officers and chose E. Martin president. Plans were made for an extensive program this season and a membership campaign was launched.

ALBUQUERQUE M. C. HOLDS ECONOMY TRIAL

Flying Merkel Rider Travels 29½ Miles on a Quart of Gasoline; Bi-Weekly Sociability Runs Are Popular; 1347-Mile Endurance Contest Coming in the Near Future

ALBUQUERQUE, N. M.—All the energy of the Albuquerque M. C. is not being consumed in arranging for the record-making endurance run of 1,347 miles which was announced recently, and by-weekly sociability trips by the club riders have become regular events. Bi-weekly social programs, held in the evening, are also successful.

Recently the club staged an economy trial with the following competitors: Harry Wolking, president of the club; A. Dove, secretary; Tom Butterfield, vice-president; John Seth, press agent; Carl Nein, road captain; Joe Mari and Carl Simondson. The Flying Merkel, ridden by Aaron Dove, won the contest, traveling 29½ miles on a quart of gas. Joe Mari, 1915 Indian, was second with a run of 22.1 miles to the quart. Ralph Hill was the official gas-keeper and John Strumquist acted as score-keeper.

On Sunday, March 26, the club members made a trip to Belen, 36 miles south of Albuquerque. One of the points of interest visited was Isleta, the village occupied by the Pueblo Indians, and a show place in this section.

FLYING MERKELS WIN IN ARGENTINE RACE

MIDDLETOWN, O.—Word has been received by the Miami Cycle & Manufacturing Company, maker of Flying Merkel motorcycles, from Candido Bugallo, the Buenos Aires agent for that make, that first and second places in the Fourth Argentine Criterium were won on Flying Merkel twins. The winner was Arnoldo Bernasconi, who covered the 450 kilometres (279.5 miles) in 7:49, while Francisco Massolani was second in 7:57. The route was from Buenos Aires to Rosario, and the event was one of the leading annual classics of the Argentine.

HANDLING POWER BICYCLE IN NEW YORK

NEW YORK, Mar. 24.—Harry A. Gliesman, traveler for the Miami Cycle & Mfg. Co., of Middletown, O., has signed up the following agencies in the metropolis for the Miami Power Bicycle; Miami-Merkel Cycles Co., 1777 Broadway; Park Row Cycle Co., 34 Vesey street and Park Row; Terminal Sporting Goods Co., 42 Cortland street; M. J. Goldman, 115 Greenwich avenue; Nassau Bicycle Exchange, John and Nassau streets.

$400,000 FOR GOOD ROADS

UNIONTOWN, Pa.—The March grand jury has approved of the petition of the Fayette County commissioners calling for a bond issue of $400,000. The money will be used for county road improvements, it being the plan of the commissioners to build 18 miles of improved highways.

ANOTHER MILLION FOR ROADS

OTTAWA, Ont.—It is announced that, despite the war, the Province of Ontario will spend another million dollars this year for the improvement and construction of roads.

RACING MEN TRAIL JOY RIDERS

MILWAUKEE, Wis., April 5.—Sheriff Melms of Milwaukee County will inaugurate a new scheme this season with the addition of several local motorcycle racers to his staff of deputies. The board has purchased four more Harley-Davidsons for the sheriff, which will give him 10 motorcycles in his squad of joy dispellers.

OPENING THE RACING SEASON IN MEXICO

The Event Now in Progress Is an Australian Pursuit Race, and There Are Strong Indications that the Villista Team Will Be Lapped and Put Out of the Running in the Reasonably Near Future. "Cannon-Ball" Carranza Also Has a Team In.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

KINGSTON, N. Y.—C. E. Cressler, of 128 West Pierpont street, is anxious to get into touch with makers of bicycles and sundries, and would like catalogs and price lists. Cressler has the agency for the Schickel and Smith Motor Wheel at present, but intends to conduct a big cycle business in Kingston.

SELKIRK, Manitoba.—W. S. Young, who has just started in business in this city, requests catalogs on bicycles, lubricating oils and small tools.

READLYN, Sask.—Walter Eaglestone, implement dealer, is in the market for automobile accessories, bicycle, small tools and lubricating oils. Catalogs and price lists on these lines are requested.

MANCHESTER, Iowa.—W. B. Miller & Son have bought out the S. S. Arnold hardware store and will stock bicycles, mechanics' tools and lubricating oils. Prices and catalogs are requested from manufacturers and jobbers.

EDNA, Kan.—The Edna Implement Company has recently been organized with a capital of $10,000. Catalogs are requested on lubricating oils, small tools and sundries.

HINGHAM, Mont.—The Kimpel-Jenson Implement & Hardware Co., with branches at Gilford, Kremlin and Rudyard, is conducting a wholesale and retail business in bicycles, automobile accessories, small tools and lubricating oils. The headquarters are at Hingham, to which all communications on these lines should be sent.

ROCHESTER, N. Y.—The Henry Lester Hardware Co. has been incorporated with a capital stock of $35,000. It deals in lubricating oils, tools, varnishes and enamels. The company was founded in 1858.

TOLNA, N. D.—J. J. Schindele has bought out the hardware stock of George Halverson and wishes prices and catalogs on bicycles, automobile accessories, lubricating oils, small tools and enamels.

FAIRVIEW, Wyo.—Barrus & Son have opened a hardware and implement store. They request catalogs on lubricating oils, enamels, and mechanics' tools.

WILLIAMSFIELD, O.—T. N. Hart has opened a hardware store in this city and requests catalogs on automobile accessories, bicycles, small tools and lubricating oils.

MITCHELL, S. D.—The Peterson Hardware Company requests catalogs on bicycles, automobile goods, mechanics' and shop tools, lubricating oils. The capital stock is $25,000.

CYRIL, Okla.—Stephens & Blanton request catalogs on bicycles and accessories, small tools and lubricating oils.

"AT YOUR SERVICE!"

THIS is the tuning-up period, the get-ready season, the time for motorcyclists the country over to prepare their mounts for the road and to acquaint themselves with their motors so that they will be able to make any ordinary adjustments or repairs. In keeping with its long-recognized policy of giving practical service to both riders and the trade, Motor Cycle Illustrated herewith places its Technical Department at the call of riders.

There are no strings on this offer. When you find that you need assistance on a mechanical matter simply address a letter to the Technical Editor of Motor Cycle Illustrated and the inquiry will be answered promptly, and as fully as possible, in these columns. That's all there is to it.

We are in business to co-operate with you, and the oftener you take advantage of our invitation to profit by our Technical Department the more you will make us feel that we understand each other, that we are all Brothers of the Road working cheerfully together in a common cause; that we are giving you the kind of a magazine and the kind of magazine service that will make us still firmer friends. That's all the reward we'll ask.

Be sure to state your case fully, so that our Technical Editor will have all the information necessary to aid him in getting at the bottom of your trouble; and always give your full name and address. Your name need not be printed, if you give us instructions to withhold it.

From now on throughout the riding season Motor Cycle Illustrated will devote generous space to its Questions and Answers Department. Inquiries will be answered promptly under that heading, but if an immediate reply is desired by mail the necessary postage should be enclosed.

PRIZES FOR F. A. M. MEMBERSHIP WORKERS

The Federation Is Now Rewarding Its Boosters and Still More Attractive Awards Are Practically Assured for the Near Future

SECRETARY G. B. GIBSON, of the F. A. M., calls attention to the fact that the Federation is giving one dollar's worth of F. A. M. novelties to each worker who recommends five new members, and states that official collectors receive a five-dollar check every time they turn in the names of ten new $2 members.

These prizes, however, might be called merely introductory, as plans are now being worked out which will probably lead to the announcement of much more valuable awards for those who show exceptional returns in the membership campaign which is now being started. All the resources of the F. A. M. and the motorcycle industry are being drawn upon for material with which to spur on the membership campaigners, and while it is impossible to make a definite statement at this time concerning more prizes it is practically certain that they will be forthcoming.

From now on Secretary Gibson will send out regular weekly reports on the membership returns, and these will be shown from week to week on the **Motor Cycle Illustrated** clock. This clock appeared for the first time in the March 30 issue, and when it again appears the hand will have started on its way around the dial—checking off 100 new members every time it passes a minute mark.

F. A. M. members all over the country are called upon to get a membership movement started in their various districts, and to communicate with Chairman John L. Donovan, of the special membership committee, 819 Ashland Block, Chicago, concerning the progress that is being made and plans for future boosting. Chairman Donovan has some interesting F. A. M. literature that he will be glad to send out upon application.

NEW LAUNCESTON-HOBART RECORD IS SET

MILWAUKEE, Wis.—The Harley-Davidson Motor Company has recently received advices from Bennett & Wood, Ltd., Sydney, N. S. W. agent for the Silent Gray, stating that Dod Bayles, an Australian amateur, had broken E. G. Baker's Launceston-Hobart record. Bayles' time is given as 2:34:50, as against Baker's 2:37:00.

The newspaper account of the affair, taken from the Sydney *Examiner*, of February 22, states that Bayles, on his Harley-Davidson, left Launceston at 5:01 a.m., under official observation, and rode the 123 miles to Hobart, arriving at 7:35:50. The account says that Bayles rode the one machine throughout. He is at present the holder of the Tasmanian five and ten-mile championships.

DIAMOND PAMPHLET GIVES VALUABLE CHAIN DATA

CHAINS for motorcycle service bearing the Diamond trademark are the subject of an instructive booklet, known as Pamphlet M, recently issued by the Diamond Chain & Mfg. Co., of Indianapolis, Ind. This booklet has for its opening chapter valuable data on the care of chains, followed by a chapter on chain trouble and how to avoid it. The question of sprocket interference is dealt with and the results of its presence shown, while the proper thickness of sprocket teeth has a short chapter devoted to it.

The wide scope of Diamond chains is demonstrated by a good-sized section of the pamphlet in which are given the chains most suitable for all makes of motorcycles from 1908 to the present day. In each case, the size and number of the Diamond chain is given, together with its length, and this section alone is invaluable to the rider and dealer. Diamond chains have achieved a widespread popularity since their first introduction on the market, and in addition to being well known all over the United States, have been increasing in use in other countries, both for motorcycles and bicycles.

FRISCO-LOS ANGELES TOUR A FAVORITE NOW

LOS ANGELES, Cal.—Good roads have now so thoroughly linked up the two big cities of California, San Francisco and Los Angeles, that the 500-mile tour offers all the pleasures of a holiday jaunt. **Motor Cycle Illustrated's** correspondent glanced out toward the front of Passmore & Sayre's store and saw two very neatly dressed and comfortable looking young people with a spick and span 1916 Harley-Davidson machine and sidecar. "Those people are just in from San Francisco," said Salesman A. F. Van Order, and this was confirmed by the riders themselves, Mr. and Mrs. Vic. Dibene, of San Francisco.

They had come down in two days and a half with a one-day lay-over at Fresno, traveling via Oakland, Modesto, Fresno, Bakersfield and the Ridge Route into Los Angeles.

"No trouble at all and lots of fun," said Mrs. Dibene. They rather enjoyed the creeks which they rode even when the bottom was muddy and water came up to the spark plugs. Their best thriller was crossing the pontoon bridge over Castaic Creek, which gave them a combination of dip and side-sway that was a lot of fun.

VISIT SCENE OF AUGUSTA FIRE

SAVANNAH, Ga.—Over sixty riders from this city visited Augusta on March 25 to see the ruins of the fire which visited that city several days before. The visitors were glad to find that the motorcycle establishments in Augusta had not been touched by the conflagration, and were entertained by the Augusta dealers, as were riders from other cities in Georgia, Florida and South Carolina. The fire consumed 25 city blocks and made nearly 3,000 people homeless.

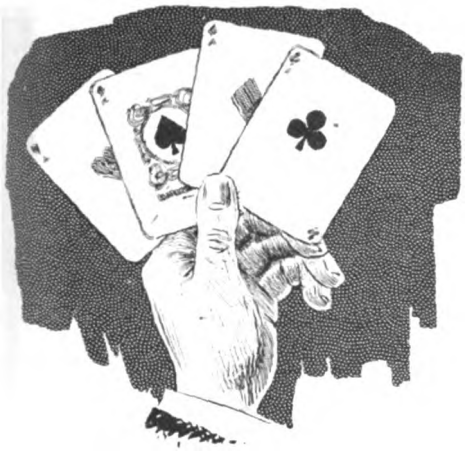
PINOCHLE AS AN AID (?) TO CYCLE SALESMANSHIP

After Reading the Article Below You Will See How the Combination Works Out and Understand Why It Is Highly Important That You Keep Out of the Pinochle Class

By RODMAN BARRY



The hand at the left is worth 100 points in a pinochle meld—that's all—while the value of the cards at the right is inestimable. The dealer referred to in this article played for the cards at the left. Are you making the most of the trumps at the right?

HOW can a motorcycle and bicycle agent be expected to pay proper attention to his business and at the same time meld a hundred aces with *fair regularity* in a pinochle game which is going on behind a partition in his store? The answer is—it can't be done. *Either the business or the pinochle is due to suffer,* and the writer has personal knowledge of one agency, not a thousand miles from the Metropolitan District, where the pinochle is doing quite well, thank you, while the business is drifting—to put it mildly.

We made a few heartfelt remarks concerning the incompatibility of business and pinochle recently when we interrupted a game by dropping in to discuss trade matters.

The Dealer's Startling Retort

"What about it?" was the somewhat heated retort. "*There ain't a leaf stirring in a business way now,* so why shouldn't I play some pinochle if I want to?"

"Did the idea ever strike you that you might get out and start something stirring?" we inquired.

"Pish-tush!" said Friend Dealer, with a knowing smile. "*When the business comes, it comes.* You can't make it. Yesterday it snowed. There may be a blizzard tomorrow. What's the use of getting excited? When the season opens I'll get my share of business. *Just now I would be almost as well off if I closed the shop and took a rest.*"

That was the best remark he made. He actually would have been as well off with the shop closed. *He could have played pinochle with just as much enthusiasm somewhere else.* But—at that precise moment his shop needed attention from a dozen different angles.

Room for Improvements

A second-hand motorcycle was fairly well out in the salesroom, in offensive contrast to a new model. The used motor should have been just as far back in the salesroom as it could be placed—*or better still, in another room.* The new model was dusty and a coat was thrown across the tank.

Several 1915 models were still dustier. Half a dozen cycles, also dusty and with the nickel parts dull, were in a somewhat confused mass in a corner. The showcase was dusty and the accessories in it were in a bewildering jumble. *They had never been used, but at a glance they looked like second-hand articles.* On top of the case were the morning's newspapers. Behind the case, leaning against the wall, was a battered bicycle frame.

Several posters hung askew, having pulled through one or more of the tacks intended to hold them—and a package of brand new literature from the factory rested on the back of the window platform, *still unopened.* The floor had its full quota of oil spots, and the wainscotting around the salesroom needed a coat of paint. The partition at the back of the salesroom had furnished a resting place for dozens of oily hands, and had finally assumed some of the aspects of a Black Hand bulletin board. It needed paint.

Only One Man Working

We didn't get into the repair shop—and we didn't need to. It was fairly easy to conjure up a mental picture of it. One man was working there, dejectedly, in a dim light. *For all practical purposes he might just as well have joined the pinochle game.*

There was only one account book in evidence, a small one, and from the appearance of its exterior it was a fair guess that the best lightning calculator standing in shoe-leather couldn't have made head or tail or its contents. Nine tenths of the bookkeeping of that establishment was under the proprietor's hat—which means that he is almost certain to be losing money even when he is doing business. It isn't humanly possible to keep such an establishment on an even keel with such a palpable lack of system.

No Punch in the Window Display

There were accessories—dusty and unattractively arranged—in the show window, with a bicycle, equally dusty, standing among them. If the window had been washed since the cold weather set in, it gave no evidence of the operation. *A passerby would have needed keen eyes to see what was in that window at a glance.* Therefore the window display was worthless. Even a casual glance in a window ought to show the passerby something of interest—something to make him hesitate long enough so that the full details of the display can impress themselves upon him. It's the first glance that counts.

FRIENDS IN LEGION MOURN E. M. ESTABROOK

Former Chairman of F. A. M. Membership Committee And One of the Most Sincere Workers the National Body Ever Had Dies at His Home in Bangor, Maine

By J. ALVAN HALL

Friend after friend departs;
Who hath not lost a friend?
There is no union here of hearts,
That finds not here an end:
Were this frail world our final rest,
Living or dying, none were blest.

Beyond the flight of time,
Beyond this vale of death,
There surely is some blessed clime
Where life is not a breath,
Nor life's affections, transient fire,
Whose sparks fly upward and expire.

EDWARD MERTON ESTABROOK, respected citizen of Bangor, Me.; one of the ablest and most hard working officials the F. A. M. ever had or ever will have; a staunch friend in every sense and meaning of the word, and a man of wise counsel and kindly adviser, passed to his final resting place on Wednesday evening, March 22, at his home, 76 Lincoln street, Bangor.

Expecting a reply to a letter of mine, instead I received the notice of his death, and with it a shock from which I will not soon recover and a realization of a great loss, for E. M. Estabrook had been for years one of my greatest friends, whose wise counsel and kindly advice I constantly sought and whose kindly letters of good cheer were always watched for as an inspiration to further and better effort on my part, particularly in my work in connection with motorcycling. He was a man who seemed to understand his brother men to an extent of which few are capable; once his friendship was won, he was always a friend.

Started as Railroad Man

Edward Merton Estabrook was born in Great Works in 1858, was brought up and educated there. He was employed as a young man on the European & North American Railroad as a baggage-master. He later went with the Maine Central Railroad in the same capacity, remaining with them until about twenty-five years ago, when he opened a bicycle and sporting goods store in Bangor.

Mr. Estabrook was an enthusiastic wheelman and one of the first motorcycle riders in this part of the country. He was one of the early members of the F. A. M., and about 1910 was made chairman of the Membership Committee, later becoming a Director. In the meantime his business had been combined with that of the S. L. Crosby Company, and Mr. Estabrook was made manager of the bicycle and sporting goods department.

From the time of his initial activity in the F. A. M., Mr. Estabrook became one of the hardest workers and most active, enthusiastic and conscientious boosters the organization had. In the five years previous to the time that Mr. Estabrook was made chairman of the Membership Committee the F. A. M. had secured about 2,000 members, and in the succeeding two and one-half years, after his acceptance of the office, it was due chiefly to his efforts that 11,500 new members were secured.

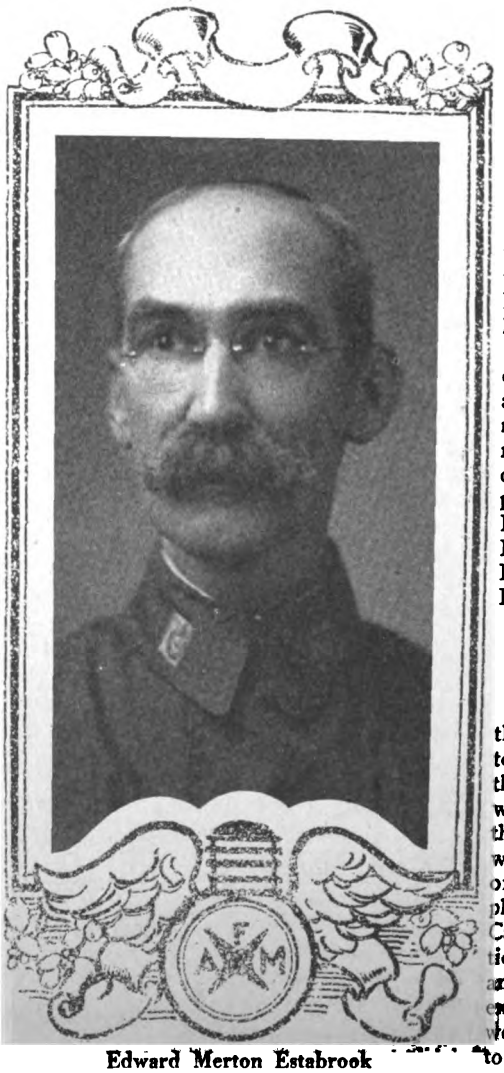
His work for the organization was untiring, night and day, and his only object was to boost the organization and the sport. These were his only aims, without a thought of self-boosting or self-advertising. Through Mr. Estabrook's efforts over 100,000 folders and booklets were sent out year after year regarding the F. A. M. in motorcycle tool-boxes and through other means.

Aided Organization Work

Mr. Estabrook believed particularly in state and local organization and worked hard to aid the formation of state bodies and local clubs. He had the constant and active support of every one of the manufacturers, and through this support was able to offer attractive monthly membership prizes. He secured the most active interest of Mr. E. A. Hawthorne, of the Hawthorne Manufacturing Co., and others, who donated thousands of dollars' worth of merchandise for membership prizes.

His response to letters of inquiry, etc., was always prompt and courteous, and as soon as an inquiry was received it was forwarded to State Commissioners for follow-up purposes. He was constantly aiding and co-operating with state and local commissioners to the fullest extent and helping them to find other able boosters. He often worked far into the night, but in spite of this, was never too busy to send a word of cheer or congratulation on any work of others that he thought deserved commendation. In this way he won the friendship and hearty support of active workers in all parts of the country. Always slow to criticise but quick with a boost, his criticisms when they did come were highly valued, because of his supreme kindliness and sincerity.

Year after year Mr. Estabrook was urged to accept the presidency of the F. A. M., but constantly refused, preferring to continue the work of chairman of the Membership Committee, which he greatly enjoyed. There is not the shadow of a doubt that he was the hardest working man—working only for the organization and the sport—that the F. A. M. has ever had.



Edward Merton Estabrook

Overwork Brought a Breakdown

In 1913, due to overwork, Mr. Estabrook suffered a breakdown, and he never recovered his full strength thereafter. His physicians advised him that he would have to give up some of his work or suffer the consequences. Instead of giving up the F. A. M. work, as most of us would have done under the circumstances, his interest was so deep and sincere in the organization that he resigned his position with the S. L. Crosby Co., and thereafter gave all of his working hours to the F. A. M.

Mr. Estabrook was not reappointed chairman of the Membership Committee, and about a year ago accepted a position as manager of the Chandler Company's phonograph department, which had been taken over by them from the Crosby Co. This position he held until the time of his death. Mr. Estabrook is survived by his widow, Mrs. Carrie Estabrook; a daughter, Mrs. Fred Collins, and a sister, Mrs. J. W. Brown.

PROTEST ON SIDECAR LIGHTING

TORONTO, Ont.—Secretary Shaw, of the Toronto Motorcycle Club, has written to the provincial authorities in behalf of the club to protest against the present law which compels the placing of a light on the outside edge of a sidecar regardless of whether a sidecar is on the right or left of the motorcycle. Many sidecars are placed on the left of the motorcycle in Canada, in which case the present regulation is practical, but it is of no benefit to anyone on the road to have a light on the extreme right of a sidecar outfit, which would be the case when sidecars are fitted to the right hand side.

LETTERS FROM ANOTHER TRIO OF NEAT MOTORCYCLISTS

They Were Given Honorable Mention in the Riders' Clothing Contest Which Closed March 25; The Prize-Winners Were Announced in the March 30 Issue

PROPER APPAREL FOR THE LADY RIDER

A Complete Outfit Which Is Neat and Practical for the Fair Devotee

By REBECCA PRATT

ALTHOUGH there is no mention in the clothing contest that lady riders are excluded from competing or not, I presume that they are permitted to give their views and so shall describe a costume which is one of the neatest and

Mrs. Rebecca Pratt

best adapted to the purpose which I have yet seen.

The costume consists of a coat, skirt, cap, leggings, gloves and goggles. The coat and skirt are made of olive drab flannel, the same which is used in making shirt and light weight coats for the army. It is one of the most durable kind of goods to obtain. It wears like iron and does not readily show dust or mud on account of its color. Washing will restore it to its original condition, no matter how dirty it is, and the color is fast. I waterproofed mine by a simple preparation which does not interfere with cleaning or pressing it when needed.

The goods can be purchased at most any U. S. Army goods store. It is 56 inches wide and 4½ yards will be needed to make the outfit described below. The cost will be about $1.25 a yard. I made my own suit, with the exception of the coat on which I had a tailor's assistance. The total cost was $10, which is the price of a skirt in many stores.

The coat is cut Norfolk style, with military collar, patch pockets at the breast and at the bottom on either side. Tops are fitted at the waist for a belt of the cloth, this fastening by a covered button. The lining is mercerized sateen of a color to match the goods. Buttons are made and covered with the olive drab flannel.

The skirt is a combination divided and walking one. It is made rather wide and for about two-thirds of the length both front and back it is left open. Snap-fasteners are used to close the skirt, each fastener being hidden under a covered button. When ready to ride solo or tandem, the buttons are unsapped to the proper distance and the wearer has one of the neatest divided skirts on the road. On arriving at my destination, I snap the fasteners and have a neat walking skirt immediately. At the waist, belt loops are attached through which a two-inch belt made of the cloth passes and fastens with two buttons. The skirt has one patch pocket on the right front and an ordinary "pistol pocket" on the right hip.

The cap is of the same material as the suit with a rather large visor to shade the face and loops around the front to keep a veil in place should the wearer use one. Leggings are also of olive drab flannel, cut in three pieces to fit closely and lined with medium-weight brown duck to stiffen them. They fasten with tan shoe buttons, like a high shoe and are 14 inches in length. An instep strap keeps each in place.

I favor pyralin goggles, combination amber and green. These are easy on the eyes, the green sector being very handy when approaching the glaring headlights of automobiles. In case of a spill, there is no glass to break and endanger the eyes.

The gloves are tan gauntlets or driving gloves which can be purchased in any department store at a nominal price. My own pair cost 85 cents and after one season's use are little the worse for wear. As to cost, utility and appearance, I think that this outfit would be hard to equal.

FOR WINTER, FALL AND SPRING RIDING

Describing a Neat and Inexpensive Outfit Adaptable to All Three Seasons

By DONALD BALL

IN MY opinion a proper costume for riding in late fall, winter or early spring should include all clothing to be worn by the motorcyclist and not the outer garments only. I think that the pastime is hurt more by inexperienced riders not realizing the need of proper winter clothing than in any other way. The costume which I am about to describe is not only comfortable but is also neat in appearance and easily kept so, at least as far as the outer garments are concerned.

As one thinks of underclothing first, my recommendation is a good, heavy fleece-lined union suit, long enough to have the legs come at least to the rider's ankles. Underclothing of this kind is warm, does not chafe or irritate, and as underclothing has to be worn and bought whether a man rides or not, it adds practically nothing to the bill and much to comfort. After underclothing comes the shirt or jersey, and my experience has taught me that a woolen shirt is best, as it costs only a trifle more than a cotton shirt and less than the jersey.

Woolen shirts are much warmer than cotton and equally as warm as jerseys, besides having a much better appearance. A shirt of this type is in good taste anywhere in the business world. A good pair of woolen pants that are lined make a warm, well-appearing and inexpensive article for this part of the costume. The wearing qualities are of the best and they are the warmest of anything obtainable in that line, besides looking well.

Next come the socks; these should be of wool, to keep the feet warm. An ordinary pair of shoes are all right, provided they are not too tight, as they will then interfere with the circulation. A good pair of Arctics are indispensable, as they keep the feet warm. They are inexpensive ($2.50 a pair) and look well. For leg covering, I prefer puttees, not

Donald Ball

Digitized by Google

Albert Lender, of Bellevue, Pa., Who Also Received Honorable Mention

only for looks but for protection. These cost about $3 a pair.

For a coat to go with the pants, any suit coat is all right. On the coldest days a good sweater-coat with roll collar should be worn between the shirt and the suit coat. One is not needed on the warmer days, but it cannot be done without when the temperature is low. A good wool mackinaw is an ideal overcoat, giving as it does a neat look combined with warmth and the full use of the legs. The cost is about $6. The mackinaw also wears better than most coats costing twice as much.

Any good cap with earflaps and small visor is fine. It keeps the head warm and looks well, besides being inexpensive. Either a pair of fleece-lined mittens or a pair of handlebar gauntlets in connection with ordinary leather gloves will be right for the hands. I have a pair of the latter on my machine and find that I can ride on the coldest days with kid gloves on for any distance and still keep my hands as warm as when using lined mittens. The gauntlets are inexpensive and last as long as the machine. They are certainly worth the price.

THOROUGH POSTING FOR NEW JERSEY RUN

Plans Call for 1,200 Markers to Show Turns and Others for Running Directions—Special Provision for Lightweights

NEWARK, N. J., April 3.—Plans for the New Jersey M. C. 400-mile day-and-night endurance contest are rapidly nearing completion and entry blanks will be ready for distribution by April 15. No map of the course will be issued except to contestants and then only on the night that the run starts.

The course will be posted with 1,200 orange triangles, similar to those used in the Dayton-New York F. A. M. run last October. These markers are plain and will be used in three positions to denote running directions: to the left, to right and straight ahead. They will be posted in such a manner as to be seen long before the contestant is abreast of the pole bearing one and all turns will be marked on both sides.

Only two secret check stations will be established on the course. These will be used to break up any possible tie-scores and will affect the cup and accessory awards only.

Gold medals will be awarded to all contestants making all known checks on scheduled time, silver medals for those who lose less than 25 points and bronze medals to riders with scores of 950 points. The contest will start at 8 p. m. on May 29th, with a return to Newark for breakfast and the day lap will keep the riders out until after 6 p. m. of the 30th.

The schedule will vary between 20-25 miles per hour for the solo riders, 17-21 for side-cars, and 15 for the lightweights. In addition to the slow schedule for the lightweights their riders will not be required to ride more than 300 miles cutting the main course several times to save distances.

The cups to be won are: Dealers Trophy, for factory teams; Herrington Cup for dealers or their employees; and several other trophies which are to be decided upon before the run. They will be put up for the best side-car performance by an amateur, the best solo performance in each class, and the best lightweight score. The Indian factory team has already two legs on the Dealers Trophy out of the three necessary to gain possession of it, while the Herrington Cup has already been won once by a Harley-Davidson dealers' team consisting of August Zimmerman, of Washington, D.C.; Elmer Havenstrite, of Paterson, N. J., and W. A. Ford, of White Plains, N. Y.

FIRESTONE IN GRAND RAPIDS

GRAND RAPIDS, Mich.—The Firestone Tire Company has established a factory branch here which will be in charge of L. R. Jackson and V. R. Shattuck. A stock of 500 tires will be carried.

"MILLION BICYCLES" COMMITTEE WILL STAGE RACES

Will Hold Series of Races Beginning With Decoration Day All Over the Country—Committee Will Appoint District Racing Commissioners and Furnish Prizes for Every Race

By CHAS. F. OLIN

Secretary, "One Million Bicycles" Committee, Bristol, Conn.

BRISTOL, Conn., April 4.—A series of road races that will be staged throughout the United States, beginning with Decoration Day, is the newest item on the program of the busy "Million Bicycles" committee. A list of prizes will be offered by the committee for each race, the number of prizes depending upon the entries and the size of the city in which the race is staged.

Dealers Must Get Together

The idea is that the dealers in the several cities shall get together on this plan and jointly organize a race that will be more than an ordinary road race—will be a big affair, attracting a large entry list. The committee will assist the dealers planning such a race in every way possible.

Racing commissioners are now being appointed for all sections of the country. These commissioners will be thoroughly informed regarding the detail of racing arrangements that are necessary to the success of the event. They will also act as handicappers, thereby relieving any dealer from possible criticism among the riders in his home city. So far as is possible, men who are entirely disconnected with the trade are being sought for commissionerships, and the committee has already succeeded in finding ex-bicycle racers in several instances.

There is absolutely no question that a well-advertised bicycle road race, under proper management, is a mighty big booster for the bicycle. On Bicycle Day about a hundred of such races occurred in sections of the country where the weather permitted, and in each case the crowds attracted to the race included many who afterwards bought cycles, because of the interest stimulated in this sporting event. Therefore, the "Million Bicycles" committee is exerting every effort to bring about races everywhere on Decoration Day.

Squeezing Dollars Out of Races

That such events pay handsomely for all the work put into them has been repeatedly proved. Especially has this been true where dealers have made window displays and used newspaper space in advertising cycles the day of the race and immediately showing it.

It is the purpose of the committee to bring about, through the dealers, bicycle road races in every city of five thousand population or more in the entire country. This is a big undertaking, but, after the remarkable success of Bicycle Day, the committee is certain that the dealers are ready to take up the racing proposition with the same vim and enthusiasm.

The "Million Bicycles" committee asks that each dealer make it his business to talk with other dealers in his town and secure a conference of all dealers at which the races can be considered. Do not wait for the other fellow—he is waiting for you, and the time will be spent in waiting for each other rather than in getting busy on a matter that will mean better business for everybody concerned.

Committee Will Co-operate

At this conference a dealers' organization should be effected by selecting a president or chairman, secretary and treasurer. When this has been done, the secretary should notify the writer, secretary of the "Million Bicycles" committee, Bristol, Conn., and this information will be immediately passed on to the racing committees and district commissioner, who will furnish full information and extend co-operation. This co-operation will consist in providing a list of prizes, furnishing entry blanks and number cards for the riders.

From the fact that these entry blanks must be specially printed, it will be necessary for the dealers at the time of their organization to select a date for the race—if it is to be run on any other date than Decoration Day—and also to select a course.

In connection with the selection of the course, the committee recommends that the course should lie as near the center of the town as possible and part of it should go through a well-populated section which is easily accessible from the center. The distance covered by this course should also be stated. A ten-mile race is recommended, because anything over that distance would be too severe a strain on novice riders and because the races are being held with the idea of attracting a lot of new riders, as we believe the bicycle-boosting value of the race lies largely in the interest aroused in young riders who have never been in a race before.

Where the race is not run on Decoration Day, any Saturday afternoon will be a good time to hold it, for a great many of the shops are then closed and there are, therefore, more people on the street. This, however, is a matter that should be left entirely to the judgment of the dealers' committee. After laying out the course, a permit should be secured from the proper city official. This is very important and should be looked after before any publicity is given to the race. If the course is through a part of the city where there is considerable traffic, arrangements should be made for police protection in order to avoid accident.

There is no good reason why every city in the country should not get the benefit that will come from putting on a big road race. The "Million Bicycles" Committee is giving more complete assistance than has ever been offered by the trade in connection with such events—in fact, they have planned the whole thing out for the dealer and furnish him a commissioner to help carry out those plans. It is hoped, therefore, that response will be received from all over the country. The writer urges, however, that action be taken at once by the dealers, as dealer organizations perfected at the last minute will not allow the committee to give its full co-operative service.

"A NIGHT IN OLD HEIDELBERG"

TONAWANDA, N. Y., April 3.—Last Saturday night the Eldredge Bicycle Club celebrated "A Night in Old Heidelberg." As the name suggests, the affair was carried out in real German fashion. Speeches were made in German by several of the members and the Squirrel and Owl quartettes rendered German folk-songs. The supper too, recalled fond memories of Old Heidelberg, for frankfurters, sauerkraut, Zeppelin dessert and 42-centimeter perfectos had a prominent place on the menu.

RACEMEET AT STOCKTON

STOCKTON, Cal., Apr. 2.—Frank Klotz, president of the Stockton Bicycle Club, plans to hold a big bicycle racemeet in the second week of May. The events will be a six-man team race, three handicap races for high school boys at one, three and five miles, and a scratch race at one mile. Entries have already been received from riders in Fresno, Merced, Sacramento, San Jose, Oakland, and San Francisco.

SALT LAKE RIDER GOING TO NEWARK VELODROME

SALT LAKE CITY, Utah, Apr. 3.—Artie Farnow, the holder of the 1915 bicycle championship of Utah, has announced that he will ride in the ranks of the simon pures at the Newark Velodrome this season. He will arrive at the Newark track in time for the Irvington-Millburn road race. Farnow has made a remarkable showing in his state, and those who followed his riding career here expect him to make a strong bid for the national championship.

Artie Farnow

ENTRY BLANKS ARE OUT FOR C. R. C. A. CENTURY

NEW YORK, N. Y., Apr. 4.—Entry blanks are now out for the spring century run of the Century Road Club Association, which will be held over the usual Long Island course on Sunday, April 23. The course was recently surveyed and found in good riding condition.

There will be a fast division in charge of Edwin Jensen and a pleasure division under the direction of Louis Zeno. Riders in the latter division must start from Columbus Circle or Bedford Rest at 7 a. m., while the fast division gets under way from the Circle an hour and a half later. Entry blanks giving full information can be secured from Sylvain Segal at 126 West 116th street, New York.

MADONNA RIDES IN CORK RACE AND IS DEFEATED

NEW YORK, N. Y., Apr. 3.—The second weekly cork race of the Unione Sportiva Italiana was held last Sunday over the Shore Road, Brooklyn, and covered a distance of 18 miles. Twenty-eight riders faced the starter, among whom was Vincent Madonna, the Providence motor-paced rider.

The race was a scratch affair and developed into a two-sided fight between Bello and Madonna. So fast was the pace that half of the field was shaken off before the five-mile mark was reached. In the final drive Bello won by about fifty yards. Chas. Rabbino was third; J. Alfonso, fourth; C. Fontana, fifth; and C. Zoccola, sixth.

C. A. C. C. RELAY ON APRIL 23

SAN FRANCISCO, Cal., Apr. 2.—The annual thirty-mile relay novice race of the California Associated Cycling Clubs will take place at the Golden Gate Park Stadium on April 23. The race was originally slated for April 9, but has been posted because the Bicycle Day meet will be held on that day at the stadium. Entries for this event have been assured from the New Century Wheelmen, Acme Wheelmen, Garden City Wheelmen and the Stockton Bicycle Club.

WILL UNITE CLUBS IN WEST MICHIGAN

Big Cycling Body Formed in Grand Rapids Which Will Have Branches in All Parts of Western Michigan; Fifty Charter Members

GRAND RAPIDS, Mich., Apr. 4.—For the purpose of uniting the cyclists of this section into a body that will boost bicycling on a larger scale than has been witnessed for many years, the Western Michigan Cycle Club was formed in this city last week with fifty charter members. Grand Rapids will be the headquarters of the club, which, as its name indicates, will have local divisions in towns that are situated in the western portion of the state. An active campaign will be conducted to form as many of these local cycling divisions as possible.

A. B. Gillette, a rider of considerable prominence, has been elected president of the club, and he will be supported by the following officers: R. O. Denison, treasurer; C. M. Shook, secretary; Clare Beyers, road captain; Robert Kulms, lieutenant.

Immediately after the formation of the club last week, the officials of the Y. M. C. A. here offered to co-operate with the cyclists in every way possible in order to further the interests of the sport in Grand Rapids. At certain hours each day, the gymnasium will be open to the club members, as well as the shower baths and pool.

It is quite likely that the Western Michigan Cycle Club will avail themselves of the offer made by the Y. M. C. A. men to use their building as a meeting place.

As soon as the news of the formation of the club had spread to the towns near Grand Rapids, letters from cycling clubs were received here asking for further information regarding the movement to unite all the riders in Western Michigan into one strong body.

Communications were received from Petoskey, Grand Haven, Muskegon, Manistee and Travers City. All of the clubs in these cities were of the opinion that much could be accomplished by the formation of a large cycling association, such as the staging of big meets this summer in some centrally located city, the exchange of touring information, etc.

The new organization is in reality a revival of the old Western Michigan Cycle Club, which was very active about twenty years ago. At the time it flourished the old association was one of the most powerful athletic institutions in this part of the state. Many events of national importance were held under its auspices.

WRIGHT LEADS IN CRESCENT MILEAGE CONTEST

Baltimore Riders Have Traveled 9,109 Miles and 22 Centuries Since First of Year—Three Open Handicap Races Are Being Planned

BALTIMORE, Md., Apr. 3.—Wm. T. Wright is still in the lead in the century mileage contest of the Crescent Bicycle Club up to the end of February, Walter V. Iglehart remaining in second place, and Fred M. Sanborn, third. John G. Stricker is fourth; Ernest Nitz, fifth; Welby Sherman, sixth; Lester Nickles, seventh; Langdon M. Sanborn, eighth; Walter Doersch, ninth, and Roland Bishop, tenth. The total for the month is 3,768 miles, including 6 centuries, making a total from the first of the year of 9,109 miles and 22 centuries.

The most ambitious program of the club's history is being planned for the coming season. Three open handicap road races will be held: one each on Decoration Day, the second the Fourth of July, and the third, Labor Day.

The annual open half century or fifty-mile pleasure run will be held on May 7, and every finisher will be awarded a handsome sterling silver medal. Fully half of the route will be over the smooth streets of the city, and the entire run will be a very easy one. A very slow pace will be set so that even the most inexperienced riders can take part in the run with pleasure and ease. Entry blanks may be had from any local dealer, or from Fred M. Sanborn, 1933 Harlem avenue, Baltimore.

TO HANDLE ROLLFAST TIRES IN MACON

MACON, Ga.—Carl D. Stier has opened a bicycle store in this city, at 157 Cotton avenue, and has taken the distribution agency for Rollfast tires, the product of the D. P. Harris Hardware Co., of New York. Stier has been identified with the bicycle industry in Atlanta and Birmingham for the last ten years, and handles goods both wholesale and retail. He has already received quite a number of inquiries for Rollfast agencies.

CITY IS USING ROLLFASTS

JACKSONVILLE, Fla.—The City of Jacksonville has adopted the non-skid chain cup Rollfast tire, for all the cycles used in its city departments. Bicycles are used by the water, gas, electric, police and fire departments at present, and their employment is spreading rapidly.

"BUY-A-BIKE" WEEK BRINGS HOME THE BACON

Big Sales Demonstration in Canada Last Week an Unbounded Success — Newspapers Gave Splendid Support Throughout the Dominion—Dealers Were on the Job

TORONTO, Ont.—Bicycle Week and Spring came hand in hand for Canadian bicycle dealers. The big sales demonstration was staged during the entire week of March 27, and during the same period balmy breezes chased Jack Frost toward the North Pole. What with encouraging Spring weather, decorated store fronts, smiling wheel salesmen, pages and pages of bicycle matter in the daily papers, and natural tendencies, the official "Buy-a-Bike" campaign of the Canadian trade proved an unbounded success.

There were more boosts for the bicycle during the "Spring drive" than were secured by the trade during the whole 1915 season. Everybody was reading or talking "bicycle."

Honor Roll of Papers

The movement was by no means local. The majority of daily papers in every large city in the country contributed to the general success of the sales demonstration by running column after column of editorial praise for the cycle and the cyclist. The following papers deserve special mention: Montreal *Daily Star,* Montreal *La Presse* (French), Toronto *Daily News,* Toronto *Daily Star,* Toronto *World,* Hamilton *Spectator,* Hamilton *Herald* and Hamilton *Times,* Brantford *Expositor* and the papers of Sault Ste. Marie. These papers ran at least one whole page of bicycle "stuff," while the Toronto *Daily News* published more than two full pages of bike articles, banked by advertisements.

Refer to Palm Beach

The Canadian newspapers made special mention of the bicycle's popularity among the smart set at Palm Beach, Fla., while they all told, in many ways, of the health-giving advantages of the wheel. Facts were published about the various bicycle sport and trade associations, while frequent references were made to the "boom days" of the nineties. It was pointed out, however, that the bicycle was now considered only in a practical light, so that there was little danger of the bike experiencing only another temporary "craze." The general opinion was that the bicycle had come back to stay this time.

An amusing incident was a reference to John D. Rockefeller as a cyclist. One paper pointed out that the oil magnate was riding a bicycle probably because he could not stand the high cost of gasolene. The Toronto *Daily News* declared, editorially, that "Mr. Rockefeller appreciates the value of the bicycle as a health-giver and as a pleasure—and he doubtless finds the wheel useful. His example could be profitably followed by others less fortunate in the matter of money."

Several publications referred to the organization of the Canadian Wheelmen's Association at London, Ont., in 1882, while stories were printed about the introduction of the bicycle into Canada by A. T. Lane, of Montreal, in 1876. It is a singular feature that the present year is the fortieth anniversary of the wheel in the Dominion. Comment was made on the campaign of the manufacturers in the United States to sell 1,000,000 bicycles in 1916, and the aim of the Canadian trade is to sell 100,000.

Interested in Clubs

Dealers' stores looked bright and shiny, and the bicycle occupied prominent places in many windows during the week. The fine weather also coaxed many cyclists to the roads as well. Inquiries regarding the formation of bicycle clubs were also received by some retail tradesmen.

The consensus of opinion is that the bicycle dealers of Canada have "put over" a striking sales feature and it is more than probable that the Spring demonstration will become an annual feature in most cities. The "Buy-a-Bike" campaign just held was undoubtedly the greatest individual boost that the bicycle ever enjoyed in Johnny Canuck's country.

NEW SCORING SYSTEM FOR U. S. I. RACE ON SUNDAY

NEW YORK, April 3.—Harry Kaiser, the professional six-day rider, has accepted the invitation of the Unione Sportiva Italiana to fire the gun that will start one of the classiest fields of riders in its 10-mile handicap road race next Sunday, April 9, from the Oriental Hotel in Floral Park, L. I.

The committee in charge of the race has spared no expense nor effort to make this monster race a creditable opening event of the big racing season confidently expected in the East. Up to late on Tuesday night, April 4, 136 entries were received at the clubhouse of the Unione Sportiva Italiana.

At the Five-Mile Turn

The promoting club has incorporated a number of new ideas in the 10-mile race at Floral Park, chief among which is the method of scoring at the five-mile turn. Heretofore the matter of scoring the riders at the turn has been a very difficult one, for several times during the race a big crowd of riders would make the turn together, so that the scorers could not check their numbers with any degree of accuracy.

For the race next Sunday a numbered tag has been provided for each rider, which he must hand to an official stationed at the five-mile turn. Any rider failing to give in his tag at the midway point will, the U. S. I. promoters have announced, forfeit any prize to which he might otherwise have been entitled. To assist the contestants in having their tags ready at the proper time, another official will be at a point one-quarter of a mile from the turn, waving a green flag.

HARRY KAISER QUITS ACME RACE AFTER ONE LAP

NEW YORK, Apr. 3.—The first of the Acme Wheelmen's weekly cork races was held last Sunday over the Eastern Boulevard course in the Bronx, the distance being 4½ miles. The scratch men gave liberal handicaps, but in spite of this Fred Woisin, who rode from scratch, overhauled the field and won handily in the time of 12:26.

The other two scratch men, Harry Kaiser and George Cameron, both six-day riders, rode only one lap and stopped because of the heavy roads. Twenty-five riders started in the race. The order of the finish was as follows: F. Woisin, first; E. H. Spillane, second; G. Grundy, third; H. Neibhur, fourth; Frank Mesner, fifth. The Acme Wheelmen have entered twenty men in the U. S. I. Race which will be held next Sunday.

HOLD TWO-DAY RUN

SAN FRANCISCO, Cal., Apr. 2.—The New Century Wheelmen held their annual two-day club run to San Jose on March 25-26. The cyclists left their club house at 8:30 a. m., with thirteen riders in the crowd. The trip of 53 miles each way was made without accident. Arriving in San Jose, the New Century boys were the guests of the Garden City Wheelmen.

CLUB SECRETARIES

Write to the Bicycle Editor if your club's events are not listed below

April 9.—New York. Ten-mile open road race, Unione Sportiva Italiana. Rain date, April 16.

April 14.—Boston, 25-mile international motor-paced race at Revere Beach oval.

April 23.—New York. Spring century of the Century Road Club Association. Rain date, April 30.

April 30.—Bicycle run, Chicago to Wheeling, Chicago Club.

May 7.—West Hoboken, N. J. Hudson boulevard 25-mile bicycle road race, Century Road Club of America, New Jersey Division.

May 7.—Newark, N. J. Twenty-five-mile open road race, Century Road Club of America, New Jersey Division. Rain date, May 14.

May 14.—Bicycle run, Chicago to Elgin, Chicago Club.

May 21.—New York. Ten-mile open road race, Century Road Club Association. Rain date, May 29.

May 28.—Bicycle run, Chicago to Blue Island and return, Chicago Club.

May 30.—Bicycle road race, Chicago Club.

June 11.—Bicycle run, Chicago to Crown Point, Chicago Club.

May 30.—Newark, N. J. Irvington-Millburn road cycle race, 25 miles.

May 30.—Washington, D. C. Twenty-five-mile road race, auspices of the dealers.

June 4.—New York. Fifty-mile open road race, Century Road Club of America, New York Division. Rain date, June 11.

June 18.—New York. Ten-mile open road race, Acme Wheelmen of New York. Rain date, June 25.

June 25.—Bicycle century run over Chicago-Waukegan course, Chicago Club.

July 2.—Bicycle run, Chicago to Des Plaines, Chicago Club.

July 4.—Bicycle road race, Chicago Club.

July 4.—Wichita, Kas.—Bicycle race promoted by dealers.

July 16.—Bicycle run, Chicago to Lake Zurich, Chicago Club.

July 30.—Bicycle run, Chicago to Miller Station, Chicago Club.

August 6.—New York. Pleasure run, carnival of sports and races, Century Road Club Association. Rain date, August 13.

August 12.—Bicycle run, Chicago to Waukegan, Chicago Club.

August 19.—Bicycle road race, Chicago Club.

August 20.—Bayonne, N. J. Pleasure run and races, Hudson County Wheelmen of New Jersey. Rain date, August 27.

August 27.—Bicycle run, Chicago to Aurora, Chicago Club.

September 3.—New York. Ten-mile open road race, New England Wheelmen of New York. Rain date, September 10.

September 4.—Bicycle road race, Chicago Club.

September 10.—Circuit of the Lakes, Chicago Club.

September 17.—New York. Fifty-mile Italian road championship, Unione Sportiva Italiana. Rain date, September 24.

September 24.—Bicycle run, Milwaukee to Chicago, Chicago Club.

October 1, 8.—New York Interclub Amateur Road Racing League annual championships. Rain dates, October 15 and 22.

October 8.—Bicycle run, Chicago to Hammond, Chicago Club.

October 22.—Bicycle run, circuit of Chicago outer belt, Chicago Club.

October 29.—New York. One hundred and fifty kilometers (84 miles), Italian road championship, Unione Sportiva Italiana. Rain date, November 5.

November 23.—Newark, N. J. Two-hour team race, Bay View Wheelmen of Newark. Rain date, December 25.

MOTOR WHEEL NEWS

MILWAUKEE, Wis., April 4.—Japan is developing quite a number of Smith Motor Wheel enthusiasts. One of the motor wheel dealers in Kyoto wrote a very interesting letter to the A. O. Smith Company recently in which he spoke of the great satisfaction which the bicycle booster is giving and the fine prospects for selling many of the attachments this year. The Smith company reports a brisk trade with agents in the Orient, and believes that the field in the Far East is larger than commonly supposed.

Johnson & Meyer Company, of Memphis, Tenn., motor wheel distributors, have secured the states of Arkansas, Georgia and Florida, in addition to their original territory of Tennessee, Alabama, Mississippi and Louisiana.

New Motor Wheel Dealers

Among the new motor wheel dealers signed up last week are George Frank, Bay City, Mich.; W. G. Goldsmith, Peru, Ill.; the J. N. Page Co., Naugatuck, Conn.; W. H. Hayworth, Maquoketa, Iowa; Richardson & Marsh, Durango, Colorado; O'Neill Hardware Co., Lake Forest, Ill.; Canton Motor & Cycle Supply Co., Canton, N. Y.; B. H. Sanborn & Co., Middlecourt, Ohio; Lane Bros., Corsicana, Texas; Winburn & Moore, Denison, Texas; Hale Hardware Co., McCleansboro, Ill.; Jess Hefferman, Big Springs, Texas; A. B. Cooley, Joliet, Ill.; A. G. Thurman, Greenville, Texas; Robert B. Thomas, Kelawna, B. C.; E. F. Park & Co., Bryan, Texas.

C. R. C. OF A. HOLDS ITS ANNUAL SPRING CENTURY

NEW YORK, N. Y., Apr. 4.—The twenty-fifth annual spring century of the Century Road Club of America's New York Division was held last Sunday over an entirely new course on Long Island.

The cyclists started from Columbus Circle at 8:45 in the morning and pedaled over the Queenboro Bridge out to Richmond Hill where the Brooklyn contingent, who had started from Prospect Park Plaza, was met. Continuing as one body, the riders went through Floral Park, Hicksville, Huntington, Smithtown, the dinner stop; Huntington, Westbury, Floral Park.

WINDOW DISPLAY SUGGESTED BY DAVIS SEWING MACHINE COMPANY

WHO BROUGHT THE FIRST BIKE TO AMERICA?

Death of A. T. Lane, of Canada, Recalls the Spirited Controversy Between Boston and Montreal Riders as to the Holder of That Honor.

EDITOR Bicycling World Dept.:—The small item in your recent issue noting the death of A. T. Lane, of Montreal, and stating that he was credited with having brought the first bicycle from England to America in 1872, recalls the friendly but spirited controversy which existed for several years between the veteran cyclists of Montreal and Boston as to which was entitled to the honor of priority. Old files of the *Bicycling World*, sometime along the middle nineties, would bring out the claims and facts on both sides; but as I now remember it, the controversy was started by a correspondent giving the Boston contingent some credit which the Canadians felt belonged to them. Lane himself took the matter up and made a strong case, with of course some replies from Boston.

The net result seemed to be a draw, for while Mr. Lane undoubtedly proved that he was the first bicycler on the American Continent, the honor of having the first club, or at least the one with the largest continuous existence, was safely lodged at the "Hub"—the famous Boston Bi. Club. Good old "Papa" Weston would never give up on that point. Incidentally, the passing of Lane makes still smaller that notable company of real pioneers, which included "Happy Days" Pitman, Frank W. Weston, Col. Albert A. Pope, "Ned" Hodges, "Joe" Dean, and a few others whose names are becoming harder to recall.

Lane was an occasional visitor to the New York bicycle shows about twenty years ago; and was typical of the Canadian wheelmen of that era, quiet but energetic, a gentleman of the old school, one likely to make friends perhaps deliberately, and then keep them for very long. One of his contemporaries was Dr. P. E. Doolittle, of Toronto, at whose home Frank G. Lenz and the writer spent a mighty pleasant evening when Lenz made a side-trip to Toronto on his attempt to make a cycle trip around the world. Lane was once president of the Canadian Wheelmen's Association; and I think Dr. Doolittle was also, in later years.

Notable Tours Were Made

There was great activity in Canadian bicycle circles during those days, and some notable tours, such as from Montreal to Detroit, Quebec and the Saguenay District, Goderich-on-Lake Huron, and even to the Maritime Provinces. Quite a number of young Canadians became racing men, several of them competing with honors on the tracks of the United States, while our speed-merchants of that day made occasional excursions into their territory. One can easily imagine that the sons of some of those veteran Canadian cyclists are today serving on the battlefields of Europe, or have already gone to the soldiers' last bivouac.

The club spirit was very strong, especially in Montreal, Toronto and London; and I recall that on one occasion the Montreal organization published souvenir booklet of the Island of Mount Royal, its environs, and the several picturesque trips to be made thereon and therefrom, which was a very creditable production. It is a fairly safe guess that Mr. Lane had something to do with this. In a large sense, he was to the veteran Montreal cyclists what "Papa" Weston was to those of Boston.

May they both rest in peace!

ROBERT BRUCE.

SCHIEDER IS BUFFALO'S BEST AMATEUR RIDER

BUFFALO, N. Y., Apr. 3.—Two bicycle races—a five-mile lap event and a one-mile consolation—were staged at the Seventy-fourth Regiment A. A. games here on Sunday night, and Joe Schieder, of the C. Y. M. C. A., was presented with a loving cup as the highest point scorer of the indoor season.

The five-mile race was run off in five preliminary heats at one mile and one final, which developed into a three-cornered battle for Joe Schieder, Robert Schultz and Billy Anthony. Schieder again proved his superiority over the local amateurs by copping first place, while Schultz and Anthony were tied for second position. The one-mile consolation was captured by J. M. Tanner, with Charles Kohlmeyer second and Eddie Levy third.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

Thirteenth Installment

Kramer came near losing the National Championship in 1909, when the puncture jinx trailed him in three titular events. He beat Clark by only six points.

FRANK KRAMER had the hardest battle of his career in 1909 before he finally won the cycling championship of America from Jackie Clark, the Australian rocket. It was an uphill fight all the way, and the peerless East Orange rider, finishing the season in a blaze of glory with three straight victories in the last three championship races of the season, carried off the title for the ninth consecutive time.

Kramer finished with a lead of six points over Clark, the champion having 42 points against 36 points for the speedy Australian rider. Joe Fogler was third with 19 points and Eddie Root finished in fourth place with 10 credits.

It was a wild season for Kramer from beginning to end. Besides having all kinds of hard luck and gaining the title of the "Puncture King," Kramer had practically the entire field of stars working against him in an attempt to take his championship laurels.

There was real excitement on the day for the last championship race, with Kramer but one point ahead of his Australian rival. The championship race was robbed of a great deal of its interest when Jackie Clark, along with 8 or 10 other stars, failed to start.

Officials Stop Conspiracy

It had been planned to run the last title affair of the season at five miles, but when the referee at the track and Charles B. Bloemecke, the vice-president of the National Cycling Association, found out that Jackie Clark, along with Joe Fogler, Eddie Root, John Bedell, Paddy O'Sullivan Hehir, Ernie Pye and Iver Lawson and a few lesser lights, intended teaming so that Clark could win, the officials wisely cut the distance down to one mile, which would crimp the conspirators.

There was a great "holler" when the change in the distance of the race was ordered, and the late Floyd McFarland, who at that time was the manager of Clark, shouted the loudest. The other riders joined McFarland in protest, but it did them not a bit of good. This clique of "pros" had signed up practically every rider on the track, with the exception of Floyd Krebs, for their combination, and they already had visions of the championship crown perched on Clark's head.

When the riders were called to the starting mark Clark, Fogler, Root, John Bedell, Hehir and Pye did not appear. Iver Lawson had a binding contract and after riding one lap he quit. With all of the stars out Kramer won easily; but if all the stars of Europe and America had been in the race and every rider on his own, the chances are that Kramer would have won just as handily. He beat Charley Stein, Floyd Krebs and Teddy Billington to the tape and again annexed the championship.

There were 10,000 people at the track expecting to see Kramer and Clark come together in the last championship race of the season. Naturally they were somewhat peeved at Clark's non-appearance, but the majority of the fans were quick to give Kramer a rousing reception after he had won the race and the title. If ever Kramer deserved the championship he did in 1909, and the officials made a very wise move, although it displeased some of the fans.

The Advantage Clark Had

Out of the first six championship races run in 1909 Kramer was forced to quit on three occasions because of punctures, so it can be readily seen what an advantage Clark had.

Kramer scored his first big victory of the season on Wednesday night, June 16, when he defeated Jackie Clark in a match race which had been postponed a number of times on account of rain. Interest was at a high pitch when Kramer and Clark finally did come together, and the reception he received after winning was certainly impressive.

In the first heat of the match race Kramer won from in front and on the second occasion he rode from the rear. Not content with this as a night's work, the peer of all cyclists won the five-mile open affair.

On the following Wednesday Kramer was battling with Clark on the back stretch in a two-mile handicap race, when Clark punctured, but managed to get home second. Kramer came back and won the half-mile open, with Willie Fenn crossing the finish mark in second place.

After Kramer had failed to finish in the first two championship races, being put out of the running with punctures, he finally put over a win on Clark and rubbed it in by sitting up as he crossed the finish mark. Kramer, riding from third place on the back stretch, overtook Fogler and then drew up on Clark. Half way down the home stretch Kramer was in the lead and finished an easy winner. It was his first victory in a championship race and he was given a tremendous ovation.

Tied with Clark for Title

On Wednesday night, August 11, Kramer scored a clean-cut victory over Clark and twenty-five other "pros" in a five-mile championship race. Kramer finished a good length and one-half ahead of Clark. On the following Sunday Kramer beat Clark in the one-third-mile titular race and tied the little Australian for the national championship. At this date each rider had 16 points. Kramer won and Clark was shut out in the semi-final by Root and De Mara.

The little gloom person who answered to the name of "puncture" trailed Kramer the next Sunday. On the ninth lap of a two-mile race the East Orange cyclist had to retire with a puncture, while Clark continued to pile up points by winning. In this race he beat out Norman Anderson, Joe Fogler and Kramer, who qualified for fourth position.

On Sunday, August 29, Kramer showed to the fore in the race for the national championship for the first time during the season. Kramer gained a one-point advantage on Clark by winning the half-mile titular race, while Jackie was shut out in the semi-final heat. In the final Kramer easily outsprinted Anderson, Fogler and Root and won by three-quarters of a length.

Kramer did not keep the lead long, however, as on the next Wednesday Clark flashed to the front one point to the good by beating the old master from behind in the one-mile championship race. John Bedell and Fred Hill followed Clark and Kramer home. Kramer fought Clark down the home stretch,but the Australian beat him out.

Another Sunday came along and once more Clark finished in front; on this occasion he defeated De Mara, Kramer and Krebs in a quarter-mile sprint. Clark won by half the length of his front wheel over De Mara, who was about this same distance ahead of Kramer. Kramer protested and claimed Clark and De Mara were teaming, but the referee would not take any action. Kramer heard Clark say to DeMara, "Go on Walter; it's all right; I'm on."

Victory in Three-Cornered Match

Kramer scored a notable victory on Sunday, September 12, by beating Lawson and Clark in a three-cornered match race. In the first heat Kramer romped home first, followed by Clark and Lawson. The second heat saw Lawson over the line first, with Kramer second and Clark third. Lawson was disqualified for taking the pole from the inside and first place was given to Kramer. There was a tremendous crowd on hand for this race.

Kramer's chances of winning the title were materially bettered on Sunday, September 19, when he won the one-mile championship race and Clark only finished third. Fogler breezed in second, with Iver Lawson fourth. The next Sunday Kramer was again the winner and he forged ahead of Clark one point by winning the one-mile titular race. Kramer's riding was about as clever a display of cycling as was ever seen in Newark.

Kramer's victory was as much due to his clever headwork as to his speedy limbs. He did not wait until the final heat to show his class, but started out in the very first one. In the final he had Lawson, Clark and Krebs to contend with. On the back stretch Kramer was third, but he gradually worked his way by Lawson and Clark, winning out. After these two victories came the final championship race of the season, which Kramer won easily.

cycles that had ever gone into these two cities. This shows how the motorcycle is taking hold in the moderate sized cities and of the good selling opportunities that exist in such communities.

It is, furthermore, now a certainty that from now on until the end of the season Indian carload shipments will continue all over the United States with the same frequency that characterized the week past.

They're buying motorcycles—they're buying Indians—the 1916 banner year for the industry is on!

NATIONAL COIL BUSY ON LARGE ORDERS

Makers of Midget Magneto Adding New Machinery to Meet Big Demand—Employees Given Increase in Wages

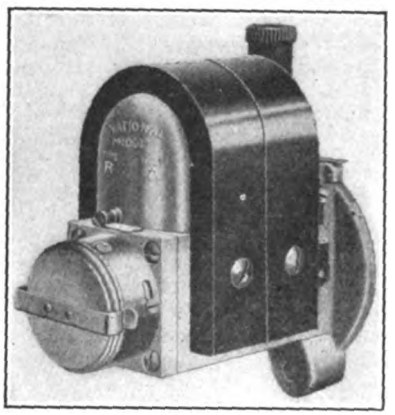
LANSING, Mich.—The National Coil Company, maker of the Type R National high-tension magneto, is very busy these days on the production of this and other types of ignition apparatus for all kinds of motor vehicles. Contracts aggregating a large number of machines and necessitating an increase in facilities to meet the demand are now being filled and new machinery is being installed as fast as it can be secured. The working force has been increased to correspond.

Work on magnetos requires the employment of only the most skilled mechanics, and such only are on the firm's books. The shops of the firm are modern in every particular. Every convenience has been provided for the employees, and the policy of the company is such that the interests of the men are always taken into consideration.

The production of the Midget or Type R magneto is confined to the National Coil shops, under the supervision of C. E. Pearson, the electrical engineer and general manager.

A voluntary wage increase has been recently given the men, in addition to the prospects for steady work, and has stimulated an interest that insures an increased production. The company started in Lansing some fifteen years ago. There are now 150 men on the payroll.

The Type R or Midget magneto was designed to meet the demand for an efficient lightweight magneto. It tips the beam at 3 pounds 10 ounces. It is the smallest electrically efficient high-tension magneto on the market and is eminently adaptable to ignition on small, high-speed motors, such as are fitted to motor wheels, lightweight motorcycles and motor attachments for bicycles. It has a fast and accurate interrupter and specially wound armature. The frame is cast of aluminum in one piece, the pole pieces being assembled into the frame. End housings assist in making this magneto waterproof, dustproof and oilproof without the aid of gaskets. The magnets are of high-grade imported magnet steel, made to the firm's own specifications.



Midget Type R Magneto

O-U-LITE DIMMER FITS ANY HEADLIGHT

IN order to supply the demand for an efficient and substantial dimming device which will comply with the various motor vehicle laws, the O-U-LITE Company, of Racine, Wis., has brought out a dimmer which can be attached to any lamp used on motorcycles. This device, known as the O-U-LITE dimmer, enables the rider to change his illumination from that of a regular glare to a soft, mellow and effective road guide by a simple movement of the hand. It is as effective in fog as in clear weather. It meets the strictest of ordinances in all parts of the country.

The O-U-LITE dimmer never leaves the rider in the dark, as it eliminates the strong beam of light only. Its use allows the rider to distinguish objects at a distance of more than 150 feet ahead, while an object is noticed at 300 to 400 feet ahead. One of these dimmers can be put on in from two to three hours' time and will in no way interfere with the wiring of an electric lamp or the feed of acetylene in a gas lamp. The dimmer will last the life of the lamp. The prices are: $1.25 for gas lamps and $2 for electric lamps. When ordering dimmers for gas lamps, the diameter of the reflector should be stated. The dimmers for electric lights will fit any standard electric bulb.

DEARDORFF IN NEW YORK

ERIE, Pa.—C. W. Deardorff, who has been traveling in the interest of the Continental Rubber Works, of this city, has been transferred to the New York brnach for service under B. W. Snowman, Eastern manager.

TIRE PLANT FOR NIAGARA FALLS

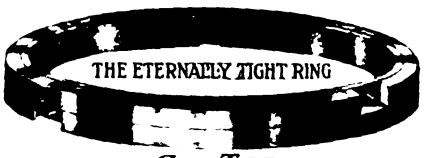
NIAGARA FALLS, Ont.—The Perfection Tire and Motor Co. of Fort Madison, Ia., and Wabash, Ind., are contemplating the erection of a $300,000 plant in this city where they will manufacture automobile and bicycle tires.

STA-TITE RING PREVENTS LEAKS PAST PISTON

GAS-TIGHTNESS, both when the cylinder is new and after it is worn, is attained in the Sta-Tite piston ring, by means of a three-unit construction consisting of a bull-ring and two outer rings. This ring, which is produced by the Piston Ring Company, of Muskegon, Mich., has been used to good effect on motors for automobile, motorboat and industrial service, and in all cases has proven its reliability in preventing leakage of the explosive charge toward the crankcase, or of oil toward the combustion chamber. It can be had in any size suitable for motorcycle cylinders.

The ring with its three units is so designed as to prevent the slots in each ring or unit coming into line. The bull-ring is made the proper width to fit the ring groove in the piston. On two points on its outside surface are pegs which give the positions of the outer rings. The latter are each made one-half the width of the bull-ring and of the proper diameter to fit closely over it. In putting on a Sta-Tite ring, after the bull-ring is placed in the groove, one outer ring is slipped over it and the opening in this ring is made to correspond with the peg on the bull-ring. The other outer ring is then put in place in the same way and its opening adjusted to the other peg. Thus the slots of the three rings can never come into line and permit leakage.

Each ring in the Sta-Tite construction is individually cast from a special formula of tough gray iron. Each process in its making is conducted by experts in such work. A number of the machines used in the manufacture have been specially made for this purpose. Each ring is submitted to a final inspection before being permitted to leave the plant.



In addition to the Sta-Tite rings, the firm also manufactures "Quality" snap rings. These are constructed with the same care as the Sta-Tites and are widely used where snap rings are found more desirable.

SPLITDORF IN OAKLAND

OAKLAND, Cal.—The Splitdorf Electrical Company, of Newark, N. J., has opened a branch and service station at 3040 Broadway, this city. The station has been opened in order to give better care to the rapidly-increasing Splitdorf trade in this section of the country.

Our Canadian Letter

RETURNED SOLDIERS ENTERING CYCLE TRADE

Disabled Canadian Warriors Take Agencies and Travelers' Positions—Dealers Have Openings for Shopmen From the Army

TORONTO, Ont.—Another interesting phase of the European war, from the Canadian standpoint, has developed in the return of disabled soldiers to civil employments. A fairly large number of crippled warriors have returned to Canada since last November, but only now are they being discharged from military service. Many of the discharged fighters are avoiding the vocations which would necessitate their confinement indoors because they have become accustomed to a life in the open. In line with this idea is the desire of some to make use of the bicycle or motorcycle for business and pleasure.

One day recently a veteran of the present war, Sergeant Armitage, of Lindsay, Ontario, who left Canada with the first overseas contingent in October, 1914, paid a visit to Toronto for the purpose of investigating several business propositions. He had become a dispatch rider at the front and suffered the loss of a leg in an important battle last spring. Among other things he essayed to negotiate a motorcycle once more and found that he could handle one quite easily, especially a lightweight, in spite of his crippled condition. He therefore decided to sign up with Percy A. McBride for an agency of the Miami Power Bicycle for his home town and vicinity. He intends to ride and sell the lightweight throughout his territory and has already made a start in his civil business.

Preparing for Outdoor Job

Private Gardner, of Port Credit, Ontario, another returned soldier who is still confined in the military convalescent hospital, Toronto, has a similar plan in mind and has already purchased an Excelsior bicycle to use to help him to regain his strength. He, also, is preparing to secure an open-air job. Other similar bicycle and motorcycle sales are in the making in Toronto.

Local dealers are quite enthusiastic concerning the prospects in this direction—mainly because it will partly offset the certain loss of trade caused through the departure of many young men from the country for the fighting arena of the war. They figure that the returning soldiers will become good prospects and that sales of motorcycles or bicycles to war veterans will assume a fairly large proportion. A start in this direction has already been made, as is seen in the transactions reported above.

Want Mechanics and Shop Men

Local motorcycle distributors are also looking to the returning men for assistance in another way. A great many motorcycle mechanics and repairers have gone to war and repair shop employees are much in demand. Machinists and others returning from the front will find little difficulty in securing places with any of the Toronto motorcycle tradesmen. Walter Andrews, the Harley-Davidson distributor, has, for instance, lost three or four mechanics since the start of the war through their enlistment, while the repair shop staff of Percy A. McBride has been short-handed for a long time.

While experienced repairers have been scarce in Toronto, the Canadian officials at the international border have prevented the entry of machinists from the United States, it is declared.

LONDON CLUB COMMENCES 1916 SEASON WELL

LONDON, Ontario.—The officers of the London Motorcycle Club, the oldest existing motorcycle organization in Canada, for 1916 are as follows: president, L. Gatecliff; vice-president, Walter England; secretary-treasurer, W. C. Keen. The prize of a motorcycle casing to the member who secured the greatest number of new members during the past year was won by W. C. Keen, who was secretary-treasurer during 1915. He brought in twenty-five new members. T. J. Maher's $5 prize for the lady attending the most runs during the season was won by Mrs. H. Lewis.

The membership fee for 1916 will be $3 for city members, and $2 for those riders living beyond a five-mile radius of London. Ten motorcyclists of Strathroy, Ontario, have joined the London club instead of maintaining a club of their own.

Several prominent members of the club have just gone overseas with Canadian war units. These are W. G. Tite, a former officer of the club, and Bert Johnson, both of whom have joined the Mechanical Transport Division of the Royal Army Service Corps, and Jack Middleton who has enlisted with the Divisional Cyclist Corps.

The London Club recently held a successful smoker and euchre party for which President Gatecliff and E. M. Bissett were responsible.

YOUTHFUL TRACK STAR WILL BE A DISPATCH RIDER

TORONTO, Ont.—Harry MacKay, the youthful track star and son of G. L. MacKay, chairman of the C. W. A. Racing Board, has enlisted as a dispatch rider for overseas service with the Canadian army.

There is now no more than a handful of experienced track riders left in Toronto, practically all having joined the colors. A great opportunity is now presenting itself for newcomers in the bike game. With the demolishment of the local board track and the closing of the Scarboro Beach athletic field, however, there is hardly a track in Toronto where cycle events can be staged.

PRIZES AWARDED FOR NEAT WINDOW DISPLAYS

HAMILTON, Ont.—To create friendly rivalry between the local bicycle dealers for "Buy-a-Bike Week," which started March 27, the Hamilton Bicycle and Motorcycle Dealers' Association hung up six prizes for the best dressed windows and the most orderly stores on the first day of the sales demonstration. Fifteen, or practically every local dealer, took part in the contests and the awards were made as follows:

Dressed windows—1, Longfield Bros., 473 King street E., 90 points; 2, Webb & Underhill, 17 John street N., 85 points; 3, G. W. Tyner, 598 Barton street E., 75 points.

Neat stores—1, Dixon Company, 156 King street E., 90 points; 2, Harris & Funger, York street, 80 points; 3, G. W. Tyner, 598 Barton street E., 75 points.

SPECIAL CYCLE EVENTS TO TRAIN SOLDIER RIDERS

OTTAWA, Ont.—According to arrangements made by the military authorities for the training of soldiers during the coming Summer, it is proposed to hold military bicycle races at various times and places, as well as other sporting events. The officers of the Canadian Wheelmen's Association will co-operate with the military officers in the holding of the wheel contests, which will probably include cross-country and obstacle races, as well as road and track sprints.

MANITOBA VEHICLE ACT IS CONSERVATIVE

WINNIPEG, Man.—Amendments to the Manitoba Vehicle Act, just passed, provide for a very sane schedule of speed limits and also take away from municipalities, towns and villages the power to impose a tax of any kind on either motorcycle or riders other than that imposed by the act itself. The speed limits are as follows: Fifteen miles per hour in any city, town, or village; twenty miles per hour in the vicinity of Winnipeg, while in the open country the sky is the limit, no restriction being placed on speed.

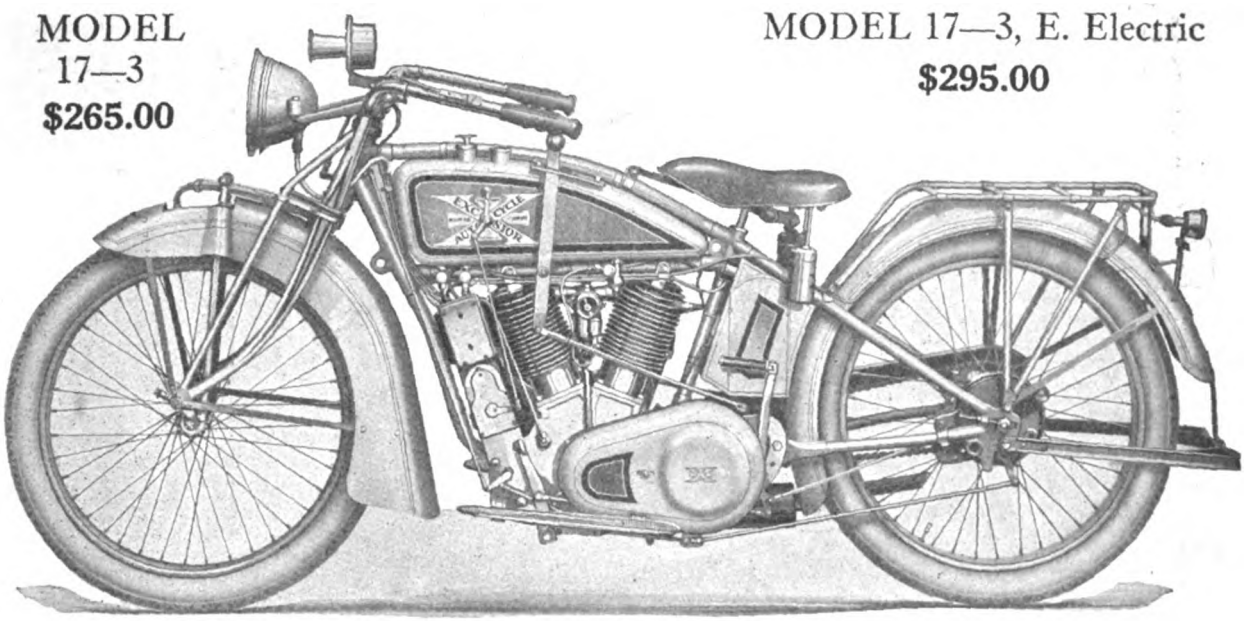
EXCELSIOR AUTO-CYCLES

SERIES 17

A FULL YEAR IN THE LEAD

MODEL 17—3
$265.00

MODEL 17—3, E. Electric
$295.00



Some Details of Excelsior Quality

ULTRA POWER MOTOR WITH OVERSIZE VALVES, ENTIRELY ENCLOSED;
FOOT OPERATED STARTER WITH AUTOMATIC COMPRESSION CONTROL;
POSITIVE, GEAR DRIVEN MECHANICAL OIL PUMP;
HEAVILY CONSTRUCTED SILENT MUFFLER;
LARGE, POWERFUL, DRY PLATE CLUTCH; EXTRA HEAVY ROLLER CHAINS;
MOTOR DRIVE CHAIN AND CLUTCH MECHANISM ENTIRELY ENCLOSED;
THREE SPEED, NICKEL STEEL TRANSMISSION;
POSITIVE AUTOMATIC GEAR LOCK;
AUTOMOBILE TYPE ANNULAR BALL BEARINGS; NON-GRAN BRONZE BUSHINGS;
POWERFUL, DOUBLE BRAKES; OVERSIZE, KNOCK OUT AXLE, HUBS;
EXTRA HEAVY BALL BEARINGS WITH TOOL STEEL CUPS AND CONES;
EXTRA STRONG, OUTSIDE JOINT, LOW SADDLE POSITION, FRAME;
12 GAUGE SEAMLESS STEEL TUBING;
NICKEL STEEL DROP FORGINGS THROUGHOUT;
PERMANENT SIDE CAR LUGS; EXTRA WIDE NON-SPLASH FENDERS;
CRADLE SPRING FORK WITH FIVE LEAF NICKEL STEEL SPRINGS;
BEAUTIFUL ROUND CORNERED TANK WITH ANTI-LEAK NEEDLE VALVE FITTINGS
LONG, DOUBLE HINGED FOOT-BOARDS; HEAVY UNBREAKABLE, ARMLESS STAND.

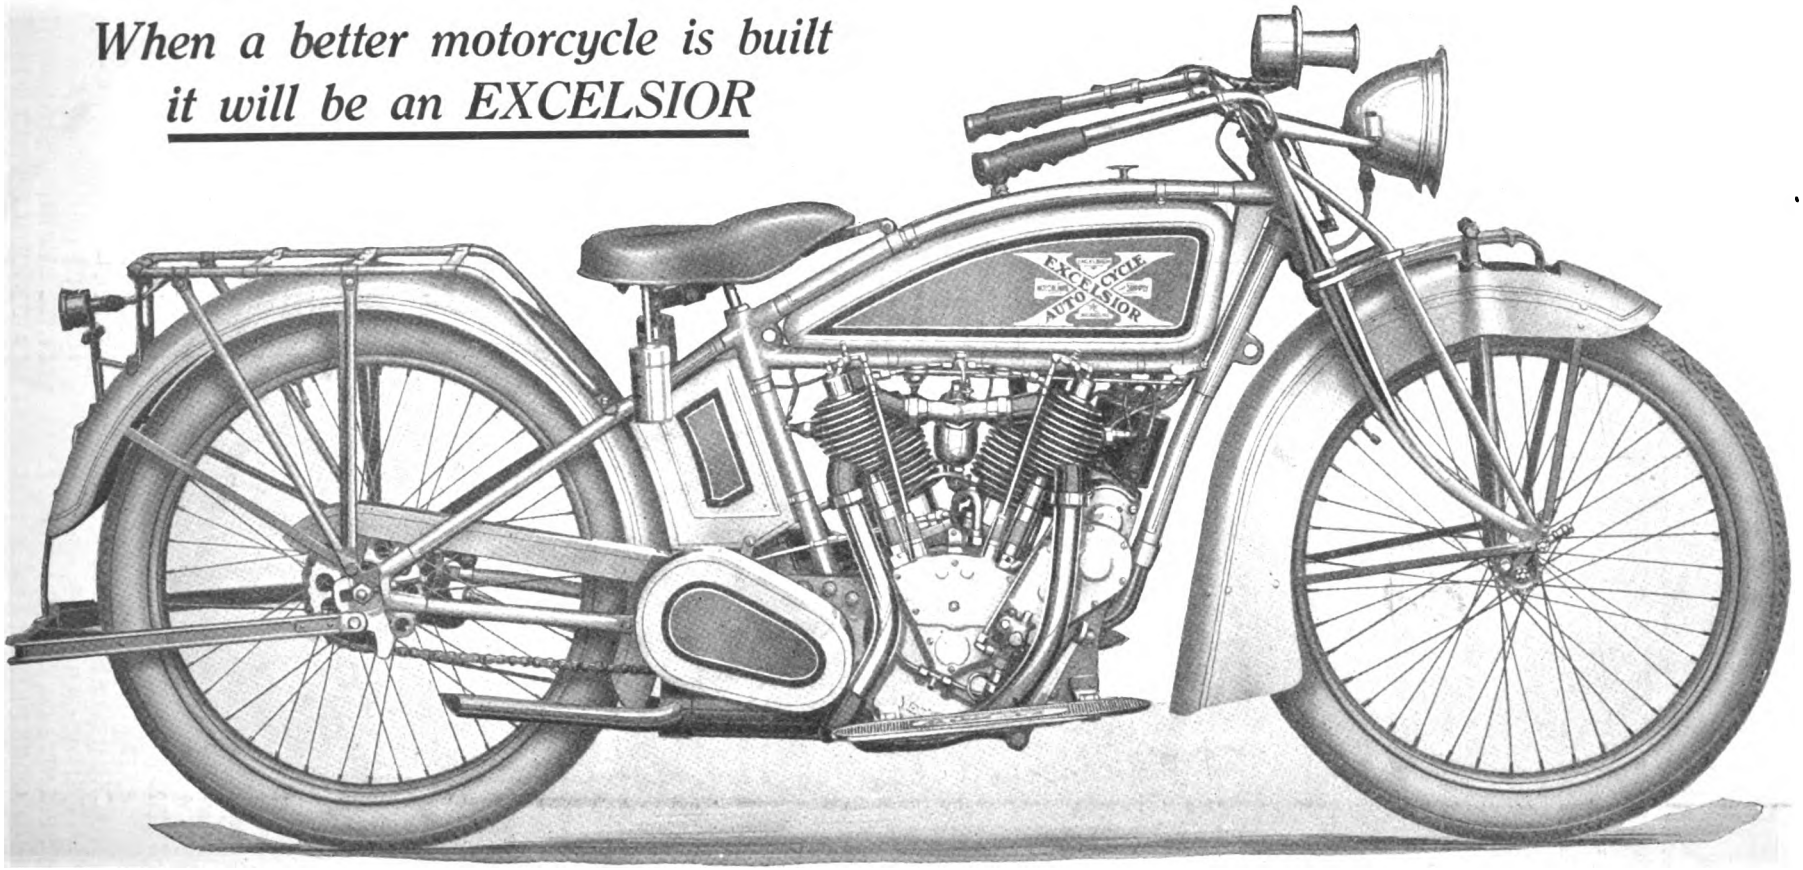
Model 17-3. Ultra Power, Three Speed

When a better motorcycle is built it will be an EXCELSIOR



SPECIFICATIONS

MOTOR—Twin cylinder; bore, 3 21/64 inches; stroke, 3½ inches. While these motors are within the 61-cubic inches displacement, they develop from 15 to 20 horse power by dynamometer test and as proven by our world's record: a mile in 36 seconds, the first and only motor to make 100 miles per hour.

LUBRICATION—Double force system; mechanically-operated, gear-driven, positive plunger pump, which insures perfect lubrication in direct proportion to speed of motor; oil leads to front cylinder and right main bearing; independent hand pump for emergency purposes.

IGNITION—High-tension magneto; armored type; gear driven. Model 17-3 E, Midco combination lighting and ignition system.

MOTOR STARTER—Foot type segment and pinion gear on countershaft; folding foot lever; starts with rear wheel on the ground, with automatic compression control.

CARBURETOR—Improved EXCELSIOR Schebler Model "H," with auxiliary air valve and choking device for easy starting.

[illegible] silent and efficient; pressed steel construction; direct [illegible]

[illegible] an integral part of the frame head, seat post cluster and rear fork end forgings. Height, saddle to ground, 27 inches; saddle to foot-board, 27 inches.

FRONT FORKS—Cradle type, with 5-leaf nickel steel spring; extra heavy nickel steel drop-forged fork ends; quick detachable rubber bumpers; improved style rocker arms.

TANK—Extra heavy gauge leaded drawn steel, will not rust or corrode; capacity, 2¼ gallons gas; 1 gallon oil; solid brass anti-leak needle valve fittings.

TOOL BOX—Dust and waterproof; convenient and strong; ample space for tools and an extra tube; each machine equipped with tools and special wrenches required for ordinary road repairs and a book of instructions.

TRANSMISSION—Automatic type three speed, in aluminum housing at the rear of crank case; nickel steel gears, 9 pitch, ⅝-inch wide; main shaft on large annular ball bearings; secondary shaft on Non-Grun bronze bushing. Gears automatically locked when clutch is engaged; shifted by hand lever at left side of tank.

CLUTCH—Extra large sized ball bearing dry plate type, located [illegible] main gear shaft. Double control by either left foot pedal [illegible]

HANDLEBARS—Original double braced, with three-point nickel steel drop-forged socket attachment; fitted with long cushion rubber grips.

SEAT POST—Kumfort Kushion spring; full shock absorbing.

FRONT HUB—Extra heavy, knockout axle type, with 2½-inch flanges, ⅝-inch balls, ⅝-inch axle.

REAR HUB—Extra wide between flanges; 7/16-inch incaged ball bearings; 9/16-inch knockout axle.

BRAKES—Two, independently operated, one internal expanding within steel brake drum, operated by the left foot pedal; the other a contracting band brake on the outer circumference of same drum, operated by foot pedal at right side.

WHEELS—28-inch, with extra heavy "C C" 4-series punched rims, best quality spokes; 40 front and rear.

TIRES—3-inch Firestone, Fisk, Goodyear, United States or Goodrich non-skid.

STAND—Extra heavy armless folding type; locks to rear guard when not in use.

SADDLE—Mesinger "Air Cushion."

FOLDING FOOT RESTS [illegible]

[illegible] opment made them advisable.

[illegible] tion comprising a simple [illegible]

A good deed often means a good deal—Please mention MOTOR CYCLE ILLUSTRATED.

...ways been our policy to put out new models, not in accordance with the calendar but as evolution and development made them advisable.

We are therefore offering Series 17 far in advance of what will be generally termed 1917 models.

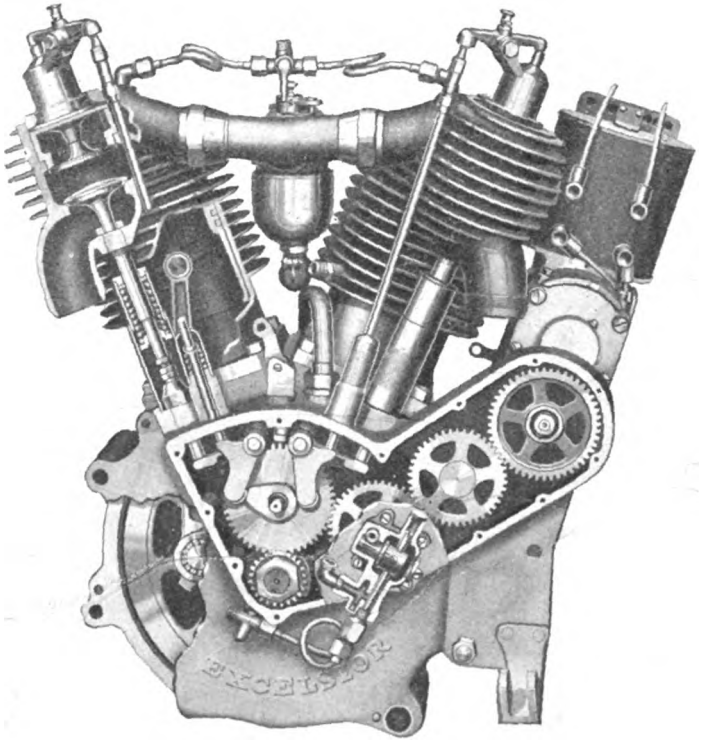
The machines that make up this series are not entirely new and untried designs but are simply the result of careful scientific development of the 1916 machines. In fact we could have offered these machines at the time the 16's were presented but withheld them from the market until the new devices had all been thoroughly tried and developed to the utmost degree of perfection.

The constantly increasing use of sidecars, trailers and other auxiliary equipment for both pleasure and commercial uses, has caused a corresponding demand for constantly increasing power and Model 17-3 has been perfected primarily to meet this requirement.

To insure this great power, we have perfected the EXCELSIOR Ultra Power motor, the most powerful motorcycle engine ever built.

In this, as throughout the machine, there is no deviation from established principles or design, the developments being in the way of increased valve dimensions, and a general enlargement of parts subjected to the greatest strains. The keynote of design is simplicity, with a corresponding freedom from loss of efficiency through excessive wear or complication of small parts.

The design is generally that of previous models of the Big X twin, which has been proven so unquestionably correct that we have never been called upon to utterly abandon the work of previous years and bring out a distinctly different type of motor.



The valve mechanism is the simplest possible construction comprising a single cam gear with intake exhaust valve cams on opposite sides of the gear. Movement is transmitted to the valve tappets through single drop forged rocker arms thus reducing to the minimum all chances for lost motion or back lash through wearing of the various parts.

LUBRICATION is by direct acting gear driven oil pump with an auxiliary hand pump for emergencies.

IGNITION is by high tension magneto, armored type, gear driven.

CARBURETOR. Excelsior Schebler, a carburetor that has been developed for and in connection with EXCELSIOR AUTOCYCLES, and is now unquestionably the best motorcycle carburetor in the world.

MUFFLER is a new pattern with extra heavy steel shell, drawn steel ends, long tail pipe and direct cutout.

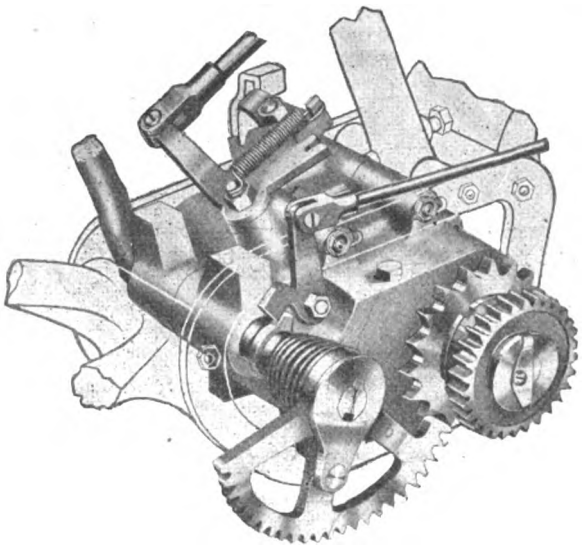
MOTOR STARTER. The foot operated motor starter is practically the same as on the 15 and 16 models but with the very important addition of an Automatic Compression control that relieves the rider of all attention to the matter of compression control in starting, and insures the automatic and perfectly correct timing of this important function. There is no juggling of a valve lift, simply press down the starter lever and the exhaust valves are opened and allowed to close at the mechanically correct instant, thus removing 90% of the troubles found in other starters.

Power transmission is through the EXCELSIOR Automobile Type Three Speed Gear in which every working part is either a nickel steep drop forging or turned from

Mention MOTOR CYCLE ILLUSTRATED—It helps you, the advertiser and us.

Digitized by Google

EXCELSIOR SERIES 17

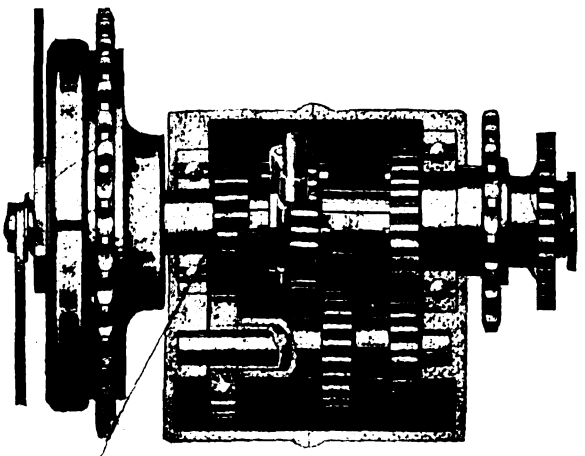


FOOT STARTER AND GEAR LOCK

solid tool steel then oil tempered and ground to perfect accuracy.

GEAR SHIFT CONTROL is by means of a lever on the left side of the frame and acting directly on the shifting mechanism of the gear through a single connecting rod which insures positive and accurate adjustment of the gears.

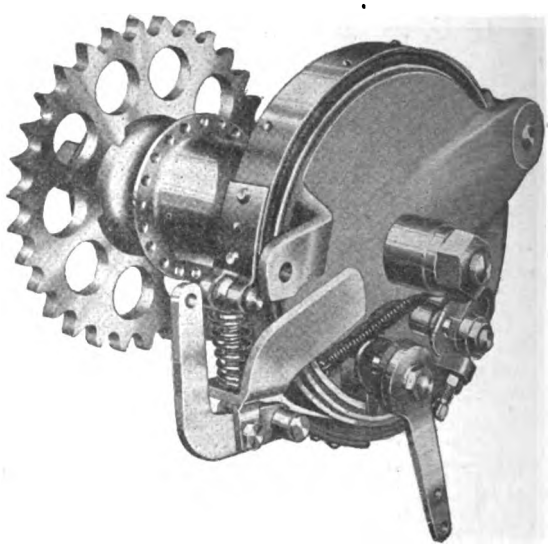
AUTOMATIC GEAR LOCK. The gear lock to prevent the shifting or engagement of the gears while the motor clutch is engaged is a direct acting lock automatically operated by the clutch arm. Movement of this arm to release the clutch automatically releases the gear shift without the use of wires or any intervening complication.



TRANSMISSION GEAR

The model 17 brakes are the most powerful ever designed for motorcycle use.

The service brake is a centrally pivoted band brake of the automobile type operated by the left foot lever in connection with the clutch. The forward movement of this pedal releases the clutch then applies the brake, thus relieving the motor of all strains due to the sudden application of the brake.



NEW BRAKE SYSTEM

The emergency brake is an expanding ring brake operated by a foot lever at the right side of the machine. Both levers are conveniently located in connection with the foot boards and either brake is capable of instantly locking the wheel. Both are provided with external adjustments.

These are only a few of the big points of the new model 17-3.

Our new illustrated catalog gives full details of the entire Series 17 line. Get one from an EXCELSIOR dealer or write for it. A postal card with your address is sufficient.

Along Technical Lines

BARGAIN VS. FIRST-CLASS SPARK PLUGS

Cheap Articles Are Generally Unsuitable for Motorcyclists' Use and Should Be Avoided—Good Plugs Are Numerous But Must Be Properly Fitted to Motor to Be Thoroughly Effective.

By COURIER

WITH the automobile show season still under way, the annual crop of "bargain" spark plugs is once more put on the market, and many motorcyclists will fall for the very low prices and the unqualified assurances of the salesmen that the cheap affairs are as good as anything that was ever constructed. The favorite "spiel" of these salesmen is that the plugs are made in such huge quantities that the figure of two-bits or something of that sort enables a first-class plug to be produced, etc. And the man who feels that he is getting a bargain seizes the bait—with speed. That's about the only kind of speed he ever will develop after starting to use these plugs.

It costs the plug makers—the real, first-class ones who advertise their goods and stand back of them—over 25 cents to turn a good plug out ready for the market. It costs the factory something to sell this same plug, which something includes advertising and salesmen's salaries, and when this is added on and special rates are quoted to jobbers and dealers, the original 25 cents has swelled considerably. It's more like 75 cents in lots of cases.

There are lots of first-class spark plugs on the market, so that it is not a case of long and arduous searching. The manufacturers have solved the plug problem for their motors to a high degree, and what they recommend can be used to advantage. However, the purchaser of a secondhand machine does not always get the original kind of plugs that the maker puts into the apertures, and if he wants the best performance he should select a make that fits properly, not only as regards its steadiness in the threads of the aperture, but also as to where the spark passes in the cylinder.

The Bargain Spark Plug

Most bargain plugs are made for automobile use, and particularly for those automobiles which are turned out buckwheat-cake fashion. Now these automobiles have motors with deep valve-caps or have their plugs in the cylinder head, which means that the points will sit almost into the center of the motorcycle cylinder or valve chamber. This position is bad dope for the plug, since the points will pretty soon burn off, leaving the owner stuck unless he has a spare one at hand. Incidentally, most purchasers of the cheap plug don't have an extra one along, and they have to limp to the nearest garage on one cylinder or push the mount by hand, depending on the number of cylinders. In this and in several other ways, the cheap plug spells trouble for the user with a capital T.

Getting a good plug boils down to this: The choice of any standard brand will be a guarantee of satisfaction if the plug fits the motor. This question of fit is the most important quality in a plug, outside of the electrodes, of course.

There are lots of first-class plugs on the market at present, but none of them are really cheap in the sense of low-priced. Now, in referring to low prices, I mean something less than 75 cents retail; for while the manufacturing cost of a good plug is very reasonable, it costs something to put it on the market, so keen is competition. The use of a cheap plug brings its own reward in the form of trouble with a capital T.

This is sort of a digression, I am afraid, but there are lots to say about the faithful little juice-shooter which rests snugly in its aperture in each cylinder and gives rise to the kick that does the rest of the business. The choice of any standard brand will be a guarantee of satisfaction if the plug fits the motor. This question of fit is the most important quality in a plug, outside of the electrodes, of course.

The length of the reach of the plug into the valve-chamber or combustion chamber is what counts. It spells the difference between good running and crawling along and also whether the plug needs cleaning often or not. The spark should occur with the points practically flush with the inside surface of the chamber, otherwise the reach is incorrect. If the points go too far inside, they will get burnt off in due season, while if they don't go in far enough, the motor will skip an explosion every now and then.

WHEN TIRE TAPE COMES IN HANDY

Various Ways By Which This Article in the Motorcyclist's Kit Can Be Put to Use With Excellent Results.

By DUDLEY ESSEX

THERE are few things that a motorcyclist can carry in his kit which have more value in an emergency than a roll of black electrician's tape. This tape is probably better known as tire tape, but the name, electrician's tape, is the proper one. There are some tire tapes sold which are intended for bicycle work, but these prove rather poor for the motorcyclist's use; hence the distinction.

In fitting a lamp bracket or speedometer bracket, or in clamping a horn in place, there are often times when a few turns of tape will make a snug fit and will also keep the plating and enamel safe from disfiguring scratches. After a spill—and we all get them—when something has been broken, tape can be used to bind the damaged parts in place. It will serve to keep down the rattle as well when mudguard braces let go from crystallization. If the knuckles get skinned in trying to start a tight nut, tape will play the part of first aid if there is paper or cloth between the flesh and the tape, it having a tendency to draw.

By taping the springs on sidecars and the machine itself, endurance riders have found the danger of them breaking is considerably lessened, and in some cases completely done away with. If graphite is inserted between the leaves before the tape is wound onto the springs the action is easier and noiseless and when the job is shellaced there is little need of more attention the rest of the season.

In the summer time when the flowers are in bloom the sidecar passenger or the tandemette wants a bouquet to take home, then tape will come in handy to bind the bunch together. Sometimes in carrying bundles on the bars or carrier the string or straps break; then the trusty roll of tape comes in handy again.

Last year the writer was up against it when a sidecar shoe blew out at a vulcanized spot. It was far from any town, of course, and investigation showed a badly-shattered tube and a mass of mangled rubber and fabric for the best part of a foot on the shoe. This was the procedure that enabled the outfit to reach home, more than 30 miles away:

The old tube was removed and a piece of it cut and fitted over the new tube as a protection at the weak spot; it was next put in the shoe and the clincher caught on the rim. Over this, while deflated, a slit section of the damaged tube was taped, then another strip of rubber over that in the same manner. Air was then pumped in and the journey resumed. The job held for the rest of that week, when a new tire was put on. There was an object lesson of the value of tape in the tool-box.

Newsy Tips for Exporters

HOLLAND REPRESENTATION

Frank W. Mahin, American Consul at Amsterdam, Holland, informs us that large dealers in his territory say that there is an excellent market for American motorcycles and that several makes are already in use and giving satisfactory service. He adds that most of the bicycles used in the Netherlands come from England, whose manufacturers have thus far controlled the market. He explains that "the chief difficulty in the way of American bicycles is the long distance from the United States. This makes freight rates higher than from England, and also makes it impossible to fill orders quickly. The latter difficulty can be obviated by keeping stocks on hand in Holland, but this involves an investment which no American manufacturer seems willing to make."

In connection with the above, it is interesting to note that a large number of our inquiries for American-made bicycles, parts and accessories are now coming from Holland, importers and others declaring that it is practically impossible to get deliveries from England under present conditions. There is, therefore, no better time than the present for American manufacturers to overcome the advantages which English motorcycle and bicycle makers have hitherto enjoyed in the Netherlands.

THE SITUATION IN SPAIN

"Practically the only condition," writes Mr. Paul H. Foster, American Consul at Jerez de la Frontera, Spain, "that affects unfavorably the sale of American-made bicycles and motorcycles in this district is the lack of direct representation of American manufacturers in the territory. The American machines have, such as have found their way to this district, attracted favorable and even enthusiastic attention, so any prejudice that may exist is in their favor. But no representative of an American manufacturer in this line has ever visited Jerez with the object of establishing an agency, nor, subsequently, made occasional visits to maintain the interest in the product. Until this is done the business of this field will remain where it is—in the hands of the foreign firms that do."

NORWEGIAN FIRM WANTS DATA

We are in receipt of a letter from Guttormsen & Co., importers and exporters, of Cristiania, Norway, P. O. Box 284.

This concern is desirous of securing representation for American-made cycles, parts and accessories, in the Scandinavian countries, Norway, Sweden and Denmark. They advise that they have traveling agents and are in a position to push the goods they handle. They desire to receive catalogs, lowest export prices and information as to commission that would be paid in the event of a representation being established.

OPPORTUNITY IN HONDURAS

E. M. Lawton, American Consul at Tegucigalpa, Honduras, advises this journal that "there is a steadily growing demand for bicycles, motorcycles and automobiles in this section. The purchasing power of the district is small, but sufficient to develop a small market in these lines. I am of the opinion that bicycles, more especially, might be made a permanent business if properly handled. At present there are comparatively few in use, possibly not more than six or eight."

DANISH DEMAND FOR CYCLES

We are informed by American Consul-General E. D. Winslow, at Copenhagen, Denmark, that the opportunities for the sale of American-made cycles, parts and accessories in Denmark are good and the conditions favorable. He informs us of his belief that there are more bicycles used in Denmark, in proportion to its population, than in any other country.

SWEDEN A PROMISING FIELD

"The use of motorcycles," writes the American Consul at Goteborg, Sweden, "is increasing and there is a good demand for American machines. It appears certain that when trade resumes its normal course, the importation of American machines will increase materially."

The import duty on finished bicycles into Sweden is $5.36 each and on motorcycles $16.08 each.

IN GUERILLA-RIDDEN MEXICO

American Consul Frederick Simpsich advises that there are no dealers in motorcycles or bicycles in the district of Nogales, State of Sonora, Mexico. This district embraces practically the northern half of the State of Sonora. There are no dealers in sporting goods to whom cycle catalogs could be sent to advantage. The roads in this vicinity are in no condition for travel by motorcycles. A few bicycles are used, but these are usually purchased from retailers in the American towns, such as Bisbee, Douglas, Tucson and Phoenix.

INQUIRY FOR AMERICAN BICYCLES

We have an inquiry from Dirk Van der Mark, Keizer Sgracht, 653, Amsterdam, Holland, for a list of the names and addresses of several American bicycle manufacturers. Mr. Van der Mark wishes to take up the agency for a high grade American bicycle, and American manufacturers who have no representation at Amsterdam, Holland, will do well to send him their catalogs and other information.

CUBAN BANKING IMPROVED

A noteworthy step in the development of Cuban banking facilities was the opening, a short time ago, of the West Indian branch of the National City Bank of New York in Havana, Cuba, with quarters in the old Bank of Havana. A feature of importance to American firms in the Latin-American export trade is the Commercial Agency Department in connection with the National City Bank. This will be in charge of Mr. Claude V. Allnutt.

WATCH THE FOREIGN POSTAGE

There is nothing that provokes the foreign business man so much as to receive letters and catalogs upon which he has to pay additional postage, particularly when the communication has not been invited. American consuls quote cases of foreign firms who have requested them not to send in their names in response to any inquiries for this very reason.

ANOTHER REPORT FROM MEXICO

Homer C. Coen, American Vice-Consul at Durango, Mexico, informs us that under existing conditions, on account of the revolution, he would not recommend any efforts to extend American trade in and about Durango, Mexico. He states, however, "that in normal times this is a very good field for American-made cycles, parts and accessories, and practically all that are used are bought in the United States."

DUTCH EAST INDIES RUBBER

Detailed reports published in Amsterdam showing the production of several Dutch Rubber Companies for the past three years, discloses the fact that, due to changed conditions since the war, there has been a big rubber boom in the Dutch East Indies, the amount of business done having practically doubled in 1915 as compared with 1914. It is predicted by an expert in rubber affairs that in a few years the Dutch Indies will provide a third of the world's supply of plantation rubber.

PATERSON TEAM WINS AGAIN

PATERSON, N. J.—The basketball team of the Paterson M. C. (lately the Haledon M. C.) has added another victory to its record. The team went to Pearl River, N. Y., and played the team of the Unique Club, winning with a score of 16 to 14. Both halves were hotly contested.

This winning was the rubber of the series, both teams having won a game each previously. Manager Thomas Scott, of the Paterson team, is now going to take charge of the club's baseball nine, and would like to hear from some of the New Jersey motorcycle clubs who are ready to play baseball this season.

STEELE'S CONFIDENCE BROUGHT RETURNS

Although Handicapped by Lack of Funds, John Steele, of Paterson, N. J., Kept Right at It and Now Intends to Grow Even Bigger Than Ever—His Early Career a Difficult One

By DUDLEY ESSEX

FOURTH IN A SERIES OF SUCCESS STORIES ABOUT DEALERS

FOR a wideawake man, the business of selling motorcycles holds forth just as many opportunities and rewards as any other line of merchandising, and no better example of this is needed than a sketch of the career of John Steele, who sells the Indian in Paterson, N. J. Steele opened his Paterson store in 1911 with a stock valued at $700 and a borrowed capital of $750, and today, less than five years later, can show an inventory of $11,500, all his own and clear.

Naturally, with his modest capital, John Steele opened on a small side-street in 1911. He paid $22.50 a month rental. Today he is paying three times that amount with the idea of moving into larger quarters to handle his increasing business. These quarters will be at one of the main street corners of Paterson, and the rent will be double that paid at present. That means prosperity with a big P.

Started in 1903

Steele started in with the Indian in 1903, being the agent at Midland Park, a small town about five miles from Paterson. He purchased his first machine and took the agency simultaneously, as was the custom in the pioneer days of the motorcycle in this country. It has been a matter of pride with Steele that he chose the Indian instead of the Mitchell and Holley motorcycles, for he surely picked a live one; the other two have vanished years ago from the market.

For the next five years Steele rode his Indian when he could, hair-cutting and shaving furnishing the main means of support for the Steele family in the meantime, for the motorcycle was new. Although lots of people asked questions, no one bought machines, and it was not until 1907 that Steele justified his title of agent, by selling eight of the pinion-drive Indian singles, which led the line at that date.

The sale of these eight seemed to break the ice, according to Steele, for from that time on his sales increased yearly. In 1908 he put out 12, and in the season following disposed of 25. His score for the 1909 season was 28 Indians.

Hampered by lack of capital but confident that the day of the motorcycle was dawning, Steele moved to Paterson in 1911. To his bitter disappointment, the Indian territory was not given him, it being included in with the Newark agent's. Consequently, he took on the Excelsior and sold 18 of that make in the Silk City and the same number of Indians from his store in Midland Park.

Bigger Indian Territory

This had its effect, and in 1912 he got the Indian representation for Bergen and Passaic Counties and moved to 91 Broadway, his present quarters. He gave up barbering and devoted his time to motorcycles exclusively. As a result, he sold 65 Indians and three Excelsiors that season.

In 1913, Orrin, his eldest son, found that Latin and botany were not to his liking and after a three months' course in the Indian factory learning motorcycle mechanics, he joined his father in the sale of motorcycles. That year the sales bounded up to 87 machines, and in 1914 the century mark was passed. The Steeles have never gone below that mark since.

John Steele

John Steele attributes his success to his mingling with his riders on every possible occasion, to his giving service and to the fact that he stands back of every guarantee which he makes, be it for new or second-hand motorcycle, part or accessory. He uses a system of deferred payments that he feels confident is the best way of selling on the credit plan, and the fact that the method resulted in the return of but two machines, without loss, last season, convinces him that he is correct in his faith.

All sales must have one-half of the total amount involved paid on delivery of the motorcycle, and the balance, plus five per cent. of the whole sum must be paid in eight monthly installments in the form of notes. Steele holds a binding lease on every machine until it is paid for, but allows part of the five per cent. if the transaction is completed in less time. He investigates every prospect's earning capacity, and if the weekly wage is below $15 discourages the man from buying a machine. He knows that the drain on his resources will soon make the rider feel that the motorcycle is an expensive luxury and cause him to sell out.

Indians Only in Trade

In the matter of trade-ins, Steele is very conservative. He allows just what the motorcycle is worth; then, adding the cost of material and labor to bring the machine up to marketable condition, he sells it with a three-months' guarantee, the same as the new Indian. He will only take Indians in trade, as he feels that these make the best second-hand propositions; that his men understand the Indian the best for tuning-up, and that the buyer of a used machine is a future prospect for a new model.

John Steele is a firm believer in the club spirit. He was one of the organizers of the North Jersey M. C. and its successor, the Haledon M. C. He also believes in endurance contests as a means of proving the reliability of the motorcycle he sells, and as a result the team of Steele and Son took home cups from the Invincible, New Jersey M. C., Yonkers and Hackensack M. C. runs during 1915.

nber of Motor Cycle Illustrated World Brought Four Inquiries *Mail* From Widely Separated

READING STANDARD COMPANY, INC.

MANUFACTURERS OF

RS MOTOR CYCLES

NOTICE: ADDRESS ALL COMMUNICATIONS ETC. TO THE READING STANDARD COMPANY AND NOT TO INDIVIDUALS

Dictated by ET/HAM

READING, PA., U.S.A. 3/17/16.

Motorcycle Illustrated,
15 Park Row,
New York City, N.Y.

Attention J. Leo Sauer, Pres.

Gentlemen:-

We have been noting from time to time the wonderful developments and the rapid strides of your publication. Your paper appeals to the manufacturer, to the jobber, to the dealer, and to the rider, as there are sections of interest to all. Furthermore, it seems that each one of these different classes can gain very materially by reading your publication.

The purpose of this letter, however, is to tell you how well pleased we are in regard to the number of inquiries received from our advertisements and other publicity matter appearing in your paper, and we are especially well satisfied with the results obtained from your Export Number. We are being flooded with requests for agencies from every part of the country and we, therefore, want to congratulate you on this issue. We have traced a large number of requests for agency to your paper, some of which come from the most remote sections of the world, and it really surprises us to note how thoroughly you distributed this edition.

The motorcycle today has very strong competition to meet. There are a great many small cars on the market selling at a remarkably low price and it requires strong argument to combat this competition. We realize that only through the trade papers can we speak to the public at large, and the more interesting the paper is, the more influence it will have. We, therefore, wish to repeat that we are pleased to note how you are advancing with the times and that you are editing your paper so that it will be read by all.

Wishing you continued success, we remain,

Yours very truly,
READING STANDARD COMPANY.

E. Penny
General Manager.

ELKS PARK MOUNTAINS ARE NEGOTIATED BY AGENT FORRIE

PORT JERVIS, N. Y.—Frank Forrie, Flying Merkel agent in this city, has made the first successful ascent of the twin mountains of Elks Park on one of the 1916 twins of that make. Forrie rode up the steep grades without assistance, except at the sharp turns which cannot be made without help. His ascent helped to boost Elks Park, as there were several hundred people present to witness the climb.

The steepest stretch as well as the roughest was near the flagpole at the summit. Forrie intends to give another exhibition to the public soon. He has issued a challenge to all motorcyclists to climb the mountains in better time than he made on the Flying Merkel.

PLATTSBURGH DEALERS USE SIDECAR ON SUCCESSFUL SKIING TRIP

PLATTSBURGH, N. Y.—Banker & Martin, who represent the Silent Gray Fellow in this city, are ardent ski-

Banker and Martin with Harley-Davidson Rig Off for Skiing Trip

runners in addition to being expert riders and repairmen for the motorcycle. During the recent snows, the partners rigged up a Harley-Davidson sidecar with a runner in place of the sidewheel, the runner being of Martin's own design. The sidecar carries one of the partners and the skis, while the other drives the rig. Banker & Martin have their advertising on both the nose and rear panel of the sidecar, and consider this as one of their most effective means of advertising.

PATERSON, N. J.

JOHN STEELE, Indian man in this city, has just sent in his 68th order for a Powerplus twin to the Hendee factory. This is Steele's high water mark since he first entered the motorcycle business, and is 20 more than the highest sales last year. Indian bicycles are selling far ahead of the other makes which he is handling at the present time.

PIERRE, S. D.

P. S. GILBERTSON has taken the agency for the Henderson for this city and surrounding territory. He has received his demonstrator and is hot on the trail of prospects.

DEALERS HAVE ATTRACTIVE DISPLAYS AT WHEELING AUTO SHOW

WHEELING, W. VA.—Motorcycles held conspicuous places at the local auto show in this city. C. F. Braunlich & Co., exhibited the Harley-Davidson, Cleveland lightweight and Dayton Motor Bicycle. The booth was in charge of C. F. Braunlich, with I. W. Schroeder, of the Harley-Davidson sales forces, as aide.

Wesley T. House, the wigwam representative, showed the Indian Powerplus model, the Featherweight and the Indian line of bicycles. House was in charge, with Tom Garden as his assistant. Harvey Bernard, Indian traveler, was also on hand to assist.

The T. A. Hoge Hardware Co., showed the Excelsior and Thor models. The stand was in charge of Robert Campbell and Walter Bowman. Earl Rogers showed the Flying Merkel motorcycles and the Miami Power Bicycle, as well as motorcycle and automobile accessories. Rogers himself was in charge.

The exhibits all attracted much attention and the dealers state that considerable business will be the outcome of the exhibition. Some sales have already been traced to the show.

TACOMA, WASH.

HARRY GOBLE is now proprietor of the Excelsior headquarters in this city. The firm name is the General Cycle & Supply Company. Ray Pentecost, who formerly had charge of this agency, has resigned.

Delbert Oakes, one of the best motorcycle mechanics in the Northwest, has charge of the repair shop. A number of the new Excelsiors has been disposed of and business is brisk with used machines.

MANAGER GLASGOW, of the local Harley-Davidson agency, reports that sales are coming right along, these fine Spring days. Deposits on the contents of the next carload of Silent Grays are already in, and Glasgow with his customers is awaiting its arrival eagerly.

RAY DAY, Wigwam man in this city, is outdoors from morning till night with the Powerplus twin, giving demonstrations. Day gives all his time to this work, and the balance of his staff are busy in the repair shop.

LAKE PLACID, N. Y.

CLARENCE H. LYDAMORE has taken the agency for the Henderson for this city and vicinity and is now awaiting his demonstrator. He has compiled a big list of prospective buyers and will go after them as soon as the machine arrives. Lydamore signed up with Robert C. Hayes, distributor for the Henderson in this section.

MILFORD, N. H.

GEORGE MOORE has taken the agency for the Dayton Motor Bicycle for this city. The contract was signed by J. W. Grady & Company, of Worcester, Mass., holding distributing rights in this section.

ATOKA, OKLA.

HUGH GILL has taken the agency for the Indian for Atoka for 1916. Gill is putting up a nice store, in which he will stock a goodly supply of parts and sundries, as well as bicycle products.

ALBANY, N. Y.

G. FELTMAN, the well-known cycle dealer in this city, has taken the agency for the Dayton Motor Bicycle for Albany.

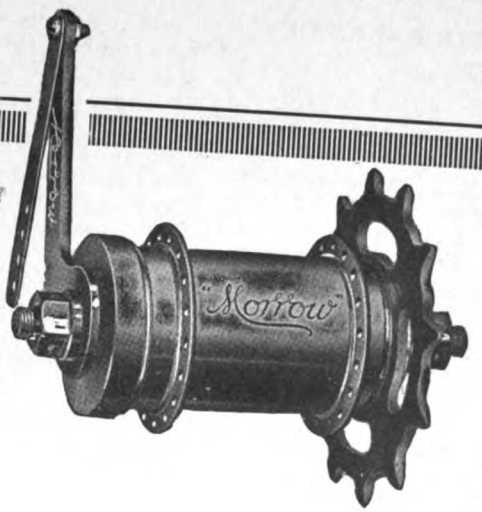
Morrow



Coaster Brake

Harness MORROW salespower to your stock dealers. There's prestige in the MORROW name. Even a new prospect, a man who never before has ridden a bicycle, recognizes in the name MORROW a guarantee of Coaster Brake Quality, Service and Safety.

You need never skip the Coaster Brake feature in your bicycles, when your machines are equipped with MORROW. It's the strongest selling feature of your wheels.

When you tell the rider of the remarkable ease of operation assured by the 24 quarter inch balls—when you convince him that the expansion of the hub shell OVER THE ENTIRE SURFACE of the brake assures a marvelously smooth and quick stop, without the slightest danger of loose spokes—your prospect is SOLD—every time.

Write and find out how we cooperate with MORROW dealers.

"The Thief Cheater"

No more fear of theft or unauthorized use now that the ECLIPSE LOCKING FRONT HUB can be attached to every bicycle. The ECLIPSE Locking Front Hub is thief-proof and foolproof. It is the safest, surest and simplest locking device known. When the front hub is locked, the wheels cannot be turned, and the only way the wheel can be stolen is to carry it away.

Eclipse Locking Front Hub

The ECLIPSE Locking Front Hub is revolutionizing the locking device market. It is putting the old fashioned lock and chain, with its attendant dangers of broken spokes and rims, into the discard. Insist that the bicycles you buy are fitted with the ECLIPSE. It makes another powerful selling point on your line.

Write to-day for full literature.

VICTOR PELEZZARE TO JOIN RANKS OF MARRIED MEN

BRONX, N. Y.—Victor Pelezzare, manager of Oliver's Indian Agency at 993 Washington avenue, this city, and Miss Jeanette Knippelberg, will be married at the Pelezzare home on Sunday, April 9. Vic, as he is known to riders in the metropolitan district, is one of the most popular riders and mechanical men in the North Side section, and has a number of endurance run winnings to his credit. He is receiving congratulations from the trade on his forthcoming marriage.

Harley-Davidson Sidevan Outfit Used by Miller Tire Service, Supplied by Harry Dipple, Indianapolis Agent

WASHINGTON, D. C.

AUGUST ZIMMERMAN, Washington representative of the Harley-Davidson, reports the sale of two more Harley-Davidsons of the three speed model and a Harley-Davidson van to the Potomac Electric Power Company. The van is to be used for delivering electric meters to consumers and replaces a similar outfit which was used with great success for the past year by this company.

F. L. LEISHEAR, Indian agent, sold his entire stock of 1916 three-speed powerplus motors, ten in all in three days and booked orders for as many more during the rest of the week for immediate delivery. H. A. French & Co., local branch, were able to secure a number of machines from their Baltimore house, enabling them to keep up with the demand.

MORE HENDERSONS GO TO EQUIP DETROIT POLICE DEPARTMENT

DETROIT, Mich.—The police department of this city has just placed another order for Henderson four-cylinder motorcycles. The order calls for 13 machines to be used to mount one section of the motorcycle squad.

This is the fourth successive year that Hendersons have been selected by the police in Detroit. Motorcycle officers have been on duty at all times, in spite of extraordinary weather conditions, especially during the recent winter. They have demonstrated the value of the motorcycle in answering emergency calls, as well as in regulating traffic.

FRANKLIN, MASS.

HARRY J. GEB, handling motorcycles and bicycles in this city, has taken the local agency for the Dayton motorcycles and Motor Bicycle. He signed up with J. W. Grady & Co., holding the distributing rights for this section.

Making Good

OUT on the road in hard practical use, the 1916 Henderson is proving its worth. Every day adds to the weight of evidence that demonstrates the leadership of four-cylinder power.

From every corner of the world come reports of Henderson achievements showing that the strongest claims that have been made for this new type of motorcycle are truly moderate in comparison with what it really does.

Performance proves. The four-cylinder Henderson *is* wonderfully cool running. It *is* fast and powerful and strong. It *is* silent and smooth and luxurious.

The immense increase of Henderson sales is a logical consequence.

"This 1916 Henderson has traveled approximately 4000 miles in the past eight weeks, and is the coolest running motor I have ever ridden. It has gone through the most severe tests to which I have ever seen a motorcycle put, but shows no ill effects whatever from the abuse, aside from wear on the tires."—H. F. Shelley, Larkin, Fla.

Starting from scratch, the four-cylinder Henderson with sidecar won the 20-mile handicap of the Pioneer Motor Club at New Brighton, N. Z., Feb. 12, covering the 20 miles in 24:45.

Henderson motorcycles purchased for police on the Pike's Peak Auto Highway, Colorado. The pulling power and hill-climbing ability given by the four-cylinder motor are the reasons for the selection.

In a match race on the beach, over a straightaway course of three miles at Miami, Fla., March 13, the four-cylinder Henderson won by a wide margin with an average speed of 74 miles per hour.

MORRIS HAS HENDERSON SALES RIGHTS IN KOREAN TERRITORY

SEOUL, KOREA.—J. H. Morris has recently closed contract for exclusive sales rights for the Henderson for the entire country. His initial order has been cabled to the factory in Detroit and the shipment is expected to reach this city soon.

Morris states that the field for motorcycles at the present time is rather limited, as the majority of those who buy machines are either connected with one of the missions or with a mining company in the interior. Few Japanese or Koreans can afford to purchase them just now, though this situation may change later.

One of the Hendersons ordered by Morris has been sold to Charles M. Dewitt, of the Chicksan Mining Company. His work makes it necessary to get over considerable expanse of country and with the primitive methods of transportation in general use here the motorcycle becomes an almost invaluable advantage.

STAUNTON, VA.

THE STAUNTON FURNITURE COMPANY, which has heretofore had a bicycle department only, has taken the representation for the Dayton Motor Bicycle for the 1916 season. The contract was signed with J. W. Grady & Co., of Worcester, Mass., Easter representative for the Davis Sewing Machine Company's product.

BIRMINGHAM, ALA.

ALABAMA AUTO SUPPLY CO., of this city, has applied to the Henderson factory for a larger contract, with exclusive selling rights in a greater expanse of territory. The business has been so brisk that Manager Earl Morrison is about to open a branch store at Montgomery.

"This branch will just about double our present volume of business" says Morrison. "When we get the increased territory, we shall put on more salesmen and make things hum for the four-cylinder models in these parts."

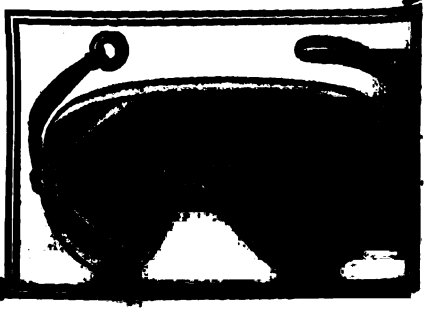
AVOID THIS!

Did you ever stop to consider the danger you run in wearing a goggle made of inflammable material? A spark from your cigar or pipe and—pfft! Don't take such chances! Here's a goggle that combines perfect eye protection, clear vision, and ABSOLUTE FREEDOM FROM DANGER OF COMBUSTION.

The material entering into the make-up of the ALLWON goggle is an entirely new invention. A crystal-clear substance that cannot burn! Further than this, the two-tone lens of the

Allwon Micalite

One Piece — Fireproof — Indestructible



is made in ONE PIECE. No dust can enter these goggles, as it does the ordinary eye-shields that are made in two pieces. The flexible rubber band around the head can be renewed whenever it shows signs of wear. The cool rubber lining of these goggles gives a grateful soothing touch to the face. A slight lowering of the head and the most blinding searchlight, the most dazzling sun-rays cannot hurt the eyes.

ALLWON goggles are made in one and two colors.

One color ..... 50c. Two colors ..... 75c.

Send for descriptive card. If your dealer does not carry the ALLWON, send us his name and the price and we will send you one direct.

START YOUR SPRING CLEANING NOW AND MAKE A THOROUGH JOB OF IT

By PRACTICUS

WITH the spring season fast approaching, it is up to the dealer to clean house thoroughly, and to get right at it now, before the rush comes. Not only is a clean and orderly place more likely to attract and hold trade than one which is not well kept, but also there will be more room obtained after the cleaning, due to throwing out of scraps and dead stuff which has accumulated during the winter months. If you have never tried out a thorough spring cleaning, do it right off and you will be surprised at the heap of stuff that has been collected. And if you are thrifty, you will call in the junkman and get something for the old iron and brass.

Get After the Fixtures

But the cleaning should not stop at the store itself. The fixtures will show up more attractively if repainted or polished up anew. Most paint shows dull during the winter, with the lack of fresh air and the lots of dry heat that comes from the stove or furnace, and generally a rub over with some first-class finish will bring out the color and the gloss. I have been using a polishing material which is sold under the name of Johnson's Prepared Wax, which will give a neat and lasting finish to all kinds of cabinet work and which it will pay any dealer to use. As showcases, parts cabinets, lockers and tables all come under the head of cabinet-work, the wax can be used to good effect on all. It only requires a little rubbing and the woodwork gets a nice gloss on it.

But being neat in the establishment itself is not everything. The whole appearance is what counts in the long run. To see a lot of dingy machines in a nice, clean place is like looking at a faded and stained photograph in an ebony frame. The dingy mounts will take away a big lot of the good effect of the clean store. Get at the mounts; remove all stains and dirt. Clean off the enameled parts and polish them with a good preparation, such as the Johnson's wax mentioned above. Shine up the nickel-plating, replace all broken grips, and paint the tires with one of the tire-whitings. A clean and bright second-hand machine brings more than one which has not been attended to, and, in addition, will attract the attention of the customer and also of the man who may be a customer later on. With the second-hand machines cleaned and the store in spick-and-span shape, you will have an establishment which will draw trade by its neatness.

Make Riders Clean Up

But don't stop there. Get after your riders. Tell them that they should start the season right by having their machines bright and clean. Impress on them the fact that if they keep their mounts in first-rate shape, the resale value will be far greater when the time to trade in comes. You might organize a neatness contest, offering an accessory prize to the patron who keeps his machine looking the best for a certain length of time. The interest shown by the riders will surprise you, and the community at large will get a much better impression of motorcyclists, if riders and machines are neat when on the road.

LOUISVILLE, KY.

J. H. S. ETEEN has signed up to represent the Henderson for Louisville and vicinity. Eteen has established headquarters for his business at 918 South Fifth avenue, under the name of "The Cycle Shop." Eteen is now awaiting his initial order from the Detroit factory.

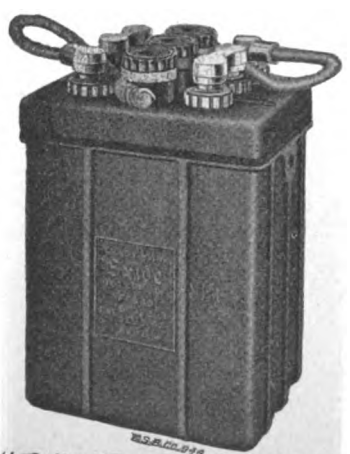
Electric Lamps and an "Exide" Battery furnish the most efficient and reliable light for motor cycle use



"Exide" Battery, Type 3-ZA-5 with cable type terminals

You no doubt realize the numerous advantages of electric light for motor cycle use.

The reliability of an electric lighting system is of course dependent upon the storage battery which furnishes the current.

The "Exide" Battery, type Z, especially designed for this service, is a quality-product, manufactured and backed by the oldest and largest battery maker in the country.

The battery is contained in a one piece, three compartment vulcanite case, having heavy walls and substantially re-enforced.

It is fitted with a one piece cover, having a flange which fits around all sides of each compartment.

The "Exide" Battery is equipped with a flood proof filling plug which overcomes slopping and spilling, and also limits the amount of water that can be poured into a cell to the exact amount needed to replace that lost by evaporation. The result is a clean, dry, and attractive battery.

Motor cycle dealers and users should write us at once and secure the name of the "Exide" Distributor nearest them.

Prest-O-Lite for Motorcycles

A Brilliant Lighting System That Costs Little and Never "Wears Out"

You must have bright, dependable light if you do night riding. Light that you can depend upon will add greatly to your comfort, pleasure and satisfaction. Your safety demands a light that won't fail you in emergencies.

You can get Prest-O-Lite on any machine you buy—insist upon it.

Prest-O-Lite is practical, simple, efficient and trouble-proof. It will stand as much abuse as your motorcycle. On any road, Prest-O-Lite will furnish an abundant supply of reliable, brilliant light. You can absolutely rely on it. Road vibration, shocks and jolts can't put Prest-O-Lite out of business. Prest-O-Lite never fails you in an emergency.

Owing to its simplicity and freedom from trouble, Prest-O-Lite is at once the most convenient and economical system for motorcycle lighting.

Get an Equipment Combination Including Prest-O-Lite

Your dealer can make you a very attractive offer on a complete equipment combination made up of "Prest-O-Lite, a lamp and a good mechanical horn." This is the right equipment for strenuous service. Costs little to buy and little to use. If your dealer can't supply you, write us.

Dealers: Prest-O-Lite sales mean a permanent, profitable business. If you're not "cashing in" on the Prest-O-Lite proposition, send for interesting details.

PINOCHLE AS AN AID (?) TO CYCLE SALESMANSHIP

(CONTINUED FROM PAGE 17)

The store was poorly lighted. Gas lamps were used, and, the day being somewhat dark, the lights were going—several of them working with only shreds of the illuminating mantles left. Gas was being wasted every minute those lamps were burned.

And still the pinochle game went on.

It was early in March. The new models of both motorcycles and bicycles were arriving; prospective buyers were ready to interest themselves in catalogs and letters; the trade press was tooting assiduously about the near approach of spring and the riding season; the factories were working night and day on machines and special literature for dealers; men, women and boys were beginning to think seriously of spring and summer recreation; police departments were ready to fill up gaps in their equipment with new motorcycles and bicycles; merchants were in a mood to consider means of improving their light delivery service during the summer months; hundreds of prospective buyers were trying to decide whether to invest in a motorcycle and sidecar or in a light motor car; National Guard officials on all sides were seriously considering the motorcycle as an adjunct to the army. There were business possibilities everywhere. The big get-ready season for the dealer was at its zenith.

But the pinochle game pursued the even tenor of its way.

If you were to step into the agency referred to, Mr. Motorcycle Dealer, wouldn't you see a dozen ways to improve it and to get ready for the season's business? No doubt. Well, just as a Safety First proposition it might be well to give your own place a careful going over to make sure that there is no danger of your getting into the pinochle class. *The time will be well spent.*

WAUSAU, WIS.

THE WISCONSIN AUTO SUPPLY COMPANY, of this city, has taken on the Dayton Motor Bicycle for Wausau and vicinity. Manager J. H. Farrell states that this is the firm's first venture into the two-wheeler class and winner. The firm will add an attractive stock of accessories suitable for this mount later on.

112 Broad St. NEW YORK

LIVE NOTES OF THE CYCLE TRADE IN NEW JERSEY'S METROPOLIS

NEWARK, N. J.—Walter Goerke, Wigwam representative, has again been awarded the contract for supplying the Essex County Park police with motorcycles. This is the fourth consecutive season for which Goerke has obtained this contract. The machines will be seven in number, all fitted with Splitdorf Mag-Generators and painted police blue. Three will be multi-geared and the others single-geared. Delivery will be on May 1. Goerke has also disposed of a sidecar outfit with Power-plus motor to the Sterling Tire Company branch.

CARL W. BUSH COMPANY has just received a carload of Silent Grays and Harley-Davidson sidecars. There were 34 machines and 26 sidecars in the lot, and most of them are already spoken for. The store was thronged with expectant owners who were pacified by Manager "Link" Holland as the crates were broken open, and not until midnight was the place cleaned up.

WILLIAM R. SPEAR, representing the Thor, has two light six-horse twins arrive and go into the hands of eager customers before he had a chance to show off one to the boys. Several more on the road stand the same chance of lingering in the store, if the warm weather stays with us. Spear sold a sidecar each week for the last five weeks and has reason to believe that he will better this for the rest of the season. Two used machines on the floor bear witness to the report that the demand for second-hands is brisk.

HAVERFORD CYCLE CO., branch has sold a Cygnet Rear Car attached to a three-speed Excelsior. The owner started with a solo mount, then increases to his household called for a side-car, and now he needs more carrying capacity; hence the Rear Car. Excelsiorites are looking forward to the Series 17 models.

DAYTON SALES COMPANY, Dayton and Emblem agent, is now showing off the paces of a newly-arrived Dayton Motor Bicycle from its home on William street. The new front-drive and the Emblem light twin have attracted a steady stream of customers, especially since the winter weather has departed.

MANAGER CORYELL, of the F. C. Cornish Estate, Henderson agent, is selling the four-cylinder mounts regularly, in spite of the $30 increase in price. Coryell and the demonstrator are almost inseparable these days, and there are only three occasions when Bert leaves it: to sign up a customer, to eat and to sleep.

KINGSTON, N. Y.

H. TERPENING, of 29 Broadway, this city, is well pleased with the results of his exhibit at the local auto show last week. He handles the Harley-Davidson and the Miami Power Bicycle for this section and made a number of sales of both as a direct result of his stand with the big four-wheelers. Terpening was assisted at his booth by C. A. Van Doren, of the Miami Cycle & Mfg. Co., Power Bicycle maker, at Middletown, O.

WILMINGTON, DEL.

C. B. SCHNEPFE, proprietor of the Delaware Cycle Co., has sold 13 Harley-Davidsons since the beginning of March, and has so far done three times as much business as in 1915. The baker's dozen are all three-speed models and have sidecars attached.

SAVANNAH DEALERS OUT TO BOOM LIGHTWEIGHT MOTORCYCLES

SAVANNAH, Ga.—Dealers in this city are convinced at last that there is a field for the lightweight in and around Savannah. R. R. Oakman, handling the Indian, has sold his first Featherweight, while C. B. Morgan, who recently took on the Pope, has sold a number of Model H machines. J. L. Hetzel, Excelsior man, has got his first order for the X lightweight.

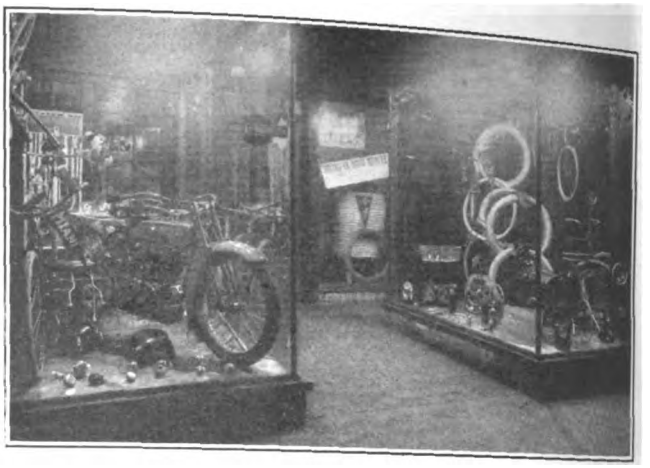
In the field of the big fellows, the Balfour Hardware Company has sold the county police two three-speed Harley-Davidsons with sidecars, as well as the first side-van combination to the Parcel Delivery Co. The Balfour firm recently sold a Model 16-J Silent Gray Fellow in Mexico, a transaction which holds the record for long distance around these parts.

Hetzel, in addition to disposing of an Excelsior lightweight, has ordered a big-valve motor and hopes to have it ready for the road races which will soon take place.

George J. Cleary, Thor agent, is putting in some good work. He sold his first light twin 6 during last week and also several of the 12 horsepower two-cylinder mounts. George W. Thomas, handling Indian bicycles, reports that this line is his best seller. He looks for a record-breaking season this year.

NEW YORK, N. Y.

PROPRIETOR ROSENTHAL, of the Park Row Bicycle Co., Ann street and Park Row, had his troubles one day last week when the first Miami Power Bicycle arrived. He put the lightweight in the window, where it attracted such attention that those interested could hardly get near the window, so great was the crowd. He tried to demonstrate the machine to a prospect, but it was no go, and he had to make an appointment with the man for later in the day. However, the man left a deposit, which compensated Rosenthal for the difficulties of showing off the bike's paces.



Attractive Front of New Headquarters of Graves Cycle & Supply Co., Harley-Davidson Dealer in Bay City, Mich.

SANTA ANA, CAL.

DRAPER'S CYCLERY is the only motorcycle shop in town, and consequently has the agency for a number of makes. He handles the Excelsior, Harley-Davidson and Indian as well as the Smith Motor Wheel. Draper reused mounts of different makes, as well as a Motor Wheel. He says that the Excelsior lightweight will be a big seller in his territory this season, from present indications.

Rogers

SUPERIORITY—The Visible Kind

The superiority of the ROGERS Sidecar is due to structural details that are easily understood.

The enormous strength of the All Steel Welded Frame is easily proven by practical service or simple tests. It does not require a mechanic or an engineer to understand that autogenously welded steel that becomes practically one piece is stronger than any combination of metals held together solely by the adhesion between soft and hard metals.

ROGERS design that enables any ROGERS Sidecar to be perfectly fitted to any standard motorcycle and then with the use of only a few inexpensive parts equally adapted to any other machine is a feature that appeals alike to dealer and buyer.

Let us send you our new circular that is brim full of valuable information. Write us stating the make of motorcycle you sell or use and we will send you a circular describing a ROGERS Sidecar to meet your requirements.

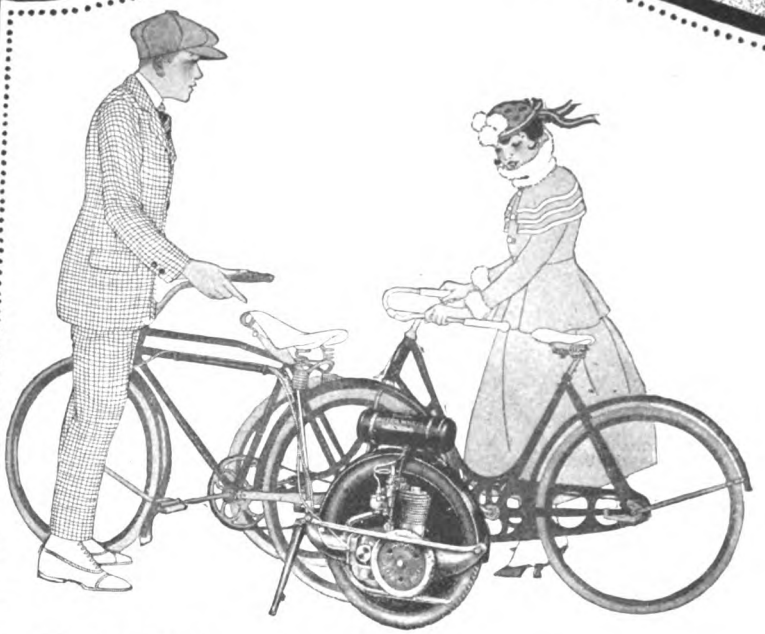
If the name "Smith Motor Wheel" is not on the fly-wheel of your motor, it is not a Smith Motor.



WITHOUT A COMPETITOR

IT is *without Competition.*

It is the *greatest self-advertiser* known.

These are two arguments for the Smith Motor Wheel which our most successful dealers recognize as the *big factors* that make for Motor-Wheeling success among merchants.

Anyone will admit that a device of which this may be truthfully said is an ideal merchandising article.

A. O. Smith Company patents stand as complete protection for the Smith Motor Wheel. There is no device on the market which approaches the Smith Motor Wheel. It is positively without competition.

Add to this feature of absolute exclusiveness, the factor of novelty—the ability of every Smith Motor Wheel to attract friendly attention wherever a Motor-Wheelist is seen and you have the whole explanation of why the line is proving such a sensational success wherever a merchant has it in stock.

Remember, that every purchaser is a daily advertiser for you wherever he goes. The Smith Motor Wheel attracts and fascinates wherever it is seen.

And remember, too, that the device is so simple—attaches in five minutes to *any* bicycle—that it requires very little demonstration to make a sale.

Motor-Wheeling headquarters in his community means even more than this to a live dealer. It means a much larger sale of new bicycles, tires and accessories. The Smith Motor Wheel is a business booster in every way you consider it.

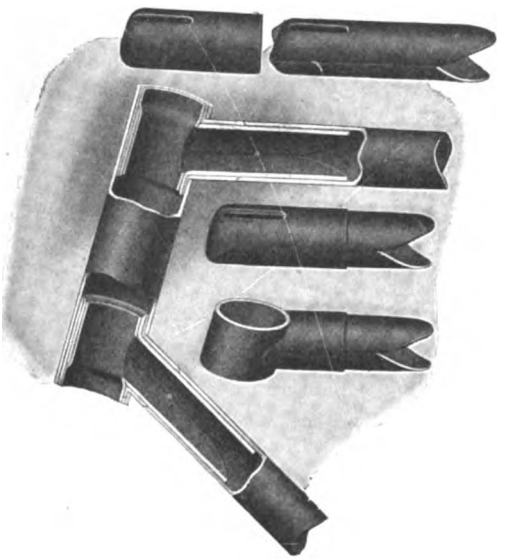
As Solid as a Single Piece

The frame of a Pope-made bicycle is as firm and solid as though made from a single piece of steel.

We use only Shelby seamless drawn steel tubing. This is accurately cut and formed into the necessary parts by the most up-to-date machinery.

To unite these parts, we use a patented method that is the result of years of experiment.

To understand this method, consider the frame head construction shown in the illustration. It shows the steel thimbles that are inserted into the head tube and then by special machinery, "spun" or spread out so that they immovably grasp the head tube from the inside.



The main frame tubes are placed in position over the projecting thimbles and the joints dipped into a molten brazing metal, which binds the various pieces together so solidly that they can only be separated by cutting.

The frame is then polished and aligned—forming a perfect foundation upon which the rest of the bicycle is built. This same care and science used throughout every detail of construction produces a bicycle that will give a lifetime of perfect service.

If you haven't any Pope-made bicycles on your floor, write for particulars regarding territory and dealers' prices—now.

WHERE WIRE PROVES ITS WORTH TO RIDERS

By GOSLIN

WIRE had always been a friend in need to the rider. I got my introduction to it the first summer that I ever rode. A friend lost a bolt holding his front mudguard to the forks and made us scout around for a substitute. We spied a new wire fence, so cut out a five-foot length and wired the loose guard up until we could reach a town big enough to support a hardware store.

A spool of soft, galvanized wire costs about ten cents and weighs but little. Its bulk is not great, so it should be in the kit of every rider's machine. It was a spool of such wire that helped me make a wayside repair a few weeks ago when the front mudguard braces let go through crystallization. Wire bound the loose ends together and a tape wrapping deadened the rattle.

Lashing the Poncho

Again, in a violent thunderstorm last summer, when we had to seek shelter and leave the outfit in the rain with a poncho over it, wire came in handy to lash down the corners and keep the cover from sailing off with the gale.

The rider may be careless with cotter pins and bung them all up taking them out when making a repair. Right there the spool of wire comes in handy making substitute pins for the damaged or mislaid ones. The makeshift pins do their duty just as efficiently as the real ones. This I know from personal experience.

A piece of stronger wire can be carried under the sidecar seat and take up very little room. It can earn its fare many times over in case of need. Say you lose a bolt from the brake rod. A loop of this wire will make as good a temporary repair as possible; one that will enable you to use the brake, which is very essential in traffic or on grades.

I ran across a lad one day with a second-hand—probably I ought to say, fifth-hand—crock whose motor was wired to the frame, the bolts having been lost somehow in the transaction. This I can't recommend in place of the usual bolts, but it shows just what could be done with wire in the event of something unforeseen coming up. Next time you see a length of bale wire lying around loose, coil it up and tuck it under the seat of the sidecar. You may never need it, but you may also run across some unfortunate who could use it, so wouldn't it make you feel good to help him out? Aside from that, a coil of wire weighs less than that luggage carrier you cart around with you all the time.

KEEPING THE DIRT FROM GAS LAMP BURNERS

OWNERS of machines having gas tail lights have no doubt been troubled with tips clogging up with mud these soft, thawing days. A simple way to overcome the needless purchase of a new tip each time is to have a small bag made of rubberized cloth with draw string attached and slip this over the tail light when not in use.

This bag can be purchased at an up-to-date motorcycle agency at nominal cost or can be made from a piece of discarded raincoat at no cost whatsoever, if the wife or best girl is at all handy with a needle. A larger bag of similar material can be used to advantage in keeping the nickel-plate on the headlight bright, for when the lamp is not in use is just the time that the tarnish comes.

RISK RUN IN QUOTING C.I.F. PRICES FOR EXPORT

IN connection with the quotation of c.i.f. prices for export, the Bureau of Foreign and Domestic Commerce calls attention to the risk of undertaking to quote such figures. There is much uncertainty with respect to overseas shipping at present, and ocean freight rates are changing frequently, hence the risk of giving c.i.f. prices.

To make such a quotation at present without a protective qualification against a further advance in the ocean freight rate would, in the opinion of a prominent manufacturing and export firm which has written the bureau on this matter, be not altogether safe. It is suggested that under existing conditions the better and safer way would be for the manufacturer or shipper to make quotation for delivery f.o.b. steamer New York or whatever the port of shipment may be, and advise his foreign customer regarding the freight rate obtainable at that time.

Commission expires 1917.

WANDERSEE GETS DETROIT POLICE ORDER FOR 14 HARLEY-DAVIDSONS

DETROIT, MICH.—The W. E. Wandersee Company, local representative for the Harley-Davidson, has closed a deal with the Detroit police department for 14 of the Silent Gray Fellows.

The Detroit police used Harley-Davidsons last season and were more than satisfied with the service obtained from them. The machines are on the job for twenty-four hours a day, three shifts of police riding them for eight hours each.

The Wandersee company has also obtained an order from the Michigan State Telephone Company for ten twins. The next carload of Harley-Davidsons is due in this city on April 15.

Thriving Agency of James G. Burroughs, in Bridgeport, Conn. With Recent Shipment of Harley-Davidsons

FIRST LOT OF BABY X MOUNTS CONVINCED PUTZMAN & BOWMAN

SACRAMENTO, Cal.—Putzman & Bowman, Excelsior dealers in this city, are now lightweight enthusiasts. They recently received five of the Baby Excelsiors and sold two immediately, the other three going in two days. A second order followed in the same manner, and now the partners are jubilant over the little two-strokers.

The firm was at first sceptical concerning the new little Excelsior and were not very willing to take even one. However, they finally got a shipment of five and then the selling began. At present, the lightweight has no stronger booster on the Pacific Coast than the Sacramento representatives.

R. K. Bowman, in speaking of the sale of the first lot, said that the Lucas Tamale House, the largest in Sacramento, had bagged the first machine out of the crate and started right in to use it for delivery work.

REPLIES TO READERS SEEKING INFORMATION

Write Maginni & Perkins

HAVING seen the illustration of a baby automobile using a Harley-Davidson motor for power, I would like to know the address of the firm which made them, and also where I could get the materials for making one. If there is any Eastern firm who would make up one for me, I would be glad to communicate with them.

Washington, D. C. *R. FREEMAN.*

The machines you refer to were made by Maginni & Perkins, of San Francisco, Cal., for Art. Smith, an aviator. As far as we know, this firm is the only one who has made such vehicles and the plans are either held by them or by aviator Smith. Maginni & Perkins are local Harley-Davidson agents. We are unable to give you the address of a firm in the East who would do the work.

Send It to Factory

I HAVE a twin motorcycle which is of 1914 model and wish to fix it so as to get more speed, as I intend to use it in road racing this season. I had it overhauled last Fall, but it doesn't seem to have the speed that it had the previous summer and spring. It will run at speed for a short distance and then limp for several miles, picking up again after a while and doing the same thing over again. Is there any way of fixing the carbureter to overcome this?

Philadelphia, Pa. *JOHN BROWNE.*

One season's use of a motorcycle for speed work is quite a strain on all parts of it, and it probably needs to have the cylinders rebored and larger pistons put in. The valve gearing will probably need an overhauling, as the cams and rockers have become worn and the timing has changed. We cannot recommend your doing anything to the carbureter, as any change in the jet will probably make matters worse. Send the machine to the factory for overhaul and tuning up, or dispose of it and get a new one.

Long Distance Records

TO settle a dispute I would like to have you give me the world's long distance sidecar and solo motorcycle records, and what machines they were made on.

New York, N. Y. *ARTHUR RYAN.*

There are no world's records on motorcycles. The governing body, the F. A. M., does not recognize such records as official, although they may be made under perfectly legitimate conditions. Our books show that an English rider, Harry Long, on a Singer covered 20,000 miles in 20 weeks in 1912, riding solo, and 40,000 miles in 40 weeks with a Singer sidecar rig. Both were made with single cylinder motors and were made round the coast of Great Britain. These are the two longest distance records existing, we believe.

SALES EXCEED SUPPLIES AT APPEAL STORE

SAN FRANCISCO, Cal., Mar. 31.—Mr. Fraser, manager for the Pacific Coast of the Appeal Manufacturing Company, says business has opened up tremendously during the fine weather of the last few weeks, and orders are coming in faster than machines. He got in a car of Harley-Davidson's March 10, and they went out almost immediately. He says there are five times as many sidecars sold as last year, while tandems are going more slowly. Mr. Fraser has just left to visit the trade through northern California.

COOPER RUBBER INCREASES

CINCINNATI, Ohio.—The I. J. Cooper Rubber Co., one of the most conspicuously successful tire concerns in this territory, has filed amended articles of incorporation increasing its capitalization from $100,000 to $225,000. The increase was decided upon for the purpose of enabling the company to take care of its rapidly expanding business, handling its big stock to better advantage and in other ways taking care of its interests and those of its customers.

BUYS HENDERSON TIRE RIGHTS

CINCINNATI, Ohio.—The Ideal Tire Co., one of the newest of the tire-dealers here, has purchased the tire business of Edward Henderson, at Eighth and Race streets, and secured quarters at 803 Race street to house its business.

A Brilliant Light
For The Darkest Night

On the darkest night there's a bright stretch of road ahead, always—a brilliant non-flickering light to point out the ruts and bumps and safely direct your course—if your mount is equipped with the

REMY
Motorcycle Lighting-Ignition System

No quick stops—no sudden surprises—you can speed ahead with a comfortable feeling of safety. The Remy System provides a steady, intense, never-failing light—also strong, reliable synchronized ignition. Distributor Ignition, similar to that obtained from the Remy Motorcycle Lighting-Ignition System will be standard equipment on the majority of automobiles produced in 1916. Contracts have already been signed calling for delivery of 255,000 Remy Systems this year.

Many 1916 Harley-Davidsons are equipped with the Remy System. Ask to see it demonstrated. Service stations almost everywhere.

IGNITION

has your engine in its grasp

If you have the right kind of ignition system on the motorcycle you sell, the engine will run when you or your customer wants it to, as often as you want it to, and as long as you want it to—always with the best output possible, always with the quickest acceleration.
If you haven't the right kind of ignition you never can tell what will happen—failure to run may occur at the time you want power most.

Bosch Magneto Ignition

is a method of ignition that can be depended upon today, tomorrow or years from tomorrow. It requires no batteries, has no complications and needs no coil. It is an ignition system entirely contained in one unit, with nothing about it to get out of order.
If the motorcycle you sell or buy or use is not Bosch-Equipt, you can have it so by insisting upon Bosch Magneto—you *can* get it.

Pope-made Bicycles

Announcement to Our Dealers

With everybody riding, everybody buying bicycles, and the entire trade working together for "1,000,000 Bicycles in 1916," there has come an overwhelming demand for Pope-made bicycles—the quality leaders.

Working night and day, the big Westfield Plant has produced and shipped more bicycles than in the corresponding period of any previous year.

But, with the increasing demand and the extreme difficulty of getting enough of the material that meets Pope standards, we find that it will be impossible for us to manufacture all the bicycles our dealers will want during 1916.

As a protection to both our dealers and ourselves, we cannot accept orders except for the regular name-plate, catalog bicycles, such as:

Columbia and Hartford	Clipper Light Roadster
Tribune and Stormer	Pope Daily Service
Cleveland and Westfield	Messenger Special
Rambler and Ideal	Juveniles
Crescent	Pope
Monarch	Pope Special
Imperial	Sterling
Motobike	Seminole
Defiance	Vedette

These are the bicycles that are known from one end of the country to the other; they are the bicycles which we have been advertising and pushing; and they are the bicycles that it will pay you, in increased profits and prestige, to handle exclusively.

The Motor Wheel Way To and From Work

"Cheaper than Carfare"

Here is a friendly tip which is so good we must pass it along to SMITH MOTOR WHEEL dealers. For it means a new, "golden" link in the profit chain which live dealers are forging.

In most every town where there is a SMITH MOTOR WHEEL dealer, there is also a factory community. Many of these employes use bicycles. Many others are ready to change from street-cars to bicycles.

Here is the dealer's chance. Get your SMITH MOTOR WHEEL busy in such communities. Arrange a noonday demonstration. Get your literature into every man's hands. It will be easy to make a first sale. Then see how quickly others will follow.

The Motor Wheel Way to and from work is the ideal way. No pedaling after the day's work, or on the home-for-lunch spin. A fresh, exhilarating ride to or from the factory, arriving refreshed, clean and happy.

One rider will start a series of sales. And **you** will be the winner.

Don't overlook the fact that you are in line for big extra sales of tires, new bicycles and accessories when you handle the SMITH MOTOR WHEEL. Also, there are no bothersome trade-ins, only quick sales, and quick turn-overs for **cash.**

In certain localities we have not as yet appointed representatives. We invite correspondence with established dealers.

Smith Motor Wheel
DETACHABLE

If the name "Smith Motor Wheel" is not on the fly-wheel of your motor, it is not a Smith Motor.

BLUE STREAKS

A SQUARE deal for the dealer. That is the Goodyear policy. It helps the dealer sell more bicycles, more Blue Streak tires, and more sundries. It increases his yearly sales in all lines he carries. It makes him a better dealer. Over 8,000 dealers are now selling Blue Streaks the new Goodyear way. If you don't know about it, drop us a postal. You will receive the complete Goodyear Square Deal Tire Policy by return mail.

"Never Been Off the Rim"

Think of it—

For two years the United States Motorcycle Tire referred to never gave a moment's trouble.

We have records of mileages that seem almost staggering, but here is one that is remarkable for this reason,—that in two years' constant service it was "not punctured, and the fabric is not yet worn in the least."

We have the tire—we had to see it to be sure of our statement.

Perhaps you may not get as wonderful service from United States 'Chain' Tread Motorcycle Tires, but you are certain of remarkably good service, as thousands of owners attest.

N. Y. SPORTING GOODS CO. IN CONSOLIDATION

Well-Known Distributors of Motorcycles and Bicycles and Handlers of General Sporting Materials Will Absorb Abbey & Imbrie, Pioneer Fishing Tackle Firm in New York

NEW YORK, April 11.—Plans are announced for the consolidation, to take place next November, of Abbey & Imbrie, manufacturers of fishing tackle, 18 Vesey street, and the New York Sporting Goods Co., 17 Warren street, New York. Abbey & Imbrie's lease of the building at 18 Vesey street, which they have occupied for over thirty years, expires early in 1917. The two companies when combined will occupy an additional building on Warren street, just off Broadway, making a total of three seven-story buildings, to make room for their combined stocks of merchandise.

The bicycle and motorcycle department will be moved into the new quarters at No. 10 Warren street and will occupy the entire building. This will give the company added facilities for taking care of their wholesale bicycle and motorcycle trade.

The New York Sporting Goods Co. has carried on for many years a large business in tents, camp equipment, canoes, guns, ammunition, bicycles, motorcycles, and sportsmen's and athletic goods generally, to which will now be joined the long-established manufacturing and selling organization of Abbey & Imbrie, widely known as the makers of "Fishing tackle that's fit for fishing." The firm was founded in 1820 and is now in its ninety-sixth year.

Present Official Staff

The present officers of the New York Sporting Goods Co. are: Powhatan Robinson, president; Frederic A. Baker, vice-president, and James E. Murray, secretary and treasurer.

The fishing tackle business of Abbey & Imbrie will be continued by the same organization and under the same management as heretofore. Andrew C. Imbrie, now president of Abbey & Imbrie, (the third generation identified with the business), will become a vice-president of the New York Sporting Goods Co., and Alfred W. Law, for many years treasurer of Abbey & Imbrie, will become assistant secretary of the New York Sporting Goods Co.

All of the employees of both companies will be taken over by the consolidated company, and no change is contemplated in the manufacturing, selling or clerical forces.

The sporting goods department will be under the direction of Powhatan Robinson; Andrew C. Imbrie will be identified with the fishing tackle department; Frederic A. Baker will look after the bicycle and motorcycle business as before, and James E. Murray will act as secretary and treasurer, assisted by Alfred W. Law as assistant secretary and Jacob D. Koebler and Charles E. Michaud as assistant treasurers.

CHAMPION SALES BREAK ALL RECORDS IN MARCH

TOLEDO, O.—All production and sales records of the Champion Spark Plug Co. were broken during the month of March, 1916. In that month were produced 1,111,623 complete spark plugs and 167,420 assembled porcelains, while sales were for 1,137,299 spark plugs and 94,277 porcelains.

The Champion folks state that there will be a 100 per cent. increase in production when the new six-story addition is finished.

LATEST EMBLEM CATALOG IS FULLY DESCRIPTIVE

ELOQUENT of the advantages of Emblem motorcycles in models ranging from the Model 106 light twin to the big Model 110, is the latest catalog issued by the Emblem Manufacturing Company, of Angola, N. Y. The characteristic features of Emblem motor construction are described and pictured, as well as the firm's simple and effective foot-starter and "Easy" spring forks. The list of models includes a sidecar and a very practical sidevan and a tandem attachment.

BERLING ORDER IS CLOSED FOR THE EXCELSIOR

THE Ericsson Manufacturing Company of Buffalo, manufacturers of the Berling magneto, have just closed a contract with the Excelsior Motor Manufacturing & Supply Company for a very substantial quantity of Berling magnetos. This recognition by a large manufacturer of the merit of the Berling is naturally regarded as significant by the manufacturer. Gradual but steady progress has been made by the Ericsson Manufacturing Company in the motorcycle field since the Berling was introduced to the trade a few years ago, and the Excelsior order may well be taken as constituting an important move in the direction of very much increased motorcycle business for the progressive Buffalo company.

NEW LAW COVERS CYGNET REAR CARS ALSO

NEW YORK, April 10.—In reply to an inquiry from **Motor Cycle Illustrated** as to the standing of a Cygnet Rear Car outfit under the new State registration law, the following letter has been received from Secretary of State Hugo:

"In reply to yours of the 5th inst. to our Albany office, requesting information in regard to the registration of a machine (Cygnet Rear Car), would advise that the machine you describe as per circular forwarded with said letter, is regarded as a motorcycle and must be registered as such."

NEW M. M. A. HEADQUARTERS

NEW YORK, April 10.—Secretary E. F. Hallock announces that the New York office of the M. M. A., the F. A. M. Press Bureau and the National Motorcycle Dealers' Information Bureau has been changed from 1482 Broadway to 116 Broad street. Secretary Hallock is now occupying the new quarters.

AUSTRALIANS ARE ROAD EXPERTS, SAYS BAKER

"Cannonball" Found Them Thorough Sportsmen With Exceptional Ability in Cross-Country Trials; Brings Back Twelve Records, Five of Them Being New World Marks

"CANNONBALL" BAKER, of Indianapolis, fresh from the scenes of his world's records with an Indian motorcycle in Australia, says that the Australians are thorough-going sportsmen.

"I received absolutely the fairest and squarest treatment you could ask for," says Baker. "You get only what's coming to you from their officials, but you don't have to go out and earn something and then fight to get the credit for it. They use electric timing devices, measure the course down to the foot and pull things off clean. It's all road riding in Australia—no track work. The Australian boys have a lot of riding knowledge and I learned something from them as well as gave them a few points out of my own book.

"All their big riding stunts come off at Mortlake, which holds the same place in motorcycle affairs there that Dodge City, Kan., does in this country. The course is 33.9 miles long and lies about 145 miles west of Melbourne. When I made my big record there, 1,028 miles in 24 hours, the news was cabled around the world. To show how fast that sort of thing travels, I had no sooner got into Melbourne in the afternoon than I found a cablegram from London inquiring what oil I had used on the ride.

"I set up twelve new road records in Australia for long-distance road riding, five of them world's records, and averaged 50 miles an hour, including all stops. At times I was going 76 and 80 miles an hour.

"Often I was turning up 3,700 to 3,800 revolutions a minute with the Powerplus motor. This new style motor with its side-by-side valves is no longer an experiment. It's far ahead of an experiment when it does the things that it has, like my Three Flag drive from Canada to Mexico last Fall in three days and nine hours as well as these Australian rides.

"Some day I hope to go back to Australia," concluded "Cannonball," "but just now I am working on a program to do some more riding in the United States."

NEW JERSEY M. C. TO WELCOME VISITORS

Wideawake Newark Club Will Co-operate with General Committee in Charge of Civic Celebration; Plan Monster Parade

NEWARK, N. J., April 8.—The New Jersey M. C. is preparing to "do its bit" towards co-operating with the general committee in charge of the program in celebration of the 250th anniversary of the founding of Newark. This program will extend from May to October, and will embrace A. A. U. National championships, American Canoe Association State and National championships, interscholastic field meets and many other athletic features, in addition to numerous parades and sessions of fraternal bodies and incidental spectacles of fifty-seven varieties. Things will surely hum.

The New Jersey M. C. is laying plans to entertain visiting motorcyclists and to aid them in finding their way about the city so that the various programs may be seen to advantage. The club has also booked Saturday, June 17, for a monster decorated motorcycle parade. The procession will be held in the daylight and will be for motorcyclists exclusively. The committee in charge of this feature hopes to obtain entries from many nearby cities, in addition to the large turn-out from Newark. This committee, to be made up of three motorcycle dealers and three riders, will be named at the next meeting of the club.

Another committee will be named to collect information and make general arrangements for taking care of visiting motorcyclists, and all riders from out of town will be welcome to make their headquarters at the home of the N. J. M. C.

DIXIE M. C. RIDERS START SPRING ROADWORK

This wideawake squad of boosters from Roanoke, Va., was snapped during a recent Sunday run. It will be noted that the boys are strong advocates of the sidecar. They hold regular sociability outings and plans are also under way for a big endurance trial which will be held next August.

U. S. TIRE OFFICERS ARE RE-ELECTED FOR 1916

NEW YORK.—Officers of the United States Tire Company, of this city, were re-elected on April 6. The list is as follows: James Newton Gunn, president; Ernest Hopkinson, vice-president; E. J. Hathorne, treasurer; John Williams, assistant treasurer; Samuel Norris, secretary; John D. Carberry and P. O. Eckhardt, assistant secretaries.

The board of directors consists of Walter S. Ballou, Nicholas F. Brady, Charles J. Butler, Samuel P. Colt, James B. Ford, J. Newton Gunn, Ernest Hopkinson, Lester Leland, Raymond B. Price, Homer E. Sawyer, Joseph C. Weston and Elisha S. Williams. The only changes are the addition to the directorate of Homer E. Sawyer, who is vice-president in charge of the footwear department of the U. S. Rubber Co., and Joseph C. Weston, who is general sales manager of the U. S. Tire Co.

BIG CYCLE SECTION IN GOODYEAR TIRE NEWS

ONE full page of the March issue of the *Goodyear Tire News*, the house-organ of the Goodyear Tire & Rubber Company, of Akron, O., is devoted to motorcycles, while another page is devoted to bicycles. The motorcycle page has a feature story concerning the lightweight, entitled "Discovering the Lightweight Prospect," which is an instructive conversation between a cashier and a motorcycle dealer. The upshot of the conversation was that the cashier purchaser became a lightweight user. The rest of the page is devoted to photographs and descriptions of Goodyear tire users in different parts of the country.

The bicycle page is half occupied by a layout of photographs relating to the part played by Goodyears on February 29, Bicycle Day. The text describes what was done on that occasion in various cities. The rest of the issue is given over to Goodyear performances and factory news.

FISK WORKERS' ATHLETIC PLANS

CHICOPEE FALLS, Mass.—Employes of the Fisk Rubber Company have just closed an option on the Imperial Park grounds for a two-year lease. The social and athletic associations of the company are laying out grounds for various sports. The organization was perfected and financed by the employes themselves, the membership including shop and office employes, women as well as men.

ANOTHER SPLITDORF USER

ONE of the latest converts to the Dixie magneto and Splitdorf spark plug is the Lawson Manufacturing Company, according to a recent advice from the Splitdorf Electrical Company, of Newark, N. J. The magneto and spark plugs will be used on the Lawson one-ton truck. The Model 40 magneto and the "Common Sense" plug are called for.

HOUSER'S GUIDE ISSUED

LOUISVILLE, Ky.—Houser's Official Automobile & Motorcycle Directory for 1916 has just been issued in this city.

"BEST FOR THE DEALER"

Motor Cycle Illustrated. — Here's the price of my renewal. Send her along. I can't get along without it. Surely it's the best publication out for the dealer.

ROSE CYCLE WORKS,
Rose, N. Y. E. L. Rose, Prop.

INCREASING STRENGTH OF MOTORCYCLE SECTION

NEW YORK, April 8.—The motorcycle detachment assigned to F Company, 71st Infantry, N. G. N. Y., has now 20 men on the strength, in place of the 18 originally called for. It has been determined to increase the detachment to 30 men, and possibly to 40, if applications continue to be made, as has been the case since the detachment was first organized.

The motorcycle detachment is a headquarters body, although at present attached to the 71st Regiment, and its members will serve as scouts, messengers, etc., to the Guard's Division Headquarters. Motorcyclists who desire to join should apply to Lieutenant E. C. Schroeder, recruiting officer, or to Captain Albert C. Rich, F Company, at the armory, 33d street and Fourth avenue, on Wednesday and Friday nights.

FIRESTONE BUILDING READY SOON

KANSAS CITY, Mo.—Officials of the Swenson Construction Co., building the new Firestone structure at Tracy and Twentieth streets for the Firestone Tire & Rubber Co., has notified the firm that the building will be ready for occupancy by May 15. The outside walls are complete and work on the three-story tower on the roof of the building is well under way.

TALKED ON STORAGE BATTERIES

NEWARK, N. J., April 11.—The New Jersey M. C. members listened to an interesting talk this evening on storage batteries by H. C. Heinrich and L. M. Merz, of the Newark "Exide" branch. Later both speakers and audience were well taken care of by the club's famous trio of chefs, "Pete" Cunningham, Art Wintsch and Charley Busch.

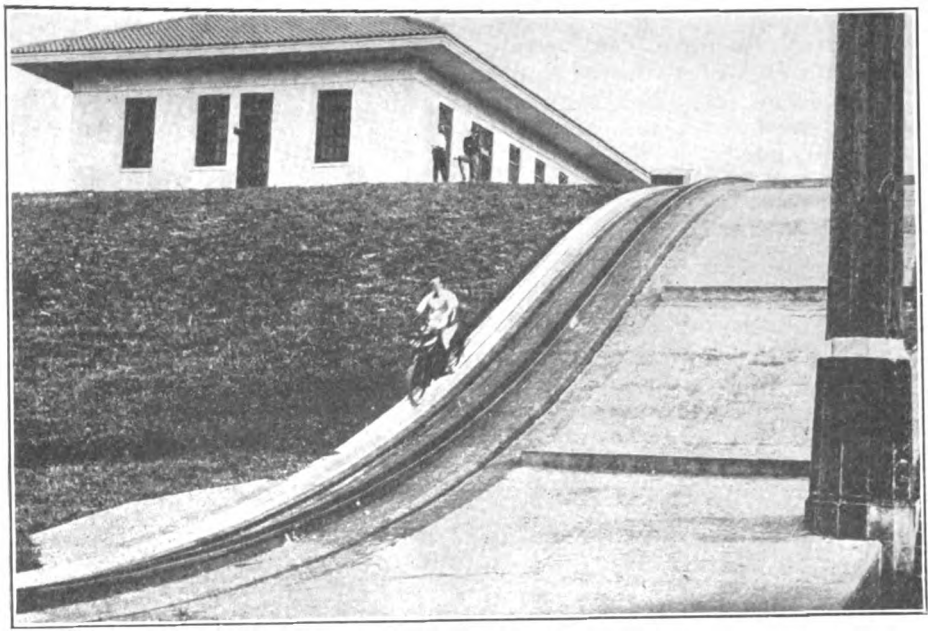
GATUN LOCKS RUNWAY MAKES FINE TESTING PLACE



Walter Barnebey, on Indian, Descending Concrete Path Alongside Towing Track

MOTORCYCLISTS, with the curiosity inherent in all sons of Eve, are continually trying to discover new powers in the machines they ride, and the latest effort reported in this line is the spectacular ride of Walter Barnebey on an Indian motorcycle up the incline of the Panama Canal at Gatun Locks. The path is a slippery concrete runway alongside the cogged rail by which motors towing ships through the canal ascend from the lower level to the upper. The grade is 45 degrees in the steepest part, and makes a rise of 28⅓ feet from the lower level to the lake.

Barnebey rolled up the ascent and coasted down again, repeating several times on high, second and low speed. Then he took on a tandem passenger, Sergeant A. L. Reeve, of the Zone police. Between rides up the hill they coasted down again within the limits of the narrow concrete ribbon, and thoroughly enjoyed the novel pastime.

FIVE PERFECT IN CHICAGO INDIAN RUN

CHICAGO, Ill.—Five contestants secured perfect scores in the run to North Judson, Ind., and return of the Chicago Indian M. C. on April 2. The mileage was 180.2 and the scheduled speed was 20 miles per hour. The perfect score men are: G. Zima, A. Hertzer and P. Gassman, all on Indians; A. Kolb, Henderson, and E. Leemhuis, Excelsior.

Seven started from the clubhouse and all arrived at Hammond, Ind. Between this point and Valparaiso there were several spills. The lunch control was at North Judson. The perfect score men get a cash award of $4 each.

COLLIER WINS MOSSVILLE HILL CLIMB

PEORIA, Ill.—Ray Collier won the Mossville hill-climb of the Peoria Motorcycle Militia on April 2 in 44⅗ seconds. He rode a Harley-Davidson. Charles Fuener, on a similar mount, was second, in 46⅖ seconds, and Paul Gott, captain of the Militia, was third, in 46⅘. The hill is half a mile long and is steep and rough. Each rider was given a trial climb and then timed regularly. There were 45 present at the affair.

SPEEDWAY CLUB TO MEET ON APRIL 16 AT TRACK

NEW YORK, Apr. 11.—The Speedway M. C., Inc., of this city, announces to all its members that the meeting which was called off last Sunday, April 9, will be held on April 16, at 2 p. m. The meeting will be called at that hour at the Sheepshead Bay Speedway, and admission will be free to all members. Riding will be permitted on the track after the meeting.

The members are all earnestly requested to attend by Secretary Irving Barnard, as matters of prime importance will be determined during the meeting.

SALES MANAGER O'HARE ON TRIP THROUGH EAST

CHICAGO, Ill.—Sales Manager C. B. O'Hare, of the Aurora Automatic Machinery Company, is now on his way east for a general review of Thor agents. He will go to Cleveland and Buffalo and then to Springfield, Mass., for the M. M. A. meeting. He will visit New York, Philadelphia and Pittsburgh also.

This will be the first introduction of Thor agents to the new sales manager. The homeward schedule takes in Cincinnati, St. Louis and Indianapolis.

FRESNO TRACK MEET BOOKED FOR MAY 7

FRESNO, Cal.—Races will be held on the local track on May 7 under the auspices of the Fresno County M. C. Seven events will be staged, as follows: 5-mile open, twins—$30, $15, $10; 10-mile open, twins—$40, $20, $10; 25-mile open, twins—$60, $30, $15; one-mile time trial, twins, $10; 25-mile Australian pursuit race, twins, $25; 15-mile open, twins, for riders living in California north of and including Bakersfield, $25; 10-mile open, twins, for California motorcycle club members north of and including Bakersfield.

The trophy for the last named race will be a cup, which will go to the club represented by the winner. The club will retain the cup until the next meet staged by the Fresno club, when it will again be put up for competition.

"CAN'T GET ALONG WITHOUT IT," SAYS DAVIS

Editor: Please find renewal for my subscription to your paper. Can't get along without it.

W. E. Davis.

Nashville, Tenn.

IVER JOHNSON INCORPORATES AT BOSTON

BOSTON, Mass.—Papers of incorporation have been filed by Iver Johnson's Arms & Cycle Works, of Fitchburg, Mass., under the Massachusetts laws, the well-known manufacturers of motorcycles and bicycles having an authorized capital of $600,000. This comprises 6,000 shares of common stock, par $100, all of which has been issued. The incorporators are John Lovell Johnson, of Fitchburg; Walter Johnson, of Fitchburg, and Mary L. Otto, of Williamsport, Pa. John L. Johnson is president; Walter Johnson, treasurer, and Mary L. Otto a director. Each of the incorporators has subscribed for 2,000 shares.

PLANNING DODGE CITY RACE

Chairman John L. Donovan, of the F. A. M. Competition Committee, announces that the Dodge City 300-mile race is assured for this summer. Bulletins from the boosters who are in charge of the plans state that the course will be in perfect condition for record-clipping and that practically all the factories have intimated that their top-notch speedboys will be on the job. New records are expected to be made this year by the contestants.

BAY STATE CLUB DANCE

BOSTON, Mass.—The Bay State M. C., of this city, held an informal dance and dinner at the Hotel Oxford on April 13, to celebrate the opening of the new clubrooms. The dinner began at 7:30 p. m. and dancing was indulged in after 9 o'clock. The affair was a huge success from beginning to end. The motorcycle trade in the Hub as well as riders all contributed to making the affair one of the best motorcycle entertainments yet run off.

ANOTHER HILL-CLIMB PROMISED

PHILADELPHIA, Pa.—Owing to the success which attended the hill-climb held last summer by the *Evening Telegraph*, of this city, the newspaper folks have decided to stage another similar program this year. The scene of the excitement will probably be the Ashland avenue hill. This hill has a 35 per cent. grade.

Digitized by Google

THREE CLASSES IN PIKES PEAK CLIMB

Sidecar, Stock Solo and Lightweight Events Scheduled for Annual Event in Colorado on August 10—Cups and Cash Prizes

DENVER, Colo.—Entry blanks have been issued for the annual hill-climbing contest to the summit of Pikes Peak on August 10. The affair will have three motorcycle events and a number of automobile events, and will be held under the auspices of the Pikes Peak Auto Highway Co., of 301 Mining Exchange building, Colorado Springs.

The events for two-wheelers are a sidecar climb, a lightweight class climb and a stock event. In the sidecar event, the Rocky Mountain cup and $100 in cash will be awarded to the winner, while the second man will get $60, and the third $40 in cash. The lightweight class, open to any machine weighing 200 pounds or less, gives the winner the Pikes Peak cup and $100 cash, the second man getting $60 and the third $40. The stock solo event winner will have possession of the Pikes Peak Auto Highway cup, valued at $250, along with $100 cash. Second and third men will receive cash as in the other events.

The three motorcycle events will be held on Thursday, August 10. Entry fee in each event will be $10. Motorcycles must be stock in all cases, and must not exceed 61 cubic inches in the sidecar and solo classes. Standing start shall be made in each climb. The course is from Mile 5 to Mile 18 on summit of Pikes Peak, a distance of 12 miles and 220 feet, with a rise of over 5,500 feet.

"HELPED IN MAKING SALES"

Editor: Enclosed find check for three years for Motor Cycle Illustrated. The Motor Cycle Illustrated has helped me in making many good sales, therefore will take no chances in missing any.

James Eisen.

Brooklyn, N. Y.

NEW CLUB IN SEATTLE

SEATTLE, Wash.—A new motorcycle club was organized here and officers elected for the time being. The club has 115 charter members, and will soon affiliate with the F. A. M. A rule has been made that no dealers are eligible for office. There were 45 members on a recent run to Tacoma, and another run will shortly be held to Cedar Falls and North Bend.

RABBIT BAGGED HIMSELF FOR RIDERS' BENEFIT

CHARLESTON, S. C.—Motorcyclists of this section of the country usually go out rabbit-hunting with firearms and have to race the game at that, but John Renau, Frank Heinsohn and H. H. Puckhaber, Jr., apparently are exceptions. One night when all three were riding along the road a few miles outside of the city limits, they bagged a rabbit by his running into them, at no expenditure of energy on their part. As a matter of fact, the rabbit brought himself down by being struck by all three mounts in succession.

Puckhaber was riding ahead, followed in order by Heinsohn and Renau. The bunny, dazzled by the light on Puckhaber's Henderson, bounded into the front wheel and was thrown against the front wheel of Heinsohn's mount. It was finally picked up by Renau, and was decidedly "dead" by that time.

MOUNTING THE ERIE COPS

ERIE, Pa.—This city is determined that its police department shall keep abreast of the times, and has indicated this policy by ordering two Indians.

Demonstrator of Dayton Motor Bicycle Riding Hands Off in Cleveland

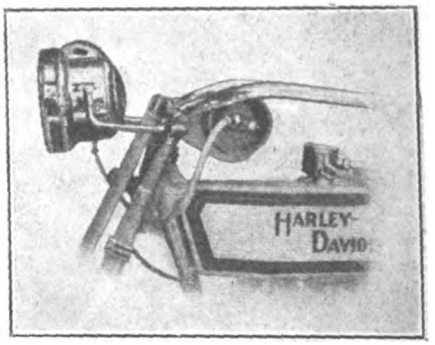
HARLEY-DAVIDSON STOCKS BISON BRACKET

Accessory Department in Big Milwaukee Factory Will Make Immediate Delivery of Combination Lamp and Tank Carrier to Dealers

MILWAUKEE, Wis.—Through an arrangement with the Harley-Davidson Motor Co., of this city, all Harley-Davidson dealers can be furnished with the Bison combination lamp and gas tank bracket, produced by Herman L. Peters, of Buffalo, N. Y. Deliveries on the bracket can be made immediately from the accessory department of the Harley-Davidson factory.

The Bison bracket, which was particularly designated to fit Silent Gary models, is attached to the handlebars. The rear portion carries the gas tank in a horizontal position, while the lamp is borne by two arms or props. The gas tank is carried between the bars and the lamp directly in front of the fork, the props fitting any make of lamp. The gas tank portion of the bracket is of malleable steel, and is finished in black and nickel. The tank is held in place by two clips, and can be removed by simply loosening two nuts.

The lamp props are of cold rolled steel and are nickeled. They are screwed into bosses formed in the gas tank section and are there held by specially-designed locknuts. These nuts cover all the threaded portion, thus ensuring against breakage. The whole bracket turns with the wheel and tends to keep the wheel on the road. It allows of quick removal of the gas tank without injuring the finish of the motorcycle and also gives ready access to the flame of the headlight. A speedometer can be readily attached to the Bison bracket. Each bracket is shipped in a separate carton. The list price is $3.50 each. The brackets can also be had of Herman L. Peters, in Buffalo.



Bison Bracket with Lamp and Tank

GIVES CUP FOR INVINCIBLE SPRING RUN

NEW YORK, April 10.—The Silvex Company, maker of Bethlehem sparkplugs, of 170 Madison avenue, this city, has donated a silver cup to the Invincible M. C., of Brooklyn, N. Y., as a prize for the fifth annual spring run. This cup is to be awarded to the club having the greatest number of riders to finish the affair.

TO HOLD ANOTHER RUN

DETROIT, Mich.—The Fairview M. C. of this city will hold another sociability run on April 16. At least 25 riders will participate. The route leads over good, concrete roads to Northport and return, a total distance of close to 100 miles.

F. A. M. Commissioner Tom Martin is starting a movement to reorganize the old Detroit M. C. and affiliate it with the federation. Eighteen members have joined the F. A. M., and it is hoped that Detroit will add at least 50 new members for Booster Week.

WON ARGENTINA ROAD RACE

Dartiguelogue & Co., Harley-Davidson representatives in Buenos Aires, Argentine Republic, have cabled news of a Harley-Davidson victory in a road race held April 9. The event was at 400 kilometers and a speedster named Bernasconi, mounting the Harley-Davidson, finished first in 5 hours 33 minutes.

WILL HAVE A TRACK

PATERSON, N. J.—The old Clifton race track is being put into shape for motorcycle competition this season. Men have been working for the past few days, grading and banking the track.

Digitized by Google

WANTED: ATTRACTIVE PHOTOS WITH ROGERS CARS

CHICAGO, Ill., Apr. 12.—To increase the use of sidecars the Rogers Mfg. Co., of this city, has started a photographic contest, offering prizes at $10, $5 and $3 for the most interesting photographs in which a Rogers' sidecar is included. The contest closes July 1.

The picture will not be judged on the basis of skillful photography, but on the human appeal it makes. Everybody, dealer or rider, is eligible to take part in the contest. Photos should be mailed to the Rogers Mfg. Co., 337 W. Madison street, Chicago.

F. A. M. DIRECTORS PAY TRIBUTE TO E. M. ESTABROOK

WHEN the death of E. M. Estabrook, former chairman of the F. A. M. Membership Committee, was brought to the attention of the Federation Board of Directors, the following preamble and resolution were presented by Diretcor William Johnson, and adopted by the Board:

"WHEREAS it is most fitting that the records of the F. A. M. should forever bear witness to the merits of our long-time member and officer now called to his reward, and,

"WHEREAS he was one possessed of many lovable qualities, of more than ordinary strength of intellect, clearness of vision and broad-mindedness, who has now attained that perfection of wisdom only possible to one who has made the great adventure, and

"WHEREAS his efforts for a greater F. A. M. have not been excelled by any single individual, leaving an example worthy of emulation by all,

"BE IT RESOLVED, That the Federation of American Motorcyclists, its officers and members, express their profound appreciation of his great service and tender their heartfelt sympathy to the bereaved members of his family,

"THAT this resolution be spread upon our records. That copies be presented to the surviving members of his family and published in the trade journals."

TO HAVE MOTORCYCLE RACE

TIPTON, Ia.—The Tipton Racing Association has announced the inclusion of a motorcycle race in its program for the July 3 and 4 meet.

CHAPPLE JOINS MOTOR CAR EQUIPMENT COMPANY

ARTHUR G. CHAPPLE, well known in both trade and speed circles, has joined the staff of the Motor Car Equipment Company, of 19 West 62nd street, New York City, as manager of the motorcycle and bicycle and cycle accessory department. "Chap" took up his new duties April 11, and at once started work on plans for a strong lineup of motorcycle and bicycle offerings. Later he will be in the field for a bicycle agency or two, and perhaps a motorcycle proposition. For the present he is interested chiefly in supplies and accessories, and manufacturers of quality lines who would like to place their goods with a live-wire in the New York district are invited to shoot their catalogs along to Manager Chapple at once.

The Motor Car Equipment Co. has given considerable attention to the motorcycle and bicycle fields from time to time, but owing to the pressure of automobile business has never seriously gone out for cycle business. With Chapple in charge of the new department the firm is preparing for an active campaign.

SNAPPY DISPLAYS ASSURED SUCCESS OF WHEELING SHOW

THE accompanying photographs show three of the attractive booths at the Wheeling, W. Va., motor show, the returns from which considerably exceeded the expectations of the exhibitors. At the left is seen the exhibit of C. F. Braunlich & Co., with the Harley-Davidson, Dayton motor bicycle, Cleveland lightweight, Pope bicycles and Smith motor wheel.

Above is seen the stand of D. Earle Rogers displaying the Flying Merkel and a line of accessories. The larger photograph shows Wesley House, Indian dealer, in his elaborate stand; House occupies the sidecar, while Arch Huff is in the saddle.

ASSURES ALL-YEAR INTEREST

Editor: Enclosed find two dollars for renewal of my subscription. Motor Cycle Illustrated was responsible for the purchase of my first machine, and it has kept me interested fifty-two weeks in the year ever since.

H. R. Needham.

New Bedford, Mass.

NOTES OF THE TRADE IN BUSY SAN FRANCISCO

SAN FRANCISCO, Cal.—For about four months through the winter, local dealers have been closing on Sundays and at 6 p. m. every week day, but with the arrival of good weather the rule cannot be kept in force. Two weeks ago a few stores were open till noon on Sunday and now they are all open seven days a week, and closing time is 8 p. m.

GEORGE SHERMAN, who has been in this city since the opening of the Panama-Pacific Exposition in the interests of the Hendee Mfg. Co., has just left for the North, en route for the factory in Springfield, Mass.

DEALERS on the Coast are glad to hear that the local branch of the Thor has put in a good-sized stock of Thor bicycle hubs. There has been an unusual demand for these hubs owing to the revival of bicycle racing.

FRESNO RIDERS ENJOY TRIP TO WOODLAKE

FRESNO, Cal.—Motorcyclists of the southern San Joaquin valley had a fine run to the hills above Woodlake on March 26. About 50 machines were present from the Fresno and Reedley districts. The party reached Visalia about 10 a. m. where an equal number joined them from Visalia and other points in Tulare county.

The run was made without accident and a picnic, tug-of-war and hill-climb formed part of the event. Another run to the hills east of Fresno is planned for the near future.

CLUBS ACTIVE IN MARYSVILLE

MARYSVILLE, Cal.—The Marysville M. C. held its first meeting on March 24 to discuss plans for the summer. A lively season is predicted.

A new bicycle club, of which William Bluett is president for the time being, has been started at Rock & Young's store. Quite a bunch of members were at the initial meeting and it looks as if the club was going to be a big success from the start.

WOODSIDE RUN A SUCCESS

SAN FRANCISCO, Cal. — The San Francisco M. C. had a very successful run to Woodside on a recent Sunday. A large crowd started from club headquarters, and all kept together until Woodside was reached. The first stop was made at Redwood City for lunch, after which the participants continued to the destination.

At Woodside the crowd went to the Bay Shore and enjoyed swimming until late in the afternoon, when the homeward trip was made.

TO HOLD NOVEL RUN

KLAMATH FALLS, Ore.—The Klamath Falls M. C. has made plans for its first run of the season, and is discussing an inter-county endurance event for some time in July. This affair will include a test of stops for gasoline, for oil consumption and reliability, instead of being on a time basis. The route will be through Dorris, Hornbrook, Yreka, Ashland, Medford and Crater Lake. Return to Klamath will be made by a different route.

F. A. M. CLOCK BEGINS TO REGISTER INCREASE IN MEMBERSHIP; KEEP A CLOSE EYE ON IT!

SINCE the new F. A. M. membership campaign was opened two weeks ago there has been a noticeable pick-up in the applications filed with Secretary Gibson, at Westboro, Mass., and it will be noted that the hand of the clock above now points to the 400 mark.

What are you doing to keep the F. A. M. clock's hand moving? If you have not started anything in your town as yet, today's the time to get busy. A stronger F. A. M. means broader service and greater benefits for motorcyclists all over the country. So do your bit. If you are not a member, come in yourself—and bring a friend with you. The cause is a good one and deserves your hearty support.

MOTOR WHEELS ATTRACT

SPOKANE, Wash.—Cyclists of this city gathered in force at the Inland Cycle Shop last week to view the Smith Motor Wheels and try them out. There have been a number of sales made to bikers who like to tour to the various lakes in the vicinity of Spokane over macadamized roads.

DISTRIBUTING FIRESTONES

SPOKANE, Wash.—The Traders Tire & Supply Co. has just opened for business at 1131 First avenue, and taken the distributing rights for Firestone tires.

INDIAN TRAVELER ENTHUSIASTIC OVER PROSPECTS

SAN FRANCISCO—Chas. H. Johnson, traveling representative of the Hendee Manufacturing Company for northern California, has lately been visiting the trade in the Sacramento valley, and has just returned from Eureka, on the coast. He is full of enthusiasm regarding the outlook in both districts. All through the Sacramento valley, he says, people were saving last year to attend the Exposition, and are just catching up with their expenses and getting ready to spend more freely; while the many lumber mills around Eureka are starting up on a larger scale than for several years, and with high railroad fares from the logging camps into town the people take well to the motorcycle. The outlook for bicycles, says Johnson, is also excellent, but not in proportion to that of the motorcycles.

SMITH MOTOR WHEEL

REUBEN STANLEY SMITH, of Milwaukee, Wis. has been granted a patent on a motor-carrying tractor unit, which readers will recognize as the Smith Motor Wheel. This patent, No. 1,176,-934, is a division of the first Smith Motor Wheel patent, issued August 20, 1914, and relates to means of counteracting the gyroscopic force of the traction wheel.

The motor is substantially centrally located as far as its weight is concerned and the center of gravity of the traction wheel and motor are in a plane which includes the tread surface of the wheel. The flywheel is attached to the motor shaft and is driven in a direction opposite to that of the traction wheel or disc wheel, the driving connections between the motor, flywheel and traction wheel being so adapted as to develop gyroscopic force equal to the gyroscopic force of the traction wheel. Flexible connections attach the motor wheel to the bicycle to permit independent turning movements of the traction wheel axle. Shown in Figure 1.

FOX FOOTREST

PATENT No. 1,176,673 has been granted to Joseph C. Fox, of Seattle, Wash., for a cycle footrest, especially adapted to use on tandem attachments. The tread of the footrest is hinged so as to be swung from a horizontal or operative position to a vertical position on the arm to which it is attached. A spring is provided to hold the tread in its vertical or inoperative position. The tread is of spring metal and carries a cleat on each side to prevent lateral movement of the user's foot. The patent has been assigned to the Fox Manufacturing Company, of Seattle, Wash. It is shown in Figure 2.

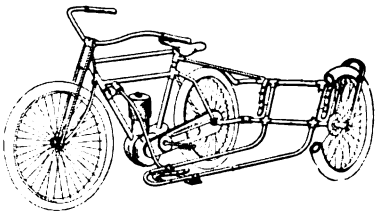
WALL AUTO WHEEL

AN English equivalent of the Smith Motor Wheel is the Wall Auto Wheel, the subject of Patent No. 1,177,-210. This device utilizes in one form a wire-wheel as the traction member and is designed to be attached to the right side of the bicycle which it is to drive. It has a flexible connection to permit the up and down movement of the whole device in relation to the bicycle. While shown with the motor driving traction wheel through a single reduction gear, the power of the motor may be transmitted by endless belt, chain or other suitable connection. The axis of the intermediate member in the transmission coincides with the axis of the auxiliary member, so as to give balance and prevent gyroscopic action on the cycle and attached device.

In alternative arrangement, the motor drives the main and traction wheels through a differential gearing, thus making the cycle wheel a driver as well as the traction wheel. The patent has been granted to Arthur Milnes Pooley and Frederick William Vallat, of London, England. See Figure 3.

CANOELET SIDECAR

PATENT No. 1,174,333 has been granted to Frederick W. Mead and Thomas W. Deakin, of Birmingham, England, for a



sidecar, known on the British market as the Canoelet. This sidecar has a main frame tapering toward the front and inclined upward at the rear; the frame is attached by suitable connections to the motorcycle at three points. The axle carrying the sidewheel is fitted to the upstanding portion of the frame and is fitted with a yoke or bridge which can be readily detached to give access to the wheel. Quarter elliptic springs are fitted to carry the nose of the sidecar body at the front and at each side of the rear. The construction gives a very low fitting of the body with a good road clearance at the same time.

TOLLSTAM STEADY GEAR

STABILIZING wheels to be attached to motorcycles or motor bicycles when the vehicles are moving very slowly or are at rest are the subject of a patent granted to Louis G. Tollstam, of Los Angeles, Cal. These wheels are attached to carrying-yokes on linkages, the said linkages being pivoted to the frame. A pedal is provided on each side, whereby the stabilizing wheel may be brought into contact with the road or lifted therefrom, and a locking device is fitted to hold the mechanism in either operative or raised position. The patent is No. 1,177,290. It is shown in Figure 4.

NEW ROADS BEING OPENED OUT FROM 'FRISCO

SAN FRANCISCO, Cal., March 31.—The roads out from the Bay City last Sunday were thronged with motor traffic, and a number of local riders tell of some very interesting trips which they took. One of the prettiest rides is to Half-Moon Bay, near the Ocean Shore Boulevard, which is now finished and in splendid condition. This route is not very well known at present. There are a few stiff grades and plenty of turns, but motorcyclists who have made the trip consider it one of the best scenic rides out of San Francisco. Several riders have recently tried the new road into San Mateo county by the Bay Shore cut-off. Except for a half mile, this highway is now in good condition and the county authorities promise that the unimproved portion will be paved in about a month.

COURT ACTION OVER LICENSE TAGS

COLUMBUS, O.—Suit has been started in the Ohio Supreme Court by the Davies Manufacturing Co., of Akron, against State Auditor Donahey to obtain payment for license tags furnished the State, at the rate of 19¼ cents a pair. The State Auditor has paid for the tags at the rate of 15 cents a pair to the New York Metal Sign Co., to which the contract was sub-let.

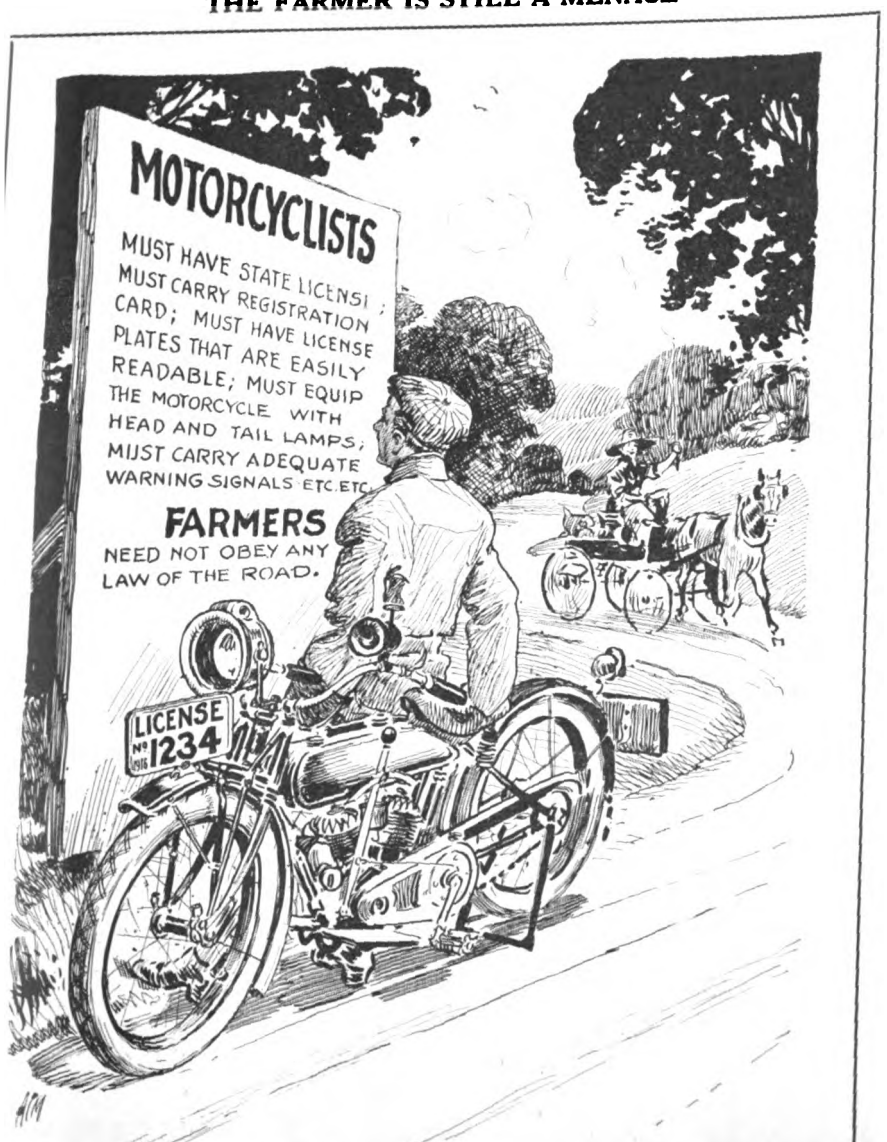
THE FARMER IS STILL A MENACE



THE season is again at hand when the lives of motorcyclists will be endangered by farmers who drive at night without ights. With regulations for motorists being adopted on all sides t would seem to be only fair to demand of wagon users that the ighting rule, if no other, be adhered to strictly. Clubs that take p this matter will have the backing of the F. A. M.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

HOT SPRINGS, Ark.—The Southern Hardware Company has just been incorporated with a capital stock of $10,000. The firm desires catalogs on bicycles, mechanics' tools, lubricating oils and automobile accessories.

HILLYARD, Wash.—The Buckley Hardware Company has moved to 611 Market street, from the former quarters at 523 Market. Catalogs and prices are wanted on automobile accessories, bicycles, oils and small tools.

KNOXVILLE, Tenn.—The W. W. Woodruff Hardware Company, of 424 Gay street, has acquired the Knoxville branch of the Philip Carey Company. The firm stocks bicycles, lubricating oils, varnishes and small tools.

MODALE, Iowa.—The Bobbitt Hardware Company has taken over the stock of Noble Drake & Co. Catalogs are requested on automobile accessories, bicycles, small tools and lubricating oils.

CLITHERALL, Minn.—C. J. Forthun has bought out Whiting Brothers and desires catalogs, etc., on bicycles, oils, small tools and accessories.

FOREST CITY, N. C.—The Harris Hardware Company has become the Farmers Hardware Company. The new firm requests catalogs and figures on bicycles, oils, small tools and automobile accessories.

WAHPETON, N. D.—Catalogs on bicycles, automobile accessories, small tools and lubricating oils are requested by William Schmidt, of this city.

GREELEYVILLE, S. C.—The Boyle Hardware Company has been organized with a capital stock of $2,500. Catalogs on bicycles, small tools, lubricating oils and varnishes requested.

ATOKA, Okla.—Hugh Gill, who recently opened an agency for the Indian in this city, would like to receive catalogs of sundries, in particular those adapted to the Hendee models.

WHITE ROCK, S. D.—Johnson & Company have bought out the stock of the Dahl Implement Company and will carry bicycles and mechanics' tools.

AIKEN, S. C.—The Holley Hardware Company is erecting a new building on Main street, which will house a complete stock of automobile accessories, bicycles, enamels, lubricating oils and small tools. Catalogs and price lists are requested.

ELM GROVE, W. Va.—The Showers-Eberley Hardware Company are desirous of securing a motorcycle agency for Elm Grove and would like catalogs, agency terms, etc.

WHAT DOES NEW YORK LAW EXPECT FROM DEALERS?

Must License Plates Be at Hand Before Buyers Can Take New Motorcycles from the Store?—Must Every Mount Taken Out for Demonstration Also Carry Registration Number?

SEVERAL interesting points in connection with the new State registration law for New York motorcyclists are brought out in the letter printed below, and dealers are invited to consider the situation and express their opinions through these columns. As the new law stands, no special provision is made for the dealer; the law simply provides that every motorcycle operated in New York state shall carry a license. Any suggestions by dealers will be welcomed by the writer of the letter published below, and **Motor Cycle Illustrated** will devote space to them. The communication, which comes from W. J. Callwell, Jr., a well-known dealer of Newburgh, is as follows:

"Editor, **Motor Cycle Illustrated**:

"As you know, the new State registration law for motorcyclists went into effect on April 1, and while most phases of the measure appear to be reasonably clear there is one angle of it that seems to be rather unsatisfactory. As the law stands at present, it certainly works a hardship upon motorcycle dealers and distributors.

"An inquiry addressed to Secretary of State Hugo had brought the reply that 'all motorcycles must be registered' and that no special dealer's license is provided for. This is going to cause us trouble and also bother our customers.

"We are distributors of the Indian and often receive five or more machines at a time. Our customers are waiting to take them from the crates. They will now have to wait until they receive their registration numbers and licenses. Arrangements cannot be made in advance, because we would not know the numbers of the forthcoming motorcycles; and those motors we have in stock we cannot license because we don't know who the eventual owner will be.

"In the case of a stock of ten to twenty-five second-hand machines, we are again seriously hampered. We cannot demonstrate these machines unless we have them licensed individually—and that before we had sold them and knew whose name ought to be used on the registration blank.

"If we undertook to register every mo-

HENDERSON WINS ARGENTINE CHAMP. RACE

Antonio Selmo Is Victor in 100 Kilometre Classic at Annual Sports Celebration—Santiago and Schiavone, Indians, Second and Third.

BUENOS AIRES, Argentina, March 1.—Antonio Selmo, of the Club Motociclista Nacional, won the 1916 Argentine Championship for 100 kilometres (62.1 miles) on February 27, at the Temperley Hippodrome, in 1:13:16⅕. Selmo used a short-coupled Henderson throughout. Carlos Santiago, of the same club, was second on an Indian in 1:14:10, and Jose Schiavone, also of the same club, was third in 1:20:05. He mounted an Indian. There were 12 entries in this race, but only nine started. Six of the nine abandoned the race.

The Argentine Championship was held in connection with a joint celebration of the Gymnastic & Fencing Club of Zamora, the Argentine Pedestrian Club, the Longchamps Aviation School and the Club Motociclista Nacional. It is an annual event and draws the cream of riders from Buenos Aires, La Plata, Rosario and from the Uruguayan cities. The local speedsters had it their own way this year. The Hippodrome was not in the best of condition, the surface being deep in dirt on the turns and in the backstretch in places.

TO MAKE RIDERS MEMBERS OF AUTO CLUB

LOUISVILLE, Ky.—A movement has been started to have motorcyclists and cycle dealers become members of the Louisville Automobile Club. Riders have no organization at present, and efforts are being made to have a special department in the auto club for them.

Both the automobilists and motorcyclists are interested in practically the same matters as good roads and legislative problems, and both the four-wheel men and the cyclists will benefit by the union. The riders will have a special club rate and at the same time such free advantages as notary service, road information and the use of the clubrooms. Peter Kline, of Kline Brothers, agents for the Harley-Davidson; Frank Marshall, F. A. M. Commissioner, and Eugene Stuart, secretary of the club, are all interested in the movement.

MOTORCYCLISTS PLAYED POLITICS

KANSAS CITY, Mo., April 8.—Motorcyclists of this city made their presence felt by turning out practically in a body and voting for this city's new mayor last week. The streets of the city are in bad shape and no repairs have been made during the administration just ended.

BRASS CITY RUN FOR EASTER

WATERBURY, Conn.—The Brass City M. C. has set the date of its first run for Easter Sunday, April 23. The route will be to Hartford and return.

SPECTACULAR HILL-CLIMB DREW A CROWD

GIVING THE TIMID PROSPECT AN EVEN BREAK

He Naturally Shrinks from Displaying His Ignorance of Motors in the Presence of Seasoned Riders and May Be Scared Away By Loungers in the Salesroom

By RODMAN BARRY

"He Doesn't Like to Make a Mollycoddle of Himself in the Presence of Other Chaps, Who Know Every Gosh-Swizzled Part in a Motorcycle By Its Middle Name"

ONE of the brassbound sales axioms that can be applied with about equal significance to any line of business is the following, i. e., and also to wit: No prospective purchaser likes to have it heralded to the community that he is a rank novice in the field he considers entering,—a helpless, bungling, unsophisticated fledgling who needs to be taken by the hand and advised like a Sunday School pupil. It's natural for a sane man to detest that sort of thing, and ninety-nine out of one hundred ordinary mortals will shun such a situation as they would a seance with Old Boy Mephistophles himself. That's a safe bet the year round.

So it follows that the motorcycle dealer who tries to clinch a sale with a new prospect while a crowd of seasoned old roadsters are taking in the whole show from various vantage points in the salesroom is bucking an exceedingly stiff proposition. It goes without saying that the newcomer is going to need advice on about every motorcycle subject there is, and that he is going to ask a lot of questions that would sound rather foolish to the ears of a veteran rider. But he won't mind asking questions, and acting like a good deal of a duffer, if he is alone with the dealer. He knows that the dealer understands his predicament and will make allowances, *—but he doesn't care to make a mollycoddle of himself in the presence of other chaps who know every gosh-swizzled part in a motorcycle by its middle name.*

Must Learn the Motorcycle A, B, C's

Any motorcycle dealer who will put himself in the place of the beginner for a moment will understand the strength of this argument. The newcomer may not know much more about a motorcycle than that it employs two wheels and has a bunch of mechanism in the middle that emits "chug-chugs" with considerable regularity. It is obvious that such a prospect must begin with his motorcycle A, B, C's and work up gradually. If he is not discouraged or frightened off during that process he will doubtless become an enthusiast. But if he has it rubbed in too harshly, and too suddenly, that he doesn't know a blooming thing about motors, while other fellows are just slopping around in mechanical knowledge, he may lose his nerve and quit. *It has worked out that way in a great many cases.*

Almost any motorcycle dealer who will face the situation squarely can recall prospects who have started to discuss a purchase with considerable enthusiasm, only to slump after ten or fifteen minutes' conversation and back out hurriedly with promises to call again. When that happens it is a safe assumption that something has scared the prospect off. What was it? If there were riders hanging around the salesroom, and perhaps breaking into the business conversation now and then with supposedly helpful remarks, the odds are ten to one that they have driven that prospective buyer out of the place.

Privacy Is a Business Necessity

All of which leads up to the purpose of this article,—which is to recommend *reasonable seclusion for the dealer and the prospect while the preliminaries are being talked over.* In even a small establishment there ought to be a railed off section, or better still, a sort of private office and miniature salesroom combined, to which the proprietor can take a nervous prospect and thus guard him against embarrassment. The ideal arrangement, of course, involves a small lounging room for riders who drop in during the evenings, so that they need not stand around the salesroom proper. With that system, the dealer can avoid offending his rider patrons and still safeguard his prospects.

How the problem is to be solved depends largely upon the layout of each agency, but it must be solved sooner or later. It is a positive fact, easily provable, that prospects have walked past the door of an agency night after night and failed to work up nerve enough to go in—simply because the salesroom was crowded with loungers. If business is walking past your door for that reason, Mr. Dealer, isn't it about time for a change? You can't be expected to snub your old patrons; certainly not, but you can handle them in such a way that they do not interfere with new sales. *That's your game.*

BOSCH HISTORY BROUGHT UP TO DATE

An Interesting Account of the Early Days of the Bosch Magneto and of the Progress of the Company Which Is Now in the Front Rank of Motor Ignition Specialists

ONE of the most striking features of the current number of the *Bosch News* is a history of the Bosch magneto, from its perfection in 1886 by Robert Bosch in Stuttgart, Germany, down to the present day. The following article is taken from material embodied in the original.

While the Bosch magneto dates from 1886 as an ignition apparatus, it was not until over ten years later that the motorcycle types made their appearance in this country, and then on German-made machines. American manufacturers were using battery and coil systems on all models and were at first undecided as to equipping their products with the new apparatus, but soon fitted the Bosch machines as standard, until within the last two years there have been no battery and coil models issued by any motorcycle maker. The record of the Bosch magneto has been one of triumph since its introduction in this market, and its success has been due to excellence in design and workmanship, coupled with long life and sturdiness.

Considerable pioneer work in introducing the Bosch magneto to the American trade was done by Alfred H. Bartsch, now advertising manager for the Bosch Magneto Company. Mr. Bartsch was agent for the N. S. U. machines when the Bosch magneto first made its appearance here, and his performances with machines having Bosch equipment, as well as his thorough knowledge of the magneto itself, did wonders in boosting the new means of ignition. He wrote extensively upon it and spread the knowledge of its value.

Initial Experiments

Robert Bosch, an electrical engineer in Stuttgart, Germany, was the inventor of the magneto which bears his name. He started his experiments on the subject of ignition for internal combustion engines in 1883 in the laboratory and two years later opened a small shop, with two helpers and the barest of equipment. In one year of steady work, he had developed the Bosch magneto into a practical, working ignition apparatus.

In 1888, a big German gas engine firm, the Deutz, having experimented with an electrical machine to take the place of the battery and the hot tube, adopted the Bosch magneto as standard equipment, and the start was made. Thereafter, Mr. Bosch devoted his entire time to developing ignition apparatus, and invention after invention followed. In 1890, Gottlieb Daimler, the maker of the first motorcycle and first automobile, persuaded Mr. Bosch to apply himself to developing a magneto suitable for vehicle ignition, and as a result, two types were developed which today are giving fine service for the work they were designed.

In 1897 patents were obtained on the Bosch oscillating shuttle magneto, this being followed in 1899 and 1901 by the production of a rotating sleeve machine. In both these types, the armature was stationary. Finally, the rotating armature magneto was developed, and this with the rotating sleeve machine was the first to be used on motor vehicles in this country. The sleeve type is known as the HDh, while the rotating armature magneto is known as the D type. Motorcycle magnetos were all developed from the original D magneto.

1906

The first offices of the Bosch Magneto Company — two rooms in an office building at 66th St. and Broadway, New York. The black border shows the office location.

1907 — The entire extent of the Bosch holdings nine years ago. This is the entire force of workmen: eight, with hardly as many in the office. The move to the present quarters was made afterward.

This in 1910—was the extent of the Bosch Magneto Company's works and offices—today it houses only part of the sales, and executive offices.

Rapid Factory Growth

In the meantime, the Bosch factory grew, from 50 men in 1888 to 200 in 1905. In 1906, just before the introduction of the magnetos into this country, the Stuttgart factory was employing 800 men. Early in the summer of 1906, the demand for Bosch goods in America, for motor car ignition, was such that the home office arranged to open a branch. Offices were secured at 1943 Broadway, New York, and an American company formed to take over the selling rights and the patent and manufacturing rights for the United States, Canada and the West Indies. The new company was known as the Bosch Magneto Company, New York, and Mr. Otto Heins was elected president.

Orders Come In

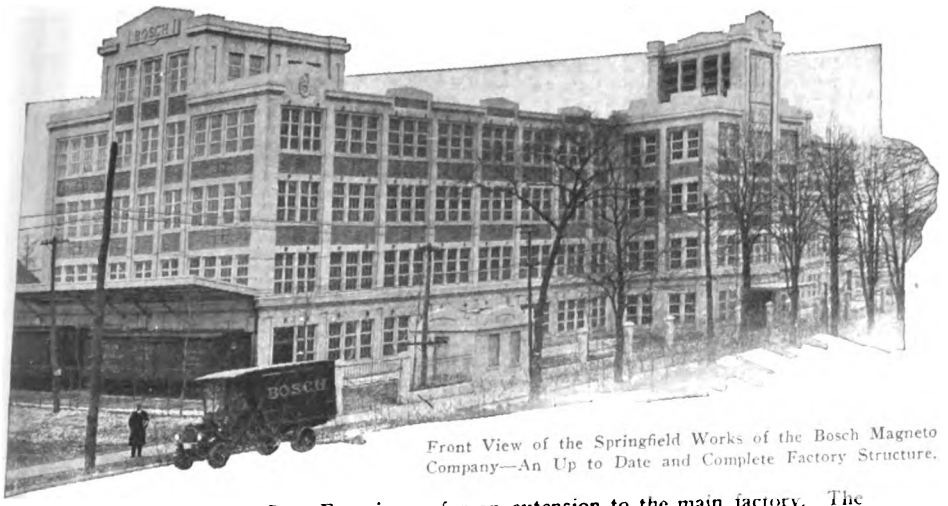
Shortly after opening the branch, six prominent American automobile firms adopted the Bosch apparatus as standard, and orders began to come in overwhelming quantity. Before the first year was out, the company was forced to move into larger quarters, and a place at 160 West 56th street was secured. This gave the firm a chance to do some manufacturing. Calls for goods were such that it was frequently necessary to finish the magnetos from Stuttgart in the New York plant in order to get them through to satisfy the demand. It was while in the 56th street place that the motorcycle Bosch magnetos first became known in this country.

At the close of 1907, quarters were found to be too cramped, and in the fall of 1908, the Bosch Magneto Company secured the four-story building at 223-225 West 46th street, its present headquarters. The manufacture of Bosch parts and complete magnetos was then gone into on a larger scale, and with day and night shifts of about 350 workmen each, it was possible to turn out an average of 8,000 to 10,000 magnetos a month.

Branches Established

Before the new building was occupied, it was found necessary to establish a Chicago branch at 1253 Michigan avenue, and about

Digitized by Google



Front View of the Springfield Works of the Bosch Magneto Company—An Up to Date and Complete Factory Structure.

a year later, in 1909, a San Francisco branch, at 357 Van Ness avenue, was opened. Middle Western trade grew so rapidly that a branch was established in Detroit in 1910.

It was about this time that motorcycles began to be more widely known and appreciated and magneto ignition was looked upon as the solution of the one big problem connected with them, namely, ignition. With this new call upon the Bosch Magneto Company, for Bosch magnetos were the only ones available, the demands upon the new facilities were increased almost two-fold, for motorcycles were being manufactured then at the rate of 50,000 to 75,000 per year.

The Springfield Factory

A new and much larger factory seemed the only solution of the problem, and from several excellent sites in mind, one at Springfield, Mass., was chosen for the scene of the next step in the growth of the Bosch Magneto. Accordingly, in 1911, ground was broken for what is now known as one of the most sanitary and orderly factories in the motor industry today.

In January, 1912, the new Springfield works were completed and occupied, and can be said to express concretely the spirit of the company—the insistent effort to produce the best and maintain such business conditions that only the best can be produced. All the equipment at New York was moved to Springfield, together with most of the employes, and the New York building was given over entirely to offices where much needed room was placed at the disposal of the selling end of the business.

More Room Needed

In 1914, the demand for Bosch Magneto was still growing, for in the season previous, 226,000 magnetos were made and sold, and in view of the continued demand the large factory at Springfield was not sufficient for the requirements, and it was found necessary to consider further enlarging the manufacturing facilities. The Rushmore Dynamo Works, at Plainfield, N. J., was purchased in 1914 by the Bosch Magneto Company in order to get a plant suitable for the manufacture of its lighting and lighting apparatus. Even with added plant space was needed to meet the demand, and in the early fall of 1915, ground was again broken at Springfield for an extension to the main factory. The new building is of one-story construction with saw-tooth roof. When completed, it will add more than 60,000 square feet to the Springfield works.

Offices Are Enlarged

It was found necessary to enlarge the main offices to suit the increased business of the company, and early in 1915, a large office at 1764 Broadway was taken over and made to house the enlarged advertising department and part of the installations department. In the various divisions of the company there are now at work more than 2,000 employes, with the possibility of adding another thousand before the end of 1916.

Another view of considerable interest at the growth of the Bosch Magneto can be had by observing the scale of magneto shipments. For example, at the close of 1903 about 22,000 magnetos had been shipped; early in 1906 the 100,000th magneto was made and sold; in the spring of 1910 the 500,000th magneto had passed test; while 1912 saw production reaching seven figures, and the 1,000,000th magneto was made, to be closely followed by the 2,000,000th magneto in the early part of 1915.

A NEW SCHICKEL SELLING PLAN FOR DEALERS

AFTER thorough consideration of motorcycle trade conditions the country over, the Schickel Motor Company, manufacturer of the original two-stroke motorcycle in this country, has inaugurated a dealers' selling plan which involves several co-operative angles not heretofore applied to transactions between manufacturer and retailer. While the Stamford company is reticent about giving general publicity to the details of its proposition, except in a direct communication to the dealer himself, it is stated that the new plan of marketing the Schickel begins with the dealer and considers all of his interests on an exceedingly generous basis, the manufacturer allowing himself to be guided almost entirely by the requirements of the agency.

Following out this plan, the Schickel company states that its general selling arrangements will enable the dealer to operate on an exceptionally liberal basis, thus encouraging the agents to more consistent efforts and assisting in the movement for a more successful class of tradesmen. Full information concerning the revised selling system can be obtained by addressing the Schickel company at Stamford, Conn.

Another bulletin from the Schickel factory states that the lightweight model is making friends at an unexpectedly rapid rate. As the company's first lightweight test model was turned out two years ago it has been possible to profit by much actual roadwork and the results, both in mechanical ability and in the appeal made to riders, are highly satisfactory to the manufacturers. The Schickel is of the three-port, two stroke type and has V-belt transmission and all-handlebar control.

BERKS M. C. HOLDS ANNUAL ELECTION OF OFFICERS

READING, Pa., Apr. 12.—The Berks Motorcycle Club elected officers at its meeting last week, placing William Shearer in the president's chair. C. Raymond Lenich is the new vice-president, while William Printz is now secretary-treasurer.

The club quarters at 710 North Ninth street are cozily equipped with mission furniture. There are also a number of card and billiard tables, and the members have recently purchased a victrola. Preparations are now under way for spring runs and social affairs, which promise an interesting season for the 45 riders who sport the Berks colors. The ladies are taking an active part in the club's functions and have helped materially to make runs and parties enjoyable.

DUNN WILL MAKE A RECORD BUSINESS TRIP

TORONTO, Ont.—The longest business trip ever taken by a Canadian bicycle traveler will be the tour to be made by F. W. Dunn, of the Canada Cycle & Motor Company, Limited, West Toronto. Starting about May 15 he will call at western Canadian points, after which he will sail from Vancouver for New Zealand. From that country he will go to Australia, and thence to China and Japan. He will be away for seven months at least, during which time he will do nothing but make selling arrangements for bicycles and accessories. It is understood that the Toronto company will place agencies in the Antipodes and in the Orient for a number of American-made accessories, as well as for Canadian products.

RIDGEFIELD CLUB FORMED

RIDGEFIELD PARK, N. J.—Franklin Wyatt, William Orth and several local riders have started a motorcycle club in this city, to be known as the Ridgefield Park M. C. Wyatt is temporary chairman of the new organization.

The club will hold a dance at Overpeek Park, near this city, on April 29, and extends a hearty invitation to all riders and their friends for the occasion.

Looking Down the Stretch

April 12, Springfield, Mass.—Spring meeting of the Motorcycle Manufacturers' Association.

April 14, Augusta, Ga.—Race meet of Augusta Racing Association for 30½ cubic inch machines.

April 16, Fresno, Cal.—100 mile free-for-all race under direction of Fresno M. C.

April 19, Boston, Mass.—Run to Worcester of Bay State M. C.

April 26, Savannah, Ga.—Race meet of Savannah M. C.

April 30, Brooklyn, N. Y.—Annual spring run of Invincible M. C. to Southampton and return, 200 miles.

May 7, Jamaica, N. Y.—Endurance run of Jamaica M. C., to Patchogue and return.

May 7, Providence, R. I.—Annual run to Westerly of M. C. of Rhode Island.

May 14, Detroit, Mich.—Race meet of Detroit Motorcycle Dealers' Association.

May 14, Bronx, N. Y.—Second annual endurance run of the Crotona M. C. to Monticello, N. Y. and return, 250 miles.

May 21, Providence, R. I.—Annual photograph run to Roger Williams Park, M. C. of Rhode Island.

May 21, Harrisburg, Pa.—Endurance run of Keystone M. C. to Altoona, Shamokin, Pottsville, Reading and return.

May 27-28, Providence, R. I.—Week-end run of Providence M. C. to North Adams, Mass., and return.

May 27-28, Poughkeepsie, N. Y.—Endurance run of the Poughkeepsie M. C. through Poughkeepsie and Dutchess Counties; 20 hours.

May 28, Milwaukee, Wis.—Lightweight race of Milwaukee M. C. on Cedarburg track.

May 28-30, Boston, Mass.—Three-day endurance run of Bay State, M. C.

May 30, Washington, D. C.—National Capital M. C. endurance run, 128 miles in 24 hours.

May 30, Roanoke, Va.—Race meet of Dixie M. C.

May 30, Wheeling, W. Va.—Race meet of Wheeling M. C.

May 30, Philadelphia, Pa.—300-mile race on Hatboro Speedway.

May 30, Seattle, Wash.—Run of Seattle M. C. to Portland, Ore.

May 29-30, Newark, N. J.—400 mile run, day and night of New Jersey M. C.

June 10-11, Worcester, Mass.—Fifth annual 24-hour endurance run of Worcester M. C.

June 18, 19, Wheeling, W. Va.—336 mile endurance run to Bedford, Pa., and return, of Wheeling M. C.

June 25, Detroit, Mich.—Second race meet of Detroit Motorcycle Dealers' Association.

June 30, Wheeling, W. Va.—Sealed time run of Wheeling M. C.

July 2-3-4, Grand Rapids, Mich.—Michigan State F. A. M. reliability trial, under auspices of Grand Rapids M. C.

July 4 Roanoke, Va.—Race meet of Roanoke M. C.

July 4, New Brunswick, N. J.—Elimination run of the New Brunswick M. C.

July 4, Savannah, Ga.—Race meet of Savannah M. C.

July 4, Galesburg, Ill.—State F. A. M. championship races under auspices of Detroit Fair Association.

July 4, Sheepshead Bay, N. Y.—State F. A. M. amateur championships and convention, auspices of Speedway M. C., Inc.

July 4, Wheeling, W. Va.—Race meet of Wheeling M. C.

July 16, Wheeling, W. Va.—Tri-State endurance run and open house, distance 100 miles, Wheeling M. C.

July 30-August 12, Wheeling, W. Va.—Run to Atlantic City and return, 600 miles, of Wheeling M. C.

August 10, Colorado Springs, Colo.—Races on Pikes Peak highway.

August 11-12, Roanoke, Va.—500-mile endurance run of Dixie M. C., to Richmond and return.

August 13, Detroit, Mich.—Third meet of the Detroit Motorcycle Dealers' Association at Detroit Oval.

September 3, Harrisburg, Pa.—Endurance run of the Keystone M. C.

September 4, Roanoke, Va.—Race meet of the Dixie M. C.

September 4, Milwaukee, Wis.—Fourth annual Goodfellowship tour, Milwaukee M. C.

September 6, Wheeling, W. Va.—30 mile road race of Wheeling M. C.

September 17, Detroit, Mich.—Fourth meet of the Detroit Motorcycle Dealers' Association.

October 1, Providence, R. I.—Annual Triangle run, Providence-Boston-Providence of M. C. of Rhode Island.

October 8, Detroit, Mich.—Meet of the Detroit Motorcycle Dealers' Association at Detroit Oval.

November 13-18, Chicago, Ill.—National cycle and accessories show.

November 30, Wheeling, W. Va.—Hill climb of the Wheeling M. C.

GOODRICH TOURING DATA FOR MOTORCYCLISTS

MOTOR CYCLE ILLUSTRATED is now in a position to furnish touring information to riders, through the courtesy of the B. F. Goodrich Company, of Akron, Ohio, and inquiries addressed to this journal will be answered promptly by the Touring Bureau of the well-known tire firm.

Many motorcyclists are now mapping spring and summer trips and laying out vacation tours, and the excellent touring organization of the Goodrich company is placed fully at the disposal of such motorists. Forward your inquiry to **Motor Cycle Illustrated** as soon as possible and it will have the prompt attention of the staff of touring experts at the Goodrich headquarters.

U. S. BUREAU HAS MACHINE FOR FABRIC TESTING

WASHINGTON, D. C.—The United States Bureau of Standards has installed in its rubber-testing laboratory a newly-designed autographic machine for testing the friction or adhesion between the different plies of canvas used in tires, rubber hose and other mechanical goods. The machine was designed and built by the Bureau of Standards.

MORE ROAD CONTRACTS TO BE LET IN OHIO

COLUMBUS, Ohio.—Contract for missing links of roadway connecting Canton with Akron and Wooster will be let on April 7 by the Ohio Highway Department. The first contracts will be for 2.29 miles in Summit on the Canton-Akron and 5.83 miles in Wayne on the Canton-Wooster route.

SLAYMAKER LOCKS KEEP MACHINES SAFE

Latest Products of Veteran Lock Corporation in Lancaster, Pa., Secure Motorcycles and Bicycles Against Unauthorized Use

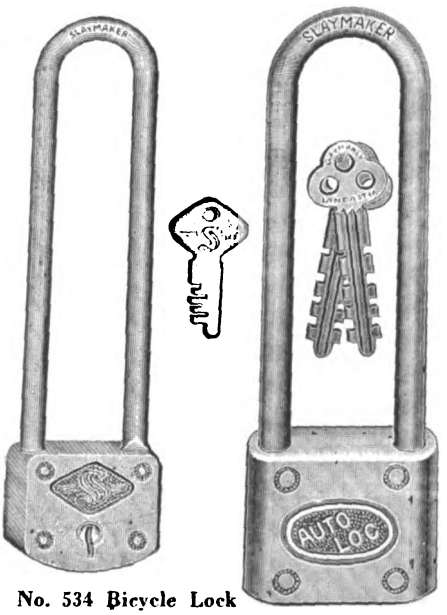
SLAYMAKER on a lock has always been a synonym for security and for thoroughness in workmanship, and the latest series of cycle locks made by the Slaymaker Lock Mfg. Corporation, of Lancaster, Pa., is no departure from the fine reputation which the firm's goods have always held. The leaders in this series are the Autoloc and the "Hold Fast" for motorcycle purposes, and the No. 534 lock for bicycles.

"Hold Fast" Motorcycle Lock

The Autoloc, No. 1093, is intended to lock the spokes and fork members and thus prevent the rotation of the wheel. The case is of polished brass with background in red. The width is 2⅛ inches outside. The shackle is a steel rod, with an inside length of 4¼ inches; it is made adjustable to suit different widths over the forks. With this lock come two corrugated steel keys.

The "Hold Fast" motorcycle lock, No. 27,210, is intended for use with a chain. This lock has a heavy bronze metal case with a high polish. The shackle is of heavy malleable iron and is Sherardized to prevent rust. The lock has secure brass tumblers and dog and dog detainer. Two flat steel keys are furnished with each. No two locks have the same key combinations, thus preventing unauthorized opening. With each lock is an 18-inch length of strong wire chain, galvanized in finish. The shackle is spring-locking. The No. 27,210 lock measures 1½ inches across the case, making it a handy size for the tool-box or pocket. It is a high-grade article throughout.

The No. 534 bicycle lock is made with a pressed steel case and steel shackle, for spoke locking. The size across the case is two inches and the distance inside from case to shackle is 4½ inches. The mechanism is of the lever and tumbler type, the shackle being spring locking. Two coined plate steel keys are furnished with each lock. The dimensions of No. 534 are such as to enable it to fit in all tool-bags and on all makes of bicycles. The face of the case bears the characteristic Slaymaker dart through an S.



No. 534 Bicycle Lock
At Right, Autoloc for Motorcycle Service

The Slaymaker locks, of which there is an extensive variety to suit all tastes, are adaptable for spoke, sprocket and cranklocking. If not obtainable from jobbers or dealers, application should be made to the factory at Lancaster, Pa.

CLEVELAND CAPACITY IS BEING DOUBLED

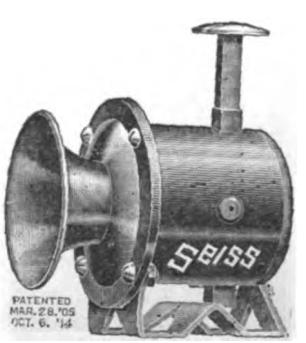
CLEVELAND, Ohio.—A considerable amount of new machinery has been installed in the plant of the Cleveland Motorcycle Co., and it will now be possible to double the output originally decided upon. In spite of this increased capacity there are indications that it will be difficult to satisfy all the demands of dealers.

C. Will Risden, Pacific Coast distributor, has already sold three carloads of the Cleveland lightweights, and the fourth car is due to reach him soon. Other representatives throughout the Middle West are unanimous in their reports of the Cleveland's popularity and assert that it ought to be a simple matter to sell machines as fast as the factory can make them—if not considerably faster.

SEISS ANNOUNCES NEW MECHANICAL HORN

FROM the Seiss Manufacturing Company, of 432 Dorr street, Toledo, O., comes the announcement of a new mechanical horn, which is stated to be entirely different in construction from any other type of push-down mechanical alarm. This horn has no small springs, ratchet or pawls to engage; it is positive in action with direct drive from shaft with either roller or balls for locking.

The horn is of the vibrating diaphragm type, with a toothed-wheel passing over a hardened special steel contact point. This point is adjustable in the diaphragm. All wearing parts are heat-treated. The finish is all black, with high-grade baked on enamel. The bracket supplied is universal, being adapted for attaching to either the frame or handlebar cross tube. The bicycle horn, to be known as Seiss B type, lists at $1.50 complete, while the motorcycle horn, Seiss M. P. type, is priced at $3.00.



Seiss M. P. Type Horn

STOLL PRICES INCREASED

From the Stoll Mfg. Co., of Denver, producers of the Stoll tandem line and other cycle specialties, comes the announcement that greatly increased cost of materials has necessitated an advance in the prices of Stoll tandems. The firm's Stoll Dream Tandem No. 1 will hereafter sell at $22, while the Stoll Combination Tandem No. 2 will be listed at $11.

450 SCHEBLERS FOR JAPAN

INDIANAPOLIS, Ind.—Over 450 Schebler carbureters have been sent to Japan by Wheeler & Schebler, of this city. It took 20 mail bags to hold the lot. The postage was $270.

Of a Personal Flavor

V. W. Peterson has been promoted to the position of advertising manager for the Stewart-Warner Speedometer Corporation, of Chicago, Ill. He succeeds Gridley Adams who recently resigned. Peterson was formerly assistant to Mr. Adams.

W. H. Piggott is now manager of the Boston branch of the Federal Rubber Manufacturing Company, of Milwaukee, Wis. He succeeds Charles Langmaid, who recently resigned.

E. W. Wolf, of Denver, Colo., has been appointed Colorado F. A. M. Commissioner by President A. B. Coffman. In notifying Wolf of his appointment Mr. Coffman said: "You go into office highly recommended, and I have every reason to believe that you will fill it with credit."

Harvey S. Firestone, president of the Firestone Tire & Rubber Co., of Akron, O., has gone for a trip to Florida. He will be gone for a few weeks.

Sherman L. Lewis is now in charge of sales promotion for the Firestone Tire & Rubber Co., of Akron, O. He was formerly with the Niagara Lithograph Co., and also in charge of trade air work for the Remington-U. M. C. Co., of Bridgeport, Conn.

W. H. Palmer is now with the sales department of the U. S. Rubber Co., and will develop the firm's canvas rubber soled shoe business. He was for several years in charge of the advertising department.

Eben Griffiths has been appointed assistant advertising manager for the Vacuum Oil Company, of Rochester, N. Y. He was formerly assistant editor on a New York publication.

L. M. Wainwright, president of the Diamond Chain & Mfg. Co., Indianapolis, Ind., has returned to his desk. He has been spending three months in Florida.

Max Hillman has been made a general traveling salesman for the Prest-O-Lite Co., of Indianapolis. He was formerly district manager in Detroit for the Willard Storage Battery Co.

H. E. Field, of the Kelly-Field Company, distributor for the Lee Tire and Rubber Company throughout the United States, was a visitor in Seattle recently. While there he made his headquarters with the Chanslor & Lyon Company.

J. F. Douse has been made manager of the Fisk branch in Seattle, Wash. He was formerly in San Francisco.

Messrs. Reichert and Pruett, Thor travelers, are back in Chicago after an extensive tour through their territories. Their order books show what success they have had. Vice-President J. D. Hurley, of the Aurora Automatic Machinery Co., has completed a trip through New York State, and reports prospects for metropolitan, suburban and foreign business with the Thor.

A. L. Manley, formerly in charge of the Buffalo, N. Y., branch of the Firestone Tire & Rubber Company, has been transferred to Newark, N. J., as manager of the local sales force. J. S. Ridley, who handled this territory since the Firestone company opened, has a large tire and accessory store in Plainfield, N. J.

R. G. Ingram, manager of the Elkhart Mfg. Co., maker of Elkhart magnetos, resigned his position on April 1 to take up his old line of millwrighting supplies and power transmissions. He will shortly connect with a large concern in Detroit.

Andrew Kangas, well known in export circles as foreign trade expert and linguist, has left the commission house of Thomsen & Co., New York, to accept the position of assistant export manager for the Fisk Rubber Co, of Chicopee Falls, Mass.

A HIGHLY ARTISTIC COVER

As an introduction to the announcement of its Series 17 line, the Excelsior Motor Manufacturing & Supply Company, of Chicago, Ill., has provided its catalogs with

an attractive cover depicting, in three colors, the delights of riding for both sexes. The man, as will be seen by the reproduction, is mounted on a 17-3 twin, while the girl is using a lightweight.

HERCULES JR. PLUGS ARE SELF-CLEANING

COMPACT construction in combination with self-cleaning qualities and long life under the trying conditions of motorcycle service is a feature of the Hercules Junior spark plug, produced by the Eclipse Manufacturing Company, of Indianapolis, Ind. This plug may be had in metric and 7/8-inch sizes and with either a porcelain or mica core. It carries a two years' guarantee.

The porcelain core on the Hercules Junior plug is made of kaolin, ground and mixed by hand, then hand-turned with extreme care to exact dimensions. Following turning it is baked to 2,600 degrees. The core is formed with a deep shoulder, this shoulder fitting within the plug body and hexagon head and resting on double packing. The center stem is large in diameter and abuts with a large shoulder inside the core, resting on asbestos and steel washers. It is held in place by a cap nut on top of the core, this nut screwing down on a spring washer to care for expansion and contraction of the metal parts without injuring the core.

The center electrode is of high-resistance alloy to prevent fusing or burning off. It is staked in the center stem. The side electrode is staked in the lower shell of the plug and is of the same alloy as the center electrode. Inside the shell is an ample recess with liberal spacing around the petticoat. This prevents fouling, as the plug blows itself clean at each explosion and assists ignition of the charge.

Each Hercules Junior plug is given an individual test against cold air pressure for compression leakage and lastly given a final inspection before being packed. The guarantee is for two years. The price is 75 cents each, either porcelain or mica core.

WHITE TIRE CO. FORMED

LOUISVILLE, Ky.—The White Tire Company has been incorporated in this city to manufacture motorcycle, bicycle and automobile tires. The capital is $10,000. Incorporators are: Charles Dobbs, Emil von Allman and B. H. Plaskett.

BUSY ON TRANS-STATE ROUTE

PORTLAND, Ore.—Work has been commenced on the Oregon Trans-State route which traverses the John Day River valley. This highway connects on the east near Ontario with the Lincoln Highway and on the west with the Columbia River Highway near the Dalles, covering a distance of 350 miles.

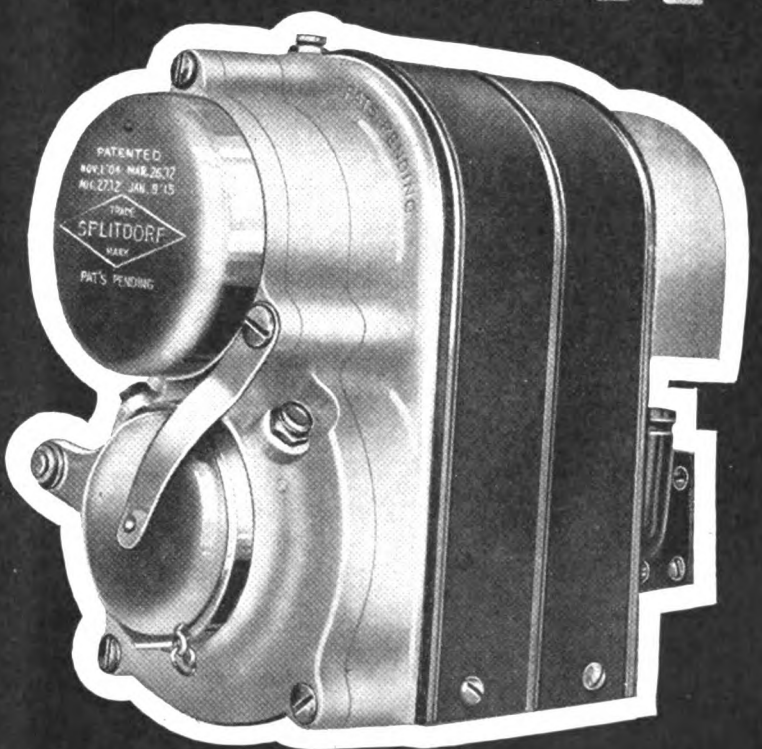
Four Pages of Facts About Indian ELECTRIC



LIGHTING

Mention MOTOR CYCLE ILLUSTRATED—It helps you, the advertiser and us.

Digitized by Google

—OF COURSE YOU WANT ELECTRIC EQUIPMENT

For cleanliness, for convenience, for appearances' sake—for the sheer doubled pleasure of motorcycling, electric lighting and signal operation is the thing.

One touch of a button—a flood of steady light.

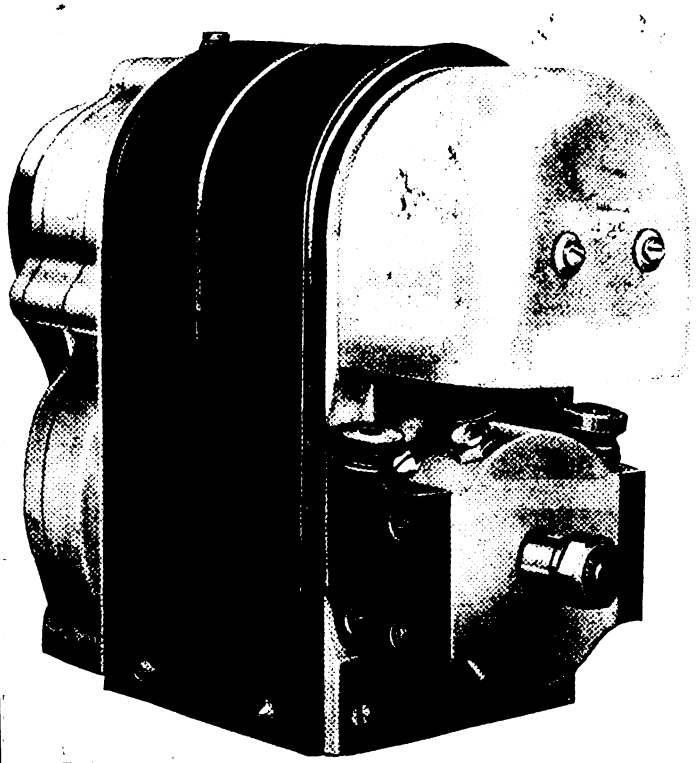
No bulky appurtenances to carry.

A compact little instrument generating current all the while the machine is running.

It's extraordinary when you think of it, isn't it?

Of course you want electric equipment.

It makes a finer thing out of your machine.



Mag-Dynamo—Generates Current for Ignition, Lighting and Charging Battery

It makes a greater motorcycle enthusiast out of yourself.

You wouldn't want to go back to the motorcycle without a clutch, would you?

No more do you want a machine that has inefficient lighting.

Every motorcycle of recent years DESERVES AND NEEDS electric equipment — equipment of the Indian type.

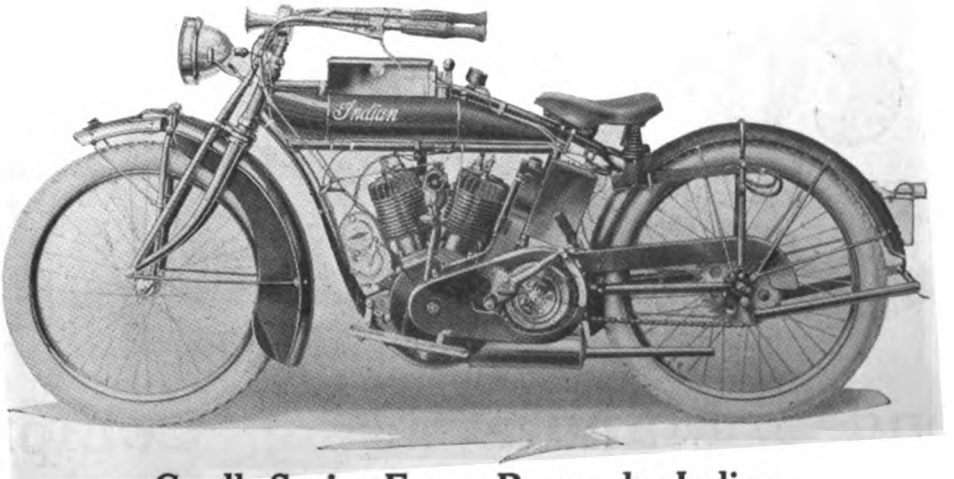
Digitized by Google

—WHY INDIAN IS THE BEST ELECTRIC SYSTEM FOR THE BEST MOTORCYCLE

The present Indian system is now in its second year. It is a tried and proven thing. It has thousands of satisfied users. It is *known* by everybody.

It is a Splitdorf instrument—a guarantee in itself which is further strengthened by the fact that Indian has adopted it exclusively. And adopted it for the following points of actual superiority:

Simplicity of construction **Steadiness of light**
Easy starting of motor **Accessibility**



Cradle Spring Frame Powerplus Indian
With Complete Electric Equipment

Digitized by Google

Battery begins to charge when motor does 10 miles an hour.

Automatic broken contact prevents leakage of current from batteries.

Lighting current automatically regulated so that surplus current is turned into magneto circuit making hotter spark.

No variation of light at high or low speed.

Quick getaway facilitated by ability to generate hot spark at once.

Excess supply of current for sidecar and speedometer, lights and horn.

Ammeter tells at a glance exact charge and discharge of batteries.

ARE YOU HELPING THE MAIL ORDER HOUSE?

Some Dealers' Trade Is Being "Shot to Pieces" by Their Slip-shod Methods—Local Merchants Are Often Boosting the Mail Order Men As Effectively As Their Advertising Campaigns

By FRANK HARDY

"The business men of this country have got to take an interest in the people of their community and learn to serve their particular needs and interests, and when they do that they are going to get more business. In the average town of the United States 40 per cent. of the people in that community are sending away for their goods to mail order houses because they are not being served in the way that they ought to be served at the retail stores in that community."

THOSE words sent a chill up the spines of the salesmen and retail merchants who had gathered recently in Detroit to hear Mr. J. S. Knox, one of the foremost sales authorities in the country.

"In the average town of the United States 40 per cent. of the people in that community are sending away for their goods to mail order houses." In other words, each year a great portion of the business in nearly every town is being turned away from the local merchants, and thousands of dollars that ought to go into their cash registers are swelling the bank accounts of mail order houses.

The men who had gathered at Detroit were astonished, to put it mildly. But they had a still bigger surprise coming. Mr. Knox continued:

"About 97 per cent of the retail merchants in America are not making any net profit. And yet this is the greatest and the richest country in the world. What's the matter with us?

"What we need today is initiative; need it badly. We need young men who will go ahead and take the initiative; and we need older men who will go ahead and take the initiative; and we need business men who will go ahead and take the initiative. Initiative means doing things without waiting until you are told"

That hit the nail right on the head. And the men who listened to the expert realized that inaction—lack of initiative—was the great shackle which was tying them down to small profits, only sufficient to take care of their immediate wants. They were figuratively living from hand to mouth, and blaming their predicament on general business conditions, rather than turning the searchlight upon themselves. And in the meantime the mail order houses were growing rich.

A BIG slice of the bicycle business is each season being appropriated by the mail order houses. Turn over the pages of almost any popular magazine or Sunday newspaper supplement, and you'll find that the local dealers' biggest competitors are on the job every day of the year. You see their glaring and alluring advertisements, featuring what they claimed to be the matchless qualities of their bicycles. Most of them will express machines anywhere on trial and arrange easy payments.

And what are the bicycle dealers doing to combat the mail order houses? What are they doing to keep trade in their own communities—where it belongs? Mighty few dealers are doing anything.

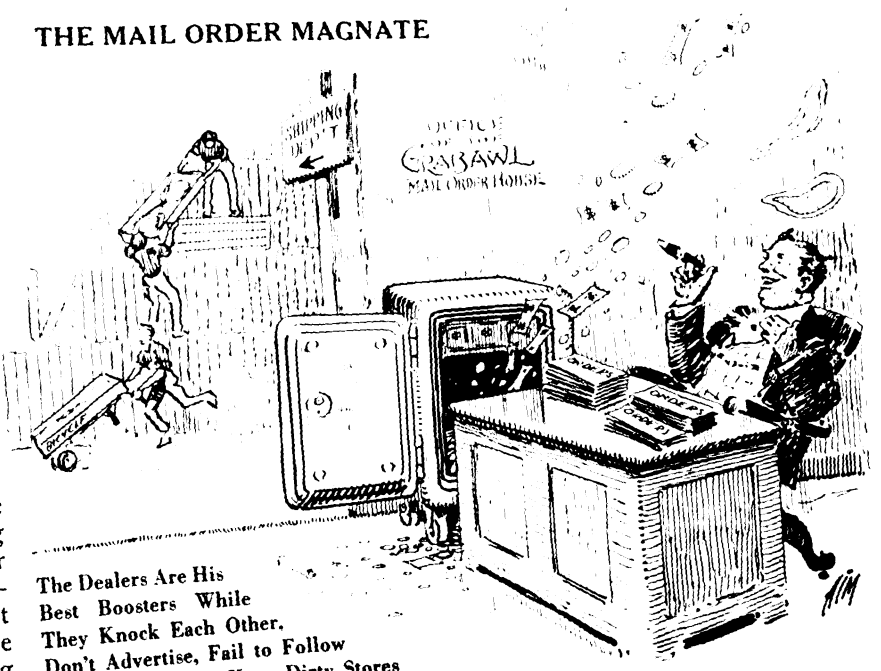
Helping Out the Mail Order House

In fact, it is not making too strong a statement to say that many bicycle dealers are actually helping the mail order man. They are boosting his business absolutely free of charge, almost as effectively as the flashy, gaudy advertisements for which the mail order houses are paying thousands of dollars each year.

One can well imagine the mail order magnate chortling and soliloquizing:

"Why, the bicycle dealer is the best friend that I've got. Though he may be blind to the fact, he's actually pushing business my way!"

THE MAIL ORDER MAGNATE



The Dealers Are His Best Boosters While They Knock Each Other, Don't Advertise, Fail to Follow Up Prospects, and Keep Dirty Stores

Digitized by Google

"IN THE GOOD OLD SUMMER TIME"

Two Dayton Bicycle Enthusiasts Snapped in One of Detroit's Picturesque Parks

WHEREVER there's a dirty-looking bicycle store—a real junk shop in appearance—you'll find an effective boost for the mail order man.

Aside from the fact that the bicycle prospect places no confidence in the wares of an ill-kept store, the chances are ten to one that the average prospect does not recognize the place as a bicycle establishment. Rather he might be inclined to believe that back of the greasy store windows are heaps of rags and bottles.

In contrast to such dealers' stores is the attention-compelling advertisement of the mail order house. The prospect goes through a magazine and sees beautifully illustrated what appears to be an ideal bicycle. Then he reads the superlative announcement surrounding the two-wheeler, stating that the mail order man's bicycle is the best and most moderate priced on the market. No, the prospect need not pay a penny. "Just drop us a card and this superb bicycle will be expressed to you free of charge. Payment for this matchless machine may be arranged in easy installments. You enjoy riding the wheel while you pay it off in small monthly sums."

Passed the Dealer's Store

The prospect doesn't know that he can obtain a first-class bicycle just around the corner in Tom Jones' Cyclery, at a moderate price which will be arranged in convenient terms. He doesn't know that Jones has quite a variety of models on the floor, which he can actually see and examine before he buys. He doesn't know that Jones will fit him with a wheel suited to his particular requirements and make necessary adjustments at any time.

And why doesn't the average prospect know? Because he's never entered Jones' store—it's a dirty place, the window "display" looks as though it had been hit by a cyclone—it repels the prospect.

Dealer Jones, and fellows like him, are feeding business to the mail order houses.

EVEN in cities where bright, clean stores are to be found, mail order houses are permitted to get a strong foothold on the local bicycle business. The mail order man makes a big noise about his products; the dealer doesn't even let a peep out of himself. The mail order man advertises everywhere; the majority of the dealers don't even advertise in one of their home papers.

To keep business in your community, use the mail order man's most effective business weapon—advertising—against him.

There are prospects galore in every town who know nothing of the superior proposition which the local dealer has to offer. And not a small number of them are in total ignorance of the fact that there are bicycle stores in their community, ready to serve them properly.

They could find out, perhaps, if they wanted to. But why should they go to all that trouble? Hasn't the mail order man told them in his advertisements that no local dealer could either beat his price or his machine? Didn't he guarantee his wheel, promise to make prompt shipment and arrange "easy" payments? Then why waste time going to the local dealer?

Tooting His Own Horn a Bit

Those are the channels in which the average prospect's thoughts run. His reasoning is against the local merchant.

It wouldn't be, were the local dealer to use a bit of initiative and advertise the merits of his proposition. He has good bicycles to sell at moderate prices, and in the majority of cases can afford to accept time payments. And he has the huge advantage of being able to show the prospective rider a variety of machines; of helping the customer to select a wheel that suits his needs; and being ready at all times to make adjustments which will insure absolute satisfaction.

Were these facts advertised, a doubt would be cast in the prospect's mind as to the merits of the offer proposed by the mail order house. It would lead him to investigate.

But dealers are not advertising—it's too expensive, they say. They don't realize that where the cost of individual advertising would be prohibitive they might easily get together and run combination ads; the expense would be shared by each dealer entering the combination.

And in the meantime the mail order house, which "does things without waiting to be told," is grabbing off a big slice of business.

DAVIS CO. BUYS RIGHTS TO YALE AND SNELL BICYCLES

Will Continue to Manufacture the Yale Line, with Slight Modifications; Not Decided as to Disposition of Snell Bicycles; New Catalog Now Off the Press and Ready for Dealers

DAYTON, O., April 12.—The rights and good-will pertaining to the manufacture of the Yale and Snell lines of bicycles have recently been purchased by the Davis Sewing Machine Co., maker of Dayton motorcycles and bicycles, from the Consolidated Mfg. Co., of Toledo, O. The Davis company formally announced last week that it would continue the complete line of Yale bicycles, which are now ready for the trade with a few modifications, and that it was not prepared to say anything regarding the disposition of the Snell bicycles until the material market clears up.

Still Giving Parts Service

As was announced in these columns some weeks ago, the Consolidated Mfg. Co. is now devoting itself entirely to the manufacture of munitions, and its sole activity in the cycling field at present is the parts service which the Consolidated company is still continuing for the benefit of Yale motorcycle riders.

Immediately upon the purchase of the rights to the Yale and Snell bicycles, the Davis Sewing Machine Co. worked out the details connected with the design and production of the Yale line, and added mechanical equipment, valued at several hundred thousand dollars, to its already ample facilities to ensure early and prompt deliveries.

Quick work was also performed in completing a new catalog, attractively describing and illustrating the Yale bicycles, which is now off the press and ready to be mailed to any dealer upon request. Two of the models appearing in the new catalog are shown in this issue.

Yale Champion Racer, $40

Jobbers Wanted Another Line

"The recurring demands made upon us by a number of large distributors for another high-grade name-plate line of bicycles were the cause of our negotiations with the Consolidated Mfg. Co.," said H. M. Huffman, manager of the Davis company's cycle department, last week. "The Yale line will not conflict with our Dayton bicycles, which have been our leading name-plate line for so many years.

"All the distinctive features of the Yale will be retained, but the sizes will be changed to conform with our standards, which are identical with those adopted by the Cycle Parts Committee. While a number of parts of the Yale bicycle are of special construction, they will be interchangeable with any other standard Davis part.

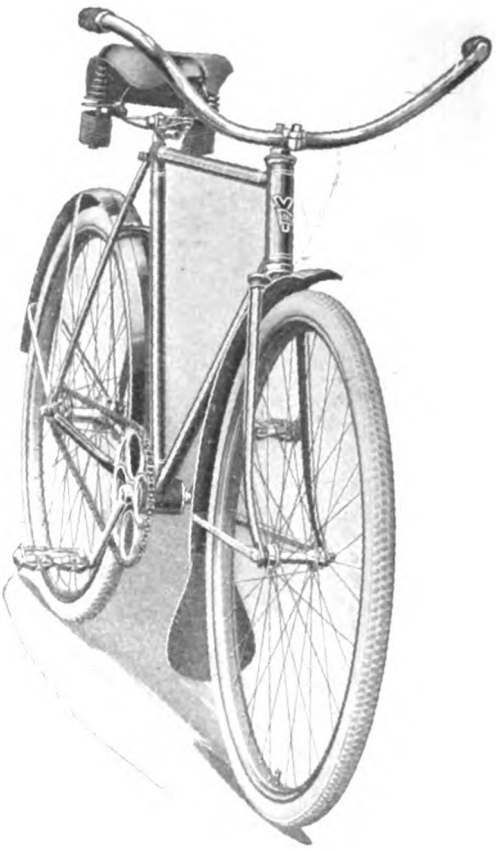
"As to the Snell bicycles," continued Mr. Huffman, "we have made no definite arrangements as yet, and will probably make no announcement regarding that line until the material market is settled.

"We already have an attractive catalog prepared, showing the Yale specifications, and our plans for distribution are fast being completed. The Yale will be handled through a number of large cycle jobbers, many of whom have not heretofore represented the Davis products. Inquiries from dealers are receiving our prompt attention."

Prices from $25 to $45

The new Yale catalog shows the complete line of seven machines, varying in price from $25 to $45. These include two adult and two juvenile roadsters for both sexes, the Yale Champion Racer, Motorbike and a new youth's model, known as the Yale Bikeabout. The last mentioned resembles the motor-bike in some respects, but is lighter and of a lower riding position.

Well-known equipment is used throughout. Vitalic and Fisk thorn-proof are specified, while Troxel saddles are used exclusively, as is the Yale quickly detachable two-piece crank-hanger, Bull-Dog hubs, dust-proof head fitting and other distinctive features. The Yale outside joint head construction is employed on all but the ladies' and juvenile models.



New Yale Roadster, $30

"SCOUTS" ARE SOUNDING OUT ALF. GOULLET

NEWARK, N. J., Apr. 3.—Now that the majority of the better riders have been signed up by the Cycle Racing Association, efforts are being made to win back the militant cyclists of prominence who broke away from the promoters a few months ago and still assert their loyalty to the outlaw movement.

Alfred Goullet is one of the stars who still declares himself an out-and-out F. A. C. man, and apparently will not listen to the overtures of the "organization" men.

HANS OHRT WILL CAST LOT WITH OUTLAW BODY

Will Come East on May 1 and Ride on F. A. C. Tracks in the Bronx and Brooklyn; Riders Against N. C. A.

SAN FRANCISCO, Cal., April 10.—After riding the fence for months in the tangle between the National Cycling Association and the outlaw Federation of American Cyclists, Hans Ohrt, the local rider, has about decided to join the ranks of the outlaws. Ohrt has been wisely neutral during the Winter months while there has been no riding going on.

Now, when it seems that the seceding organization has the N. C. A. back to the wall, he will join the outlaws, according to his friends. He will leave here about May 1 to begin riding in Brooklyn and the Bronx, New York, in the meets to be conducted by Harry Pollok and Billy Gibson.

With the exception of Eddie Carroll, all the riders from California are on the side of the outlaws.

HAD TO OPEN SECOND STORE

SYRACUSE, N. Y., April 12.—Increased interest in and demand for bicycles in Syracuse has been so marked that B. Kassel, who for seven years has conducted a bicycle business at 815 Grape street, has now opened a branch at 429 S. Clinton street.

Digitized by Google

PROVIDENCE HIGH SCHOOL BOYS FORM "TECH BICYCLE CLUB"

PROVIDENCE, R. I., April 12.—The Technical High School here has organized a bicycle club, which will be known as the Tech Bicycle Club. There are 43 charter members and the club is made up largely of those fellows who prefer cycling to any other form of athletics.

Harry Mellinger is captain of the club and H. F. Bennett manager. These two students are now busy planning a series of events which, if successful, would involve the formation of cycling clubs in other schools in and around Providence. Captain Mellinger has named a committee to interview bicycle riders in other institutions with a view to forming a number of clubs, so that interscholastic bicycle meets can be held.

Practice runs will be held shortly by the Tech Club to get the riders into trim for long vacation tours. Races will also be staged over the spacious driveways in Roger Williams Park.

Simple rules and regulations have been drawn up for the guidance of the club's members. It has not been stipulated yet whether the club will affiliate with any dealer; but when meets are conducted the local cycle merchants will be called upon to give their assistance in the form of accessory prizes.

The first run this season was held to Fall River and return, a distance of about 20 miles.

This is the schedule that was closely followed:

9:00 A. M.—Start.
9:20 " —Due at East Providence.
10:00 " —Due at Barrington.
10:40 " —Due at Warren.
11:10 " —Due at Fall River.
11:10 to 12—Lunch and rest
12:00 NOON—Leave Fall River.
12:30 P. M.—Due at Warren.
1:10 " —Due at Barrington.
1:50 " —Due at East Providence.
2:15 " —Arrive at Providence.

75 PRIZES FOR C. R. C. A. 10-MILE HANDICAP

NEW YORK, N. Y., April 12.—With 75 prizes already secured for their handicap race on May 21, the Century Road Club Association looks forward to lining up one of the largest fields of crack amateurs that ever faced a starter on an Eastern course. Four standard racing bicycles are included in the list, with trademark accessories and parts, as well as silver loving cups and valuable medals.

Though this set of prizes is more than sufficient to ensure the success of the ten-mile "Association Handicap" at Floral Park, the committee is still hard at work securing more attractive awards. The first time prize will be an Iver Johnson racing bicycle and the second a pair of Pierce racing wheels with track tires. A Pierce racer heads the place prize list, and an Emblem racer will be presented to the second place man. In addition to giving a silver cup as the team trophy, medals will be awarded to the individual members of the winning team.

Entry blanks can be secured from A. K. Jacobson, Box 21, Station H, or 149 West 98 Street, New York.

BUTLER CYCLE CLUB DINES

HAMILTON, O., Apr. 12.—The annual banquet of the Butler County Cycle Club was held on Tuesday evening, April 4, at the club quarters, with a large attendance. The club orchestra rendered music during the evening and various subjects of interest were discussed, though nothing very serious was allowed. Reports from the membership committee showed that fine progress was being made.

CONTEST WINNERS WILL BE ANNOUNCED SHORTLY

Judges Appointed by "Million Bicycles" Committee Still Hard at Work Examining Contributions.

BRISTOL, Conn., April 11.—So many were the letters, photos and advertisements received from bicycle dealers the country over in the sales talk, window display and best newspaper ad contests promoted by the "Million Bicycles" committee, that it will require a few weeks before the judges will be able to announce the winners.

Numerous letters are being received by Secretary Chas. F. Olin every day from dealers and their salesmen, making inquiries as to the progress which the judges have thus far made. Mr. Olin states that the judges are still hard at work examining the many contributions to the contests, but he expects that an announcement of the winners will be forthcoming within a short time.

MIAMI CO. MAKES SECOND RAISE IN PRICE

MIDDLETOWN, O., Apr. 12.—A second increase in the price of its bicycles has been declared by the Miami Cycle & Mfg. Co. The list price on all bicycles retailing under $35 will be raised $1 on and after April 15. This does not include the Racycle.

The first increase, which was also at $1, went into force on February 19, but this affected only bicycles which retailed at $25 or under.

As in the case of all the other manufacturers, the ever-climbing cost of the material entering into the production of bicycles and the high price of labor have made it necessary for the Miami company to demand more for their machines in order that they might continue their standard quality.

SECOND N. C. W. TRYOUTS

SAN FRANCISCO, Cal., Apr. 11.—The New Century Wheelmen held their second tryout last Sunday to select a six-man team which will wear the lightning streak in the annual novice relay race, to be staged at the Golden Gate Park Stadium on Sunday, April 23.

In the five-mile tryout Max Bumburger was first, W. T. Thompson second, and J. Bell third; while in the one-mile sprint Thompson captured the final heat, with J. Stalker second.

SEVERAL CHANGES MADE IN THE CYCLEMOTOR

A Number of Parts Are Now Die Cast Aluminum, While the New Gasoline-Oil Tank Is a Two-piece Stamping with Torpedo-Shaped Ends; Power-rating Increased Slightly; Weight Reduced

TORONTO, Ont.—Many small details in the Cyclemotor, the motor attachment for bicycles, have been changed and improved for the 1916 model. Several parts, including the crankcase, carbureter and handlebar control, are now die-casted aluminum, making them better fitting and neater in appearance. The gasoline-oil tank is now a two-piece stamping with torpedo-shaped ends and rounded edges, while the screw clamps for attaching the tank to the bar of the bicycle are fixed to the tank by spot welding. Instead of being soldered to the side of the tank, the control wire running from the handlebar to the magneto is held in position by a strong clamp. The rod of the control is also bent to shape for immediate connection on any bicycle.

Magneto Has Been Altered

An opening is also bored in the crankcase to the main bearing for oiling purposes while the crankcase is machined to insure perfect fit. The muffler is practically unchanged, but the tiny magneto has a number of altered points. The safety-gap is now enclosed to insure better service, while the cover to the breaker box screws into position to prevent unfastening.

The fly-wheel, which is a thin disc and is an external part, will have a bevelled edge to improve its appearance. The belt rim for the rear wheel is molded by a machine of special design, the ends of the metal overlapping slightly at the joint to make a strong connection. The jockey-pulley is of aluminum as before, but the part is now die-casted instead of tooled.

The design of the two-stroke engine is practically unchanged, although the development of one or two features has increased the horsepower rating slightly, though the bore and stroke remain at 2 inches and 1¾ inches respectively. The gearing of the lilliputian powerplant also remains at 10 to 1. The lines of the carbureter are the same. The relative positions of the carbureter, magneto, spark plug, muffler and other component parts remain unchanged, although the "fixtures" now bear a cleaner appearance owing to the installation of costly machines in the factory at Rochester and the branch at Toronto.

Weight Now Is 20½ Pounds

Owing to the improved methods of production, the weight of the entire attachment, including the tank, control, belt, rims, pulley, etc., has been reduced by eight ounces, bringing the weight down to 20½ pounds.

Arrangements have been made by the Cyclemotor Corporation for the bringing out of a special design of fuel tank to fit the top bars of the motorcycle type of bicycles. With the fitting of this special tank in such a wheel a symmetrical effect is obtained.

It is understood that no change in the price of Cyclemotors in either the United States or Canada will be made this year. It is announced that the factories at Rochester and Toronto are now ready to deliver large quantities of the 1916 models.

BIG "PICTURE-NAMING" CONTEST LAUNCHED

Buffalo Specialty Co. Is Offering $790 in Prizes to Dealers and Customers for Best Title of Picture Soon to be Mailed to All Cycle Agencies

ONE of the most novel and promising sales stimulants that has come to notice in connection with the unprecedented drive for increased business by bicycle and accessory dealers is offered by the Buffalo Specialty Co., manufacturers of Neverleak tire fluid, in the form of a "picture-naming" contest. Bicycle dealers—thousands of them—will receive a window card showing a bicyclist walking along a dusty country road and pushing his mount, the front tire of which is flat. A small sign in the middle distance conveys the significant information that the traveler is seven miles from town. The Neverleak picture is minus a title, and the customers of bicycle and accessory dealers will be expected to suggest appropriate names for the illustration.

Large Prize List for Customers

Awards will be made as follows: For the best title—that is, the most suitable and descriptive title, in view of all the conditions shown—the Buffalo Specialty Co. will give $100; for the second best title, $50; for the third best, $25; for the titles ranking from the fourth to the tenth, inclusive, $10 each; for the titles ranking from the eleventh to the twenty-fifth, inclusive, $5 each; for the titles next in line from the twenty-sixth to the one hundredth, inclusive, $1 each.

No purchase need be made in order to submit a title in the contest. The contestant will simply obtain from the dealer in whose window he sees the Neverleak picture a special blank, which he will fill out and return to the dealer. The dealer in turn will forward the slip bearing the suggested title to the Buffalo Specialty Co. That is the customer's side of the contest; the dealer's is equally attractive.

$395 for the Dealers

The cash prizes for customers will total $395, and an equal amount will be awarded to the dealers themselves, based on the number of title suggestions they are able to pass along to the Buffalo Specialty Co. The dealer turning in the greatest number of suggestions will receive $100, and the balance of the $395 will be awarded just as in the case of the customers. The second dealer's prize will be $50; the third, $25—and so on. By this arrangement, 100 dealers are certain to receive cash awards—ranging from the first prize of $100 to the lowest prize of $1.

Dealers will not be allowed to submit titles themselves, and will confine themselves to encouraging their customers to participate in the contest. Any customer may submit as many names as he pleases, but each customer competing will be regarded simply as one point for the dealer. In other words, so far as the dealer is concerned, it is the number of contestants he lines up that counts—not the number of titles suggested. He will simply be credited with the number of people he gets suggestions from. The dealer will retain all the suggestions given him until the close of the contest, June 30.

NEW MOTOR WHEEL POSTER

Size 14" x 24"—Printed in Four Colors and Supplied Free to Dealers

Only Eight Words in Title

The titles suggested are limited to eight words. In the event of a tie between two contestants, the amount of the prize in full will be awarded to each tying contestant. The prizes will be awarded direct to each of the winners on or before August 10.

The purpose of the contest is to bring into the stores of bicycle and supply dealers the country over a great number of new friends, who may not make a purchase on their first visit, but who will be pleasantly reminded of that dealer when next they need bicycle materials—and especially when they require such a product as Neverleak tire fluid. It is argued that the Neverleak picture will introduce the dealers to thousands of new buyers.

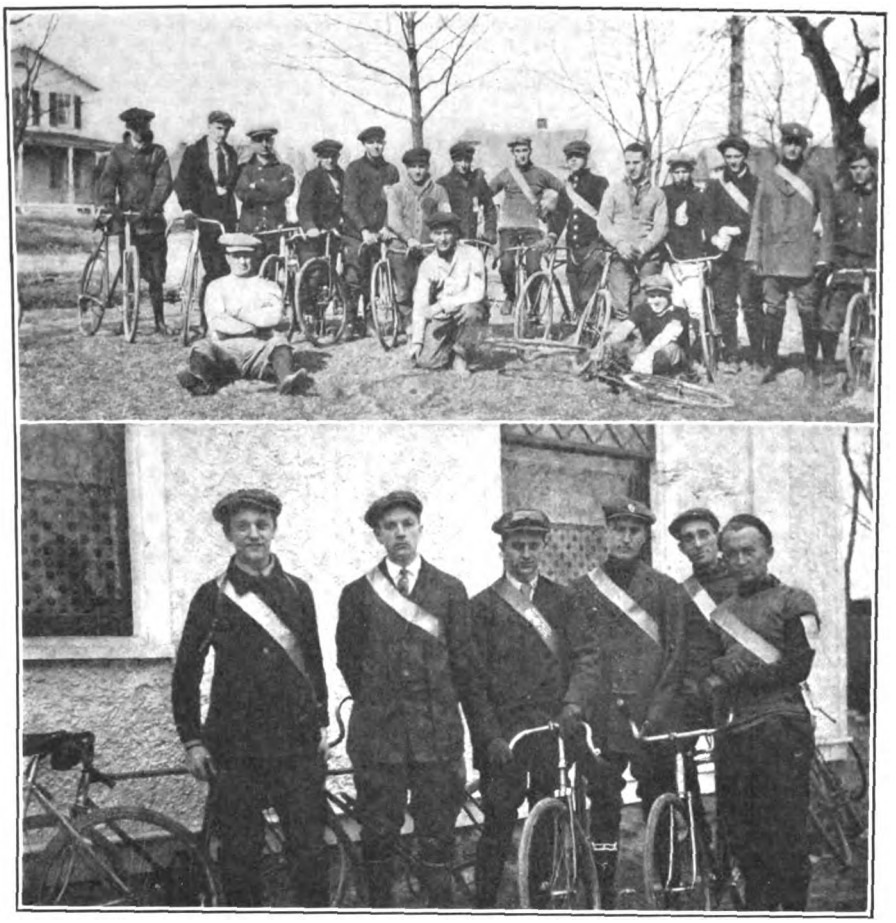
ON THE SPRING CENTURY OF THE C. R. C. OF A.



Upper Picture, Cyclists in the New Jersey's Division Run on April 2 at the Dinner Stop, Smithtown, L. I.; Lower Picture, the Men Who Set the Pace

WEST MICHIGAN C. C. WILL MEET Y. M. C. A. RIDERS

GRAND RAPIDS, Mich., Apr. 12.—C. M. Shook, secretary of the West Michigan Cycle Club, has announced the following events for the year:

May 27—Track meet with the Y. M. C. A. at Comstock Park. Riders not connected with the competing organizations will have to pay small entry fee.

July 4—Road race over the old Cascade course, to finish at Ramona Park.

Labor Day—Six-hour team race at Comstock Park.

It is estimated that the prize list for the meet with the Y. M. C. A. will reach a value of more than $700. Five races are planned for this occasion: one-mile novice; one-mile handicap; two-mile handicap; five-mile handicap, and a miss-and-out race. These events will be held under an N. C. A. sanction.

In the Labor Day feature, prizes will be awarded to the leader at the end of each hour and three prizes are to be hung up for the winning team.

A 68-YEAR-OLD RIDER

EVANSVILLE, Ind., Apr. 12.—John W. Davidson, of this city, is the oldest active rider of the bicycle in the state of Indiana. He has been a user of the two-wheeler ever since it first made its appearance here. Davidson, who is 68 years old, has ridden the same bicycle for the last 18 years, and has never missed a day when the roads were ridable. Davidson attributes much of his activeness to the consistent use of the wheel, and intends to continue to ride the old machine until he is too weak to pedal.

CENTURY AGAIN IN FAVOR

SAN FRANCISCO, Cal., Apr. 11.—Wheelmen in this city and vicinity are again giving attention to the old run of 100 miles around San Francisco Bay, which was once a very popular course for bicycle events. Preliminary plans are now under discussion for a run on this course, possibly July 4. In view of the rapidly growing interest in bicycling, such a race would prove an attraction.

OLYMPIC CYCLIST JOINS CLUB

GRAND RAPIDS, Mich., Apr. 12.—The new member of the West Michigan Cycle Club is Frank Meissner, a crack local rider who was a member of the bicycle team in the Olympic games at Stockholm. It is expected that Meissner's entrance into the club will give an added impetus to its activities. In qualifying for the Stockholm games at Newark, N. J., his time for the 150-mile tryout was 8 hours and 30 minutes.

NEW READING BI. CLUB OFFICERS

READING, Pa., Apr. 12.—New officers were elected by the Reading Bicycle Club recently as follows: President, Roy Noll; secretary-treasurer, Albert B. Rhode.

PIERCE WILL INCREASE PRICE ON ALL MODELS

After May 1, Buffalo Company Will Ask $1 More per Bicycle; Second Increase Possible After Sept. 1

BUFFALO, N. Y., April 12.—Announcement is made by the Pierce Cycle Co. that present prices on Pierce bicycles will be withdrawn, and all orders received after May 1 will be billed at a net advance, over the present dealers' price, of $1.00 on all models. Of course, every order received prior to May 1 will be billed at the existing prices.

"It is quite probable," said Sales Manager Fred L. Brown, when this announcement was made on Monday last, "that if the conditions in the material and labor market become still more stringent, we will be obliged to ask for a further increase of $1.25 on all models by September 1, which will make a total difference of $2.25 over the present prices.

"We are forced to make these increases," continued Mr. Brown, "because of conditions over which we have absolutely no control. The trade journals have already told the dealers the huge advances in the price of manufacturing material, which has been brought on by the war. The cost of labor has also gone up, and there is really no alternative left open for us but to ask an increase in the price of all models. We will not sacrifice the present high quality of Pierce bicycles, but will continue to put into our wheels the best material obtainable.

"Pierce dealers will note that the first advance of $1.00 on all models will not go into effect until May 1, so that they will have plenty of time to estimate the number of machines they will require to carry them through the greater part of the season, and place their order NOW. Dealers who are wise will do their buying now, while they can still purchase Pierce machines before any increase in price is made."

NEW CURBSTONE RIDERS

BALTIMORE, Md., Apr. 12.—The Sunday run of the Curbstone Wheelmen was held to Chattolanee Springs by way of Park Heights avenue, returning by way of the Reisterstown road to the starting point at 529 W. Lafayette avenue. The run was in charge of Capt. John B. Hurtt and Color Bearer Robert Litz. Manager Nicholas G. Grimmel, "the one-armed wonder," has a couple of young speed merchants under his care whom he will shortly introduce to the local cycling public in a big speedfest now under consideration.

BAY VIEW INVITATION DANCE

NEWARK, N. J., Apr. 12.—The Bay View Wheelmen will hold an invitation dance at their clubhouse, 380 S. 6th street, on Saturday night, April 15. There will be bicycle races on home trainers and a basket ball game between amateurs and professionals. Among the pros. present will be Alfred Goullet, Eddie Madden, Willie Hanley, Joe Kopsky and Tommy Grimm.

FRANK KRAMER'S LIFE STORY

The First Authorized Story of the Great American Bicycle Champion's Brilliant Career—By Harry Mendel

Fourteenth Installment

Kramer had plenty of variety in 1910. He was pitted against all classes of riders and suffered few defeats. The runner-up for the title was "Battling" Joe Fogler.

AFTER another stirring series of match races in 1910 with Jackie Clark, the daring Australian skyrocket, Frank Kramer again repeated the same old story, when he annexed the champion's lauels for the tenth consecutive time. The year 1910 went down into cycling history as a comparatively easy season for the East Orange wonder, his strongest opponent being "Battling" Joe Fogler, who finished second best in the fight for the national title. In the three match races with Jackie Clark, Frank romped home the victor on two occasions, while the fleet cyclist from the Antipodes was awarded one of the events.

Three Stars in Mormon Town

Salt Lake City saw Clark, Iver Lawson and Floyd McFarland ride during the greater part of 1910. Jackie made a big clean-up in the Mormon town and did not return to Newark until September, when Kramer already had the title cornered. But great interest, nevertheless, was shown in the series of match races which were especially staged between these two marvels of the wheel.

Kramer humbled Clark in straight heats before a banner crowd at the Velodrome on Sunday, Sept. 18. In the last lap of the initial heat, "Big Steve" stealthily pedaled on the inside and then shot out into the lead like a thunderbolt. He then "stalled" Jackie until well up into the backstretch, and as Clark's ire put more ginger into his heels, Kramer pulled himself together and with a great burst of speed beat his rival over the tape by a few inches. Clark was forced to take the lead in the second heat, and sprinted vigorously right to the last lap. But Kramer clung to him, and coming into the backstretch the American champion whizzed out from behind, crushing the "rocket's" pride," to the tune of half a wheel's length.

Judges Give Race to Clark

The following Sunday witnessed the second race between the Australian and the Yankee. In this event, at five miles, Clark was credited with the victory, although it appeared to the spectators that Kramer had won by a few inches. The judges deliberated for some minutes after the gruelling contest was over, and finally declared Jackie the winner. That left the third and last race of the series to determine the better rider.

Both men were in fine trim on Sunday, Oct. 2, when they met in the final race of the season. In the first heat it appeared to take every ounce of Kramer's strength and skill to send him over the tape ahead of Clark. He only won by a few inches; and the narrow margin of his victory made him the more cautious in the second heat. This proved to be a very heady bit of racing which the fans enjoyed immensely. In it Kramer showed conclusively that "gray matter" played no small part in his successful racing career. He outgeneraled Clark in every way and crossed the finish line almost a full wheel's length to the good.

Two nasty spills marred Kramer's riding in 1910. One injured him very seriously, while in the second he came out rather luckily, considering that two other riders, who figured in the spill, each sustained a broken collarbone.

Tossed Over the Handlebars

The first smash-up occurred on Sunday, April 24, as the field of riders was completing the third mile in a five-mile race. Kramer's front rim collapsed and he was tossed over the handlebars, head first, hitting the track directly on his forehead. With his wheel strapped to his feet, Frank rolled from the top of the bank to the flat. When "Big Steve" was picked up unconscious, it was found that he had a bad cut over his left eye—the eye itself being badly bloodshot—and that the entire left side of his face, from forehead to chin, was scraped and discolored.

The second spill in which Kramer figured was the worst of the season, as far as the other riders were concerned. Five cyclists went down in a heap just a few seconds before the finish of the two-hour team race on Labor Day. Both Carlo Vanoni and Eddie Rupprecht broke their collarbones, while Norman Anderson's lip was cut and Kramer was badly bruised on the right elbow. Fred Hill, the first man to fall, escaped without an injury.

Mixed match races were quite a fad in 1910 at the tracks in New Haven and Providence. The first one of these affairs was contested on Thursday, August 18, at New Haven, with Kramer winning against Hehir. Kramer defeated Hehir in a one-mile match race and then took his measure in a five-mile motor-paced race. The next night at Providence, Kramer turned a similar trick on Joe Fogler, beating the battler in a one-mile sprint affair, and then trimming Joe behind motors at five miles. On the Thursday following, at New Haven, Alf Goullet beat Kramer in a race which needed three heats to decide. Kramer won the one-mile sprint by two feet, but Goullet came back by winning an unlimited pursuit race. The deciding heat was at five mile, behind the motors, and this time Goullet won the heat and the race.

"Battling" Joe Fogler

Kramer turned the tables the following night at Providence by winning two out of three heats. Frank got the sprint race and the motor-paced affair, while in the pursuit race, the blond-haired Australian caught Kramer after going six miles and three laps.

Kramer won the first championship race of the season, which was run off on Wednesday night, June 1. Frank won in commanding style, and any doubt of the champion's form was quickly dispelled. Kramer rode around Joe Fogler and Eddie Root and shook off Paddy Hehir with as good a burst of speed as he ever displayed. Fogler finally got second place, with Hehir and Root following him home.

Copped the Two Mile Title Race

Toying with the field on Wednesday, June 8, Kramer won the two-mile national titular race with ease. Kramer's opponents were Joe Fogler, Floyd Krebs and Menus Bedell. With three-quarters of a length to go, Krebs was in the lead. When Kramer shot out there wasn't anything to it, and he easily slid in a winner. Fogler was second home, and Menus Bedell was third.

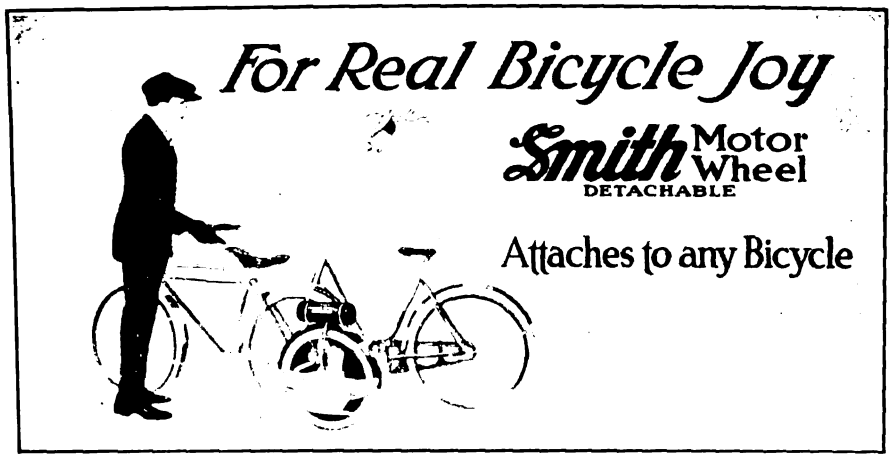
In the next two championship races, Kramer fared poorly. In the first one he was shut out in his heat, while on the next occasion he could get no better than fifth in the final. In both cases Fogler won the races. Kramer came back into his own on Wednesday, June 22, and riding in wonderful form rode around the entire field and won the quarter-mile race. Fred Hill was second, Hehir third and Charley Stein, fourth.

One of the longest professional pursuit races ever contested in Newark was won by Goullet against Kramer, on Sunday, June 26. The race went fourteen miles and two laps. This was the first defeat at this style of racing for Kramer since he joined the professional ranks. Kramer lost an amateur pursuit race at Manhattan Beach in 1899 to William F. Wernberger, which went twenty-four miles.

On the Fourth of July, Kramer rode at New Haven and beat Fogler and the Bedell brothers in a driving finish in the five-mile open. Kramer's next big victory was scored on July 15, at Providence, when he won the twenty-five-mile race. Kramer did not ride any better than fifth all the way, but in the last lap and after a great fight

Digitized by Google

FOR MOTOR WHEEL STREET CAR ADVERTISING



These Cards, Measuring 11 x 21 Inches, Have Been Attractively Printed in Four Colors by the A. O. Smith Co. and Will Be Furnished Free of Charge to Dealers

with Paddy Hehir, Kramer flashed across the line a winner by a scant yard. Joe Fogler was ahead of Kramer all the way around until the final dash for the finish, when he fell back and only got fifth place. Hehir was second, John Bedell a third, and Eddie Root, fourth.

Riding within a fifth of a second of the word's record, Kramer won the quarter-mile record trial in New Haven on Thursday, July 28, in 28⅘ seconds. Although 29⅗ seconds was the best Paddy Hehir could do in this event, the Australian rode a great race in the five-mile open, and Kramer only beating him to the tape by a scant twelve inches.

Humbling Fogler's Pride

The next night at Providence, Kramer won the ten-mile open from John Bedell, Joe Fogler and Menus Bedell. On Sunday, back in Newark, Frank came home a winner in the five-mile handicap, easily disposing of John Bedell and Joe Fogler.

Kramer rode a dead heat with Al Krebs, of Salt Lake City, at New Haven, on Thursday, August 4. Krebs sharing the victory with Kramer was due to the rough riding of Paddy Hehir, who ran Kramer off the track and caused the East Orange marvel to lose twenty yards on the first lap. Kramer appeared to be out of the race, but by a wonderful burst of speed he closed up the gap and was traveling two lengths to Krebs' one as he flashed over the tape.

It is not very often that a bike rider works himself out of a pocket in the last twelfth of a mile, around three other men and captures second money after being hopelessly out of the race. That is exactly what was done by Kramer in the half-mile handicap on Sunday, August 7. Eddie Root was the winner of the race. The champion came back and won the five-mile open after a great fight with Eddie Root and John Bedell.

On Friday, August 12, Kramer won his second twenty-five-mile race of the season at Providence, beating out Joe Fogler, Eddie Root and Fred Hill. Kramer kept up in the lead all the way and had the race well in hand from start to finish.

Avoiding a spill by a hair's breadth and compelled to ride to the top of the track in order to save himself from falling, and then coming from fifth place and winning out, was the stunt Kramer pulled on Sunday, August 14. In the last quarter mile of the one-mile open race, Root, John and Menus Bedell followed Kramer in.

Kramer then rode his mixed match races in New England, and with the arrival of September came the arrival from Salt Lake City of Jackie Clark and the exciting match races at the Newark Velodrome which were won by Kramer.

(To be continued)

CANADIAN WHEELMEN TO HOLD SESSION APRIL 22

MONTREAL, Que.—Attention is turning to the Canadian Wheelmen's Association in view of the forthcoming annual meeting. This will be held at Toronto on Saturday, April 22. It is anticipated that Alderman Louis Rubenstein of Montreal will be re-elected to the president's chair, but it is his announced intention to adopt an inactive policy during the coming year.

It is possible that sanctions will be issued for no racemeets other than those held for patriotic purposes or for those to be held under direct military auspices. There will be nothing, however, to prevent the holding of road races because the Canadian Wheelmen's Association does not grant permits for such events, although the participants must live up to the association's rules.

The Montreal Amateur Athletic Association, of which Alderman Rubenstein is an officer, has decided to stage no contests during the coming summer, and this seems to be the feeling among other local sporting organizations.

KEIDEL FILLING ORDERS DESPITE FIRE HANDICAP

BALTIMORE, Md., Apr. 12.—Henry Keidel & Co., the local bicycle and motorcycle jobbers who handle the Emblem, Pierce and Iver Johnson, are still actively carrying on business, despite the conflagration which burned out part of their building recently. Orders are being filled without any delay through the courtesy of an out-of-town cycle supply house. An inventory of the stock is now being taken and the extent of the damage wrought by the fire will not be known until this is completed.

U. S. I. RACE POSTPONED ON ACCOUNT OF WEATHER

NEW YORK, April 12.—The "Floral Park Handicap" ten-mile bicycle road race of the Unione Sportiva Italiana, which was scheduled to be contested over the Jericho Turnpike, from Floral Park to Westbury, Long Island, and return, last Sunday, was postponed on account of the snow and rain. It will be held next Sunday, April 16.

Contrary to former customs, and in order that there may be no confliction of dates with the other racemeets, the big U. S. I. event will be held next Sunday morning, at Floral Park, regardless of weather conditions. Over 175 entries are in the committee's hands, and further post entries will be received up to 9 o'clock next Sunday morning.

MUCH INTEREST SHOWN IN CRESCENT PLEASURE RUN

BALTIMORE, Md., Apr. 11.—Competition in the weekly point races held by the Crescent Bicycle Club is becoming keen. W. V. Iglehart, who has been in the lead from the start, is still ahead, but Capt. L. M. Sanborn is gaining rapidly on him and is now only eight points behind. E. Nitz is in third place, being one point back of Sanborn.

Much interest is being manifested in the half century pleasure run which the Crescents will promote on May 7. Though this event has been dormant for a number of seasons, the revival of cycling clubs here promises to bring many affiliated riders out for the run.

ROYAL FLYER BICYCLE CLUB WILL STAGE SOCIAL RUN

BUFFALO, N. Y., April 12.—The Royal Flyer Bicycle Club will conduct its annual sociability run on Sunday, May 7. The start will be at Herb. N. Krigbaum's, 722 Broadway, at 10 a. m. The distance will be about 35 miles. At least 200 riders are expected to be in line, and all riders in Buffalo, irrespective of club affiliations, are invited to participate.

TRIANGLES START MILEAGE CONTEST

BALTIMORE, Md., Apr. 12.—The run of the Triangle Wheelmen on Sunday last was held to Relay, by way of Columbia avenue, Washington road and the Rolling road.

The club has extended a cordial invitation to all bicycle riders to accompany them on their runs, as it will make a specialty of a slow and steady pace. Beginning May 1, the red and blue of the Triangles' colors will be seen on moonlight runs, starting each Wednesday evening at 7:30 p. m. from 931 North Broadway.

Captain Horace G. Seward announced the starting of the mileage contest, and judging from the way some of the members are plugging on the roads, it has met with great approval.

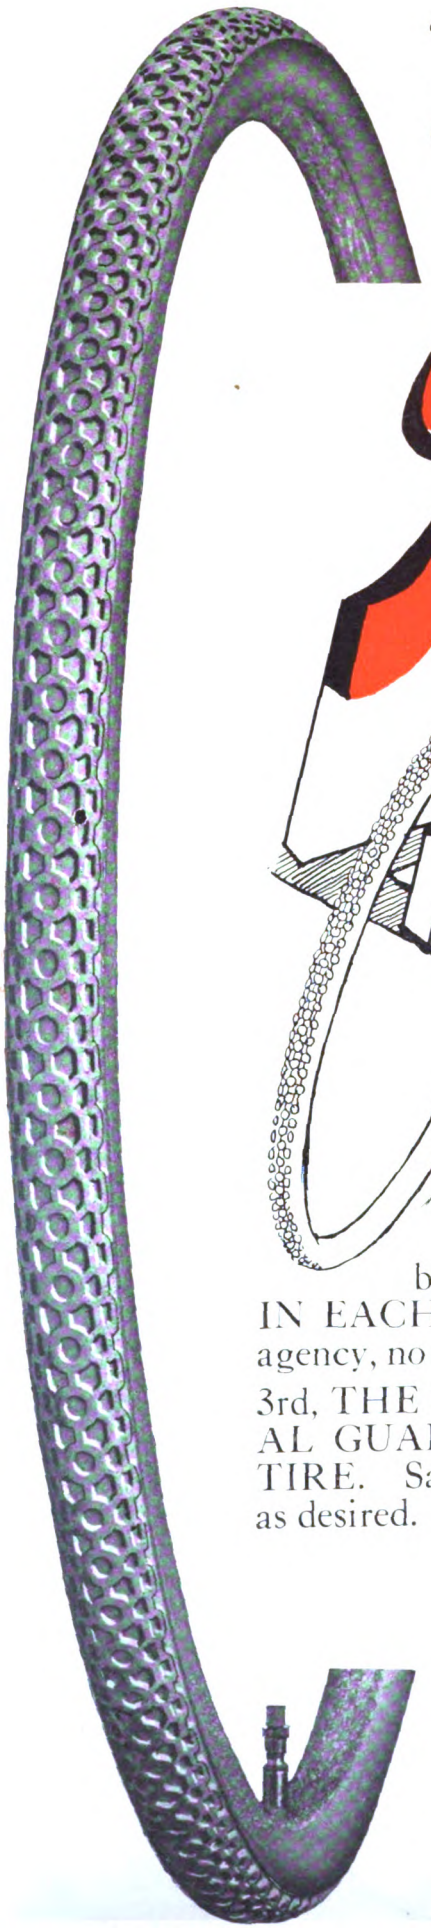
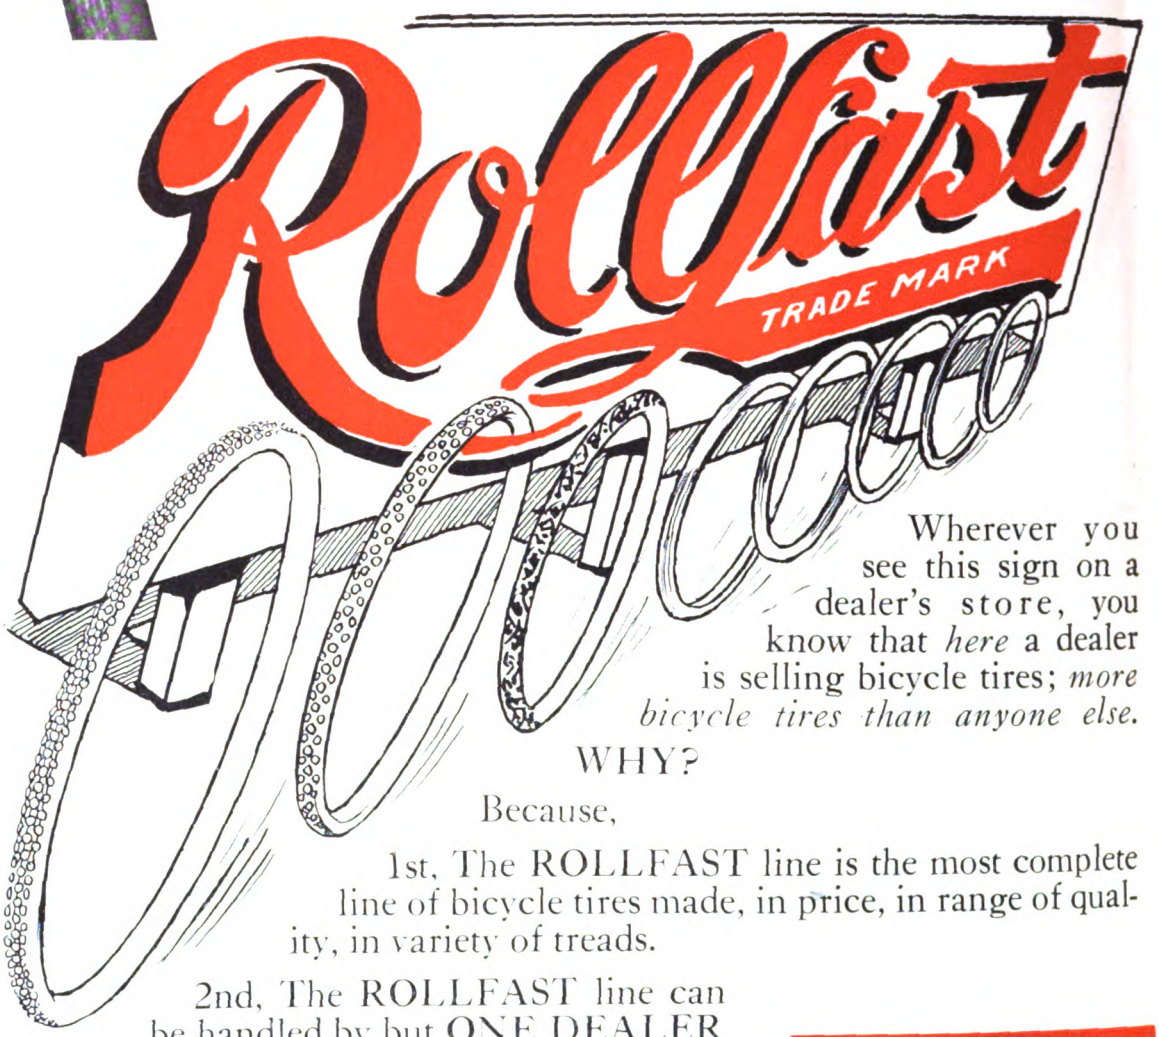
THE SIGN of TIRE SELLING SUCCESS



Rollfast TRADE MARK



Wherever you see this sign on a dealer's store, you know that *here* a dealer is selling bicycle tires; *more bicycle tires than anyone else.*

WHY?

Because,

1st, The ROLLFAST line is the most complete line of bicycle tires made, in price, in range of quality, in variety of treads.

2nd, The ROLLFAST line can be handled by but ONE DEALER IN EACH TOWN, which means exclusive agency, no cut prices, an assured tire business.

3rd, THE ROLLFAST UNCONDITIONAL GUARANTEE IS BEHIND EACH TIRE. Satisfaction, adjustment or refund, as desired.

Do you think you can go wrong in writing to find out more about the Rollfast proposition? Any of the big distributors listed here will be glad to give you full details.

SVENSGAARD REFLECTS TRADE'S BRISK SEASON

Interior of New Store of Harry Svensgaard Sales Corporation at 510 Saginaw Street, Flint, Mich., an Indication of the Increasing Business of This Live-Wire Concern Whose Headquarters Are in Detroit. Excelsior and Cyclemotor Products Are Handled, as Well as the Firm's Pullman Sidecars

THE APRIL GROUCH AND THE WAY IT CAN BE ELIMINATED

Concentration on the Product Handled Will Do Away With This Spring Feeling

By PRACTICUS

JUST about this time of year there seems to break out a sort of grumblers' chorus of dealers here and there about business not being what it ought to be. Fortunately, these mournings and complaints are not general, and unfortunately, in most mases what the lamenting dealers say is so. The causes that they give for their business not being up to the mark—if they give any—are not by any means the true ones, for they blame other things instead of themselves.

Looking over the records of many of the disgruntled ones, you will probably see that they represented the Dash machine last year, the Blank the year before and are now agents for the Hyphen for 1916. Lord knows what they will be agents for in 1917! And the reason of the change is not far to seek: they didn't have any "luck" with the Dash and Blank makes.

These dealers look upon the success of an agency proposition as "luck." There's one of the big troubles. They take the agency for a certain make because they hear how well the other fellow is doing out in Kalamazoo or Liberty Corners, or Palo Alto, and put out good money in deposits. They figure that if a man in a smaller town than theirs can sell so many Dashes in a season, it must be a pipe, and so they get the machines in and sit down to wait for customers. Well, the customers come—at least some do—thanks to the factory's advertising, and the dealer is pleased. But the end of

BERCKHEMER IS BACK MAKING THINGS HUM WITH THE POWERPLUS

BRONX, N. Y.—OLLIE BERCKHEMER, handling the Indian, at 993 Washington avenue, is back again on the job, since his recent serious accident. Ollie was run into by a mail truck and his thigh broken, but he gets about nicely with a cane, nevertheless. He is happy in the knowledge that he escaped with his life and that he is able to attend to his business again.

Ollie, whose place is officially known as Oliver's Indian Agency, celebrated his getting into harness again by selling two of the most expensive outfits ever purchased in Greater New York, namely two three-speed electrically-equipped Indians with sidecars at $438 each. "This is proof that those who want a first-class outfit are willing to pay what it's worth," says Berckhemer, "and that the price problem is by no means always in favor of the small car."

KANSAS CITY, MO.

CHARLES HANSON, Wigwam representative, says that business is rapidly getting under headway and that machines are being sent out to riders every day. The early Spring weather has developed a great many admirers of the Featherweight and the little two-stroker is quite the sensation at Hanson's Grand avenue tepee. Hanson's books show that the new riders are buying the lightweights and most of the old ones are taking Powerplus twins.

GRAND RAPIDS, MICH.

L. W. deLYE, agent for Excelsior and Cyclemotor products, is making extensive improvements to his quarters at 219 Ottawa avenue, N. W. The entire interior of the building is being remodeled and redecorated, and each department will hereafter have its own section in the structure. The offices will be elevated and several special systems of business tabulations will be installed.

DeLye has just received a Series 17 Excelsior demonstrator, as well as large consignments of Cyclemotors and Smith Motor Wheels.

LOUISVILLE, KY.

THE DOW WIRE & IRON WORKS has just completed a big week's campaign with the Miami Power Bicycle. W. H. Sheets, C. F. Pineau and E. S. Gilbert were present from the Middletown factory to aid in demonstrating the machines. R. E. Hickey, former manager of the retail sales department, Charles O'Brien and John Casey of the local company all aided in the campaign.

There were eight machines on the floor during the sale. Much publicity was secured in the local papers, where eighth and quarter pages of advertising were run in addition to write-ups. Riders were also sent out on the machines distributing literature.

1,000,000 Bicycles for 1916

The Power Behind the Pledge

A million bicycles in 1916 is possible. But these bicycles to sell well and quickly must have the sort of equipment that makes an instant appeal to the prospective buyer—in other words, they must be equipped with the most efficient, the strongest, the easiest-operating Coaster Brake—another way of saying MORROW.

The MORROW will help make the million bicycles **an actual fact.** It is the potent power that puts the bicycles on the road and **keeps them there.**

Coupled with MORROW prestige and MORROW service is MORROW cooperation. Free advertising balloons, banners, pennants, price-tags, booklets, folders, all with the **bicycle boosting punch** in them, will be sent free to dealers upon request.

The MORROW is a constructive fitment. It builds bicycle business—it makes two sales grow where but one grew before. It is the right-hand selling assistant to the wise dealer.

THE APRIL GROUCH

(CONTINUED FROM PAGE 45)

the season shows poor results, and Mr. Dealer decides that the Dash is not a good machine to sell, particularly as the Blank agents all over the country have been selling 'em like hot cakes. When the Blank traveler comes around, he chucks over the Dash and signs up for the new machine. Then he squats down and repeats the performance of the preceding season.

It is in April that the grouching begins with these fellows. They begin to see that there are only about four months left of the riding season and they haven't much to show for the first part of their seasonal connection as Blank agents. This is the time that they begin to think of changing once more, and hunt up what the fellows who handled the other makes of machine are doing. It is only a question of months before a new sign is painted on the window and new transfers appear on the door.

Copying the Will-o'-the-Wisp

Coming right down to nature, the will-o'-the-wisp is not a model of perseverance and doesn't produce much at any time. The dealer who changes his agency each season is just like the bright little thing in the swamps and generally has about as much chance of making good. If he will read the various success stories which have appeared in **Motor Cycle Illustrated** from time to time, he will see that when changes were made by these men, they were made with forethought and were made with confidence that they would win out. He will also see that a number of the successful men took an agency and then hammered away at it through thick and thin on their own, concentrating on the one make and building up trade and a bank account at the same time. They were not turned aside at the success of men handling another make. They made *their own* agencies successful.

These men did not sit down and let the factory sell machines for them through advertising. They took all the advantage that they could out of the factory publicity, but not in that way. They went out after business. They advertised for themselves in lots of ways. As a result, they did not have the April grouch and were not looking for another representation in September or October. They were popular with the factories, because they did the business and boosted the machine for next season's sales. There was no question of changing on either their or the manufacturers' parts.

"Concentrate" Is the Word

There's a one-word moral in this story. It is CONCENTRATE. Take an agency then plug-plug-plug away. Keep yourself in touch with events; get ideas on selling and apply them. Consider the factory as a means of supplying you with machines, rather than as a sale-help and go out after business. Don't be led to consider changing agencies because someone else has done better; go out after his record and make a new one. Then there won't be any cause of April grouching.

BROOKLYN, N. Y.

RANKIN MOTORCYCLE SHOP, at 270 Chauncey street, has the agency for Indian, and Harley-Davidson machines for this section of the City of Churches. Proprietor Rankin has formed a motorcycle club among his patrons and the officials of this organization are planning a number of social runs for each Sunday during the 1916 season.

THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS

58 OF 85

NEARLY THREE-QUARTERS

FIFTY-EIGHT of the eighty-five makes of motorcycles officially listed as making up the market of England's 1916 motorcycles, use belt transmission to get the final power impulse to the rear wheel.

In England they use motorcycles extensively—it is there that the Lightweight Motorcycle first became popular—over there they dig deep to obtain the best all-round results, and belt drive gets the majority vote.

Belt drive by proof—belt drive by popularity—belt drive by common sense design—it wins out every way as the obviously proper transmission for Lightweight Motorcycles.

When you buy a Lightweight, and most people eventually will, see that it is fitted with belt drive. It provides a clean, noiseless transmission that gives you a silky smooth ride not unlike aeroplaning—no jolts, no rattle. And when you have decided, as you will on belt drive, insist on a

LOUISVILLE, KY.

NORBERT SANDMANN, representing the Excelsior, has been busy traveling the State and signing up sub-agencies. His latest visit was to Elizabethtown where he signed up a live-wire representative.

KLINE BROTHERS, Harley-Davidson agents, have made a number of improvements in their new store at Broadway and Sixth street. They have now one of the best-appointed motorcycle and supply stores in this city.

Headquarters of Silent Gray Fellow in Kansas City, Mo.—Store of Western Motorcycle Co. on East 15th Street

TACOMA, WASH.

RAY DAY, handling the Indian in this city, has a special Stewart-Warner 100-mile speedometer, for use on his pet Indian. Day feels that he will make the pointer on the scale hit the pin at the right hand end when he tunes her up on the Speedway.

The Indian was a big attraction in the Dress-Up Week parade, when Day and Charles Sander rode a brand new, electrically-fitted Powerplus attired in full dress clothes. On account of rain, they were compelled to raise an umbrella at the last minute and this added to the effect. They received first prize.

MANAGER GLASGOW, of the Harley-Davidson agency, is kept busy these days talking Silent Gray Fellow. The new vans and sidecars have arrived and another carload of machines has been distributed on the sales floor for the approval of prospects. The paint shop is hustling on Spring hurry-up jobs, too.

THE FULLER CYCLE & SUPPLY CO., is selling Hendersons these days, at the rate of two between each sunrise and sunset. New window designs, a new clock and a half-carload of four-cylinder Detroit-made machines are the latest attractions of the Fuller establishment. The clock and signs will stay, but the machines are gradually going out.

CINCINNATI, O.

A. BOESCHE, of the Motorcycle Service Co., handling Thor and Henderson products, has been getting things into shape in his new quarters at 1410 Race street. He has considerably more room than in the former place. at 1321 Race street, and has the new models lined up handsomely. There is a large glass case and a wall-cabinet for displaying accessories, and the showroom has a special flooring.

Weather conditions have held back the season here, but with the advent of real Spring, Boesche looks for good business as there is plenty of money in town.

Diamond Chain & Mfg. Co.
Indianapolis, Indiana

TAMPA, FLA.

LOUIS TORRES, well known as a repairman and rider in this city, may join the Indian factory team, if Ray Creviston's recommendation goes for anything. Torres rode against Creviston during a race in this city recently, and lost to the Indian factory man by a small margin. Creviston was tickled with Louis' performance and communicated with the Hendee Mfg. Co. about Torres' ability.

Torres tunes up his own machines and is in great demand, therefore, by other riders who want to show speed. Should he go to Springfield, his absence will be felt by wigwamites in this section.

VINELAND, N. J.

ANTHONY CRESCI, JR., Harley-Davidson dealer, for this section of Cumberland County has sold 30 motorcycles to date and aims to hit the half-hundred mark before the season is over.

Three single-speed twins, three single cylinder and the rest three-speed twins comprise his sales. Six Harley-Davidson sidecars have been placed by Cresci as well. Twenty-eight of the machines are Presto equipped and two electric models.

Striking Display of Excelsior Models at Recent Milwaukee Dealers' Show. It Was a Center of Interest at the Exhibition

ST. CATHERINE'S, ONT.

J. N. LYDIATT has the reputation of making capital out of everything, and the latest thing in the capital-making line was the arrest of James Roe, his mechanic, for riding a Dayton Motor Bicycle on the sidewalk. Roe took the front-wheel drive mount out of the City Garage, Lydiatt's establishment, and not wishing to get it too dirty, demonstrated it on the sidewalk. A policeman met Roe and haled him to court, where he was fined $2.

The news got around, especially as the speed of the machine was exaggerated, and Lydiatt began to get inquiries about it. He and Roe then showed what the machine could do, and the City Garage now has several orders on its books for Dayton Motor Bicycles. "The advertising was worth the fine, all right," says Lydiatt.

COLUMBUS, O.

BENJAMIN McGINTY has been made manager of the Franklin Cycle & Supply Co., succeeding T. J. Bergin. Bergin left the firm to take a position with the Justus & Parker Co., automobile accessory dealers. The Franklin company formerly held the agency for the Excelsior line.

At present, the company is concentrating on bicycles and Motor Wheels.

WHAT DOES NEW YORK LAW EXPECT FROM DEALERS?

(CONTINUED FROM PAGE 18)

torcycle we have in stock in our own name, then we would always run the risk of being blamed for some new customer's carelessness in case an accident should occur, before the license could be transferred, and besides there would be a lot of bookkeeping and some confusion resulting. In the case of a new motorcycle we have only one way out —that is to hold the machine until the registration card and license plate are received by the purchaser, which will often mean a delay in making collections, etc.

"I would deeply appreciate any information you can give on this subject, particularly any pointers as to what the average large dealer is planning to do under the circumstances.

"W. J. CALLWELL, JR.,
"Newburgh, N. Y."

NEW AGENTS APPOINTED FOR MIAMI POWER BICYCLE

MIDDLETOWN, O.—Sales Manager E. F. Gilbert, of the Miami Cycle & Mfg. Co., making the Miami Power Bicycle, announces the following additions to the large list of representatives for the little four-stroke lightweight:

Knudson & Lundblade, Eureka, Cal.; Dewey & Green, Healdsburg, Cal.; Chas. A. Winslow, Vallejo, Cal.; S. J. Delaney, Napa, Cal.; G. A. Faulkner, Oakland, Cal.; Powell Bros. Cyclery, San Jose, Cal.; Seep Bros. Hardware Co., Oil City, Pa.; New Castle Hardware Co., New Castle, Pa.; C. B. Hill, Warren, Pa.; W. O. Rhoads, Shamokin, Pa.; Ludden & Whitten, Brockton, Mass.; A. R. Macomber, Attleboro, Mass.

HENDERSON CARLOAD SELLS IN QUICK TIME

LOS ANGELES, Cal.—The week after the fifth carload of 42 Hendersons reached the California Henderson Motorcycle Sales Corporation 20 were gone and the balance were retailing at the rate of two to three a day. It is expected that the carload will be exhausted in a few days.

The repair and accessory business of this company is growing very fast, which is in part attributable to the goodwill the corporation is building up among riders by its liberal service policy on new machines. While the firm is absolutely strict and fair in regard to breakages, they are not small about adjustments and urge riders to come in with their machines and let the shop experts help them in getting the mounts tuned up.

DEALERS BENEFIT BY FINE WEATHER CONDITIONS

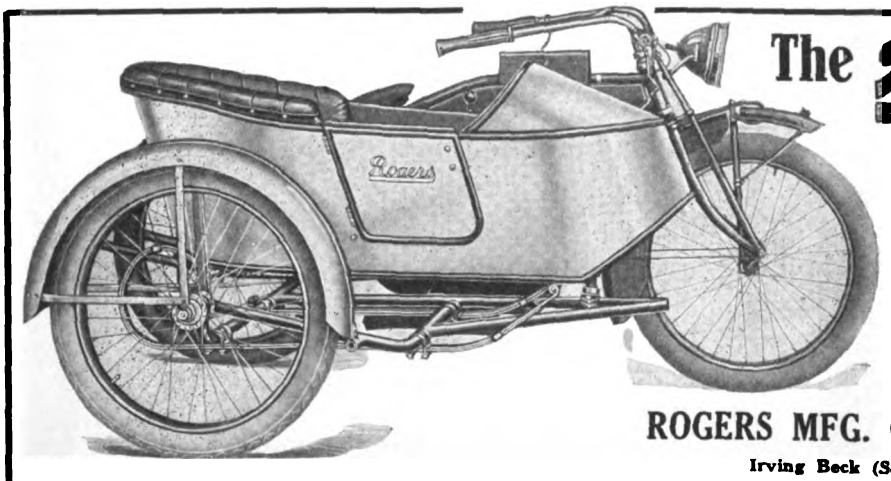
PORTLAND, Ore.—Bicycles were more in evidence during the last week than they have been in the past year at any time. With the advent of good weather after the big snow, both adults and juveniles were out enjoying the Spring-like days. Dealers profited by the increase in buying, and having made a special reduction for Bicycle Day, were well repaid for their extra efforts along advertising lines. Among those prominently identified with the "boost" in sales were the Sellwood Cyclery; Rydman Bros., handling the Racycle; Scovill's Cyclery, Dayton bicycles; F. P. Keenan Company, Columbia and Rambler, Tribune and Cleveland. The F. P. Keenan Company enjoys the distinction of being the oldest and largest bicycle house in the Northwest.

BRAZENOR SELLS TWO VANS FOR FISK TIRE SERVICE

BROOKLYN, N. Y., April 8.—"Bustling Bob" Brazenor, the Brooklyn and Long Island distributor for the Harley-Davidson, has stuck another feather in his cap. The Fisk tire people have just received two electrically-equipped Harley-Davidson delivery outfits for their service department. After experimenting with various modes of delivery, the local manager of the Fisk branch concluded that a motorcycle and van was the best and cheapest way. In addition to this, "Bustling Bob" has sold 88 machines and 40 sidecars.

FEATHERWEIGHT IN CANAL ZONE

ANCON, Canal Zone.—John H. Poole, local representative for the Indian, has found that his featherweight demonstrator can draw a crowd at any hour of the day, and an excellent demand has already been shown for the little fellows.



The Rogers Universally Interchangeable

SIXSMITH MAKES QUICK SALE OF FIRST LOT OF SERIES 17 EXCELSIORS

NEW YORK, April 11.—T. J. Sixsmith, the veteran Excelsior agent, has been kept busy telling the fine points of the new Series 17 models, and incidentally turning the machines themselves over as fast as he can get them. He has had six from the Chicago works already, and there are six riders of Series 17 twins right in this city, one on each of the mounts received from "Tom."

"There are 15 due within a week—all told" says Tom, "and they were sold by the descriptions given in the magazines, for we hadn't a machine to show them up to three days ago. The first man got the demonstrator which the factory sent, and the other five came around to get them out of the crate. I don't expect to have to do more than uncrate the rest of the fifteen; the boys will grab them from me."

FARROW'S MOTOR BOB COST $5 TO BUILD AND HITS 35 MILES AN HOUR

NELSONVILLE, O.—A. D. Farrow, the Harley-Davidson man, has built a motor bob measuring 11 feet by 4½ feet and fitted with a Silent Gray motor as pow-

Agent Farrow About to Start Off On Sledding Trip with His Bob and a Load of Happy Passengers

erplant. This bob has a capacity for four passengers and Farrow says that it cost him about $5 to build it. He can get 35 miles an hour with it on the road, but at that speed he can just about keep it steady.

Farrow has sold more 1916 models so far this season than he did 1915 models all last season. He has rigged an electric sign on his place, to flash at intervals, and this sign he figures is a fine advertisement. His bicycle business is growing by leaps and bounds. He handles the Chicyco machines and tires as a main cycle line.

TORONTO, ONT.

H. M. KIPP COMPANY, LTD., Indian representative in this city, sold 15 of the 1916 models as a direct result of Indian Day, April 1. Twelve of these were Powerplus twins and three were Featherweights. Bicycle sales were very large on that date.

Herb. Kipp states that considering the present conditions, the showing was a fine one. "The riding public—present and future—is showing much more interest and enthusiasm," says Kipp, "than we had thought possible at this time."

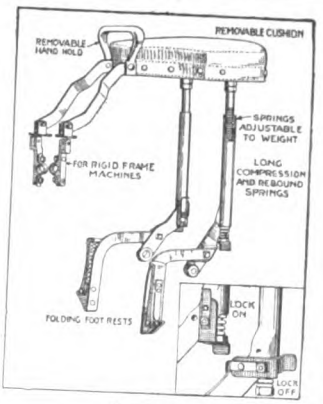
THE STOLL DREAM TANDEM No. 1

"The Easiest Riding Tandem in the World"

New Price $22.00

Prices Advance on STOLL TANDEMS April 10th

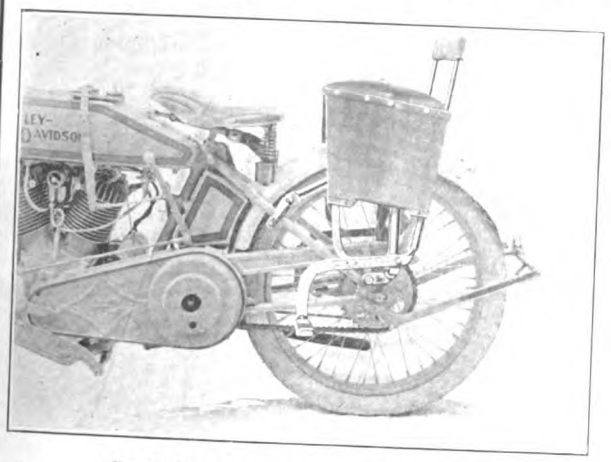
The unusual conditions surrounding the raw material market, and the greatly increased cost of all materials entering into the manufacture of Stoll Motorcycle Accessories, compels the advancement of our prices.

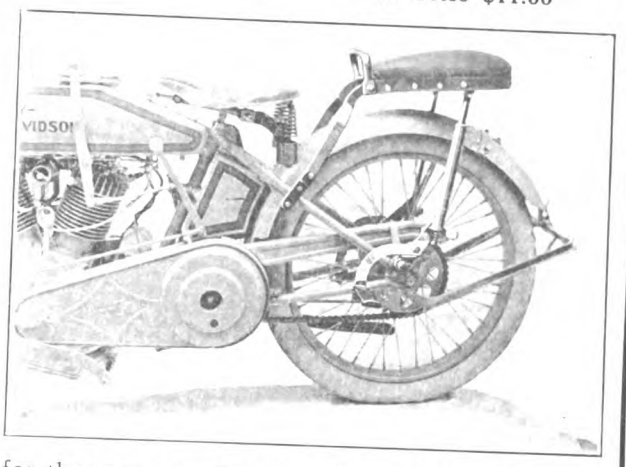


Patented

STOLL COMBINATION TANDEM No. 2

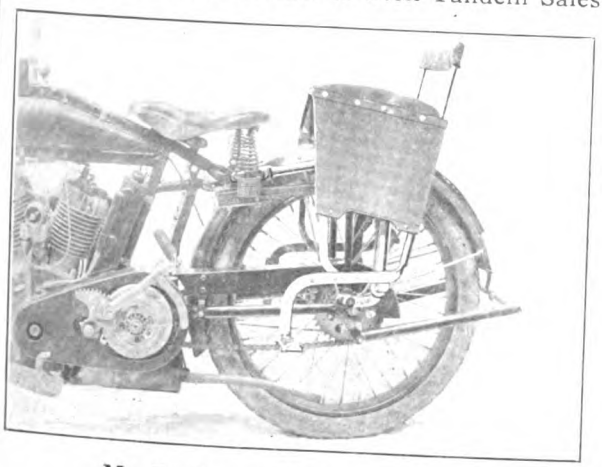
New Price $11.00

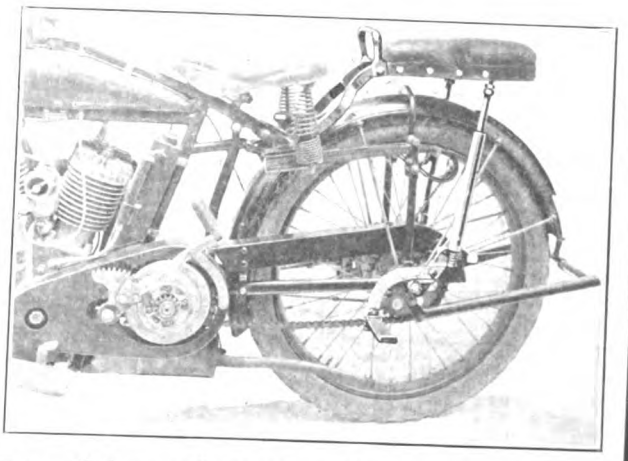




Stoll Tandems have always embodied big value for the money;—they have been continually improved during the past six years, with the idea in mind, of greater comfort to the passenger, and better service to the rider. Today they have no equal anywhere for the money.

To the great comfort feature;—the fine construction, and the fact that they are being sold on a basis of complete satisfaction to the rider and the dealer and jobber, we believe is due the rapid and constant increase in Stoll Tandem Sales.





Mr. Dealer, we have liberal trade prices to offer you. Take a minute to write us today, or see your jobber. Practically all of the leading jobbers now stock Stoll Tandems.

CYCLEMOTOR CORPORATION
Arlington Bldg. Rochester, N. Y.

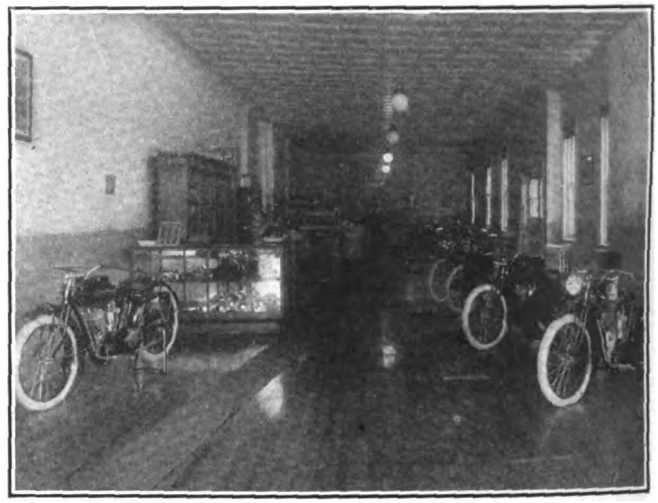
WHEELING DEALERS ARE PLEASED WITH RESULTS OF SHOW

WHEELING, W. Va.—That the exhibits of the various motorcycle dealers at the recent automobile show paid well, is evidenced by the sales which can be directly traced to the displays. Wesley House, Indian man, made four direct sales of Powerplus twins, one of which was with electric equipment, while Earl Braunlich, handling the Harley-Davidson, sold and delivered seven of the three-speed Silent Grays.

T. A. Hoge sold one Thor twin, a Thor combination, a big valve Excelsior, two three-speed Excelsiors, and another X with Cygnet Rear Car. In accessories, practically all the exhibitors did a good business.

SPOKANE, WASH.

THE FALLS CITY CYCLE COMPANY is out after commercial users these days, as the new Harley-Davidson sidecars and sidevans are ready to be passed out to customers. The firm is finding a ready market for these cars among merchants who have to make quick deliveries to all parts of the Inland Empire.



Attractive Interior of Belt-Franklin Motor Co., Indian Agent at Columbus, O. Note Hardwood Floor and Runners

COLUMBUS, O.

THE FRANKLIN RUBBER COMPANY, located at 265 North Fourth street, has taken the Central Ohio agency for the Excelsior. This machine was formerly handled by the Franklin Cycle & Supply Company.

The territory covered consists of three counties in the central part of the State. Prospects for the season are exceptionally bright.

O. C. BELT, of the Belt-Franklin Company, Central Ohio, agent for the Indian, has been busy these days uncrating Indian Powerplus and Featherweights and turning them over to purchasers. Belt believes that 1916 will be at least 50 per cent. better than in 1915.

PATERSON, N. J.

T. ARMSTRONG, of 16 South Second street, this city, has taken the 1916 representation for the Reading Standard for Paterson and vicinity. He formerly managed the Flying Merkel agency in this city. Armstrong is well known in Passaic and Paterson and has already started on a brisk campaign to popularize the big brown twin in this section.

REFLEX

BUILD YOUR SPARK PLUG BUSINESS ON A QUALITY BASIS

Don't take chances with your good will account any more than you would your bank account. When your customer asks for "Spark Plugs" your one best chance to cash in on his future business is to **sell him a Reflex.** Tell him they are standard equipment on Henderson Motorcycles, White, Winton and other high grade cars —built for the motor car owner who demands a better plug than usually furnished.

EVERY REFLEX PLUG IS FULLY GUARANTEED

Our famous Gold Bond Guarantee is packed with Every Reflex Spark Plug. There is a Reflex for every type of motor. Every one is compression tight and all are made with Cromite porcelain —the strongest heat resisting insulator known.

FREE—A REFLEX PLUG TO EVERY DEALER

With no cost whatever we want you to prove REFLEX superiority from your own experience. We want you to investigate the **inbuilt quality**—the methods of construction used that make Reflex Plugs better than the average type. Write us on your letter head—tell us make of your car and we will send you a Reflex exactly suited to that car—FREE OF CHARGE.

THIS WILL BE THE BIGGEST SEASON OF ALL

More touring will be done this year than ever before. More spark plugs will be sold than any time in the history of the motorcycle business. Hundreds of Reflex Dealers in every part of the country are controlling the quality business on spark plugs in their community and making a big profit on Reflex Spark Plugs. Don't miss this opportunity to get a REFLEX SPARK PLUG FREE. Write us today—get the details of our plan that helps you sell most plugs with the least effort on your part.

ARE YOU HELPING THE MAIL ORDER HOUSE?

(CONTINUED FROM PAGE 32)

IT is an unquestionable fact that in most towns a sustained advertising campaign—one which would make it possible to run ads at regular intervals during the buying season—is dependent chiefly upon wholehearted co-operation among bicycle agents. Petty dissensions and animosity in local cycle trade circles destroy every hope of united action and lays towns wide open to the selling assaults that are launched through Uncle Sam's letter carriers.

Nothing so delights the mail order man as to see the dealers warring against each other like a lot of Mexican bandits. It prevents any concerted movement to keep business and money in a community.

Chronic knockers fill customers with contempt and disgust for their methods—they drive away business and preclude any chance of checking the inroads of the mail order house's progress.

Some very recent instances of the benefits to be derived from co-operation are found in the constructive work effected by the dealers' associations in Washington, D. C., Binghamton and Buffalo, N. Y. The local merchants buried the hatchet, and decided to aim at larger net profits by plugging, shoulder to shoulder. They have inaugurated combination advertising campaigns; secured the support of their newspapers; prevented price cutting; stimulated interest in cycling by planning races and runs; facilitated the interchange of merchandising efficiency by holding frequent meetings.

The mail order man doesn't like to witness trade associations cropping up all over the country. He's got a big appetite and wants his slice of the bicycle business.

He would rather have dealers continue wallowing in a mud slinging contest—tearing down one another's reputations and knocking rival's products and service to their own disadvantage.

BUT the mail order man isn't such a heluva bad fellow, after all. To be sure, he'll grab every order that he can and kill off local competition with as much relish and vim as a cannibal devouring a Yankee missionary's tender chops.

To the wideawake dealer he performs a distinct benefit—he proves to the local merchants that by persistently and intelligently following up prospects, he is able —though separated perhaps by thousands of miles from his customers—to convince them that his products are just what they want.

If the mail order man can win customers by an effective follow-up system under such a great handicap, then the local dealers who are right on the scene of action, as it were, have a decided advantage—provided they imitate the postage stamp licker's method and keep after every prospect until they make a sale or are satisfied that the man is not really in the market for a bicycle.

THE mail order man is obliged to work entirely through the medium of advertising and circular letters. But the dealer in addition to exploiting these two means of convincing prospects, has the additional advantage of being able to personally solicit business from possible riders.

Whenever the mail order man secures prospect's name you can bet that he puts it right down in his card index file and keeps after him with a series of snappy, compelling letters. And he circularizes prospects for several months before dropping them from his list.

Greatest Dealer's Proposition

ever offered to the Trade!

THE NEW SCHICKEL SALES PLAN

THIS proposition is the FAIREST and MOST LIBERAL ever given to dealers. It makes possible *quick* sales with a big substantial profit on *each* and *every one*. We believe this proposition is the *only* selling plan that shows sufficient appreciation of the dealer's selling efforts and gives him *adequate* compensation and incentive for his best energies and highest ambitions. We attract customers to his store; we give the dealer what has proven a quick and easy seller, and THEN we give him a selling proposition *Never before equaled in liberality!*

Those who have seen our

NEW SPECIAL DEALER'S CO-OPERATIVE PROFIT-SHARING PLAN

say it's the best agency proposition ever offered. If you want a chance at a *good profit maker* write, *right* now—A postal or the coupon will do. *You* can lose nothing by investigating.

Immediate Deliveries!

NEWS NOTES FROM CLUB CIRCLES

JACK-PINES ENTRY BLANKS ARE NOW READY

GRAND RAPIDS, Mich.—"Hap" Scherer, of the committee in charge of the Jack-Pines endurance run to be staged under the auspices of the Grand Rapids M. C., announces that he has just received the first batch of entry blanks from the printer and that riders who wish to obtain them can do so simply by sending a card.

As has already been stated, the big run will be held July 2-3-4, and the course, in addition to taking the contestants through some fine scenic country, will supply enough genuine endurance features to satisfy the most hardened roadster. Applications for entry blanks may be made to Roy O. Chipman, 35 Ionia avenue, Grand Rapids.

FOURTH OF JULY RACEMEET FOR GALESBURG

GALESBURG, Ill.—The Galesburg District Fair Association has received the F. A. M. sanction for its third annual racemeet to be held here July 4. Prizes to the amount of $600 will be offered, and the feature of the program will be a 100-mile event for which the money will be split six ways. In addition there will be special prizes for the riders leading at the 25, 50 and 75-mile marks. There will also be a 10-mile race, with three cash prizes.

In the amateur class at 5 and 10 miles there will be a number of events, including a State F. A. M. Championship. A sidecar race at 5 miles is being considered as an added attraction. Apply to Secretary E. A. Tate, of the Galesburg District Fair Association, Galesburg, Ill., for entry blanks and details.

BIG FIELD EXPECTED FOR EASTER RUN

PHILADELPHIA, Pa.—Members of the Motorcycle Club of Philadelphia anticipate at least 500 machines as entrants for the Easter Run, on April 23. All riders in and around the city have been invited, and the Quaker City dealers have lent their aid to make the affair a success.

The run will start at the clubhouse, Columbia avenue and 33d street, at 8 a. m., and will go to City Hall on Broad street, then east on Market street to the ferry. The run will continue along the White Horse pike to Atlantic City. Return will be made late in the afternoon.

TORONTO MOTORCYCLISTS BEGIN SUNDAY OUTINGS

TORONTO, Ont.—The first of the Sunday outings by members of the Toronto Motorcycle Club has been held, a dozen of the club riders having taken a short "dip" into the country on Sunday, April 9. With the arrival of warm weather, it is expected that these weekly voyages will assume the same popularity which they enjoyed in previous years when every Sunday found scores of club riders on the go from early morning to late at night, the roads in every direction being explored.

LONDON CYCLISTS WORK FOR IMPROVED STREETS

LONDON, Ont.—At a recent gathering of the bicycle and motorcycle dealers of London, Ont., considerable discussion took place relative to the poor condition of all street pavements throughout the city, and a delegation was appointed to wait upon the city council with a view to securing improvement in the street surfaces.

The deputation selected consists of President Walter Gurd, of the London Trade Association; E. Bissett, secretary and treasurer; George Wenige and William Walker.

Ed. Bissett, 338 Talbot street, has secured the local agency for the 1916 Henderson, and is already demonstrating one of the new models.

COLE GOES TO DETROIT

TORONTO, Ont.—Canada has lost its youthful speed phenomenon. Harold Cole, former Canadian motorcycle champion, who has thrilled thousands of Canadian people by reckless riding on many tracks, has migrated to Detroit, Mich., where he has gone to gather in some of the loose shekels which are said to be rolling around on Detroit streets at present owing to war orders.

CORBIN-BROWN SPEEDOMETER

"The Speedometer of Absolute Accuracy"

The Corbin-Brown Speedometer is a typical Corbin product, hall-marked by the Corbin brand of workmanship and material. This no longer requires proof. Its past sales and present popularity clearly indicate the truth of the assertion.

If you are a dealer in speedometers you can select no better instrument; if a purchaser you can equip with no more reliable speed and mileage recorder.

Catalog on request.

"ELISCO"

Light Gauge, Cold Rolled

Steel Tubing

Unequalled for Mechanical Accuracy and Finish

The huge automatic machines used in the "Elisco" process of tube-making combine six operations in one—and insure a mechanical accuracy, and smoothness of finish that is little short of a revelation.

Each of these huge machines receives the coil of cold rolled steel, forms it, burrs, rounds, straightens, smooths, cuts it to length and delivers it ready for inspection and shipment —untouched by human hands.

Our new plant in Cleveland is equipped with twenty of these huge units, with a total yearly capacity of over twenty million feet of tubing—and additional machines are being installed. We are in position to make reasonably prompt delivery on sizes up to 2 inch outside diameter.

Elisco Steel Tubing is furnished in straight lengths or formed to suit your requirements. Let us submit samples and quote prices.

(CONTINUED FROM PAGE 60)

How many bicycle dealers keep a card index or list of prospects? Do you?

How many bicycle dealers follow up every lead they get. Do you?

How many bicycle dealers send out circular letters systematically? Do you?

And how many of them make the most of their big advantage—calling on prospects and personally presenting their proposition?

IF the inactive bicycle dealers want to see the greater part of the retail cycle trade in their town handled by the local merchants, they will have to quit playing the role of fairy godfather to the big mail order houses.

Efficiency will first have to replace the slipshod, makeshift methods so often encountered in bicycle stores. Some modern merchandising ideas will have to uproot the stagnating, ineffectual basis on which numerous establishments are being run.

But that is only another way of saying that the need and interests of the people in a community must be served, before anyone can expect to get their business.

When retail merchants make a consistent effort to land local trade, you'll not find 40 per cent. of the people in a community sending away for their goods to mail order houses.

DETROIT, MICH.

WILLIAM WANDERSEE CO., handling the Harley-Davidson, has received its second carload of machines and already delivered the entire lot. Ten of the "one lungers" went to the Michigan State Telephone Company for use in the trouble department. Fourteen more singles have gone to the Detroit police.

HARRY SVENSGAARD SALES CORPORATION men are being kept busy these days in showing the paces of the latest arrival: a 17-3 Excelsior. The salesroom is crowded every afternoon and evening and a number of substantial sales have been made already, although the machine has been in hand only a week.

The Svensgaard people are doing an excellent bicycle business. They received another carload of 233 bikes a few days ago, to replace a cargo which disappeared like wheat cakes before a hungry boy a short time ago.

LEWIS HARP, handling Emblem and Pope products, has made several deliveries of the little twin Emblem so far, and has prospects for the sale of several more. The big twin Emblems and Popes are also finding a ready sale. Bicycle business is fine, says Harp.

POWERPLUS and Cygnet Rear Car demonstrations and sales are daily occurrences in the tepee of the William Metzger Co. The firm reports a ready call for Indian bicycles, also.

PASSAIC, N. J.

Joseph B. Werner, Harley-Davidson agent in this city, is breaking all records for sales this season. This is his second year with the Silent Gray Fellow and his output is already double that of the entire 1915 season.

LEBANON, PA.

JOHN HULL, representing the Harley-Davidson in this city, recently sold three of the three-speed Silent Grays to local men in one afternoon. The three purchasers are all seasoned riders and invariably ride the same make each season.

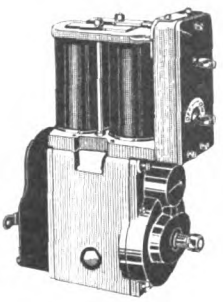
REMY

Motorcycle Lighting-Ignition System



Ride where you will and stay as long as you like—there's no need to hurry back before darkness sets in if your motorcycle is equipped with the Remy Lighting-Ignition System.

Always, at every hour of the night, the trusty Remy is on guard—with a flood of light at your instant command to safely guide your way.

A turn of the switch will give you the brightest road to travel—a steady, non-failing intense white light. In addition to light, the Remy Lighting-Ignition System furnishes strong synchronized, reliable ignition and power for your horn.

The Remy is always ready to work—and it is positively trouble-proof.

Ask any Harley-Davidson dealer to demonstrate the Remy System. Service stations almost everywhere.

There Are Two Sides to Your Business Letters

There is your side—and there is the other man's side.

Are you sure your proposition is presented from his side and not from yours?

If you are not a correspondence expert, if you have not studied profitable letter writing, you are probably not getting the returns you should from your letters.

The average motorcycle or bicycle dealer is too busy handling his merchandise or customers to properly attend to his correspondence. Yet the dealer who does send out *real* business letters, accomplishes results that would otherwise necessitate personal calls.

We will prepare a series of letters for you, to fit your own special conditions. These letters not only increase the sales of motorcycles, bicycles and Blue Streak tires, but enable you to speed up slow-moving goods, collect money, create good will, land new orders, bring in new customers, combat local and mail order competition, turn over stocks quickly, win confidence, develop re-orders and build up a steady, profitable trade.

We prepare the letters for you complete, ready to sign and mail. There is no bother on your part. The service includes letterheads and envelopes in colors, with your own name on them, also stamps and stamping, filling in your customers' names, addressing, etc.

The cost to you for all this is only a penny apiece, plus the postage. But the *Goodyear Letter Service is FREE* if it does not repay its cost to you in increased business. Don't overlook this offer. Other dealers have already ordered over one million of these letters. Remember—it is a selling plan that is producing more sales for hundreds of dealers at a trifling cost.

BLUE STREAKS

A Balance In Your Favor

Do you think the motorcycle manufacturer does not know which tire gives the best service and which way the wind of popular approval is blowing?

Three out of every four new motorcycles manufactured this year will carry Blue Streak tires.

This is a pretty strong preference for Blue Streaks. But these tires won their way to this extraordinary position because of their actual performance.

When you know that they are the choice of the majority of riders and every leading motorcycle manufacturer, think how much harder it is to sell any other tire.

Don't retard longer the growth of your tire sales and the satisfaction of your customers.

Write us today in order that we may send you our complete plan for cashing in to the greatest possible extent on Blue Streak popularity.

"Never Been Off the Rim"

Think of it—

For two years the United States Motorcycle Tire referred to never gave a moment's trouble.

We have records of mileages that seem almost staggering, but here is one that is remarkable for this reason,—that in two years' constant service it was "not punctured, and the fabric is not yet worn in the least."

We have the tire—we had to see it to be sure of our statement.

Perhaps you may not get as wonderful service from United States 'Chain' Tread Motorcycle Tires, but you are certain of remarkably good service, as thousands of owners attest.

M. M. A. TO WAGE NATION-WIDE CAMPAIGN OF EDUCATION IN BEHALF OF THE MOTORCYCLE

Keen Students of the Trade Situation Report at Springfield Meeting That Time Is Ripe to Concentrate All Forces of the Industry Upon Drive for Proper Recognition of Power Two-Wheeler; H. S. Quine Points Out Opportunities in Commercial Field and Touring Also Receives Favorable Consideration; Manufacturers to Co-operate with the F. A. M.; Trade Visitors Inspect the Hendee Plants; Next M. M. A. Meeting Booked for Milwaukee, June 14

SPRINGFIELD, Mass., April 17.—The spirit of "100,000 motorcycles in 1916" dominated and helped to make unusually interesting the quarterly meeting of the Motorcycle Manufacturers' Association, held in Springfield, last Wednesday. A determination to take immediate advantage of very favorable trade conditions throughout the country was evident, and it is safe to predict that the immediate result of last week's meeting will be a country-wide enthusiasm, of a most practical kind, over every phase of the trade and the sport.

To be more specific, the motorcycle manufacturers, with the expected co-operation of the accessory concerns, are about to inaugurate a campaign similar to that recently started by the Million Bicycles Committee. A special endeavor will be made to enlist the aid of the daily press on a scope never before attempted. In this campaign, special attention will be paid to the adaptability of the motorcycle to commercial uses. Finally, a committee of the Motorcycle Manufacturers' Association was appointed to co-operate with the officials of the Federation of American Motorcyclists, to the end of making the organization stronger and more influential, principally through the encouragement of track and road competition, and of touring.

The meeting was featured by an address delivered by H. S. Quine, of the Goodyear Company, in the course of which Mr. Quine told what the Million Bicycles Committee had already accomplished, and some of the things which it intends to do in the future, and recommended that a similar promotion work be undertaken by the motorcycle manufacturers.

Mr. Quine told of some of the results of the investigation undertaken recently by his company, to ascertain just what were the conditions affecting the motorcycle trade and sport. He emphasized the fact that probably the chief obstacle to rapid progress was the attitude of the press and general public, and suggested ways and means to combat the forces which were hurting the industry. A number of excellent suggestions were also made by S. A. Falor, of the same company, based upon keen observations.

THE meeting was presided over by J. W. Henderson, of the Henderson Motorcycle Company, of Detroit. The others present were Messrs. Hendee, Weschler and Jackson, of the Hendee Manufacturing Company of Springfield; Alexander and Quinlan, of the Cleveland Motorcycle Manufacturing Company, Cleveland, Ohio; Hardin, of the Westfield Manufacturing Company, Westfield, Mass.; Schack, Emblem Manufacturing Company, Angola, N. Y.; Treat, Schickel Motor Company, Stamford, Conn.; Huffman, Davis Sewing Machine Company, Dayton, Ohio; O'Hare, Aurora Automatic Machinery Company, Chicago, Ill.; Arthur Davidson, Harley-Davidson Motor Company, Milwaukee, Wis.; W. V. C. Jackson, A. O. Smith Company, Milwaukee, Wis.

Horace Huffman, of the Membership Committee, reported that the Reading Standard management had promised to come into the Association in the near future, and that the Miami Cycle & Manufacturing Company would in all likelihood do likewise. In view of the Association having made a satisfactory proposal in regard to legal action, Mr. Jackson, of the A. O. Smith Company, withdrew his resignation. His so doing made a big hit with the other members of the Association. The secretary was instructed to invite the Cyclemotor Corporation, of Rochester, to join.

Frank J. Weschler, of the Traffic Committee, solemnly reported that the railroads had promised normal service in three years! At the same time conditions were not quite so bad a few months ago.

Show Manager A. B. Coffman announced that the Chicago Show would be held at the Coliseum from November 13 to 18, inclusive, and the New York Show at Madison Square Garden, from December 4 to December 9, inclusive. The rental charge will be 75 cents a square foot for all exhibitors.

It was the consensus of opinion of those present that the Motorcycle Manufacturers' Association should do everything in its power to actively co-operate with the Federation of American Motorcyclists. The motorcycle manufacturers feel that a live and progressive national organization is an important trade asset, and that a 20,000 membership, with hundreds of progressive clubs promoting competition and touring,

THIS CALIFORNIA HILL BALKED EVERY CONTESTANT

Terrific Grade in Orange County Proved Waterloo of Even the Veteran Rough-Riders; Myron Warner Made the Best Average in Three Attempts With His Indian

By FRANK REED

LOS ANGELES, Cal., Apr. 16.—The largest crowd that ever witnessed a motorcycle event of the kind in southern California enjoyed the hill-climbing program staged in Orange County, midway between Los Angeles and San Diego, today. More than 3,500 people cheered the riders in their attacks on the terrific grade, and 26 participants insured plenty of earnest competition.

No contestant reached the summit of the grade and the winners were picked on a basis of the best average showing made in three attempts. Myron Warner, of Santa Ana, mounting an Indian, was given first place, his best ascent having been 360 feet. DuGranute, on a Flying Merkel, was awarded second place, and Bennett and Hartley Reed, using Excelsiors, were in third and fourth positions, respectively. Roy Artley, Flying Merkel, was given fifth position. All hands furnished plenty of thrills.

The hill is surely a "terror." It starts with a fairly gradual slope of fifty feet and then rises suddenly until it is almost vertical at the top. An excellent idea of the steepness will be obtained when it is stated that the motorcycles were let down with a rope after the partial ascents. There were some narrow squeaks.

DuGranute did some spectacular dismounts backwards, his mount rearing straight up in the air at every ascent. On his last attempt he rolled thirty yards down the hill.

Among the participants who did good work in one or two trials, but who did not qualify for places, were the following: Lem Sahagin, Henderson, 301 feet; E. T. Fletcher, Pope, 258 feet; Hamilton, Harley-Davidson, 268 feet; Ludlow, Indian, 292 feet; Holmes, Harley-Davidson, 290 feet; Breiter, Thor, 251 feet; Moore, Harley-Davidson, 275 feet; Wolters, Excelsior, 283 feet.

Myron Warner's winning Indian was fitted with Goodyear tires, Troxel saddle, Schebler carbureter, Dixie magneto, Duckworth chains. DuGranute's Flying Merkel was a two-speed, 1915 model and was equipped with Goodyear tires, Bosch magneto, Schebler carbureter, Renold chains, Mesinger saddle and used Valvoline oil. Bennett had United States Chain tread tires, Bosch magneto, Schebler carbureter, Coventry chains, Mesinger saddle and used Panama oil.

The dealers who promoted the affair are Buck & Buck, A. H. Small, A. F. Herold, of Santa Ana; F. W. Parsons, of Orange; Carriker & Crowl, of Orange, and M. C. Anlauf, of Anaheim.

SPEEDWAY CLUB HOLDS INITIAL MEETING

Recently-Formed Metropolitan Body Elects at Sheepshead Motordrome and Sets Date For First Meet—Change in Convention Date

SHEEPSHEAD BAY, N. Y., Apr. 17.—The initial meeting of the Speedway M. C., Inc., was held at the Speedway yesterday. There were 250 present, including members, riders and guests. The preliminaries were an election of officers and the following will serve during 1916: Everard Thompson, president; Irving W. Barnard, secretary and vice-president; T. W. Richardson, treasurer; J. Bert Young, manager.

Following this meeting a number of impromptu brushes were held, chiefly by amateur riders. Harley-Davidsons showed their speed in these events, capturing the first four places in three of the sprints.

Club members are notified that the track will be open to them on Sunday, May 21, for practice for the meets on June 4 and July 22. By reason of automobiles practicing on the speedway on April 23 and endurance runs on the three Sundays following, no motorcycle riding will be allowed until the date mentioned above. Further information on this point can be had of Secretary Barnard, 15 Warren street, New York.

Meet on June 4

The meet on June 4 will be in connection with American Liberty Day celebration. There will be 4 and 10 mile open events for pros. Entry blanks can be had from Secretary Barnard.

The New York State F. A. M. Convention will probably be held on July 22 instead of July 4, as the later date will be more convenient for the up-state riders and others.

PROMINENT VISITORS TO WESTFIELD FACTORY

WESTFIELD, Mass., Apr. 18.—After the meeting of the Motorcycle Manufacturers' Association in Springfield, at which Mr. L. D. Harden, sales manager, represented the Westfield Manufacturing Company, the home of the new Pope three-speed was visited by Mr. T. W. Henderson, of the Henderson Motorcycle Company, Detroit; Mr. W. V. C. Jackson, general manager of the A. O. Smith Company, makers of the Smith Motor Wheel at Milwaukee; Mr. Treat, of the Schickel Motor Company, Stamford, and Mr. A. B. Coffman, president of the F. A. M.

The visits of these well-known gentlemen concludes a period that is remarkable for the prominent visitors to the Westfield plant. Among these are J. R. Williams, of the W. C. Robinson & Son Company, Boston, Mass., Chas. Krebs, Pope Motorcycle and Bicycle dealer in Newark, N. J., S. Rosenthal, of the Dominion Cycle Company, distributor of Pope-made bicycles in Montreal, Canada, Joseph S. Gentle, Pope dealer in Philadelphia, Pa., Clinton E. Tripp and Fred S. Jones of Beverly, Mass.

GRAND RAPIDS ON RACING CIRCUIT

Meet Will be Staged by Interstate Association on June 21, and If Successful Another Speedfest Is Scheduled for July 23

GRAND RAPIDS, Mich., Apr. 18.—H. S. Robinson, treasurer of the Interstate Motorcycle Racing Association, and George Newkomb, a director of that body, have completed arrangements for a race meet of professional motorcycle riders here on June 21.

A contract has been closed with representatives of the West Michigan State Fair Association for the use of the mile track at the fair grounds at Comstock Park; and it is proposed to secure prominent professional riders for these races. If the event proves a success, a second meet will be held July 23.

For several years the association has been staging races, but this section of the state was never favored before. According to Robinson, a circuit of mile tracks has been arranged for this season to include Grand Rapids, Kalamazoo and Detroit, Cincinnati, Cleveland, Columbus and other cities. A circuit of half-mile tracks is also planned.

Considerable interest in the coming event has already been evinced by local riders and several members of the Grand Rapids Motorcycle Club contemplate entering the simon-pure events. Both classes will be well represented.

INDIAN RIDER OUT TO COMPLETE 24,000 MILES

ASHEVILLE, N. C.—Van Buren Bostick, an Indian rider of this city, intends to complete 24,000 miles before May 1, 1917, if he can keep up his touring schedule of the past two years. He rode his 1915 Indian for 11,085 miles between April 1, 1915, and the same date of the present season, competing in all the big endurance runs and hill-climbs in the Southern Atlantic States during that period. Last May he rode from Asheville to New York, 960 miles, in five days, during three of which it rained. He used 16 gallons of gasoline, averaging 60 miles per gallon. The return trip took six days.

NINE INTERESTING SIDELIGHTS ON THE WEEK'S NEWS—COVERING BOTH TRADE AND SPORTING PHASES

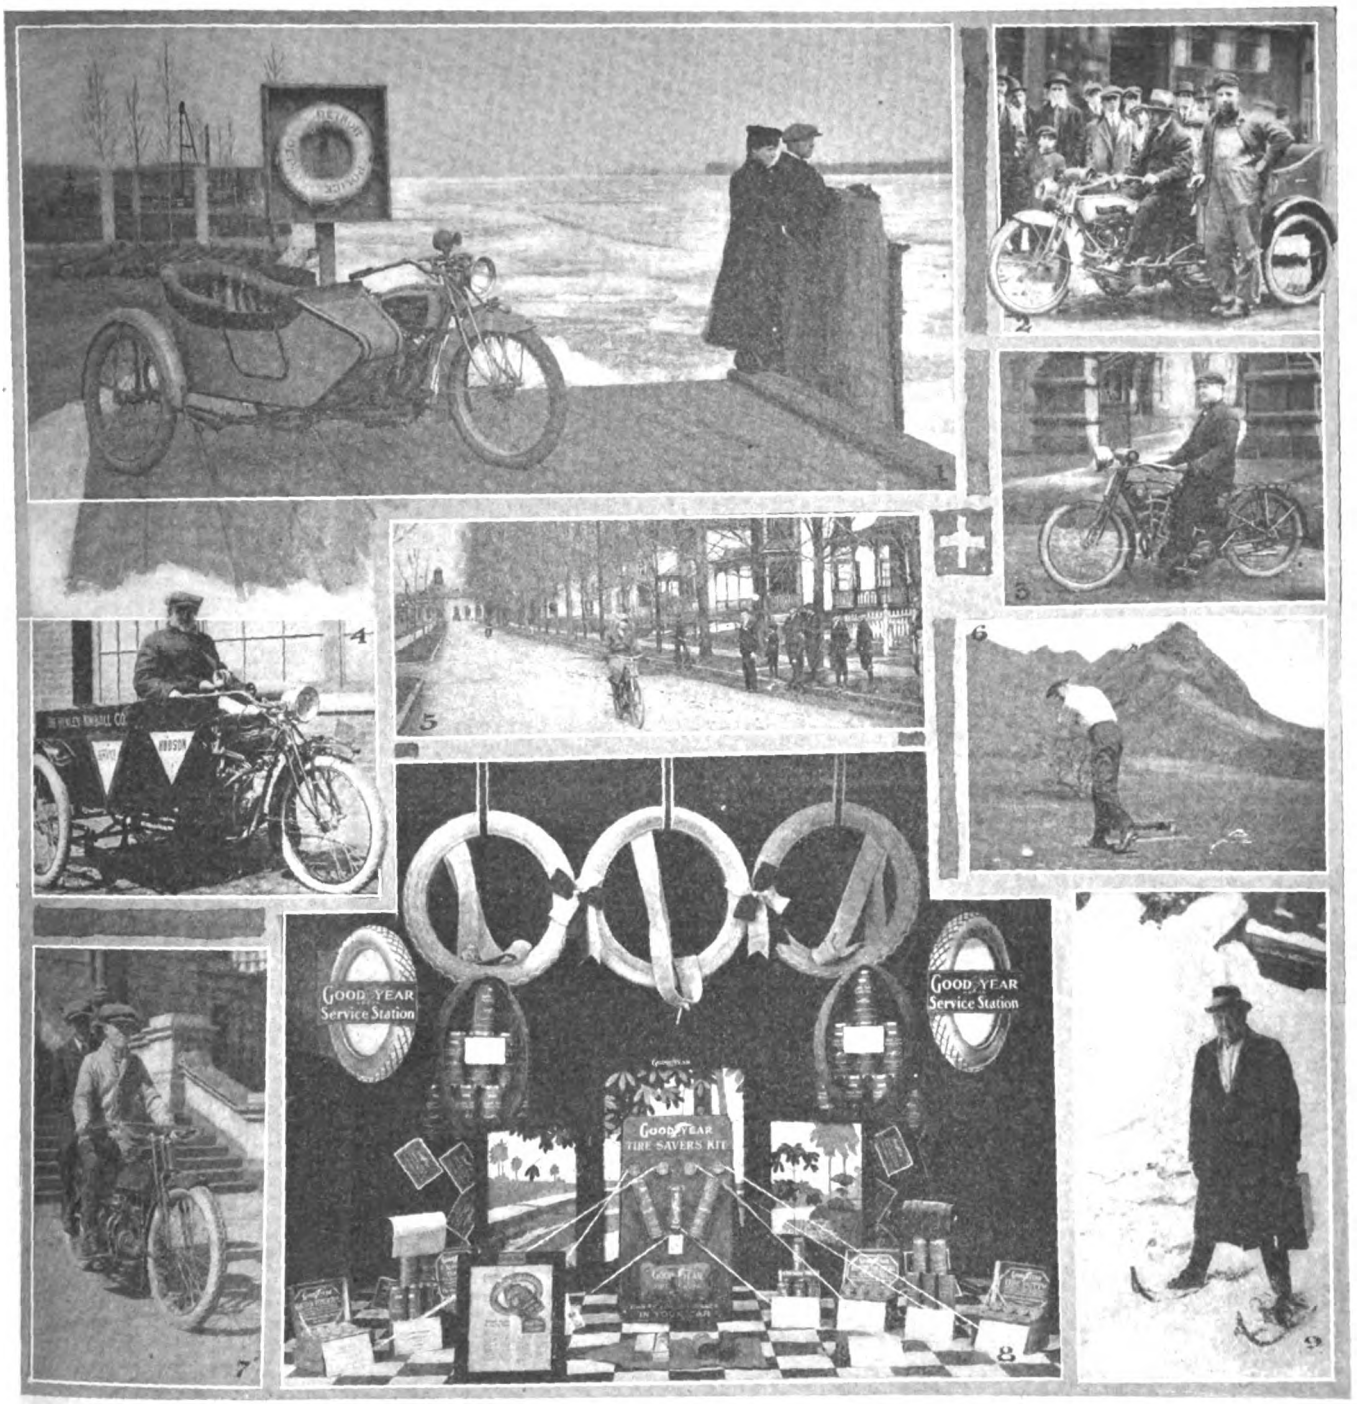

PHOTO number 1 shows a pair of Detroit, Mich., enthusiasts with Excelsior and Pullman sidecar, watching the ice clear out of the Detroit river. The picture speaks volumes for the consistency with which the Detroit riders make use of their passenger outfits. No. 2, an Emblem enthusiast who had a Cygnet rear car attached at the headquarters of the New York Sporting Goods Co., New York City, and went away happy. 3, Joseph Chiara, proprietor of the Harrisburg (Pa.) Motorcycle Exchange, enjoying a Sunday spin on his Reading Standard demonstrator. 4, Indian sidecar outfit sold to the Hudson motor car branch in Boston by George N. Holden, Wigwam representative in the Hub. 5, Miss Bongartz, a youthful booster of Kingston, N. Y., trying out her new Miami Power Bicycle. 6, "Cannon-Ball" Baker taking advantage of a friendless golf ball on the links of the Country Club at Honolulu, H. I., on his way home from Australia. As a golf-player "Bake" is a first-class motorcyclist. 7, Lawrence Fleckenstein and B. Bruggerman, of Denver, snapped aboard a Henderson four. "Fleck" is a racing star and also manager of the service department of the Rocky Mountain Motorcycle Co., in Denver. Bruggerman manages the company's retail store in Denver. 8, Unusually striking window display arranged by the Goodyear experts in the educational series now being worked out for the benefit of dealers throughout the country. 9, "Diamond Louie" Thoerner, salesman for the Goodyear Tire & Rubber Co., who has used snowshoes in covering some of his territory in Oregon.

MOTORCYCLE GUARDSMEN IN MOVIE THRILLER

Indian-Mounted Squad Show Serviceability of Power Two-Wheeler in Sham Fight for Motion Picture Concern—Chase of Villa Featured

OMAHA, Neb.—The motorcycle squad of C Company, Nebraska National Guard, recently showed what war would look like on their Indians for the benefit of a motion picture concern and a large crowd of interested spectators. The riders first charged up a bank and, after passing the crest, went into action as infantry. Then dispatch riders were sent around a field with messages. Finally a scene purporting to be the invasion of Mexico and the pursuit and capture of Villa was staged.

The Omahan who represented the guerrilla chief was rounded up finally against a high bank and fought desperately, but was eventually brought down by rifle fire amid the cheers of the onlookers. The arrangements for the demonstration were made by Captain I. V. Todd and Samuel E. Boord, of the Omaha Bicycle Company. The film was taken by a Chicago concern.

On all sides the affair was considered a fine demonstration of the serviceability of the motorcycle for campaigning and preparedness for service on the part of the motorcyclists.

UNCLE SAM TAKES FIVE MORE HARLEY-DAVIDSONS

MILWAUKEE, Wis., April 15.—The Harley-Davidson Motor Company has received an order from the United States War Department for five twin three-speed twins and four sidecar gun chasses to be delivered immediately. The War Department has ordered that the machines and gun carriages be sent to the arsenal at Springfield, Mass. Deliveries were made in accordance with the order.

These five motorcycles bring up the total of Harley-Davidsons in the service of the War Department to 29. The other 24 were at or over the Mexican border before April 1.

FIRE DOES NOT HOLD BACK SILVEX PRODUCTION

NEW YORK, Apr. 14.—There will be no interruption in the business of the Silvex Company, maker of the Bethlehem Five-Point sparkplug, in spite of the damage caused by the recent fire in its factory. President Edward H. Schwab, of the company, in a recent interview, assured the trade on this point and further stated that even when the fire was at its height the company was making arrangements with a neighboring factory to continue the manufacture of Bethlehem plugs.

The arrangements were carried through with the greatest expedition and the trade has the company's assurance that there will be no delay in deliveries. On the contrary, owing to the new arrangements, manufacturing facilities have been greatly increased.

LAMM BROS. ADD BUILDING AND NEW MACHINERY

BALTIMORE, Md.—Lamm Brothers, makers of motorcycle clothing, have added another building, at 337 North Gay street, to take care of the increase in business. Over 40 new machines have been installed and these will be running within the next few weeks.

When the machines are in operation, the firm will be in a better position than ever to always have a full stock of products on hand for immediate delivery.

NATIONAL COIL CO. PUTS ON NIGHT CREW

LANSING, Mich.—To meet the requirements imposed by large demands for National magnetos and other ignition products, the National Coil Co. has put on a night force. The prospects for a large business in the Midget high-tension magneto, in particular, have made it necessary to increase the capacity of the plant in the near future. At present, however, the addition of the night force will relieve conditions, and while no definite action has been taken toward additional buildings, it is only a question of time before they will be erected.

New machinery has been ordered and as fast as it arrives it is being installed and additional help taken on to operate it. With the orders now on hand, a steady and increasing production will be needed for the next twelve months.

NEWARK BOYS GIVE WELCOME TO BAKER

Visitor Had "Dixie Dan" Walls and Jack Neis, of the Splitdorf Electrical Co. as a Bodyguard, and They Made His Visit a Busy One

NEWARK, N. J., Apr. 12.—The one and only Erwin G. "Cannon-Ball" Baker, he of Indianapolis, Ind., was in town today, and while here stopped in to see Walter Goerke and the rest of the boys. He was the guest of the Splitdorf Electrical Co., and with "Dixie Dan" Walls and Jack Neis was whisked about the city in the big gray Stutz that is the pride of Mr. Curtis, the "big boss." "Bake" managed between times to relate some of his experiences while in Australia.

In commenting on the recent lowering of his Hobart-Launceston record, Baker says that the ride was made in the opposite direction to the one he took and that heavier grades are encountered on the Hobart-Launceston ride. He rode the first 53½ miles of this trip in one hour flat and 40 miles from the finish lost the air-shutter of his carbureter, slowing him down at least 10 miles to the hour.

Baker made three attempts at the 24-hour record before he shook off old Colonel Jinx. The first ride ended in the 375th mile, due to a broken rear spring support, when he was clocking off 33.5 mile laps in 36-38 minutes each round.

His second start was a series of mishaps, and at one time his machine caught fire, but including 5½ hours of "time out" he made 930.2 miles, or at the rate of 50 m. p. h.

His third attempt was successful, as is well known, but he rode for 6 hours in a gale of rain, rolling up 1,000 miles in 21 hours and 3 minutes. Baker says that his running time actually bettered this by 15 minutes, but "what's a quarter of an hour between friends?"

"Dixie Dan" Walls emphasized the fact that those six hours of rain riding were done without a bit of fuss from that little "spark box" he so ably advertises.

GLIESMAN RIDING UP-STATE ON POWER BICYCLE

NEW YORK, April 18.—The accompanying photograph introduces Harry A. Gliesman, eastern sales representative for the Miami Cycle & Mfg. Co., on the Miami Power Bicycle with which he has been humming hither and thither of late on visits to dealers throughout the Metropolitan District. "Happy Harry" swears by the little fellow and asserts that if he can get a dealer's eye long enough for a demonstration the contract is as good as signed.

H. A. Gliesman

Gliesman started a day or two ago for a three weeks' trips on his Power Bicycle to up-State points, and believes that Spring freshets or other road-demoralizing influences will have to go some to hold him up. One of Harry's stunts is to write a small figure eight with his machine with only one hand on the bars, and it has been rumored that he contemplates handling his signature in the ame way when the roads are a little better.

STEWART-WARNER BRANCH TO MOVE MAY 1

MINNEAPOLIS, Minn.—On May 1 the Minneapolis branch office of the Stewart-Warner Speedometer Corporation will move into its new quarters at 1309 Hennepin avenue. This is an ideal building and modern in every respect. The new quarters will give excellent facilities for continuing the very efficient service this branch has been giving the trade throughout the Northwest. The building is 27 feet by 144 feet and has a white tile front with a very handsome, up-to-date show window.

GEORGE ELLIS WILL ESSAY SEVEN-STATE RUN

New York F. A. M. Commissioner Will Start from Metropolis on May 29 and Attempt to Cover Route of 806 Miles in 33 Hours of Continuous Riding; Unfamiliar with Most of the Roads

YONKERS, N. Y., April 18.—George A. Ellis, State F. A. M. Commissioner, will start alone on an endurance run through seven states—a total distance of 806 miles—on May 29. He will be in the saddle continuously until he returns to his point of departure. Ellis expects to complete the trip in 33 hours.

"The run will be a test of both man and machine," said Commissioner Ellis last Monday. "I will get under way from Columbus Circle, New York, at 9 a. m., May 29, and will ride through Troy, N. Y., Bennington, Vt.; Greenfield, Conn.; Concord, N. H.; Portsmouth, N. H.; thence to Portland, Me., returning to Portsmouth and on down to Boston, Providence, R. I.; Hartford and New Haven, Conn.; then back to New York City.

"In essaying this 'seven state run' I hope to set up a record never before attained by an amateur rider. I am familiar with all roads up to Troy, but know little of the highways after that point, except for the stretch from Hartford to New York. In making out my schedule I have allowed three hours for unavoidable stops such as replenishing my supply of gasoline and oil, and I figure that if I average 27 miles per hour for thirty hours, I will cover the course in 33 hours."

Ellis is not yet decided as to what make of motorcycle he will use on this run, but it is quite probable that it will be an Indian—the make which the Yonkers rider has used in the past. He has stated definitely, however, that his mount will be equipped with a Splitdorf magneto and Goodyear tires.

"Many experienced riders with whom I have spoken concerning the proposed run," continued Ellis, "believe that I am going to fail. I've got a stiff fight ahead of me in covering the seven states, and shall begin training immediately. Thirty-three hours in a saddle is going to prove a gruelling test, but I'm out for a record and I think I'll make it."

Commissioner Ellis states that he is not desirous of having an escort on the run, though he would be glad to have his friends see him off.

24-HOUR RUN FOR INDIANA F. A. M. PROGRAM

This Contest Will Be the Top-Notch Feature of the State Convention Doings at Indianapolis in June; Hard Course Promised

INDIANAPOLIS, Ind.—The officers of the Indiana F. A. M. have decided to hold another 24-hour endurance run, through southern Indiana to Louisville and return, in connection with the State convention in June. Most of the course, which will be close to 350 miles, will be through hilly and sandy country.

The tentative route as laid out by State Commissioner Jack Carr is as follows: Indianapolis to Martinsville, to Bloomington to Bedford, then through the wilderness of southern Indiana by way of New Albany, to the Kentucky capitol. One hour will be allowed at Louisville for lunch, and the return trip will be made via Madison, North Vernon, to Indianapolis.

"Cannon-Ball" Baker, Johnny Merz, Ivan Jacobs, Harvey Bernard, Otto Sommers, Dan Reinhardt, Frank Irish, William Spangler, George Spangler and several lesser lights have already entered the big affair.

A pathfinding party will cover the course in the next week or two to lay out the hardest possible course for the riders. When they have finished the route decided on it will contain some of the thrills of desert races, together with many of those expected in the northern Michigan run. This means lots of sand.

Entry blanks will be mailed inside of the next month to all the factories and to the best riders in the country.

CROTONA CLUB IS READY FOR ANNUAL RUN MAY 14

BRONX, N. Y.—Plans are complete for the second annual endurance run of the Crotona M. C., which will be held Sunday May 14, with May 21 as a rain date. The course is from the Bronx to Greenwood Lake, to Sussex, to Monticello, a distance of 111.8 miles, for the morning run.

The contestants will leave Monticello for the homeward run at 12:45, and will pass through Cuddebackville, Central Valley, Crow's Nest Junction and Newburgh, on the way back to the Bronx.

The entry fee is $2, for solo, tandem or sidecar, and entries should be mailed to Ben Goldstein, care of the Crotona M. C., 2148 Mapes avenue, Bronx. Application for entry blanks and general information can be made in person at the clubhouse up to 8 p. m., May 13.

SURRE UNDERGOES OPERATION

ERIE, Pa.—W. J. Surre, sales manager and second vice-president of the Continental Rubber Works, underwent an operation at a local hospital for the removal of his tonsils on April 6. He remained at the hospital overnight, rallied quickly from the strain of the operation and returned to his home a few days later. On Monday, April 10, Mr. Surre was back at his desk.

GALE JOINS SCHICKEL AGAIN

STAMFORD, Conn.—M. E. Gale has again joined the staff of the Schickel Motor Co., and will take charge of special work in connection with the company's plans for increased production and business during the present season. Mr. Gale's cross-country trip last year with a Schickel "Big Six" and a Schickel lightweight has brouhgt highly satisfactory results, and the experience he gained, combined with his general reputation as a motorcycle booster, fits him well to assist in the present Schickel campaign.

WILLARD ADVERTISING MANAGER

CLEVELAND, O.—E. S. Baldwin has been appointed advertising manager for the Willard Storage Battery Company.

U. S. TIRE WINDOW DISPLAYS DRAW CROWD

Layouts at Big Tire Headquarters in New York Show Rubber Products and Crude Article Amid Attractive Surroundings

NEW YORK.—One of the most effective window displays that have ever been seen in this city is that of the United States Tire Company, at 1790 Broadway. There are five displays in all, each one being entirely separate and of distinctive power in its conception and in treatment of the product exhibited. The whole produces a most pleasing effect with its atmosphere of Spring and its educational value. Its attractive power is evidenced by the crowds which gaze admiringly at it.

The first window shows a fisherman engaged in landing a trout. The angler is under a spreading vine and is fully equipped with rain- and storm-proof clothing. The next display has a life-size colored illustration of a U. S. tire dealer engaged in rolling a Nobby Tread casing to his prospective buyer. The central window takes you to the rubber plantations of Sumatra.

In this window there is a large picture of a plantation and directly behind is a huge bale of crude rubber. To the right is a container of the type used by coolies to convey the latex as taken from the tree. An exhibit of the latex in this form is placed at the extreme right. The display includes one of the snakes which infest the plantations, as well as an elephant's tusk. In the background is a magnificent tiger skin.

The fourth window is taken up by a display of miniature and over-sized rubber footwear. In the center of the display there is a pair of boots about 48 inches in height, 30 inches in width and 10 inches long. On each side of the boots there is a large storm shoe placed on a pedestal with a furling of deep blue velvet. In the foreground on each side of the window are a number of miniature rubbers, arranged to form "U. S." with the appearance of their familiar insignia. All audiences are invited to come in an select any pair of the footwear in this exhibit that will fit. In window five we find the Spring maid in her tennis outfit, which, of course, includes a pair of rubber tennis shoes. She is resting under a creeping vine.

DUTCH COMPANY DISCUSSES AGENCY PROBLEM

Well-Known Handlers of Motorcycles and Bicycles in Amsterdam Explain How Incompetents Take Up Agencies and Thus Hamper the Operations of Legitimate Houses

AN INTERESTING letter has just been received from Klisser & Citroen, of 265 Keizersgracht, Amsterdam, Netherlands, in which this long-established firm points out some of the pitfalls which American cycle manufacturers have to guard against in placing agencies for their products with foreign representatives. This is a matter to which **Motor Cycle Illustrated's** Export Bureau has already called attention, and the present communication from the Amsterdam company goes a little further towards sounding a warning. The letter follows:

Discouraging Experiences

"With very much interest we have read in your copy of January 27, 1916, the article, "Selecting Foreign Agents," from a Holland representative, contents of which we can fully approve.

"We beg to inform you that we, in trying to extend our business connections with the United States, have gained a very strange experience with regard to obtaining agencies from American motorcycle and motorcar firms. We found that several motorcycle manufacturers have entrusted their agencies either to people who are totally unknown to the trade, or who are small cycle agents in the country, having, of course, not the connections a large concern possesses.

"We give you some examples: A man living in a small country place, who manufactured in peace time some motorcycles, and who has now had to go under the arms, got agencies from two leading American motorcycle manufacturers. In normal times he did not do a big trade, and now, while he is under the arms, he will not be able to work on an extensive scale for his manufacturers. As soon as the war is over, he will of course again take up the building of his own motorcycles and undoubtedly will stop selling the machines he is importing; yet he will try to keep the agencies he has, to the disadvantage of the American manufacturers.

"An important firm, well established, but only able to sell one or two makes of American motorcycles and cars, took as many agencies as they could obtain, only to prevent their competitors getting those agencies so that there would be no competition. Now, they are pushing only two makes and hold the others out of the market. They will of course sell the small quantity they contracted for with the other manufacturers and will, if possible, try to lead the manufacturers by the nose.

Another Typical Case

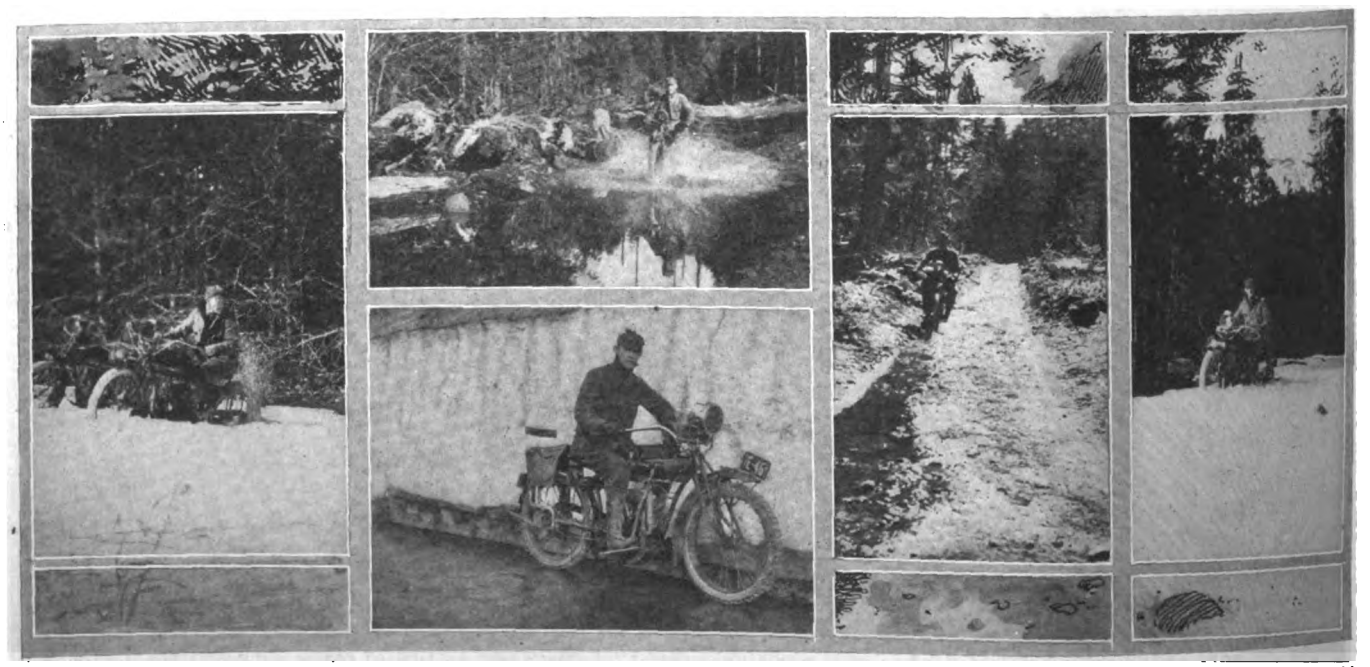
"A stone-worker in one of the country places succeeded in getting an agency from an American motorcycle manufacturer. Not being able to sell the motorcycles himself, he engaged an engine-driver of one of the railroad companies (who is still every day on his engine and who has also a small cycle repair shop). The number of motorcycles this combination will be able to sell will be very small. They will only try to sell direct to the public in their town and in no case will succeed in handling direct with the trade. We could furnish you with many other such examples.

"Having now sufficiently illustrated the situation in our country, and having to inform you that owing to such circumstances we have not succeeded in contracting with leading manufacturers, we are still prepared to negotiate with firms who are free or desirous of making a change or who, unknown in the Dutch market, have contracted with small or incompetent people. We therefore invite correspondence to: Klisser & Citroen, 265 Keizersgracht, Amsterdam, Netherlands."

Excellent References Given

The Klisser & Citroen firm supplies with its letter seven excellent references, and these will be given to any American cycle manufacturer who applies for them. Address **Motor Cycle Illustrated,** Export Bureau, 13 Park Row, New York.

THESE RIDERS CLAIM THE HONOR OF MAKING FIRST 1916 MOTORCYCLE ASCENT OF MT. HOOD



H. B. DuGas and Walter Beardsley, of Portland, Ore., are credited with having made the first motorcycle trip up Mount Hood this spring. Alternate snowstorms and rains had left the roads in very bad condition but the riders managed to get through without serious trouble. They admit receiving a stiff shaking up on the trip, as the accompanying photos would indicate, but feel repaid for their efforts. DuGas rides a 1916 Powerplus Indian, while Beardsley uses a 1913 two-speed.

CONCERTED ACTION ON WISCONSIN ROADS

Highway Boosters Organize in Milwaukee and Plan Systematic Improvements; Milwaukee M. C. Pledges Hearty Support to Movement

MILWAUKEE, Wis., April 18.—In the effort to get definite and concerted action toward better highways in Wisconsin several hundred good roads enthusiasts held a meeting in the Wisconsin Hotel and organized the Good Roads Association of Wisconsin. Temporary officers were elected and plans laid for a campaign that will enlist 25,000 members from among the motorists of the State. When finally incorporated the association will have its headquarters in Madison.

The Milwaukee Motorcycle Club has pledged its hearty support to the proposed organization. President Grier, of the motorcyclists, praised the spirit of the good roads association in these words:

"There is nobody better qualified to pass judgment on the roads of Wisconsin than the motorcycle rider, and particularly if he is a member of the Milwaukee club. During the past four years we have held numerous tours into different sections of the State, and some of the highways encountered were a disgrace to our commonwealth. While the Badger State has been doing some improvement and maintenance work, there still are stretches of popular routes that are impassable after a heavy rain."

State Highway Commissioner J. A. Hazelwood stated that under the present laws of the State and the present system of State aid for road building the State has no control over the place or direction in which roads shall be built, and urged the new association to begin action that will systematize the building of roads. He also urged a change in the law to permit the State to "give as high as 50 or 60 per cent. of aid to counties when the roads built contribute to the completion or extension of a trunk line."

A. R. Hirst, State highway engineer, said that while Wisconsin has spent $15,000,000 on good roads during the last five years and has more than 6,000 miles of permanent highways, there are no uninterrupted stretches of more than fifteen miles in the State.

GIVES REASONS FOR USING MUFFLERS

New Jersey Motor Vehicle Commissioner Issues Statement Regarding Death Rate in Newark and Appeals for Co-operation

NEWARK, N. J., April 14.—William L. Dill, motor vehicle commissioner for New Jersey, has issued a statement in regard to the use of the muffler cut-out in which he points out good reasons for doing away with the open muffler. In the city of Newark, the death rate is about 14 in the thousand, and there are 54,000 houses in the city, averaging eight persons to the house. This means that in one house in 80 there is a human being dying, and Mr. Dill appeals, for this reason alone, to the well-known consideration of motorists for quiet.

These figures do not take into consideration the many cases of sickness, on which exact data are unobtainable. Mr. Dill's point is, however, well taken that in view of the fact that less than 1-10 of a horsepower is used up by a back-pressure in a muffler, the motorcyclist who keeps his cut-out closed in practicing the Golden Rule, in doing as he would be done by. In addition, he will be obeying the State law, as there is a prohibition on the use of the cut-out anywhere within the State.

HAS POWER BIKE AGENCY

LONG BEACH, Cal.—H. Berry, formerly an engineer from London, England, is operating a bicycle store and repair shop at 205 East Third street. He has the agency for the Miami Power bicycle. His son is associated with him in the business.

APPLETON'S COP ON THE JOB

APPLETON, Wis., April 18.—Edward Nelson has been appointed motorcycle cop to ride the new Harley-Davidson purchased by the city. Before Nelson was on duty a week there was a noticeable diminishment of speeding in and around town.

BUSINESS OPENINGS FOR MANUFACTURERS AND JOBBERS

MAUD, Okla. — The Warren-Smith Hardware Co., of Shawnee, has opened a branch store here, and will deal in automobile accessories, bicycles, small tools and lubricating oils.

ANAMOSA, Iowa.—The Weber Hardware Company has just been incorporated with a capital of $15,000. Catalogs requested on automobile accessories, bicycles, lubricating oils, small tools and sundries.

WAUKESHA, Wis.—The Perkins Hardware Company has been incorporated with a capital stock of $20,000, and requests catalogs and prices on bicycles, small tools, lubricating oils and varnishes.

PORT GIBSON, Miss.—Catalogs on automobile accessories, oils and small tools are requested by the Claiborne Hardware company.

MONMOUTH, Me.—N. W. Richardson has taken over the business of Day & Richardson. Catalogs on automobile accessories, small tools and lubricating oils are requested.

RUMFORD, Me.—Clough & Pillsbury have succeeded Frederick Walker. Catalogs on accessories for automobiles are asked for.

PLENTYWOOD, Mont. — Helland-Strand has bought out M. M. Johnson. Catalogs on automobile accessories, bicycles, small tools and oils are desired.

EDGERTON, Wis.—The Hain, Livich & Arthur Company has just been incorporated with a capital of $20,000, and will deal in bicycles, small tools, automobile accessories and lubricating oils.

ELLWOOD CITY, Pa.—The Harbison-Yahn Hardware Co., 522 Lawrence street, has opened with a line of bicycles, automobile accessories, oils and tools. Catalogs are requested.

WASHBURN, Wis.—The D. M. Carson Hardware Co. has just opened up and is looking for good lines in bicycles, automobile accessories, small tools, lubricating oils, enamels and polishes. Catalogs are requested.

MISHICOT, Wis.—The Stelzer & Krieck Co. has been incorporated with a capital of $20,000 to deal in automobile accessories, bicycles, small tools, oils and enamels. Catalogs and price lists are wanted.

FEW RESPOND TO CALL

LOUISVILLE, Ky.—O. S. Wagenhorst, representing the B. F. Goodrich Company, of Akron, Ohio, visited this city recently to secure men for the Akron factories. Business was so good in Louisville, however, that only about 100 answered the advertisements.

On the Pacific Coast

NEWS BREVITIES FROM THE LOS ANGELES FRONT

LOS ANGELES, Cal.—Jim Richardson has left the Pacific Motor Supply Co. to take charge of the business of a Pasadena automobile concern. Jim, who was formerly of the Richardson Cyclery at Redlands, has been one of the best known and best liked fellows in the motorcycle trade in Southern California, and everybody is wishing him luck in the new job.

A. O. Smith, of the Smith Motor Wheel Company, has just arrived in Los Angeles for a visit to various Coast distributors and dealers.

The Los Angeles Motorcycle Club made a run last Sunday to an orange ranch at Covina. Thirty machines turned out and as the rancher turned the crowd loose in the orange grove and told them "to go to it," they do say that the machines had to carry pretty heavy loads coming back.

F. N. Hodge has made a deal with T. E. Berry and the manufacturers whereby he takes over the wholesale distribution of the Miami Power Bicycle in Southern California from Bakersfield and Santa Barbara to the Mexican line.

Hodge was formerly president of the Mercantile Clearing House and has had business relations with Berry for the past five years, during which time he became inoculated with the germ of success which is always overflowing from Berry's genial frame. Hodge has already started to Santa Barbara to get a Miami campaign started. He carries a Miami all ready to demonstrate strapped to the side of his automobile.

Max Stoddard, Red Aldershin, Walter Bradley and John Pendleton, with two other fellows, one riding tandem, were the first into Little Bear Valley this year on five Thors. They had some tough going over the switchbacks, which were badly washed out by the floods, and through the soft mud and snow in the high altitudes.

TO TRY OUT ASCOT TRACK

LOS ANGELES, Cal.—Paul Derkum is arranging to permit several riders to try out the Ascot track to determine its possibilities as a location for a motorcycle race meet.

STILL HAD SOME LEFT

RIVERSIDE, Cal.—Tommy Thompson, the local speed cop, states that he has got 82 miles per hour out of his new Henderson. In a letter to the Henderson Motorcycle Sales Corporation in Los Angeles, Thompson says: "This is the only occasion I had to open her up, and I had some left at that."

OREGON REGISTRATIONS

PORTLAND, Ore.—According to the Secretary of State for Oregon, motorcycle license figures change every day. There were 1,454 motorcycle licenses issued in Oregon during 1915.

BRUNELL HAD PLENTY OF FANCY RIDING

Southern California Miami Power Bicycle Man Plugs Mud and Fords Washouts in Traversing Kite District

LOS ANGELES, Cal.—H. A. Brunell, traveler for T. E. Berry, Southern California Miami Power Bicycle distributor, has been out on agency work in the Kite district for some time. The fact that bridges were washed out and the roads were covered with sand from freshets gave him a good chance to try out the endurance qualities of the little four-stroker.

At El Monte, Brunell struck a bad wash which had been a danger to motorcycles for weeks by reason of the deep mud and sand. He made it to the center, where there was a stream spanned by a single board for a bridge. Brunell tucked the Miami under his arm and carried it over the bridge. At Pomona he demonstrated the mount with one man on the handlebars and another on the rear mudguard to show the strength of the frame.

The Miami agency in Pomona was taken by Fred Weaver of the Pomona Cycle Shop. Weaver came in and got one on Sunday, although the first one was promised for Tuesday.

At Claremont, Brunell had some fancy riding through deep mud, and in San Gabriel had a 200-yard ride through the furrows in a field. This ride convinced C. E. Slack, a rancher of Lamanda Park, that the Miami was just what he wanted, and he bought one on the spot. Between Lordsburg and San Domas, Brunell was confronted with a washout, but found a deep and narrow patch on a hillside among stumps and stones. He rode this successfully and went on.

Brunell says that on a narrow path of this kind a fellow can hold the Miami if he sticks out his foot. He saved a 200-yard detour by riding this path. Between El Monte and Pomona he went through mud that no automobile would attempt and crossed a three-foot stream, partly by riding and partly by lifting the machine slightly in the deeper spots.

KLAPP JOINS PACIFIC MOTOR SUPPLY COMPANY STAFF

LOS ANGELES, Cal.—George A. Klapp has joined the Pacific Motor Supply Co. as salesman. Klapp, who is one of the best known motorcycle salesmen in Southern California and has had remarkable success in putting over police deals, has been a friend of Manager E. Lebell, of the Pacific Motor Supply Co., for years. At present Lebell has no agency for motorcycles, but he has the store and in George Rubsch and George A. Klapp has two star salesmen, so it looks as if something were in preparation for a campaign for the 1917 season. In the meantime, Lebell is doing a fine business in second-hand machines in the motorcycle line and a very heavy trade in bicycles and accessories.

RUBSCH IS BOOSTING THE F. A. M.

LOS ANGELES, Cal.—George Rubsch, head salesman of the Pacific Motor Supply Co., has been handling the duties of F. A. M. commissioner for Southern California, turned over to him by Charles Fuller Gates upon the latter's resignation to leave Los Angeles for a motorcycle trip into Texas, which will involve an indefinite stay.

NOVEL DISPLAY OF PARTS

SANTA ANA, Cal.—Buck & Buck, local cycle dealers, have placed some ordinary gem baking pans in their showcases to display springs and other small parts which must be kept in separate compartments. They find that the pans display the contents to advantage and are very convenient in serving customers. Larger parts and those which all riders know are in stock are kept in drawers in rear of the counters.

READY FOR BIG DOINGS BY FRESNO M. C., APRIL 23

THINGS are moving along in fine shape for the big motorcycle program to be staged by Fresno, Cal., dealers and riders on April 23, and just by way of indicating the generous spirit with which the arrangements are being made, the following letter from George Wood, of the committee, is interesting. Here's what "Woody" says:

"Shoot it to the boys hard that we are going to pull off one grand big time on April 23. The doings will be staged at Riverview, ten miles north of Fresno, on the San Joaquin river. We want every motorcycle rider to know that he is welcome to come and help us eat our lunch and to take part in the races, hill-climbs and fifty-seven other varieties of fun that will follow the feed. A big dance will close the day's program."

BUSINESS IS FINE WITH JONES SALES CO.

SANTA ANA, Cal.—The Jones Sales Company, which is operated as a branch of the Los Angeles store of the firm's chain of establishments, finds April business in bicycles starting in fine shape. They are making sales of one to four wheels a day. The company has averaged better than one bicycle per day all through last year in this town of 14,000 population.

The store is now under the management of E. H. Nett, the former manager having died a few weeks ago. The machines handled are the Racycle, the Hudson and the Miami.

BIG CROWD WITNESSES METEOR ROCK CLIMB

Garden City M. C. Scores Success With Program in Alum Rock Park and Contestants Make Good Time; Indians Win in Both Classes

SAN JOSE, Cal.—The Garden City M. C. on April 9 held one of the most successful hill-climbing events that has taken place in this part of the state. The site was back of Alum Rock Park, a favorite resort of motorcyclists, but the hill, known as "Meteor Rock," was only recently located as a testing-ground for motorcycles, and is an unusually stiff climb. The grade is nearly 60 per cent, and a short turn has to be made at the bottom, making it impossible to get any starting run. The ground, originally grass covered, has been worn off to soft earth, so that climbing even on foot is a strenuous job. The distance was 200 yards, from a standing start.

Fully a dozen machines of the San Francisco M. C. went down for the occasion, as well as a lot from other Bay towns, and there were probably about 200 gathered in the Alum Rock Park, in addition to a great many people who came in autos. All the motorcycles that essayed the climb made it without trouble, though one jumped through a fence at the top, without damage to either machine or rider. Entries were in two classes, professionals and amateurs, Indian Powerplus riders being first in both.

In the professional class, Ben Torres (Indian) was first, 0:08½; second, Wm. Zettle (Excelsior), 0:09½; third, G. H. Humburg (Indian) and Bob Fritz (Harley-Davidson) tied, 0:10½; fourth, Bud Northrup (Indian), 0:11½; fifth, Ed House (Indian), 0:13½.

C. Roque was first of the amateurs, in 0:09⅞; second, E. Ballyntine (Indian), 0:11½; third, Harry Billings (Harley-Davidson), 0:12¾; fourth, L. E. Eddy (Indian), 0:13.

In view of the attention drawn by this event, it will very likely be repeated.

U. S. TIRE CO. DISTRIBUTES CLUB LOG BOOKS

NEW YORK, N. Y., April 16.—A practical log book, measuring 8 x 10 inches and bound in a durable blue cloth, which is intended for distribution among motorcycle and bicycle clubs, has been gotten up by the United States Tire Company, of New York, and will be mailed to any club upon request.

For each month in the riding season two pages are allotted, so ruled off as to facilitate jotting down a brief summary of the interesting events staged. Several pages are provided to make note of 1916 club records, separate columns being allowed for the date, rider's name, event and remarks.

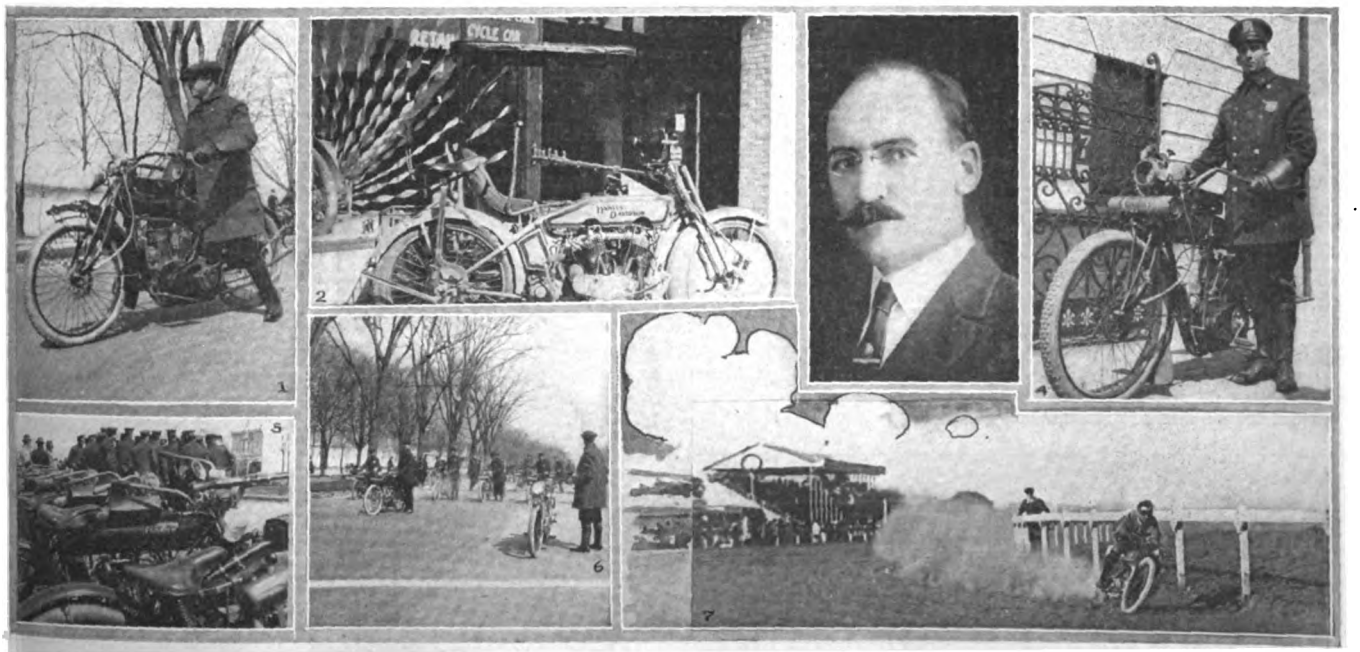
THIS SIDECAR OUTFIT IS VALUED AT $1,000

LOS ANGELES, Cal.—Passmore & Sayre, the Los Angeles retail Harley-Davidson dealers, have just delivered a motorcycle sidecar outfit which breaks all records in the way of value and completeness of special equipment. The machine has been fitted up for a crippled Oklahoma rancher who has been spending the winter in Southern California. Being unable to drive an automobile he has had the motorcycle outfit arranged with special controlling devices, an electric starter mounted in the side-car and every possible device for convenience, comfort and safety of its owner.

The owner, J. H. Booher, of Cleveland, Okla., has paid about $1,000 for the outfit The sidecar was specially built by LeRoy Snodgrass, of the Superior Manufacturing Co., to suit his requirements. As Mr. Booher is crippled in the hands as well as the legs, it was necessary to make the starting devices center in a half circle arrangement on a long bar, with knobs on the top. The combination generator and electric starter of Gray & Davis make has been rewound so that he can reverse the generator sufficiently to allow him to back up whenever he wishes.

There is a tandem seat where the motorcycle rider usually sits and also a tandem seat back of the sidecar. The clutch is in the bottom of the sidecar and the switches and everything pertaining to the electric starter are on the sidecar dash. There is

BROOKLYN COPS IN DRILLS; $1,000 FOR A SIDECAR OUTFIT; A VETERAN AD. EXPERT; THAT ARGENTINA RACE



1. Sergeant Sam Johnston, in charge of Brooklyn (N. Y.) motor cops who are in training for the coming police parade. 2. Special Harley-Davidson sidecar combination for which an Oklahoma cripple paid about $1,000—see description above. 3. E. C. Tibbetts, who completed his 19th year as advertising manager for the B. F. Goodrich Co. on April 7. 4. Officer T. Smyth, of Brooklyn, holder of one-mile police record. He clocked at 1:04⅘ with his one-lunger. 5. Brooklyn motor cops receiving instructions. 6. The Brooklyn coppers in parade formation. 7. How Selmo won the 100-kilo championship race in Argentina on his Henderson in 1:13:16⅕. The story of the race appeared in the April 13 issue.

Digitized by Google

also mounted beside the spotlight a mechanical hand which indicates the direction in which the driver is going to turn, as he is unable to signal with his hands. There is also a device at the rear that shows a sign saying "Stop" as an indication to traffic behind his machine. The gear-shift, instead of being up on the side of the tank, has been moved down within easy reach of the driver's hand. The outfit is so completely and conveniently arranged that it will almost drive itself.

TRADE NOTES PICKED UP IN SAN FRANCISCO

EDWIN F. MERRY, distributor of the Excelsior, is expecting his first shipment of the "17" model machines between April 20 and 25, and meanwhile has his stock well clearned out. He reports a very satisfactory business, and feels highly gratified at the fact that the roads around San Francisco and practically every city on the Coast are full of motorcycles, which he takes to indicate a rapidly growing interest in riding and touring. From his observation he believes there are more machines being ridden than since 1913; while the number of sidecars seen on the roads shows that interest in motorcycles is no longer confined to the young men, but is being taken up by the whole family, which assures a greater growth to come.

A. Freed, of the Pacific Motorcycle Supply Company, reports the receipt of a carload of Indian Featherweights, which went out immediately.

Z. Barton, manager of the Coast branch of the Thor factory, is expected home shortly from a fortnight's visit in Los Angeles.

The municipality of San Francisco is now using 17 motorcycles, in addition to 100 other motor vehicles.

ATTRACTIVE BOOK ON THE OLD NATIONAL ROAD

ONE of the most interesting and authoritative books of touring information that has been issued in a long time deals with the National Road, the most historic thoroughfare in the United States and the strategic eastern link in the National Old Trails and Ocean-to-Ocean Highway. This 96-page offering is from the pen of Robert Bruce and gives evidence throughout of the painstaking attention to detail and the thorough insight into motorists' requirements that have marked Mr. Bruce's work in the touring field for years past.

Mr. Bruce had the co-operation of the National Highways Association in publishing the book, but the subject matter was collected and prepared by the touring veteran himself. It deals with the roads from Baltimore and Washington to Frederick, Hagerstown, Cumberland and Frostburg, Maryland; also the section to Uniontown, Brownsville and Washington, Pa., and the route to Wheeling, W. Va. Included in the book are detailed maps and many photos of points of interest.

The book sells for one dollar and copies may be obtained from the National Highways Association, Old Slip, New York City, or Robert Bruce, Clinton, Oneida County, N. Y.

ELMIRA PROMOTORS GETTING LIBERAL SUPPORT

ELMIRA, N. Y.—The association recently formed in this city to promote automobile, motorcycle and bicycle racing is receiving enthusiastic endorsement from riders and other sportsmen hereabouts, and with such support excellent results are practically assured.

To create public confidence in the ability of the promoters to stage snappy programs, and also to obtain general publicity for the proposition, the association has put on a big four-day indoor circus which has proved a huge success.

GUARD USES FIRESTONES

FIRESTONE tires are fitted on all machines used by the motorcycle auxiliary to the California National Guard in Los Angeles, says a recent bulletin from the Firestone Tire & Rubber Company, of Akron, O. The choice of Firestones for the equipment of these motorcycles follows closely on the heels of the news of two weeks ago that motorcycles of the U. S. Aero Squadron now pursuing Villa were similarly fitted.

WILL HAVE EASTER SUNDAY RUN

INDIANAPOLIS, Ind.—The first run of the new season by the Consolidated Motorcycle Club will be held on Easter Sunday when the members will be joined by other Indianapolis and State riders in a trip to Cataract Falls. Dinner has been arranged for at the hotel on the grounds.

EXPECT 33⅓ PER CENT INCREASE

COLUMBUS, O.—When the representative of MotorCycle Illustrated called upon local motorcycle dealers he was informed that present indications point to an increase of 33 1-3 per cent. for motorcycle sales over the figures of 1915.

FORT WORTH RIDERS FORM LIVE CLUB

FORT WORTH, Tex.—The Fort Worth M. C. has just been organized with 15 members, all of whom are the cream of this city's motorcyclists. Headquarters have been secured at 301½ Main street in a large room which has been nicely equipped for club purposes. Following are the officers: J. W. Cook, president; J. A. Massie, vice-president; E. M. Dunnivant, secretary, and G. J. Cromer, treasurer.

The Fort Worth club is backed by all dealers in this city. President Cook handles the Harley-Davidson. Vice-President Massie the Indian, and Treasurer Cromer the Excelsior. Plans are now being made for a number of club runs to be held on Sundays and holidays.

GOODYEAR ISSUES TIRE REPAIRING MANUAL

ALL phases in the repair of tires are pictured and described in the Goodyear Manual of Tire Repairing, recently issued by the Goodyear Tire & Rubber Company, of Akron, O. In addition to the methods of renewing the life of casings and inner tubes, the book contains a concise description of how to keep accounts and costs and gives specimen tags and other accessories to this end. Every piece of apparatus which can be of service to the repair man is listed. A list of Goodyear branches and agencies occupies one of the back pages. Aside from being a manual of worth, the book is very artistically gotten up.

SAN FRANCISCO M. C. SOCIAL

SAN FRANCISCO.—The San Francisco M. C. held a very pleasant "Hard Time Social" last Thursday night at club headquarters. Nearly all the members turned out and helped to make the affair one of the most enjoyable of the season, and the club received twelve new members.

NEW BRIDGE ON POPULAR ROUTE

SINGAC, N. J.—The old bridge on the Newark-Pompton Turnpike is to be replaced by a new $40,000 structure. The old bridge will be moved to one side while the new one is being constructed. This is probably one of the busiest bridges in this part of the country. In several test counts, it has been found that over three thousand motorcyclists and auto drivers use the bridge every twelve hours.

THIS IS F. A. M. BOOSTING WEEK—DO YOUR BIT!

THIS is F. A. M. Boosting Week—during which the Federation officials count upon making their first big jump in the direction of that 20,000 membership mark. Do your bit. If you are a motorcyclist, come in yourself and bring a friend. The F. A. M. needs you and you need the F. A. M. It's a fifty-fifty proposition, and well worth what it costs.

This week formally opens the big drive for new F. A. M. members, but the good work will go on till the national body has reached a size commensurate with its importance. Jump in and start something at once—and watch the F. A. M. clock in **Motor Cycle Illustrated** next week for the new membership returns.

The Dispatch Rider

AS the Arab is wed to his steed, so the man and the metal are one;
Linked by the lust of speed, pledged to the thing to be done;
Having one end to gain, molded in one desire;
A hand, a heart, and a brain; a tank and some hidden fire!

And it's ride, ride, ride in the sun, the rain and the wind!
It's ride, ride, ride, with never a look behind!
The eyelids are red with fatigue; the bearings are clogged with dust!
Cries the Iron to the Man: "D'ye think we CAN?" Says the Man to the Iron: "We MUST!"

Swift through the quivering air Death from the hill descends;
Leaps from the treacherous snare; lurks where the roadway bends;
Death with the twain doth ride when the parching cylinders fret;
But the throttle is open wide, and the teeth of the rider are set!

For it's ride, ride, ride in the glare of an autumn noon!
And it's ride, ride, ride by the gleam of a wintry moon!
The forehead is streaked with blood; the lubricant's dried to a crust!
Cries the Iron to the Man: "D'ye think we CAN?" Says the Man to the Iron: "We MUST!"

Export Bulletins Concerning Cycles and Accessories

CHILE OFFERS FIELD FOR AMERICAN PRODUCTS

BESIDES the increase in trade there have lately been many other "straws" which seem to point to a very high admiration on the part of the people of Chile for all things American. In some lines this has been so marked as to affect foreigners and Chileans alike; the newspapers and magazines show the North American influence, and many of their illustrations and covers are reproduced from northern periodicals.

Many more young men are being sent to the United States to finish their education than heretofore. In sum and substance, Chile is ready and willing to do business with the United States on a big scale, and it simply remains for American manufacturers to take advantage of their opportunity.

CYCLE ACCESSORIES IN DEMAND

Cortona Giulio, Alessandria, Italy, advises the publishers of this journal that his firm desires to establish relations with American manufacturers of bicycle accessories, particularly of saddles, pumps, lamps, clutches, chains, spokes, tubing, spark-plugs and leather or rubber motorcycle grips. As references are given the Chamber of Commerce and of Art, of the Province of Alessandria, and the Alessandria Branch of the Italian Bank.

IN THE BICYCLE MARKET

F. Masi, General Agent, Place du Cirque, Geneva, Switzerland, upon receipt of a copy of the recently issued Export Number of **Motor Cycle Illustrated,** wrote this paper that he is in the market for bicycles now, and also expects to handle an American make of motorcycle after the war has ended.

LETTER FROM BELGIAN AGENT

We have a letter from Maurice Pire, 31 Wetering Kade, The Hague, Holland, who is a Belgian motorcycle and accessories agent, temporarily living in Holland on account of the war. He was formerly located at Leige, Belgium, and wants to get in touch with American manufacturers of motorcycles, bicycles and accessories for representation in Belgium after the war. He is in position to give good American references.

OPPORTUNITY IN EAST INDIES

CONSULAR reports from the Dutch East Indies state that American trade can be increased in bicycles and oils and greases. It is pointed out that manufacturers and exporters who can supply these articles should get into touch at once with a recently-formed American-Chinese company which has been formed to trade from the Dutch East Indies with the United States exclusively. The name and address of this firm can be had from the Bureau of Foreign and Domestic Commerce, referring to file No. 886.

ANOTHER POWER BICYCLIST

DEFINING SIDE AND REAR CARS UNDER NEW LAW

EDITOR **Motor Cycle Illustrated**: I was rather surprised to note that a question has been raised regarding the definition of a motorcycle with sidecar in the new motorcycle law in this State. I cannot see how the English language could be much plainer to include any and all cars attached to motorcycles than that used in the new law, which plainly states: "A car attached to the side, front or *rear,*" and therefore most certainly includes the Cygnet Rear Car.

As the author of the present law, it was my endeavor to make the definition as plain and as broad as possible, so that there could be no possible question, and in adding the word "rear" I had specifically in mind the Cygnet Rear Car. The fact is that the first time the bill was drawn up the Cygnet Rear Car had not yet been announced, but as soon as it was I had the word "rear" inserted to cover it. Deputy Secretary Parker and Mr. Hugo's secretary, Mr. Osterhout, and I went over the matter thoroughly and the Cygnet Rear Car was specifically mentioned in our conversation, due to the fact that Mr. Osterhout had one of their circulars, and we all agreed that that car should be included in the definition and it was so worded.

The original Cristman Bill of last year had the motorcycle defined as "a vehicle driven by other than muscular power, with one wheel following the other or with a car attached to the side and run on an additional wheel." This narrowed it down to the ordinary sidecar and it can be seen that the present definition is more fair and much broader.

For the convenience of Brooklyn and Long Island riders I have arranged to have a quantity of application blanks at the store, 125 Lexington avenue.

Brooklyn, N. Y. J. A. HALL.

MORE COMMISSIONERS NAMED

H. G. Adams, of Cumberland Center, Me., has been named commissioner for Maine by the Eastern District Vice-President, while Mrs. C. C. Jordan has been appointed State Secretary. Fred W. Stierhoff, of 64 Hemmingway street, Boston, and John MacDowell, of 146 Dedham avenue, Needham, have been appointed traveling commissioners for Massachusetts and the New England states. W. F. Mann, of 356 Columbus avenue, Boston, Mass., and M. M. Counsell, of 36 Railroad street, St. Johnsbury, Vt., have been re-appointed as state commissioners for Massachusetts and Vermont. F. L. Zimmerman, Jr., of 1340 Oakland street, Shreveport, is now commissioner for Louisiana.

GOOD-BYE TO JERSEY TOLL-GATES

HACKENSACK, N. J.—The toll-gate has become a thing of the past in New Jersey. The old Bergen Turnpike has been taken over the Bergen County Board of Freeholders and may now be used free of charge. This road was built in 1802 by private subscription and had been kept in condition by the tariffs since that time. Four gates were on this stretch of road.

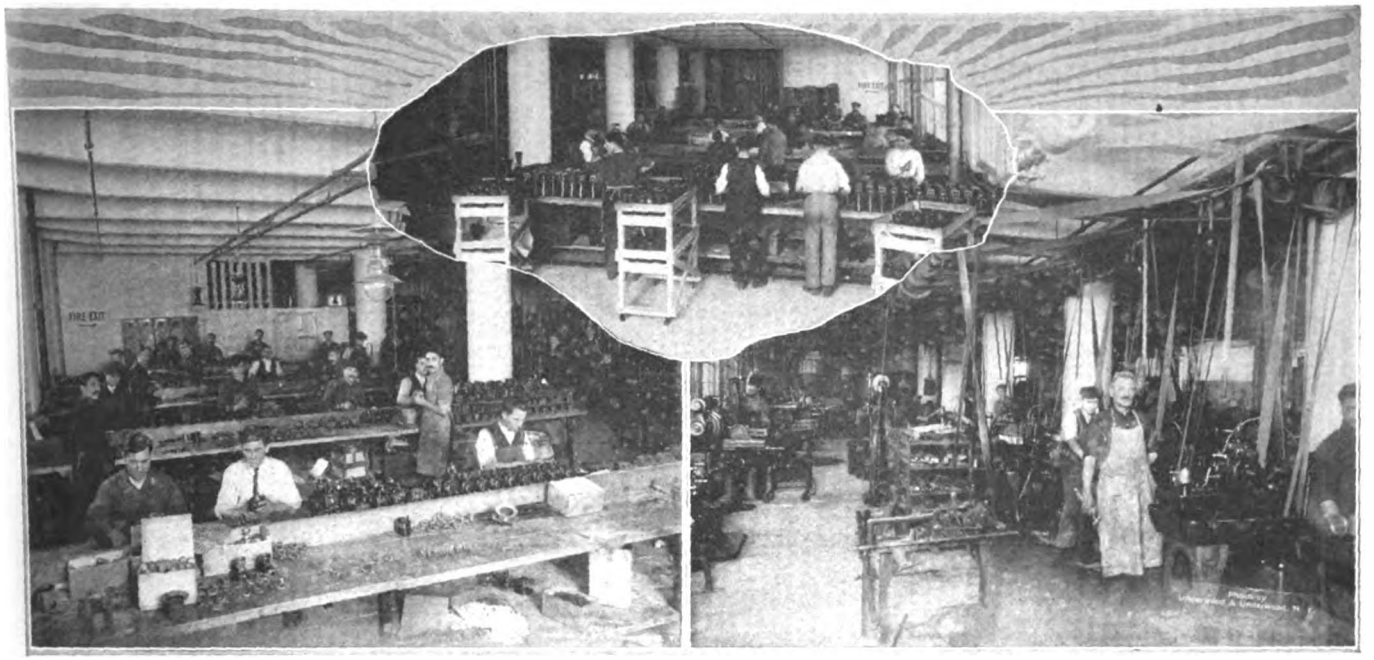
E. A. LABORATORIES FACTORY IS ON CAPACITY SCHEDULE



Top, Fitting Bells on Horn Mechanism; Left, Assembling Motors for Electric Signals; Right, In the Machine Shop

BROOKLYN, N. Y.—The E. A. Laboratories, with main offices at Broadway and Yythe avenue, Brooklyn, boast the most completely-equipped and largest exclusive horn-making establishment in the industry. Their floor area, combining their plant at Broadway and Wythe avenue, with another at Kent avenue, Brooklyn, covers approximately 40,000 square feet.

At present nearly three hundred men are employed in making the popular EA motorcycle and bicycle horns, and General Manager Emanuel Ferro states that only their inability to secure labor and materials prevents their doubling their manufacturing capacity. As it is, the E. A. Laboratories are now running day and night shifts.

FISK BRANCH IS OPENED IN FINE NEW STORE

MARINETTE, Wis., April 18.—Julius Reinke has been placed in charge of the new Fisk Tire Company service station opened in the Ridsdale block, 1600 Main street. It is estimated that the Fisk company spent between $7,000 and $8,000 in remodeling and fitting up the new branch, and the results certainly justify the expenditure, as the local branch stacks up handsomely against some of the finest tire stations in Milwaukee and Chicago. The big corner is fitted up for offices and tires and accessories share the balance of the space with the vulcanizing department. The Marinette branch covers five counties.

CONTINENTAL OFFICE MGR. BECOMES BENEDICT

ERIE, Pa.—A. E. Caldwell, office manager for the Continental Rubber Works, was married April 15 to Miss Josephine Singley, of Meadville, Pa. The Continental office force presented the couple with a handsome library table lamp, and also tendered them a luncheon at the office on Tuesday, April 11. Advertising Manager Hall acted as master of ceremonies and made the presentation speech.

The wedding took place in Meadville, and this was the only regrettable part of the program, from the viewpoint of the Continental staff. If the ceremony had been performed in Erie the office force and other well-wishers in the employ of the Continental company would have arranged a truly royal send-off for the Newlyweds.

ORGANIZES SYSTEM TO RECOVER STOLEN CARS

JEANNETTE, Pa.—The Pennsylvania Rubber Company, maker of Vacuum Cup and other brands of tires, has organized a system for the recovery of stolen cars which are equipped with its tires. The system is such that the owner of a car fitted with these tires, who immediately notifies the Pennsylvania company or any of its branches when the machine is missing, with the serial number of his tires, will receive without charge the co-operation of an organization which should result in the rapid recovery of his property.

The details of the methods used by the organization will, naturally, not be made public. Its efficiency, however, has been proven in several of the larger cities and the system has been extended to cover the entire country. The company has put the system into effect to protect the users of its products and to reduce as far as possible the enormous loss to owners from thefts.

WORKING ON THAT BIG PROGRAM

NEW YORK, April 17.—W. J. Surre and C. E. Morehouse, in charge of the general arrangements for the annual convention of the Cycle Parts Industries at Atlantic City, will make a trip to the famous Jersey resort soon after Easter, with a view of clearing up some of the details in connection with the big program to be staged in August.

A QUINTET OF PERSONAL SNAPSHOTS

E. K. van Almkirk, representing the Cyclemotor Corporation of Rochester, N. Y., is now traveling Indiana, Illinois, Iowa and Wisconsin, with headquarters at the Southern Hotel, in Chicago. He has closed contracts with D. P. Savage, of Gary, Ind., and Holtz & Spicer, of Hammond, Ind.

Clarence Loftus, formerly connected with the Harley-Davidson company on West Friendship street, Providence, R. I., has left that concern to be a salesman, demonstrator and repairman for B. A. Swenson, at 522 Broad street. Swenson has also added John Enos, a veteran rider, to his repair staff at Indian headquarters.

BUFFALO, N. Y., April 15.—During the past week Arthur Davidson and A. B. Coffman called on John W. Henry while on their way to Springfield to attend the Motorcycle Manufacturers' meeting.

CHICAGO, Ill.—G. C. Fromm, of the Manufacturers' Foundry Co., of Waterbury, Conn., has just checked out of Chicago on an extensive business. He finds plenty of activity in his line and states that the factory would hum along very nicely for the remainder of the year if no more orders were booked.

BUFFALO, N. Y.—Adolph Kellner, the Bison City agent for the Excelsior, announces that Nat. Needleman, formerly of Cleveland, Ohio, has joined his sales staff in this city.

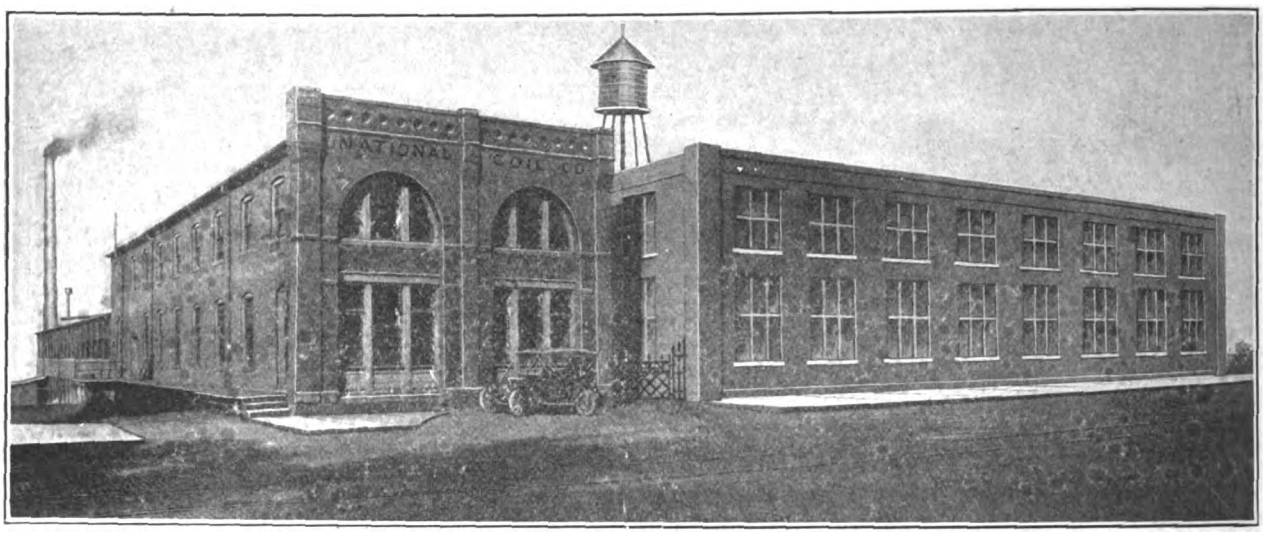
HIGH EFFICIENCY IN NATIONAL COIL FACTORY

Improved Machinery and Skilled Employees in All Departments Give Highest Grade of Workmanship in Building Midget and Other Magnetos at Lansing, Mich.



The Home of National Products, Seen from the Front—Note Fine Lighting in Main Building. Executive Offices Are at the Left

EFFICIENCY in both the factory and sales organizations has been both precept and practice with the National Coil Company, maker of National magnetos and other ignition apparatus, at Lansing, Mich. In the factory, the efficiency is obtained by the use of the most improved machinery, operated by picked men, and the best of appliances for the skilled hand operatives whose work is so essential in electrical apparatus manufacturing. There is no lost motion in the factory organization or in the sales department, and from this has resulted a steady increase in business for the firm ever since its start in 1897.

Apparatus such as the National Midget magneto, adapted for the ignition of lightweight motorcycle and other motors, needs special devices in the manufacture of its component parts, and in the case of the National Coil Company, a large number of such devices have been designed and built under the direction of C. E. Pearson, E.E., the chief engineer and general manager. Mr. Pearson has been in charge of the engineering and designing departments since the company started and is an expert in electrical apparatus. He has installed a thoroughly-equipped laboratory for experimental purposes, from which come the fully-developed devices which are eventually made by the company. In addition,

C. E. Pearson, Electrical Engineer and General Manager

Mr. Pearson has put the plant on its present high plane of efficiency as regards personnel and equipment.

Eleven departments are included in the factory organization, exclusive of the laboratory. Hand work of the highest grade is performed in winding coils, building condensers and assembling the various apparatus. The insulating department with its baking ovens and stoves for baking armature cores is very ingenious. A special vacuum process is utilized to impregnate all windings and ensure positive insulation and eliminate air bubbles.

Each piece of apparatus which is assembled at the National Coil factory is subjected to final electrical and mechanical tests before being passed to the shipping room. In addition, each component is tested as a unit. National apparatus is therefore of the highest grade and carries a guarantee of worth as regards performance and long life.

The tool department is a most important one in this factory. Jigs and fixtures adapted to the special requirements of each piece have been designed and are in use. These jigs and fixtures assure the interchangeability of the various parts and extreme accuracy in all machine work.

The National Coil Company maintains a complete service organization to assist the users of its products. A special one-day service is given on all orders for repairs or parts. Service stations are now being established at all important trade centers, and at each station is a factory-trained mechanic and a full stock of National parts.

Looking Down the Stretch

April 26, Savannah, Ga.—Race meet of Savannah M. C.

April 30, Brooklyn, N. Y.—Annual spring run of Invincible M. C. to Southampton and return, 200 miles.

May 7, Jamaica, N. Y.—Endurance run of Jamaica M. C., to Patchogue and return.

May 7, Providence, R. I.—Annual run to Westerly of M. C. of Rhode Island.

May 14, Detroit, Mich.—Race meet of Detroit Motorcycle Dealers' Association.

May 14, Bronx, N. Y.—Second annual endurance run of the Crotona M. C. to Monticello, N. Y. and return, 250 miles.

May 21, Providence, R. I.—Annual photograph run to Roger Williams Park, M. C. of Rhode Island.

May 21, Harrisburg, Pa.—Endurance run of Keystone M. C. to Altoona, Shamokin, Pottsville, Reading and return.

May 27-28, Providence, R. I.—Week-end run of Providence M. C. to North Adams, Mass., and return.

May 27-28, Poughkeepsie, N. Y.—Endurance run of the Poughkeepsie M. C. through Poughkeepsie and Dutchess Counties; 20 hours.

May 28, Milwaukee, Wis.—Lightweight race of Milwaukee M. C. on Cedarburg track.

May 28-30, Boston, Mass.—Three-day endurance run of Bay State, M. C.

May 30, Washington, D. C.—National Capital M. C. endurance run, 128 miles in 24 hours.

May 30, Roanoke, Va.—Race meet of Dixie M. C.

May 30, Wheeling, W. Va.—Race meet of Wheeling M. C.

May 30, Philadelphia, Pa.—300-mile race on Hatboro Speedway.

May 30, Seattle, Wash.—Run of Seattle M. C. to Portland, Ore.

May 29-30, Newark, N. J.—400 mile run, day and night of New Jersey M. C.

June 10-11, Worcester, Mass.—Fifth annual 24-hour endurance run of Worcester M. C.

June 18, 19, Wheeling, W. Va.—336 mile endurance run to Bedford, Pa., and return, of Wheeling M. C.

June 25, Detroit, Mich.—Second race meet of Detroit Motorcycle Dealers' Association.

June 30, Wheeling, W. Va.—Sealed time run of Wheeling M. C.

July 2-3-4, Grand Rapids, Mich.—Michigan State F. A. M. reliability trial, under auspices of Grand Rapids M. C.

July 4, Roanoke, Va.—Race meet of Roanoke M. C.

July 4, New Brunswick, N. J.—Elimination run of the New Brunswick M. C.

July 4, Savannah, Ga.—Race meet of Savannah M. C.

July 4, Galesburg, Ill.—State F. A. M. championship races under auspices of Detroit Fair Association.

July 4, Sheepshead Bay, N. Y.—State F. A. M. amateur championships and convention, auspices of Speedway M. C., Inc.

July 4, Wheeling, W. Va.—Race meet of Wheeling M. C.

July 16, Wheeling, W. Va.—Tri-State endurance run and open house, distance 100 miles, Wheeling M. C.

July 30-August 12, Wheeling, W. Va.—Run to Atlantic City and return, 600 miles, of Wheeling M. C.

August 10, Colorado Springs, Colo.—Races on Pike's Peak highway.

August 11-12, Roanoke, Va.—500-mile endurance run of Dixie M. C., to Richmond and return.

August 13, Detroit, Mich.—Third meet of the Detroit Motorcycle Dealers' Association at Detroit Oval.

September 3, Harrisburg, Pa.—Endurance run of the Keystone M. C.

September 4, Roanoke, Va.—Race meet of the Dixie M. C.

September 4, Milwaukee, Wis.—Fourth annual Goodfellowship tour, Milwaukee M. C.

September 6, Wheeling, W. Va.—30 mile road race of Wheeling M. C.

September 17, Detroit, Mich.—Fourth meet of the Detroit Motorcycle Dealers' Association.

October 1, Providence, R. I.—Annual Triangle run, Providence-Boston-Providence of M. C. of Rhode Island.

October 8, Detroit, Mich.—Meet of the Detroit Motorcycle Dealers' Association at Detroit Oval.

F. A. M. STATISTICS FOR MARCH

Secretary Gibson's report on F. A. M. membership returns for riders for March shows that 196 affiliated members were taken, 112 unaffiliated signed up and 244 renewals were recorded. The last membership card issued in March was numbered 36,168.

MAIMED SOLDIERS INVESTING IN MOTORCYCLES

TORONTO, Ont.—The Canada Motorcyclists' Association has undertaken to give a 1916 membership ticket for the association to every returned soldier who becomes a motorcycle rider.

In this connection it is estimated that a large percentage of veterans of the present war are already turning to the motorcycle and bicycle for exercise, recreation and business. In Toronto, for instance, a number of returned men have made purchases of motorcycles and wheels, and the dealers anticipate that sales to the veterans will reach large figures in a short time. This week two fighters who had lost a hand were among those who purchased motorcycles. One was Quartermaster Sergeant Gregorieff, a Russian who served with the Canadian troops during the early campaigns of the war. He found that he could handle an Excelsior lightweight model with ease, so he purchased it. The other soldier who had lost a hand in the European fighting, and who now rides a motorcycle, is Private W. M. Howes. He bought a Singer.

Recently a one-legged veteran bought a Miami Power Bicycle.

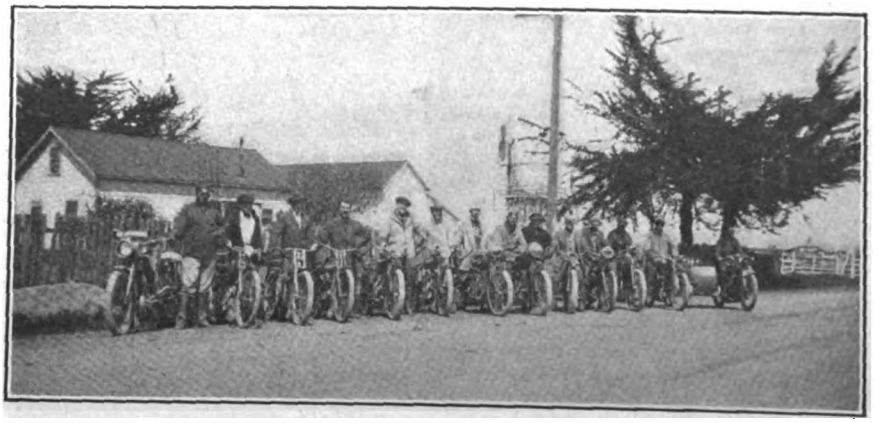
ADOPTS AN ARM-BAND

PATERSON, N. J.—The Paterson M. C., formerly the Haledon M. C., has adopted a new brassard or arm-band which is modeled on the new F. A. M. twin motor emblem. The Paterson brassard has two widespread wings with the letters P and C and the letter M is located between the cylinders. The club's F. A. M. number is marked on the crankcase of the motor. Colors are blue and gold.

URGING HIGHWAY WORK

CINCINNATI, O.—Speed in the completion of the Dixie Highway through Hamilton County is urged upon the County Commissioners by the local council. The committee from the latter body, consisting of Harry R. Probasco, R. H. Coney and J. Stacey Hill, acting in conjunction with the Dixie Highway Commissioners Harry L. Gordon and George W. Harris, will wait upon the commissioners at the next meeting to discuss the matter with them.

ON THE FAMOUS DRIVE AT MONTEREY, CAL.



Fifteen Riders from Santa Cruz Who Recently Rode to Monterey in a Preliminary Run for the 1916 Season. The Drive Is Seventeen Miles Long

Digitized by Google

M. M. A. TO WAGE NATION-WIDE CAMPAIGN OF EDUCATION IN BEHALF OF THE MOTORCYCLE

(Continued from page 15)

will help materially to create motorcycle enthusiasm and increase sales. A committee was appointed to keep in close touch with F. A. M. authorities, and to plan ways and means to effect a more intimate relationship between the two organizations.

One of the important things which this committee will undoubtedly do will be to encourage touring on a much larger scale than heretofore. Although the matter was not brought up at the meeting, those in attendance were very much interested in the proposition made by Lacey Crolius, of the Harley-Davidson Motor Company, to promote one thousand tours on the same two days, in all parts of the United States. Crolius has demonstrated to his satisfaction, and that of many others, that the tours are the thing for motorcycling.

He very properly believes that the proposed one thousand simultaneous tours, on an easy schedule, will give the sport a wonderful amount of favorable publicity, and the participants a crackerjack good time. His idea is to make these tours so attractive that practically every motorcyclist will join; in any event, to make it possible to interest something like 100,000 riders, and to conduct these tours in such a way that the press will simply have to take notice, and the public be favorably impressed.

The Goodyear Investigation

The members of the Association listened with interest to Mr. Quine's address. He recited, at the outset, how his company had sent out investigators to report accurately on the conditions existing in various parts of the country. A lot of valuable information was thus obtained. For example, an investigation was made in Chicago of the commercial possibilities of the motorcycle. The inquiry thus made demonstrated, in Mr. Quine's opinion, tremendous possibilities for commercial sales—for example, to groceries, drug stores, bakeries, laundries, and so forth. Mr. Quine contended that the market had not yet been properly developed, and that co-operation was necessary to develop it.

While listening to Mr. Quine's comment on the commercial situation, the idea came to the writer that it would be a splendid thing for the manufacturers to send out their star salesmen to work together in a certain town, to investigate and report every phase of the commercial situation. But this co-operative effort could be made more than a mere investigation; it should produce definite results of a practical kind. That is to say, with a dozen men working in a certain town, boosting not their own machines simply, but the commercial adaptability of the motorcycle, it would be possible to learn just how commercial missionary work should be done in other parts of the country.

9,000 Bicycle Dealers in Line

Mr. Quine mentioned the fact that 9,000 dealers had promised to co-operate toward making Bicycle Day a success, and that the work of the committee was constantly developing new ideas for the effective promotion of the bicycle business. Dealer bulletins are to be issued every six weeks, and every possible advantage is to be taken of opportunities to secure favorable publicity to promote bicycling among women and girls, the formation of clubs, the organization of a national body, the promotion of bicycle racing and other methods of boosting.

Returning to the motorcycle, Mr. Quine was of the opinion that it was necessary to build a better atmosphere around the motor-driven two-wheeler. This could be accomplished by supplementing the publicity work already being done by the Association. The trade should demand its rights, and he was of the opinion that the newspapers would undoubtedly give respectful consideration to the trade contention that there is no reason why the motorcycle should always be picked out for hostile criticism.

Mr. Falor Talks on Publicity

Mr. Falor introduced his remarks by stating that he was a stanch believer in the future of the sport. It was his opinion that it should not be difficult to sell 100,000 motorcycles in one year. He believed that there were wonderful possibilities in the development of the commercial side of the business. He thought, for example, that co-operative delivery companies could be interested and would buy in quantities. He emphasized the necessity of securing more and more publicity all the time, and believes that it would be well worth while for the manufacturers to make bigger and better publicity their main objective.

After a general discussion of Mr. Quine's and Mr. Falor's remarks, President Henderson announced his intention to call on Mr. Quine in a few days and go over the entire proposition in detail. It is more than likely that the co-operation which the accessory concerns are now giving the bicycle manufacturers will be extended so as to include the motorcycle manufacturers also. The newspapers will soon sit up and take notice.

"Big Chief" Plays Host

The members who attended the meeting, also Show Manager Coffman, Secretary Hallock, H. S. Quine, S. A. Falor, Frank Chase and the representatives of the trade journals, were guests at luncheon of Mr. George M. Hendee. After having partaken of a very tasty meal the party was motored to the two plants of the Hendee Manufacturing Co., at Springfield and Hendeeville, respectively, through which they were guided by Messrs. Hendee and Weschler. It would take a whole book to tell the story of the many interesting and impressive things they saw. In any event, the fact that the Hendee company was ready for the spring rush and prepared to handle it to the entire satisfaction of its dealers and their customers was demonstrated when those in the party were shown a huge pile of finished, crated motorcycles, ready for shipment. That pile contained $800,000 worth of finished machines. Some very interesting stories on the Hendee factory and Hendee methods will be published in the near future in this paper.

Next Meeting in Milwaukee

There were so many invitations for the next meeting of the Manufacturers' Association that it was rather difficult to make a selection. However, the invitation of the Harley-Davidson Motor Company and the A. O. Smith Company was finally accepted, and the next meeting will be held in Milwaukee, June 14.

HIGH LICENSE ASKED IN RHODE ISLAND

Law Effective April 10 Works Hardship on Sidecar Owners by Demanding Additional $5 Fee; Motorcycle License Is $2

PROVIDENCE, R. I., Apr. 17.—The new motorcycle registration law of the state of Rhode Island, providing for a $2 fee for a machine and $5 for a sidecar, went into effect on April 10. The riders all over the state are dissatisfied with the new law, for they feel that the license fee for a motorcycle and sidecar combination, now $7, is much too high. In justification of their claims they point to the new Cristman measure, recently passed in New York, which calls for a fee of only $2.50 for a motorcycle, with or without a sidecar.

Quite a number of riders rushed their registrations through at the State Board of Public Highways before the new law became effective, and were thus able to squeeze in under the old regulations which required a registration fee of but $1 for both machine and sidecar. Those who waited were not so fortunate.

Under the present statute a sidecar is considered apart from the motorcycle and is grouped under the automobile minimum law, which accounts for the fact that a separate fee of $5 is now demanded. It is estimated that there are about 1,000 sidecar owners in the state.

Registration blanks are ready at the office of the State Board of Public Roads, which is located in this city at the State House. They can be secured by mail, and after the questions thereon are fully answered and the application signed by a notary, they should be sent to the board's automobile department, accompanied by check, money or express order.

JUGGLING GASOLINE PRICES IN CHICAGO

EDITOR **Motor Cycle Illustrated**:—

There are quite a number of garages in Chicago with signs outside giving the price of gasoline and such signs usually read, "Gasoline, 21 cents." After a motorcyclist goes in and gets about a gallon or so he is charged 25 cents a gallon. The garage owner explains that you have to buy more than two gallons in order to get the 21-cent rate.

Is not this a misrepresentation? You will note that the sign does not read, "Gasoline, 21 cents *a gallon*." Still we are forced to pay the 25-cent rate.

I think something ought to be done to stop this practice. A fellow does not mind paying the price so much as he objects to the method by which he is misled.

Chicago, Ill. A. E. RADCLIFFE.

NEWARK VELODROME THROWS GATES OPEN

7,000 Spectators See the First Meet of Season; Kramer Given Rousing Reception and Wins Cavanaugh Stakes; Spears Rides Strong Race in the Shanley Handicap

NEWARK, N. J., April 17.—Seven thousand spectators turned out for the first bicycle meet of the season, which was staged at the Newark Velodrome on Sunday. Frank Kramer, the East Orange cyclist, who has held the national championship for fifteen consecutive years, was given a big reception when he appeared on the track, and he made good by winning the Cavanagh Stakes at one mile, which was the big professional open race of the day. In the Bernard M. Shanley, Jr., handicap Kramer found the allowances handed out too large for him and finished fourth. The race was won by Bob Spears, who was followed over the line by Clarence Carman and Reggie McNamara.

Spears and McNamara were forced out of the one mile open with punctures. McNamara punctured in his heat, while the outer strip on Spear's wheel separated from the tire as Bob was riding in the final. Kramer did not have any trouble leading Menus Bedell to the tape by a length, while George Wiley finished third.

Spears pulled a great sprint in the Shanley Handicap. Bernard M. Shanley, Jr., for whom the race was named, shook hands with Kramer and then fired the starting gun.

Spears started from the fifteen-yard mark and was out in front on the last lap. He rode a strong race and breezed in a winner. Clarence Carman pulled a surprise by coming through with a driving sprint and beating out McNamara for second place. Kramer finished fourth, followed over the line by Eddie Root.

Root Gets Arm Band

Eddie Root won the first Brassard race of the season, defeating Donald McDougall in a one-mile match. Root is now the holder of the arm band, which pays $50 to the rider defending it successfully. McDougall looked like a winner right down to the last lap of the race, but Root's final kick nipped McDougall at the finish mark.

Oscar Egg proved to be the class in the two-mile invitation. Bobby Walthour was the first man home, but the Atlanta rider was disqualified for riding in below the black line. Dupuy, John Bedell and Tim Sullivan followed Egg home.

The amateur honors went to August Lang, an Irvington youth. Lang won the half-mile handicap for the amateurs and in the two-mile open he finished second. The Spencer brothers, from Toronto, also attracted quite a bit of interest. In the two-mile race Arthur went down in a spill near the finish and his brother, William, won the race. In the half-mile handicap Arthur took second place, riding from scratch. The summaries:

One-Mile Novice (Amateur)—Won by Clarence Bayard, East Orange; Eddie Spilleto, Brooklyn, second. Time, 2:56⅗.

One-Mile Open (Professional)—Won by Frank L. Kramer, East Orange; Menus Bedell, Lynbrook, L. I., second; George Wiley, Syracuse, third; Gordon Walker, Australia, fourth; Joseph Fogler, Brooklyn, fifth. Time, 2:31⅗. Last eighth mile, 12s.

Half-Mile Handicap (Amateur)—Won by August Lang, Irvington (25 yards); Arthur Spencer, Toronto (scratch), second; Holger Mortensen, Plainfield (80 yards), third; William Simon, Plainfield (75 yards), fourth. Time, 56s.

Two-Mile Invitation (Professional)—Won by Oscar Egg, Switzerland; Marcel Dupuy, France, second; John Bedell, Lynbrook, L. I., third; Tim Sullivan, New Haven, fourth. Robert A. Walthour, Atlanta, finished first, but was disqualified for finishing inside the black line. Time 4:16⅕.

The Brassard Race (Professional) at One Mile—Donald McDougall, Newark, vs. Eddie Root, Boston. Won by Root. Time, 2:54⅗. Last eighth mile, 13s.

Two-Mile Open (Amateur)—Won by William Spencer, Toronto; Gus J. Lang, Irvington, second; Bennie Zager, Newark, third; Charles K. Brown, Colonial Field Club, fourth. Time, 5:04⅗.

Bernard M. Shanley, Jr., Handicap, One Mile (Professional)—Won by Robert E. Speers, Australia (15 yards); Clarence Carmen, Jamaica, L. I. (110 yards), second; Reginald McNamara, Australia (10 yards), third; Frank L. Kramer, East Orange (scratch), fourth; Eddie Root, Boston (70 yards), fifth. Time, 2:01⅗.

ENTRIES POURING IN FOR "ASS'N" CENTURY

NEW YORK, N. Y., Apr. 18.—Entries are coming in at a brisk pace for the spring century of the C. R. C. A., April 23, which will be held over the usual Long Island course, the dinner stop being at the Commercial Hotel at East Islip, L. I.

There will be a fast and a slow division—the latter to be divided into two sections, one starting from Columbus Circle, Manhattan, and the other from Bedford Rest in Brooklyn at 7:30 in the morning. The fast "crowd" will set out from the Circle only, at 8:30, and will overtake the pleasure riders at the dinner stop. A silver cup is to be presented to the club having the largest number of entries. Blanks can be secured from John Marquart, 14 Mt. Hope Place, Bronx, N. Y.

MOTOR WHEEL NEWS

MILWAUKEE, Wis., April 18.—New dealers continue to come into the Smith Motor Wheel fold. Among the dealers closed with last week are Lane Bros., Corsicana, Texas; Martins Bros., Kilbourne, Wis.; LeRoy DeBolt, Puyallup, Washington; E. F. Steinheller, Delgville, N. Y.; H. T. Gabb, Lake George, N. Y.; O. B. Ervin, Anderson, Ind.; H. C. Voelker, Fairmont, W. Va.; F. E. Lick, North East, Pa.; Valley Hardware Company, Hamilton, Mont.; C. H. Curtiss, Traverse City, Mich.; L. C. White, Twin Bridges, Mont. All contracts required immediate shipment.

STAGE HOME TRAINER RACES IN THEATER

GRAND RAPIDS, Mich., April 17.—To popularize cycling, members of the Western Michigan Cycle Club staged three races of home trainers at a local theater last week before a large crowd. C. J. Byers defeated C. M. Shook in the mile event, his time being 1:04, while the half-mile affair was captured by William Willberg from C. Taylor in 31 seconds. Taylor met his second defeat at the hands of Frank Meissner, who traveled the quarter-mile in 15 seconds. A number of home trainer races at the same theater are planned.

COURSE TO BE WELL PATROLLED FOR HOBOKEN RACE

WEST HOBOKEN, N. J., Apr. 18.—Boulevard Commissioner Paul Siglie has accepted the invitation of the Century Road Club of America, N. J. Division, to start its twenty-five-mile road race on Sunday, May 7, over the Hudson County Boulevard here. The riders will get under way at 9:30 in the morning.

The prize list will be the best ever offered by the "America's." There will be a total of 50 awards, headed by a $50 Pierce road racer fully equipped as the first place prize, and a $50 Pierce light racer as the initial time prize.

The race will be held on a three lap course, which will be cleared by a corps of motorcycle police under the supervision of Chief of Police William F. Clossey. Over 100 officials from various cycling clubs will also patrol the route. The handicapping will be done by the Inter-Club League, ensuring fair-play to all entrants. Entries close April 29 with E. E. Fraysee, 724 Syms St., West Hoboken, N. J.

News of the Bicycle Trade

BUFFALO DEALERS WILL BOOM RACING

Committees Appointed to Supervise Cycling Activities This Summer; New Officers Installed; Martin Cavenaugh Gives Talk on "Never-Leak"

BUFFALO, N. Y., Apr. 18.—Fifty members of the Buffalo Cycle Dealers' Association attended the April monthly meeting at Millers Hall last week and installed new officers for the ensuing year.

Martin J. Cavenaugh was the principal speaker of the evening and delivered a very instructive talk on "Historical Sketch of Never-Leak." After the address a resolution was passed extending the scope of the association by making parts and accessory men eligible to membership.

Road races will be held this year under the auspices of the association on Decoration Day, July Fourth and Labor Day. To take care of the racing program a committee was appointed, with Chas. Haberer as chairman.

Saturday afternoon runs will also be staged by the dealers and these will be in charge of a committee headed by Adolph May of the B. F. Goodrich Company's local branch. Prizes donated by members of the association will be given at the end of each run.

Albert Schwegler, of Schwegler Bros., will have charge of a committee that will supervise novice runs—another feature proposed for the summer's cycling activities. No one, of course, will be permitted to ride in these races who has ever appeared in a similar event before.

When the next meeting of the association had been declared for April 28, the new officers were installed as follows:

John W. Henry, president; Charles Haberer, vice-president; and John J. Oliver, secretary and treasurer.

CYCLE JOBBERS WILL MEET AT HOT SPRINGS, VA.

BUFFALO, N. Y., April 15.—During the past week Keyser Fry, president of the Cycle Jobbers' Association of America, was the guest of John W. Henry for several days. While here Mr. Fry and Mr. Henry discussed the plans for the May meeting of the Jobbers' Association.

After much consideration it was decided that the next meeting of the association will be held at Hot Springs, Va., instead of Buffalo, during the week ending May 13.

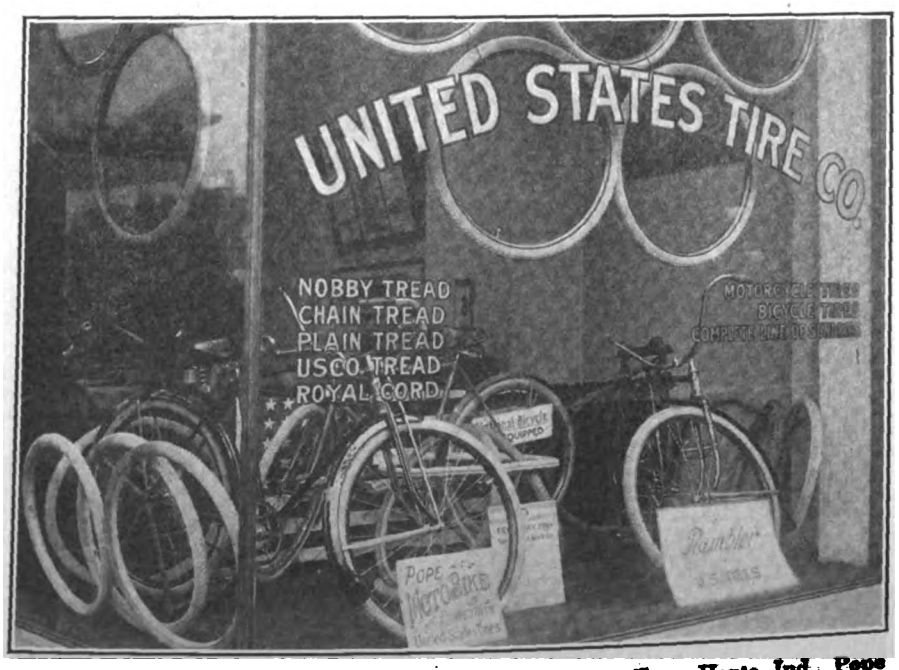
The Cycle Jobbers have invited the bicycle manufacturers and the Cycle Parts and Accessory Association to meet with them at that place.

BICYCLE MAKERS HOLD CONFERENCE AT BISON CITY

BUFFALO, N. Y., Apr. 17.—The Bicycle Manufacturers' Association held an important meeting at the Lafayette Hotel here on April 12. The two-wheeler makers declared themselves very optimistic over the 1916 outlook, and stated that the cycle business this year shows a huge increase over the same period last season.

Those present were as follows: Horace Huffman, of the Davis Sewing Machine Company; E. J. Lonn, of the Great Western Manufacturing Company; Pete O'Horo, of the Excelsior Cycle Company; William G. Schaak, of the Emblem Manufacturing Company; Keyser Fry, of the Reading Cycle Company; James Ash, of the Miami Cycle and Manufacturing Company; Percy P. Pierce, of the Pierce Cycle Co., and John W. Henry, of the Vim Cycle and Hardware Company.

HOW U. S. TIRE CO. IS BOOSTING BICYCLES



Window Display Used by United States Tire Co.'s Branch in Terre Haute, Ind. Pope Bicycles Were Borrowed from Dealer C. G. Pugh

SECURES ADVERTISING BY CO-OPERATING WITH PAPER

JACKSON, Miss., April 17.—C. M. Moter, a bicycle dealer of this city, has entered into an agreement with a local newspaper, whereby he is receiving advertising in return for offering as prizes a number of bicycles in a subscription contest. Briefly the plan is as follows:

"The Jackson *Daily News* is trying to interest women in soliciting subscriptions and, for every yearly subscription sent in, 2,000 points are awarded in the contest. To the lady receiving the largest number of points will be given a $35 Excelsior bicycle. The second prize is a $15 certificate on the purchase of a ladies' wheel, the third a $10 certificate and the fourth a $5 certificate. Full-page advertisements announcing this contest are being run quite regularly in the columns of the *News*, and Moter, who is putting up the prizes, is being mentioned prominently as the city's leading bicycle dealer.

VIM CYCLE CO. WORKING ON 24-HOUR SCHEDULE

BUFFALO, N. Y., April 15.—The Vim Cycle & Hardware Company reports that business is unusually good. Also that they are in fine condition to make prompt and quick deliveries. During the past fortnight they have been working on a day and night schedule.

"THE BICYCLE BOOSTER" OUT

MILWAUKEE, Wis., April 18.—The "Bicycle Booster," the house organ of the A. O. Smith Company's motor wheel division, has made its first appearance. The neat little booklet contains some crisp, breezy and pertinent merchandising advice on team work, demonstrating, advertising and time payment plans. A detailed statement is made concerning the large advertising campaign with which the motor wheel is now being boosted, and news of live motor-wheel dealers is given prominent space.

U. S. I. HANDICAP BIGGEST RACE IN TEN YEARS

Field of 161 Crack Amateurs Participates in Ten Mile Event at Floral Park, L. I.; Bob Lipsett, C. R. C. A., Captures First Place Prize, While Tom Bello, U. S. I., Wins Premier Time Award

Scenes at the U. S. I. Race Last Sunday: First Row, Bob Lipsett, the Winner; Second, Acme Wheelmen Who Captured the Club Entry Trophy and (Immediately Below) Line Up of C. R. C. A., Which Accounted for Team Point Trophy; Third, Tom Bello, First Time Prize Winner. Second Row: Start of the Limit Men, and General View of the Starting Point at Floral Park, L. I.

FLORAL PARK, Long Island, April 16.—Not in a decade have eastern bicycle fans seen such a large field of riders as jumped from the start of the Unione Sportiva Italiana ten-mile handicap road race here today. One hundred and sixty-one cyclists participated in the affair, which so auspiciously opened the outdoor cycling season in the Metropolitan District. Robert C. Lipsett, 25 years of age, flying the colors of the Century Road Club Association, captured the monster classic with a handicap of 3 minutes and 30 seconds.

He was fully fifty yards ahead of A. Nieminsky of the Hudson County Wheelmen—the second man to cross the tape. Tom Bello, of the Unione Sportiva Italiana, riding from scratch, tucked away the first time prize in 26:02, finishing forty-fifth in the race.

The various handicap divisions, at the starter's signal given by Harry Kaiser, left in great style—as many as 40 riders pushing off simultaneously from the same mark. It seemed nothing short of miraculous that only three riders fell from their wheels while leaving the tape. Finally the scratch riders—ten of them—were under way and quickly disappeared in the distance.

A Merry Pace Set

The cyclists from the limit mark and those who were handicapped 3 minutes and 45 seconds were caught by Lipsett and his co-markers. But Johnny Ghirardi, of the U. S. I., wouldn't be passed and he set a merry pace. The race was proceeding like "greased lightning" until the four-mile mark was reached, when Fred Fesselmeyer, of the Acme Wheelmen, fell heavily from his machine and sustained injuries that put him out of the running.

Ghirardi was the first to make the turn at the five-mile pole, with Lipsett a close second. Then the "association" rider uncorked a sudden spurt that caught the field unawares and sent him flying past Ghirardi. Lipsett lost his lead occasionally, but when the finish hove in sight he was still in the front rank and applying more ginger at the pedals, he swept across the tape like a tornado. His time was 27:05⅖.

The plucky Italian rider, who had been giving stiff battle to Lipsett, was forced to abandon his attempt to overhaul the latter at the eight-mile mark.

At least 20 cyclists crossed the tape in a blanket finish, making it very difficult for the scorers and judges to ascertain the positions of the contestants after the tenth place. However, before the day was over, all the scoring had been completed and accepted as correct.

The lesser time divisions rode very hard and heady races. John Krajcky, from the 1 minute 45 second mark, finished in twentieth position, while J. Mar-

'FRISCO CELEBRATES ITS BICYCLE DAY

More Than 500 Cyclists Ride Out to Golden Gate Park Stadium Where a Huge Crowd of Fans Gathered for the Stirring Race Meet—Old-Timers Mounted on High-Wheelers in Parade

SAN FRANCISCO, Cal., April 15.—San Francisco's Bicycle Day, held last Sunday at Golden Gate Park, fulfilled the expectations of the most sanguine. Far from the repeated postponements being a detriment, interest in the affair had grown with the suspense, and the assurance of fine weather brought a great many wheelmen, old and young, from distant points.

It was impossible to count the number of machines accurately, but there could not have been less than 500 bicycles lined up in the run through the Park; and a large crowd of spectators, conservatively estimated at ten thousand, completely filled the grandstand and spread out for a long distance around the track.

The Band Wagon Arrives

As one o'clock approached and the wheelmen began to gather at the Baker street entrance to the Park, that old-time haunt of cyclists took on an appearance it has not shown for many years. The band-wagon soon arrived on the scene and added its share to the merriment of the occasion, which was partly in the nature of a reunion for the older cyclists. The old-timers were there in large numbers, including a great many whose names have in times past been known throughout the cycling world; many of them brought their sons, and some their grandsons.

The younger generation of wheelmen was well represented, including some boys who have bought their wheels since the event was planned; and the cycling clubs now active around the Bay, including points as far distant as San Jose and Vallejo, turned out in good shape.

There were Herman Eggers, six-day winner of 1879, and Bradley, Hill and Russ, with their old high wheels, a center of curiosity for the younger generation, many of whom saw the pioneer form of bicycle for the first time; and there was a good sized bunch on motorcycles from the S. F. M. C., making a social run along with the bicyclists. Several outfits with Smith motor wheels also took part in the parade, and one amusing arrangement was a boy's coaster wagon, with automobile-style body, propelled at a good rate by a motor wheel in the rear. Then there was the first Dayton motor-bike seen in San Francisco, and several other interesting novelties, as well as a long tandem and some of the "freak" wheels of the old days.

High Wheel "Boys" in Line

When the time came to start for the Stadium, a ride of some three miles, the procession was led off by a squad of motorcycle cops who had been detailed to do honor to the occasion, but who had difficulty in going slow enough for the rest of the parade. They were followed by the band-wagon, and that, at a little distance, by the high-wheel "boys," and after them came the general procession, with here and there some club crowd keeping together in compact form. The run was made in very leisurely manner, reaching the Stadium shortly after 2. Among the old-timers, at least, many pleasant memories were recalled on passing by the once-familiar haunts and resting-places of cyclists, some of them now changed almost beyond recognition, and which not a few of the riders had not seen for years.

Arrived at the Stadium, the riders made the circuit of the three-quarter-mile track, while the spectators, including a great many who came in autos and street-cars, assembled at the grandstand or along the sides of the track.

Lots of Variety in Races

The parade over, the racing events went forward smoothly and without loss of time. The schedule originally outlined was not rigidly adhered to, the track events starting off with the novice race for boys over 16. Next came the messenger boys' race, in which a large number entered, and which was watched with great interest. Warren, of the Fillmore street office of the Western Union, was first, in 1:59¾; Graner, of the Postal Telegraph, second, and Sobell, of the Western Union office in the Flood building, third. After two more of the boys' races came the first heat of the two-lap open, which probably aroused more enthusiasm than any other event.

Hans Ohrt, representing the Olympic Club in this event, was roundly cheered on being introduced, and the various clubs cheered their riders with the old-time club yells.

Ohrt's performance was one of the big attractions of the day, as he had little difficulty in keeping ahead of all who rode against him, and he took part in several races.

The quarter-mile on high wheels, though naturally not much a matter of speed, was highly interesting as a curiosity, and the riders were greeted with hearty applause James Bradley finished ahead of Herman Eggers by a short distance, and H. Hill and Robert Russ came in together a little behind.

Old-Timers Watched with Interest

The track was well filled with the Olympic Club juveniles, who failed to develop much speed, though they made better time than the old-timers. This was followed by the second heat of the two-lap open, after which came the one-lap match race, in which Ohrt finished well in the lead in 1:58, with Hoffman second and Simondi third. The race of old-timers, 30 to 40 years of age, occasioned some excitement, as the participants, all of whom were formerly well known as bicycle racers, have not been riding for a long time. They proved no faster than might be expected, C. C. Metler winning in 2:09, with a long string stretching out behind, and there was a good deal of puffing as the bunch came in. In fact, the real old-timers, 40 to 100 years, made a rather better showing; but both these events were watched with great interest and enthusiasm by the grandstand crowd, which included many boom-day "fans."

Those who entered were Orlando Stevens, Jack Cunningham, "Babe" Gibson, Mike Lind, Harry Wood, Mike Dallenberger, of Denver, Bob Terrill and Harry Fowler. This race started to the tune of "Silver Threads Among the Gold," but finished in lively fashion, Bob Terrill crossing the line in 2:07½, with Lind a close second and Fowler and Cunningham tying for their. After this race a lot of the old-timers were lined up opposite the grandstand and introduced, including Judge Frank H. Kerrigan, of the Appellate Court; Supervisor Jack Hynes, Frank E. Carroll, chairman of the Bicycle Day committee; Walter Foster, of the Bay City Club; Joe Desimone, of the Garden City; Harry Fowler, Robert Long, Tony Delmas,

Harry "Trilby" Fowler, who has not been riding for ten years, gave an exhibition of fancy riding, showing the youngsters the tricks they used to do in the old days; and he was very nearly up to his old form, giving an exhibition that was full of pep, and was greeted with much applause. His appearance was the signal for a hearty yell from the Bay City Club, of which he was a prominent member.

Tire Company Teams in Relay

The final heat of the two-lap event was an exciting affair, but Ohrt maintained his lead in good shape, finishing in 4:24½. The three-lap relay between the tire company teams also offered some excitement, as the Goodrich, Goodyear, Fisk and Firestone teams had been getting in considerable practice.

The day closed with a two-mile tandem race, an event which has not been seen here in a long time, and in which the spectators took a great deal of interest. Ohrt and Hoffman won in 3:39, with Spence and Drury second and Walsh and Thompson third. The summaries of the races:

Novice race for boys over 16, one lap—Earl Thompson, winner. Time, 1:44½.

Messenger boys' race, one lap—Warren, first; Graner, second; Sobell, third. Time, 1:59¾.

Race for boys, 8 to 12, one lap—Fenn, first; Donnelly, second; Berthart, third. Time, 2:25.

Race for boys, 12 to 16, one lap—S. Behr, first; Philip Patterson, second; Lewis Kelley, third. Time, 1:57¾.

First heat of two-lap open race—Hans Ohrt, first; Harry Hoffman, second; H. Spence, third.

Quarter-mile on high wheels—James Bradley, first; Herman C. Eggers, second; Thomas H. Hill and Robert Russ tied for third. Time, 0:35½.

Olympic Club Juveniles, one lap—Phil Patterson, first; George Price, second; Ed. Reuthers, third. Time, 2.08½.

Second heat of two-lap open—B. Cooper, first; C. Girard, second; William Hammilt, third.

Match race, one lap—Ohrt, first; Hoffman, second; A. Simondi, third. Time, 1:58.

Old-timers' race (30 to 40), one lap—C. C. Mettler, first; J. W. Watson, second; H. Wilcox, third. Time, 2.09.

Old-timers' race (40 to 100), one lap—Bob Terrill, first; Mike Lind, second; Harry Fowler and John Cunningham tied for third. Time, 2.07½.

Final heat of two-lap open race—Ohrt, first; Cooper, second; L. Drury, third. Time, 4:24½.

Three-lap relay race for tire companies—Albury (Goodrich), first; Berrberg (Goodyear), second; Wahlsen (Firestone), third. Time, 5:38½.

Policemen's race, one lap—J. Watson, first; C. J. Birdsell, second; T. H. White and Coulter tied for third. Time, 2.39.

Firemen's race, one lap—J. Coughlan, first; W. A. Petri, second. Time, 2:07¾.

Three-lap handicap—Earl Thompson, first; R. Gillette, second; R. Girard, third. Time, 5:10¾.

Two-lap Smith motor wheel race—Linn Howard, first; Charles S. Howard Jr., second; W. E. Wood, third. Time, 3:44½.

Two-mile tandem—Ohrt and Hoffman, first; Spence and Drury, second; Walsh and Thompson, third. Time, 3:39.

23—C. Rabbino	Unione Sportiva Ital	1:45	26:53⅕
24—P. G. Giordano	Unione Sportiva Ital	2:15	27:29
25—W. Stevens	Cedarhurst C. C.	3:15	28:30

quart, riding with the 1 minute bunch, immediately followed him.

Scratch riders began to come in from the forty-fifth position and rode just barely fast enough to account for the time prizes. Tom Bello, of the promoting club, famed for his road, track and flat floor racing, covered himself with glory in winning the first time prize. Fred Woisin, of the Acme Wheelmen, breezing in only a half wheel's length behind Bello, won the second time prize, while the other scratch men all finished within 15 seconds of each other.

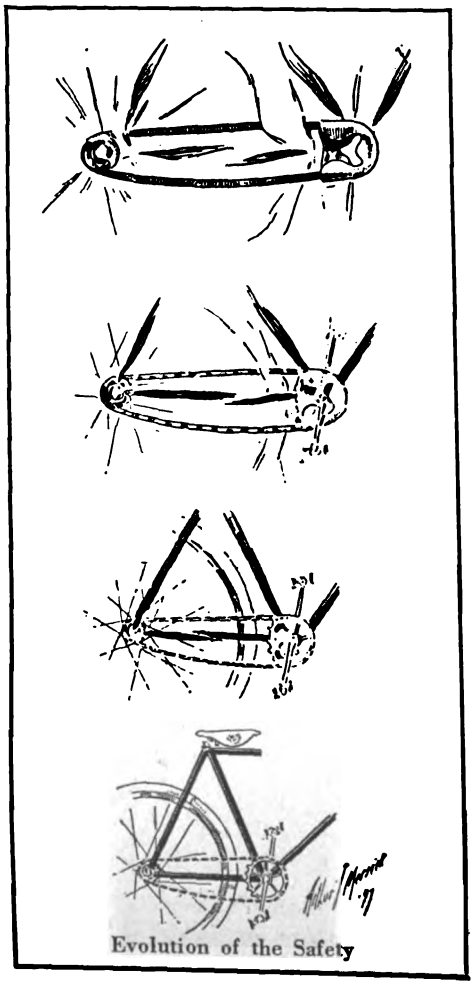
The course was in first class shape for racing, except for a stretch of sand, about one-half mile from the start. But, nevertheless, the jinx was there in Sunday-go-to-meeting clothes. Not less than ten riders had spills due to the crowded condition of the course. Fesselmeyer and E. Kuno probably received the worst injuries and they were promptly attended to by Dr. A. C. Griffin, the chief timer.

All things considered this race was the biggest and most enthusiastic seen around New York in many a year. Its immense success certainly was a splendid tribute to the live wire organization which promoted it, the Unione Sportiva Italiana. The man behind the race, who was plugging for it night and day, is Mr. George Bieregel, who as chairman of the U. S. I. has in less than a year's time developed one of the best cycling organizations in the country.

The team point trophy was captured by the Century Road Club Association, the victorious team being composed of Lipsett, Renz, Steppello, Cestone and Marquart. The points scored by the various teams were: C. R. C. A., 52; U. S. I., 95; Acme Wheelmen, 108; Brooklyn Wheelmen, 119; Empire City Wheelmen, 146. Each of these clubs had five riders on its team, and points were awarded according to the numerical position of the rider at the finish.

The Acme Wheelmen with 22 starters were awarded the club trophy for the largest number of entries. The Empire City Wheelmen, with 18 starters, was second, while the C. R. C. A. was third with 15 entrants, and the C. R. C. of A. fourth, having 10 members in the race.

One hundred and seventy-one entries were received, only 10 riders, therefore, failing to put in an appearance. Above is given the order of the finish of the first 25 men.



Evolution of the Safety

GOERKE SELLS INDIAN BIKES TO PARK COMMISSION

NEWARK, N. J., Apr. 18.—The Essex County Park Commission recently placed an order with Walter Goerke for 12 Indian bicycles. The machines are finished in black with blue striped rims. All of the bikes are equipped with "Blue Streak" Goodyear tires.

Charles Krebs sold a Reading-Standard bicycle to one of the heads of the Prudential Insurance Co., a man who has three limousines to go out in any time he wishes to. He felt that the exercise and contentment of spinning along on a wheel was of more value to him than all his automobiles.

Watson Kluczek has sold 10 New England-B. S. A. racing bikes to lads who have been enthused with the racing fever through the revival of the historic Irvington-Milburn race that will be run off on May 30.

TWENTY-FIVE MILE HANDICAP ON JERICHO TURNPIKE

NEW YORK, N. Y., Apr. 18.—The annual twenty-five mile bicycle road race of the New York Division of the C. R. C. of A. will be staged on the Floral Park-Hicksville course, Long Island, on June 7. The rain date is June 14.

Two Pierce racing bicycles top the list of fifty prizes, which contains some valuable merchandise that will gladden the heart of racing men. The Jericho Turnpike, over which this event is to be run, is in very good riding condition and the C. R. C. of A. officials expect that fine time will be made. William Gold, 374 Third avenue, has charge of entries.

WESTFIELD CO. GIVES CUP FOR C. R. C. A. RACE

NEW YORK, N. Y., Apr. 18.—The latest prize to be received for the ten-mile handicap road race of the Century Road Club Association, which will be held on May 21, is a handsome silver loving cup, donated by the Westfield Mfg. Co., maker of Pope motorcycles and bicycles. Since the announcement last week, additional prizes have been received, important among which is the donation of five silver medals by the Robbins Co., for the riders of the team making the lowest score. Entries are being handled by A. R. Jacobson, P. O. Box 21, Station H, New York.

FONDY'S NEW CYCLE STORE

FOND DU LAC, WIS., April 18.—The Galloway-Buch Cycle Company has opened a salesroom and repair shop at 16 East Second street. E. E. Galloway and August Buch are the members of the new firm. The store to be occupied by the new concern has been remodeled and decorated and will make one of the finest places of its kind in the city. The stock will comprise bicycles, fishing tackle, baseball goods, ammunition, guns and equipment.

The next installment of Kramer's life story will appear in the April 27 issue

MY EXPERIENCES WITH AN ENGLISH MOUNT

Notes on the Behavior of a Triumph on American Roads, With Special Reference to Its Rubber V-Belt Drive and Sturmey-Archer Three-Speed Hub

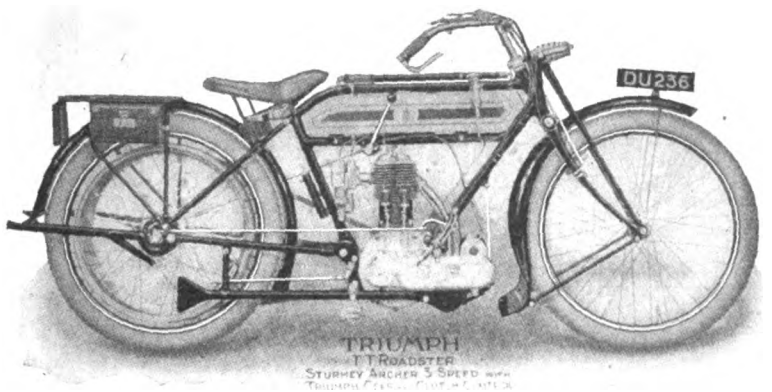
BY C. A. SHAW

EARLY in the spring of 1914 I had the opportunity of buying a Triumph motorcycle, and since it had been for several years my pet desire to try out a British machine, I closed the deal and prepared to sell the mount I had expected to ride.

I bought the machine like a "pig in a poke," never having seen it, and when it at last arrived by freight, it took some thought and ingenuity to figure out the various controls. However, I soon mastered it, and up to the present time have ridden 7,400 miles with the greatest satisfaction. Before getting this machine I had ridden three of our well-known American makes.

The Triumph specifications, briefly, are: four-cycle, single cylinder, 30¼ cu. in. capacity, side-by-side valves, 26-inch wheels, Sturmey-Archer 3-speed rear hub, Bosch magneto, non-automatic carbureter, rubber V-belt drive with variable pulley.

Perhaps the "top-hole" (as the English say) thing about the whole machine is the rubber V-belt drive. I have used the flat belt that climbed the pulley, or slipped, or stretched—though when it was just right, it was very good. And I have used the chain drive, and I know how the chain stretches and the sprocket teeth wear. But the rubber V-belt was new to me. As far as I could learn, it was a sweet drive for about 500 miles, and then you threw the belt away and fitted another; and if it rained the belt slipped and slipped.



The Triumph Model Used by the Author

Reserve Belt Not Needed

So about my first act was to order a reserve belt. Well, at the end of my first season's riding, 3,700 miles, the original belt was still in first-class shape. And though ridden in some heavy rains there had been no slipping noticed. The stretching had been slight, not as much as with a chain of the same length.

The belt fasteners are provided with connecting links of three different lengths. If the belt becomes slack, slip in the next smaller links. If, with the smallest link in the belt is still not tight enough, cut off an inch and start again with the longest link. The job of shortening a belt is not to be compared with that of shortening a chain.

I have ridden 1,500 miles with no attention to the belt beyond lubricating the fastener occasionally. Think of riding all the season and having your driving mechanism running just as smoothly and transmitting just as much power at the end of the season as at the beginning; and that with practically no bother of cleaning or oiling. Then, too, the cushioning effect of a belt adds to the life of the engine and the whole machine. No tearing out of spokes with a belt drive.

Some one will say that you can't get the speed with a belt that you do with a chain. A conclusive answer to this is furnished by the speed records made by belt-driven machines on the Brooklands track.

It is inexplicable to me that the rubber V-belt was dropped by our factories in 1910-1911, and that no one has taken it up over here since. Practically all the English machines have their final drive by belt, and they wouldn't stick to it if it were unsatisfactory. My belt is a ⅞-inch, and is fully adequate for my work. Certainly a 1¼-inch or 1½-inch belt would hold the largest twin made.

The front pulley is a variable one. By slacking the end nut, the outer side of the pulley can be screwed in or out, thus changing the depth to which the belt seats itself, and consequently the gear ratio. This is, of course, a great advantage if one does varied riding. I use a 4¾ gear on easy going, but for hilly or sandy country it is a matter of but a few moments to shift the pulley so as to give a 5¼ or 5½ ratio.

With a direct drive of 4¾, my Sturmey-Archer 3-speed hub gives a middle drive of 7½ and a low of 11½. This hub is now familiar to many through its use on bicycles, so I will not describe it in detail. With the exception of a broken gear actuating rod, I have had perfect satisfaction from it. Its great advantage is that change of speed is done without de-clutching. Just lift your exhaust valve and shove the speed lever over. Middle and high speeds, of course, are used mostly.

I weigh 160 pounds and have climbed Mt. Wachusett on this 3½ h. p. machine, going into third speed only the last quarter of a mile. Contrary to usual customs, the gears are lubricated by sperm or a light bicycle oil. Careful examination shows no signs of wear on the gears.

The cylinder is a beautiful casting, with thin walls, and thin, deep fins. Its cooling properties are excellent, so good that except in hot weather, oil suitable for water-cooled engines gives the best results. In summer I use a heavier oil, like Mobil-oil A.

The piston is light and quite different from our usual style. It is straight-sided and close fitting, having no oil grooves. The two piston rings are placed one at the top of the piston and one at the bottom, an arrangement that is supposed to secure more even wear of the cylinder walls. There is always some wear in the upper ring slot of a piston, and the manufacturers can furnish rings .005, .010 or .015 inch oversize (width) so there never need be any up or down play. This is an important point in keeping the compression good.

Compression Uniformly Good

The valves are side-by-side, and had run well over 3,000 miles before there was any need of grinding. The compression has been uniformly good, there never having been a time when by standing on the pedal I could force it over against compression. Cylinder and piston have been cleaned of carbon every thousand miles. At the same time I fit new inlet and exhaust valve springs (which I can buy at four cents each). I believe firmly that fresh springs and smooth lubricated movement of the valves in their guides have a lot to do with the "ginger" of a machine.

The carbureter is non-automatic, i. e., has two levers which by Bowden wires actuate the throttle and the air. When the throttle is opened the air must be opened correspondingly. As both levers can be moved with the finger, this is easily done. The great advantage is that the mixture is absolutely at one's control. In starting

(Continued on page 34)

PUBLICATION of Mr. Shaw's article is not to be construed as placing this journal on record in behalf of any design of motorcycle, or any feature of equipment. It is simply presented for what it is worth as a statement of actual experiences on American roads with a type of motorcycle representative of popular British designing, and differing radically from our own standard lines.—The Editor.

INDIAN CLIMBS TO SENSATIONAL VICTORIES!

Wins Two Pacific Coast Hill Contests Against Top Notch Fields

IT'S Powerplus again!

Pitted against picked men and special motors—facing a 65 to 71 percent grade 800 feet long—Powerplus outdistanced them all and once more gave a brilliant demonstration of what its name means.

The San Juan-Capistrano Hill Climb, April 16, was another unfurling of the flag of Powerplus real stuff—another declaration of Powerplus in-

Digitized by Google

dependence—another Powerplus celebration of thoroughbred ability to accomplish, to win!

The hill upon which this competition took place was practically unclimbable, so steep that the machines had to be lowered to the starting point with ropes.

But Powerplus had it on the hill when it came to the final score. And Powerplus means more than ever to the thousands of spectators who saw this wonderful performance.

The only machine to give Powerplus real competition was another Powerplus, which actually went 18 feet further than any, but was disqualified for running off the course.

The winning machine was a 1916 Powerplus Cradle Spring Indian ridden by Myron Warner.

The Indian Featherweight had its own little triumph by climbing half the distance of the winner. Only six machines beat the Featherweight mark.

Then there was San Jose April 9.

This course was an incline ranging from 45 to 58 percent up the roadless mountainside.

One trade paper refers to this climb as the "most daring and spectacular ever pulled off in the history of Coast motorcycling."

In the professional division Indian, ridden by Ben Torres, finished

FIRST

In the amateur division Indians, ridden by Charles Roque and E. Ballantyne, finished

FIRST AND SECOND

A Pacific Coast wire says that this was the most decisive hill-climb victory in the history of motorcycling.

Two Views of the Variable Pulley

(Continued from page 31)

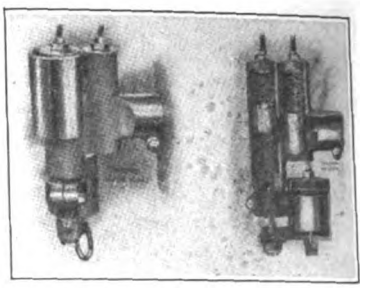
one can make the mixture as rich as necessary, and then vary it as circumstances indicate. Running fast in hot weather one may increase the air considerably. When hard hills come the mixture may immediately be made richer. As to economy of fuel, I made almost exactly 25 miles on a measured quart of gasoline, with a running time of one hour; and this has been about my average. For instance, I rode 117 miles from Portland, Me., to my home on five quarts of gas, and had a little left.

My tires are English ones, 26 x 2¼ on the front wheel, 26 x 2½ on the rear. They seemed at first sight thin and flimsy, being much lighter than our American product, but I have found their wearing qualities all that I could wish.

The magneto is chain-driven, the Renold chain being wholly enclosed. For this reason it can be kept thoroughly oiled, yet free from dust, and there is remarkably little wear or stretch. I have found it necessary but once to take up slack in the chain by sliding the magneto forward on its platform. The play or back-lash as shown by the interrupter is decidedly less than in a gear-driven magneto which has run the same distance. It is highly important that, with the uneven balance of the armature, the drive of a magneto be smooth.

The machine was equipped with an excellent Brooks saddle, but had no springing other wise than this (except for spring front forks). This was a real defect to me, but I remedied it by fitting a well-known shock-absorber of American make.

Perhaps the best way I express my satisfaction with this machine is to say that I have no real desire to change, or get a new one. Yet I must confess that down deep in my heart is a yearning to try out a Douglas opposed-cylinder twin. Sometime—maybe!



The Carbureter, Complete and Cut Away

WHY COWBOYS LIKE THE POWER "HOSS"

Ringling (Okla.) Puncher Hopped From a Pony Saddle Onto a Motorcycle Seat, and Says the Machine Pays Its Way—Telephone Companies Make Speedy Repairs in Oil Fields by Using Machines

By W. F. KERR

RINGLING, Okla., Jan. 28.—Walter Gann, once a cowboy on the big prairie ranges of the Chickasaw Nation, now punches his cattle and drives home his horses from the pasture on a motorcycle.

A. F. Decker of Oklahoma City, equipment installer for the Pioneer Telephone Company, took time into account, both for his company and the Healdton oil field operators, and threaded the field with telephone wires, with the motorcycle as his vehicle of transportation.

Thus has the motorcycle filled a part of the long breach between the cattle raising epoch and the oil epoch of Southern Oklahoma.

Usefulness Proven

It has not displaced the horse on the small ranches that are left in this region, and it will not so long as cattle are collected in large herds, but it is a handy vehicle about the ranch and is being used in many emergencies. Its introduction gave cowboys an excuse for idle merriment and all manner of jests, but its usefulness made it a substitute for the cow pony when necessity demanded quick errands. On his pony the old-time cowboy galloped twenty miles for a doctor and was gone half a day; on his motorcycle the utility man of the ranch gets a doctor in one to three hours.

The Indian that Gann introduced into the ranch and farm section of Jefferson County was the first racer here. During a carnival at Ringling last year he won his initial race, beating the records of some semi-professionals who were attracted to the meet from other parts of the State. This year Gann has issued a challenge to all motorcyclists of this and adjoining counties to meet him in another contest. An excellent track has been laid out near here for all kinds of racing.

Walter Gann, Who Uses a Motorcycle Regularly on His Ranch; Above, A. F. Decker, a Telephone Man

"I like racing as a pastime," says Gann, "and really have an ambition to go farther into the racing game, but my chief object in owning a motorcycle is to make it pay its way in usefulness. I drive up the horses and mules and occasionally do a little cow punching on it. I ride it to town for purchases and to have tools fixed at the blacksmith shop. I made one trip to Wichita Falls and return, a total distance of 84 miles, in one day, which is somewhat of a record among motorcyclists in this part of the State."

In Oil Fields

The use of the motorcycle in the oil field, so far as Southern Oklahoma is concerned, has not developed save as it relates to telephone operations. In no other rural community than an oil field is good telephone service so insistently demanded. Every manager's and every superintendent's office is equipped with a telephone. The telephone office in Wirt, an oil field village, six miles from a railroad, has done over $1,000 of business a month for several months.

New toll lines were demanded early in the oil operations. The quick repair of broken lines was a necessity. With the use of the motorcycle A. F. Decker installed the lines in the shortest possible time and thus made the motorcycle part of the permanent equipment of the telephone office in Ringling in order that delay in repairs might be forestalled.

Where Autos Can't Go

It is interesting to note in closing that a few scouts for oil companies and lease buyers ride motorcycles, particularly in broken sections of country where automobiles would be impractical, and where animals have difficulty in traveling.

TO FACILITATE MOTORCYCLE AND TIRE SHIPMENTS

Rubber Club of America Has Worked Out a System by Which the Tire Problem As Applied to Exported Cycles Is Considerably Simplified—Meets English Requirements

NEW YORK, Apr. 7.—The Rubber Club of America, Inc., has worked out a scheme by which the shipping of both automobile and motorcycle tires to European ports will be facilitated. The stringent regulations imposed by Great Britain have caused some hardship, and it is the purpose of the Rubber Club to arrange things so that the tires needed for any legitimate shipment of motorcycles can be obtained on the other side without difficulty, or sent through with the motorcycles themselves.

Arrangements have been made by which a motorcycle manufacturer can fill out a "Shipper's Declaration" and file it with the secretary of the Rubber Club of America, 17 Battery Place, New York City. A copy of this declaration is given to the shipper, another copy remains with the secretary of the Rubber Club and a third copy goes to the War Trade Department, 4 Central Buildings, Westminster, S. W., London, Eng.

The shipper will forward his copy of the declaration to the London agent, who is to make application to the English War Trade Department for license to obtain the tires. His copy will then be compared with the copy forwarded to the British authorities by the Rubber Club of America, and in that way it is hoped that the Britishers will ultimately be convinced of the legitimacy of the motorcycle shipment for which the tires are needed. In other words, the arrangement will give formal proof that the motorcycle tires applied for are intended for use on motorcycles actually shipped from this country, and that they will not be used as teething rings or life-preservers.

As England has for the present barred motorcycle imports, the proposed system will apply only to motorcycles and tires shipped to neutral countries, or to the Entente Allies, which shipments must be passed upon by the English authorities before they are allowed to go through. The declaration above referred to will provide for re-shipment of the motorcycles and tires from England to the European country for which the goods are intended.

Full details concerning the system can be obtained by writing to the secretary of the Rubber Club of America, at the address given above.

A SERVICEABLE AND LOW-PRICED COSTUME

Describing a Riding Outfit for All-Season Use Which Is Conservative in Price and Appearance and Extremely Comfortable

By J. H. WHITNEY

IT is my opinion that a riding costume should combine a regular business suit, or at least be as presentable as such, with the necessary outfit for motorcycling, and should, furthermore, be economical. In my work as a salesman, I have found that a neat appearance was an asset, and so during the last four seasons have been using the costume described below. Without the leggings, the wearer appears but little different from any man on the street.

Beginning from the ground up, the first item is a pair of storm rubbers. These, in connection with the leggings, keep the feet clean in dry weather, and both clean and dry in wet weather. The leggings come over the knee and clasp at the top, being fitted about midway with a patent hook-fastener. I have been using a slightly different and shorter type, with a removable piece at the top, but I doubt whether this latter type can now be obtained. Long experience with the leggings and storm rubbers has proved that legs and feet are kept dry, even when riding through water.

Coat and Muffler

The coat is large and roomy. It is made of olive tan covert cloth, and is waterproofed. It has a convertible collar, which can be buttoned closely under the chin or laid flat on the shoulders. When the coat is removed, the suit-coat is there, fresh and clean. For neck protection, I use a woolen muffler, with snap fasteners in the back. This muffler has a long front to come down over the chest, which is fine for Winter winds. Naturally, this article is not used in the Spring and Fall.

The question of goggles is solved, I have found, in celluloid ones with full eye-pieces, held to the head by an elastic band. I have been off too many times to trust my eyes behind glass. This type of goggle has nothing to interfere with the vision and gives a wide range of sight all around. As goggles scratch easily, they should be carried in a case, or in a small mailing tube with a screw top.

For Winter riding I use muskrat fur gauntlets, lamb-lined. The gloves should be loose, for tight gloves of any kind mean restricted circulation and cold hands. For Summer, I would not recommend any particular glove, as each rider has his favorite. Good canvas gloves with leather fingers are good for warm weather. Personally, I prefer to ride barehanded in Summer.

J. H. Whitney

A rough pair of canvas gloves, listing at ten cents at any variety store, is good to keep hands clean when making adjustments on the road. They should have gauntlets, of course. When in the toolbox, these gloves will prevent the contents of the box from rattling.

NATIONAL TIRE ASS'N TO MEET IN LOUISVILLE

LOUISVILLE, Ky.—The National Tire Service Association will meet in this city in a few days to complete its organization, adopting by-laws, etc. The association was recently organized at Indianapolis to co-operate in extending credit, promoting efficiency and in giving economical tire service, as well as exchanging ideas on operation among its members. Officers of the concern are Roy E. Warner (Firestone), president; F. C. D. Dobson, St. Louis, secretary.

ALL ENGINES MUST HAVE MUFFLERS

MT. GILEAD, O.—The city fathers have passed an ordinance to regulate gas and gasoline engines. This measure provides that every gas and gasoline engine operated within the village limits must be provided with a muffler, and without stating that the muffler must be used on all occasions, further provides "that any person violating said ordinance shall, upon conviction, be fined not to exceed $25."

CONTRACT FOR ROAD SIGNS

COLUMBUS, O.—The commissioners or Franklin County are arranging for a contract to place distance and direction signs at all intersections of important roads in the county. This will follow the terms of the Cass road law passed at the last session of the Ohio General Assembly.

PLANNING NEW ENGLAND TOUR

READING, Pa.—Walter Fegley, William Dolan and Floyd Bachman, members of the Reading M. C., who recently invested in new machines, have announced that they will make a two-weeks' tour through New England in June.

STATE LAW SUPERSEDES BUFFALO ORDINANCE

Assistant City Attorney Advises Motorcyclists to That Effect but Says Local Fees Cannot Be Returned Without Councilmanic Action

BUFFALO, N. Y., Apr. 15.—"The motorcycle license ordinance of Buffalo, which was passed by the Common Council in 1914, is no longer in force," declared Assistant City Attorney Smith to the **Motor Cycle Illustrated** representative when questioned as to what effect the State license would have on the Buffalo ordinance.

After making this declaration he quoted Chapter IV, Section 55, Subdivision 10 of the city ordinance, which is as follows: "This section shall not apply to vehicles owned and propelled or ridden by non-residents of the city of Buffalo coming into or passing through the city not oftener than once a month on the average, *and it shall be deemed repealed and superseded by any State law which may be hereafter enacted requiring any registration numbering of motorcycles with the Secretary of State.*"

When asked whether the 1916 license fees already paid to the city would be returned to the riders he replied: "Such fees cannot be returned by the city to riders unless the Council passes a special resolution which will permit the return of such fees."

April 10.

Editor: I would be lonesome without your journal. Please renew my subscription. I am also suggesting the name of a friend who is interested in Motor Cycle Illustrated.

A. E. RADCLIFFE.
Chicago, Ill.

April 6.

Motor Cycle Illustrated: Enclosed find my check for $2.00 for renewal of my subscription. I can't get along without it. IT IS GREAT.

HAROLD S. BROWN.
Starke, Fla.

"GREAT HELP TO ALL DEALERS"

Editor: Enclosed find order for renewal of Motor Cycle Illustrated. I am well pleased with it, and am sure that it is a great help to all dealers.

Genesee Vulcanizing Works,
H. J. Scherer, Prop.
Buffalo, N. Y.

April 10.

Editor: Motor Cycle Illustrated sure is some authority on the motorcycle. You ought to come round here on Saturday and see the boys *grab for it!*

PHILLIPSBURG CYCLE SHOP,

Phillipsburg, Mont.

ATTRACTIVE PROGRAMS FOR FREEPORTERS

Schedule Calls for a Social Outing or Endurance Contest Every Two Weeks During the Summer; Expect to Ride to Dodge City Race

FREEPORT, Ill., April 18.—The Freeport Motorcycle Club will make itself a prominent figure in local as well as national motorcycle circles in a fine program of tours and endurance runs laid out for the 1916 riding season.

Will Help Touring

The schedule includes two trips to Dubuque and return by way of Stockton, several trips to Grand Detour and one to Chicago. There will be either a social run or endurance ride every two weeks, weather permitting. Besides getting pleasure out of its trips the Freeport club proposes this year to help the good cause of touring by re-marking all of the telegraph poles along the course of the Grant highway and also will erect a number of cross-board signs at corners to show directions and mileage to Freeport.

Pending final word from Dodge City the Freeport boys are planning to make the trip to the famed speedway this year and expect to have twenty-five in the party. The party will leave Freeport on June 30 and figure on reaching Dodge some time during the day before the race. They will start back to Freeport on July 5 and make the return by easy stages.

The Freeport club now numbers 130 in its membership.

Questions and Answers

This Department Is Conducted For Your Special Benefit, Mr. Rider, and You Are Invited to Write For Information as Often as You Please. State Your Case Fully in the First Letter

MOTOR SHOULD BE RUN IN FOR 500 MILES

I WOULD like to know just how far and at what rate of speed to run my 1916 twin before letting it out. I intend to ride the mount solo but figure that a passenger could be carried.

River Edge, N. J. H. A. SHIELDS.

To run in the new motor, do not exceed a speed of 25 miles per hour for the first 500 miles. Give plenty of oil, as the bearings need running-in to fit themselves to the shafts. We would not suggest carrying a passenger until the 500 miles is up, as it puts an increased load on the motor.

METRIC RATING OF READING STANDARD TWIN

NOT being familiar with engine ratings in the United States, I ask you to tell me the cubical displacement of the Reading Standard twin, also its bore and stroke in millimetres. Please give name of the nearest representative.

Bilbao, Spain. J-M. G. SANCHEZ.

The piston displacement of the Reading Standard twin is 1,013.8 cubic centimetres, while the bore is 85.6 mm. and the stroke is 95 mm. The nearest representative, we believe, is The Reading Standard Motorcycle Co., 28 Baker street, Portman Square, London, England. We doubt very much if you can get any motorcycles from England at present, owing to the rules of the War Office, so suggest that you write to the Reading Standard Company, Reading, Pa., U. S. A.

NO RECENT DEVELOPMENT IN ELECTRIC STARTING

PLEASE put me in touch with the latest development in electric starting and electric systems for motorcycles. I would like a list of articles in which these have appeared recently.

Newark, N. J. H. C. HIEDRICH.

There has been no development made public in electric starting for motorcycles since the appearance of the Hendee Special, made by the Hendee Mfg. Co., of Springfield, Mass., in 1914. This machine had a Siemens-Halske type of dynamotor mounted on the left side of the crankcase, the machine acting as a motor to start and as a dynamo to generate current for lighting, ignition, etc. It has been withdrawn from the market for some time now, and no manufacturer has taken the matter up since. Regarding electric systems, we take it that you mean combined lighting and ignition systems, and therefore refer you to the Remy Electrical Co., Detroit, Mich.; the Splitdorf Electrical Co., of Newark, N. J.. and the A. B. C. Generator Co., of Los Angeles, Cal., makers of such systems.

MOTORS ARE NOT BUILT WITH SUCH CAPACITY

I AM asking you to put me in touch with an American-made four-cylinder motorcycle, with a piston displacement of 76 to 78 cubic inches. I require a machine to transport a double-seated sidecar with two adult passengers and an occasional man on tandem for use in the north of England. The mount must have a three-speed gear.

Sheffield, England. S. SMITH.

The only four-cylinder mount made in this country is the Henderson, of about 61 cubic inches (1,000 c. c.) displacement. A former model of this machine was of about 1,100 c. c., but this would still be under your requirements. To the best of our knowledge, there have been no motorcycle motors with four cylinder made in such capacity. However, you might communicate with the local Henderson dealer about the 1915 models (1,100 c. c.) and have a gearset fitted.

GRIND IN EXHAUST VALVES AND CLEAN MUFFLER

MY motor tends to run hot most of the time and I cannot get speed for more than 40 miles at a stretch. During that period the speed is all that I can wish for, but I would like to be able to hold a fast speed for more than that short distance.

St. Louis, Mo. S. M. MULLINS.

We suggest that you try altering the mixture, weakening it slightly to see if an improvement can be noticed. If this will not effect a remedy, clean out the cylinders and grind in the exhaust valves, adjusting the clearances under the ends of the stem. The muffler and exhaust pipes should be cleared of any carbon, also. If you have not altered the compression of the motor in any manner, this should effect a remedy.

SPEEDSTERS ON LIGHTWEIGHTS

Ed. Brink (Left) and Bob Larsch, Two Seasoned Track and Road Men Who Boost the Dayton Motor Bicycle

REPLACING WORN JUMPERS WILL EFFECT CURE

MY motor is a 1915 model twin and is in good shape for use this season, but does not satisfy me as regards speed. I have tried all possible adjustments of carbureter and valves, also retimed ignition and cleaned out carbon from cylinders, muffler and exhaust pipes. The bearings are in good order and there is no looseness. Please tell me what to do. JOHN RYAN.

Indianapolis, Ind.

Probably the little jumpers or rockers on which the cams act are worn. Compare these with new ones, and if signs of wear are seen, put in a new set. The wearing of the jumpers is often a cause of indifferent performance on a motor which is one season or more old.

DIESEL MOTORS NOT SUITED FOR MOTORCYCLES

TO settle an argument, please inform the writer why Diesel motors are not used on motorcycles, and whether there would be a market for a machine so fitted.

A. K. BLANCHARD.

Harrisburg, Pa.

Diesel motors use a compression of about 500 pounds to the square inch. Starting would be somewhat difficult, unless a set of inlet and exhaust valves were fitted, which would spell complication. The weight per horsepower of such a motor would be very heavy, as it could not run at such high speeds as the regular motors. A Diesel motor must be run at a constant speed to be effective, also. The exhaust would sound like a cannon, as no muffler of proper size to silence it could be fitted to the machine. Such a motor needs a fuel-injection pump and an air-compressing cylinder to make it operate.

Our Canadian Letter

"BUY-A-BIKE" WEEK RESULTS STILL BEING NOTICED

TORONTO, Ont.—The recent "Buy-A-Bike" Week throughout Canada was no flash in the pan. It has now been proved that the big sales demonstration formed only the start for general and continuous enthusiasm, and it is not all "just fireworks." Bicycle stores everywhere are wearing a bright and prosperous-looking front.

An evidence of the continuity of bicycle interest is contained in the enduring support of the newspapers. Since the Bicycle Week, three weeks ago, the daily papers have continued to print many bicycle news items and articles. Moreover, those newspapers which did not warm up to the Bicycle Week "proposition" are now awake and are trying to cover lost ground, apparently. In other words, the editors who did not realize the dimensions of the present bicycle situation at the time of the sales demonstrations have had their eyes opened and bicycle news is now eagerly used.

The "hit" of the sales campaign has probably been the reference to the use of the bicycle among the society people at Palm Beach, Fla. Society folks in the large Canadian cities are now talking about the bicycle and the society pages of the newspapers are printing predictions that the wheel will find favor among the ultra-rich once more.

BIG RACEMEET IS PROMISED FOR MONTREAL

MONTREAL, Que.—The directors of the Montreal Automobile Trade Association have taken in hand the arrangements for the holding of the greatest motorcycle racemeet ever staged in Montreal. This will be held next July on the half-mile track at Delorimier Park, and will probably constitute the Quebec motorcycle championships.

According to the announced plans of the local association, it is the intention to encourage amateur racing as much as possible. The Montreal promoters are in communication with the officers of the Canada Motorcyclists' Associaitnon in regard to the championship feature.

DUNNVILLE WANTS THE C. M. A. CHAMPIONSHIPS

DUNNVILLE, Ont.—The Dunnville Fall Fair Board has sent a request to the Canada Motorcyclists' Association for the Ontario championship motorcycle races for 1916. The prime mover in the application for the contests is George H. Orme, a wealthy citizen of Dunnville, and he is so enthusiastic about the probable races that the C. M. A. will likely hold a tour from two or three different cities to this place for the occasion. The meet will probably be a two-day affair and a great many valuable prizes will be hung up. Invitations will be extended to the racing riders of Buffalo, Rochester and Detroit to take part in the championships.

The plans of the Canada Motorcyclists' Association call for the holding of tours from London, Toronto, Hamilton and Buffalo. These rides will not take more than one day, at the most, and other features of the carnival will be concerts, a business meeting, a reception by the local mayor and the fair itself. The carnival will probably be held in August.

HALIFAX RIDERS MAY SOON ORGANIZE A CLUB

HALIFAX, Nova Scotia.—Way down here on the Atlantic seaboard of Canada the hundreds of motorcyclists are entering upon another season of motorcycling delights. The local riders, in particular, enjoy to the limit the pleasures of motorcycling. Halifax is the center of both the trade and sport in Nova Scotia and nearly all makes of machines are represented here. Good roads lead to all the principal towns of the Province and the scenery en route is glorious.

With the increasing number of motorcycles in Halifax, the riders are talking about the formation of a club which would arrange special tours at frequent intervals. One of those who are interested in the organization of a club is Ernest Mont, who has already been in communication with the Canada Motorcyclists' Association on the subject.

MAY HAVE SPECIAL COURT FOR MOTOR CASES.

TORONTO, Ont.—With the coming of license reciprocity between Ontario and other Provinces and States, which will undoubtedly bring a large influx of outside tourists into this jurisdictional area, the motorcycle and automobile authorities of Toronto are urging a reorganization of the court system with respect to the hearing of motor cases. At present the wheels of justice move slowly, and motorists, including motorcyclists, frequently are put to great inconvenience and suffer considerable loss of time through the slowness of the present court system.

Toronto motor vehicle users have asked for a special court in which their cases may be heard immediately an alleged offense has been committed. This new feature would also include a night court. With a change in methods, motorcycle tourists from the States would not be delayed in case of infraction of speed laws or other regulations. At the present time a motor case is seldom heard before three or four days or a week has elapsed. Sometimes a summons to appear in court is delayed for several days and frequently a rider is unable to remember any circumstances of an alleged offense.

ADVERTISED MOTORCYCLES HE DIDN'T POSSESS

GUELPH, Ont.—A stir was caused in local circles this week when Roy Cummings, a guard at the Ontario prison farm here, was arrested on the charge of using the mails for fraudulent purposes in connection with the sale of motorcycles which, the authorities declare, were non-existent. He placed small advertisements in the papers in which he offered to sell motorcycles on payment of $50 down and small installments each week.

Prospective purchasers were instructed to mail orders to a post-office box in Guelph which he had rented under an assumed name. James Hewson, of Toronto, was one of those who were tempted to buy, but he came to Guelph in a hurry to get his money back. The accused also found it necessary to pay Hewson his expenses for the trip. Cummings is being held pending an investigation. He has pleaded guilty.

VANCOUVER RIDER WOUNDED AT THE FRONT

ANOTHER Vancouver hero has been heard from. Friends of Lieutenant A. D. Bell-Irving have just been advised that he was wounded recently in action. The lieutenant left Vancouver attached to the 16th Battalion Overseas as a motorcycle dispatch rider. Later he transferred into the Royal Flying Corps after gaining a lieutenancy in the Gordon Highlanders, one of the best known Scotch regiments of the kilties.

George Sellers, of Langley Prairie, has bid farewell to the Dominion, in charge of a cyclists' detachment destined for active service in the war theatre of Europe.

Local motorcyclists have shown no great desire to take out their licenses in a hurry. But the few that have done so are sporting with evident gusto the new number plates, the color scheme of which is white and yellow.

Business is quiet in Vancouver these days, but all of the local dealers are on the job circulating catalogues among prospects and boosting the new models.

A BIKE SHOP FOR BEAMSVILLE

BEAMSVILLE, Ont.—The quiet little town of Beamsville is to have a motorcycle and bicycle store. James Culp is the aggressive resident who will be the proprietor of the shop. It is next door to Tallman's barber shop.

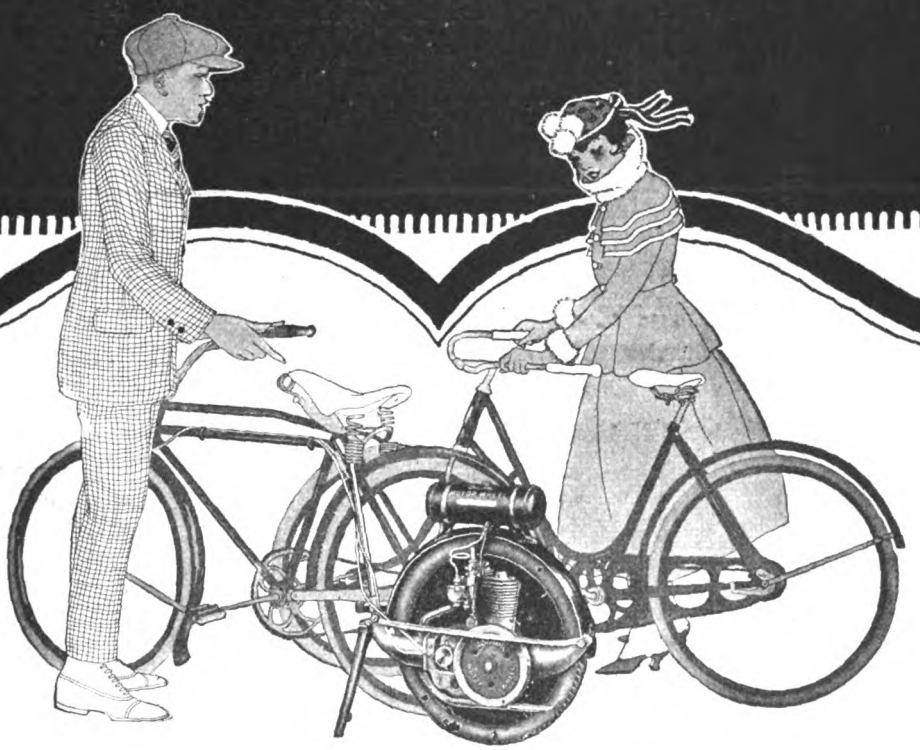
Another Way to Boost Sales



Smith Motor Wheel
DETACHABLE

JONES was a SMITH MOTOR WHEEL Dealer—one of the live kind. He got to thinking of how he could get out his Demonstrator more of the "built-in sales" that the Milwaukee office was always talking about.

And he discovered the way. Here it is, and maybe it will be a friendly tip to a brother dealer who thinks *his* cash register is lagging a bit.

Jones lived in a factory town. Distances were great—to and from employment—for the factory men. Street car service was—well, just so-so.

Jones had a bright idea. He worked on several prospects and secured a man at one of the biggest factories. This first rider used his machine to and from duty.

Pretty soon Bill and Jim and Jack wanted SMITH MOTOR WHEELS, too. The new way of coming and going—independent, easy, no pedaling, no delays and no dirt—appealed to them. And the first rider passed the good word along.

New prospects streamed into Jones' store. And his orders multiplied day by day.

And that's the way the most successful SMITH MOTOR WHEEL dealers are turning the trick. Just a few minutes of demonstration and the device wins a new friend. Just five minutes to attach it to any bicycle and the sale is made.

Naturally, you do not object if your customer wants to buy a brand new bicycle besides. And that's what 60% of the SMITH MOTOR WHEEL purchasers will do. Tires, appliances and accessories receive a boom as well.

It pays to be Motor-Wheeling Headquarters in your community.

In certain localities we have not as yet appointed representatives. We invite correspondence with established dealers.

If the name "Smith Motor Wheel" is not on the flywheel of your motor, it is not a Smith Motor.

THOROUGHNESS MADE HIS BUSINESS THRIVE

Intimate Knowledge of Machines and Means of Selling Them Built Up William G. Schaeffer's Trade—His Wife a Valuable Assistant in Store and on the Road

By T. R. HUGHES

FIFTH IN A SERIES OF SUCCESS STORIES ABOUT DEALERS

William G. Schaeffer

FIVE years of steady climbing, with an increased business and growing capital each season, has been the record of the Schaeffers, otherwise the Penn Cycle Company, with headquarters at 357 Penn street, Reading, Pa. I say, the Schaeffers, for Mrs. William G. Schaeffer has done much to make her husband's business a success during that period. The business since its start has been one devoted to motorcycles and bicycles only, no side-lines having been taken on or found necessary.

William G. Schaeffer has been actually connected with the motorcycle and bicycle business for fourteen years. Beginning in 1902, he was superintendent in the factory of the Reading Standard Company, in Reading. This position he held for eight years, after which he decided to go in business for himself. He accordingly opened a store at 20 South Fourth street, in 1911.

His factory experience gave Schaeffer a valuable groundwork which few dealers could obtain. Nothing about a motorcycle's make, cost or repair was unfamiliar to him. He was familiar with the sales end of the company's business and was a first-class rider. He has lost none of these advantages with the passing years, and being a man of great business energy, his success has been a matter of course. He handles the Reading Standard, Henderson and Excelsior for Reading, and has recently taken on the Smith Motor Wheel.

Mrs. Schaeffer is the only woman rider in that section of Pennsylvania who operates a motorcycle herself. With the opening of the store on Fourth street, she learned to ride, and take care of herself in all matters when on the road. She can repair tires and fix up all but the worst of motor troubles. Her tuning of a motor is better than that of the majority of male riders in and around Reading. She thoroughly enjoys the sport and recommends it to other women. But while a devotee of motorcycling, she by no means neglects her family, and keeps up a model home. Mrs. Schaeffer is so convinced of the healthfulness of riding, that she is getting a sidecar to enable her to take her little daughter or some friend on her trips.

Mrs. Schaeffer's Business Ability

Mrs. Schaeffer showed her business ability most effectively several seasons ago, when her husband was laid up for a considerable time. During his illness, she conducted the establishment in A-1 order and left nothing to be done when her life partner once more got into harness. She is a clever saleswoman and gives valuable aid during rush times in the store.

Mrs. Schaeffer looks back with pride to her first run riding her own machine. It was a Reading Standard and the run was to Hartford, Conn., from Reading, 150 miles. This was in 1908 and since then she has made as much as 300 miles in a day. At present she is riding a Henderson. She has served as chaperone on most of the club runs near Reading for several seasons.

Mrs. W. G. Schaeffer

In 1913, the Schaeffer store became too small and a move was made to the present quarters on Penn street. The store entrance is on this street, and the building runs for 270 feet through to Court street, where the repair shop is located. The establishment is headquarters for a very large section of the motorcycle fraternity in Berks County, both as club members and unattached riders.

"The square deal to every customer, in the fullest sense of the word," is what Schaeffer says has done much to make his business a success. "A dealer should be thorough. He should make friends of all his customers and they will do the right thing by him in return. A thorough knowledge of the machine a man sells and how to sell that machine to the man who wants to ride but who is unconvinced as to the motorcycle he wants, means business and more business for the dealer. Encouraging the club spirit not only increases a dealer's own business, but helps to spread the pastime and benefits the trade in general."

Will You Spend

2c. to make $109?

That's the proposition — not very expensive for *you*, is it?

And what others have done you can do.

By spending 2c. for a stamp and by mailing the coupon at once to us, requesting

THE NEW SCHICKEL SALES PLAN

you stand a pretty good chance of making that 2c. earn $109, *and more, too,* for you. Success is only another name for realized and utilized opportunity. Here's an opportunity—are you alive enough to realize it and grasp it? If so, *act at once.*

DEALERS FIRST

The dealer's best interest has been considered *First* and finally,—has been viewed from every angle, moreover, when evolving

OUR NEW SPECIAL DEALER'S CO-OPERATIVE PROFIT-SHARING PLAN.

This selling plan is not only *original* in its method, but *unusual* in its *liberality*. It provides for an adequate appreciation of dealer's selling difficulties and offers a handsome reward in just recognition of his sales efforts. It helps to get and helps to sell the Prospects. It helps to ginger up Ambition and to fire up Energy to white heat effort, for it's full of *incentive* and *generosity*.

Do *you* want Bigger and More Assured Profits? Are you fair minded and willing to be shown? The best way to answer "Yes," is by acting on the above suggestion and MAIL THE COUPON.

Immediate Deliveries!

HOW TWO METROPOLITAN DEALERS GOT "HEP" TO MIAMI POWER BIKE

NEW YORK, N. Y.—Harry Gliesman, Miami traveller, signed up two more dealers to handle the Miami Power Bicycle last week. One was Francis D. Stanley, at 1209 Flatbush avenue, Brooklyn, and the other was W. R. Muller, of 1435 Second avenue, this city. Both dealers are live-wires and have been in the cycle business for a number of years.

Gliesman was riding one of the little four-strokers along Flatbush avenue after looking up an inquiry and was hailed by Stanley as he passed the latter's store. After a few minutes' talk, Gliesman put the Miami through its paces and Stanley was well pleased with its performance. While the demonstration was going on, a lady stopped to watch and finally ordered Stanley to get one of those for her husband. Thereupon Stanley signed up with the Miami man for 5 machines as an initial order. The first one is coming by express, and is as good as sold, says Stanley.

Muller, otherwise the Yorkville Bicycle Exchange, took the agency after a ride on the Miami's carrier. He bought Gliesman's demonstrator on the spot and ordered 5 for quick delivery. Muller handles the Harley-Davidson, but has been looking for a satisfactory lightweight and feels that he has got it now.

SLOATESBURG, N. Y.

MICHAEL FERRARO has renewed his contract to handle the Flying Merkel in Rockland County for 1916. His two-speed twin demonstrator is now on the way, and he has already compiled a list of prospects to whom he will show off its paces when it arrives.

Ferraro's store is on the main road from Hackensack to Tuxedo and is well known as a stopping place for all tourists who travel this route.

GEORGETOWN, TEX.

SIDNEY J. PURL, local Harley-Davidson agent, recently sold three of the twin three-speed models to peace officers. Sheriff Lee Allen, of Williamson County, Patrolman Martin of Taylor and a deputy were the purchasers. Purl has the sales rights for the Silent Gray Fellow for Lee, Williamson and Burnet Counties.

RICHMOND, IND.

ALEXANDER BROTHERS, representing the Thor in ths city, have cleaned out their entire stock of second-hand and trade-in machines in preparation for the big season which has already shown itself in several sales. They have had their 1916 demonstrators for a short time and the sales were made on the performances of these machines.

POUGHKEEPSIE, N. Y.

EDWARD RYAN, Indian agent, has removed his business from 233 to 237 Main street. In his new quarters Ryan will enlarge his motorcycle and bicycle departments, as well as the other lines which he handles.

LEBANON, PA.

JOHN T. MEYERS, of 306½ South Fifth street, has taken the agency for Dayton Motor Bicycles and motorcycles for 1916. Meyers is a veteran in the cycle trade and has started an active campaign with both lines.

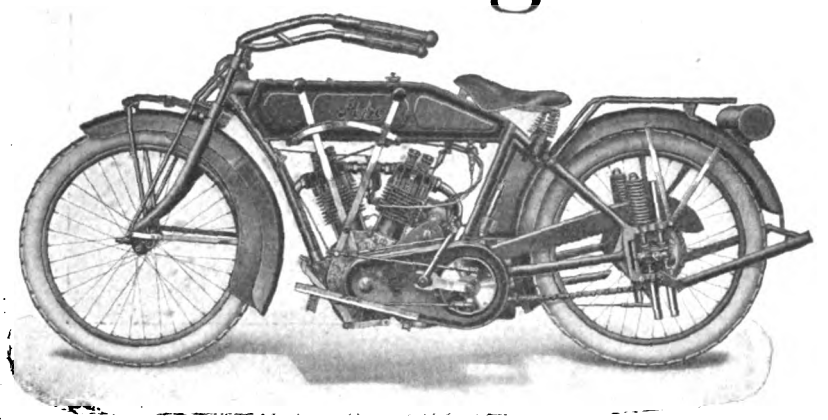
Worth Waiting for!

Unusual conditions surrounded the building of Model T-16. Radical changes in construction called for new machinery, new tools and new materials. The market situation made it almost impossible to get them.



Model T-16—Price $275.00

Time and time again, broken promises on delivery of necessary tools or material compelled whole departments to stop work on this model. But gradually the indomitable Pope spirit overcame every obstacle, and now only the last few operations are necessary to complete the

Pope Three Speed Model T-16

It is worth waiting for. Tests show the overhead valve motor delivering more power than was expected of it. Day by day it becomes more certain that the three speed mechanism will work like a charm—that the position of the step-starter crank will permit the motor to be turned over nearly three times by a single natural movement of the foot—and that the motor will be almost noiseless.

And so on through every detail—from the new magneto chain drive to the splasher panels on the front mudguard, the large footboards, and the comfortable handlebars—Model T-16 is the finest thing on two wheels ever built.

If you haven't your orders in for every Three Speed you can sell this year, get them in now—we'll work day and night to fill them.

FAIR DEALING BUILT PERLMAN'S BUSINESS

ENERGETIC dealing coupled with clean competition and a line of the "right goods" has brought Harry Perlman, of the Perlman Cycle & Auto Supply Company, into the foremost rank of bicycle jobbers in the Metropolitan district, all in the space of three short years. Nor has he stopped growing, for his business is regularly increasing each day. The Perlman firm has its headquarters at 34 Warren street, New York City.

Harry Perlman started as a bicycle jobber in 1914 and at the close of that season had sold 500 wheels. This was a good start, but 1915 was to be much better. When the 1915 season closed, Perlman's books showed sales of bicycles to the number of 2,000. To date for 1916, he has disposed of nearly 2,500 and has on order in carload shipment, over 1,500 additional wheels. He expects to pass the 4,000 mark before the end of 1916. At present, his only trouble is in securing deliveries, and last week he had to disappoint customers for over 200.

Handling Miami Products

The Perlman company handles the products of the Miami Cycle & Manufacturing Company exclusively. It holds a good sized territory for the Miami and Musselman lines of the Miami firm, and in addition markets two distinct lines known as the Mohawk and Perl, made to its specifications. This arrangement of four different lines enables the Perlman firm to do business with a number of dealers in each town without their conflicting.

Mr. Perlman is assisted in conducting his business by a picked staff, among whom is Joseph Lehr, the general manager and buyer. Mr. Lehr was for 16 years buyer

Harry Perlman

and manager for the Stevens Mfg. Co., of New York, and has contributed largely to the success of the firm's business.

William Myers is credit man for the Perlman interests. He is another trade veteran, having held a similar position with E. J. Willis. He recently celebrated his twenty-fifth year in the bicycle line in New York. E. J. Evans, in charge of the outside sales force, is another live-wire on the Perlman staff. He has been so busy that it has been necessary to provide him with a motorcar to travel his territory.

Maurice Perlman, brother to Harry, presides over the order department and meets all dealers who visit the establishment for personal transactions. Miss Esther Greenstein takes care of all secretarial work for the establishment.

The following agents have been signed up by the Perlman firm in New York territory: M. Rapaport, A. Papic, of New York City; S. Slotnic, G. A. Ashley, Frank Trush, and A. Chavkin, of Brookklyn; L. G. DeMarko, Mt. Vernon; N. Marris, Jamaica; James Kapp, Portchester; W. Bohnnenberg, Cedarhurst; E. Casey, Far Rockaway; Sidney Smith, Freeport; Miron King, Amityville; W. H. Ferriere, Babylon; M. Freedman, Bay Shore; Joseph Mayer, Sayville; J. A. Rowse, Patchogue; J. Albin, Eastport; Quogue Auto Co., Quoque; C. H. Tooker, Southampton; Centre Moriches Garage, Centre Moriches; A. W. Baisile, Sag Harbor; W. C. Grabie, Mattituck; Sol Elkins, Huntington; C. Nielsen, Oyster Bay; N. Rose, Flushing; F. M. Phillips, Good Ground; Stevens & Salzi, Hempstead; Henry Kieffer, Mineola, and Otten Brothers, Farmingdale.

In New Jersey, the following are handling the Miami: Z. Schultz, Newark; S. Popic, Englewood; S. Solomon, Elizabeth; R. Randolph, Metuchen; L. Zeisel, Plainfield; Saul & Buterfuss, Trenton; George W. Ford, Hightstown; Broadway Cycle & Auto Supply Co, Camden; Z. O. Eisibill, Brodgeton; Persons Store, Vineland; E. P. Warner, Medford; Hammonton Auto Station, Hammonton; L. T. Wissmack, Toms River; W. W. Canover, Pt. Pleasant; Walter King, Spring Lake, and Frank Muldoon, Freehold.

The Perlman Cycle & Auto Supply Co.

Digitized by Google

WIDESPREAD DEMAND CAUSED MIAMI LINE'S BIRTH

BICYCLES made by the Miami Cycle & Manufacturing Company, of Middletown, O., have always enjoyed a fine reputation as reliable wheels and as profit-makers for the dealer, and it was a combination of this reputation and the terms of the firm's exclusive agency system, that caused the bringing out of the "Miami" line of bicycles. Prior to 1915, the Miami company had but three catalog lines: the Racycle, Flying Merkel and Hudson, and when these were represented in a town or city, dealers other than those who held the exclusive agency for the three lines could not get Miami products. The demand was great all over the country, and in order to provide for such dealers, the Middletown folks brought out the "Miami."

Though hardly more than a year on the market, this line of bicycles enjoys the distinction today of being as popular as any of the other three lines from the same factory. The demands for the Miami have been such that an estimate of not less than 15,000 has been made as the number which will be sold by the end of the season.

Fourteen Models

The Miami line for 1916 consists of fourteen models. These are: the Pathfinder, listing at $50; the Road Racer, $50; the Bull Dog motorbike, $35; the Commercial "Carry-All" at $35; the Roadster "Equipped" at $30; the Scout at $25; the Miami Special at $22.50; the Ladies' Special at $25 and three siezs of boys and girls juveniles. The full line is listed in a fine catalog with a green cover which is very helpful to agents in bringing the various models before the public.

Of the 15,000 Miami bicycles which it is estimated will be sold this season, Greater New York, New Jersey, Long Island and Westchester County will account for at least 2,500. This is the initial order by the Perlman Cycle & Supply Co., holding distribution rights for this territory. In New England, the Miami company's branch at Springfield, Mass., will distribute the machines to dealers. Henry Keidel & Company, of Baltimore, Md., holding distribution rights in Maryland, Virginia, Delaware, West Virginia and the Carolinas, has specified 3,000 as the minimum quantity. The remainder of the United States is taken care of direct from the factory in Middletown, O.

The growth and general success of this line is one more proof that the large majority of bicycle dealers are endorsing the better quality policy: handling name plate lines of bicycles.

BACK FROM WEDDING TOUR

BUFFALO, N. Y., April 15.—Mr. and Mrs. Adolph Kellner have returned from their honeymoon trip through Ohio and Pennsylvania. Mr. Kellner, who is the manager of the local Haverford Cycle Company's branch, married Miss Pearl F. Goodman, daughter of Mr. and Mrs. I. Goodman of this city.

During Mr. Adolph Kellner's absence from the city L. J. Kellner, of Cleveland, took charge of his store.

USING MOTORCYCLE DELIVERY

PADUCAH, Ky.—Gilbert's drug store is featuring the fact that it is now using two motorcycles to deliver goods in quick time. The firm has four telephones, all bearing the same number, and with the aid of the men mounted on motorcycles is enabled to set a service record and get the cream of the druggist trade in this city.

TO REFURNISH CLUBROOMS

FITZGERALD, Ga.—The Fitzgerald M. C. is soliciting the aid of other clubs in the matter of sending that organization coupons and the fronts of cigarette boxes to be used to obtain votes in a contest. The winner of this contest will receive a motorcycle, and the club plans to sell the machine, if won, and use the proceeds to refurnish the club rooms. The Wheeling M. C. has been the first to respond to the appeal.

CLUBS JUST AFFILIATED

The Raleigh M. C. of Raleigh, N. C., 16 members, and the Indian M. C. of New Brunswick, N. J., 30 members, have just affiliated. H. B. Stevick is secretary of the Raleigh club, while Harold DeHart performs a like office for the New Brunswick organization. His address is 71 Hassart street. The Independent M. C., a new organization in New York City, with 16 members, 100 per cent. F. A. M., has likewise affiliated. E. H. Eytel, 306 West 133rd street, is secretary.

A Little Excitement?

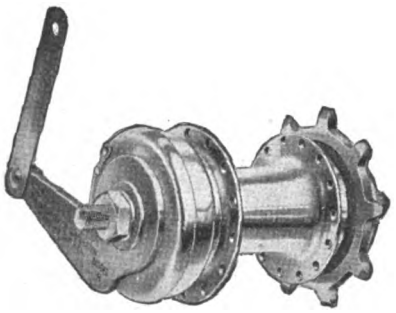
The roads are full of it.

Why not hit the pike on that bicycle of yours and collect the health and sport that are waiting for you there?

And in this connection don't forget the

CORBIN

DUPLEX COASTER BRAKE



Very few experienced bicyclists do. They have found out it doesn't pay. They know that this famous coaster brake makes all the difference in the world—it doubles the pleasure and comfort of bicycling.

But what's the use of talking. Everybody knows the reputation of the Corbin Duplex. It has led the field for years.

For better bicycling equip your wheel with the Corbin Duplex.

The Corbin Screw Corporation
THE AMERICAN HARDWARE CORPORATION, Successor
NEW BRITAIN, CONN.
BRANCHES: New York, Chicago, Philadelphia
Makers of Corbin-Brown Speedometers

DEALERS

When stocking with bicycles specify the Corbin Duplex Coaster Brake. Furnished by all jobbers and manufacturers.

USING CATALOG TO GET BEST POSSIBLE RESULTS.

By PRACTICUS

OF all the aids to sales-getting that the manufacturer supplies to the agent, the catalog is the most effective—and the most overworked. It tells about the machines, and what they can do, and have done in record-making; it shows how attractive the mounts look. The material in it is composed by experts, and it is so good that lots of dealers attempt to make it conduct the whole sales-campaign for them.

They do make sales through the catalog, but they miss the chances of making more by not supplementing the catalog with additional sales-aids. The catalog is a fine persuader when it is in the prospect's hands, but its powers are frequently diminished when the prospect has a whole raft of other catalogs to read and to think over what each says. I am a case-hardened proposition myself, but there are lots of times when I am almost convinced that the Dash is absolutely the best machine built—until I read the catalogs of the Blank and Dot machines. Then I go back to wavering again. The prospect who doesn't know much about motorcycles will be more easily rendered uncertain as to choice, when he has the whole lot to read and pore over.

Get in the Sales-Talk

Experience has taught me that the best time to let the prospect get to the catalog is after you have had a chance to talk to him. I don't mean by this that when he comes into the place you should hold off the catalog, but the idea is not to let him get out, if possible, without saying something about the machine first. Some good demonstrators talk to him while he has the catalog open in his hands, but the main thing is to use the catalog to clinch the argument as far as possible. And once that prospect gets a catalog he should be followed up until you are convinced that he can't be sold a machine.

I'm not going into any follow-up methods in this article, for that ground has been covered before, a number of times. I'm trying to show just how much the catalog should be called upon to aid in making a sale.

The silent salesman idea is good, but it is nothing compared to good talking and the performance on the road. These two are the big convincers. Lots of people collect catalogs to look at the pictures.

Have Catalogs Handy

Now with regard to the catalogs themselves. Have 'em handy. It's good stuff to be able to pass one out on request and not to have to dive under a pile of newspapers for one. The fellow who asks for the catalog is watching and it may create a bad impression; it may look as if business was poor, as no one would seem to come in often enough to get catalogs or machines. If there is room, have the catalogs out where anyone can see them and look them over.

Keep the catalogs clean. The most convincing argument on paper is weakened in looking at the twirly lines on the thumb-print of the chap that handed out the catalog with dirty hands. A smear on the cover may mean a smear on a nice suit of clothes when the prospect handles it, and the sale is killed. A dirty book never gets treasured except by collectors—and the prospect is not a collector. If the owner of the thumb-print was W. Shakespeare or G. Washington, the marks would be valuable, but the "mark" of Bill Smithers is not worth a hoot. That catalog will probably be used for lining a garbage pail in course of time.

USING CATALOG TO GET BEST POSSIBLE RESULTS

(CONTINUED FROM PAGE 46)

Treat the catalog with respect. Keep it off the floor and don't use it to wrap things up in. It's a means of getting business, not a protection for a length of chain or a new sprocket. Don't mutilate it ; the torn copy may accidentally get into a prospect's hands and damage a sale. When it needs discarding, get it out of sight right away.

When you mail a catalog to a man, wrap it so that it won't get dirty. An envelope is the right thing for the purpose, and the factory will supply these. If you use a wrapper, see that it reaches the depth of the catalog, to protect it as thoroughly as possible.

Putting On Your Name

In marking the catalog with your hand-stamp, put an impression—right-side up and level—on the title page, on the back cover and on the center pages. Don't cover any picture when you do this. If the front cover allows of space to stamp, put her on, but don't do this on a scenery cover or over the machine itself. Next to the covers, the best place for the dealer's stamp is on the center pages, for the catalog opens naturally at that point. If the rider starts in to look it over, he sees the name on the title page, again on the center page and finally on the back cover. He has seen it three or four times when he closes the catalog. That's more than enough to impress it on him.

COLUMBUS, O.

THE FRANKLIN CYCLE SUPPLY COMPANY will move to 211 East Long street on May 1. The firm will have more room and a better location than in its present quarters at 142 East Gay street. The first floor in the new quarters will house the salesroom while the repair department will be fitted up in the basement.

The company is the largest bicycle dealer in Central Ohio. In 1915 over 500 bicycles were sold and plans are being made to double this output in 1916. A large amount of business was done with the Smith Motor Wheel during 1915 and sales of this device have been fine this season.

SAN JOSE, CAL.

SHOWALTER & HOUSE, Wigwam representatives, have been averaging one Powerplus a day for the last three weeks, with a Featherweight now and then as an extra. "The season is just beginning," says Showalter, "and watch the score change from now on."

WILLIAM F. BRACHER, representing the Excelsior, has sold 18 of the 1916 models so far and has orders for a number of others. He is awaiting the first of the Series 17 models, which he says will be an even bigger seller than its predecessors.

AUBURN, N. Y.

QUICK & THOMAS have taken the exclusive agency for the Dayton Motor Bicycle for this city, through the Vim Hardware Co., holding the distributing rights in this territory.

SANGER, CAL.

F. W. WAGNER has bought out his partner, W. D. Ward, in the motorcycle and bicycle shop which they have been running jointly. A move to a larger store on N street was recently made by Wagner.

OILS AND GREASES

Make a Good Motorcycle Better

Because they increase its efficiency. Motorcycles are especially susceptible to poor lubrication—likewise, they quickly respond to good treatment. Cheap oils not only give poor results, but injure your machine. Special care is taken in making our motorcycle oils, and the same high standard of quality found in our other products is maintained. Only the *best* crude stock is used, and every process of its manufacture is carefully tended by experts.

Treat your motorcycle right—lubricate it with HARRIS OILS—it will fully repay you in service.

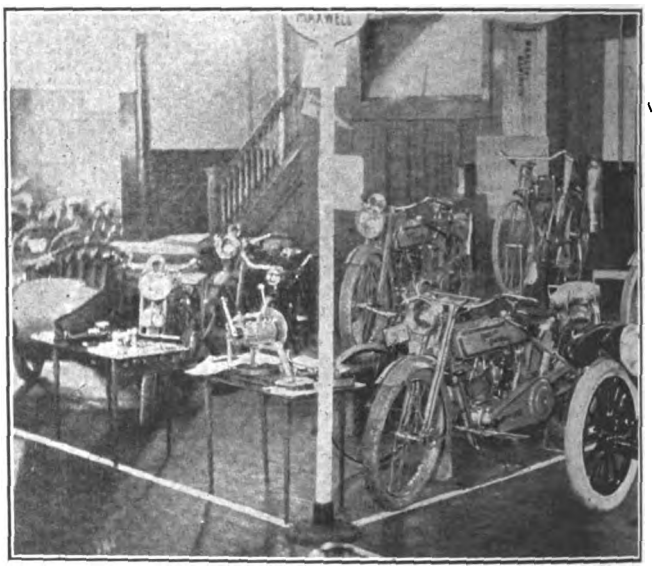
TWELVE MORE AGENTS ARE APPOINTED FOR MIAMI POWER BICYCLE

MIDDLETOWN, O.—A round dozen of dealers from five States are the latest additions to the growing list of representatives for the Miami Power Bicycle. In the East, E. J. Starr, of North Adams, Mass., has signed up for the popular little four-stroke belt-driver, as have also the following Pennsylvanians: J. W. Deardoff, Pottstown; Works Repair Shop, Indiana; Palace Hardware Company, Erie, and H. E. Wright, Bethlehem.

In Connecticut, Harry Grannof, Bridgeport, has taken the agency, while in South Bend, Ind., Hagedorn & Webester have signed up. In Goshen, Ind., L. Bigler will push this machine.

Californians who have taken on the Power Bicycle are J. A. Muenzer, Hollister; J. A. Blake, Gilroy, and B. Torigoe & Company, Watsonville.



Attractive Exhibit of George F. Ells at Recent Elmira, N. Y., Show. The Harley-Davidson Is Featured

BALTIMORE, MD.

R. L. FRENCH, of 510 Broadway, has signed up for the agency for the Flying Merkel motorcycle and the Miami Power Bicycle. His Flying Merkel contract calls for 50 machines, of which the first lot will number 10. Twenty-five Miamis in lots of 5 and 10 are contracted for. French's territory covers Baltimore County.

G. C. SANDRUCK, of 915 North Howard street, who formerly held the agency for several seasons, will continue to handle the Flying Merkel with French.

JOHN BOOTH, of 3707 Eastern avenue, will handle the Flying Merkel through French, also. In 1915, his first season with this make, he sold 63 of various models.

GEORGE HESSON & CO., of 643 West Baltimore street, will continue with the Flying Merkel as a subagency.

LOS ANGELES, CAL.

W. H. HOEGEE COMPANY, handling the Dayton Motor Bicycle in this city, has received orders for 418 of the front-driver machines, according to Manager W. F. Larrisey. The first carload for the Hoegee firm has been received and a second is now on its way.

GOODRICH GIANT BLACK SAFETY TREAD BICYCLE TIRES

Just look at this tire!

This is the big, husky brute that is creating such a tremendous sensation! The strongest, hardest to puncture Tire ever made—yet it rides like velvet.

Tread made of actually the same gristly *black* "Barefoot" Rubber *that goes into our big auto tires!* And the famous three-bar Goodrich tread—*more rubber at point of contact—less strain on inner tire body.*

There's no skimping on *this* Tire—no make-shift fabric and inferior rubber thrown together just to be "good enough for a bicycle tire." But a *tire worth the money*—the best effort of the World's Largest Rubber Factory.

There's more profit to you—

—in the Goodrich "Giant" than any other type. Our big national advertising—handsome pennants *free* with each tire and Boy's Guide Book full of things every boy wants to know—*is heading the buyer YOUR way.*

Connect up—write for advertising helps—here's a tire that's got wonderful quality—it's backed by a name known in every home—there's a big profit in it.

Let's pull together and make 1916 the best year we both ever had!

The B. F. Goodrich Company, Akron, Ohio
Branches and Dealers Everywhere
Makers of the Celebrated Goodrich Automobile Tires
—"Best in the Long Run"

Note husky *loose-weave* fabric—see how rubber in curing has permeated the meshes and joined with other side making solid wall of rubber—strongest construction ever evolved!

DEALERS KEEP ON THE HUSTLE IN NEW JERSEY METROPOLIS.

NEWARK, N. J.—Watson Kluczek, handling the Big Brown Ones, is kept busy unpacking and fitting up Reading Standards each week. There are nine in the hands of satisfied owners already and four more due this week. Kluczek is now sure that the Spring riding season is here.

Pullman sidecars, of which Kluczek is agent, are in great demand, and there is an average of one to every other motorcycle being sold.

BERT CORYELL, manager for the F. C. Cornish Estate, had the unique experience of demonstrating the ability of the Henderson to two prospects at the same time the other day. Both manned the sidecar while Bert put the four-cylinder mount through its paces. The return to the store was celebrated by two orders.

CARL W. BUSH COMPANY, handling the Silent Gray Fellow, recently ran a quarter-page ad. in the leading Sunday paper, featuring the use of the motorcycle and sidevan for commercial purposes. Stress was laid on the efficiency, economy and delivery speed of the two-wheeler in business, and a list of satisfied owners with Harley-Davison outfits was included.

This list mentioned ten machines in municipal work and 30 in the hands of merchants, painters, automobile service stations, bakers and also in the service of the Mosquito Extermination Squad.

HAVERFORD CYCLE COMPANY, Excelsior representative, has a new 17-3 Ex. in stock and five more coming by express. The average sidecar sales have been one a day during last week. Smith Motor Wheels are in demand, also, there being a dozen on the way from Milwaukee, and all are spoken for. The two-speed Excelsiors of 1914 model which were in stock have been sold off by Manager Bunkin.

WALTER GOERKE, heading the local tepee, was low man when the bids for equipping the Newark police with new machines were opened, but nothing definite has been done by the Police Board as yet. Walter had Indians in six different colors on the floor last week: blue, olive drab, light brown, Russian war finish, greenish brown and the standard Indian red. There have been eight machines ordered of the Russian drab color and it bids fair to be the real all-weather finish.

MARYSVILLE, CAL.

AN EASTERBROOK, formerly with H. Cameron, of Sacramento, has opened a shop here. A complete repair equipment has been provided, and Easterbrook is now looking for a desirable agency proposition.

EXETER, CAL.

E. J. LAROCHE has taken the agency for the Dayton Motor Bicycle, in addition to his regular line of Silent Gray Fellows. Laroche's bicycles sales to April 3 have been over half those of the entire 1915 season.

PULLMAN, WASH.

GEORGE W. WALTER has taken the Thor agency for Pullman and vicinity. He started out with two machines on first order, but sold them both in six hours after uncrating. Several more are on the way and Walter is awaiting their arrival with eagerness.

The Mark of Merit

ECLIPSE

Eclipse Brake

Morrow Coaster Brake

Eclipse Clutch

Eclipse Self-Locking Front Hub

Eclipse Two-Speed

Born amid the dark ages of Cycledom, the name ECLIPSE has steadily grown in prestige, in strength, in SALES-VALUE.

The name ECLIPSE has become to be identified with all that is reliable, certain, ***responsible*** in motorcycle and bicycle spheres.

As a trade-mark, dealers have found it to be of inestimable worth, for it cancelled the need of making elaborate explanations. The name ECLIPSE is instinctively associated in the buyer's mind with quality.

Thus, when YOU, Mr. Buyer, see the name ECLIPSE on an article, TRUST the dealer who sells it, for he knows the value of a good name.

Look for the mark of merit on the goods you buy.

Eclipse Machine Co.

CALIFORNIA HENDERSON SPACE IS ENLARGED BY 50 PER CENT.

LOS ANGELES, Cal.—By taking another store, the California Henderson Motor Sales Corporation has made a 50 per cent increase in its spae. Active sales in Pope lightweights and bicycles have done much to make the increase in space necessary.

Charles Hubbard, of the company, is now visiting the factory in Detroit to make sure of sufficient allotments and deliveries to cars for the rapidly growing business of the company. He will visit the Boston, Mass., and Providence, R. I., Henderson stores before returning to Los Angeles.

F. A. Sutphen, who has been with the Henderson agency for the past year, has been promoted to be secretary of the Henderson Motorcycle Sales Corporation.

SCOTTSVILLE, IND.

PHILIP CURTIS has taken the agency for the Excelsior for this city and vicinity. He is awaiting the completion of his shop to his satisfaction before opening formally. The contract was had through Norbert Sandeman, holding the distributing rights for this make. Sandeman's headquarters are in Louisville, Ky.

BEACON, N. Y.

GEORGE SORENSON, handling the Thor in this city, has sold six of the twin mounts so far and has orders for a number of others on his books. His sales at this date are considerably ahead of those of the corresponding period in 1915, and he is confident that 1916 will be a hummer.

Sorenson is a road-man par excellence and his reports on road conditions are always valuable. He states that roads in his vicinity are in good shape now, since the snow has departed. There is a little rough going between Croton-on-Hudson and Peekskill and also a stretch at Wappingers Falls. Sorenson's place is the subject of frequent visitors from New York, Poughkeepsie and Yonkers and his transient sales bring him in a neat sum each season.

BRONX, N. Y.

GENE COUGHLIN, president of Gene Coughlin & Company, Inc., has sold 37 Harley-Davidsons of 1916 model to date, as well as eleven sidecars. Most of the latter were of Harley-Davidson make.

"Business has been so good that I have had to practically renew my stock of accessories since starting in last Fall," says Coughlin. "The demand for machines, both new and second-hand, in this borough has been big and things look as if the season was going to be a record one. The company has already felt the effects of the Spring weather in increased orders for the new models. Most of them ask for the electrically-equipped 16-J."

WHITTIER, CAL.

ERNEST LAW, the well-known cycle dealer, has taken the agency for the Cleveland lightweight for 1916. He has lined up a number of good prospects and is out to make a record in these parts.

KINGSTON, N. C.

MOSLEY & BALLARD have signed a contract with W. Grover, of Norfolk, Va., to sell Dayton Motor Bicycles in this city and vicinity.

PROVIDENCE, R. I.

B. A. SWENSON, the Indian man, reports selling more Indians up to April 10 than between January 1 and August 1, 1915. His sidecar sales up to April 1, 1916, have been equal to those made up to August 7, 1915. "Indian business is growing by leaps and bounds," says B. A.

Swenson has just sold Powerplus models to the Newport Telephone Company, the Narragansett Pier Telephone Company, the Narragansett Electric Lighting Company, the Providence Company, the Providence Telephone Company, the Pawtucket Gas Company, and the Dolbey Ice Cream Company. The city of Providence is now negotiating for two Powerplus machines.

Referring to the New Britain store, Swenson says that Manager Charles Hadfield has set a sales record for that city. Since January 1 he has sold more machines than were ever sold during one season in New Britain. Business has been so good that Hadfield has added a salesman and a repairman.

LOS ANGELES, CAL.

TOM GIRTON, of the Girton-Hoffer Company, Excelsior representative, says that there are now only two unsold Excelsiors in the firm's territory. He states further that not one of the 1916 Big X's in Southern California and Arizona (Girton-Hoffer territory) has passed out of the original owner's hands. During March 56 machines were sold.

HENDERSON MOTORCYCLE SALES CORPORATION sales amounted to 25 new machines during a recent week, according to Secretary E. A. Sutphen. Business has increased to such an extent that a store to the south of the present one has been secured and the wall between has been removed. The enlarged quarters will be re-arranged in the course of a few days.

C. WILL RISDEN, handling the Indian in this city, sold 14 machines during the first week in April. The carload of Featherweights, which arrived on March 24, was sold out in five days, and Tommy Butler is anxiously awaiting the next lot from the East.

T. E. BERRY, handling the Miami Power Bicycle throughout Southern California, is selling the little four-strokers in lots of five. "And for cash, too," says Berry. "I am waiting for a carload of 115 lightweights from Middletown, O., and will have the contents disposed of in short order. I think that this carload will be the largest ever sent to the Coast by a motorcycle manufacturer."

MARION, VA.

J. K. FISHER, a prominent cycle dealer in this city, has taken on the Dayton Motor Bicycle for 1916. Fisher is a bicycle enthusiast, but sees a big market for a lightweight motor machine and is of the opinion that the 1½ horsepower front driver is the one that fills the bill in his territory.

PERTH AMBOY, N. J.

HUGH McCALLUM, on Fayette street, has signed up to handle the Indian for 1916. This is McCallum's return to the Wigwam, as he held the Indian agency here up to 1914, when he took on the Excelsior. Since taking the 1916 Indian agency, McCallum has sold seven Powerplus models.

ALTOONA, PA.

W. S. AARON, agent for the Miami Power Bicycle, is featuring the little four-stroker in his main show windows, along with Miami bicycles. Proprietor Aaron has already sold a number of both motorcycles and bicycles, and is confident that 1916 will be a record season. He has started on an extensive advertising campaign.

W. H. & L. C. WOLF, who handle the Indian in this city, have arranged with A. Cohen, a local sporting goods and hardware man, for a sub-agency. Cohen is well known for his speed ability on the track and also for his business acumen, and with these assets and a wide circle of acquaintances, the Wolf Brothers are confident that Cohen will materially add to the membership of Altoona's braves.

CLYDE FLUKE, a partner in the recently-dissolved firm of Fluke & Davis, has gone to Detroit, where he will sign up with an aeroplane and marine motor manufacturing company.

WASHINGTON, D. C.

B. R. CUTLER has taken the representation in the Federal District for the Dayton Motor Bicycle. The contract was signed with W. Grover, holding distributing rights for this section.

SANTA ANA, CAL.

ARMIN F. HEROLD, of the Indian Service Station, has sold more Indians so far this year than he did in all of 1915. The proportions have been one-third Featherweights and two-thirds Powerplus.

Herold sold four Featherweights within five days of the receipt of his first lot. He says that he can do lots more business in the little red two-stroker as soon as he can get the machines. "Goodrich black tread tires are making a hit in my trade," says Herold, "and Kokomo tubes are other good sellers."

Roy Ivins and Myron Warner, who operate the shop right back of Herold's store, are figuring on carrying a red machine to the top of the hill in the Orange County dealers' climb. One rides a Powerplus and the other a 1914 Indian.

FLUSHING, N. Y.

WILLIAM E. MARTIN, of 136 South Nineteenth street, has signed up with the J. W. Grady Co. for the local agency for the Dayton Motor Bicycle.

NEW YORK, N. Y.

STERN BROTHERS, handling the Indian at 1519 Second avenue, had their busiest day on April 8. They sold three Powerplus machines and took an order for a Featherweight. Four second-hand machines were also disposed of, as well as three Rogers sidecars.

Quite a number of the Stern customers are awaiting the arrival of the first shipment of Miami Power Bicycles, due in a few days.

TONAWANDA, N. Y.

H. WILLYOUNG will handle the Harley-Davidson in this city and North Tonawanda for 1916. Willyoung's headquarters are in Bowmansville, N. Y. He will establish his place in this city in the old C. C. Andrus piano store at 56 Webster street, as soon as alterations are completed. Formal opening will be made about April 20.

READING-STANDARD COMPANY
501 Water St., Reading, Pa.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912,

of Motor Cycle Illustrated, published weekly at New York, N. Y., for April 1, 1916.

State of New York } ss.
County of New York }

Before me, a Notary Public in and for the State and County aforesaid, personally appeared J. Leo Sauer, who, having been duly sworn according to law, deposes and says that he is the Business Manager of the Motor Cycle Illustrated, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:
Publisher, Motorcycle Publishing Co., 13 Park Row, New York.
Editor, J. H. Donehue, Jersey City, N. J.
Managing Editor, J. Leo Sauer, 460 Riverside Drive, New York.
Business Manager, J. Leo Sauer, 460 Riverside Drive, New York.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent. or more of the total amount of stock) Motor Cycle Publishing Co., 13 Park Row, New York; J. Leo Sauer, 460 Riverside Drive, New York; H. N. Condict, 319 Main Street, E. Orange, N. J.; W. D. Callender, 4943 Sheridan Avenue, Chicago.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities are: None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

(Signed) J. LEO SAUER,
Business Manager.

Sworn to and subscribed before me this 24th day of March, 1916.
[Seal] GRACE D. VAN DER VEER.

PORTLAND, ORE.

BALLOU & WRIGHT, Northwest distributors for the Indian, received a carload of 66 machines on April 5. Nineteen were taken out to deliver to local buyers, and the rest have been sent to sub-agents. Another shipment is looked for in a few weeks.

These dealers as well as others have been taking advantage of the fine weather conditions which are now prevailing in Oregon and are reaping the harvest. On all sides statements are made that the motorcycle and bicycle business is far better at this time than it has been for years.

Patrons of Henry Shafer, Indian Agent at Dunkirk, N. Y., About to Start on a Sunday Run

NEW BRUNSWICK, N. J.

H. CLARK SAUNDERS, who handles Wigwam products in Middlesex and part of Somerset County, has just received a carload of Indians from the Springfield factory. He and his force are mighty busy unpacking the contents. The shipment contained 34 Powerplus models, 7 Featherweights and 4 sidecars.

Half of the big 'uns have rigid frames and the rest have the cradle frame. Practically all are fitted with the Splitdorf Mag-generator and electric lighting outfit. Ten are finished in gray, and these have gone already to members of the Indian M. C. of this city. Blue Streak Goodyears are on all wheels.

LOUISVILLE, KY.

CLYDE BERRY, local representative for the Thor, has just returned from a trip to West Point, Ky., Elizabethtown and other cities in that section. The trip was made with Mrs. Berry as sidecar passenger. Berry has signed up several sub-agents and reports things as humming.

JOHN H. ETIENNE has opened a store at Preston street and Broadway, and has taken the Henderson representation. Etienne also handles the Cygnet Rear Car and stocks a fine line of supplies. He has received his demonstrator and is already hot on the trail of prospects.

WOONSOCKET, R. I.

W. CARPENTER has taken the agency for the Dayton Motor Bicycle for this city. He signed up with J. W. Grady & Company, Worcester, Mass., holding the distributing rights for this section.

SPRING VALLEY, N. Y.

VICTOR HANBUER, who has a big cycle store on Main street, has added the Dayton Motor Biycle for 1916.

REMY

IN FRONT

In every motorcycling party you will find a Remy equipped Harley-Davidson elected to lead the procession —because

Night riders who use the Remy Lighting-Ignition System avoid serious accidents and hair-breadth escapes. Day and night they ride anywhere, secure with the safety that the Remy affords. On the darkest night

A Turn of the Switch

opens up the road far ahead with a brilliant, intense stream of light. No need to worry—no need to strain your ears to catch the sound of on-coming traffic—no need to slacken your speed for fear of what might happen. It won't happen if your mount is Remy equipped.

The Remy system also furnishes strong, reliable, synchronized ignition. Remy ignition is helping win races, hill climbs and endurance contests everywhere—and it gives 100% efficient service in constant everyday use.

Many Harley-Davidson motorcycles are Remy equipped. Ask any Harley-Davidson dealer for a demonstration.

REMY ELECTRIC COMPANY

The Time to Talk Business

Did you know that there are over four million boys and girls, men and women, in this country who have found the bicycle a help and a pleasure?

Do you realize that these four million people have found the bicycle a sure and steady convenience, a splendid source of profit—in fact, a thing they would not be without?

By far the biggest majority of bicycle dealers have seen this growing tendency in favor of bicycling.

Bicycle manufacturers know it by the excess orders for 1916 machines. We know it by the ever increasing orders for Blue Streak Tires.

The bicycle, in fact, was never so popular as it is today; it was never so well made as it is today; there were never so many reasons why you should concentrate on bike prospects as there are today.

It is a pretty safe statement to say that the average dealer could double his bike sales if he would double his enthusiasm. And it's true—the bike has been left alone in the corner and expected to sell itself.

Don't talk bad weather or bad roads—talk business. Know your proposition from A to Z—then talk it. That's the way to turn bicycles and tires into cash.

You have everything on your side. The Goodyear Square Deal Tire Policy is the fairest proposition ever made you by a tire manufacturer.

We not only offer you the best tire made but we help you sell it by creating a tremendous demand for Blue Streaks.

We are the only bicycle tire manufacturer in America advertising one standard price to all consumers—$2.50 each, nonskid.

Do you see how this advertised price is going to keep business "at home"? If you can offer a better tire for as low a price as the catalog houses you can get this tire business.

Over 8,000 dealers are making satisfied, permanent customers by selling Goodyear Blue Streak Tires. And nearly every one of these 8,000 dealers is using the Goodyear Dealer Helps as a further stimulus to increased business and added profits.

If you would know more about these new ways to new business, simply drop us a postal asking for the Goodyear Dealer Helps—or better still, talk with the Goodyear salesman.

"Sure it's Safe, Dad, it's got a *Morlow* Coaster Brake—the Same as *You* Used When You Were a Kid"

Digitized by Google

Morrow

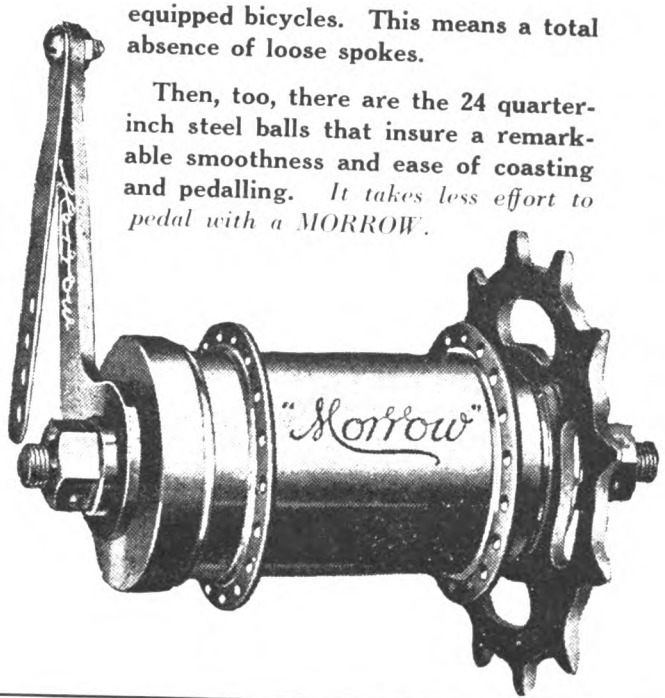
"The Brake that Cancels Danger"

All the kids know the MORROW. They've heard their big brothers talk about it, they have listened to their Dads tell of their bicycle riding days, in which the MORROW Coaster Brake, its safety, its ease of operation and its wonderful durability and strength were strongly featured. That's why they WANT the wheel with the MORROW brake, and that's why, friend dealer, you have the most powerful sales-asset in the "Brake that Cancels Danger."

The MORROW has been linked with good bicycles since the sport began. It is the oldest, the best known, and the most universally admired brake on the market. That's a statement that can be easily proven by asking any of the real "old-timers," those L. A. W. men, what brake they used. The answer will invariably be, "Why, MORROW, of course."

This reputation which has grown with the growth of the industry is well deserved. MORROW superiority features are evident to everyone. First, there is the big hub shell, the largest and most efficient braking surface on the market. The interior expanding sleeve of spring steel, with a bronze outer lining, being equally expanded from both ends along the entire centre of the hub shell insures an even pull on all spokes when pressure is applied. There is no side-pull on Morrow-equipped bicycles. This means a total absence of loose spokes.

Then, too, there are the 24 quarter-inch steel balls that insure a remarkable smoothness and ease of coasting and pedalling. *It takes less effort to pedal with a MORROW.*



Write and let us tell you of the hundreds of ways in which we co-operate with dealers who sell bicycles equipped with the MORROW Coaster Brake. Just give yourself an opportunity to find out what REAL reputation plus strong co-operation will do to boost your bicycle sales toward that million mark.

Write to-day, without fail for full "dope."

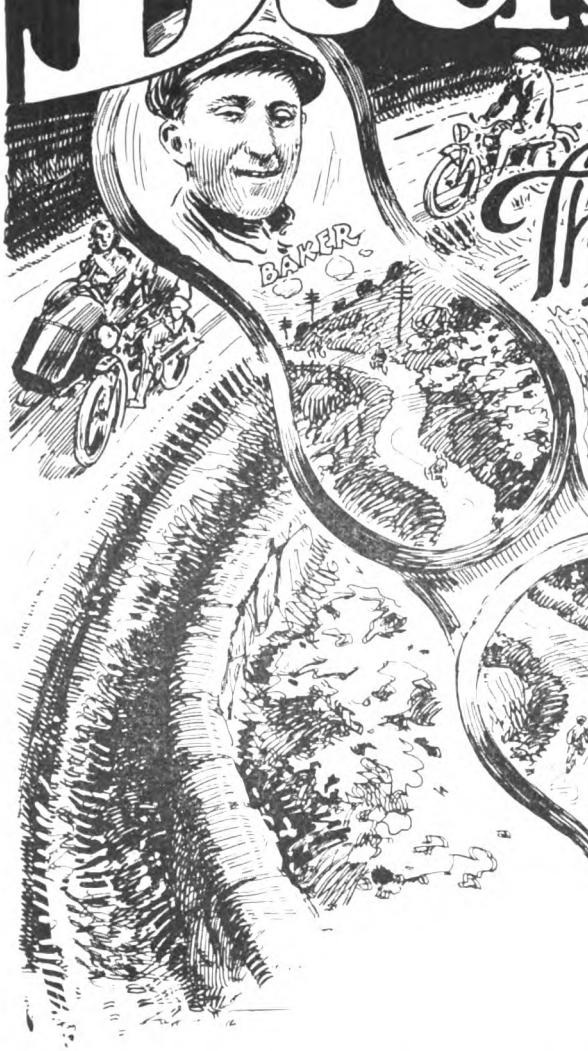
"DUCKWORTH"

The Choice of Veteran Riders



Why is it that all the big men in the motorcycle game—old seasoned veteran riders such as E. G. Baker and Jimmie Walker who have piled up big mileage—use DUCKWORTH CHAINS? Why are they standard equipment on the Indian, the Pope, the Harley-Davidson, Excelsior, Henderson, Emblem and Merkel?

There is only one answer—confidence. They KNOW DUCKWORTH Quality—Duckworth Strength—Duckworth Efficiency. These DUCKWORTH qualities have been *proven* by time, by tests of speed, of endurance and by the supreme test of day-in-and-day-out service on all roads; in all climes.

"Cannonball" Baker, the high man of the sport, has *always* used DUCKWORTH Chains. He achieved his latest and greatest record—the thousand mile world's record in Australia—with DUCKWORTH.

Jimmie Walker during each year achieves a mileage of 18,000 miles, traveling in the interests of the American Chain Co., Inc., makers of the Weed Anti-Skid Chain. Mr. Walker states: "I am pleased to say that, while I have used a number of different makes of driving chains, I have found none better than Duckworth."

The name "DUCKWORTH" on a chain is like the "Sterling" mark on silver. It stands for unsurpassed excellence.

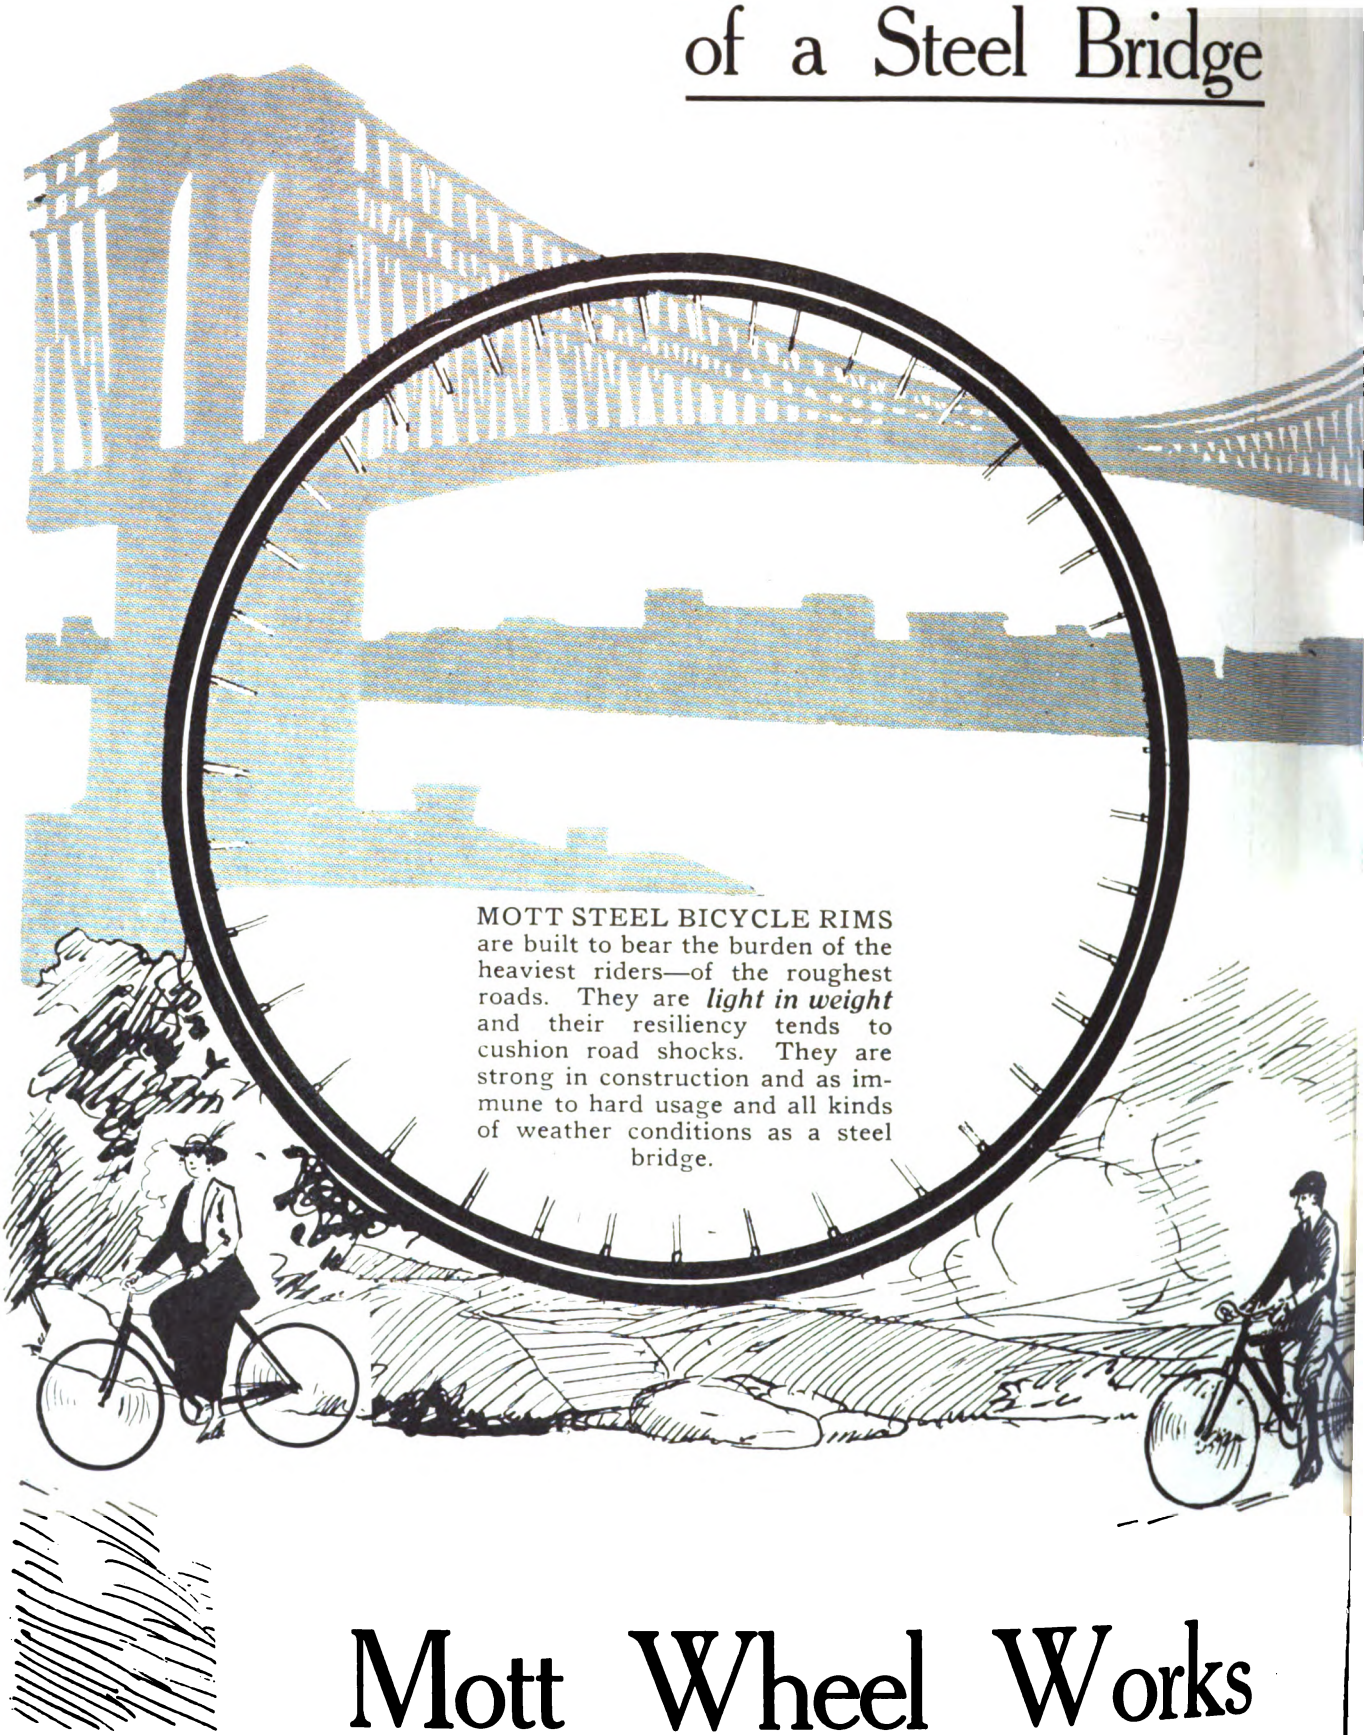
The Strength and Resiliency of a Steel Bridge

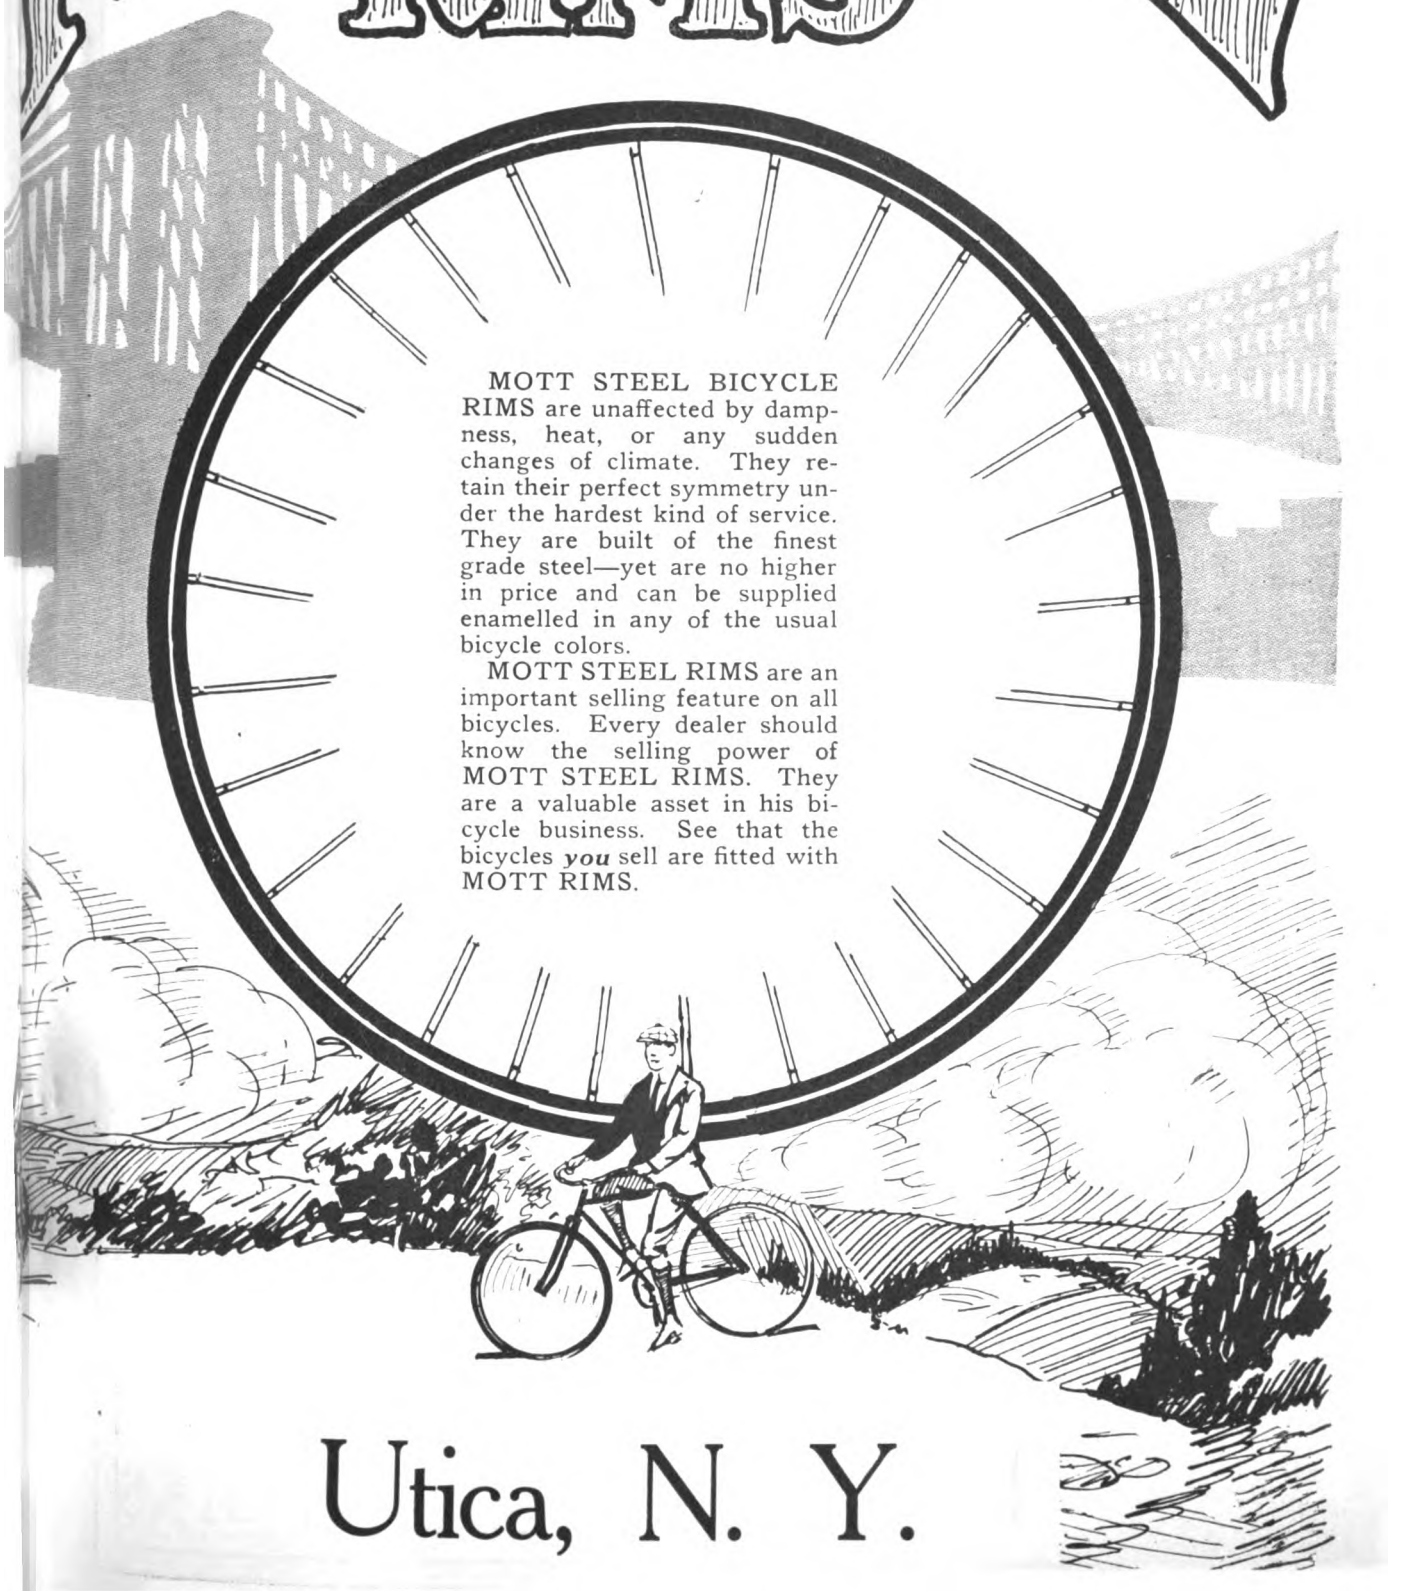


MOTT STEEL BICYCLE RIMS are built to bear the burden of the heaviest riders—of the roughest roads. They are *light in weight* and their resiliency tends to cushion road shocks. They are strong in construction and as immune to hard usage and all kinds of weather conditions as a steel bridge.

Mott Wheel Works

Digitized by Google

MOTT STEEL RIMS



MOTT STEEL BICYCLE RIMS are unaffected by dampness, heat, or any sudden changes of climate. They retain their perfect symmetry under the hardest kind of service. They are built of the finest grade steel—yet are no higher in price and can be supplied enamelled in any of the usual bicycle colors.

MOTT STEEL RIMS are an important selling feature on all bicycles. Every dealer should know the selling power of MOTT STEEL RIMS. They are a valuable asset in his bicycle business. See that the bicycles ***you*** sell are fitted with MOTT RIMS.

THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS

Why Belt Drive For Lightweights

Twelve horsepower is too much power for a Lightweight Motorcycle, that's logical.

Four inch tires are too heavy for a Lightweight Motorcycle, that's logical too.

The correct Lightweight Motorcycle, the one that will be a success, that will fit into the place waiting for it, must be designed and built especially to fill the requirements in its distinct field—a definite type of motorcycle for a definite work.

It must be a machine with a highly efficient engine, bristling with simplicity—so simple that anyone can understand it. It must be clean-cut and invitingly silent when running. It must have a silky smooth drive; elastic, yet without power loss, positive yet without jerk or jar. It must appeal from every angle, to every sense. It must draw that "just what I have been looking for" expression from every observer.

To get these obviously correct factors, to get that silky smooth drive, that noiselessness, that cleanliness, that simplicity, it is clear that nothing but belt transmission can possibly be used—belt drive such as only can be produced by using

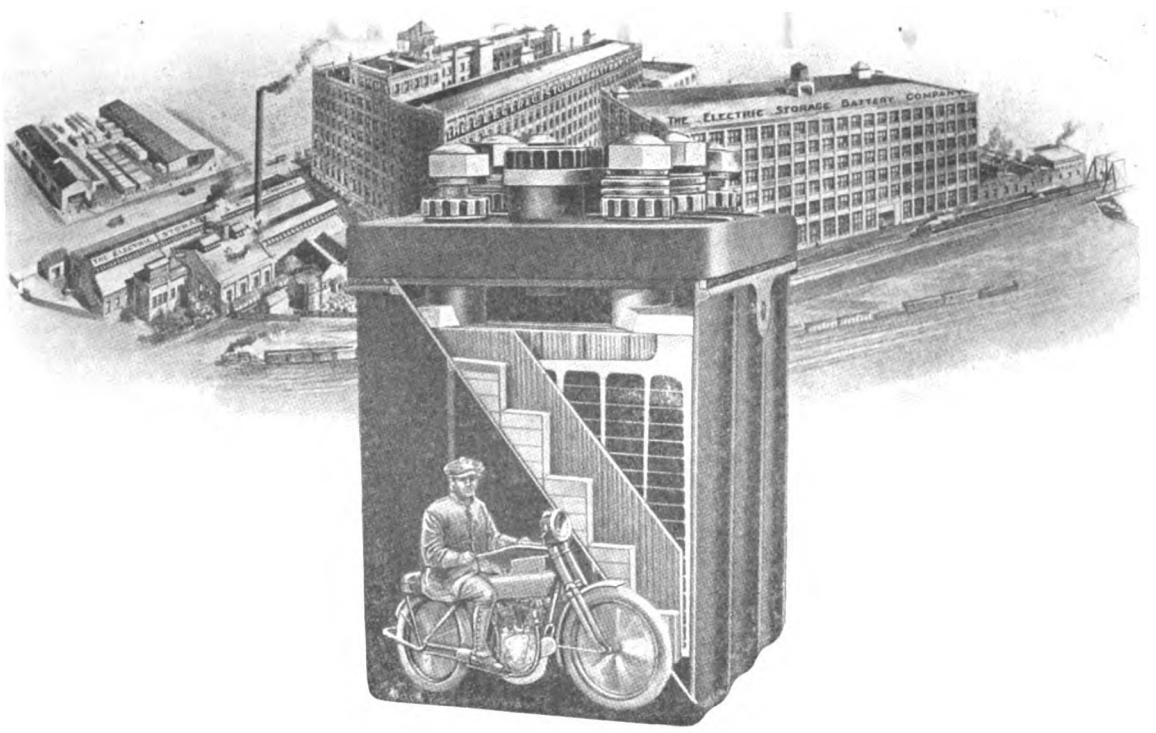
The "Exide" Battery
For Motorcycles



The Biggest FACTOR and the Biggest FACTORY Behind Reliable Motorcycle Lighting Performance

The "Exide" Motorcycle Battery is made by the oldest, largest and most experienced storage battery maker in the country. This combination of ability and experience has resulted in the "Exide" Battery being more widely used than any other on the market.

"Exide" Batteries

are the highest priced, yet least expensive. They "cost the most to make—least to use." Sell your battery prospects "Exide" Batteries during the 1916 season. This will prove mutually profitable both to your customers and to yourself. "Exide" Batteries make friends, keep friends and save regrets. Once the "Exide" "germ" gets into a group of prospects, they are "Exide" enthusiasts ever after. Write us today for our "Exide" proposition and the name of the nearest "Exide" distributor. He will see that you are supplied with "Exide" Batteries in plenty of time to catch Spring trade.

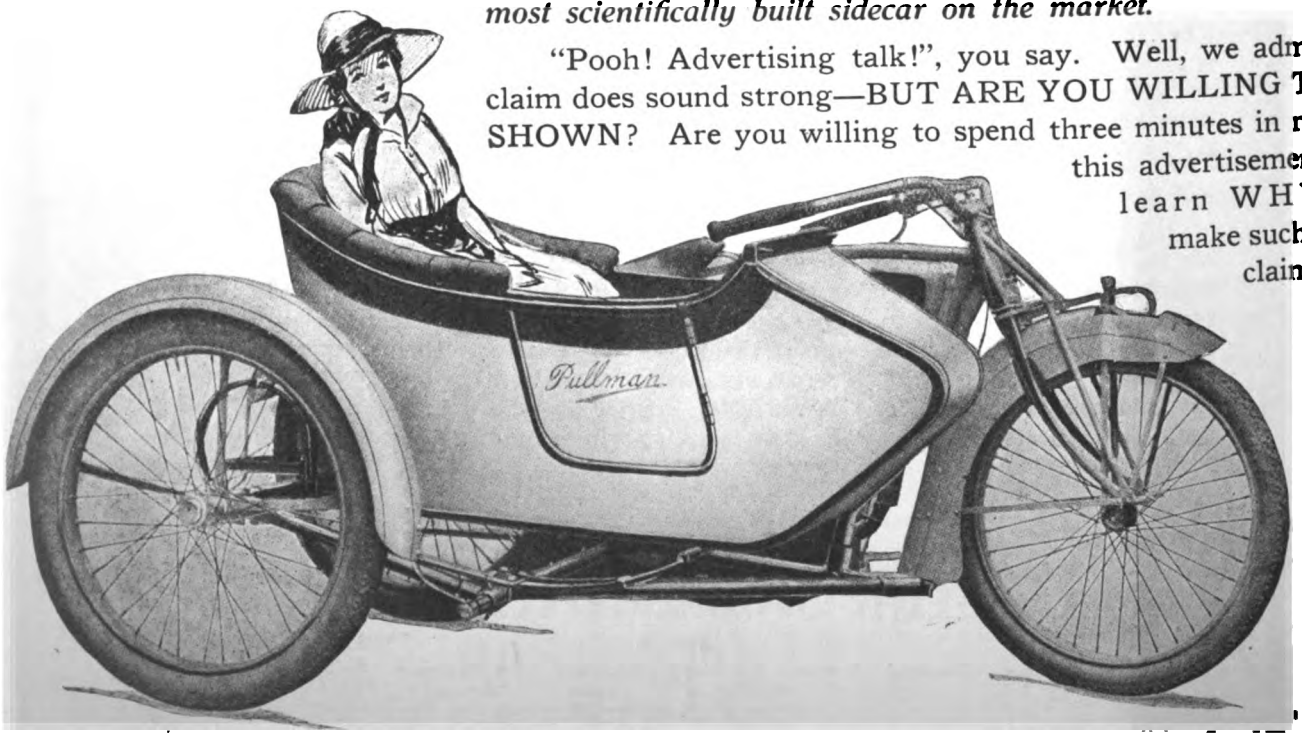
Here is positively the most luxurious, the handsomest and *most scientifically built sidecar on the market.*

"Pooh! Advertising talk!", you say. Well, we admit this claim does sound strong—BUT ARE YOU WILLING TO BE SHOWN? Are you willing to spend three minutes in reading this advertisement and learn WHY we make such a bold claim?



Digitized by Google

All the Comfort the Name Implies

We will touch on only the "high spots" of PULLMAN superiority—the surface points that every experienced rider and every veteran dealer will appreciate.

The PULLMAN is the only sidecar made that has a real *coach-built body,* built along the same lines as the highest grade automobiles. The one-piece rust-proof steel cover with high automobile body finish makes it a dazzling "looker." Heavy tufted upholstery through the entire car adds to the absolute *luxury* of comfort found in the Pullman.

Other salient features are:

The flexible triangular front frame connection and rear axle attachment.

MADE FOR ALL MAKES OF MOTORCYCLES.

Pullman Chassis built of Seamless Cold Drawn Steel Tubing and Nickel Steel Drop Forgings.

Instantly adjustable Extension Axle and Long Vanadium Steel Springs.

There you have in a nutshell the prominent selling and service features of the PULLMAN. But you MUST get a copy of our circular that tells in complete detail of the actual concrete points of PULLMAN superiority—and the coupon in the corner is for your convenience. Fill it out now—before you turn the page.

Please send me, without obligation on my part, full details of the PULLMAN Pleasure and Commercial Sidecars. I am a dealer, rider (Cross out word that does not apply to you.)

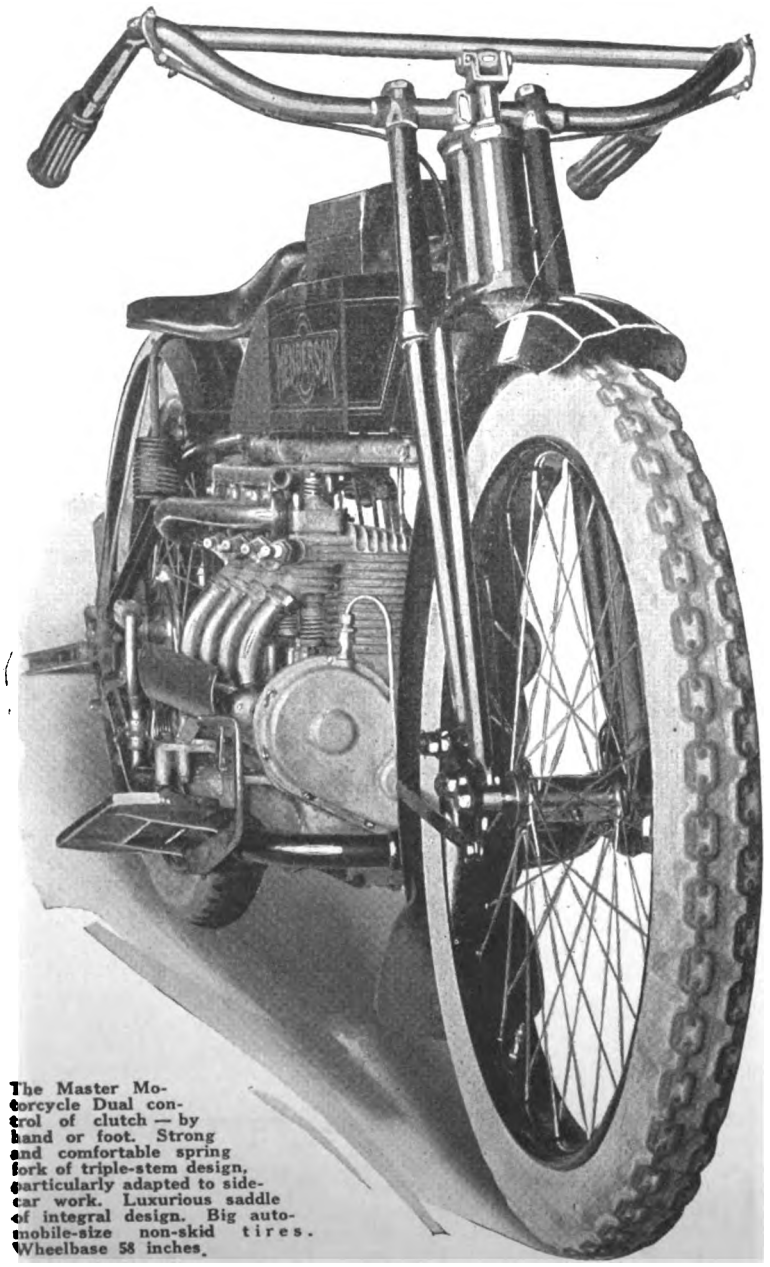
The Lure of

THE swift establishment of the four-cylinder Henderson as first choice among experienced riders was logical and natural. The smooth flow of power from this new type of motor fascinates the critical veteran. Its live responsiveness and instant answer to throttle bring a thrill of fresh pleasure. Its rugged strength and wonderful simplicity assure him of steadfast dependability and faithful service that appeal to his practical



The Master Motorcycle Dual control of clutch — by hand or foot. Strong and comfortable spring fork of triple-stem design, particularly adapted to side-car work. Luxurious saddle of integral design. Big automobile-size non-skid tires. Wheelbase 58 inches.

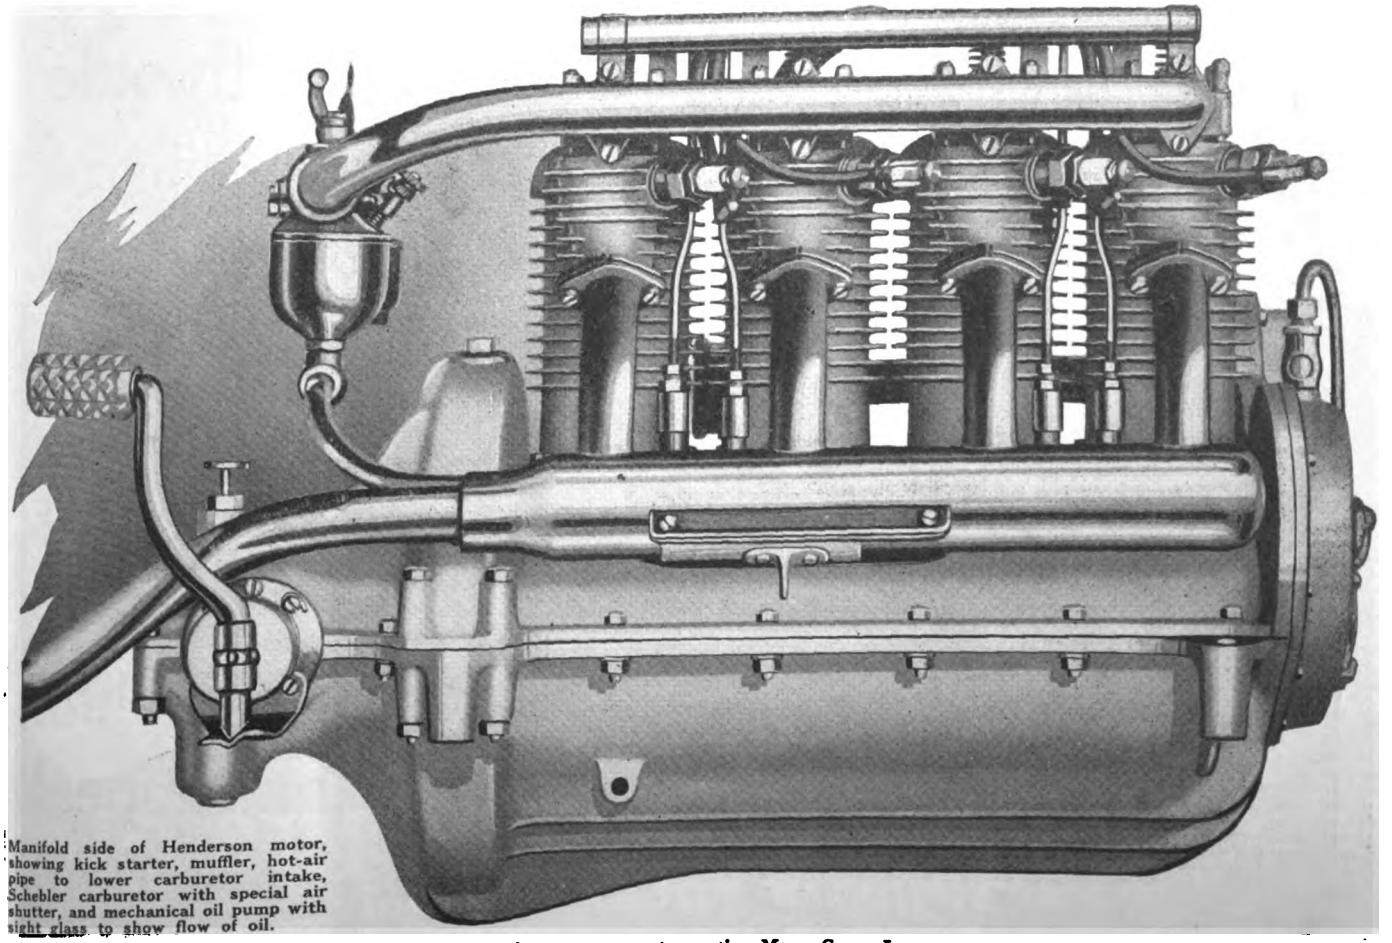
Digitized by Google

the "Four"

judgment. Its silence and coolness tell of perfected design and exquisite refinement of detail.

The dominating preference for the Henderson "four" is due to riders finding that the ability of the machine in actual performance is still greater than they had been led to expect before purchasing.

Henderson Motorcycle Co., 1158 Cass Ave., Detroit, Mich.



Manifold side of Henderson motor, showing kick starter, muffler, hot-air pipe to lower carburetor intake, Schebler carburetor with special air shutter, and mechanical oil pump with sight glass to show flow of oil.

"149"

The Quality Number

No matter what chain you are now using, just try "149"—the DIAMOND motorcycle special. Its use will demonstrate to you that the "149" is truly a quality number. With it you have no fear of broken rollers, of weak side plates, or any of the other troubles found in the "ordinary" motorcycle chain.

DIAMOND

Chains are built for hard work. The difference between them and the ordinary motorcycle chain is the difference between transmission certainty and the annoying uncertainty that comes of not being absolutely sure.

Put DIAMOND to the test on your machine.
You'll be a DIAMOND booster ever after.
Write for the DIAMOND motorcycle book.
It's full of information you will be glad to have.

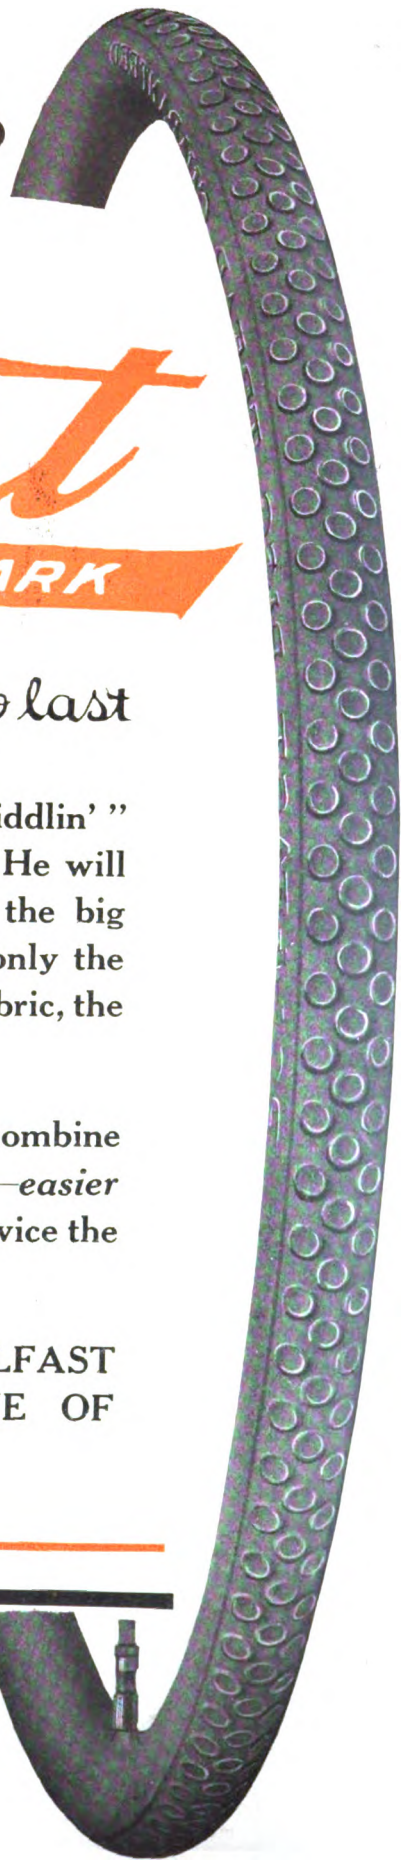
Are *You* Doing to Hold Your Tire Trade?



Rollfast

TRADE MARK

-made to last

The dealer whose bicycle tire business is only "fair-to-middlin' " should inject into it a good-sized dose of ROLLFAST pep. He will find in his hands a line extraordinarily well balanced—from the big leader, the CHAIN CUP TREAD to the ordinary studded, only the highest grade of pure rubber, the "heftiest" automobile tire fabric, the finest grade of pure raw stock is used.

Add to this really *new* and original tread designs that combine non-skid properties with beauty and utility. *More mileage—easier riding—no skidding*—these are the points of ROLLFAST service the dealer can *guarantee* his customers.

AND THE TREMENDOUS VOLUME OF ROLLFAST SALES PROVE THAT HERE AT LAST IS A LINE OF TIRES THAT MEETS THE NEEDS OF ALL.

he Dealer on the next page

These Big Distributors Will Give You Exclusive Territory

Do you know what this means, dealers? EXCLUSIVE TERRITORY means that YOU, of all the dealers in your town, will have the right to call yourself the ROLL-FAST man. It means that tire trade will flock to your doors as naturally as a magnet draws steel. It means that the supreme service of ROLL-FAST tires will build up your bike tire business and indirectly *benefit your entire line.* Because riders who once learn the merit of ROLLFAST will WANT TO DEAL WITH THE MAN WHO SOLD THEM.

Don't delay getting that exclusive territory. Someone else may be writing for it right NOW.

Sit right down now and write to your nearest distributor. He will assign you territory which will be absolutely restricted to YOU.

DUTCH BRAND Rubber Cements and Cycle Specialties

are *standard* with Jobber, Dealer and Rider because of the wonderful satisfaction they give. That is why our products are in such great demand. They give splendid satisfaction because of the extreme care employed in producing them.

In our cements we use only the highest grade of rubber. Not a pound of "cheap" rubber enters our factory. All chemicals are tested for strength and purity before being used. Science governs all of our processes of manufacture. We put up our products in various styles of containers to meet everybody's requirements. They look attractive on the dealer's shelves. They sell easy and customers come back for more.

Our beautiful new catalogue is now ready for distribution and will be sent to dealers on request. Most jobbers carry and sell DUCTH BRAND PRODUCTS. If there are any who do not, our proposition will interest them.

Cygnet Rear Car Co.,
1200 Niagara St.,
Buffalo, New York. Att. Mr Leadley Ogden

Gentlemen;-

Enclosed please find our order M17293 for one Carload of Cygnet Rear Cars, specifications per sheet attached. You will kindly route this car via Delaware, Lackawana and Western on account of freight embargo on New York Central Lines. The demand on us for Cygnet Cars is such that it is imperative that the shipment reaches us without delay.

Additional order enclosed M17294, for ten Cygnet Rear Cars with fittings for the 1916 Indian Motocycle. You will note is to come by Adams Express and will ask that you give this order your usual prompt attention rushing them in every possible way.

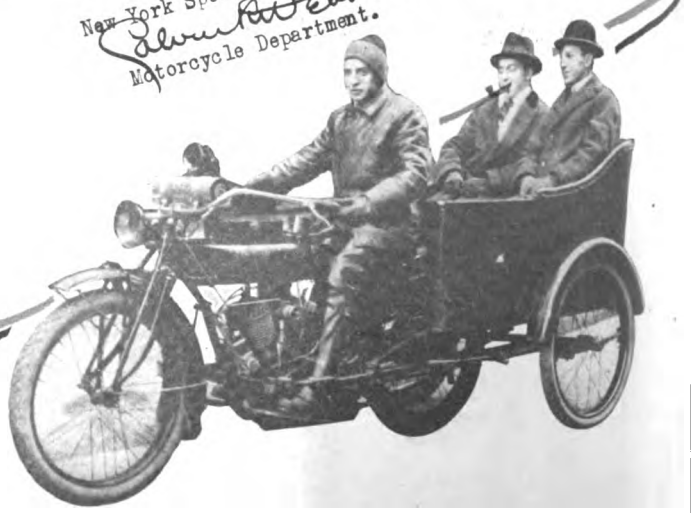
Summary of our 1916 sales to date show that 60% of the Rear Cars sold were with new Indian Motocycles and that demand for the different types were as follows, pleasure 60% , commercial van 40%.

We find by actual sales results that the Cygnet Rear Car is the greatest booster for the sale of motorcycles that has ever been on the market. During the last few days we closed deals for 1916 Indian Motorcycles and Cygnet Rear Vans with the following firms, Vulcanized Rubber Co., The P. Lorillard Co., Tobacconists, Goodrich Tire and Rubber Company, The Childs Resturants etc., and chassis to the National Guard 1st Armored Battery for carrying machine guns and ammunition in connection with the Indians they have just purchased.

Thanking you for the prompt manner in which you have filled our past orders we remain,

Yours faithfully,

New York Sporting Goods Co.,
Motorcycle Department.



60% Pleasure Type

Fits any standard motorcycle. Carries two adults and child with comfort over the roughest roads. Auto capacity, luxury and safety at low motorcycle cost. Non-tipping, non-skidding. Best auto design and construction. Full spring seat and back upholstered in Chase leather. Color to match any motorcycle.

Fits any standard Motorcycle

EACO—THE BIGGEST HORN VALUE FOR THE

GUARANTEE

We are the pioneer manufacturers of hand-operated mechanical horns and guarantee our horns to be the LOWEST IN PRICE and BEST IN QUALITY on the market.

Here is the product of the pioneer Hand Actuated Horn Manufacturer—the original patentee of the hand operated warning signal. Hence, it is only reasonable to assume that such a horn MUST be better, stronger, more effective in operation and cheaper than any of its imitators. AND IT IS. The EACO, at its price, is the *best horn investment,* either for the rider or the dealer.

Light—Powerful—Simple

The EACO is the lightest motorcycle horn made, yet the strongest, because into its construction enter only the finest of high-quality materials.

The range of the EACO is very far-reaching. This is due to the deep "chest" or sound-box, and the very sensitive diaphragm, which instantly responds to the slightest touch of the ratchet.

The EACO is the simplest horn made. Because it is built so that it has only two moving parts—the spring controlled plunger and the big ratchet wheel with diamond hard teeth that strike against the diaphragm at the slightest touch of the finger tips.

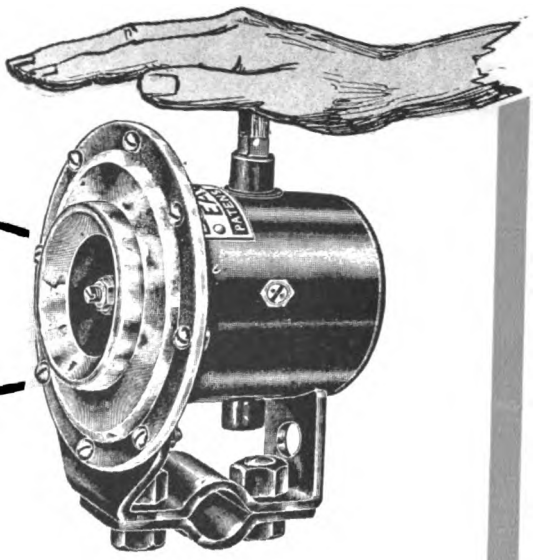
Size 3 x 3 inches, Weight, 1 lb. Finish, All Black, Guaranteed to give permanent satisfaction.

The EACO is the only horn made that has two brackets attached for instant adjustment on either the top bar or handlebar of the motorcycle. This is an innovation original with the EACO.

E. A. Laboratories, Inc. Broadway

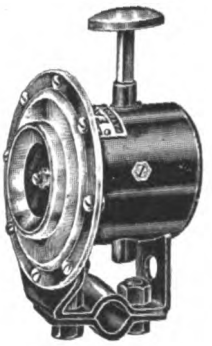
Digitized by Google

MONEY



The EACO Bicycle Horn is another best seller. This little horn weighs just one pound—and is worth its weight in gold. Its service is consistently perfect—the harsh, grinding, jarring note it throws makes people turn and look for the sidewalk—in a hurry.

Sold at the lowest possible cost consistent with high quality, the EACO Bicycle Horn is displacing entirely the use of bells.



Announcement

After lengthy litigation in the Patent Office extending over a long period of time, priority of date and invention has finally been awarded to Emanuel Aufiero, President of the E. A. Laboratories, as the original producer of the first practical hand actuated warning signal. This is a final and definite endorsement of E. A. priority claims and substantiates for all time our claim to being the originators of the Hand Horn.

Mr. E. H. Schwab, General Manager,
The Silvex Company,
171 Madison Avenue,
New York, N. Y.

Dear Sir:

Permit me to commend you on the strong stand you are taking against mail-order and price-cutting houses, especially in connection with any such practice as applied to your Bethlehem Spark Plug.

My years of trade experience have taught me that nothing is so pernicious in its influence, so surely destined to undermine the strength of an industry as the wholesale wrecking of prices.

Be assured of my hearty support of your policy of refusing to deal with any house that is proven to be addicted to the price-cutting habit.

Price maintenance is the vital sap that nourishes the tree of Business - price-cutting gnaws at its roots and eventually destroys it.

Very truly yours

NEW YORK SPORTING GOODS CO.

Frederic A. Baker.

Vice-President.

Here are the illuminating words of one of the oldest and most substantial motorcycle jobbers of the industry. His experience in the motorcycle game dates back to the time when the first motorcycle appeared on American roads. Hence, his open championship of our determined fight against mail-order and cut-price houses should hold much weight with every dealer and jobber in the country.

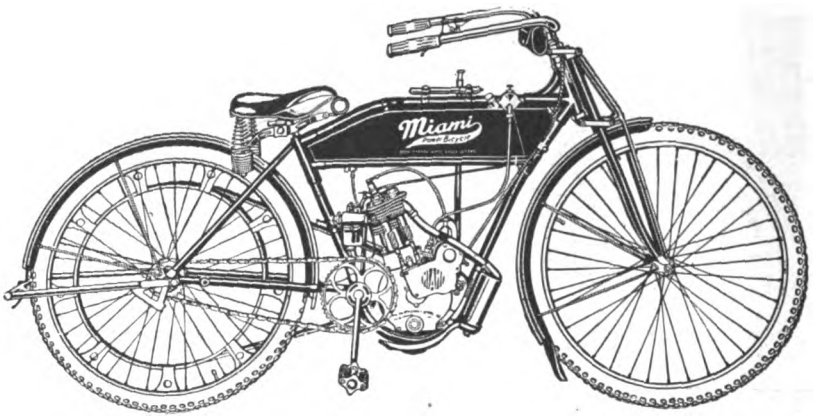
Miami Products



Berry of Los Angeles Sold 200 Miami Power Bicycles in 3 Months

Have just sold the last of my second carload of Miami Power Bicycles since first of the year. Rush another carload to me as soon as possible. The town has gone Miami-mad. The MIAMI POWER BICYCLE certainly is making good here.

You, as a dealer, are not interested in vague claims of quality, of speed, of economy, of endurance, of a hundred and one other features that are the stock claims of **every** bicycle and motorcycle manufacturer. What you want to know is FACTS—FACTS—what the MIAMI POWER BICYCLE has done, **how it is going.**

Therefore, we will only tell you that T. E. BERRY, of Los Angeles, has sold 200 Miami Power Bicycles in three months—that throughout the country other dealers are having similar successes—**that there are thousands of MIAMI POWER BICYCLES on the road**—have been there for more than a year. The MIAMI is NO EXPERIMENT—it is a **proven success**—and hundreds are reaping a harvest of profits from its sale. Read Berry's statement in the panel.

Miss Margaret Gast, dare-devil bicycle rider and Lady Champion of the World, spends her leisure time riding on a Miami Power Bicycle.

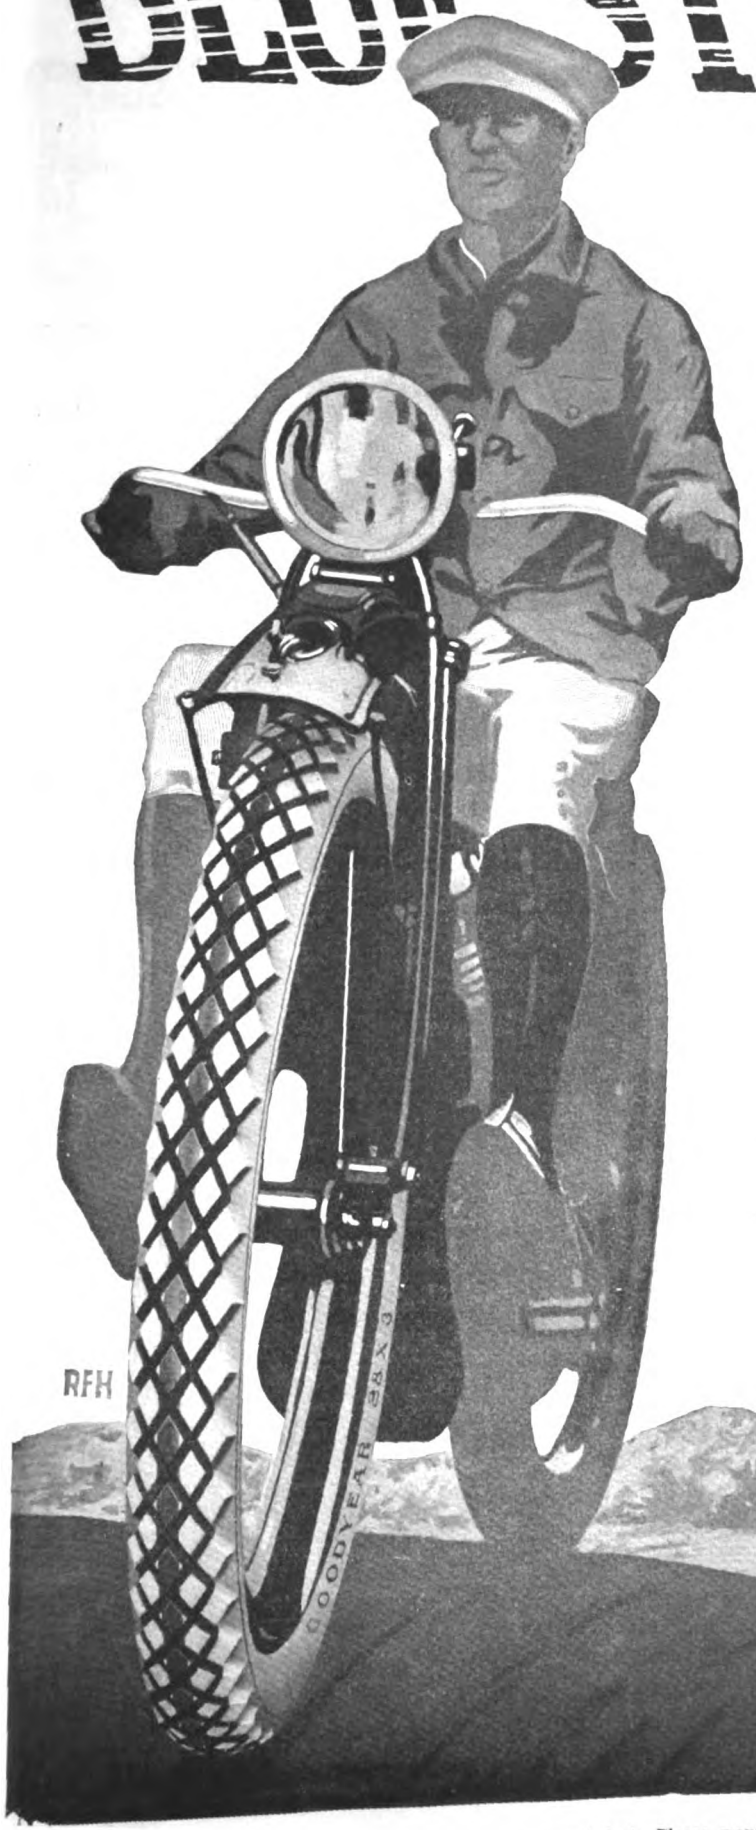
BLUE STREAKS



Why Dealers Sell Them

Goodyear Blue Streak Motorcycle Tires have been proved best both by manufacturers and by riders.

The manufacturers of all leading makes of motorcycles have adopted Goodyear Blue Streaks as standard equipment. *Three out of every four* new motorcycles will be Goodyear equipped in 1916.

Manufacturers tested Blue Streaks in every possible way—and proved to their own satisfaction that Blue Streaks give the best service and the longest mileage at the lowest cost to the rider.

And in everyday service riders have proved Blue Streaks just as conclusively.

Every important world's record for speed and endurance on track and road is held by Goodyear Blue Streaks.

Big and hardy, good looking and easy riding, safe and sure, no other tire is so well fitted to give unusual mileage, to lessen trouble, to increase speed and save power.

And because Blue Streaks have so unanimously demonstrated their superiority to manufacturers and riders, they have been the easiest and quickest tires for dealers to sell.

Where volume of sales is as important as satisfied customers, Blue Streaks have proven the most profitable tire to carry.

We can send you a stock of Blue Streaks immediately from your nearby Goodyear Branch.

AT THE GOLF CLUB WITH THE CLEVELAND

BOSCH MAGNETOS helped in the sensational growth of the CLEVELAND LIGHTWEIGHT

THE best reason for the remarkable rise to popularity of the Cleveland motorcycle, the best reason for its supreme position in its field today, is the well directed desire of the Cleveland engineers to produce a dependable product—an efficient, lightweight motorcycle that would give the Cleveland Company a permanent position in the motorcycle world.

Reputation being at stake and ignition being vital, more important to the success of the motorcycle than any other unit, the Cleveland engineers set aside the possible saving of a dollar or two in first cost and equipt their motorcycle with the best ignition system that could be purchased—they selected the Bosch Magneto.

The Cleveland Company states, "We selected Bosch Magnetos and are paying a higher price for Bosch in order that we may be assured of the very highest type of ignition." Surely, the Cleveland Motorcycle Company has made no mistake—witness their meteoric rise in the motorcycle industry.

FOREWORD

PRELIMINARY announcements concerning this special issue of **Motor Cycle Illustrated** stated that it would present the most impressive array of sales arguments in behalf of the motor two-wheeler ever collected between the covers of a motorcycle journal in this country, and now that it is ready for the press the Editors do not feel called upon to qualify that prediction in the slightest degree. From beginning to end this Spring Number is an enthusiasm breeder and a business builder of unprecedented power, and the dealer who passes a copy along to a prospect will automatically set at work the most versatile and potent silent salesman that money can buy.

This special number is based upon the two vital aspects of the sales situation,—WHY a lover of the outdoors should ride a motorcycle, and HOW he can use it so as to derive maximum satisfaction in recreation, health and economy. Every article and every illustration in this big number assists in driving home those two ideas—WHY and HOW. The cleverest writers in the American motorcycle field have contributed to the remarkable lineup of sales-boosting articles and the dean of American motorcycle artists has illustrated them. There could be no stronger combination. We will not delay you longer,—go to it!

WHY THE MOTORCYCLE IS EVERYMAN'S MOUNT

Showing That the Power Two-Wheeler Is Not Confined to Pleasure Service, But Is in Use in a Wide Variety of Lines of Endeavor

By STANLEY ROSEBERRY

FEW people realize the broad scope of the motorcycle at the present time. Still fewer are aware of its possibilities in lines which as yet have not been more than touched, to say the least. Most folks regard the power two-wheeler lightly; they see it ridden for pleasure for the most part, and think that its usefulness begins and ends there. The few sidecar and sidevan outfits seen are considered as exceptional instances, instead of being but a few of the many applications of the motorcycle.

Well, most motorcycles are used for pleasure work, but there are large numbers doing first class services in the professions, in business lines and in government work. Among the professional users, the doctor and the engineer lead, with the teacher next in point of numbers.

The doctor uses his motorcycle because it is ready at any time to answer a call. It is superior to the horse in needing no attention; it does not cost anything for supplies when idle, nor does it require a special place for housing. Its speed makes it invaluable in answering calls and in covering long distances. He uses it to take patients for an airing. Finally, he need not consider it as he would a horse; the only limit of endurance being his own and not that of his steed.

The engineer uses his machine for its superior speed, its ability to get to places where other vehicles or horses have difficulty, and for its economy. With a motorcycle the engineer can speed to a place where work is being done and direct matters, or follow up a delayed shipment of material. He can follow tests of vehicles in action on the road or on rails.

The teacher rides for the health-giving effects of motorcycling, as well as for reasons of economy. Using his machine to go to and from school, he keeps in fine condition. He can thus get the pleasure and utility effects from the same machine at low cost. Tutors take their pupils on tandem or in sidecars for trips to the country, thereby giving them a chance to study nature and instill a love of it in them. They use the motorcycle to do this in an economical manner.

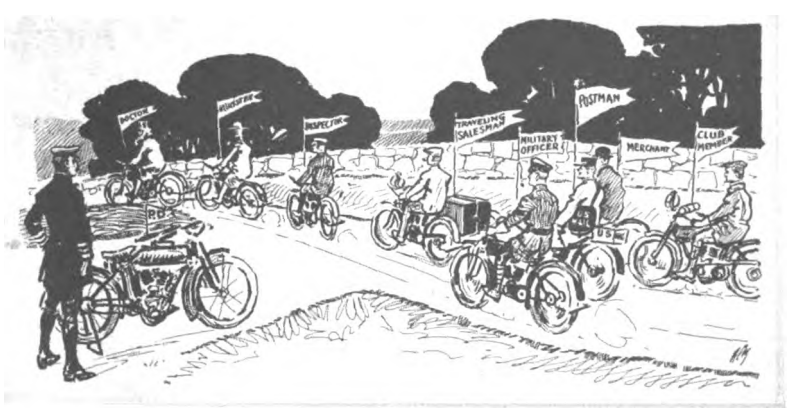
Used by Professional Men

The minister finds the power two-wheeler effective in making parochial or circuit calls. Like other professional men, the economy of the machine's operation, its ease in storing and its hygienic value preponderate over other forms of transportation in his estimation. The actor uses the motorcycle to go from theatre to theatre on his circuit, and find time saved and health better than when trains are depended upon.

The veterinary surgeon is another motorcycle user whose numbers are growing. He has overcome the prejudice that his profession should use a horse entirely. Economy and speed appeal to him; economy in operation and speed in answering a call. Like others, he enjoys the riding for pleasure and for health-maintaining qualities.

In the Business World

Turning to the business world, among the largest users are the big public service corporations. Their line-men, inspectors, repairmen and solicitors use the two-wheeler for good and sufficient reasons. The repairman takes advantage of the speed of his mount and of its high carrying capacity to fix up trouble which has occurred. The inspector can go to the scene of trouble in quick time and take charge. He can cover an enormous amount of ground in a given time by its use. The solicitor goes to the spot and saves his firm trouble and expense in case of misunderstanding, etc. The economical superiority of the motorcycle is a big factor with corporations.



The traveling salesman has, in the motorcycle, a rapid and inexpensive means of transportation, as well as a sure one. The motorcycle saves time for him. It eliminates waiting for trains. It does away with carriage hire. A good night's sleep with its superior effects the day following is always possible, which is not the case when trains are resorted to. Except in a few instances, his samples are carried right on the machine. With a sidecar the entertainment element is worked to the full.

The messenger uses the motorcycle to get speed in delivery, as well as for the reduction in operating costs which the power two-wheeler shows over other forms of vehicle transportation. The postman covers more territory in less time than with the horse or automobile. In collection work the motorcycle stands the wear and tear of starting and stopping better than any other means of transportation; hence its adoption. The R. F. D. motorcyclist, by reason of the speed of his machine, devotes his time to other means of money-making, and thus increases his revenue. The fact that little or no care need be taken of the machine gives it a superiority over the horse or motorcar.

For delivery of all kinds of goods, the sidecar or sidevan outfit finds favor with merchants by reason of its speed, surety of operation and low cost. There is an advertising feature in its use, but this is had at less expense than when a motor car is employed.

In government service the motorcycle policeman is the best known as regards municipal motorcyclists. The speed of the machine is the chief reason for its use, enabling him to overhaul any violator of the law, to respond to emergency calls instantly, and to tirelessly travel when the rider is on patrol. Storing and upkeep for the motorcycle are low as compared with other vehicles or with horses.

In the Federal service, forest rangers find the motorcycle invaluable for its nobility in all kinds of country, and for its speed in getting to fires. Border patrols use the power two-wheeler because of its enduring qualities and speed. Officers in charge of district in insular possessions ride motorcycles for efficiency's sake.

A Futurewise Glance

So much for a glance at the present. Let us now look at some new applications for the motorcycle for the near future. With special sidecar carrying a stretcher, the outfit forms an economical medium in sanitary city service, supplementing or replacing the horse or automobile ambulances. Rotary brooms for street cleaning can be drawn and operated by specially-built motorcycles; health departments can use them in warding off or caring for contagious diseases. Police departments can have sidecar-mounted riot guns ready to hand. Traveling lecturers can carry apparatus and records on circuit in sidecar outfits. There is in fact practically no field of endeavor where dry land is concerned which will not, in course of time, adopt the motorcycle in some form or other for its betterment—financially and physically.

The author of this article is not laboring under the delusion that he has covered all, or even one-third, of the varied phases of the motorcycle's usefulness, but feels that the high lights he has touched upon here and there will serve to suggest strongly to the reader the wonderful scope of the power two-wheeler. As a matter of fact, it would be impossible to list fully the widely diversified fields in which the motorcycle can be used to advantage; such a list would be limited only by the imagination of the writer.

SAVING PRECIOUS MINUTES—AND DOLLARS

A Hard-Fact Story About a Factory Worker Who Struggled with Trolley Transportation and Nearly Lost His Job Before He Learned What a Motorcycle Would Do for Him

By D. B. PANGBURN

Being Late at Work Nearly Cost Him His Job

But the Motorcycle Solved the Problem for Him

I USED to live with Bill. He was in the office at the East plant and I spent part time there, part at the main plant and part on the road between. The plants were two and a half miles apart, so the company was glad to furnish oil and gas for my motorcycle, and let me save time by using it to go back and forth, thus saving carfare, too.

But this is not my story, it's Bill's. Bill is married and has three children. At this time he was getting about $18 per, and his wife was taking three boarders to make ends meet. As I have said, I was one of them. That's how I know.

Bill lived near the car line to the East plant, and two miles away from the factory. He's big and heavy on his feet, and he couldn't stand it to walk to and from work. He had 90 minutes off for dinner, and he used to use the trolley to come home at noon, as well as to go out in the morning and come back at night.

And Bill Was Left Behind

The cars were always crowded in the morning where Bill got on—but you know a trolley—always room for one more. Then the railroad company thought they were losing fares in the crowd, so they began to run pay-as-you-enter cars on that line. When these were full they wouldn't open the door for anyone, and Bill got left a lot of times, and was late at the job. That cost him a half hour's pay every time and made the boss sore. It happened so often that finally Bill was told that if he missed again that week he'd certainly be fired.

Bill was so scared on account of his family, and work not being any too brisk, that for the next two days he started early and walked. But Saturday morning he miscalculated somehow, and had to depend on the cars. I happened to be going to the East plant that morning, and when I rounded the corner onto the two-mile stretch there was Bill trying frantically to break into a car, which went off and left him.

I saw his trouble, though I didn't know then how bad it was, so I stopped and told him I'd carry him out if he was willing to sit on my carrier without any cushion. He replied that he'd sit on it if it was red hot—and off we went. We pulled in with just leeway enough to save his job.

This article in the "Why" series deals with a problem that confronts thousands of men, and proves that the motorcycle really is cheaper than trolley riding or shoe-leather. It's well worth careful reading.

That night I told Hunt—the dealer—all about it. He scented a prospect right away. I said Bill hadn't the cash, but Hunt said he'd show him he couldn't afford to be without a machine.

"Take me up there right now and introduce me," begged Hunt, so we went. Hunt is some salesman. He strikes while the iron is hot, and he has his figures down cold. He got Bill and his wife together, and I sat back and watched.

"The way you're going now," he began, "it costs you just $1.20 a week, or $5 a month, for transportation, and you have to stand up in a crowded car most of the time while you travel your eight miles a day. Then, too, you're likely to get left on the cars and be late, which costs you considerable lost pay, not to mention a good chance of losing your job. A motorcycle is what you need, and since you wouldn't ride much of anywhere except to work, a lightweight is the thing."

"No," said Bill, "they cost too much to run, with gas so high. I'll get up early and walk."

"As you did this morning?" asked Hunt slyly. "You couldn't stand it anyway, and besides, you're all wrong about the expense. Look at this." And he wrote down:

Cost per mile—
Gas, 100 miles per gallon @25c. = $0.25
Oil, 1,200 miles per gallon @60c. = .05
$0.30

Cost per day = 8 miles × 30c. = 2.4c.

"Now," he went on, "call it 3c. a day if you want to, to cover incidentals. It means a saving of 17c. a day, or $1.02 a week over your present expenses. You can ride in wet weather if you want to, and you

Digitized by Google

can ride 250 days in the year anyhow, which gives you a saving of about $42 a year—a neat little sum. You needn't worry about tires any, for the ones that come with the machine will last you about three years if you only ride to work.

"About walking," he continued, "that won't pay. You can't get something for nothing. If you walk you wear out shoes. I've kept track of that matter, and I find it costs the average man 5/6c. per mile for shoe leather.

"For instance, if you walked 8 miles a day it would cost you 6⅔c. a day for shoes, which is more than twice what it costs to run the machine. You can't get away from it unless you stick your head in the ground like an ostrich. Transportation costs money, and the lightweight is the cheapest and pleasantest, as well as fastest, way. And don't forget—with it you can always be on hand and keep your job."

You see he knew what a close squeak Bill had had in the morning.

Then Mrs. Bill spoke up. That talk about the job had caught her.

"It's a fine idea," she admitted, "be we can't spare that much money."

When Hunt heard that "we," he knew they were sold.

"I'll fix the money matter," he said. "Your husband is a steady, reliable man. Now you give me $50 down and sign this agreement to pay $4 a week until the balance is paid off, and I'll deliver the machine tomorrow."

So they signed up and Bill rode to work Monday morning.

* * *

No, I don't board with Bill now. They don't have to take 'em in any more. You see that motor was the making of Bill. It put life and pep, and energy, and the joy of living into him. It got him to work early in the morning without that tired feeling, and he didn't have to dash out and race for the cars the minute the whistle blew because he knew he'd have a seat on the way home anyhow. It helped him to keep his punch for the work, and to do as much as any other two in the place. Yes, Bill is office manager at the East plant now, and he'll go higher. He's a man remade by the motorcycle process.

PHASES OF THE MOTORCYCLE'S USEFULNESS

There Are Hundreds of Others and the Dealer Who Will Study a Merchant's Requirements Can Always Adapt the Power Two-Wheeler to Them

WHY THE SMALL CAR IS A TROUBLE-BREEDER

Although Attractive Before Purchasing, the Low-Priced Automobile Quickly Demonstrates Its Shoddiness and Capacity for Draining the Pocket Book of Its Owner

By DON JOHNSTON

ABOUT once in every motorcyclist's career comes the time when he is lured by the call of the loquacious automobile salesman and tempted to fall into his web. This gentleman (in a most disinterested way, of course) enlarges upon what he considers to be the shortcomings of the single-tracker and tells how they can all be overcome by the purchase of his little tin buggy. Mr. Motorcycle Rider may accept these rosy statements at their face value, for he is apt to be misled by popular tales about lightness of weight, low gasoline consumption and great tire mile-

age, circulated as they most generally are by people who perhaps have never owned a motor car.

I have had the opportunity to study the actual working out of several such changes and disillusion usually follows. In the first place, the low prices of second-hand cars appeal to the prospective automobile owner as they most nearlly approach the cost of a new motorcycle and side car. The columns of the daily newspapers carry a multitude of ads. telling how large and originally expensive cars can be bought for a mere song. They are placed under the caption of "slightly used machines," "rebuilt cars," "demonstrators," etc. Sometimes these motor cars are only a few seasons old and can be bought for a few hundreds of dollars.

Knows Only Good Service

The motorcyclist, used to faithful and continuous service from his mount, is likely to assume that these machines contain equally fine workmanship and must be as durable. Such is by no means the case, however. Motorcycles are made in one grade only, and that is the best the manufacturer is capable of producing. The motor partakes is no wise of motor car practice, but rather of high grade aeroplane design. None but the best of materials are used and all fitments are the finest that money can buy.

Contrast to this the average low and medium priced automobile. It is scrimped at every point. Workmanship is of the poorest. Many of its parts are of doubtful origin, and the whole ambition of its makers was to produce something cheap, no matter at what ultimate cost to its purchaser.

High priced machines are sold at a ridiculously low figure because of their prohibitive upkeep expense. They can average only five or six miles on a gallon of gasoline and the cost of two new casings and tubes would buy a motorcycle complete.

New Parts Are Expensive

Repair parts come in proportion to the original selling price of the car. For a man of moderate means to try to rebuild a high grade automobile, even if he were an expert machinist, might well entail the expenditure of more than he originally paid for the entire outfit.

The new cheap automobile looks attractive sometimes to the motorcyclist, and he is induced to part with his high-grade mount for a song and acquires a small asthmatic bunch of trouble in its place. True, it does not require as much gas and is easier on tires than a larger machine. But when it is compared with the modern

The illustrations herewith treat eloquently of the motorcycle's dependability as compared with that of the low-priced small car. Even the cheapest motor car will operate satisfactorily for a time—BUT when the repair bills and other troubles begin to pile up they do so at a heart-breaking rate. Keep that in mind when the suave motor car salesman buttonholes you; tell him that you wish to buy quality, not merely quantity. That's the moral of the accompanying article.

perfected motorcycle it is hardly in the running at all.

Big Consumption Difference

Making general comparisons, when you fill its tank with gasoline you can cover the same number of miles that you can with one filling of the motorcycle. But in the first case you pour in ten or twelve gallons as against two in the second. In other words, the cost of operation of the two-wheeler is only ⅕ that of the "small" motor car. Oil consumption is quite high, as most low priced motor cars cannot be fitted with a first-class filtering system for the figure at which they must be sold.

No high grade ball or roller bearings are used as in the motorcycle engine, and so motor-friction is high and necessitates a very liberal use of lubricant.

Final Drive Troublesome

The transmission and rear axle of these cheap motor cars are apt to be weak, and even on a new machine give the owner trouble. It has been said that "an automobile can always be told by its rear axle," and certainly some of these overgrown cyclecar types are not noted for their sturdiness of construction.

The tire bugaboo has always been the bane of the automobilist's existence. Motorcyclists who have never owned a motorcar overlook this point, and expect a set of tires to last several seasons as they usually do on the faithful two-wheeler. The weight carried on the automobile tire is so much more than the springy, live load of the motorcycle that tire injuries are always more serious even from the same causes. The load on a motorcycle is a simple pressure on the tread of the tire. Probably the ⅕ ratio would apply to tire expense as well as to gasoline. If a sidecar is included, of course, the difference would be somewhat less—probably nearer a third, owing to the extra wheel and the increased drag on the driving tire.

On all but two or three makes of cars the tire section is also larger and the price advances rapidly with any increase in size.

One season I drove both, a small motor car and a motorcycle every day over practically the same route, and covered about the same mileage. The comparison in the upkeep expense was at least 75 per cent less with the motorcycle. And this motorcycle was a special close-coupled model with a racing motor not intended to be especially economical.

Why, then, give up the exhilaration of unlimited speed and incomparable hill-

climbing ability which can be found only in the motorcycle? I know of nothing that can approach it unless it be found in the flight of the aeroplane.

OFT FORGOTTEN POINTS THAT NEED LUBRICATION

WHILE the mechanical oil pump and hand-pump take care of the lubrication of a motorcycle's powerplant, many riders think that only the bearing surfaces in the motor are all that any personal attention need be given to. But there are other parts that need oil, and sometimes they cry in no uncertain voice to aid them in moving easily. One of these parts is the rocker at the lowest part of the spring fork.

Most machines fit oil or grease cups at this point, and these should be looked to as per the instruction book. A squirt of oil twice a week is not too often for these parts.

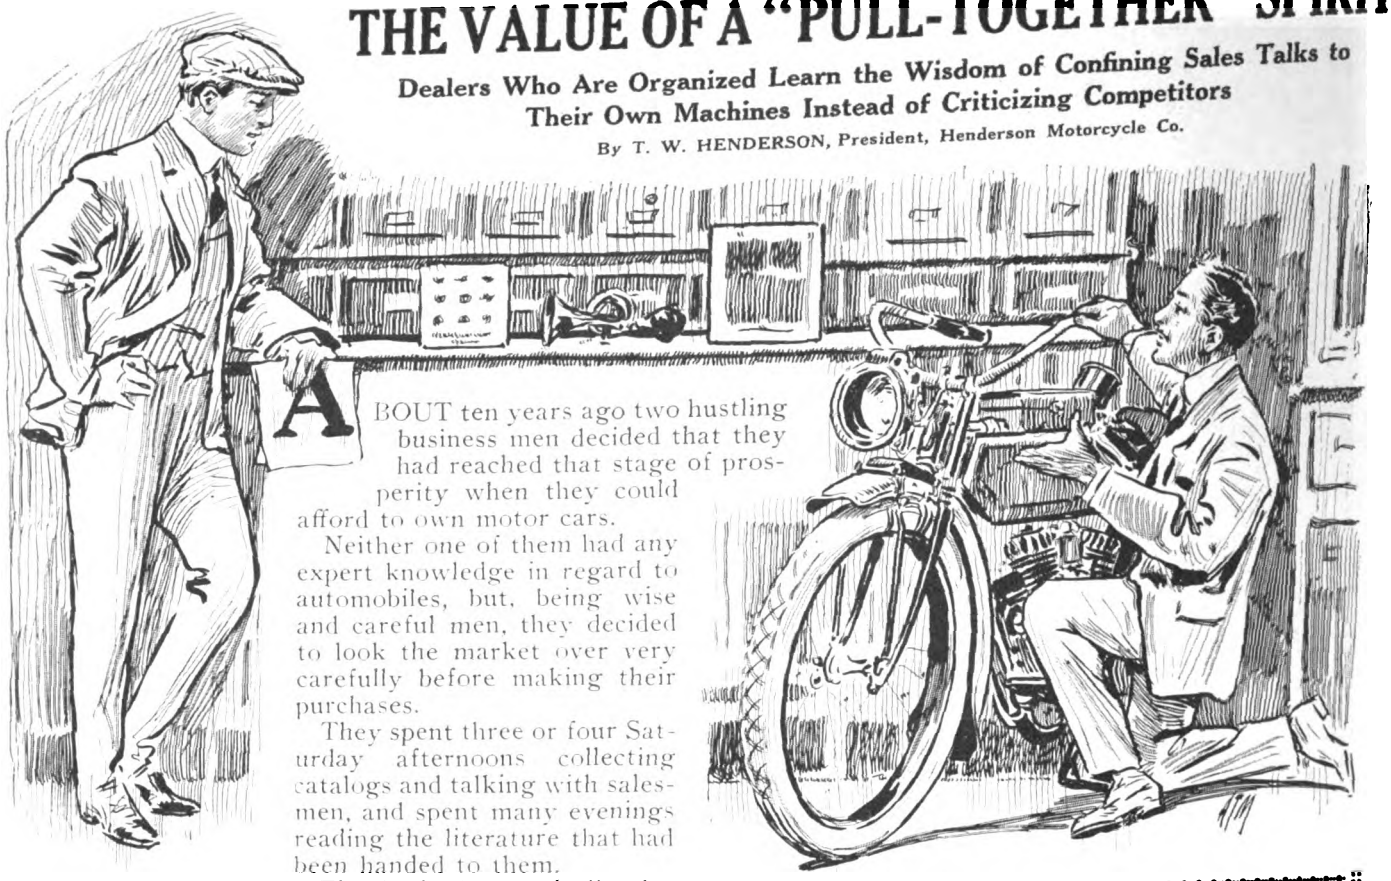
THE VALUE OF A "PULL-TOGETHER" SPIRIT

Dealers Who Are Organized Learn the Wisdom of Confining Sales Talks to Their Own Machines Instead of Criticizing Competitors

By T. W. HENDERSON, President, Henderson Motorcycle Co.



ABOUT ten years ago two hustling business men decided that they had reached that stage of prosperity when they could afford to own motor cars.

Neither one of them had any expert knowledge in regard to automobiles, but, being wise and careful men, they decided to look the market over very carefully before making their purchases.

They spent three or four Saturday afternoons collecting catalogs and talking with salesmen, and spent many evenings reading the literature that had been handed to them.

Finally both practically decided on the same car, but before making their purchases decided that it might be wise to ask competitors about this particular make. Almost without exception the conversation between the prospect and the salesman would be something like this:

"What do you know about the X. Y. Z. car?"

Unhesitatingly the would-be salesman would jump in with the conclusive argument that the X. Y. Z. was a bunch of junk and could not run fast enough to get out of her own dust.

After getting started on this subject, Mr. Salesman would gabble volubly, using all the superlatives in the English language in his denunciation of the competitive car.

By this time the prospects felt that they had used up as much time as they could afford in his store, and so they left without having heard the salesman give any sort of an exhibition on how to sell his own motor car. In fact, it had not been mentioned.

After a half a dozen such experiences they were very skeptical about the car which they had about made up their minds to buy, and thought they had better go in and give it the "once over" for the last time.

Now it happens that there was a real salesman on the floor representing this car, and when the prospects asked what he knew about the A. B. C. car, he immediately said he knew nothing; that it was his business to sell the X. Y. Z. He did know all about that, and was prepared to demonstrate to them that there was no more reliable or speedy car on the market. He assured them that he could easily demonstrate hill-climbing abilities that would astonish them, and that when it came to comfort and good looks, they were so self-evident that there was no argument.

Again the prospects wanted to know what he thought of the N. O. K. car, to which the salesman replied that the N. O. K. agency was across the street and they could get all the information they wanted over there, but if they wanted to know about a car that would stand up and give service, all they had to do was to look at the one in front of them.

He guaranteed that the factory behind the car would give service such as they expected, and that his agency was prepared to stand behind the car to the limit. In other words, he had no time to talk about anything but the X. Y. Z. car which he represented.

He took orders for two cars that afternoon.

Before going any further I want to state that this is a true story and happened in a town where the dealers were not organized. These cars were literally sold because competitive dealers had been so busy knocking this particular car that they had no opportunity to take the necessary time to sell their own.

However, things have changed in that town. At the time referred to there was no dealers' organization. In fact, most of the dealers did not know each other, except by sight.

One of the dealers got it into his head that it was bad for the automobile business generally to have so much knocking, because it disgusted the prospects and got them afraid to buy any make of motor car, and so an association was formed with the idea of getting the boys together, and it was simply astonishing how general business picked up after they all decided to cut

The Dealer—"My competitor's motorcycle may be all right, but I don't know much about it and I never "knock." This is the machine I'm selling—and therefore I know all about it. I'm going to tell you why my machine is the one you need."

Digitized by Google

out the rough work and to join the "kind-word" society.

As one dealer remarked at one of their weekly luncheons, "there was a time when I did not hesitate to knock the X. Y. Z. car. The trouble was I did not know Tom Manton, the chap who represented it. If I had, I am sure I should not have wielded the hammer, because I like him personally and would not willingly say anything that would hurt him."

Do you get the idea?

I believe a motorcycle dealers' organization would be the biggest kind of benefit to everybody interested in motorcycling. If the dealers were better acquainted and better friends, they would have neither the time nor the heart to say anything against their friend's business, because all dealers ought to be friends if they want to boost the motorcycle business in their town.

Every time the motorcycle dealer adversely criticises the motorcycle which his competitor represents, he is hurting his own business, because he is really hurting the motorcycle business.

I have no doubt there are many, many prospective motorcycle riders who have been influenced by the thoughtless condemnation of motorcycles by men who sell motorcycles.

If the motorcycle dealer were only organized with the idea that he was going to boost motorcycles in general, and his own in particular, and that he was going to refrain from criticising adversely any other make of motorcycle, I am firmly convinced that the business would be on a much better basis than it now is.

Look what the "one million bicycle" idea has already started for the bicycle manufacturer and dealer. I presume more bicycles will be sold during the coming summer than ever in the history of the bicycle business, and simply because of organization with the idea in mind that it can be done if everyone of the dealers in a community get together.

THE FORGOTTEN ART OF SELLING THE SERVICE IDEA

It Is His Dream of What a Motorcycle Will Enable Him to Do That Usually Brings the Prospect to the Store, and the Salesman Should Make the Most of That Fact

By J. V. ROBINSON

I HAVE bought three motorcycles myself and have listened to dealers engaged in sales talks with many prospective buyers, but I have yet to hear any trade man present the Service Idea involved in the power two-wheeler as it should be presented. Every motorcycle salesman is ready with catalog facts and figures to demonstrate the abstract mechanical ability of the motor under discussion, but few, if any of them, seriously attempt to visualize for the benefit of the prospect the actual returns that will be derived.

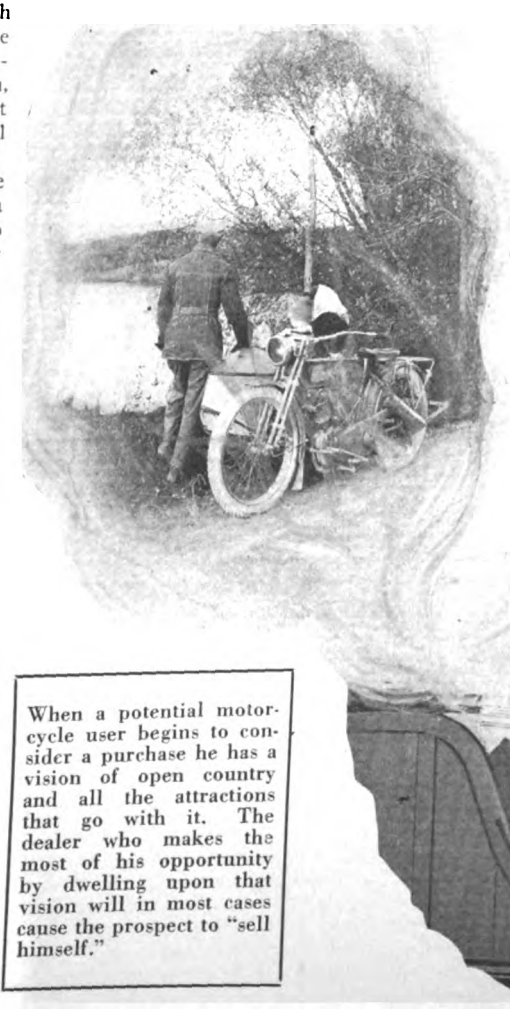
This is what I'm getting at: When the average man considers the purchase of a motorcycle he looks upon it as a means to an end, and it is that end—whatever it may be—that the salesman should make the basis of his selling talk. In other words, he should aim to sell healthful exercise, fresh air, the sense of freedom, the change of scene, the call of the road, the lure of mountain and wood, the fascination and exhilaration of skimming hither and thither at one's own sweet will. Those are the points he should keep persistently before the prospect—for when we come down to hard facts, it is the Service Idea that the patron wishes to buy. He needs the motorcycle to attain those delightful rewards. That's all.

A long explanation of the mechanical makeup of a motorcycle is all right in its place—but hardly as a sales argument. While the salesman is discoursing upon three-speeds, oiling systems, and so forth, the average prospect is thinking of an inviting country road, of all the rare joys that will come with the ability to get out in the open and hum over hill and down dale. He is dreaming his dream—the dream that made him think of a motorcycle and that brought him into the agency to talk about a purchase. Why not sell him that dream?

Why not dwell upon all the varied and wonderful opportunities offered to the motorcyclist and when the prospect has decided that the realization of his dream is worth any effort he can make to attain it—then top off the talk with a short mechanical discourse and the statement that the motor under consideration will do the work and do it well? I know from long observation that such a sales system would show wonderful results.

If a prospect asks for mechanical data it should be forthcoming promptly—but ninety-nine beginners out of one hundred merely say that they are thinking of buying a motorcycle, and leave it to the salesman to do the rest. If the salesman simply talks mechanics he *may* sell the motor, but if he has enough imagination to get away from the machine itself temporarily and present the fascinating story of the open road, he is *sure—deal sure*—to close the deal. All salesmen can't paint a word picture of the manifold joys open to the motorcycle roadster, but more of them could do it if they tried.

It's pretty hard to sell a man cold mechanical dope—but hold up before him the dream he has had in the back of his head.



When a potential motorcycle user begins to consider a purchase he has a vision of open country and all the attractions that go with it. The dealer who makes the most of his opportunity by dwelling upon that vision will in most cases cause the prospect to "sell himself."

THE LIGHTWEIGHT AS A SPRING TONIC

When That Languid Feeling Known as Spring Fever Makes the Daily Grind More Irksome, Then Hop Into the Saddle and Hie to the Country—Fresh Air Is What You Need

By W. S. QUINLAN
Secretary, Cleveland Motorcycle Mfg. Co.

That the lightweight is to have a permanent place in American motorcycledom appears to be an accepted fact, if the sales that have been made during the short interval since its introduction and the enthusiasm which it has stirred up in all quarters can be used as the basis of an opinion. The outstanding feature of the lightweight movement, and one which was predicted by lightweight advocates even before an American machine answering that description became a reality, is the fact that in the selling field the lightweight is not encroaching on the domain of the medium and heavy weight machines, but is actually opening up a virgin sales field and winning new converts to the sport of motorcycling. Its influence in this direction is bound in time to redound to the benefit of the whole industry.

REMEMBER the days when you were a youngster and they made you take that famous old spring tonic—sulphur and molasses? You squirmed in your mother's lap to dodge the teaspoon, but without avail. That unpleasant tonic served its purpose—it anticipated that languid feeling known as spring fever, toned the system and put you into proper physical condition to enjoy the glorious springtime. And of a Sunday, feeling bright and chipper, you'd hop on a crowded car and take to the budding woods.

Getting Away from the Grind

Well, times have changed since, but you still get the perennial spring fever. But how many of you take sulphur and molasses? Some more pleasant remedy is now used in most households. And as in those happy days, the same longing steals over you to drop the daily grind and commune with nature. Do you still jump on the crowded trolley for a ride to the woods? If so, you are certainly lingering in the age of sulphur and molasses.

The adjunct to your spring tonic today is the motorcycle. It makes you absolutely independent of trains and cars—you can go where you wish and whenever you desire. It takes you close to nature and assists in building up your health as only outdoor life can. And this year, with an array of sturdy lightweight motorcycles being offered to the public, the motorcycle is more than ever making an appeal to all classes of people who want to rush at their will from the oppressing dim of the city and ride through the refreshing country.

What Some Men Want

The light motorcycle is filling a gap, which has heretofore kept a great many prospective riders from participating in the sport. It is just what is required by men who want a moderate priced machine, easy to handle and capable of traveling at a desirable speed.

Especially will those of us who have just passed through a rather severe winter appreciate the possibilities of the power two-wheeler. We realize that spring is the most attractive season of the year, and we are prone to tempt the wiley bass or trout, explore the woods or, perhaps, follow the little white ball around the grassy course. And right here is where the light motorcycle, so inexpensive to operate, enters in an important role. It will enable us to cope with time and distance in a way that we never have before.

Spring is now here—the ideal season to buy a motorcycle.

We certainly owe it to ourselves, after being cooped up all winter, to seek wholesome, exhilarating recreation. Health is our greatest asset, and the best tonic in the world is the fresh air—and that's ours for the taking.

Dealers Ready to Demonstrate

So get astride a lightweight and ride to the country! If you haven't one, you surely can get a demonstration at some live dealer's in your town. The chances are that after a demonstration of the light machine's ability, you'll experience a thrill of satisfaction at the ease of its operation and comfort.

Don't think that after you own a light motorcycle you're going to be lonely on the road. There'll be lots of good company. You may be interested to know that in Los Angeles, where the season opens shortly after February, many carloads of light machines have already been sold this year—over seventy-five per cent to *new* riders. And this same story is now being repeated in other sections of the country.

The reason why dealers are pushing the light machine is not hard to find. Offering these mounts at a price which brings them within the range of more pocketbooks is in many instances practically doubling their list of prospects. They are enabled to interest the host of men who want moderate speed and a motorcycle that can be handled with ease and pleasure. The dealer's investment in light motorcycles is smaller and he can carry time payments with less risk.

Taking Advantage of Spring Fever

So the majority of the wideawake dealers in every town stand ready to serve the light machine prospect. Most of them are taking advantage of the spring fever "germ" right now, and are interesting the lovers of outdoor life. The writer knows of a hustling agent who is taking his demonstrator out to a golf course near his city every Saturday afternoon and proving its "get there" powers to the putee wielders. They were shown that the light motorcycle will not only help them to enjoy the sport better, but will also make the trip to and from the course a part of their afternoon's recreation.

In closing it might be of interest to note that the development of the light machine is a tendency which has already been experienced in the bicycle and automobile industry. Though there will always be a demand for the heavier cars, it is certainly true that with the advent of the lighter type sales have increased by leaps and bounds. This fact, in the writer's opinion, seems to bespeak well of the future of the lightweight motorcycle, which is now being produced in quantities to fill a demand created by an almost entirely new field.

REACH OF PLUG A VITAL PERFORMANCE FACTOR

MANY cases of mysterious misfiring, especially at low speeds, are due to the faulty reach of a spark plug. I was called upon to fix up a rider's motor recently, and the trouble was caused by not having enough reach of the plug into his combustion chamber. He bought a new spark plug which looked all right to him, but on which the threaded barrel was about 1/16 of an inch shorter than the plug he had in use before. The motor ran all right at medium speeds, but "bucked" at low speed and at very high speed. The adjustments that the rider did not make to carbureter, magneto timing and valve setting are not worth mentioning. He finally got his motor to run at slow speed but not at high speed without kicking back, but it sucked a whole tankful of gasoline in 60 miles to do this. When I got there to look over the machine, I took out the plug and the trouble was found right away We had a hard time in getting that motor to run with all its pristine vigor again, even when we put a plug of proper reach in the aperture.

Quite a number of automobile spark plugs are to be seen on motorcycle motors these days, but while they are good when properly adjusted, they usually have too long a reach and too wide a gap between the points for general motorcycle work. The current used with automobile magneto plugs is more powerful than that developed by motorcycle magnetos, and the gap is often greater as a result. Hence, the user of an automobile plug has to regulate the gap to suit his current, say between 1/32 and 1/50 of an inch, so that he can start without "pedaling his head off."

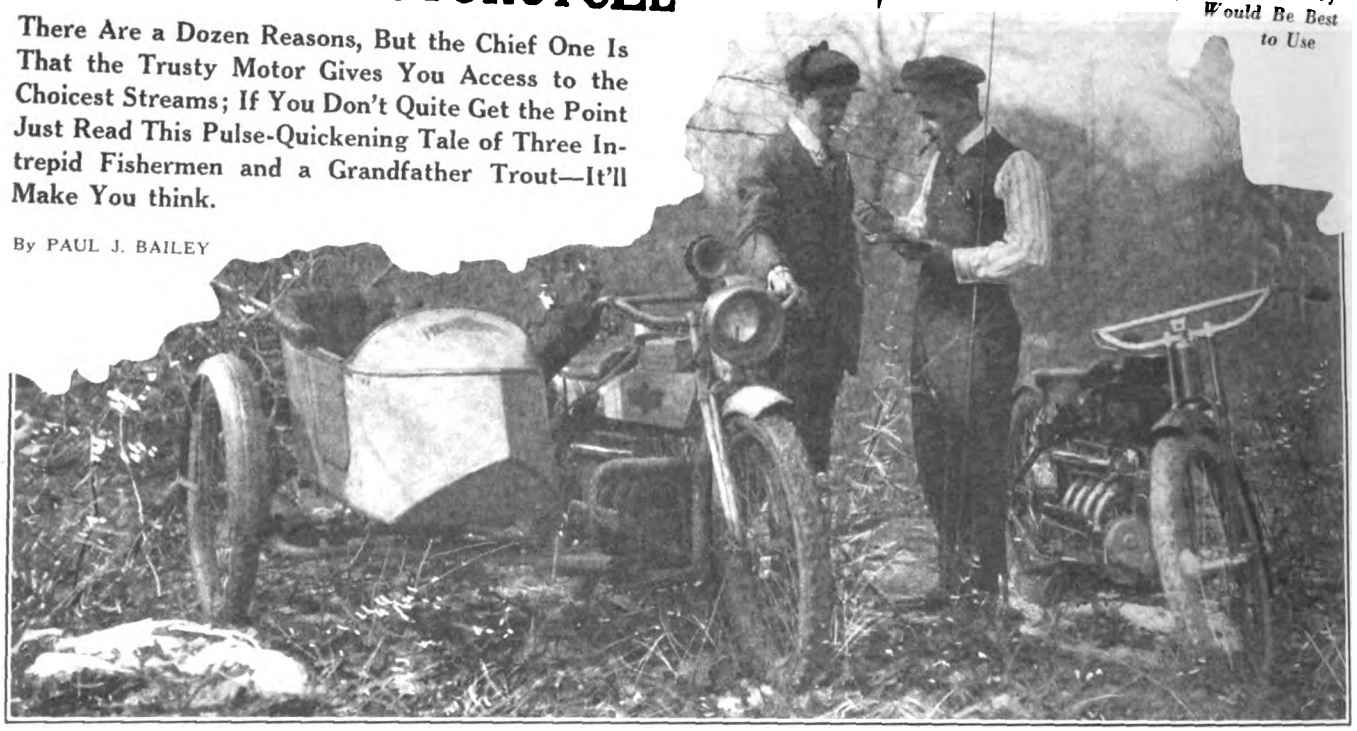
WHY THE SUCCESSFUL ANGLER NEEDS A MOTORCYCLE

There Are a Dozen Reasons, But the Chief One Is That the Trusty Motor Gives You Access to the Choicest Streams; If You Don't Quite Get the Point Just Read This Pulse-Quickening Tale of Three Intrepid Fishermen and a Grandfather Trout—It'll Make You think.

By PAUL J. BAILEY



There Was An Argument About Which Fly Would Be Best to Use

THAT balmy spring day settled the matter for Cy. He had been accumulating a sense of restlessness for a week, as the sun peeped coyly forth now and then with increasing warmth, while unmistakable signs on all sides had indicated that spring was close at hand.

Then this beautiful day had brought its warm, mellow sunshine, smiling blue sky, soft fragrant air, and the sense of awakening life that is the heritage of the season.

Facing the other two of us, Cy spake thusly:

"Fellows, I just can't wait any longer. I've got to go fishing or burst. After these long months of waiting, spring has come back again and now's our chance. Gee! I saw a real robin this morning."

"You interest me strangely; speak on," quoth Art, in whose eyes a bright gleam was growing.

"Well, you know that Big One I almost got last summer—I told you about it the other day. He must be in that same pool yet, and I'm going to land him or know the reason why. This warm weather will bring him out of his winter retirement, and he'll be hungry as a bear and full of fight—and say, he weighs at least——"

"Uh-huh, you've told us about that already," Art hastened to parry. "We believe you implicitly and won't doubt a word if you don't make him more than twice as big as he was when you last told it."

And after the heat of discussion had subsided, it had been definitely settled that we would ride out to the haunt of Cy's Big One to try our luck with rod and reel next day. I would take Cy and the equipment in my sidecar, while Art would ride solo on his machine.

OH, sure, with a motorcycle is the only way to go fishing, for with it you can get right to the place you want to reach, and not waste half the time on the way.

That night we made all ready for the start. Rods, reels, leaders, flies, spinners, wobblers, etc.—the fishing tackle that had been retired from service through the winter—were overhauled and made ready for the fray. The equipment was stowed in my sidecar. Tanks were filled with oil and gas, the machines looked over, and everything set for the start next morning.

"Darn it, I would have landed that Big One if I could have slept another minute," drowsily murmured Cy next morning as I stifled the alarm clock. "And I'll bet he's just as big as I was dreaming he was, too."

Fortified by a substantial breakfast, we mobilized for the start. Not *too* early, you know, for the spring was still so young that it was bitterly cold in the early morning hours before sunrise, but by 7:30 the warm beams of the sun had made the air soft and mild. It was an ideal day.

A push on the foot lever and the motor softly hummed its rythmic four-cylinder song. Art nodded his head to indicate "all ready" aboard his craft, and we were on our way.

Out of the city we rode and into the country, where the first signs of renewed life were welcoming the return of spring. Nature was just waking up, still drowsy after the long sleep of winter. The fresh shoots of grass pushing above the soil tinged the meadows with cheerful green. The buds were just bursting open on the trees, the air was soft and warm and balmy. The whole world seemed smiling.

It was a day to make a man glad to be alive and to feel under him the steady onward thrust of a powerful and obedient motor which carried him untiringly forward for mile after mile among the beauties that Nature was unfolding.

For twenty miles the good going continued, on smooth stone road. Then at Cy's direction we swung off onto a dirt side road. It was a little rough from being cut up during the recent spring rains, but with our up-to-the-minute spring forks and fine big saddles we minded it not at all.

Then there were a couple of miles of sand—nice, powdery soft stuff, with ruts a foot deep—where the sidecar had it on the solo machine a little, though Art jabbed

At a Detour, There Was an Argument as to Which Path Was the Best to Follow

Digitized by Google

The Slight Tang in the Air Made a Little Fire Very Welcome to the Fisherman

in the spurs and crowded his mount along regardless of sundry skids and wobbles in the sand tracks.

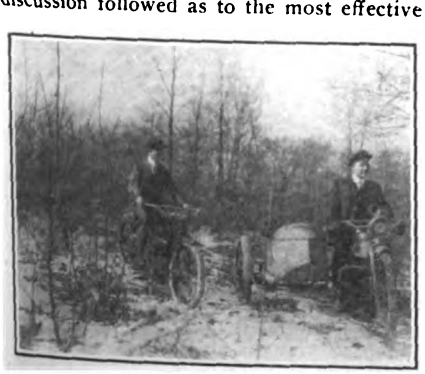
Next we turned up another side road which we followed for about seven miles. But, as frequently happens with these little-used roads, this one was good, though narrow. And it was mighty pretty. Woods on both sides most of the way, with quaint little farm houses nestling here and there, and occasional open fields where the farmers were busily getting in their work of preparation.

We passed a big grove of maples where the sap buckets, kettles and other paraphernalia held out promise of maple syrup and kindred sweets soon to be had.

Following Cy's pilotage, we turned down a lane, let down the bars and passed through a gate and followed a faint path through a grove. Then through a thicket of bushes at the far side we saw the gleam of water. The appointed spot was at hand.

The tackle was unlimbered, and a short discussion followed as to the most effective lures. Art affirmed that a rather small, dark fly was the variety on which to pin one's faith, while Cy contended that a big, bright-hued one with a tiny golden spinner ahead of it was the right idea for this season of the year.

"They're ravenous as wolves and out for blood now," he explained, "and the best "game-getter is the one they can see farthest. Later in the year, after they have grown more wary, your little brown hackle and gray moth will be the proper thing, but today—well, today I am going to get the Big One with a Silver Doctor."



When All Was Over We Hit the Home Trail Feeling Better and Stronger

Our Strategic Positions

Leaving the machines at this point we parted company and headed for the points of strategic advantage indicated by Cy. I took the eddy below the ripple, Art advanced on the pool by the big rock farther upstream, while Cy disappeared around the bend below, after announcing that he was ready for another duel with the Big One, which he had sighted there last summer.

We mobilized again at noon for lunch, and it was *some* feed. Printed on a bill of fare, that lunch wouldn't create any thrills, for it was composed entirely of plain, substantial food, but then——. There was the tang of the open air, the zest of the outdoors, the tingle of spring to give us appetites, and we wolfed that lunch with an eagerness that would have created a panic at our respective boarding houses.

We had had some luck in the morning's fishing, too, so that what might otherwise have been merely a lunch was made into a real fish dinner. Cy broiled them over the open fire, using a light frying pan he had brought along for the purpose, and the instantaneous way they disappeared after being served was a silent tribute to his skill. We loafed around the fire for a couple of hours after our feed, smoking and talking it over, then moved back to the stream again for another try with rod and reel.

Luck was good again, and we took a nice selection of finny trophies—though Cy didn't get that Big One, after all. He had landed two that were considerably better than ordinary size, but was still whipping the stream in a determined endeavor to get that Grandfather Fish when Art and I returned to the machines to start home after sundown. He had tried every lure in his collection in his efforts to attract the wily old veteran of the riffles, and was starting to repeat the process when we descended upon him and dragged him away by main force.

Turning on the gas from the Presto tanks, we rolled homeward down the bright path of light flung far ahead by our big lamps, and reached the city in good time.

YOUR MOTORCYCLE AS AN EVERY-DAY PAL

An Adjunct to Other Outdoor Pastimes the Two-Wheeler Is Practically Unlimited in Scope—Read a Veteran's Explanation of Why His Mount Is An Absolute Necessity

By GEORGE M. JOHNSON

DOUBTLESS the one thing most prominent in the mind of the person about to buy a motorcycle is the thought of the pleasure he will get from riding the machine. He hears sounding the seductive call of the road, and experiences in imagination the joy of answering the call. There is certainly a vast amount of pleasure to be derived from motorcycle riding, but the chap who limits himself merely to *riding* for the fun he gets out of his machine is missing much more than he gets.

My career as a motorcyclist started in eight seasons ago, and if anyone was ever hard bitten by the motorcycle bug it was I. The first year or two much of my riding was done for the fun of riding; I couldn't get enough of it, and was off burning up the road at every opporunity. But I gradually came to realize that the best chances for pleasure came when the motorcycle was used as an aid to some other sport. In the combination both were gainers; the fun of motorcycling still remained, but an added measure of satisfaction was realized by joining it with the other sport. And my first use of the motorcycle in this direction was for fishing trips.

Most everybody likes to fish, and very likely the reason why more men do not devote their leisure to this absorbing sport is because, in many parts of the country at least, good fishing is too hard a thing to locate. As a usual proposition you cannot find decent fishing anywhere close to dense centers of population; and if a lake or stream is easily reached by train or by trolley, it is soon fished to death.

It comes down about to this: to get good angling you've either got to travel a long distance, or you've got to travel by some means of conveyance not open to the general public; sometimes you've got to do both.

Suppose there is a fine trout stream some

Digitized by Google

If getting out of doors means anything to you this "Why" article is certain to make you see new possibilities in life and to suggest hitherto undreamed of opportunities for healthful sport and recreation.

twenty-five miles away, one that cannot be reached by rail. You and a friend go out there two or three times a season, possibly oftener. A hired rig would cost at least $5—probably more—five cents per mile for each person. A motorcycle with tandem attachment would do the work for less than one-half cent per mile per person, a net saving of $4.50 at the lowest possible estimate. Figure up on a few trips of that sort, and you'll find that the actual money saved would pretty nearly pay the upkeep cost of the motorcycle for the entire season.

There is still another point to consider. The twenty-five mile trip by rig would take between three and four hours, and there is nothing so tiresome, when a fellow is in a hurry to get fishing, as sitting in an uncomfortable carriage while old Dobbin leisurely plugs along; I know that from personal experience. The motorcycle will do the trip in an hour very easily, leaving just that much more time for fishing.

For Hunting as Well

What has been suggested so far with respect to fishing applies equally to the related sport of hunting. For the latter, a sidecar is a great advantage, as you can carry a bird dog along, and another hunter as well, if desired. What I am trying to emphasize is twofold. First, the motorcyclist should realize that he is blessed with unequaled opportunities for hunting and fishing trips; if he is not a sportsman he ought to be. Second, to the confirmed out-of-doors man of moderate income a motorcycle is a necessity—a necessity, that is, if he wishes to follow up his hobby to the best advantage.

The speed of the motorcycle makes it possible for the man who has to go early to work to get in an hour or two of sport in spite of the fact. Suppose he yearns to do a little fishing, but has no chance to take a day or half day off. He can retire early, after setting the alarm clock, leave home at 4 a. m., and be busy with his tackle half an hour later. Two hours of fishing ought to be enough, leaving our rider time to get home by seven or before; and he will be all the more efficient at his day's work for the little breath of outdoors.

Out After Ducks

There is a pond half a dozen miles from my home where ducks often light over night in the fall. Many a time I've ridden out there, had a crack at the fowl—almost always getting something out of it—and have been home in time to eat breakfast with the family. And little side trips of this sort are possible practically for everybody. You don't have to wait for the scattered holidays. Instead of grumbling over the little time he has for sports, a man would do well to wake up to the fact that a motorcycle will let him take full advantage of what opportunities come his way.

In late spring and summer the very best time of the day is the hour or two after sunrise—the time most people are buried in the hay when they ought to be outside *living*. Even if a chap doesn't care to take a fishing or hunting trip before starting for the job, it will do him a world of good to get out early enough to turn off twenty miles or so; that is better than any tonic that ever came out of a drug store.

But hunting and fishing by no means exhaust the field of the motorcycle; there are many other ways in which it can serve its owner. You have no doubt seen a front yard tastefully decorated with growing ferns, small evergreen trees, and so on. Perhaps this is true of a neighbor's yard, and if so, he probably paid a greenhouse or nursery man a fair amount of good money for the plants. There are plenty of

such things growing in Nature's nursery, off somewhere away from the city. Did it ever occur to you to use your motorcycle as a means of securing some of them as beautifiers of your own yard? Not only will you save quite a bit of money, but you have the fun of getting off into the woods.

Every year at the holiday season my machine is called into service for collecting a huge mass of laurel and other green stuff for the Christmas season. For instance, I went out last year in about a foot of snow and had a grand time up in the hills. Owning a sidecar made driving easier for me, and also simplified the packing away of my booty, but the sidecar is by no means a necessity for this. Any self-respecting rider can plug snow, and the amount of junk that can be packed on a luggage carrier is indeed surprising.

Gathering Floral Offerings

In my town, along in June, you will see lots of boys on the streets with water lilies for sale. There are to my mind few flowers more beautiful than the pond lily, with its waxy white petals and heart of rich yellow, while the fragrance is something to rave over. But why buy a paltry dozen or half dozen of the flowers? I pull on my fishing waders, sling a covered market basket over my shoulders, and plug off to any one of several ponds on the outskirts of the city.

While I'm about it, I get a good number of the lilies—eight or ten dozen—and that means all we can possibly use at home with enough left over to make several of my friends happy as well.

Fall the Ideal Time

Fall, when the leaves are turning and the air is so crisp and delightful, is the ideal time of the year for the motorcyclist. And this season why don't you make it a point to collect a supply of nuts for winter. Towards the end of summer keep your eyes peeled for nut trees; do a little exploring in the woods, if necessary, not keeping too close to town. Then when the first good frost comes, with a couple of stout bags in your pocket, you can head straight for the place you've spotted.

Here is a first class hunch that is far afield from sport, though it is worth while. You can buy vegetables of all kinds from the market gardeners and truck farmers outside a city at a big discount over the city prices; and, fully as important, you *know* they're *fresh*. The same is true of poultry. You may, to your sorrow, be familiar with the embalmed, left-over-from-last-year taste that is too often associated with cold-storage chickens bought in the average city market. But a motorcyclist can always have the real country style fried chicken for his Sunday dinner, and get it cheaper than the doubtful article. Stop at some farmhouse and make a dicker with the farmer for a supply of various provisions. Have the pleasure of your after-supper spin and at the same time get back the few cents spent for gasoline with a big interest added.

Proving Its Usefulness

Now, as a sort of conclusion, let me suggest *some* of the ways my machine—machines rather, for there have been several of them—have proved their worth. Lack of space forbids more than a mere statement. I have obtained messes of delicious mushrooms by the score in wood and meadow, and my mushroom excursions are always by motorcycle. Don't gather mushrooms unless you know what you are about, or are with someone who knows; experimenting is dangerous.

I have driven the bus to the shore on hunts for the timorous long clam and succulent round clam, not to omit crabs. Once I came back with two live lobsters in the pocket of my hunting coat; they were sold at a ridiculously low price by the fisherman who had caught them. I have ridden a dozen miles in one direction after a supply of live bait, meeting friends by agreement way off in the opposite direction.

Tennis claims much of my attention in the summer, and it is always the two-wheeler that carries me out to the club

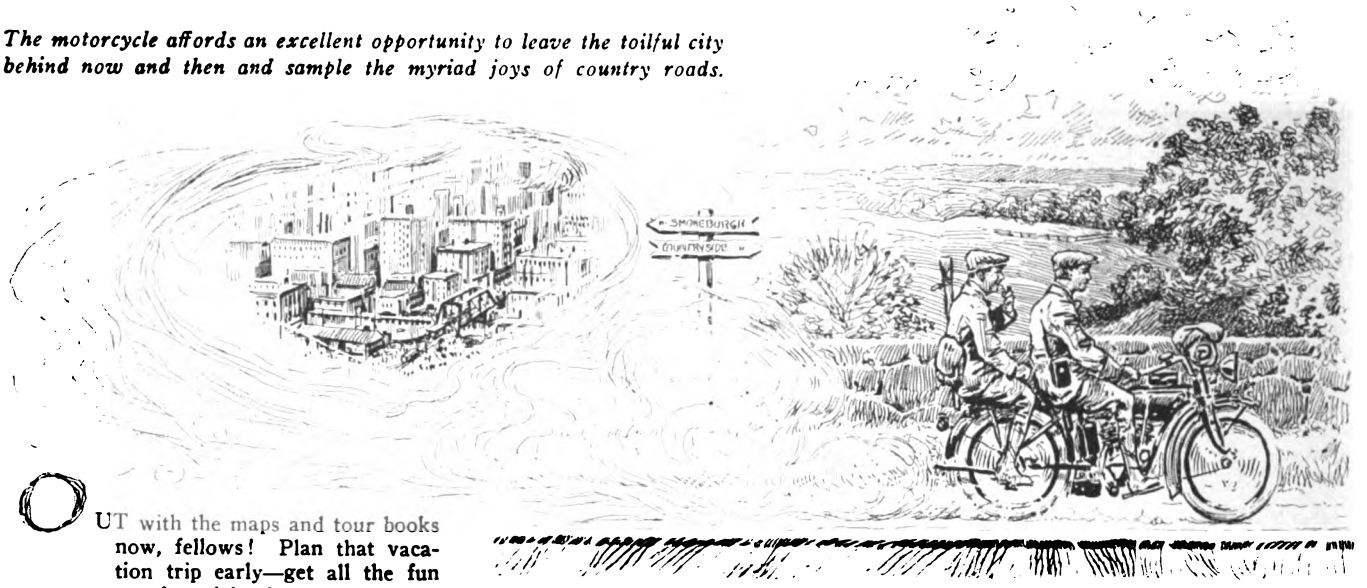
HOW TO TAKE THAT VACATION RAMBLE

Now's the Time to Do Your Planning to Insure a Happy Trip This Summer—Some Important Facts to Be Considered in Connection With That Joyfest, as Shown by a Veteran's Experience

By GOSLIN

The motorcycle affords an excellent opportunity to leave the toilful city behind now and then and sample the myriad joys of country roads.



OUT with the maps and tour books now, fellows! Plan that vacation trip early—get all the fun you can out of anticipating your merry, carefree ramble. Of course, you're going to have a corking fine time in that loafing fest—but do something more than dream about it, *act*.

Summer is only just around the turn and you'll be right in the midst of it before long. So get all the necessary "dope" while the getting is good. Find out where you are going; how far you will travel each day and where you will stop each night. And then when you start the old boat going on that blissful hour which marks the *real* beginning of your vacation, you'll be absolutely certain of having the happiest trip of your life. Sure it doesn't pay to go off half cocked!

All the "*Info*" Desired—Free

So right now is the time to get a map or tour book of the country you intend to explore. And—we'll just whisper this—one of the large tire companies issues sets of dandy road-guides, free for the asking, which can be had through the chief "ed" of our favorite cycling journal. We've only whispered—but we know darn well everybody has heard.

Now these books cover the glorious United States of ours just like a blanket. They contain about everything that you want to know. Hence, come early to avoid the rush—line forms to the left!

And, say, when you do open those maps or books, please do not, for the love of Mike or your best girl, think that you've got to cover all the land that lies betwixt the Atlantic and Pacific oceans. The week or two that will constitute your vacation is for *pleasure*. You're going on that little trip for the fun, recreation and health you can derive from it. Mr. E. G. Baker, that distinguished citizen of Indianapolis, Ind., has a mortgage on the gentle pastime of transcontinental record breaking. And you don't want to peeve that *hombre* so much, for he might be inclined to trundle out his Powerplus and send those cross-country figures soaring out of sight for keeps.

Get All the Fun You Can

You'll get little or no pleasure out of a wild ride that means a big daily mileage at top speed, in order to cover the route you have planned. In the first place you will see very little of the country that you are passing through, for forty per means that you will keep your eyes glued on the road ahead and not venture any side glances at all. And in the second place you will return from your trip feeling that you've had more than enough of motorcycling, for you'll be tired and worn out. And last—but certainly not least—you may have the extreme pleasure of telling "His Honor" a sad tale and contributing to the town treasury.

As Billy Shakespeare said, or should have said: "Safety First"—that's us. Arrange your trip to cover 150 to 175 miles a day at an 18 to 20 miles per hour speed. That pace will afford you lots of time to see things, stop and admire beautiful views and snap photos, here and there, to be handed down to your grandchildren. The daily schedule outlined will enable you to travel over some 1,000 miles a week, which is plenty.

Before we drop the day's running, it might be well to call attention to the fact that to allow one-day "lay-over" out of every seven is a splendid arrangement. The weather man down at Washington has it all "doped" out that during the summer rainstorms break about every seventh day—whether the states be "dry" or "wet."

It is all very well to get caught out in the rain when you can ride home and change into dry duds. But who is the duck that wants to ride all day in the rain and put up at some hotel where there is no chance to dry out before the next day?

It's a Long Way Back

Don't forget that the distance back is just as far as it was out, though it may seem longer if you stray too far afield. Beware that you don't have to resort to forced marches for fear of not being able to punch the clock on time Monday morning.

Now as regards the luggage you ought to carry. That's not an easy nut to crack. For instance, last summer the writer rode as a sidecar passenger on a 1,500-mile trip with never a sign of a puncture and again on another ride of 500 miles the Tire Gods were with us, while on that very same trip a friend wrecked two shoes completely. A lad's got to undertake a ramble prepared for such little incidents.

Unnecessary Drapery

One thing is certain though. The rider who drapes a casing over his handle-bars or hangs it from the back of

Digitized by Google

a sidecar has an eye for the picturesque and is inclined to play to the gallery in the towns he passes through. The chance to buy tires in most any town nowadays gives one an opportunity to keep from encumbering the motorcycle with one from home, and that goes for the majority of trips that may be made in the United States.

If you strap an inside blow-out patch and a lace-on boot to the bars or toss it under the sidecar seat, you will, with the aid of a spare tube and patches, be able to limp into the nearest town, unless your misfortune comes under the head of extraordinary tire trouble. Then we kindly draw the veil.

A roll of electrician's tape and a spool of soft galvanized wire, in addition to the regular tool equipment, is not much extra and they may earn their passage before the home lights appear on the horizon again.

Strap an oil-skin slicker or rain shirt to the luggage-carrier and you are ready for anything that may happen in the summer.

Do You Want to Doll Up?

Of course, you may want to doll up at night in each town you stop in. If so, you will want a suitcase on board to carry your society duds. On a recent run down the state the writer found that a limp old Gladstone bag, lashed down on the carrier, held enough clothes for his needs and the outfit never shifted an inch during the 300-mile journey.

With a suitcase—well, that's something else. For no matter how securely you strap one of these articles down, it will slip its moorings and do a can-can on the carrier, demonstrating to you that leather is much softer than steel by chafing a hole into your nice new suitcase, and then revealing the contents to the gaze of all who pass. Then, too, no matter how well you wrap the case in oil-cloth, the dust will sift in, smutting your clean linen and making it unfit to wear.

The best way to carry clean linen is to resort to Uncle Sam and his well-known parcels post. You can arrange with those at home to send a bundle on ahead, then when you arrive in town there is your clean collar, shirt and pants. And you can mail your soiled clothes back the same way, permitting you to be free of the shifty suitcase, its trials and tribulations.

When the Missus Goes Along

This all is true of the solo rider, but when we are talking of a sidecar with the missus aboard, then—that's something else again. Then you will need a young trunk to tote the feminine finery along, and the best place to carry it is on a trunk-rack, hung from the bottom of the sidecar or bolted to the chassis.

Now for the cost of the trip. The writer never made a trip yet, either solo or sidecar, on which the daily expense did not foot up to $4 per day for each person. That does not mean that Waldorf-Astorias were patronized along the way either. On the other hand, a local lad toured through Maryland and Virginia at the rate of $2.75 per day and said that he did not stop at Mills' hotels.

One thing is certain, you can get a good room in a hotel for a dollar a night, with bath maybe a half dollar more; and, believe us, that latter item is sure great to iron the kinks of the day's ride out of one's system.

You can figure meals to average 40 cents apiece, so that the eats will amount to $1.20 for one, each day, which brings the two items up to $2.70. Now for the machine. Its appetite for gas and oil will, at the rate of 2 gallons of gas and a quart of oil a day, plus the usual storage price of a quarter, be about a dollar more, bringing the total cost each day up to $3.70 for a solo rider and about $5.50 for a sidecar outfit with two up.

Sure! Carry a Bottle

One way to keep the high cost of traveling down is to carry a Thermos bottle or Steero solid alcohol stove along, buying canned goods and other articles in grocery stores en route and preparing meals out in the country, à la camping.

Well, those are a few of the ways to go about preparing for a vacation ramble, a tour which, if made in a leisurely manner, will put "Wim, Wigor and Witality" into your frame, and bring you back with new ideas and an energy that will surprise the boss into giving you a raise.

May we meet on the road this July.

THE THRILL OF COMRADESHIP WITH YOUR MOTOR

A Veteran Roadster Undertakes to Tell Why the Relationship Between Motorcycle and Rider Is Something That Cannot Be Duplicated With Any Other Vehicle

By WILBUR K. TOMPKINS

"I DON'T know what there is about that 'old boat' of mine that makes me so gosh-blamed fond of it, but when the time comes to turn 'er in for a new model I'm going to feel like a guy that's just been to a funeral. I know I am. That old bus and I have been through a whole lot together and if it didn't make me sound like a nut I'd be willing to say that I love every inch of 'er."

Ever hear a sensible, red-blooded chap pass out that line of talk while he patted the saddle of his mount, or gave affectionate little twists and tugs to this, that and the other thing about the machine? If you've followed the motorcycle game at all closely, you've heard it more than once, but it's a pretty safe bet that you've never stopped to get at the bottom of the thing. Still the idea is a mighty interesting and significant one.

I once heard a high-brow (I know I have him gaited right, because he wore tortoise-rimmed spectacles), remark that one of the finest things about the motorcycle was the affinity between machine and rider. After digging the inside stuff about that affinity business out of Webster's Unabridged, I agree with him—I mean the high-brow. What he meant to say was that motorcycle and rider are so closely in tune, so much a unit, as they go humming along through the country, that there seems to be a sort of friendly understanding between man and metal.

A Mighty Pleasant Feeling

It's only a feeling, of course, but it's a pleasant feeling—and it goes a long way towards explaining why a genuine motorcycle enthusiast is just about the most enthusiastic enthuser you can find.

The idea is lost to the automobilist. He's not close enough to his motor. They're not friends—only chance acquaintances. The driver's relation to his machine is an impersonal one.

But a motorcyclist has that wonderful purring little motor down between his knees, and he knows every whim and caprice of it. He is never allowed to forget that he is the master of his vehicle. He is impressed at all times with the fact that his motor depends as much upon him as he does upon it. The pressure of a finger on a control lever, or the twist of a wrist, and the motor answers him as if it were a part of his own nervous system. To think, with him, is to have his mount almost reflect the thought.

So it's not hard to understand the affinity (thanks, Mr. High-Brow) between motorcycle and rider.

No One Else May Touch It

Some seasoned roadsters won't permit a repairman to lay a hand on their mounts. "They know what the old bus needs," you'll hear them remark, "and there's no call for strangers to butt in." And when a rider gets to that point you can wager that he's getting $500 worth of fun and satisfaction for every dollar he invested in that motorcycle. He knows his motor, and, in a manner of speaking, his motor knows him.

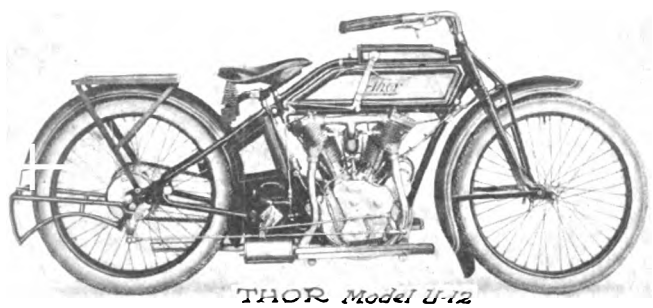
HARLEY-DAVIDSON

Made by Harley-Davidson Motor Company, Milwaukee, Wis. Model shown is 16-J, 11 horsepower twin; bore 3 5-16 inches; stroke 3½ inches; inlet over exhaust valves; Schebler carbureter; generator for ignition, signalling and lighting; mechanical oiler with auxiliary hand pump; dry disc clutch; countershaft three-speed gear; double chain drive; expanding band brake; step-starter; wire and rod grip control; Troxel saddle; 28 x 3-inch U. S. Goodyear or Firestone tires; 22 pints of gasoline; 8 pints of oil; 59½-inch wheelbase; 356 pounds; standard gear ratios—4.1, 6.15 and 9.22; gray finish. Price, $295. Lighting equipment—7 volts headlight with 12 and 7 c. p. bulbs, 2 c. p. tail lamp; electric warning signal. Option of pedal starter in place or rear starter.

Other models: 16-F, 11 horsepower twin; Bosch magneto ignition; three-speed gear; 334 pounds; price, $265. Model 16-E, 11 horsepower twin, single-geared; Bosch magneto; 326 pounds; price, $240. Model 16-C, 6 horsepower single cylinder; three-speed gear; Bosch magneto; 309 pounds; Price $230. Model 16-B, 6 horsepower single cylinder, single-geared; Bosch magneto; clutch in hub; 301 pounds; price, $200.

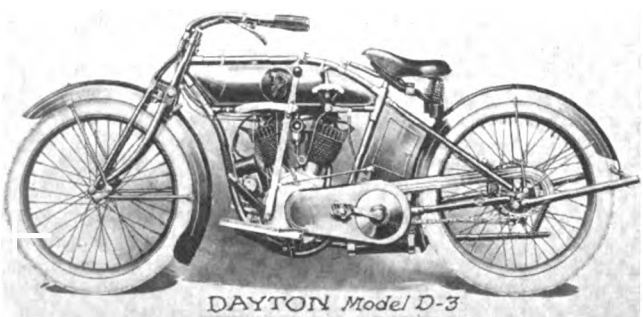


THOR *Model U-12*

THOR

Made by Aurora Automatic Machinery Company, Chicago, Ill.—Model shown is U-12, a 12 horsepower twin; bore 3¼ inches; stroke 3.6 inches; inlet over exhaust valves; Bosch magneto; mechanical oiler with auxiliary hand pump; Schebler carbureter; dry disc clutch; three-speed countershaft gear; double chain drive; Thor brakes; countershaft kick-starter; wire grip control; Troxel saddle; 28x3-inch tires; 2 gallons of gasoline; 3 quarts of oil; 58-inch wheelbase; price $265; blue finish.

Other models: V-6, a 6 horsepower twin; bore 2¼ inches; stroke, 3¼ inches; same valve arrangement and gear set; 55-inch wheelbase; 28 x 2¾-inch tires; price $225.



DAYTON *Model D-3*

DAYTON

Made by Davis Sewing Machine Company, Dayton, O. Model shown is D-3, 8 horsepower twin; bore 3 5-16 inches; stroke 3½ inches; inlet over exhaust valves; Dixie magneto; mechanical oiler with auxiliary hand pump; Schebler carbureter; dry disc clutch; countershaft three-speed gear; double chain drive; double brakes; foot starter on countershaft; wire grip control; Troxel saddle; 28x3-inch U. S. or Goodyear tires; 2½ gallons of gasoline; 2 quarts of oil; 60-inch wheelbase; standard gear ratios—4¼, 6.36 and 9.28; price $265; Dayton carmine finish.

Other models: D-1, same motor as above, but single-geared; price $240; D-2, same as D-1 but with countershaft two-speed gear; price $250; D-4, same as D-3, but with Splitdorf mag-generator and electric lighting outfit; price $305. D-5, 9 horsepower twin; bore 3½ inches; stroke 3.67 inches; inlet over exhaust valves; single-geared; price $240. D-6, same as D-5 but with two-speed gear; price $250. D-7, same as D-5 but with three-speed gear; price $265. D-5 to D-7 with Bosch magneto. D-8 same as D-7, but with Splitdorf mag-generator and electric lighting; price $305.

FLYING MERKEL *Model 675*

Digitized by Google

1916 Models in Review

Dayton Motor Bicycle; 1½ horsepower single cylinder; bore 2⅜ inches; stroke 2¼ inches; inlet over exhaust; mounted in front wheel; Elkhart magneto; gear drive to front wheel; 24x2-inch front tire; 43-inch wheelbase; 115 pounds; price $95; Dayton carmine finish.

FLYING MERKEL

Made by Miami Cycle & Manufacturing Company, Middletown, O.—Model 675 is shown. This is a 9-horsepower twin; bore 3¼ inches; stroke 3 43-64 inches; inlet over exhaust valves; Dixie magneto; drip-feed oiling with auxiliary hand pump; Schebler carbureter; Eclipse clutch; countershaft two-speed gear of planetary type; double chain drive; Miami dual brake; direct-acting pedal starter and pedal gear; wire type grip control; Troxel saddle; 28 x 3-inch Firestone or Goodyear tires; 2¼ gallons of gasoline; 4 pints of oil; Merkel spring frame; 285 pounds; standard gear ratios—4 and 7; price $275. Flying Merkel orange finish.

Other models—673, twin; two-speed; 275 pounds; price $265. 671, twin, single-geared; 250 pounds; price $240. Model 643, 5½ horsepower single-cylinder; two-speed gear on countershaft; 230 pounds; price $240. Model 641, 5½ horsepower, single cylinder, single-geared; 225 pounds; price $215.

Miami Power Bicycle, Model 15: 2½ horsepower; single cylinder; bore 2½ inches; stroke 2 15-16 inches; side-by-side valves; National magneto; semi-automatic oiling; Miami carbureter idler with operating lever; flat belt drive; Musselman coaster brake; pedal starting; handlebar control; Troxel motor bike saddle; 28x2-inch tires; 1⅛ gallons of gasoline; 2 pints of oil; 50-inch wheelbase; 119 pounds; standard gear ratio, 7.1; price $115; blue finish.

HENDERSON

Made by Henderson Motorcycle Company, Detroit, Mich. Model shown is F-2, 12 horsepower four-cylinder; bore 2½ inches; stroke 3 inches; inlet over exhaust valves; Berling magneto; mechanical oiler with auxiliary hand pump; Schebler carbureter; Eclipse clutch; Henderson two-speed in rear hub; bevel gear to countershaft and final chain drive; external band brake; Henderson kick-starter; wire grip control; Henderson-Persons special; 28x3-inch U. S. tires; 2½ gallons of gasoline; 3 quarts of oil; 58-inch wheelbase; 310 pounds; standard gear ratios—4¼ and 7.1; price $325; royal blue finish.

Other models: F, four cylinder, single-gear; 295 pounds; price $295; electric equipment, Rex generator and battery, etc, on both models, $45 extra.

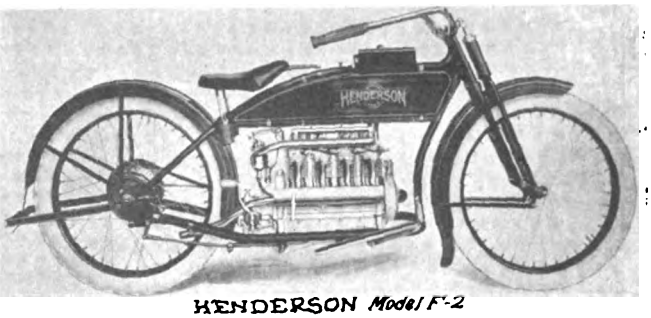
INDIAN

Made by Hendee Manufacturing Company, Springfield, Mass. Model F is shown. Powerplus twin motor; 7 horsepower normal rating; bore 3⅛ inches; stroke 3 31-32 inches; side-by-side valves; Dixie magneto; mechanical oil pump with auxiliary hand pump; Schebler carbureter; countershaft three-speed gear; dry plate clutch; double chain drive; double brakes; countershaft kick-starter; Indian grip control; Troxel saddle; Goodyear 28x3-inch tires; 2 gallons of gasoline; 2 quarts of oil; Indian cradle spring frame; 55-inch wheelbase; 310 pounds; standard gear ratios—4, 6 and 10; price $275; Indian red color.

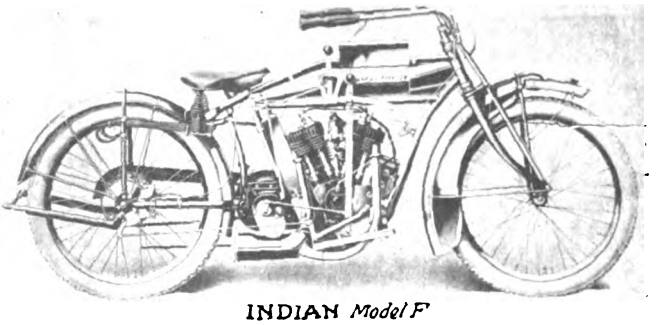
Other models: Model G, Powerplus twin motor with Indian rigid frame; three-speed gear; 290 pounds; price $250. Model K, Featherweight, two-stroke motor; bore 2½ inches; stroke 2¼ inches; 26x2¼-inch Goodyear tires; 46¾-inch wheelbase; 150 pounds; price $150. Model H, overhead valve racing motors, single and twin cylinders—30½ and 61 cubic inches displacement; 53-inch wheelbase; 175 pounds single; 200 pounds twin; price, single, $300; twin, $350.

POPE

Made by Westfield Manufacturing Company, Westfield, Mass. Model shown is T-16, 13 horsepower twin; bore 3 21-64



HENDERSON *Model F-2*



INDIAN *Model F*

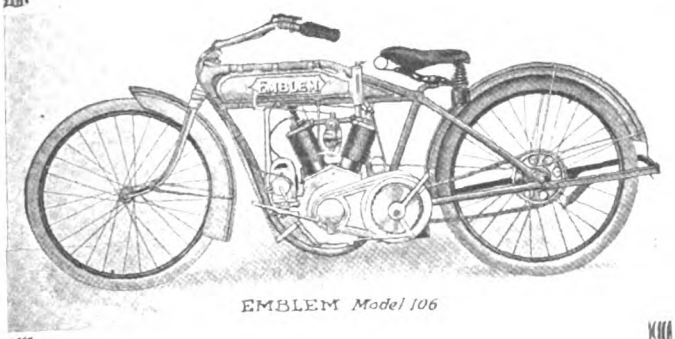
EXCELSIOR Model 17-3E



EMBLEM Model 106

CLEVELAND Model 1 A

inches; stroke 3½ inches; overhead valves; Dixie magneto; mechanical oiler with auxiliary hand pump; Schebler carbureter; Eclipse clutch; countershaft three-speed gear; double chain drive; band brake with dual control; Pope sector foot starter; wire grip control; special saddle; 28x3-inch U. S. tires; 3 gallons of gasoline; 2 quarts of oil; Pope patented rear spring suspension; standard gear ratios—3.6, 5.5 and 8.5; 58½-inch wheelbase; 335 pounds; price $275; Pope gray finish with red lettering.

Other models: L-16, same motor as T-16, but single-geared; 56½-inch wheelbase; 275 pounds; price $225. Model M-16, 8 horsepower single cylinder; single-geared; 250 pounds; price $200. Model TM-16, same motor as Model M-16, but with three-speed gear; 58½-inch wheelbase; 300 pounds; price $240. Model H-16, 4 horsepower single cylinder, single-geared; inlet over exhaust; V-belt drive; 175 pounds; price $150. Model S-16, twin motor, same as T-16; short-coupled frame for speed work; price $260.

SCHICKEL

Made by Schickel Motor Company, Stamford, Conn. Big Six model is shown. This has a 6 horsepower valveless, two-stroke motor of three-port type; bore 3⅜ inches; stroke 4 inches; high tension magneto enclosed in crankcase compartment; induction oiling (fuel and oil mixed); double jet carbureter; Eclipse clutch; double chain drive; double-controlled coaster type; pedal gear; handle bar and twisting grip control; Troxel saddle; 28x2¼-inch Goodyear tires; gasoline capacity 3 gallons; 235 pounds; price $210.

Other models: Big Six with flat belt drive; 29x2¼-inch tires; price $200. Lightweight, valveless two-stroke, single cylinder motor; bore 2½ inches; stroke 2½ inches; Berling magneto; induction oiling; Heitger carbureter; V-belt drive; belt-rim brake; Bowden wire control to handlebar; Mesinger saddle; 28x1⅝-inch Vitalic tires; 52-inch wheelbase; 95 pounds; price $109.

IVER JOHNSON

Made by Iver Johnson's Arms & Tool Company, Fitchburg, Mass.

Model shown is 16-7T.S., a 7-8 horsepower twin; bore 3¼ inches, stroke, 3¾ inches; side-by-side valves; Bosch magneto; mechanical oiler with auxiliary hand pump; Schebler carbureter; Iver Johnson planetary clutch; Eclipse two-speed in hub; undergear with final chain drive; coaster band brake; direct kick-starter: lever and rod grip control; Troxel saddle; 28x3-inch U. S., Goodyear or Goodrich tires; 2½ gallons of gasoline; 2 quarts of oil; 58-inch wheelbase; 260 pounds; standard gear ratios—3¾ and 6½; price $250; gray finish.

Other models: 16-7, same as 16-7-T S, except single-geared; price $225. 16-4-C T. S., 4½ horsepower single-cylinder; bore, 3¼ inches; stroke 4¼ inches; Iver Johnson two-speed on undergear; 220 pounds; price $200. 16-4C, same as 16-4C T. S., but single-geared; price $175. 16-4B, 4 horsepower single-cylinder; single geared; V-belt drive; 215 pounds; price $150.

EXCELSIOR

Made by Excelsior Motor Manufacturing & Supply Company, Chicago, Ill. Model shown is 17-3E; Ultra Power twin (rated at 15 horsepower); bore 3 21-64 inches; stroke 3½ inches; inlet over exhaust valves; MIDCO generator with electric lighting, ignition and signalling outfit; mechanical oiler with auxiliary hand pump; Schebler carbureter; dry plate clutch; countershaft three-speed gear; double chain drive; double brakes; countershaft kick-starter with automatic compression control; rod and lever grip control; Mesinger saddle; 28x3-inch Firestone, Fisk, Goodyear, Goodrich or U. S. tires; 2¼ gallons of gasoline; 4 quarts of oil; 59-inch wheelbase; 340 pounds; price $295; electric equipment is two-bulb headlight, tail-light, electric horn, and storage battery.

Other models are: 17-3, same as 17-3E except with high-tension magneto in place of generator; price $265; 17-S. C., short coupled model for speed work; 56-inch wheelbase, price $265; motor similar to 17-S. C., fitted on 17-3 or 17-3E models for $25 extra. Finish is Excelsior gray with red panels.

Excelsior lightweight, 2¼ horsepower, two-stroke, single cylinder; bore 2 17-64 inches; stroke 2¾ inches; 26x2¼-inch Firestone tires; 51-inch wheelbase; 135 pounds; price $135.

EMBLEM

Made by Emblem Manufacturing Company, Angola, N. Y. Model 106 is shown. This has twin motor rated at 7 horsepower; bore 2⅝ inches; stroke 3 inches; inlet over exhaust valves; Berling magneto; pump lubrication; Emblem carbureter; Eclipse clutch; double chain drive; band brake; Emblem kick starter; wire grip control; Mesinger or Troxel saddle; 26x2¼-inch tires; 1½ gallons of gasoline; 1 quart of oil; 52-inch wheelbase; gear ratio, 5:1; price $175; Emblem blue color; Eclipse two-speed hub extra.

Other models are: Model 110, 14 horsepower twin; bore 3½ inches; stroke 4 inches; Schebler carbureter; 28x3-inch Goodyear, Firestone or Empire tires; 58-inch wheelbase; 290 pounds; price $250. Model 108, 12 horsepower twin; bore 3⅜ inches; stroke 3¾ inches; price $225. Model 105, 7 horsepower single cylinder; bore 3½ inches; stroke 4 inches; Herz magneto; 58-inch wheelbase; price $175.

CLEVELAND

Made by Cleveland Motorcycle Manufacturing Company, Cleveland, O. Model 1-A is shown; 2½ horsepower, two-stroke, single-cylinder motor; bore 2½ inches; stroke, 2¾ inches; Bosch magneto; induction lubrication; Brown & Barlow carbureter; multiple disc clutch; sliding dog change gear in unit power plant; worm drive to countershaft and final chain drive; band brake; handlebar control; Troxel saddle; 26x2¼-inch tires; 1½ gallons of gasoline; 53-inch wheelbase; 150 pounds; standard gear ratios—5.9 and 9.5; price $150; black finish.

Also Model 1-B, with same motor and unit power plant but without clutch; 145 pounds; price $140.

DEALER'S LOYALTY IS A BIG TRADE ASSET

It Increases Sales and Swells Profits For Both Manufacturer and Agent As Well As Making Customers Firm Adherents of Both—The Value of Co-operation

By GEORGE E. ATKINS
Sales Manager, The Reading Standard Company, Inc.

CLOSELY associated with honesty, confidence and enthusiasm is a fourth quality—loyalty—a higher product which develops when men associate together in groups. One of the chief requisites of a successful dealer is that he be loyal to both the manufacturer and the customer. The latter places his confidence in the dealer and expects that he give the customer the same attention and service as if the customer was able to deal directly with the factory. Loyalty means, literally, faithfulness to the employer and also could be defined as co-operation, but in reality it is something more than this.

A dealer who is loyal and has a right conception of the meaning of co-operation will do nothing that is not to the best interests of the manufacturer. He feels that, in a sense, he is a partner of the manufacturer. He transacts business with customers with no direct supervision, yet he performs acts upon which his and the manufacturer's profit depends. He must feel that he owes the manufacturer the same sort of co-operation taht one partner would expect from the other.

A Case in Point

One of the most successful and prosperous concerns in the country today was compelled, early in its career, to ask its salesmen to go without compensation for a period of nearly four months. In other words, it asked them to stay on the firing line, selling goods and try to save the company from financial ruin, yet support themselves without the company's aid. Eighty per cent. of the men stuck to their posts and put up a harder fight for business than ever. That was an example of loyalty at its best. Loyalty begets loyalty, and the salesman who is loyal to the manufacturer and to his customers will find them loyal to him in return.

The successful manufacturer of the present day has overlooked nothing in trying to make his dealer loyal to him. His main object is to instill confidence and enthusiasm into the dealer, and when the latter is assured of the good will of the manufacturer, he should take advantage of the opportunity thus offered. The dealer, in his turn, should have confidence in himself, in the manufacturer and in the articles he sells. Before a sale can be made the prospect must be imbued with confidence in the salesman, the firm and the goods themselves, and to inspire this confidence the dealer must possess it himself. The dealer's success will be in direct proportion to his estimate of his own ability, his belief in the firm he represents and his faith in the goods.

What Confidence Is

Confidence goes beyond belief in the quality of the goods only. It includes, as far as the dealer is concerned, belief in the character and ideals of the manufacturer and the latter's desire to deal honestly with everyone. Such confidence promotes satisfaction and contentment and adds dignity to the dealer's work. The dealer must also realize that the manufacturer and his associates are the men who put out his product and put their money, efforts and reputation behind it. And these beliefs go a long way toward making the dealer loyal.

Enthusiasm is confidence in action. Enthusiasm needs only direction to turn it to success. It is the life of successful business, for the dealer who has it talks as if he means what he says because he *does* mean it, and the result is that he is working hard for the love of the game. Enthusiasm is the force which grips the customer; which impresses him with the dealer's sincerity; which makes him forget things which might prevent him from purchasing, and which carries the customer past all obstacles to the closing of a sale.

Enthusiasm is the quality more than all others which makes a salesman oblivious to difficulties; which makes him optimistic and forceful; turns apparent defeat into success, and makes the dealer the great factor he is in the distribution of goods throughout the world. Enthusiasm creates a bond of sympathy between the dealer and the prospect, and when the latter becomes a customer tends to make him loyal to both dealer and manufacturer.

The word co-operation embodies one of the largest ideas in salesmanship. It should be looked upon by the dealer in a broader aspect, for co-operation is the order of the day. The manufacturer co-operates with the dealer and with the customer, and, surely, he is justified in looking for their co-operation in turn. The dealer, again, being the go-between for the customer and the manufacturer, must co-operate with both. Co-operation means working with others for the purposes of helping them and having them work with you to help you.

A Friendly Understanding
Between Manufacturer and Dealer
Will Quickly Reflect Itself in the Sales.
Only a Loyal Dealer Can Continue to Be a Real Booster

The fruits of loyalty and co-operation are unlimited for both the dealer and the manufacturer. In the manufacturer, the pride of producing something of worth is the result. Every railroad engineer would like to drive the Twentieth Century Limited between New York and Chicago. Every intelligent operative, foreman and superintendent in the factory likes to have a share in turning out a nationally known product; one which they all consider the best of its kind. As the output grows the plant enlarges. As the motorcycles are attractively displayed in many stores and the name of the firm blazoned everywhere, a pride in the machine spreads through the factory. The quality is improved and the inspection

FOSTERING THE "COME-ALONG" SPIRIT

The Sidecar Broadens the Scope of the Motorcycle by Enabling Riders to Share Their Pleasures with Others—Low Cost and Other Advantages of the Combination

By R. F. ROGERS
President, the Rogers Manufacturing Company

IT was not more than a generation ago that it was possible for almost anyone to have a horse and buggy. This is practically out of the question for the man in the city at the present time, if for no other reason than the high price of feed.

In order that the sociability features of the horse and buggy could be enjoyed, without the equivalent expense, there were to hand the automobile and the motorcycle, and these remain today. But the popular idea of the motorcycle is that it is a means of transportation for one person only, and has no sociability features. Hence, more attention has been turned to the motorcar. This has been due to a lack of knowledge of the possibilities of the motorcycle fitted with an attachment whereby the passenger can be carried alongside the rider and hold conversation with him—the sidecar.

Car Upkeep Is High

In spite of the excellent low-priced motorcars now on the market, the high cost of maintenance is a barrier. It costs from 10 to 20 cents a mile to run the average car, while the lowest figure—about 6 cents a mile—is claimed for the Ford. This high cost keeps the mass of the people from using an automobile. We hear an expression of this constantly from people who say: "I can buy a car, but I can't keep it up." The solution of this difficulty, then, is is the motorcycle and sidecar.

The modern motorcycle, with its high-power motor of nominal 7 to 8 horsepower and actual 13 to 15 horsepower, with two and three-speed gears, is well able to take care of the slight additional load imposed by a sidecar. This year the universal use of starters, of generous brakes—often duplicated—and the provision of special lugs on the motorcycle frame for attaching the sidecars, together with the general excellence of construction, make the motorcycle of the present day ideal for sidecar work.

Attach the Sidecar

Simply attach a sidecar to your efficient motorcycle. In its frame construction it has almost the strength of a truck, and yet it compares favorably with a bicycle in lightness. It has a body of beautiful lines and finish, such as one is now familiar with, and far superior to that found on motorcars. It has easy riding qualities which are superior to those of the automobile. The attachment, braces and fittings are such that the motorcycle and sidecar can be attached firmly and held in perfect alignment—in fact, be practically a unit.

The cost of operating the motorcycle with sidecar attached will run from one-half to one cent a mile, including gasoline, oil, tires and all repair expenses. It will run from 1/10 to 1/20 of that of operating a motor car. In fact, it rivals the street car in low cost of operation. Coupled with this microscopically small cost for running, the owner has the advantage of driving an outfit which is the best-finished and most aristocratic of its class. The sidecar combination is wonderfully easily managed and tremendously powered.

The Appeal of the Sidecar—Its Convenience, Comfort and Economy—Is a Potent Force in Making Motorcycle Converts

The sidecar combination is a distinct type of vehicle, with other advantages aside from its low cost of maintenance. It can climb hills. It can plough through bad roads and traverse rough country that cannot be negotiated by any other type of motor vehicle. Carl Overholt, of Burlington, Iowa, and his wife took a sidecar trip from their home to a point in southern Missouri, and included in this a tour through the Ozark Mountains, where there had not only been no other motor vehicle, but where no wagons used the trails. This performance of a sidecar combination is remarkable when it is considered that the total weight of machine and sidecar was only 420 pounds. At the same time, the horsepower delivered at the rear wheel is almost as great as that of the small automobile weighing four times as much.

There is another decided advantage in the sidecar combination. It does not cut into soft roads nearly as deep as the automobile. It rides right over the top of most sand roads and in the very infrequent case of miring down, can be lifted out readily by the occupants.

Easily Attached

The sidecar can be attached to any motorcycle in such a way as to give perfect alignment. When the sidecar wheel is set parallel to the motorcycle wheels and the motorcycle leaned out about two degrees to compensate for the pull of the third wheel, the outfit will be found to run straight. This leaning-out of the motorcycle is possible, owing to the fact of a low center of gravity of the sidecar frame, together with the light body of the sidecar and the low position of the passenger. With a sidecar attached the motorcycle is much more accurate in its steering than any motorcar, and easier to steer on a long trip even than a solo motorcycle.

MOTORCYCLE WELL UP IN SPEED COMPARISON

In Unofficial Timing, Is Only Two Miles Per Hour Slower than the Best Automobile Performance—Relative Records in Air, Land and Water

By GILBERT SEARIGHT

IN a recent issue of the Club Journal of the Automobile Club of America are a number of estimates of speed made by motorcycles, aeroplanes, automobiles and other fast-moving constructions. The Journal gives the rate of speed in each case in knots per hour, which have been reduced by the author into miles per hour.

Following are the highest rates of speed for the various vehicles:

	Miles per hour
Motorcycle	100.00
Automobile	140.48
Aeroplane	120.10
Motor boat (Disturber IV)	61.83
Ice yacht	66.56
Torpedo boat destroyer	36.84
Battle cruiser	34.08
Motor boat (cruiser)	21.99

This table does not give the motorcycle due justice. The speed is the official F. A. M. rate made by Lee Humiston on an Excelsior in California, but the unofficial record is one mile in 26 seconds, or at the rate of 138.46 miles per hour, made at Daytona, Fla., by Glenn Curtis on his eight-cylinder freak. This will give the following table for the motorcycle, aeroplane and automobile:

	Miles per hour
Motorcycle	138.46
Automobile	140.48
Aeroplane	120.10

By this calculation the automobile has no great speed supremacy over the motorcycle, and the automobile making the 140.48 miles per hour was fitted with a 300 horsepower motor and abnormally built. As it took eight times the power to drive the automobile two miles per hour faster than the motorcycle, it is safe to assume that a motorcycle can be made the fastest of any and all motor-driven vehicles.

TECHNICAL ARTICLES ARE GOOD

April 25, 1916

Editor—Your technical essays are very good. I, for one, would appreciate more of that line.

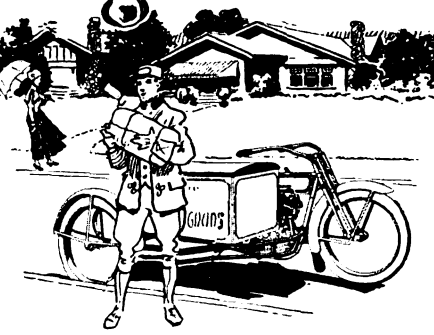
Commercial Recognition of the Motorcycle



By Alfred H Bartsch

HAS a big portion of the motorcycle's light been kept obscured by the proverbial bushel basket? That is a question that obviously should be of keen interest to every dealer, not to forget the manufacturer. The extension of the motorcycle's usefulness or serviceability into other fields beside those of pleasure, seems never to have been the subject of an extensively organized selling and advertising campaign. And yet these other fields have hardly been even scratched; in particular, that which includes the commercial use of the motorcycle. Are dealers thoroughly alive to it? Are manufacturers thoroughly alive to it? A superficial opinion would bring "No" to both questions, but would not necessarily be correct, in the case of the manufacturer, at least.

Who Has Been Negligent?

Ask a score of merchants why they do not use the motorcycle, and you will find that they really do not know. The most common answer seems to be that they never considered it. Who is to blame? Perhaps it is you, Mr. Dealer; perhaps not. The fact is, some manufacturers have not had the time to seek wider fields. Others alive to it, have simply not been able to shape matters up to the present, but this year they are going to it with a gusto, as it were.
